- Ratio Method.
- The contracts shall be adjusted to reflect the share consolidation and shall no longer have the package of Imtech shares as underlying value. The contracts shall be re-designated to the new consolidated Imtech shares.

- $$\text{Ratio} = \left(\frac{1}{W}\right) * \left(\frac{O}{N}\right)$$

N = Ex amount of shares (new) – post consolidation

Option Contract:

- **Lot Size:** The lot size will be divided by the ratio. The adjusted lot size will be specified in the final Notice. For the sake of completeness in the event the lot size becomes smaller than 0.5 shares per lot, the lot size will be rounded to zero and subsequently the contract will be delisted. The rounding difference will be neutralised by means of an equalisation payment.
- **Exercise Prices:** The exercise prices will be multiplied by the ratio. The adjusted exercise prices will be specified in the final Notice.
- **New Contract:** In such case that the ratio results in an adjusted lot size which is smaller than, or exceeding the standard lot size (100), a new Imtech contract will be introduced with contract code **IMO**. The contract **IM** will have the standard lot size of 100.
- **Outstanding orders:** All outstanding orders for **IM** will be cancelled automatically after the end of the trading session on 27 October 2014. The priority of these orders will then be lost. New orders in **IM** can be submitted as from 28 October 2014.

- **Trading:** Trading in contract IM6 will be suspended until 27 October 2014, trading is expected to resume as per 28 October 2014.
