^{*} Single Stock Futures on Italian and UK underlying stocks have a contract size of 1000.

In the case that a day is selected as a last trading day and (at a later moment) it turns out that that day is not eligible as last trading day, the last trading day will be moved to the previous eligible trading day or the EDSP of the previous trading day will be used.

^{**}An expiration day can only be selected on days that the EDSP can be determined. In general it is therefore not allowed to select a day as expiration day on which the Euronext markets are closed and/or underlying exchange is closed. When the Euronext markets are open for a half trading day, an expiration day can only be selected on this day when the underlying exchange is open for a half trading day as well.
