- 1.2 The contract specifications for the flexible stock options can be found in the attachment.
- 1.3 The AtomX service provides flexibility for investors by allowing them to tailor derivatives instruments with strike prices, option types, settlement styles and expiry dates that are not available on the central order book, and to report trades through either a web interface or a dedicated electronic connection. Clients can also benefit from the capital and operational efficiencies of clearing flexible trades in the same clearing pool as their existing Euronext positions.

The Euronext Markets comprise the markets operated by Euronext Amsterdam, Euronext Brussels, Euronext Lisbon, Euronext Paris and Euronext London, referred to respectively as the Amsterdam, Brussels, Lisbon, Paris and London markets, as relevant. Euronext refers to Euronext N.V. and its affiliates.

2. Onboarding

Members who wish to access the AtomX solution must:

* An expiration day can only be selected on days that the EDSP can be determined. In general it is therefore not allowed to select a day as expiration day on which the Euronext markets are closed and/or underlying exchange is closed. When the Euronext markets are open for a half trading day, an expiration day can only be selected on this day when the underlying exchange is open for a half trading day as well.

In the case that a day is selected as a last trading day and (at a later moment) it turns out that that day is not eligible as last trading day, the last trading day will be moved to the previous eligible trading day or the EDSP of the previous trading day will be used.
