No. NO180925DE

Issue Date:

25 September 2018

Effective Date:

1 October 2018

INTRODUCTION OF TOTAL RETURN FUTURES ON CAC 40® INDEX

Executive Summary

This Notice informs Members of the introduction of Total Return Futures on CAC 40® Index on the Paris Derivatives Market on 1 October 2018.

1. Introduction

Euronext intends to launch Total Return Futures on CAC 40® Index on the Paris Derivatives Market on **1 October 2018**:

	Trading symbol	Name	Relevant Exchange
1	FCS	Total Return Futures on CAC 40® Index	Euronext Paris

A total return future is a listed contract which replicates the economics of a total return swap. Being traded on-exchange, the contract offers centralised order book and central clearing. It is a solution to the increased capital requirements, allowing new investors to access implied equity repo as a new asset class.

The basic economics of a Total Return Futures contract include four elements, where the Synthetic Index price is publicly available and the Total Return Future Spread is quoted/agreed by market participants, with on-screen transparency.

The contract is tradable via two modes of trading: 1) Trade at Index Close (TAIC) with an index level based on the daily CAC 40® Index close and 2) Trade at Market (TAM) with a custom-defined index level. The full contract specifications are set out in attachment 1.
