Where such underlying investments span more than one geographic region the amounts are allocated based on the percentage of long market value in each jurisdiction relative to the aggregate long market value of the fund or vehicle, as the case may be. ⁽¹⁾ TFG invests substantially all its capital through a master fund, Tetragon Financial Group Master Fund Limited (TFGMF) in which it holds a 100% share.

⁽²⁾ Fully Diluted Shares adjusts the IFRS shares outstanding (87.3 million) for the impact of certain escrow shares used as consideration in the Polygon transaction and associated stock dividends (together, 3.2 million), equity-based awards (1.0 million), estimated deferred incentive fees payable in shares (2.0 million) and for the potential impact of share options issued (3.6 million), all subject to rounding. These options represent the intrinsic value of shares available for the GreenOak founders as at the end of January 2017 (0.9 million) plus potential impact of options issued to TFG's Investment Manager at the time of TFG's IPO (the "Investment Manager Options") (2.7 million). The Investment Manager Options, if exercised, will be settled by TFG on a cashless basis by issuing to the Investment Manager the net shares (based on then current share price) resulting from such exercise. IFRS Shares outstanding (approximately 87.3 million), are determined by reducing TFG Legal Shares issued and Outstanding (139.7 million) by approximately 43.1 million shares held in treasury and 9.3 million shares held in aggregate in escrow accounts, all subject to rounding.

⁽³⁾ Calculation is with reference to Estimated Net Assets Value (\$1,945.7 million) divided by Fully Diluted Shares Outstanding (approximately 97.1 million), all subject to rounding.
