Cecurity.com chooses Orange Business Services' trusted Cloud

- **Cecurity.com will host its electronic archiving and virtualization solutions on Flexible Engine, the Orange Business Services global public cloud solution**
- **This trusted solution benefits from Orange's enhanced security guarantees, and is flexible, scalable and available internationally**

Cecurity.com—Europe's leading publisher of digital safe solutions and software—announced today that it has signed a contract for its electronic archiving and virtualization solutions to be hosted on Flexible Engine, the Orange Business Services trusted public cloud. Cecurity.com chose this Infrastructure as a Service (IaaS) solution, operated by Orange Business Services, thanks to its data protection guarantees, innovative features, and ability to replicate critical data across multiple areas of availability or regions.

A key player in Europe's virtualization and digital archiving services, Cecurity.com manages more than 10 million digital safes to host pay slips and invoices securely, and counts leading companies from various sectors, including banking, technology and other highly regulated fields, among its business customers.

Striving to provide the highest guarantees of traceability and data integrity, Cecurity.com has chosen to host its solutions through a French agreement in order to protect its users against legislation from outside Europe and benefit from Orange Business Services expertise in cybersecurity and data services.

The solution is scalable and regularly incorporates new features that make it easier to use the latest innovations in Big Data and artificial intelligence, and will allow Cecurity.com to offer new services to its customers.

With an existing presence in the Benelux region and solutions deployed in 27 countries, Cecurity.com will be able to support the growth of its international operations thanks to the scalability allowed by Flexible Engine and the international presence of Orange Business Services.

"As a trusted third party, Cecurity.com attaches particular importance to digital sovereignty and the security and data protection certifications of its partners," said Alain Borghesi, Chairman and CEO of Cecurity.com. "Orange Business Services' trusted cloud fully meets these expectations."

"For Orange Business Services, trusted cloud solutions must foster innovation while ensuring well-managed information sharing. With our Flexible Engine offering, Cecurity.com has full control over its data, as well as the strongest guarantees for Orange resources that implement, operate, secure and ensure the scalability and resilience of these cloud services, with support at every step of the way throughout the transformation," adds Cédric Prévost, Director, Trusted Cloud Solutions, Orange Business Services.

Ceurity.com (MLCEC) is a software publisher aiming to maintain digital trust. The Franco-Belgian Ceurity.com group is a long-established, proven and recognized player in the market of digital safe and electronic archiving systems. Ceurity.com provides a Software as a Service (SaaS) platform of solutions to process digital document and data flows securely by archiving them to ensure compliance. The group's expertise is showcased by its unrivaled level of certification guaranteeing data preservation: [CNIL \(Commission Nationale de l'Informatique et des Libertés — French national commission for information technology and civil liberties\)](#) | [AFNOR Certification – NF Software](#) | [ANSSI – first-level security certification](#) | [FNTC – digital safe label](#) | [France Cybersecurity label](#) | [SIAF \(Service Interministériel des Archives de France — French interministerial archive service\) agreement](#)

About Orange Business Services

Orange Business Services is a network-native digital services company and the global enterprise division of the Orange Group. It connects, protects and innovates for enterprises around the world to support sustainable business growth. Leveraging its connectivity and system integration expertise throughout the digital value chain, Orange Business Services is well placed to support global businesses in areas such as software-defined networks, multi-cloud services, Data and AI, smart mobility services, and cybersecurity. It securely accompanies enterprises across every stage of the data lifecycle end-to-end, from collection, transport, storage and processing to analysis and sharing.

With companies thriving on innovation, Orange Business Services places its customers at the heart of an open collaborative ecosystem. This includes its 27,000 employees, the assets and expertise of the Orange Group, its technology and business partners, and a pool of finely selected start-ups. More than 3,000 multinational enterprises, as well as two million professionals, companies and local communities in France, put their trust in Orange Business Services.
