EXMAR and GASUNIE join forces in securing energy supply

EXMAR is pleased to announce that it has reached an agreement for a 5-year charter for the employment of its 600 MMSCFD regasification barge FSRU S188 (Floating Storage and Re-Gasification Unit) with GASUNIE LNG Holdings BV (GASUNIE).

GASUNIE will use the FSRU S188 as floating LNG import terminal at Eemshaven in Groningen, the Netherlands, in view of the geopolitical developments currently going on in Europe and the increased emphasis of governments on the security of energy supply.

The objective is to deploy the FSRU S188 and have the terminal up and running by the end of the third quarter of 2022.

"We are happy to reach this agreement with GASUNIE. It proves the possibilities of our floating infrastructure solutions as a quick to market and competitive solution for securing energy supply to communities, industries and households. We are proud that GASUNIE entrusts EXMAR with this LNG import project building upon our expertise in this area over the past decade", commented Nicolas Saverys, EXMAR's Executive Chairman.

EXMAR

EXMAR is a provider of floating solutions for the operation, transportation and transformation of gas. EXMAR's mission is to serve customers with innovations in the field of offshore extraction, transformation, production, storage and transportation by sea of liquefied natural gases, petrochemical gases and liquid hydrocarbons. EXMAR creates economically viable and sustainable energy value chains in long-term alliances with first class business partners.

EXMAR designs, builds, certifies, owns, leases and operates specialized, floating maritime infrastructure for this purpose as well as aiming for the highest standards in performing commercial, technical, quality assurance and administrative management for the entire maritime energy industry.

EXMAR is listed on Euronext Brussels (EXM) and is part of the BEL Small Index.

GASUNIE

Gasunie is a European energy-infrastructure company. Gasunie's network is one of the largest high-pressure pipeline networks in Europe, comprising over 17,000 kilometres of pipeline in the Netherlands and northern Germany. Gasunie provides natural and green gas transport services through its subsidiaries, Gasunie Transport Services B.V. (GTS) in the Netherlands and Gasunie Deutschland in Germany. With its cross-border gas infrastructure and services, Gasunie facilitates TTF, which has become the leading European gas trading point. Gasunie also provides other gas infrastructure services, including gas storage and LNG. Gasunie wants to help accelerate the transition to a CO2-neutral energy supply and believes that gas-related innovations, for instance in the form of renewable gases such as hydrogen and green gas, can make an important contribution. Both existing and new gas infrastructure play a key role here. Gasunie also plays an active part in the development of other energy infrastructure to support the energy transition.
