## ABOUT HYDROGÈNE DE FRANCE (HDF ENERGY)

HDF Energy is the global pioneer of high-power hydrogen power plants. The company develops, finances, builds, and operates two power plant models that produce non-intermittent, non-polluting renewable energy, 24/7:

- **Renewstable®** (POWER TO POWER): Multi-megawatt power plants producing firm power from an intermittent renewable energy source (wind or solar) and massive energy storage in the form of green hydrogen generated on site;
- **HyPower®** (GAS TO POWER): Multi-megawatt power plants producing electricity on demand from decarbonized hydrogen coming from gas transport networks or from industries wasting unvalued hydrogen.

HDF Energy is also an industrial company that will mass produce from 2023 in its French factory the most strategic component of its power plants: high-power fuel cells. By taking part in this industrial activity, HDF Energy, which is already a worldwide major player in the power sector, will also become a player in the heavy marine and rail mobility. Together with strategic partners, the company is developing hydrogen freight locomotives and projects for the propulsion of large ships and the generation of their auxiliary power.

Present on five continents, HDF Energy has a business portfolio of more than 5 billion euros to date.

HDF Energy is listed on Euronext Paris.
