

25 November 2025

**Accsys Technologies PLC**

**("Accsys" or "the "Group")**

**Launch of Accsys Sustainability Plan**

*"Accsys Cares" to build long-term value for all stakeholders*

Accsys, the world's leading supplier of premium, high performance and sustainable wood building materials, is pleased to announce the launch of its first comprehensive Sustainability Plan, "Accsys Cares", marking a significant milestone in the Group's commitment to building long-term sustainable value.

This plan sets out ambitious new targets, including a commitment to Net Zero for Scope 1, 2, and 3 carbon emissions by 2050 and mid- and short-term decarbonisation targets. It builds on the Group's ongoing work to understand and reduce its environmental footprint.

"Accsys Cares" is the result of a rigorous double materiality assessment, engaging both internal and external stakeholders, including customers, partners and investors, to identify the sustainability issues that matter most. After a thorough analysis of impacts, risks, and opportunities, the Group identified eight material topics, grouped under four strategic pillars: **Planet, People, Profit, and Governance**.

The new targets within the plan are fully aligned with the FOCUS strategy and require no additional investment to achieve the mid- and short-term goals.

Accsys is already recognised as a leader in sustainability, ranking in the top 20% of its industry sector for ESG performance according to the S&P Corporate Sustainability Assessment (CSA). Our products help the world build more sustainably, capturing carbon and delivering exceptional durability.

Accsys will report on its progress in the annual report, ensuring transparency and accountability as it continues to lead the way in sustainable innovation.

**Jelena Arsic van Os, Chief Executive Officer, said:**

*"At Accsys, we're disrupting the building materials industry with durable, sustainable wood products that enable the world to build better. Our 'Accsys Cares' plan builds on our strong foundation and sets out how we will continue to grow responsibly, creating long-term value for our customers, investors, employees, and communities."*

**Notes to editors:**

**Accsys** (Accsys Technologies PLC) is disrupting the building materials industry with its high-performance wood products and proprietary technology. Driven by its purpose of "changing wood to change the world", Accsys takes fast-growing, certified sustainable wood and turns it into long lasting, eco-friendly building materials - backed by warranties of up to 50 years. Operating in the rapidly growing global wood construction market, Accsys has an established manufacturing footprint in Europe and North America with active product distribution in more than 25 countries. Accsys is listed on the London Stock Exchange AIM market and on Euronext Amsterdam, under the symbols 'AXS'.

Accsys is a Participant of the United Nations Global Compact and adheres to its principles-based approach to responsible business.

**Accoya**® is the global leader for high-performance wood. Created through a proprietary acetylation process developed by Accsys, Accoya delivers superior durability and stability, backed by an industry-leading warranty of up to 50 years. It holds Cradle to Cradle Certified® Gold (Full Scope - V3.1) status for its circular economy benefits. Combining the natural beauty of wood with exceptional performance, Accoya is the preferred choice for windows, doors, cladding, and decking - outperforming hardwoods and manmade materials in durability, stability, and sustainability.

**Tricoya**® acetylated wood chips redefine panel products, creating next-generation panels that thrive outdoors and in wet environments. Recognised as the biggest leap in wood composites in over 30 years, Tricoya panels combine the strength and versatility of traditional products with unmatched durability and eco-friendliness - backed by a warranty of up to 50 years - expanding design and construction possibilities like never before.
