## **WPU - Waste Plastic Upcycling A/S is Awarded**

### **“Most Innovative Plastic Waste Conversion Firm 2022-2023”**

Waste Plastic Upcycling A/S (Euronext Growth Oslo: WPU) ("Waste Plastic Upcycling" or "WPU" or the "Group" or the "Company") is pleased to announce that the Company is awarded :

### ***“Most Innovative Plastic Waste Conversion Firm 2022-2023”***

by the independent publication “International Investor Magazine”.

Niels Stielund, Chairman of the Board said:

*“The Board of directors is very proud of this independent international recognition of the great work of WPU. I wish to acknowledge everybody who has contributed to our journey this far. First and foremost, our employees, management, investors and cooperation partners such as VITOL and Nykredit. “*

*“The International Investor Awards were set up to help individuals both inside and outside of the industry to nominate financial institutions and listed companies. The majority of subscribers are based in geographical areas of investor interest. The team has used a wide range of criteria and multiple research platforms to inform its decision for the 2022 awards. The critical eye of experienced business journalists and judges was combined with the comprehensive information gathered by the research team. “*

The official announcement will be in January 2023 in the edition distributed at the World Economic Forum and will be published here : <https://www.intinvestor.com/magazines/>

About WPU:

Waste Plastic Upcycling is a Danish company focused on upcycling plastic waste to oil, that may be used as full range naphtha or may be distilled to kerosene/jet fuel. The strategy and main goal of Waste Plastic Upcycling A/S is to upcycle end-of-life plastic waste by using its batch pyrolysis technology. The company aims for further expansion, in the European market as well as globally. WPU is well positioned for this expansion with its proven technology that is peer-leading in respect of low CAPEX, high yield and fast pace construction which will set the future standards in the growing market for plastic pyrolysis within the waste plastic industry.
