14 BANKS. HUNDREDS OF YEARS OF EXPERIENCE:

The SpareBank Alliance

Early in the 19th century the savings banks were started all across Norway, by the communities themselves, to have a savings vehicle and to help grow local economies and infrastructure.

Our history begins in 1823, when SpareBank 1 SMN opened its doors in Trondheim.

More than 170 years later, in 1996, The SpareBank 1 Alliance was formed. The goal was to make the banks stronger by working together. Later, several opportunities for offering the public other financial services than lending were integrated. At the same time the SpareBank 1 brand was born. Today it is a household brand name all over Norway.

The Alliance strengthens each of the 14 local bank's competitiveness and profitability and it ensures each bank's future independence and regional ties. The shares of SpareBank 1 banks listed on the Oslo stock exchange have provided strong investment returns since the Alliance was formed, through the financial crisis and the corona pandemic, as well as business cycles in between.

A key contributing reason is sound lending. Part of the core strategy for the banks is a regional banking principle, intimate knowledge of the customer base, and in the last couple of years, a strong focus on sustainability.

SpareBank 1 is Norway's second largest finance group in terms of assets. It plays a key role in the country's residential mortgage market.

Big or small, two hundred years old or established in the 20th century: All the banks in the SpareBank 1 Alliance have made a difference for Norwegians and their daily lives, businesses and local initiatives all over the country – and they still do. Today the old saving bank of the 19th century is, as a SpareBank 1 Alliance member, a fully fledged universal bank which shares a part of its profits with the society in which it operates.

SpareBank 1 Østlandet is the biggest bank measured in share capital in Boligkreditt. SpareBank 1 Østlandet has 36 branches and approximately 370 000 customers in the regions of Innlandet, Oslo and Akershus.

And today approximately 80 000 Norwegian homes and recreational properties are financed by Sparebank 1 Østlandet.

The banks in the SpareBank 1 Alliance have made a difference for Norwegians and their daily lives, businesses and local initiatives all over the country – and they still do.

Statement of the Board of Directors of SpareBank 1 Boligkreditt AS, 4th Quarter 2022

SpareBank 1 Boligkreditt's purpose

SpareBank 1 Boligkreditt AS ('Boligkreditt', 'SpaBol', or 'The Company') is a specialized covered bond issuer. It is regulated as a credit institution and licensed by the Norwegian Financial Supervisory Authority (Finanstilsynet) and is operating according to the legislation for covered bonds in Norway¹.

The purpose of the Company is solely to provide funding for its owner banks by buying qualifying residential mortgage loans from them with a loan-to-value ("LTV") of up to 75 per cent and financing these through the issuance of covered bonds².

The Company, which is based in Stavanger, Norway, is owned by banks throughout Norway and which are all members of the SpareBank 1 Alliance. The Company pays the net interest margin earned on mortgages to its owner banks, with deductions for its funding and operating costs. This margin is accounted for as commissions to owner banks, which are obligated to maintain the Company's equity capitalization at or above regulatory requirements.

The Company's issuances of covered bonds mainly take place under the EUR 35 billion Global Medium Term Covered Note Programme (GMTCN Programme). This Programme was updated on April 26, 2022 and is available on the Company's home page: <https://spabol.sparebank1.no>.

Moody's Ratings Service evaluate the credit quality of the issuances under the GMTCN Programme. The issued covered bonds are rated Aaa.

Cover pool and outstanding covered bonds³

SpareBank 1 Boligkreditt's cover pool consists of residential mortgages and liquid, highly rated assets as well as derivatives hedging liabilities in a foreign currency and/or at fixed rates. The chart below illustrates the balances as of December 31, 2022. The balances are based on a new nominal principle introduced from the 3rd quarter 2022 where bonds (covered bonds issued as well as bonds held within liquid assets) are presented at par. This means that derivatives hedging these instruments, tailored at the time of issuance to exactly transform a bond's fixed annual coupon to a NOK 3-month floating rate basis over the whole tenor of a bond, are effectively incorporated within the nominal values of the bonds.

¹ The covered bond legislation in Norway is from July 2022 incorporates the Directive (EU) 2019/2162

² The limit for instalment mortgages is 75 per cent, while mortgages which have no scheduled repayment structure are limited to 60 per cent. There is a regulatory minimum amortization requirement of 2.5 per cent annually for new mortgages with a LTV at 60 per cent or above.

³ The source is the cover pool asset liability test for overcollateralization as of December 31, 2022 (also included as a note to the financial statements).

The amount of **liquid assets** varies over time and the variation is solely a result of the Issuer's liquidity risk management (and regulatory requirements), whereby upcoming redemptions are refinanced prior to the maturity of outstanding bonds (minimum 180 days) with bond proceeds invested as liquid assets. Liquid assets are covered bonds with a triple-A rating, SSA or government bonds with a triple-A rating, or short-term cash deposits and repos (please see the cover pool statistical reports on spabol.no for details on the composition of liquid assets).

Derivatives are used solely to hedge currency and interest rate risk. They are tailored to exactly match the cash flows related to the bonds they hedge, for the full duration of the bond. Swap counterparties are subject to certain rating criteria and are in all cases banks other than the Company's owner banks. Counterparties post collateral to Boligkreditt for its swap exposures.

The table below provides an overview of the **residential mortgages** in the cover pool, as well as the overcollateralization.

Residential mortgages key figures

	Q4 2022	Q3 2022	Q2 2022	Q1 2022	Q4 2021
Weighted Average Current LTV (%)	49.2 %	48.3 %	48.3 %	50.0 %	51.0 %
Weighted Average Original LTV (%)	60.1 %	60.2 %	60.2 %	60.1 %	59.9 %
Average Loan Balance (NOK)	1,702,210	1,680,036	1,646,872	1,624,097	1,593,078
Number of Mortgages in Pool	148,328	145,739	144,086	141,872	139,495
Pct. of non first-lien mortgages	0.0 %	0.0 %	0.0 %	0.0 %	0.0 %
Overcollateralization	5.3 %	5.3 %	5.4 %	5.6 %	5.7 %

Key developments fourth quarter 2022

NOK issuance of 15.02 billion took place during the fourth quarter, for a total of NOK 37.22 billion issued during all of 2022, a record. SpaBol also issued an inaugural CHF 210 million covered bond and EUR 3.5 bn during the year. Credit spreads on covered bonds have generally widened over 2022 in EUR and NOK, along with the broader market. NOK levels have retracted some during the 4th quarter, and this enticed additional substantial issuance from SpaBol and other Norwegian covered bond issuers into the first weeks of 2023.

The residential mortgage lending volume which SpaBol finances grew by 3.1 per cent in the 4th quarter and the growth totaled 13.5 per cent during all of 2022, which is strong growth. The volume of mortgages financed grew significantly above the underlying growth in mortgage lending among the SpareBank 1 banks, as the banks utilized covered bond funding more than from other sources during the year. The financed mortgage volume stands at NOK 253 billion at the end of the fourth quarter.

Norway has implemented the EU's harmonization directive for covered bonds, as well as changes to Article 129 in CRR (Capital Requirement Regulation). These changes became effective in July 2022. SpaBol will issue European Covered Bonds (Premium) forthwith. Of note is an increase in the regulatory overcollateralization requirement for cover pools to 5 per cent from 2.5 per cent prior. The Issuer has a 5.3 per cent overcollateralization as of December 31, 2022. Substantial additional cover pool reserves – qualified mortgages – are however available on the balance sheets of SpaBol's issuer banks.

Accounts as per 31.12.2022

The accounts have been prepared in accordance with the International Reporting Standards (IFRS) as adopted by the EU and published by the International Reporting Standards Board (IASB).

The Board views the accounts as presented to be a true representation of SpareBank 1 Boligkreditt's operations and financial position as of the end of Q4 2022. Numbers in brackets refer to the corresponding period last year for comparison.

The total balance sheet at December 31, 2022 amounted to 288 (258) billion kroner. The main reason behind this increase is growth in the financed volume of mortgages of NOK 253 billion vs. NOK 223 billion a year earlier.

The Company had in 2022 net interest income of NOK 1.644 (2.344) million, which includes both mortgage interest and interest income from liquid assets. The decrease, despite a higher volume of mortgages on the balance sheet, is mainly due to a reduced mortgage net lending margin. This happens because the 3-month NIBOR rate, which is the funding basis for covered bonds, has increased faster and by more than the variable mortgage rate over the year. Mortgage rate increases must by law be delayed by 6 weeks (8 weeks from 2023) before becoming effective after announcement. All of the Company's mortgages are at a variable rate and Boligkreditt has the right to set and change the variable rate on its mortgage loans, but will in practice always defer to the SpareBank 1 bank which originated the loan for this decision. Banks set and change their variable mortgage rates in competition with other banks and are often guided by changes in the central bank policy rate when doing so. Commission expense to SpareBank 1 banks, which are the payments of most of the net interest margin to the Issuer's loan originating owner banks, show a corresponding decrease.

The cost of operations for 2022 was NOK 44.3 (38.9) million. The majority of operating costs are for expenses related to the Company's bond issuances, IT operations as well as personnel related expense.

IFRS 9 loan loss provisions increased by NOK 16.5 million (decreased by 15) to NOK 31.5 million. No actual loan losses have occurred. Credit spread widening on the Company's bonds held in its liquidity portfolio produced

unrealized valuation losses during the period, mainly during the first half of the year. These, along with increased loan loss provisions and temporary mark to market losses on the floating NOK leg of swaps hedging fixed rate issued covered bonds in EUR and NOK is the main reason for a reduced operating result of NOK 45.8 million (131.5) before tax. This operating result includes no deduction for scheduled interest payments to Additional Tier 1 bondholders, which are classified as distribution to equity capital.

The Company's own liquid assets were approximately NOK 30.3 (23.9) billion as of the end of the fourth quarter 2022. The volume of Boligkreditt's liquid assets is rules driven. Liquid assets are cash and highly rated, highly liquid bonds being held as a function of refinancing the Company's upcoming bond maturities at least six months ahead of expected maturities. The volume of liquid assets is, at a minimum, managed to meet the 180-day minimum liquidity rule in the EU covered bond harmonization directive.

Risk Aspects

SpareBank 1 Boligkreditt, as a licensed and regulated covered bond issuer, is subject to strict rules regarding its exposure to credit, market, and liquidity risks. This fact, and the aim of the maintenance of the Moody's Aaa rating, means that the Company is subject to low levels of risk and places strong emphasis on risk control.

Credit Risk is defined as the risk that losses can occur as a consequence of that customers and others not having the ability or willingness to meet their obligations to SpareBank 1 Boligkreditt. Because the Company buys residential mortgages within 75% of the value of the objects on which the mortgages are secured, the Board of Directors concludes that the credit risk is lower than for Norwegian banks in general.

Market risk is defined as the risk of losses due to changes in market rates, i.e. interest rates, exchange rates and the prices of financial instruments. SpareBank 1 Boligkreditt issues a materially larger share of covered bonds in currencies other than its operational currency NOK. However, all borrowing and investments in a foreign currency, as well as such with a fixed rate, have been hedged by financial currency- and/or interest rate swap agreements. Some natural hedging may occur with EUR assets matching EUR liabilities. The collective cash flow therefore matches borrowing in Norwegian kroner with floating rate conditions (NIBOR 3 months). The Company receives cash collateral from its counterparties in derivative agreements.

The bonds held in the Company's liquidity portfolio are mainly Nordic covered bonds and German supra sovereign and agencies (agencies guaranteed by the German government) with a triple-A rating from Fitch, Moody's or S&P. These bonds are held on a 3 month basis either as FRNs or as swapped fixed rate bonds. Deposits are placed in banks with a minimum rating of A/A2. Cash is also placed in reverse repos with approved counterparty banks, with AAA rated securities as collateral.

The Company had as of December 31, 2022 only moderate interest rate risk, and small amounts of currency risk.

Liquidity risk is defined as the risk that the Company is not able to meet its obligations at maturity or to finance the purchase of loans at normal terms and conditions. Liquidity risk is managed based upon a liquidity strategy approved by the Board of Directors. According to the strategy, SpareBank 1 Boligkreditt AS shall maintain a liquidity reserve with a minimum size equal to or more than all debt maturities within the next 6 months. The Board of Directors views SpareBank 1 Boligkreditt AS's liquidity situation as good.

Operational risk is defined as risk of loss due to error or neglect in transaction execution, weakness in the internal control, or information technology systems breakdowns or malfunction. Reputational, legal, ethical and competency risks are also elements of operational risk. The risk is assessed by the Board of Directors to be moderate.

The Company spends much time identifying, measuring, managing and following up on central areas of risk in such a way that this contributes to meeting its strategic goals. The notes 24 through 28 in the 2021 annual accounts provide further information.

Macroeconomic development and outlook⁴

There is an expectation of lower growth in 2023, after several interest rate increases (which started at the end of 2021). While Statistics Norway is the source for the below forecast, other sources see a shallow recession in 2023. Private consumption is seen as vulnerable, as is business investment, after energy price and interest rate increases. Household real income growth was negative in 2022 and is also expected negative in 2023, although CPI growth for 2023 overall is expected below the 5.8 per cent increase in 2022. Unemployment is expected a little higher in 2023.

With high energy prices, weighing on business' growth outlook and thus employment levels, Norway's current account surplus to GDP as an energy exporter, is particularly high, at nearly 28 per cent in 2022. Oil and gas investments are expected to increase significantly from 2023 onwards, due to the increased demand from Europe.

Housing investment (construction) has, with the exception of 2019, delivered negative GDP contributions from 2018 through 2022, and is expected negative in 2023, as mortgage interest rates are expected towards or around 5 per cent for variable mortgage loans. The housing market price index appreciated by 1.5 per cent overall in 2022, though the 2nd half saw a correction of 6.7 per cent (July-December). Several analysts are expecting a low single digit contraction in 2023, but within a broader range of possible outcomes. In response to increased market rates, mortgage lending regulations were relaxed somewhat from January 2023; most importantly the interest stress test requires banks to add 3 percentage points to the offered rate to stress the mortgage loan applicant's repayment ability (reduced from 5 per cent).

Summarized for a few macroeconomic indicators, the recent data and forecast for the next period are as follows:

Recent data and forecast (per cent)	2019	2020	2021	2022	2023
Mainland GDP growth	2.3	-2.8	4.1	3.8	1.2
Private consumption growth	1.0	-6.2	4.5	6.8	0.8
Investments growth	9.5	-4.1	-1.2	4.7	0.3
Unemployment rate	3.9	4.7	4.4	3.3	3.7
CPI growth	2.2	1.3	3.5	5.8	4.9
Annual wage growth	3.5	3.1	3.5	3.8	4.4
Current account surplus to GDP	3.8	1.1	13.5	27.8	18.4

Source: Statistics Norway (SSB) September 9, 2022

⁴ Macroeconomic projections have been sourced from Statistics Norway as of December 9, 2022.

Future prospects of the Company

The Company has a portfolio of residential mortgage loans with an average loan to value (LTV) around 50 per cent, and no loans are in default. The maximum allowable level for a mortgage in a cover pool is 75 per cent LTV, with amounts above that level not being eligible as a cover pool asset.

SpareBank 1 Boligkreditt's residential mortgage portfolio is well diversified, albeit weighted towards the eastern, central and northern regions in Norway. Mortgage loans in the cover pool are very granular (average size of 1.7 million kroner). The banks in the SpareBank 1 Alliance are required to keep reserves of eligible (i.e. cover pool pre-qualified) mortgages in order to provide replacement assets should this become necessary (i.e. if residential price declines increase LTVs above the eligibility limit for mortgages in the pool). Such reserves in the banks are tested regularly to verify that a 30 per cent decline in market real estate prices leaves each member bank with sufficient qualifying reserves for replenishing the cover pool.

The Board of Directors views Boligkreditt as well capitalized with a capital coverage ratio of 22.2 per cent against a total requirement, including all buffers, of 17.0 per cent (Pillar 1) plus 0.9 per cent (Pillar 2). The countercyclical buffer capital requirement increased to 2.0 per cent as of December 31, 2022 and will further increase to 2.5 per cent as of March 31, 2022.

Total equity Tier 1 capital is 19.9 per cent against a requirement, including buffers, of 15.9 per cent. Common equity capital was 18.4 per cent against a requirement, including all buffers, of 14.4 per cent. It is the Company's policy to maintain capital ratios slightly above the regulatory requirements (a management buffer). When required, additional common equity is paid in by the owner banks in the regular course of business, usually in connection with increases in transferred mortgage volume. Additional Tier 1 and Tier 2 capital is raised in the Norwegian domestic capital market.

The Board of Directors views prospects for the Company to continue to be good and stable, despite the changed macroeconomic forecasts towards lower growth ahead. This is based on several elements: a strict qualifying process for loans to become part of the cover pool (bank lending practices, mortgage lending regulations and cover pool qualification requirements), a high degree of diversification and granularity of the mortgages in the pool, as well as the robustness of the Norwegian economy, including the strong financial resources available to the Norwegian state. The Board also bases this conclusion on the low average LTV of the mortgage portfolio, no defaults or loans in arrears, and a strong history and institutional framework in Norway for mortgage loan performance.

* * *

THE Board of Directors affirms its conviction that the financial accounts present a correct and complete picture of the Company's operations and financial position at the end of the fourth quarter 2022. The financial accounts including notes are produced under the assumption of a going concern.

Equity is paid in by the Company's parent banks when a requirement arises, which is when the Company acquires more mortgage loans, or there are other changes to risk weighted assets, or according to changes in capitalization rules. SpareBank 1 Boligkreditt is subject to the same capital adequacy rules under Pillar 1 as banks in general. Each parent bank has signed a Shareholders Agreement with the Company, which enshrines the obligation to contribute equity and maintain capitalization at minimum regulatorily required levels.

Notes to the Accounts

Note 1 General information

1.1 Basis for preparation

SpareBank1 Boligkreditt AS quarterly accounts have been prepared in accordance with the International Financial Standards (IFRS). The accounts have been produced in accordance with IAS 34 reporting for a partial year.

The presentation currency is Norwegian Kroner (NOK), which is also the Company's functional currency. All amounts are given in NOK thousand unless otherwise stated.

The interim financial statements are not audited.

1.2 Segments

The Company has only one segment, which is the mortgage lending to real customers. The segment consists of lending to private individuals and all loans have been acquired from the member banks of the SpareBank 1 alliance.

1.3 Estimates and assessments regarding the use of accounting principles

The preparation of the financial information involves management's estimates which affect the implementation of accounting principles and thereby accounting values for assets, liabilities, revenue and costs. These estimates have been described in the notes.

Note 2 Net Interest Income

NOK 1 000	2022	2021
Interest income		
Interest income from certificates, bonds and deposits	538,839	146,460
Interest income from residential mortgage loans	6,664,550	4,214,331
Total interest income	7,203,389	4,360,791
Interest expense		
Interest expense and similar expenses to credit institutions	22,154	2,920
Interest expense and similar expenses on issued bonds	5,430,349	1,925,289
Interest expense and similar expenses on subordinated debt	50,230	31,078
Recovery and Resolution Fund *	52,246	48,195
Other interest expenses	4,413	8,903
Total interest expense	5,559,392	2,016,385
Net interest income	1,643,996	2,344,405

* From 2019, SPB1 Boligkreditt has been incorporated into the Norwegian Bank Recovery and Resolution Fund.

Note 3 Commissions to Sparebank 1 banks

NOK 1 000	2022	2021
Commission expense		
Commission expense to SpareBank 1 banks	1,249,440	2,097,594
Total commission expense	1,249,440	2,097,594

These amounts represent Boligkreditt's expenses in form of commissions to its owner banks, which originate the mortgage loans transferred to the Company. The amounts are calculated by subtracting all of the Company's funding costs and estimated operational costs, including costs for additional Tier 1 bonds outstanding, from each mortgage interest income.

Note 4 Net Gains from Financial Instruments

NOK 1 000	2022	2021
Net gains (losses) from financial liabilities	15,955,802	11,065,296
Net gains (losses) from financial derivatives at fair value, hedging liabilities (hedging instrument)	-16,331,646	-10,762,189
Net gains (losses) from financial assets	-206,058	-498,643
Net gains (losses) from financial derivatives at fair value, hedging assets (hedging instrument)	293,956	104,209
Net gains (losses)	-287,945	-91,327

The Company utilizes hedge accounting as defined in IFRS for issued fixed rate bonds (covered bonds) with derivatives (swaps) which hedges fixed rates to floating and foreign currencies to Norwegian kroner. The hedges are individually tailored to each issued bond and exactly matches the cash flows and duration of the issued bonds. Some liabilities in foreign currency are hedged with natural hedges (corresponding assets in the same currency) and this may cause the valuation differences between assets and liabilities. There may also be valuation differences between liabilities and hedges due to the the amortization of issuance costs and bonds issued at or below par value.

SpareBank 1 Boligkreditt AS manages its liquidity risk by refinancing its outstanding bonds ahead of expected maturities and keeping proceeds as a liquidity portfolio. Fixed rate bonds and bonds in other currencies than Norwegian kroner are hedged using swaps, unless forming part of a natural hedge. These positions are valued at fair value though differences may occur because the valuation of the bonds include a credit risk/spread element which the swaps do not contain. Included in assets in the table are also investments in short term, highly rated bonds from funds received from swap counterparties for collateral purposes, with a corresponding collateral liability. Such investments do not have swap hedges.

All derivatives are valued at fair value according to changes in market interest rates and foreign exchange rates. Changes in valuations from the previous period is accounted for in profit and loss.

Note 5 Salaries and Remuneration

NOK 1 000	2022	2021
Salaries	11,060	10,650
Salaries reinvoyced to SpareBank1 Næringskreditt*	-3,344	-2,524
Pension expenses	2,643	-1,219
Social insurance fees	2,779	3,379
Other personnel expenses	684	415
Total salary expenses	13,822	10,701
Average number of full time equivalentents (FTEs)	7	7

* The company's employees have shared employment between SpareBank 1 Næringskreditt and SpareBank 1 Boligkreditt. All remuneration is effected through SpareBank 1 Boligkreditt and a portion is reinvoyced to SpareBank 1 Næringskreditt. The company also buys administrative services from SpareBank 1 SMN and SpareBank 1 Gruppen.

Note 6 Other Operating Expenses

Liability	-10,034,376	-2,336,702
Total financial derivative contracts		
Nominal amount	168,418,631	176,813,697
Asset	3,706,664	7,586,258
Liability	-11,822,504	-2,427,007

All derivative contracts exist for the purpose of hedging changes in interest rates and currency exchange rates.

* Change due to basis swap spread adjustment	2022	2021
Total asset(+)/liability(-) derivatives	3,706,664	-2,427,007
Net gain (loss) on valuation adjustment of basisswap spreads	283,423	-339,859
Net asset(+)/liability(-) derivatives	3,990,087	-2,766,866

Basis swaps are currency swaps and are entered into at a certain cost (basis swap spread) between SpareBank 1 Boligkreditt and banks which offer such swaps and which have signed an ISDA agreement with the Company. Changes in the cost are valued each quarter across all of the Company's swaps in accordance with the IFRS rules. The effect may be material from quarter to quarter because the Company's portfolio of swaps is extensive. All basisswap value changes will reverse over time towards the point of termination of the swaps. Changes in basis swap valuations are not included in net income, but is included in other comprehensive income and in equity.

* For issued securities, 176 billion are hedged with swaps. This means that foreign currency and fixed rate exposure is effectively converted to a 3 month NIBOR exposure in Norwegian kroner.

Note 14 Financial Instruments at Fair Value

Methods in order to determine fair value

General

The interest rate curve that is used as input for fair value valuations of hedging instruments and hedging objects consists of the NIBOR-curve for maturities less than one year. The swap-curve is used for maturities exceeding one year.

Interest rate and currency swaps

Valuation of interest rate swaps at fair value is done through discounting future cash flows to their present values. Valuation of currency swaps will also include the element of foreign exchange rates.

Bonds

Valuation of bonds at fair value is done through discounting future cash flows to present value.

With effect from 2009 SpareBank 1 Boligkreditt AS has implemented the changes in IFRS 7 in relation to the valuation of financial instruments as of the date of the financial accounts. The changes require a presentation of the fair value measurement for each Level. We have the following three Levels for the fair value measurement:

Level 1: Quoted price in an active market. Fair value of financial instruments which are traded in active markets are based on the market price at the balance sheet date. A market is considered to be active if the market prices are easily and readily available from an exchange, dealer, broker, industry group, pricing service or regulating authority and that these prices represent actual and regular market transactions on an arm's length basis.

Level 2: Valuation based on observable factors. Level 2 consist of instruments which are not valued based on listed prices, but where prices are indirectly observable for assets or liabilities, but also includes listed prices in not active markets.

Level 3: The valuation is based on factors that are not found in observable markets (non-observable assumptions). If valuations according to Level 1 or Level 2 are not available, valuations are based on not-observable information. The Company has a matter of principle neither assets nor liabilities which are valued at this level.

The following table presents the company's assets and liabilities at fair value as of 31.12.2022

NOK 1 000				
	Level 1	Level 2	Level 3	Total
Certificates and bonds	29,426,208	-	-	29,426,208
Financial Derivatives	-	3,990,087	-	3,990,087
Total Assets	29,426,208	3,990,087	-	33,416,295
Financial Derivatives	-	11,822,504	-	11,822,504
Total Liabilities	-	11,822,504	-	11,822,504

Issued debt is formally accounted for at amortized cost, and is therefore not listed in the table above. However, when issued debt is hedged with derivatives it is in effect accounted for using hedge accounting and fair value option. This means that approximately NOK 174 billion of issued debt are also accounted for according to Level 2 above, while the remaining debt are accounted for at amortized cost.

The following table presents the company's assets and liabilities at fair value as of 31.12.2021

NOK 1 000				
	Level 1	Level 2	Level 3	Total
Certificates and bonds	26,195,602	-	-	26,195,602
Financial Derivatives	-	7,586,258	-	7,586,258
Total Assets	26,195,602	7,586,258	-	33,781,859
Financial Derivatives	-	2,766,866	-	2,766,866
Total Liabilities	-	2,766,866	-	2,766,866

Issued debt is formally accounted for at amortized cost, and is therefore not listed in the table above. However, when issued debt is hedged with derivatives it is in effect accounted for using hedge accounting and fair value option. This means that approximately NOK 176 billion of issued debt are also accounted for according to Level 2 above, while the remaining debt are accounted for at amortized cost.

Note 15 Other Liabilities

NOK 1 000	2022	2021
Employees tax deductions and other deductions	653	2,475
Employers national insurance contribution	1,071	1,617
Accrued holiday allowance	1,223	1,120
Commission payable to shareholder banks	39,576	156,877
Deposits*	4,646	2,134
Pension liabilities	2,784	4,181
Expected credit loss unused credit lines (flexible loans)	231	84
Accounts payable, securities	73,863	2,387
Other accrued costs	5,731	5,744
Total	129,777	176,618

The Company does not have an overdraft facility or a revolving credit facility as of 31.12.2022

* Deposits represents temporary balances paid in by customers in excess of the original loan amount.

Accounts payable, securities, are such amounts that have been transacted, but not yet settled.

Note 16 Asset Coverage Test

The asset coverage is calculated according to the Financial Services Act § 2-31 (Covered Bond Legislation). The asset coverage test excludes as a cover pool asset any shares of mortgages representing loan to value above the legal maximum of 75 percent.

In addition any defaulted loans, i.e. loans in arrears at or beyond 90 days, are excluded from the asset coverage. Substitute (liquid) assets are included at market values.

NOK 1 000	30.06.2022	30.06.2021	2021

Liquid assets	4,866,972	11,528,387
Cash outflow next 30 days	4,854,322	11,244,655
LCR ratio	100.26 %	102.52 %

Net Stable Funding Ratio (NSFR)	2022	2021
Available amount of stable funding	247,275,503	224,551,972
Required amount of stable funding	217,645,930	228,545,479
NSFR ratio	113.61 %	98.25 %

Note 17 Capital Adequacy

The primary goal for the Company's management of capital reserves is to ensure compliance with laws and regulatory requirements. The company's owner banks pay in additional core capital on an as-needed basis, according to the covered bond funding function that Boligkreditt delivers to its banks.

As of December 31, 2020 the Norwegian national implementation of the EU's CRR/CRD IV was amended, which means that the average risk weight on lending secured by residential property in Norway cannot be lower than 20 per cent.

The European Union has approved new regulatory requirements, CRD IV, which is implemented in Norway. The requirement for SpareBank 1 Boligkreditt includes:

- Minimum core equity Pillar 1: 4.5 per cent.
- Additional Tier 1 equity capital 1.5 per cent and additional Tier 2 capital 2.0 per cent (can be held as Tier 1 and Tier 2, alternatively as core equity capital).
- Conservation buffer: 2.5 per cent core capital.
- Systemic risk buffer: 4.3 per cent core equity.
- Countercyclical buffer: 2.0 per cent core equity.

The Issuer has an additional Pillar 2 requirement which is 0.9 per cent core equity capital. The total requirement for the Issuer is therefore to have capital of minimum 17.7 percent of risk weighted assets. With a management buffer added, the target for capital coverage is 18.1 per cent as of December 31, 2022.

The Company's parent banks have committed themselves to keep the Company's Equity Tier 1 capital at the minimum regulatory level (in the Shareholders Agreement). Primarily this commitment is pro rata according to the ownership stakes in the Company, but it is a joint undertaking if one or more ownership banks are unable to comply up to the maximum of twice the initial pro rata amount.

Capital. NOK 1 000	2022	2021
