Boliden publishes Sustainability-Linked Finance Framework

To support Boliden's vision to be the most climate-friendly and respected metal provider in the world, the company has published a Sustainability-Linked Finance Framework to facilitate the issuance of Sustainability-Linked Bonds.

The Sustainability-Linked Finance Framework incorporates Boliden's climate targets, which have been validated by the Science Based Targets initiative (SBTi). These targets include reducing GHG-emissions by 42% for Scope 1 and 2, and by 30% for Scope 3 by 2030, using 2021 as the base year. Boliden's climate footprint is globally very competitive, and there is a strong focus to continue reducing emissions in line with targets and vision.

Danske Bank acted as the structuring advisor on the establishment of the Sustainability-Linked Finance Framework and Sustainalytics were engaged to provide an independent second-party opinion on design and ambition level. Sustainalytics has assessed the Key Performance Indicators as 'Very Strong' and the Sustainability Performance Targets as 'Ambitious' and 'Highly Ambitious'. The Sustainability-Linked Finance Framework, as well as the second party opinion, are available on Boliden's website:

Metals for generations to come

Boliden's vision is to be the most climate-friendly and respected metal provider in the world. We are Europe's producer of sustainable metals and, guided by our values care, courage and responsibility, we operate within exploration, mines, smelters and recycling. We are around 6,000 employees and have annual revenues of approximately SEK 80 billion. The share is listed in the Large Cap segment of NASDAQ OMX Stockholm.
