

CNP CYCLES awarded a contract in Italy

Asker, Norway, 25 November 2025

CNP CYCLES has been awarded a contract to supply process equipment for a new sludge treatment centre at the Salvatronda wastewater treatment plant in Castelfranco Veneto, Italy.

The treatment centre, owned by Alto Trevigiano Servizi, will handle sludge from 37 wastewater treatment plants serving 52 municipalities. It is financed in part through Italy's National Recovery and Resilience Plan, supported by the European Union's NextGenerationEU programme.

"The Salvatronda contract confirms the position CNP CYCLES has built in delivering sludge treatment solutions in Europe," says Per Lillebø, CEO of Cambi. "As majority owner, Cambi is committed to supporting CNP CYCLES' long-term development and growth."

CNP CYCLES will supply an alkaline hydrolysis system based on licensed technology to the main contractor for the treatment centre. The contract covers engineering, manufacturing and delivery of prefabricated process modules, as well as installation support and commissioning services, with the system integrated into the plant's anaerobic digestion processes.

Equipment manufacturing will take place at CNP CYCLES' facilities in Germany, with deliveries aligned to the construction schedule for the new sludge treatment centre in Salvatronda.

CNP CYCLES is majority owned by Cambi ASA, which holds 51% of the shares.

About Cambi

Cambi is a global biogas technology and solutions supplier for wastewater treatment plants and anaerobic digestion facilities. Since 1992, Cambi has retained market leadership through continuous innovation and a robust portfolio of proven and patented technologies. With strong project delivery and customer support capabilities, the company has delivered many well-performing installations in 28 countries on six continents.

Cambi's thermal hydrolysis process increases renewable energy output, reduces operational costs, and minimises greenhouse gas emissions. It is suitable for both new and existing anaerobic digestion sites and compatible with all biosolids outlets, including land application and thermal processes such as drying, pyrolysis, and incineration. Thermal hydrolysis is robust to regulatory changes, meeting all sludge and waste treatment legal requirements.

Cambi is listed on Euronext Growth Oslo, a multilateral trading facility in Euronext, Europe's largest stock exchange platform. Find out more at cambi.com.

About CNP CYCLES

CNP CYCLES GmbH, founded in 2011, specialises in innovative technologies for nutrient recovery and energy optimisation in wastewater treatment plants. The company's name reflects its focus on the chemical elements Carbon (C), Nitrogen (N), and Phosphorus (P), which are crucial in water and sludge treatment. The company's philosophy, "watering life," emphasizes closing cycles in the water sector to promote sustainability.
