

Eika Boligkreditt AS

Interim report for the fourth quarter of 2025

Unaudited

Highlights

Fourth quarter 2025

- Pre-tax profit of NOK 30.0 million (Q4 2024: profit of NOK 20.4 million)
- Total comprehensive income of NOK 21.9 million (Q4 2024: loss of NOK 87.5 million)
- Mark-to-market effect of basis swaps negative at NOK 8.5 million (Q4 2024: negative at NOK 129.0 million)
- Financing of the Eika banks up by 2.0 per cent, corresponding to an annualised growth of 7.9 per cent
- NOK 179.1 million in expenses paid to owner banks for the intermediation of loans (Q4 2024: NOK 173.2 million)
- NOK 2.4 billion in bonds issued (Q4 2024: NOK 3.6 billion)

Full-year 2025

- Pre-tax profit of NOK 100.4 million (2024: profit of NOK 100.7 million)
- Total comprehensive income of NOK 223.0 million (2024: loss of NOK 222.1 million)
- Mark-to-market effect of basis swaps positive at NOK 161.1 million (2024: negative at NOK 419.0 million)
- Financing of the Eika banks up by 9.2 per cent year-on-year (2024: up by 6.5 per cent)
- NOK 772.0 million (2024: NOK 665.9 million) in financial intermediation service charges paid to owner banks
- NOK 29.0 billion in bonds issued (2024: NOK 15.9 billion)

Share price

- Price per share NOK 4.13141 (4.01628)

No full or limited external auditing of the figures for the fourth quarter has been undertaken.

REPORT FOR THE FOURTH QUARTER AND FULL-YEAR 2025

Introduction

Eika Boligkreditt's main purpose is to ensure that the local banks in the Eika Alliance have access to long-term and competitive funding by issuing covered bonds. An important part of the company's business concept is to increase the competitiveness of the owner banks by improving their access to external funding in the Norwegian and international financial markets, with regard to the tenor of loans, their terms and depth of access. The object of the company's business is to reduce risk for the owner banks. At 31 December 2025, the owner banks had NOK 114.4 billion in total financing with Eika Boligkreditt and had thereby reduced the need for their own market and deposit financing by a corresponding amount.

Eika Boligkreditt is licensed as a credit institution and entitled to raise debt in the market through the issuance of covered bonds. Norwegian regulations for covered bonds were adopted in 2007, and this type of bond has become an important source of financing for the lending activities of banks and credit institutions. By concentrating financing activities relating to covered bonds in Eika Boligkreditt, the owner banks have secured a player in the bond market with the necessary wherewithal to secure competitive terms and depth of access to financing, both in Norway and internationally.

Income statement for the fourth quarter and full-year 2025

Amount in NOK thousand	4th quarter 2025	4th quarter 2024	2025	2024
Total interest income	1 496 104	1 517 020	6 087 475	6 094 193
Net interest income	49 244	29 216	132 772	144 441
Total gain and losses on financial instruments at fair value	(7 110)	8 262	12 821	18 993
Profit before tax	29 981	20 417	100 389	100 743
Comprehensive income (taking account of fair value changes in basis swaps)	21 928	(87 501)	223 021	(222 103)

The company's gross interest income in the fourth quarter 2025 was 1.4 per cent lower than in the same period the year before. This reduction is primarily attributable to lower money market interest rates. Net interest income in the fourth quarter 2025 was higher than in the corresponding period in 2024 as a result of borrowing costs decreasing more than overall interest income. Net interest income was reduced by a NOK 5.1 million contribution to the Norwegian Banks Guarantee Fund's resolution fund, which is recognised as an interest expense. With effect from the first quarter 2025, the expenses paid for the intermediation of loans to the owner banks, which were previously reported on the line for commission costs, have been recognised as a reduction in the company's interest income. In the fourth quarter 2025, the financial intermediation service charges paid to owner banks totalled NOK 179.1 million. This is 3.4 per cent more than in the corresponding period in 2024, and is due to the banks achieving slightly higher interest margins in the fourth quarter 2025. The mark-to-market effect of financial instruments recognised at fair value in profit and loss was negative at NOK 7.1 million. This is a decrease of NOK 15.4 million compared with the same period in 2024, and is attributable to changes in value resulting from interest rate adjustments. Pre-tax profit in the fourth quarter 2025 totalled NOK 30.0 million, up by NOK 9.6 million on the same period the year before.

The company's interest income in 2025 as a whole was more or less on a par with 2024. The effect of the increased lending portfolio in 2025 was almost entirely offset by the effect of lower money market interest rates in 2025 compared with 2024. Net interest income in 2025 as a whole was 8.1 per cent lower than in the corresponding period the year before. The reduction is attributable to lower lending margins resulting from interest expenses rising in line with the expansion in the borrowing portfolio while overall interest income has remained largely unchanged. Net interest income was also affected by a NOK 20.4 million contribution to the Norwegian Banks Guarantee Fund's resolution fund, which is recognised as an interest expense. The total amount paid to owner banks in respect of expenses for the intermediation of loans in 2025, was 15.9 per cent higher than in the same period in 2024. The increase is attributable to the banks having higher lending margins as a result of changes in money market rates, as well as an improved competitive situation and a higher lending volume. The mark-to-market effect of financial instruments at fair value was positive at NOK 12.8 million, which is NOK 6.2 million lower than in the same period in 2024. Pre-tax profit in 2025 came to NOK 100.4 million, NOK 0.3 million less than in 2024.

Interest on tier 1 perpetual bonds totalled NOK 12.3 million in the fourth quarter and NOK 50.2 million in 2025 as a whole. This cost is not presented as an interest expense in the profit and loss account, but as a reduction in equity in the balance sheet.

Total comprehensive income for the fourth quarter includes a mark-to-market effect of basis swaps that was negative at NOK 8.5 million (Q4 2024: negative at NOK 129.0 million). The mark-to-market effect of basis swaps in 2025 as a whole was positive at NOK 161.1 million (2024: negative at NOK 419.0 million). Over the term of the derivatives, the effect of such changes in value will be zero. The accounting effects will thereby reverse until the derivatives mature. This means that the mark-to-market effect of basis swaps only impacts accruals relating to unrealised gains and losses in the financial statements. Unless Eika Boligkreditt realises the derivative agreement prematurely, such mark-to-market effects do not result in realised gains or losses over the term of the derivative.

Balance sheet and liquidity

Assets under management by Eika Boligkreditt amounted to NOK 135.0 billion at the close of the fourth quarter 2025, up by NOK 8.5 billion from the close of 2024. Financing of the owner banks (residential mortgage lending to customers at nominal value excluding accrued interest and changes to the fair value of residential mortgages) totalled NOK 114.4 billion, representing a net increase of NOK 2.2 billion in the fourth quarter and NOK 9.7 billion over the past 12 months. This is equivalent to a net growth in lending of 9.2 per cent in 2025. Looking exclusively at the Eika banks and excluding running-down by the Local Bank Alliance (LBA), Sparebank1 Østlandet (formerly Totens Sparebank) and Oslofjord Sparebank), the portfolio showed net growth of NOK 3.0 billion in the fourth quarter and NOK 14.8 billion over the past 12 months, excluding accrued interest and changes in the fair value of residential mortgages. This is equivalent to a net growth in lending of 15.6 per cent over the past 12 months.

Borrowing

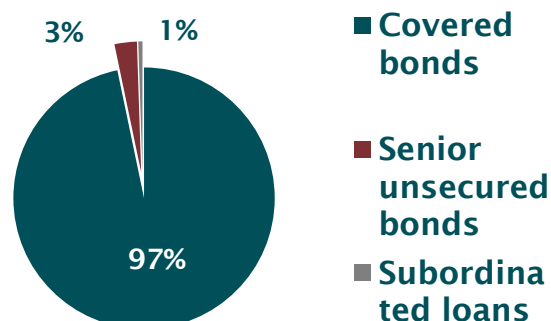

Eika Boligkreditt issued bonds with a nominal value of NOK 2.4 billion in the fourth quarter 2025, compared with NOK 3.6 billion in the same period in 2024. The volume issued in the fourth quarter 2025 comprised NOK 2.2 billion in covered bonds and a subordinated loan of NOK 150 million.

During the year, the company issued bonds worth a nominal NOK 29.0 billion, compared with NOK 15.9 billion in 2024. The volume issued in 2025 as a whole comprised NOK 28.0 billion in covered bonds, NOK 800 million in senior unsecured bonds and NOK 150 million in subordinated loans.

Issuance by currency (in NOK mill) in 2025

Issuance by sector (in %) in 2025

Of the bonds issued in 2025, 59.7 per cent were denominated in Norwegian kroner (NOK) and 40.3 per cent in euro (EUR). Covered bonds accounted for 97.0 per cent of the total volume issued.

The table below shows the issuances (excluding tier 1 perpetual bonds) undertaken in 2025, 2024 and 2023.

New issues (amounts in NOK million)	2025	2024	2023
Covered bonds (issued in EUR)	11 618	5 715	5 922
Covered bonds (issued in NOK)	16 400	9 120	7 500
Senior unsecured bonds and certificates (issued in NOK)	800	800	1 000
Subordinated loans (issued in NOK)	150	250	-
Total issued	28 968	15 885	14 422

The average tenor for the covered bonds issued in 2025 was 6.8 years. At 31 December, the average tenor for the company's borrowing portfolio was 3.91 years, compared with 3.62 years at 1 January.

The table below shows a breakdown of the company's borrowing in various instruments.

Carrying value in NOK million	31.12.2025	31.12.2024	31.12.2023
Covered bonds	120 417	110 962	106 573
Senior unsecured bonds	2 920	2 592	3 303
Senior unsecured certificates	-	-	-
Subordinated loans	855	779	779
Total borrowing including accrued interest	124 192	114 333	110 655

Total borrowing by the company at 31 December came to NOK 124.2 billion, an increase of NOK 9.9 billion from 1 January.

Liquidity

At 31 December 2025, the company had a liquidity portfolio worth NOK 16.4 billion. The liquidity portfolio includes cash collateral of NOK 3.4 billion received from counterparties to derivative contracts. Cash collateral received is held as bank deposits, repo agreements and various high-quality securities.

New developments in the alliance and Eika Boligkreditt

On 11 April 2025, the boards of Haugesund Sparebank and Tysnes Sparebank approved a revised agreement to merge the two banks. The Financial Supervisory Authority of Norway approved the merger on 1 July. Both banks are members of the Eika Alliance. The merger went into effect on 2 September 2025. The merged bank may, in the near future, use Eika Boligkreditt as a source of financing in the form of covered bonds. First, however, the core banking system must be updated to enable it to handle the fact that the bank has portfolios in two multi-owned mortgage lending companies (Verd and Eika). Going forward, the portfolio in Eika will be expanded, while the portfolio in Verd will be run down.

On 15 May 2024, Skudenes & Aakra Sparebank and Eika Gruppen signed an agreement that would result in the bank joining the Eika Alliance by the end of 2025. The agreement has been approved by the Financial Supervisory Authority of Norway. The bank was affiliated with DSS and is the second bank to leave DSS and join Eika in the past 18 months. The bank's technical systems were switched to the Eika platform at the end of November. In September, the bank signed a distribution agreement, a shareholders agreement and a liquidity support agreement with Eika Boligkreditt. The bank will use Eika Boligkreditt as a source of financing in the form of covered bonds with effect from the first quarter of 2026, after its core banking system has been updated to handle the fact that the bank has portfolios in two multi-owned mortgage lending companies (Verd and Eika). Going forward, the portfolio in Eika will be expanded, while the portfolio in Verd will be run down.

On 10 June 2025, the general meetings of Birkenes Sparebank and Agder Sparebank approved the plan to merge the banks that had been adopted by their respective boards of directors on 28 April of that year. The Financial Supervisory Authority of Norway approved the merger on 13 October 2025. Both banks are members of the Eika Alliance. The merged bank will continue operating under the name Agder Sparebank. The banks' combined business capital totals NOK 14 billion. The merger went into effect on 3 November 2025.

On 26 June 2025, the general meetings of Skue Sparebank and Tinn Sparebank approved the plan to merge the banks that had been adopted by their respective boards of directors on 21 May of that year. The Financial Supervisory Authority of Norway approved the merger on 20 October 2025. Both banks are members of the Eika Alliance. The banks' combined business capital totals NOK 32 billion. The merger went into effect on 3 November 2025.

On 19 June 2025, the general meetings of Orkla Sparebank and Rindal Sparebank approved the plan to merge the banks that had been adopted by their respective boards of directors on 13 May of that year. The Financial Supervisory Authority of Norway approved the merger on 20 October 2025. Both banks are members of the Eika Alliance. The merged bank will continue operating under the name Orkla Sparebank. The banks' combined business capital totals NOK 23 billion. The merger went into effect on 3 November 2025.

On 13 June 2025, the general meetings of Sparebanken Norge and Oslofjord Sparebank approved the plan to merge the banks that had been adopted by their respective boards of directors on 14 May of that year. The Financial Supervisory Authority of Norway approved the merger on 10 November 2025. Oslofjord Sparebank was a member of the Eika Alliance and exited the alliance in connection with the merger. The merger went into effect on 1 December 2025.

On 13 November 2025, Eika Boligkreditt signed an agreement with Oslofjord Sparebank to buy out the loan portfolio that the bank had with Eika Boligkreditt AS. As a result of the merger of the bank into Sparebanken Norge, Oslofjord Sparebank will no longer be a member of the Eika Alliance. Having assessed various courses of action, it was concluded that a buyout was the most expeditious and beneficial solution for the mortgage borrowers, Oslofjord Sparebank, Eika Boligkreditt and the shareholder banks. At 31 October 2025, Oslofjord Sparebank had a loan portfolio with Eika Boligkreditt worth the equivalent of NOK 324 million. A clear precondition for the portfolio buyout was that Oslofjord Sparebank, in addition to paying the market value of the relevant residential mortgages, also covered the costs arising from early redemption of the bank financing (the negative contract interest). This latter totalled NOK 2.7 million. The loan portfolio was transferred on 17 November 2025. Sparebanken Norge will sell its shares in Eika Boligkreditt at their book value at 31 December 2025, in connection with the ordinary rebalancing of Eika Boligkreditt's ownership that will take place in March 2026.

Risk management and capital adequacy

At the close of the fourth quarter 2025, the company had subordinate capital totalling NOK 7.9 billion. A new subordinate loan in the amount of NOK 150 million was issued in the fourth quarter 2025, along with NOK 75 million in buybacks and write-downs on existing subordinate loans totalling NOK 150 million whose first call date was 20 January 2026. No tier 1 perpetual bonds have matured or been issued in the period, and no new equity was issued in 2025.

Changes in the Capital Requirement Regulations III (CRR3) have resulted in a new standard methodology for calculating capital requirements relating to credit risk. The new method is more risk sensitive than the model previously used, and results in a lower capital requirement for loans with a low loan-to-value (LTV) ratio. The regulation entered into force on 1 April 2025. Eika Boligkreditt has therefore reported in accordance with CRR3 with effect from the second quarter 2025.

At the close of the fourth quarter 2025, the basis for calculating capital adequacy totalled NOK 35.1 billion. This is NOK 4.8 billion less than the level at the start of the year. The decrease is due to the net effect of the transition to the new methodology, growth in total lending, changes in the liquidity portfolio, and a higher operational risk and Credit Valuation Adjustment (CVA). Eika Boligkreditt's subordinate capital ratio is calculated as a proportion of this basis.

The table below presents developments in the capital adequacy ratio.

Amounts in NOK million	31 Dec 2025	31 Dec 2024	31 Dec 2023
Risk-weighted assets	35 120	39 918	38 644
Total primary capital (tier 2 capital)	7 867	7 738	7 327
Capital adequacy ratio in per cent	22.4 %	19.4 %	19.0 %

The requirement for a countercyclical buffer stands at 2.5 per cent. This buffer is intended to improve the banks' capital adequacy and prevent their credit practice from strengthening an economic downturn. The company's systemic risk buffer was increased from 3 per cent to 4.5 per cent with effect from 31 December 2023.

The company's capital targets are specified as follows:

· Common Equity Tier 1:	14.78%	(18.3% at 31 December 2025)
· Tier 1 capital ratio:	16.37%	(20.0% at 31 December 2025)
· Total capital ratio:	18.50%	(22.4% at 31 December 2025)

These targets are adequate in relation to legal requirements, the company's Pillar II requirement of 0.5 per cent and its Pillar II guidance of 0.5 per cent. As shown above, the applicable buffer requirements were fulfilled at 31 December 2025, with a core tier 1 capital ratio of 18.3 per cent.

Allocation of funds

Taking account the mark-to-market effect of currency swaps that was negative at NOK 161.1 million, total comprehensive income for 2025 came to NOK 223.0 million. Despite the positive figure, the board is proposing that no dividend be paid to the owner banks for 2025. The accumulated mark-to-market effect of currency swaps has resulted in other equity remaining negative. From the total comprehensive income of NOK 170.8 million will therefore be transferred to other equity, including received dividend from association companies in 2025 at NOK 21.5 million. Of the total comprehensive income, NOK 50.2 million is attributable to the tier 1 perpetual bond investors. A provision of NOK 23.5 million has been made to the fund for valuation differences.

Outlook

The company's net financing of the owner banks increased by NOK 2.2 billion in the fourth quarter 2025, and by NOK 9.7 billion over the past four quarters. Net portfolio growth in the past year corresponds to 9.2 per cent. Statistics Norway's credit indicator for November 2025 showed a 12-month increase of 4.5 per cent in Norwegian household debt, up from 3.8 per cent at 31 December 2024. The growth in debt marks a clear increase from the low point of 3.0 per cent noted in March/April 2024.

In Norges Bank's latest lending survey, the banks reported more or less no change in demand for residential mortgages in the fourth quarter 2025. Demand for mortgages from first-time homebuyers was practically unchanged, while demand for fixed-rate mortgages fell slightly. The banks expect demand for residential mortgages to remain more or less unchanged in the coming quarter. The banks' credit practice with respect to private households remained largely unchanged in the fourth quarter. Nor do they expect any change in the coming quarter. Overall, the banks reported that mortgage interest rates fell slightly in the fourth quarter. However, they do not expect any further change in the near future. The lending margin fell slightly in the fourth quarter and is expected to remain stable in the coming quarter. Finance costs for residential mortgages fell slightly in the fourth quarter. However, the banks do not expect any further change in the near future. In keeping with equivalent surveys for the second and third quarters, the banks reported somewhat heightened competition in the fourth quarter. The banks expect the competitive situation with respect to residential mortgages to remain unchanged going forward.

The house price report published by Real Estate Norway (Eiendom Norge) showed that the average price of residential property in Norway fell by 1.0 per cent in December. Adjusted for seasonal variations, residential property prices remained unchanged. In 2025 as a whole, residential property prices in Norway rose by 5 per cent. Developments in residential property prices vary significantly from region to region. In 2025, prices rose most steeply in the Greater Stavanger region (up 14 per cent), followed by Tromsø (up 10.7 per cent) and Bergen (up 9.9 per cent). At the other end of the scale was Bodø (down 0.2 per cent), followed by Trondheim (down 1.5 per cent) and Drammen (down 1.7 per cent). A total of 108 657 homes were sold in Norway in 2025. This corresponds to an increase of 9.4 per cent compared with the year before. We expect that residential property prices will continue to rise going forward, driven by interest-rate reductions, good growth in real wages and a continued low level of housebuilding. Prices in Oslo rose by 3.4 per cent in 2025, which was far weaker than most people expected. At the same time, price growth was much stronger in Stavanger and Tromsø. In 2026, the market in Oslo will probably remain affected by the ongoing sell-off of residential properties in the private rental sector.

The credit spread for the company's covered bonds with a five-year tenor in Norwegian kroner narrowed by 11–12 basis points in 2025 to a level 0.33 percentage points above the three-month Nibor. Credit spreads indicated by potential arrangers for a new-issue transaction with a similar tenor in the euro market narrowed by an estimated 22 basis points in 2025, giving a spread of 0.22–0.23 percentage points at the close of the year. The cross currency basis for a five-year tenor to hedge the amount from euro back to Norwegian kroner is approx. minus 5 basis points, compared with minus 8 basis points at the start of the year. Credit spreads have narrowed more than expected at the start of the year. Market expectations indicate relatively stable credit spreads for covered bonds in 2026.

Since mid-2024, value creation in the Norwegian economy has picked up noticeably, while unemployment has also risen. Although the rate of inflation has fallen significantly from its peak in October 2022, and remained at around 3 per cent throughout 2025, the level is still clearly higher than the target of 2 per cent. Despite ongoing trade disputes and uncertainty concerning cooperation with the EU, Statistics Norway expects growth in the Norwegian economy to remain buoyant in the years ahead. At the same time, the rates of both unemployment and inflation are expected to fall gradually. Activity will be boosted by continued tangible growth in real wages and high demand in the public sector. Overall, the economy in mainland Norway is expected to grow at a rate slightly higher than Statistics Norway's assumed trend rate of 1.5 per cent.

There has been an active market for new covered-bond issues in both euro and Norwegian kroner in 2025. About NOK 195 billion in covered bonds was issued in the Norwegian market, with EUR 160 billion issued in the euro market. Of this, Norwegian credit institutions issued the equivalent of EUR 10.25 billion in 2025, a substantial increase on 2024 when bonds worth EUR 6.25 billion were issued. In 2025, just over 60 per cent of the bonds issued by Norwegian credit institutions were in NOK, which is a more balanced situation than has been seen in the past two years when EUR issuances accounted for a significantly lower percentage. The level of activity with respect to the issuance of covered bonds denominated in NOK is expected to remain more or

less the same in 2026 as in 2025. However, issuances in EUR are expected to increase slightly ($\approx +5$ per cent). In 2026, NOK 190 billion is due to mature in the Norwegian market, while EUR 157 billion is due to mature in the euro market. At the same time, covered bonds worth around NOK 200 billion and just under EUR 170 billion are expected to be issued during the year. Norwegian issuers are expected to issue euro-denominated covered bonds totalling EUR 10.5 billion.

In the first quarter 2025, Eika Boligkreditt issued covered bonds equivalent to EUR 500 million and NOK 6.9 billion, as well as NOK 300 million in senior unsecured bonds. In the second quarter, a further EUR 500 million and NOK 800 million in covered bonds were issued, as well as NOK 500 million in senior unsecured bonds. In the third quarter, the company issued covered bonds totalling NOK 6.5 billion. In the fourth quarter, we refinanced a subordinated loan with a first call in January 2026 and issued covered bonds totalling NOK 2.2 billion. In 2025 as a whole, therefore, covered bonds worth the equivalent of NOK 28.0 billion and senior unsecured bonds worth NOK 800 million were issued, while NOK 150 million was raised in subordinated loan financing. In 2024, by comparison, the company issued NOK 14.8 billion in covered bonds, NOK 800 million in senior unsecured bonds and NOK 250 million in subordinated loans. In 2026, the company expects to issue a total of NOK 26.4 billion in covered bonds, NOK 1 billion in senior unsecured bonds and NOK 300 million in subordinated loans.

The specification of equity comprises accounting items pursuant to the provisions in the Norwegian Private Limited Liability Companies Act:

¹Share capital and the share premium comprises paid-in capital.

²Other paid-in capital comprises paid-in capital which has earlier been taken from the share premium reserve.

³The fund for unrealised gains comprises value changes on financial instruments at fair value.

⁴ The fund for valuation differences comprises the positive difference between the carried amount in the balance sheet and the acquisition price for investments in shares in associated companies.

⁵Other equity comprises earned and retained profits.

⁶Additional Tier 1 perpetual bonds form part of Tier 1 capital pursuant to section 3a of the Norwegian regulations concerning the calculation of regulatory capital. A regulatory right of redemption also exists. Should government regulations introduce changes which affect the extent to which the capital can be regarded as Tier 1 capital, the bonds can be redeemed at a price equal to 100 per cent plus accrued interest. The company has recognised the following Additional Tier 1 perpetual bonds as equity:

- Tier 1 perpetual bond, issued NOK 100 million in 2022, with interest terms of three months Nibor plus 3.15 per cent. The loan provides for a call at 11 May 2027, and thereafter on each banking day in the subsequent interest period and thereafter on each interest payment date.
- Tier 1 perpetual bond, issued NOK 200 million in 2022, with interest terms of three months Nibor plus 4.40 per cent. The loan provides for a call at 14 September 2027, and thereafter on each banking day in the subsequent interest period and thereafter on each interest payment date.
- Tier 1 perpetual bond, issued NOK 275 million in 2023, with interest terms of three months Nibor plus 4.25 per cent. The loan provides for a call at 21 September 2028, and thereafter on each banking day in the subsequent interest period to 21 December 2028, and thereafter on each interest payment date.

Eika Boligkreditt has the right to pay no interest to the investors. Interest is not recognised as interest expense in the profit and loss account, but as a reduction in equity.

Notes

Note 1 – Accounting policies

General

Eika Boligkreditt will prepare financial statements for 2025 in accordance with the International Financial Reporting Standards (“IFRS”) as adopted by the European Union (EU). Financial assets and liabilities are measured at amortised cost, at fair value through profit or loss or at fair value through other comprehensive income. Note 1 in the annual financial statements for 2024 provides more details about accounting principles pursuant to the IFRS.

The financial statements for the fourth quarter of 2025 have been prepared in accordance with IAS 34 Interim financial reporting.

Note 2 – Use of estimates and discretion

In the application of the accounting policies described in note 1 in the annual financial statements for 2024, management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities which are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors which are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of uncertainty at the end of the reporting period, which have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Lending, non-performing/doubtful loans and writedowns

Pursuant to IFRS 9, provisions for losses will be recognised on the basis of expected credit losses in the light of relevant information available at the reporting date. The combination of low loan-to-value ratio in the residential mortgage portfolio and the credit guarantees provided by the owner banks implies that the company does not expect significant effects on EBK’s profit or equity. See note 13 and 13.2.2 in the annual financial statements for 2024 for further information.

No loans were written down at 31 December 2025.

Fair value of financial instruments

Eika Boligkreditt applies various measurement methods to determine the fair value of financial instruments which are not traded in an active market. The chosen methods are based on market conditions at the end of the reporting period. This means that, if observable market data are not available, the company will make assumptions and apply discretion as to what the market will base its evaluation of corresponding financial instruments on. More information about the financial instruments can be found in notes 4, 5, 6, 7, 9 and 11.

Note 3 – Income from portfolio sale

Amounts in NOK 1 000	2025	2024
Total income from portfolio sale	25 027	-

On 26 May 2025, Eika Boligkreditt signed an agreement to buy out the portfolio of residential mortgages that Sparebank1 Østlandet had with Eika Boligkreditt AS following Sparebank1 Østlandet's merger with Totens Sparebank on 1 November 2024. As a result of this, Totens Sparebank will no longer be a part of the Eika Alliance, and Eika Boligkreditt therefore terminated its distribution agreement in a letter dated 26 November 2024.

In addition to the principal of the residential mortgages, amounting to NOK 2 658 million, the bank paid NOK 22.3 million in compensation for early redemption of its financing with Eika Boligkreditt.

On 13 November 2025, Eika boligkreditt signed an agreement with Oslofjord Sparebank to buy out the portfolio of residential mortgages that the bank held in Eika Boligkreditt. AS of 31 Oktober 2025, Oslofjord Sparebank had a portfolio in Eika Boligkreditt amounting to 324 million kroner. The redemption cost totalled NOK 2.7 million.

Note 4 – Shares at fair value recognised in profit and loss and shares in associated company

Shares classified at fair value recognised in profit and loss

Amounts in NOK 1 000	Number of shares	Cost price	Book value 31 des 2025	Owner share
Nordic Credit Rating AS	10 000	2 500	1 650	1.60 %
Total	10 000	2 500	1 650	

Shares in associated company

Assets in associated companies are recognised using the equity method.

Amounts in NOK 1 000	Number of shares	Owner share
Eiendomsverdi AS	470 125	25.0 %
Total	470 125	

Amounts in NOK 1 000	2025	2024
Carrying amount at 1 January	61 171	59 673
Addition/disposal	-	-
Revaluation at acquisition cost	-	-
Share of profit/loss	23 475	18 938
Dividend	(21 461)	(17 440)
Carrying amount	63 185	61 171

EBK's investment in Eiendomsverdi is treated as an associated company calculated in accordance with the equity method. The shares in Eiendomsverdi are valued at the overall acquisition price on the basis of a staged acquisition adjusted for EBK's share of the profit and dividend received. The positive difference between the carried amount in the balance sheet and the acquisition price is recognised in fund for valuation differences.

Note 5 – Net gain and loss on financial instruments at fair value

Net gains and losses on financial instruments at fair value recognised through profit and loss

Amounts in NOK 1 000	4th quarter		4th quarter	
	2025	2024	2025	2024
Net gains and losses on bonds and certificates including currency effects ¹	1 719	2 564	7 507	30 838

Net gains and losses on financial instruments at fair value	(7 110)	8 262	12 821	18 993

¹ The accounting line comprises net realised gain and loss on bonds and certificates, and currency effects related to cash collateral received and reinvested cash collateral in foreign currencies.

² The company utilises hedge accounting for long-term borrowing in foreign currency, where the cash flow arising from the derivative contract is matched 1:1 with the hedging object.

Net gains and losses on financial instruments at fair value recognised through comprehensive income

Amounts in NOK 1 000	4th quarter		4th quarter	
	2025	2024	2025	2024
Net gains and losses on bonds and certificates	327	(16 698)	7 929	(1 983)
Net gains and losses on interest-rate swaps related to bonds and certificates	1 754	3 214	3 595	688
Net gains and losses on basis swaps ³	(8 477)	(129 022)	161 142	(418 971)
Net gains and losses on financial instruments at fair value	(6 396)	(142 506)	172 666	(420 267)

³ Total comprehensive income for 2025 includes positive NOK 161.1 million related to changes in fair value of basis swaps.

Basis swaps are derivative contracts used in connection with long-term borrowing in foreign currency, whereby the foreign currency is converted to Norwegian kroner. These are hedging instruments, and the value is zero over the term of the instrument. As a rule, the company holds both its borrowings and hedging instruments until maturity. This means that changes to margins only have accrual effects with respect to unrealised gains or losses in the accounts, and no realised gains or losses over the tenor of the derivative unless Eika Boligkreditt terminates the derivative early. Gain or loss related to basis swaps will be reclassified to profit and loss if the hedge is terminated early.

Eika Boligkreditt utilises interest-rate and currency swaps to convert borrowing in foreign currencies to Norwegian kroner. A typical example is when a loan raised in euros is converted to Norwegian kroner through an interest-rate and currency swap which includes a basis swap. In this case, Eika Boligkreditt would pay a Norwegian interest rate with a margin of three months Nibor in the swap and receive a euro interest rate in the swap which corresponds to the coupon it pays on the loan in euros. Derivatives are valued at fair value, while the hedged bond is valued in accordance with the principles which apply for hedge accounting.

Note 6 – Derivatives and hedging

The purpose of all derivative transactions in Eika Boligkreditt is to reduce the interest rate and currency risk. Interest rate swaps, where Eika Boligkreditt receives a fixed interest rate and pays a floating interest rate, are used to convert issued bonds and certificates from a fixed rate to a floating rate exposure. Financing at a floating rate would reduce the risk for the company, since most lending is done at a floating interest rate. Interest rate swaps where Eika Boligkreditt receives a floating interest rate and pays a fixed interest rate are used to hedge the interest rate margin from lending at a fixed interest rate.

Assets	31 Dec 2025		31 Dec 2024	
	Nominal amount	Fair value	Nominal amount	Fair value
Amounts in NOK 1 000				
Interest rate swap lending ¹	5 341 787	185 673	6 678 100	284 640
Interest rate and currency swap ²	55 181 725	3 764 706	53 647 750	5 051 204
Interest swap placement	577 483	17 762	276 727	13 563
Total financial derivative assets including accrued interest	61 100 995	3 968 142	60 602 577	5 349 407
Liabilities				
Amounts in NOK 1 000				
Interest rate swap lending ¹	1 012 300	2 337	469 000	1 523
Interest rate and currency swap ²	11 556 025	487 771	10 270 500	472 067
Interest swap placement	218 896	4 103	217 963	6 505
Total financial derivative liabilities including accrued interest	12 787 221	494 211	10 957 463	480 095

¹ The hedging instruments related to the lending portfolio with fixed interest rate are rebalanced when necessary.

² The nominal amount is converted to the historical currency exchange rate.

Fair value and cash flow hedging on debt securities issued

Eika Boligkreditt applies fair value hedging on fixed-rate financial liabilities. The hedge object is the swap interest element of the financial liabilities. Interest and currency swaps are used as hedging instruments.

The basis margin related to foreign currency from financial instruments is separated out by excluding this earmarking of the fair-value hedge and the currency element in the hedge is identified as a cash flow hedge. This implies that changes in the basis swap, which arise when entering a currency swap to convert the company's borrowing in foreign currency to Norwegian kroner, are recognised as a cash flow hedge. Changes in fair value related to the basis margin will therefore be recognised in other comprehensive income.

Amounts in NOK 1 000	31 Dec 2025		31 Dec 2024	
	Nominal amount	Value recognised in balance sheet	Nominal amount	Value recognised in balance sheet
Hedging instruments: interest rate and currency swaps ^{1,2}	66 737 750	2 706 377	63 918 250	4 266 791
Hedged items: financial commitments incl foreign exchange ²	66 737 750	(3 116 137)	63 918 250	(4 768 404)
Net capitalised value without accrued interest	-	(409 760)	-	(501 614)

¹ The nominal amount is converted to historical currency exchange rate.

² The book value of the hedging instruments is their net market value less accrued interest. The book value of the hedged objects is less accrued interest and the cumulative change in value associated with the hedged risk is an adjustment of financial liabilities at amortised cost.

Gains and losses on fair value hedging recorded in profit and loss

Amounts in NOK 1 000	4th quarter 2025	4th quarter 2024	2025	2024
Hedging instruments	368 771	(59 599)	(1 498 589)	2 130 707
Hedged items	(364 332)	60 710	1 491 125	(2 131 013)
Net gains/losses (ineffectiveness) recorded in profit and loss³	4 439	1 111	(7 464)	(305)

³ Changes in the value of financial instruments related to changes in basis swaps are recognized in other comprehensive income. See note 5 for more information.

Note 7 – Lending to customers

Amounts in NOK 1 000	31 Dec 2025	31 Dec 2024

Instalment loans - housing cooperatives	3 020 179	3 056 175
Accrued interest instalment loans	251 928	254 127
Adjustment fair value lending to customers ¹	(196 728)	(320 434)
Total lending before specific and general provisions for losses including accrued interest	114 433 832	104 638 294
Impairments on lending to customers	-	-
Total lending to and receivables from customers including accrued interest	114 433 832	104 638 294

¹The table below shows fair value lending to customers.

With effect from 10 December 2019, the company increased its maximum loan-to-value (LTV) ratio for residential mortgages from 60 per cent to 75 per cent of the property's value at origination.

Provision for losses

Pursuant to IFRS 9, provision for losses must be recognised on the basis of the expected credit loss indicated by relevant information available at the reporting date.

Eika Boligkreditt had no non-performing engagements at 31 December 2025 where instalments due remained unpaid beyond 90 days. According to the EBA recommendation regarding the definition of default, the company is required to carry out various supplementary evaluations related to the probability of default. This evaluation must take account of the client's overall indebtedness, possible infection between agreements with the same debtor, the level of materiality limits and the duration of quarantine after being declared healthy.

Loss in the accounts is calculated on the basis of the loss model pursuant to IFRS 9. Non-performing engagements are presented in step 3, where an individual impairment is to be carried out per customer without the use of models. Credit guarantees provided by the owner banks in combination with the low LTV ratio for the mortgage portfolio, reduce provision for loss. The company has calculated that expected loss on residential mortgages will amount to NOK 2.5 million at 31 December 2025, compared to NOK 2.7 million at 31 December 2024. This assessment rests on new assumptions about the development of house prices in the time to come. As a result of credit guarantees of NOK 2.2 billion from the owner banks at 31 December 2025, this implies no accounting loss for the company in the fourth quarter of 2025.

See note 13.2.2 in the annual financial statements for 2024 for further information.

31 Dec 2025		
Amounts in NOK 1 000	Nominal value	Fair value
Variable rate loans	108 563 708	108 563 708
Fixed rate loans	6 066 851	5 870 123
Toal lending including accrued interest	114 630 560	114 433 832

31 Dec 2024		
Amounts in NOK 1 000	Nominal value	Fair value
Variable rate loans	97 554 037	97 554 037
Fixed rate loans	7 404 691	7 084 257
Toal lending including accrued interest	104 958 728	104 638 294

Calculation of fair value of loans: The margin on the loans is considered to be on market terms. The market value of variable rate loans is therefore measured as equal to amortised cost. The market value of fixed-rate loans is correspondingly measured as equal to amortised cost adjusted for the present value of the difference between the loans' fixed rate of interest and the applicable offered fixed rate at the balance sheet date.

Note 8 – Other financial assets

Amounts in NOK 1 000	31.12.2025	31.12.2024
Prepaid expenses	5 127	938
Defined contribution pension schemes	1 644	988
Short-term receivables	8 895	34 711
Total other financial assets	15 666	36 637

Note 9 – Bonds and certificates at fair value

31 December 2025

Amounts in NOK 1 000

Bonds broken down by issuer sector	Nominal value	Cost price	Fair Value
Municipalities	6 333 011	6 372 188	6 373 409
Credit institutions	3 998 000	4 025 012	4 044 428
Government bonds	4 578 029	4 574 198	4 575 575
Total bonds and certificates at fair value including accrued interest	14 909 040	14 971 397	14 993 412
Change in value charged recognised through profit and loss to other comprehensive income ¹			22 014

The average effective interest rate is 4.75 per cent annualised. The calculation is based on a weighted fair value of NOK 14.1 billion. The calculation takes account of a return of NOK 668.2 million on bank deposits, bonds and certificates. The return on reinvested cash collateral received is excluded from the calculation.

Amounts in NOK 1 000

Bonds broken down by issuer sector	Nominal value	Cost price	Fair value
Municipalities	4 060 000	4 087 431	4 087 647
Credit institutions	3 920 000	3 950 358	3 958 891
Government bonds	7 088 152	7 098 856	7 092 249
Total bonds and certificates at fair value including accrued interest	15 068 152	15 136 645	15 138 786
Change in value charged recognised through profit and loss to other comprehensive income ¹			2 141

The average effective interest rate is 5.16 per cent annualised. The calculation is based on a weighted fair value of NOK 15.6 billion. The calculation takes account of a return of NOK 809.4 million on bank deposits, bonds and certificates. The return on reinvested cash collateral received is excluded from the calculation.

¹ The change in value is primarily related to agio effects on bonds denominated in euros (reinvested cash collateral received) recognised through profit and loss. Corresponding agio effects on loans to credit institutions are also recognised through profit and loss as net gains and losses on bonds and certificates.

	31 Dec 2025	31 Dec 2024
Average term to maturity	1.5	1.6
Average duration	0.1	0.1

All the bonds are rated AA-/Aa3 or better if the maturity exceeds 100 days, and A-/A3 if the maturity is 100 days or fewer. The rating is performed by an internationally recognised rating agency.

Note 10 – Coverpool

Section 11-7 of the Regulations relating to Financial Institutions, which came into effect on 8 July 2022, requires overcollateralisation of at least 5 per cent of the value of covered bonds in the cover pool. The 5 per cent requirement is calculated on the basis of nominal values (nominal value of hedged foreign exchange rates, not including accrued interest), while the company's own holding of covered bonds is also taken into account. Eika Boligkreditt has pledged to maintain an overcollateralisation of at least 2.75 per cent in their EMTCN-programme. But the precondition for an overcollateralisation below five per cent is that the Aaa rating for the bonds is maintained. An overcollateralisation of 2 per cent is also necessary to maintain the Aaa rating from Moody's Investor Service. In the calculation of overcollateralisation in accordance with the rating and the loan programme nominal values have been used.

Calculation of overcollateralisation at nominal value (calculated in accordance with section 11-7 of the financial institutions regulations)

Cover pool	Nominal values including retained bonds	
	31 Dec 2025	31 Dec 2024
Amounts in NOK 1 000		
Loans to customers without accrued interest	114 378 631	104 704 601
Loans not qualified for the cover pool ¹	(1 129 591)	(836 200)
Substitute assets:		
Substitute assets ²	12 914 257	11 194 972
Substitute assets excluded from calculation of overcollateralisation for LCR purposes ³	(300 000)	(300 000)
Total cover pool	125 863 297	114 763 374
The cover pool's overcollateralisation	107.89%	108.88%

Covered bonds issued	31 Dec 2025	31 Dec 2024
Covered bonds	116 451 750	105 404 250
Retained bonds (covered bonds) ⁴	204 000	-
Total covered bonds	116 655 750	105 404 250

¹ Residential mortgages without legal protection, non-performing engagements and any share of loans with a loan-to-value (LTV) ratio in excess of 80% are excluded when calculating the carrying amount in the balance sheet.

² Substitute assets include loans to and receivables from credit institutions, including underlying security in repo agreements as well as bonds and certificates at nominal value.

³ Pursuant to the Financial Supervisory Authority's guidance for reporting LCR, the liquidity cover ratio is excluded when calculating the cover pool's overcollateralisation.

⁴ When calculating the 5 per cent requirement, account has been taken of the company's retained covered bonds.

Calculation of overcollateralisation using nominal values (calculated in accordance with the requirements in the company's borrowing programme and Moody's Investors Service methodology)

Cover pool

Amounts in NOK 1 000	Nominal values	
	31 Dec 2025	31 Dec 2024

Loans not qualified for the cover pool ⁵	(1 107 401)	(810 382)
Substitute assets:		
Substitute assets ²	12 914 257	11 194 972
Total cover pool	126 185 487	115 089 191
The cover pool's overcollateralisation	108.36%	109.19%

Covered bonds issued

	31 Dec 2025	31 Dec 2024
Covered bonds	116 451 750	105 404 250
Total covered bonds	116 451 750	105 404 250

⁵ Residential mortgages without legal protection have been excluded when calculating the carrying amount in the balance sheet.

Note 11 – Fair value hierarchy

Eika Boligkreditt measures financial instruments at fair value and classifies the related fair value at three different levels which are based on the market conditions at the balance sheet date.

Level 1: Financial instruments where the value is based on quoted prices in an active market

Included in Level 1 are financial instruments where the value is based on quoted prices in active markets for identical assets. Quoted prices are obtained from Bloomberg. The company's investments in government bonds are included in this category.

Level 2: Financial instruments where the value is based on observable market data

Level 2 comprises financial instruments which are valued using market information not consisting of quoted prices but which may be either directly or indirectly observable. Indirectly observable market data entail that the price is derived from corresponding financial instruments and commitments on which the market has based its valuation. This category consists of the fair value of interest and currency swaps based on swap curves and investments in bonds and certificates not issued by a national state. Market data are obtained from an acknowledged provider of market data.

Level 3: Financial instruments where the value is based on information other than observable market data

Level 3 includes fixed-interest mortgages and shares at fair value over profit and loss. The fair value of the fixed-interest mortgages is their amortised cost adjusted for the present value of the difference between the mortgage's fixed interest rate and the applicable fixed interest rate offered on the balance sheet date. Shares are valued on the basis of discounted cash flows.

Total	7 085 907	648 877	(1 972 215)	-	109 205	-	5 871 773

2024		Purchases/ issues	Disposals/ settlements	Transfers in/out of level 3	Allocated to profit or loss 2024	Other comprehensive income	31 Dec 2024
Amounts in NOK 1 000	01 Jan 2024						
Lending to customers (fixed-rate loans)	7 142 545	1 598 121	(1 645 546)	-	(10 863)	-	7 084 257
Shares at fair value over profit or loss	1 650	-	-	-	-	-	1 650
Total	7 144 195	1 598 121	(1 645 546)	-	(10 863)	-	7 085 907

Interest rate sensitivity of assets classified as Level 3 at 31 December 2025

A one-percentage point increase in all interest rates would reduce the value of the company's fixed-rate loans at fair value by NOK 140.5 million. The effect of a decrease in interest rates would be an increase of NOK 140.5 million in the value of fixed-rate loans at fair value. The amounts are calculated by duration, which is the remaining portion of the fixed interest period.

Changes in fair value of fixed-rate loans attributable to a change in credit risk

Since the company's fixed-rate lending at fair value has an unchanged credit spread, no change in fair value is attributable to a change in the credit risk. That applies both for 31 December 2025 and cumulatively.

Detailed statement of changes in debt related to currency changes

¹The table shows currency changes related to bonds issued in foreign currencies. Currency changes related to liabilities with credit institutions are not shown.

Note 12- Leases

IFRS 16 on lease accounting requires that all leases are recognised in the balance sheet by recognising the beneficial use of an asset as an asset, while making provision for the lease obligation as a liability. Eika Boligkreditt has leases, covering office premises and car leasing which is subject to this standard. The beneficial use and lease obligation are recognised as NOK 18.5 million and NOK 19.5 million respectively, in the company's balance sheet at 31 December 2025, representing the present value of future rent payments over the duration of the lease. The lease duration which forms the basis for calculating future rent payments corresponds to the remaining period until the termination of the lease (as of 31 December 2025 this was about 5.9 years for leasing of office premises and about 1.5 years for car leasing). Possible options are not added to the lease duration. In January 2025 leasing of office premises was extended to 2032. In addition, the beneficial use is depreciated over the duration of the lease while interest on the lease obligation is expensed. Depreciation is presented together with other depreciation in the statement of comprehensive income, while interest is included in financial expenses in the statement of comprehensive income. Interest costs are calculated by applying the discount rate (the company's incremental borrowing rate) to the lease obligation.

Note 13 – Loans from credit institutions

Agreements with counterparties regulating trades in OTC derivatives require collateral to be provided in certain cases. Eika Boligkreditt has been provided with such collateral in the form of cash. The cash is managed by Eika Boligkreditt for the duration of the collateral posting period and are recognised on the balance sheet as an asset with an associated liability. At 31 December 2025, Eika Boligkreditt had received cash collateral of NOK 3.4 billion posted by counterparties in derivative contracts. Cash collateral received is held in bank deposits, repo agreements and in various high-quality bonds.

¹ Subordinated loan of NOK 75 million maturing on 20 January 2031, with a redemption right (call) on 20 January 2026 and thereafter quarterly at each interest date. A regulatory and a tax related call are also provided. Should official regulation lead to changes which affect how far the capital can be regarded as Tier 2 capital, the bond can be redeemed at a price equal to 100 per cent plus accrued interest. 28 October 2025 Eika Boligkreditt did a partial redemption of NOK 75 million of the outstanding amount NOK 150 million.

² Subordinated loan of NOK 375 million maturing on 18 November 2032, with a redemption right (call) on 18 August 2027 and thereafter on each banking day in the subsequent interest period and thereafter on each interest payment date. A regulatory and a tax related call are also provided. Should official regulation lead to changes which affect how far the capital can be regarded as Tier 2 capital, the bond can be redeemed at a price equal to 100 per cent plus accrued interest.

³ Subordinated loan of NOK 250 million maturing on 27 December 2034, with a redemption right (call) on 27 September 2029 and thereafter on each banking day (including the next interest payment date) in the subsequent interest period and thereafter on each interest payment date. A regulatory and a tax related call are also provided. Should official regulation lead to changes which affect how far the capital can be regarded as Tier 2 capital, the bond can be redeemed at a price equal to 100 per cent plus accrued interest.

⁴ Subordinated loan of NOK 150 million maturing on 28 April 2036, with a redemption right (call) on 28 January 2031 and thereafter on each banking day (including the next interest payment date) in the subsequent interest period and thereafter on each interest payment date. A regulatory and a tax related call are also provided. Should official regulation lead to changes which affect how far the capital can be regarded as Tier 2 capital, the bond can be redeemed at a price equal to 100 per cent plus accrued interest.

Required capital corresponding to eight per cent of risk-weighted assets	2 809 623	3 198 558
Surplus equity and subordinated capital	5 057 326	4 416 573

The capital adequacy ratio is calculated using the standard method in CRR.

31 December 2025

	Risk-weighted assets	Capital requirement
Risk-weighted assets		
Credit risk ⁴	32 943 434	2 635 475
Operational risk	305 850	24 468
CVA risk ⁵	1 871 003	149 680
Total	35 120 286	2 809 623
Leverage ratio	31 Dec 2025	31 Dec 2024
Total leverage ratio exposure	132 891 529	128 735 504
Tier 1 capital	7 017 606	6 963 534
Leverage ratio	5.3 %	5.4 %

The company employs the CRR3's new Standard Approach (SA) for the calculation of credit risk and operational risk.

¹Pursuant to the rules for hedge accounting set out in IFRS 9, changes in fair value relating to cross-currency interest rate swaps may be recognised as cash-flow hedging. Because it is possible to disaggregate the basis spread as cash-flow hedging

under IFRS 9, changes in value relating to the basis spread are neutralised in line with Article 33(1) of the CRR when calculating Common Equity Tier 1 capital. This is the same as was the case for cash-flow hedging under IAS 39.

²Eika Boligkreditt has emphasized maintaining a consistent dividend policy over time, under which the total comprehensive income that is neither classified as restricted equity nor attributable to the holders of hybrid capital is distributed as dividends to the shareholder banks. Profit may only be recognized in Common Equity Tier 1 Capital under specified conditions, and only with the prior approval of the Financial Supervisory Authority of Norway, which among other requirements stipulates that the profit has been certified by the auditor

³Deferred tax assets attributable to temporary differences and amounting to less than 10 per cent of Common Equity Tier (CET) 1 capital are not deducted from CET1 capital, but risk-weighted by 250 per cent. See the changes to the calculation regulations which came into force on 30 September 2014.

⁴Eika Boligkreditt had no non-performing engagements at 31 December 2025 where instalments due remained unpaid beyond 90 days. According to the EBA recommendation regarding the definition of default, the company is required to carry out various supplementary evaluations related to the probability of default. This evaluation must take account of the client's overall indebtedness, possible infection between agreements with the same debtor, the level of materiality limits and the duration of quarantine after being declared healthy.

On the basis of this standard for assessing default, non-performing engagements at 31 December 2025 totalled NOK 20.6 million. This definition of default will affect the company's calculation of capital adequacy, where mortgages defined as being in default have their risk weighting in the calculation base changed to 100 per cent, assuming that the LTV for the defaulting mortgages is below 100 per cent. These mortgages may also be deducted from Tier 1 capital pursuant to article 47c of the CRR if they were entered into after 26 April 2019.

The Capital Requirement Regulations (CRR3) have introduced a new standard method for calculating the capital required to cover credit risk. This method is more risk sensitive than the model used hitherto, and has resulted in a lower capital requirement for loans with a low loan-to-value (LTV) ratio. The regulation entered into force on 1 April 2025. Eika Boligkreditt is reporting in accordance with CRR3 with effect from the second quarter 2025.

⁵When calculating capital requirement for credit risk at 31 December 2025, Eika Boligkreditt has taken into account the risk that a counterparty's creditworthiness may weaken (CVA risk). This comes in addition to the capital requirement for credit risk related to counterparty risk for derivatives. The new method under CRR3 of calculating CVA risk results in a higher basis for calculation.

The risk-weighted assets (RWA) at 31 December amounted to NOK 35.1 billion and represents a quantification of the company's risk. After accounting for the net effect of the transition to the new standard approach, growth in overall lending and changes in the company's liquidity portfolio, operational risk and CVA risk, RWA was NOK 4.8 billion lower at 31 December 2025 than at 1 January.

At all times, the company must have a buffer in relation to the minimum capital adequacy requirement of eight per cent. This buffer must be sufficient to cover relevant risks which could affect the company. The company's Internal Capital Adequacy Assessment Process (ICAAP) is pursued to ensure that it has an adequate buffer in relation to the minimum requirement. The company plans to capitalise continued growth in the residential mortgage portfolio and capital requirements. The company's capital targets are a Common Equity Tier 1 ratio of 14.78 per cent, a Tier 1 capital ratio of 16.37 per cent and a Total Capital ratio of 18.5 per cent. These targets are adequate in relation to the legal requirements, the company's Pillar 2 demands, and capital requirements based on the company's internal assessment of risk (0.5 per cent). As can be seen above, the applicable buffer requirement was met at 31 December 2025 with a Common Equity Tier 1 capital ratio of 18.3 per cent.

The company has a shareholder agreement which commits the owner banks, under given circumstances, to provide Eika Boligkreditt with necessary capital. More information on the shareholder agreement can be found in note 27 in the annual financial statements for 2024.

Note 17 – Contingency and overdraft facilities

The company has an overdraft facility with DNB Bank ASA (DNB). Note 23 in the annual financial statements for 2024 provides a more detailed presentation of the overdraft with DNB. In 2012, the company established a Note Purchase Agreement (NPA) with the owner banks concerning the purchase of covered bonds, whereby the owner banks have accepted a liquidity obligation towards Eika Boligkreditt. Under the terms of this agreement, the owner banks have an obligation to purchase covered bonds issued by Eika Boligkreditt if the company's liquidity situation indicates that such

purchases are necessary. During the second quarter of 2024, the terms of the agreement with the owner banks were renegotiated in order to ensure that the purchase obligation does not actually increase the owner banks' future capital requirement. In the revised agreement, the secondary liability has been removed and the owner banks' primary liability is limited such that the total amount of covered bonds issued under the NPA cannot exceed 20 per cent of the total amount of the covered bonds issued by the company. More information on the note purchase agreement can be found in note 23 to the annual financial statements for 2024.

Note 18 – Risk management

Eika Boligkreditt AS has established a framework for risk management and control in the company, which defines risk willingness and the principles for managing risk and capital. The value of financial assets and liabilities fluctuates as a result of risk in the financial markets. Note 3 in the annual report for 2024 describes the company's financial risk, which also applies to financial risk in 2025.

Note 19 – Restatement of comparable figures as a result of reclassification

The commission that Eika Boligkreditt pays to the banks corresponds to a margin between the lending rate and the bank's estimated net interest (the bank's borrowing price from Eika Boligkreditt). It is therefore not a commission-based service but a fee paid for the intermediation of loans. According to IFRS 9, paragraphs B5.4.1 and B5.4.2, such transaction costs must be treated as an integral part of the loan's effective interest rate. This means that the cost is not presented on a separate line for commission expenses in profit and loss, but is recognised as a reduction in interest income. With effect from the first quarter 2025, the company has therefore altered the presentation of the portfolio commission paid to banks. The amount in question has been removed from the line "Commission costs" in expenses and is now reported as a deduction in "Interest from loans to customers". The sum is therefore presented as a reduction in interest income.

Interest from loans to customers

Amounts in NOK 1 000	4Q 2025	2025
Interest from loans to customers at amortised costs, before deduction of intermediary fees	1 412 314	5 660 310
