

## M VEST WATER AWARDED PURCHASE ORDER FROM DOWNSTREAM MARINE

M Vest Water (MVW) has today received a purchase order for the delivery of water treatment equipment to Downstream Marine (DSM), Norway.

The purchase order supports the announcement dated March 3, 2026, in which MVW reported high activity levels driven by an increasing number of customer enquiries and tender activity within aquaculture, following the new regulatory regime for Norwegian salmon slaughterhouses. The order provides further confirmation of this positive market development and supports MVW's continued growth in the segment.

The equipment will be delivered to a salmon slaughterhouse in Norway, operated by one of the major global seafood companies. The delivery comprises a flotation unit with potential for additional sales of a dosing system and MVW's natural water treatment chemical, NORWAFLOC®.

*"Our excellent collaboration with DSM has led to yet another equipment sale to a salmon slaughterhouse in Norway. The slaughterhouse is expanding its capacity and preparing to meet future strict discharge requirements, and has chosen equipment that, together with our NORWAFLOC® products, provides a Best Available Technology (BAT) solution for wastewater treatment. This sale supports our expected growth going forward," comments MVW's Executive Chairman Tor Olav Gabrielsen.*
