

# FUTURA RESOURCES

Third quarter FY2026

22 May 2026

# Disclaimer

THIS DOCUMENT IS NOT FOR RELEASE, PUBLICATION OR DISTRIBUTION, IN WHOLE OR IN PART, DIRECTLY OR INDIRECTLY, IN OR INTO OR FROM THE UNITED STATES OF AMERICA, ITS TERRITORIES OR POSSESSIONS, JAPAN, AUSTRALIA, CANADA, HONG KONG OR SOUTH AFRICA OR TO ANY RESIDENT THEREOF, OR ANY JURISDICTION WHERE SUCH DISTRIBUTION IS UNLAWFUL. THIS DOCUMENT IS NOT AN OFFER OR AN INVITATION TO SUBSCRIBE FOR, BUY OR SELL SECURITIES. AND NEITHER THIS PRESENTATION NOR ANYTHING CONTAINED HEREIN SHALL FORM THE BASIS OF ANY CONTRACT OR COMMITMENT WHATSOEVER.

This presentation (this "Presentation") has been produced by Futura Resources Limited (the "Issuer"), solely for information purposes for use in presentations to the holders of the Issuer's senior secured bonds 2026/2031 with ISIN NO0013698746 (the "Bonds") issued on 16 January 2026.

This Presentation and its contents are strictly confidential. They shall not (in whole or in part) be reproduced, distributed or passed on, directly or indirectly, to any other person (excluding investment professionals' advisers) without the prior written consent of the Issuer. Only the Issuer is entitled to provide information in respect of matters described in this Presentation. Information obtained from other sources is not relevant to the content of this Presentation and should not be relied upon.

This Presentation is for information purposes only. We recommend that the recipient seek independent third-party legal, regulatory, accounting, tax or other professional advice regarding the contents of this presentation. This presentation does not constitute and should not be relied on or considered as and is not held out to be any form of financial, accounting, regulatory or tax advice or opinion, advice or recommendation to any person to undertake any transaction and does not purport to contain all information that may be required to evaluate the matters set out herein and does not take into account the investment objectives, financial situation or needs of any particular person.

This Presentation contains certain forward-looking statements relating to the business, financial performance and results of the Issuer and its subsidiaries (together, the "Group") and/or the industry in which they operate. Forward-looking statements concern future circumstances and results and other statements that are not historical facts, sometimes identified by the words "believes", "expects", "predicts", "intends", "projects", "plans", "estimates", "anticipates", "targets", and similar expressions. The forward-looking statements contained in this Presentation, including assumptions, opinions and views of the Group or cited from third-party sources, are solely opinions and forecasts which are subject to risks, uncertainties and other factors that may cause actual events to differ materially from any anticipated development. None of the Issuer or any other member of the Group, or any of their affiliates or any such person's directors, officers, employees, advisors or representatives (collectively, the "Representatives") provides any assurance that the assumptions underlying such forward-looking statements are free from errors, nor does any of them accept any responsibility for the future accuracy of the opinions expressed in this Presentation or the actual occurrence of the forecasted developments. Forward-looking statements are not guarantees of future performance. The actual results may differ materially from those forecast. None of the Issuer nor the Representatives assume any obligation, except as required by law, to update any forward-looking statements or to conform these forward-looking statements to the Group's actual results.

An investment in the Bonds involves a high level of risk, and several factors could cause the actual results or performance of the Issuer to be different from what may be expressed or implied by statements contained in this Presentation. Past performance is not indicative of future results.

Each recipient acknowledges that it will be solely responsible for its own assessment of the market and the market position of the Issuer, and that it will conduct its own analysis and be solely responsible for forming its own view of the potential future performance of the Issuer and the Group's respective businesses.

Recipients of this Presentation should inform themselves about and observe any applicable legal requirements in their jurisdictions. In particular, the distribution of this presentation may, in certain jurisdictions, be restricted by law. Accordingly, recipients represent that they are able to receive this presentation without contravention of any applicable legal or regulatory restrictions in the jurisdiction in which they reside or conduct business. Any investment or investment activity to which this presentation relates is subject to all applicable legal requirements.

Unless stated therein, the information contained in this Presentation has been obtained by the Issuer, other members of the Group and/or their Representatives. While the information herein is believed to be in all material respects correct, neither Issuer, any other member of the Group, nor any of their respective Representatives (the "Covered Persons"), makes any representation or warranty, expressed or implied, as to the fairness, accuracy or completeness of the information contained in this Presentation, or regarding any other additional information which has or will be made available to the recipients in connection with any investment in the Bonds. To the maximum extent permitted by law, no liability is accepted by the Covered Persons and the Group and its Representatives disclaim any and all liability for direct or indirect loss, liability, damage, cost, charge or expense suffered or incurred by any person, directly or indirectly, as a result of or in connection with the provision, use of, or reliance on the information provided in this presentation, or for any errors, omissions or misstatements contained in it.

This Presentation reflects the conditions and views as of the date set out on the front page of this Presentation. The information contained herein is subject to change, completion, or amendment without notice. In furnishing this Presentation, no Covered Person undertakes any obligation to provide the recipients with access to any additional information.

This Presentation will be governed by, and construed in accordance with, the laws of Australia. The courts of Australia will have exclusive jurisdiction to settle any dispute arising out of or in connection with this Presentation.

By receiving this Presentation, each recipient agrees to be bound by the terms and conditions set forth above and represents that it is a qualified institutional or other professional investor who is sufficiently experienced to understand the aspects and risks related to an investment in the Bonds, and who will obtain additional expert advice where and when needed.

This Presentation does not create any legally binding obligations on the Issuer or any member of the Group.

# Operational Highlights

Q3 FY2026

## Strong safety record

1 LTI during Quarter, Zero HPI's.

Over ~2.5 years of operations, and ~230,000 man hours, only 2 LTI's have been recorded (minor joint strains – returned to full operational duties).

## Fairhill pit operations set to achieve mining targets

Despite limitation of significant wet weather events, Fairhill site infrastructure, equipment and personal is in place to achieve target ROM coal volumes. Monthly ROM target (145kt/m) will be achieved in FYQ4.

## Coal haulage volumes increasing as capital is deployed into road work program

Works on Stage 2a and 2b roadworks underway, progress limited by wet weather.

Haulage volumes increased consistently through Quarter as haulage contractor mobilised additional haulage units. Achieving daily target (5kt/d) from mid-March.

## CHPP processing full Fairhill resource, minor plant upgrades continue

Fairhill coal yields steady (~40% total) for the full Quarter. Further work to improve yield via updated mining sections and ROM blending underway.

Dry coal processing development on going, due to ship May 2026, onsite H2 FY2026.

## Fully utilising Futura dedicated rail contracts

Transition to Futura contract rail allocations completed during Quarter.

Improved loading rates and service allocation supported by direct Aurizon services.

## Drawdown and allocation of Bond funds complete

Nordic Bond raise complete, CP's met and drawdown undertaken 16 January 2026.

Funds deployed as required (existing debt, vendor financing, Convertible Note conversions)

# Summary Performance

## Q3 FY2026

### Overview

- One LTI for the Quarter (knee strain), overall safety performance excellent.
  - Transition to site wide safety platform complete.
- Multiple significant wet weather events in January (cyclone Koji), early February and early March overburden and coal production, as well as coal haulage and sales.
  - Operational time lost to both rain event standdowns and wet weather recovery and setup.
  - Approx 22 operational days 'lost' during period, ~25% of the Quarter.
  - Site handled weather events well, majority of lost time attributable to flooded Gregory State Highway cutting of access to site for workforce.
- CHPP underperformance driven by wet weather downtime significantly impacted on coal washed and product produced.
  - Weather impact on haulage and CHPP operation significantly limited fed volumes.
  - Planned upgrade to Reflux Classifier splitter completed late in Quarter, corresponding feed rate improvements realized.
- ROM costs relatively steady as expanded mining efficiencies (supported by Bond capital) are offset by higher diesel prices, and diesel supply constraints during the Quarter (now alleviated).

# Safety, Environment and Community

Q3 FY2026

## Key figures

**1**  
Reportable Injury

**13.12**  
TRIFR<sup>1</sup>

**Zero**  
HPIs<sup>2</sup>

## Summary

- One minor knee strain injury was recorded for the Quarter. Total Days since last Recordable Injury is 35 at the end of the reporting period.
- There were no High Potential Incidents (HPI's) recorded during the Quarter.
- The operations received one site visit by the Resources Safety and Health Queensland Inspectors (government safety inspectors) during the Quarter.
  - Inspectors issued 0 directions and 0 substandard Conditions or Practices (SCP).
- Quarter focus on surface water management (managing rain events) and maintaining compliance across both Wilton and Fairhill.
- Fairhill annual EA Audit actions have been completed and provided to DETSI for confirmation.
- Environmental consultants engaged to support ongoing EA amendment, ERC and PRCP activities.
- Groundwater compliance and PRCP milestones continue to be a key focus
- Comiskey legal matter, Land Court Appeal, was dismissed by the Court on 20 May. Futura has lodged orders seeking our costs.

# Mining Operations

Q3 FY2026

## Key figures

**747.8 kbcm**  
Waste Removal

**232,890 mt**  
Coal Mined

**3.2x**  
Strip Ratio

## Summary

- Wilton operations remain suspended, minor water management and rehabilitation works undertaken.
- Fairhill operations (mining, haulage, washing and sales) were significantly impacted by multiple large wet weather events during the Quarter. Cyclone Koji (Jan), Cyclone Alfred (Feb) and ex-Cyclone Narelle (Mar).
- Rainfall on the mine site was well managed, however, the Gregory Highway, the State Government road which provides access to Futura's operations (also Gregory and Kestrel) was flooded, cutting access to site for ~21 days during the Quarter.
- Despite wet weather restricting actual production and sales volumes, operational ramp up has progressed well, with the Fairhill pit equipped with the people, equipment and facilities to reach target production (145kt/m) in FYQ4.
- Dozer Push only mining operations continue to progress according to operational forecast with production rates in blasted overburden at and exceeding expectations.
- Coal mining practices continue to improve with new equipment trialed on some coal plies and formal changes being made to improve efficiency and reduce costs in FYQ4.
- Remaining site office infrastructure and maintenance igloo on-site and undergoing installation during and through the end of the Quarter.

## Fairhill Site Images

# Coal Haulage, Processing and Logistics

Q3 FY2026

## Key figures

**250,939 mt**  
Coal Hauled

**252,829 mt**  
Coal Washed

**90,042 mt**  
Total Coal Sold

## Summary

- Post Bond drawdown (Jan-16) Futura immediately engaged civil contractor to progress Stage 2a and 2b works as planned. Works were underway early February.
- With road works underway, approvals supported Futura request of additional haulage units from haulage contractor, to ramp haulage to a target of 5,000tpd.
  - Contractor was able to provide haulage units immediately, however onboarding new drivers led to achieving target haulage in mid-March.
- Wet weather impacts to accessing site (Gregory Highway) impacted haulage volumes and road work progression. However, both progressed significantly through end of March into April.
- Daily rates and end of FYQ3 are at required levels and aligned with forecast.
- Rain events limited CHPP operational time, and subsequent scheduling, particularly in February, however post Quarter April exceeded the target (145kt/m) feeding 145,880mt.
- Reflux Classifier splitter valve installed and operational, assisting in ash control and increasing feed rate.
- Railed tonnes aligned with washing volumes, however, were conducted via Futura rail contracts, improving service reliability.
- Coking coal train loading issues identified (TLO bin hanging material – low load rate), work group with Sojitz in-place and preferred solution identified for action in FYQ4.

## Fairhill ROM and Gregory TLO

# Coal Quality, Sales and Market

Q3 FY2026

## Key figures

**90,042 mt**  
Coal Sold

**34,271 mt**  
Primary Product

**55,771 mt**  
Secondary Product

## Summary

- Quality for both Primary and Secondary product was consistent throughout the Quarter.
  - Primary Coking Coal ash is trending between 11.5% and 12.0% creating additional marketing opportunities.
  - Secondary Thermal Coal energy has trended around 5,600kcal (against benchmark of 5,500kcal)
- Higher Secondary coal sales reflect lower than target Primary coal yield.
  - Full analysis of ROM mining sequence and CHPP haulage blends has been conducted.
  - Resulting changes to mining process have been made, will be seen in FYQ4 results (effective from mid-May washing programs).
- Yields assumptions also skewed by delay to delivery of FGX. Budget assumed operational in Feb-2026, however construction delays in China have pushed operational target to Aug-2026. Unit is on the water to Australia as of early-May.
- Received pricing for both Primary and Secondary improved on previous Quarter as product qualities become better valued by buyers, and contracts move away from spot to short-term (6–9 month contracts).
- Management visit to end-users across target markets (South Korea, Japan and Taiwan) have yielded valuable contractual negotiations and progression of trial work with high value buyers.

## Quarterly Coal Quality

| Parameters           | Primary Coal |        | Secondary Coal |        |
|----------------------|--------------|--------|----------------|--------|
|                      | Target       | Actual | Target         | Actual |
| Total Moisture (ar)  | 12.6%        | 14.2%  | 8.0%           | 6.3%   |
| Ash (ad)             | 12.0%        | 11.6%  | 27.0%          | 27.5%  |
| Volatile Matter (ad) | 24.0%        | 23.7%  | 20.0%          | 19.8%  |
| Fixed Carbon (ad)    | 56.0%        | 62.5%  | 51.0%          | 51.0%  |
| Total Sulphur (ad)   | 0.70%        | 0.72%  | 0.65%          | 0.63%  |
| CSN                  | 8.5          | 9      | N/A            | N/A    |
| CSR                  | 66           | 68     | N/A            | N/A    |
| Fluidity (ddpm)      | 2,200        | 2,500  | N/A            | N/A    |
| Net CV (ad)          | N/A          | N/A    | 5,500          | 5,550  |

## Quarter Benchmark Pricing and Comments

| Benchmark Index (US\$) | Q4 FY2026 | Q3 FY2026 | Q2 FY2026 | Q1 FY2026 |
|------------------------|-----------|-----------|-----------|-----------|
| Premium Low Vol (PLV)  | -         | 235.36    | 200.12    | 183.62    |
| Low Vol HCC (LVHCC)    | -         | 195.97    | 176.74    | 150.82    |
| NEWC (6,000)           | -         | 119.53    | 105.48    | 109.34    |
| API5 (5,500)           | -         | 80.75     | 78.51     | 69.01     |

- PLV Q3 average has been maintained into Q4.
- NEWC and API5 strengthened late in Q3 in response to events in the Middle East.
- API5 strengthening further into Q4.

# Operational Forecast

Q4 FY2026

**ROM Production to reach 145,000t per month**

On track to meet and slightly exceed as of May.

**Haulage and wash volumes to reach 145,000t per month**

Haulage and wash volume achieved in April.  
Will continue to be achieved moving forward.

**Yield increase reflecting changed ROM mining and blending**

Mining section updates, and ROM haulage blend changes actioned in late April, effective at CHPP from mid-May.

**Term contracts in place for Coking and Thermal sales**

Coking coal term contract for 16kt/m in place with Anglo till December 2026. Timing set to allow transition to end-user term contracts from January 2027.  
Thermal coal term contract with Anglo extended - increased to 24kt/m till December 2026.

**End User trial cargoes to ship**

Progressing in earnest with Nippon, JFE and Tata on near term trial cargoes. Underpinned by significant sample test work and face to face engagement.

**Wilton operations remain suspended**

Wilton to remain on hold pending confirmation from Square of committed sales volumes.  
Discussions progressing with 2 key parties with intent to kick off operations immediately on contract settlement.

# Financial Update

# Financial Commentary

For the quarter ended 31 March 2026

## Summary

- Combination of wet weather and increased diesel prices placed strain on the business financial position during the Quarter.
- Bond funds were deployed per Bond Terms and expectations.
- Free cash position has been materially impacted by weather and diesel, as well as lower than schedule yields impacting on revenue.
- See Operational and Yield Planning section for detailed analysis.
- Cash position in relation to minimum cash covenant is being managed carefully. **The business is not currently anticipating a breach and is not seeking relief or consideration on this covenant at this time.**
- Given delays resulting from significant FYQ3 wet weather, and delays in Wilton re-start, Futura is forecasting that the **Interest Coverage Ratio (ICR) will not be met upon first testing (30 September 2026).**
- Futura is closely assessing this position as part of the current budget works and Bond Holders should expect Futura to approach with a request to **alter the ICR first test date to 30 June 2027, well in advance of 30 September.**
- Futura is forecasting improved ROM costs, yield and FOB costs in FYQ4 and FY27.
- See Operational and Yield Planning and FY27 sections for detailed analysis.

# Operational and Yield Planning

# Yield Trends and Operations

## Yield Impacts and Actions

### FYQ3 Figures

|                              |                                |                                  |
|------------------------------|--------------------------------|----------------------------------|
| <b>39.6%</b><br>Total Actual | <b>13.3%</b><br>Primary Actual | <b>26.3%</b><br>Secondary Actual |
| <b>45.7%</b><br>Total Budget | <b>23.1%</b><br>Primary Budget | <b>22.6%</b><br>Secondary Budget |

### Summary

- Primary yield for the Quarter was lower than forecast. Detailed review has identified three key drivers.
- Driver 1:** Weather impact on mining sequence
  - Wet weather impacted the mining schedule such that the idealized ROM blend was not able to be achieved. As a result, a higher proportion of lower yielding I & K plies was hauled and washed during the period then is representative of normal operation.
  - Further detailed analysis work has also identified that the I & K are yielding lower than modelled at the CHPP. These plies have been removed from the ROM blend as of late April and are being stockpiled for preferred processing through the FGX.
- Driver 2:** CHPP Circuitry
  - Reflux Classifier (RC) upgrades (splitter valve) and repairs (control valve) were completed late in the Quarter.
  - Prior to these items being solved, ash control was reduced resulting in a higher proportion of material reporting to Secondary.
- These items have both been addressed post FYQ3 end.
- Driver 3:** Lack of FGX
  - The budget forecast assumed that the dry coal processing (FGX) unit would be active in Q1.
  - Without this unit active the budget yields are un-aligned with actual achievable outcomes.

### Actions FYQ4

- Several actions have been enacted in late FYQ3 and early FYQ4.
- Action 1:** Return to normalised ROM coal availability
  - With a return to relatively dry conditions since mid-March, the mining sequence is now on forecast, providing the correct volumes of each coal ply in the required sequence to facilitate desired ROM blending for the CHPP.
  - Given the lag time between mining, ROM blending/haulage and washing, the impacts of this will be seen from the mid-April washes onwards.
- Action 2:** Removal of I&K from ROM Blend
  - As of mid-April, the I&K plies have been removed from the ROM blend all together, these seams are being stockpiled from processing via the FGX unit.
  - The impact of this change will be noted from mid-May washing onwards.
- Action 3:** Splitting of EFG plies
  - Detailed working section analysis, and excellent operational feedback from coal excavator operators has facilitated a change in mining sequence.
  - The ~5cm parting between the EF and G plies has thickened, and is now being removed in pit.
  - The impact of this change will be noted from mid-June washing onwards.

### FYQ4 Forecast

### Summary

- The FY27 budget is undergoing final scenario testing and analysis.
- Detailed scenario analysis indicates the FGX has the potential to materially improve EBITDA by diverting low-yield CHPP feed into a lower-cost thermal recovery pathway, increasing free cash generation and strengthening debt servicing capacity.
- Following commissioning, Futura will undertake structured operational trials to validate these scenarios and optimise the coal handling and processing strategy to maximise EBITDA and free cash generation.
- Per the above indicative volumes, while Primary coal product is reduced, the cost base to produce the additional thermal tonnes is meaningfully lower, driving a higher overall free-cash position and EBITDA.
- Current scenario analysis indicates ability to lower underlying cost base by ~10%, while only reducing revenue by ~2% resulting in a net increase in free-cash flow AND ebitda.
- Full analysis will be detailed as part of the FY27 budget.
- Futura is also taking a flexible approach to the Wilton operation with schedules written for the Wilton pit, however these will not be enacted in the base case pending confirmation of sales position.

### Dry Coal Processing Unit (FGX)

- The FGX was inspected in China in April, prior to the unit be deconstructed for shipping to site.
- The unit is due on-site in June, commissioning targeted for late July.
- Operational trials of the unit in China identified the ability target additional feed material scenarios to reach the most productive operational approach.
- Initial focus will be on maximising thermal coal yield creating product that can by-pass the CHPP and a much lower cost base.
- Subsequent work will leverage the low-density part of the unit to attempt to also create by-pass coking product not required to report to the CHPP.
