

EURONEXT SERIES INTRODUCTION POLICY FOR INDIVIDUAL EQUITY OPTIONS

Euronext determines the minimum number of series to be introduced for an Individual Equity Option (IEO) per Maturity and per Scale, as detailed in this Series Introduction Policy.

SERIES INTRODUCTION POLICY

1. The series policy determines the interval between different series and the minimal number of initially introduced series. The intervals between series are dependent on the exercise price range. Intervals will be smaller for series with lower exercise prices compared to series with higher exercise prices. Next to that, intervals will be smaller for series with a shorter remaining lifetime compared to series with a longer remaining lifetime. The number of series is set per maturity and can differ per remaining lifetime. This policy applies to all IEOs listed on Euronext markets except for IEOs that are listed on the Oslo exchange or IEOs on a German underlying
2. Euronext determines the minimum number of series to be introduced for an IEO class per Maturity and per Scale (A-F), as illustrated in the graphic below:

6. In the eventuality of high volatile market circumstances, Euronext might decide to double the series intervals for a certain remaining lifetime or a group of remaining lifetimes or introduce additional series.
7. In order to ensure the most appropriate series are introduced for all IEOs, Euronext will continue to monitor the series policy and reserves the right to deviate from and amend the initial series introduction policy, if market conditions require to do so.
8. In addition to the harmonised series introduction policy, Euronext will continue to allow Members to request additional series in an option class according to the series on request policy.
