OPTION STYLE	European-style exercise, which can be exercised only at expiry.																		
UNDERLYING INSTRUMENT	CAC 40® index																		
TRADING UNIT	The trading unit is one contract for which each index point is assigned a value (the "multiplier") of € 10. The contract size is equal to the index value multiplied by € 10.																		
MINIMUM PRICE FLUCTUATION (TICK)	0.10 per index point, i.e. € 1 per contract.																		
EXPIRY MONTHS	There are four weekly option classes. Each class will have a fixed last day of trading, this is either the first Friday of the month (option trading symbol: 1PX), the second Friday of the month (2PX), the fourth Friday of the month (4PX) or, when applicable, the fifth Friday of the month (5PX). Weekly options will be available for trading as from the Friday two weeks prior to expiry.

EXERCISING OPTIONS	At expiry, in-the-money options are automatically exercised, unless contrary instructions are received from the participant. When an option is exercised by its holder, a writer-clearing member is assigned prorata by LCH SA. Settlement takes the form of a cash transfer equal to the difference between the option strike price and the value of the expiry settlement index, multiplied by the number of contracts exercised and the contract unit (€ 10). The expiry settlement index used as a reference for automatic exercise of contracts that are in-the-money at maturity. On expiry day, Euronext calculates the settlement index as the arithmetic mean of all index values calculated and disseminated between 15:40 and 16:00 CET.																		

	<p>rounded to two decimal places. Such settlement index is taken, and rounded to one decimal place, to produce the expiry settlement index¹, which is used as a reference for automatic exercise of contracts that are in-the-money at maturity.</p> <p>The cut off time for exercise and exercise abandonment is:</p> <ul style="list-style-type: none"> - 19:15 CET on expiry day
