

SUMMARY OF RAPESEED FUTURES AND OPTIONS CONTRACTS

Rapeseed Complex: Rapeseed, Rapeseed Oil and Rapeseed Meal Contracts

A combined Rapeseed complex

The launch of a combined Rapeseed derivatives complex complements the existing Rapeseed futures and options contracts by **offering the industry both Rapeseed Meal and Rapeseed Oil futures and options contracts.**

20 years of success: the current Rapeseed grain futures contract was launched in 1994 in close cooperation with the oilseeds industry and organisations such as the Onidol. This was in response to changes in the 1992 European Common Agricultural Policy and was Euronext's first agricultural derivatives contract.

Since then the contract has enjoyed positive growth with **volumes increasing by 67% over the past five years to reach the tonnage equivalent of 93 MT traded in 2013.**

A Rapeseed complex responding to the high volatility in the oilseed sector

The new contracts provide a clear response to the high volatility in the oilseeds sector and offer **the industry with a way to hedge their entire purchase and output chain as well as their crushing margin.**

Developed in close **cooperation with the Rapeseed community** the new futures and options contracts have been designed to meet the needs of market professionals who want to use appropriate price hedging tools.

An expanded range of efficient and competitive instruments for managing price risks in a transparent and secure environment

The animal feed sector will benefit from the usage of a dedicated contract when the demand for vegetable protein grows and prices are moving.

Participants of the energy sector, like the biodiesel makers, will be able to hedge their biofuels price component exposure.

Trading Euronext contracts provides:

- recognized **benchmarks,**
- pre and post trade **transparency,**
- **price discovery,**
- **efficient clearing and settlement** with the highest standards of the sector: clearing and settlement of these contracts are carried out by the clearing house LCH Clearnet SA,
- **secure delivery mechanism,**
- physical delivery of last resort to ensure **price convergence.**

READY TO HARVEST. NEW RAPESEED OIL AND MEAL DERIVATIVES.

Manage your risk on the entire crushing margin with Euronext's new Rapeseed complex derivatives. Available to trade in a transparent and secure environment, Rapeseed derivatives complex can help you manage price volatility and protect your margin.
