Euronext<sup>®</sup> Sustainable France 20 Index Index

Benchmark

SBF® 120 Index Objective 🂮

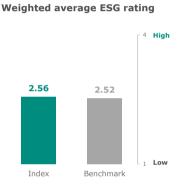

The Euronext® Sustainable France 20 index consists of companies included in the French Equitics Universe, covering the major largest free-float market capitalisations in France. Companies may be excluded if their level of commitment is insufficient with regard to their overall score or their score in one of six key areas reviewed in the Equitics methodology or are subject to serious, proved, or recurrent controversies. Then 20 highest ranking companies are selected according to their overall Equitics score. The index is Non-Market capitalisation weighted, weighting are based on the overall Equitics scores. The index serves as an underlying for structured products, funds and exchange traded funds. The index rules are available on our website. Euronext acts as Supervisor. All our rulebooks can be found at:

https://live.euronext.com/en/products-indices/index-rules.

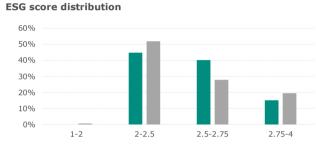

This ESG Report provides information on ESG factors aggregated at the index level within the framework of the Benchmark Regulation (BMR), the Sustainable Finance Disclosure Regulation (SFDR) and the European Union Taxonomy Regulation. The metrics on ESG factors in this ESG Report are provided by ISS ESG, updated guarterly, and are described at:

https://live.euronext.com/en/products/indices/rules-esg-report-disclosures-definitions.

# ESG Performance

Overall ESG rating of top ten benchmark constituents by weighting: 2.60

Coverage ISS ESG rating Index/Benchmark: 100.00% / 99.89%

ISS ESG Corporate Rating provides highly relevant, material and forward-looking environmental, social and governance (ESG) data and performance assessments. The overall analysis is graded on a twelve-point scale from 4(A+) where the company shows excellent performance to 1(D-) where the company shows poor performance or fails to demonstrate any commitment to appropriately address the topic. The rating grasps ESG risks, opportunities and impact along the entire corporate value chain, including a dedicated SDG-based component measuring positive and negative impact of products and services as well as integrating the existence and severity of controversies and violations of global norms in the topic-specific and overall assessment. Drawing on a pool of more than 700 indicators developed in house with clearly defined performance expectations and scoring models, ISS ESG sector specialists along with a dedicated in-house team of methodology experts select a set of about 100 criteria for each industry. Performance data on more than 30 ESG topics available across all industries and based on in-depth analysis of various factors :

ENVIRONMENT

- Climate Change Strategy
- Eco-Efficiency
- Energy Management
- Environmental Impact of Product Portfolio
- Environmental Management
- Water Risk and Impact
- · And more

SOCIAL

- Equal Opportunities
- Freedom of Association
- · Health and Safety
- Human Rights
- Product Responsibility
- Social Impact of Product Portfolio
- Supply Chain Management
- Taxes
- And more

#### GOVERNANCE

- Business Ethics
- Compliance
- Independence of the Board
- Voting Rights
- Shareholder Participation
- Remuneration
- · And more

## **Environmental Indicators**

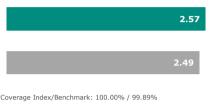

ISS ESG Environmental rating provides a numeric score from 1 (D-), being poor, to 4 (A+), being high, linked to the rated entity's Environmental rating. The Environmental rating is based on an assessment of performance across key environmental metrics including energy management, water risk and impact, waste management, ecoefficiency, sector specific environmental aspects along the value chain, and other issues.

 ${\sf Main\ factors\ taken\ into\ account\ :}$ 

- Climate Change Strategy
- Eco-Efficiency

- Energy Management
- Environmental Impact of Product Portfolio
- Environmental Management
  Water Risk and Impact

### **Environmental score**

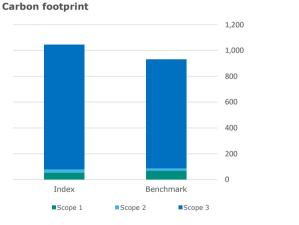

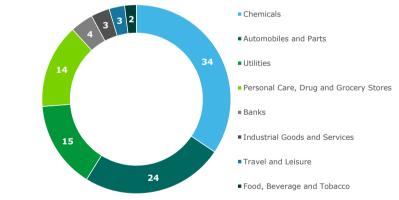

## 日日 GHG Emissions 다음

• Carbon footprint: aggregated emissions (tCO2e) from Scopes 1, 2, and 3 per million EUR of Enterprise Value

• GHG intensity: aggregated emissions (tCO2e) from Scopes 1, 2, and 3 per million EUR of revenue

### Index Top Sectors Contributions to Carbon Footprint (%)

			Carbon footprint tCO2e/Enterprise Value					GHG intensi CO2e/Reven		
	Estimated (%) Scope 1,2	Estimated Trust Score Scope 1,2	Coverage (%) Scope 1,2,3	Scope 1	Scope 2	Scope 3	Total Scope 1,2,3	Coverage (%) Scope 1,2,3	Total Scope 1,2	Total Scope 1,2,3
Index	0.0%	-	100.0%	55.1	22.5	967.8	1,045.4	100.0%	109.3	1,467.7
Benchmark	0.4%	0.87	99.9%	67.5	18.8	845.4	931.8	99.9%	124.8	1,535.9
Net Performance	0.36 p	-	0.11 p	18.46%	-19.99%	-14.47%	-12.19%	0.11 p	12.40%	4.44%

Based on ISS ESG data, the carbon footprint scope 1,2,3 of the index is 12.19% higher than the benchmark and the GHG intensity scope 1,2,3 of the index is 4.44% lower than the benchmark. The percentage of GHG emissions reported versus estimated on GHG scope 1 + 2 is 100.00% of the total weight of the index, 99.64% for the benchmark. The percentage of GHG emissions reported versus estimated on GHG scope 3 is 75.54% for the index and 84.57% for the benchmark.

The Estimated Trust Score on scope 1,2 is - for the index and 0.87 for the benchmark. The Reported Trust Score assessing the reliability of issuer-reported emissions data is 0.91 for the index and 0.94 for the benchmark.

## **EU Taxonomy Alignment - CapEx**

#### Eligible Capital Expenditure Overview

This factor identifies all Taxonomy Eligible Capital Expenditure relating to the issuer in question, and the percentage figure of company capital expenditure associated with each Eligible activity. It then shows a granular breakdown for all of the results produced by the model at each technical step of the assessment proces (substantial contribution, do no significant harm and minimum social safeguards check). Finally, an overall alignment result is provided, aggregating the results from each individual step of the process.

## **EU Taxonomy Alignment by pillars**

The EU Taxonomy Alignment report evaluates a portfolio's levels of alignment against the six climate and environmental related objectives set out by the regulation, by determining investee companies' involvement in Taxonomy eligible economic activities, quantifying the respective revenues from these activities, and subsequently applying the three technical assessment steps of Substantial Contribution, Do No Significant Harm, and Minimum Social Safequards.

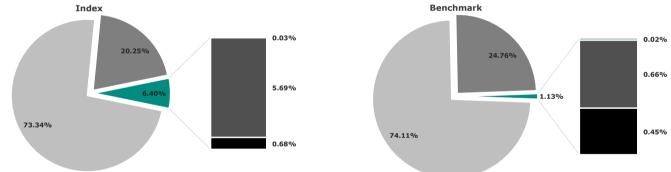

## **Climate Change Mitigation**

Climate Change Mitigation is addressing all the actions and strategies aimed at reducing or preventing the emission of greenhouse gases and minimizing the impact of human activities on the Earth's climate system.

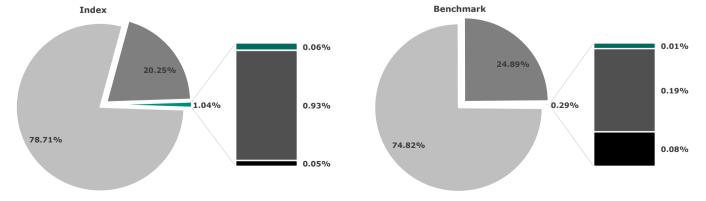

### **Climate Change Adaptation**

Climate Change Adaptation involves all the efforts to adjust and prepare for the adverse effects of climate change, enhancing resilience and reducing vulnerability to climate-related risks.

### Water and marine resources

The Sustainable Use and Protection of Water and Marine Resources encompasses practices and policies that promote responsible utilization of water resources, ensuring their long-term availability, and protecting marine ecosystems from degradation.

### **Circular economy**

The transition to a Circular Economy refers to the shift from a linear economic model (take, make, dispose) to a circular one, where resources are used efficiently, products are designed for longevity, and waste is minimized through recycling and reuse.

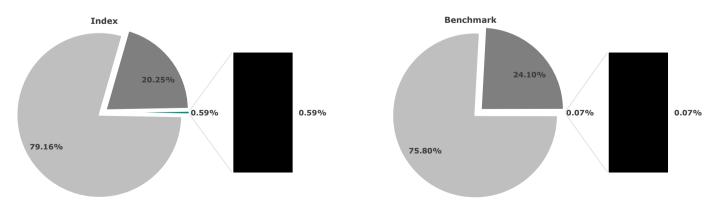

### **Pollution prevention and control**

Involves measures to eliminate, reduce, or manage the release of harmful substances into the environment, aiming to prevent pollution and protect air, water, and soil quality.

### **Biodiversity and ecosystems**

The Protection and Restoration of Biodiversity and Ecosystems encompasses initiatives to safeguard and revitalize diverse forms of life and their habitats, recognizing the intrinsic value of biodiversity and the critical role ecosystems play in sustaining life on Earth.
