

Carbon Portfolio Report

Portfolio Information		Carbon Risk Rating Coverage	
Name	Number of Constituents	By Portfolio Weight	By Number of Constituents
Portfolio MIB ESG	40	<div style="width: 100%;"><div style="width: 100%;"></div></div> 100%	40
Benchmark MIB ESG UNIVERSE	70	<div style="width: 100%;"><div style="width: 100%;"></div></div> 100%	68

Overview

The Carbon Portfolio Report provides a deeper understanding of a portfolio's position with regards to the transition towards a low-carbon economy. It compares the portfolio with a benchmark across four carbon assessments: Carbon Risk Rating, Carbon Intensity, Fossil Fuel Involvement and Carbon Solutions Involvement. The combination of these assessments provides a multi-dimensional view of the portfolio's performance versus the benchmark and provide useful insights about the portfolio holdings.

- Portfolio
- Benchmark

Carbon Risk Rating

Page 3-7

The Carbon Risk Rating quantifies the company's exposure and management of material carbon issues in its own operations as well as its products and services.

Overall, the portfolio falls into the Low carbon risk category, and has 7% lower carbon risk than the benchmark.

Carbon Intensity

Page 8

Carbon intensity is a relative metric used to compare company emissions across industries. Sustainalytics divides the absolute emissions by total revenue, meaning the figure is expressed in tonnes of carbon dioxide equivalent per million USD of total revenue.

Overall, the portfolio is 11% less carbon intensive than the benchmark.

Fossil Fuels

Page 9

Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services.

Overall, the portfolio has 15% more exposure to Fossil Fuels than the benchmark.

Carbon Risk Rating

- Portfolio
- Benchmark

The Carbon Risk Rating quantifies the company's exposure and management of material carbon issues in its own operations as well as its products and services. At each value chain stage, a company's vulnerability to carbon risks is assessed. This is followed by an assessment of how much of this risk is manageable as opposed to systemic, with a final step of evaluating the degree to which management policies are already in place.

Overall, the portfolio falls into the **Low** carbon risk category, and has 7% lower carbon risk than the benchmark.

The portfolio has 33% more exposure to companies with High and Severe carbon risk than the benchmark.

Overall Carbon Risk Score

Category
Low
Medium

Carbon Risk Categories

Carbon Risk Category by aggregate portfolio weight %

Negligible: 0

The portfolio has little to no material carbon risk

Low: 0 - 10

The portfolio has carbon risk that could have material impact

Medium: 10 - 30

The portfolio has carbon risk that is material

High: 30 - 50

The portfolio has carbon risk that is highly material

Severe: > 50

The portfolio has severe carbon risk

Carbon Exposure

Exposure considers a company's sensitivity or vulnerability to carbon risks. Very low exposure suggests that an issue is not material to a company; higher exposure suggests that the issue is material.

Overall, the portfolio has 1% more exposure to carbon risk factors than the benchmark and falls into the Low exposure category.

Overall Exposure Score

Category
Low
Low

Carbon Management

Management considers a company's commitments and actions to determine how a company approaches and handles carbon issue through policies, programmes, quantitative performance and involvement in controversies. Higher scores indicate stronger management.

Overall, the portfolio has 6% stronger management of carbon risk than the benchmark and falls into the Strong management category.

Overall Management Score

Category

Strong

Operations

Operations		Exposure		Management	
Score	Category	Score	Category	Score	Category
2.8	Low	11.5	Low	42.1	Average
3.0	Low	11.0	Low	41.3	Average

■ Portfolio
■ Benchmark

Overall, the portfolio falls into the Low operations carbon risk category, and has 6% lower operations carbon risk than the benchmark.

Overall, the portfolio has 5% more exposure to carbon risk factors in operations than the benchmark.

Overall, the portfolio has 2% stronger management of carbon risk in operations than the benchmark.

Products & Services

Products & Services		Exposure		Management	
Score	Category	Score	Category	Score	Category
4.7	Low	7.4	Low	13.6	Weak
5.4	Low	8.4	Low	14.2	Weak

Overall, the portfolio falls into the Low product and services carbon risk category, and has 13% lower products and services carbon risk than the benchmark.

Overall, the portfolio has 11% less exposure to carbon risk factors in products and services than the benchmark.

Overall, the portfolio has 4% weaker management of carbon risk in products and services than the benchmark.

Sector Contribution

Looks at the Carbon Risk Rating score across sectors. Lower scores equal lower risk.

Sector	Score	Contribution	
		Portfolio Weight	Carbon Risk Contribution
Consumer Discretionary	1.8	11.8%	19.0%
Energy	3.1	9.4%	33.4%
Financials	1.7	42.1%	18.8%
Healthcare	0.2	2.4%	1.7%
Industrials	1.1	8.0%	11.4%
Information Technology	0.3	6.5%	3.2%
Telecommunication Services	0.0	0.7%	0.5%
Utilities	1.1	19.1%	12.1%

Companies with the Highest Carbon Risk in the Portfolio

Identifies the 10 companies with the highest carbon risk score.

Company Name	Sector	Portfolio Weight	Carbon Risk				
			Score	Weighted Score	Category	Exposure	Mngmt
Eni SpA	Energy	8.7%	34.4	3.0	High Risk	77.6	79.8
Stellantis NV	Consumer Discretionary	7.2%	24.2	1.7	Medium Risk	40.8	40.7
Leonardo SpA	Industrials	2.2%	24.0	0.5	Medium Risk	42.0	58.1
Saipem SpA	Energy	0.7%	17.8	0.1	Medium Risk	28.6	47.2
SNAM SpA	Utilities	2.5%	13.8	0.3	Medium Risk	37.8	68.2
Banca Mediolanum SpA	Financials	0.7%	12.8	0.1	Medium Risk	18.5	31.1
Webuild SpA	Industrials	0.4%	11.4	0.0	Medium Risk	25.8	69.8
Prysmian SpA	Industrials	5.3%	9.0	0.5	Low Risk	26.4	66.0
Amplifon SpA	Healthcare	1.0%	8.7	0.1	Low Risk	16.8	48.4
Banca Monte dei Paschi di Siena SpA	Financials	1.3%	7.2	0.1	Low Risk	14.0	48.5

Companies with the Lowest Carbon Risk in the Portfolio

Identifies the 10 companies with the lowest carbon risk score.

Company Name	Sector	Portfolio Weight	Carbon Risk				
			Score	Weighted Score	Category	Exposure	Mngmt
Moncler SpA	Consumer Discretionary	3.7%	0.0	0.0	Negligible Risk	0.0	0.0
MFE-MEDIAFOREUROPE NV	Consumer Discretionary	0.1%	0.0	0.0	Negligible Risk	0.0	0.0
OVS SpA	Consumer Discretionary	0.1%	0.0	0.0	Negligible Risk	0.0	0.0
Salvatore Ferragamo SpA	Consumer Discretionary	0.1%	0.0	0.0	Negligible Risk	0.0	0.0
TERNA Rete Elettrica Nazionale SpA	Utilities	3.1%	0.4	0.0	Low Risk	3.6	89.3
Banca Generali SpA	Financials	0.6%	0.6	0.0	Low Risk	21.0	97.0
Intesa Sanpaolo SpA	Financials	10.1%	0.9	0.1	Low Risk	17.1	95.0
ERG SpA	Utilities	0.4%	1.4	0.0	Low Risk	10.0	86.2
Unipol Gruppo SpA	Financials	1.2%	1.5	0.0	Low Risk	11.4	86.9
Acea SpA	Utilities	0.2%	2.4	0.0	Low Risk	10.8	78.1

Glossary of Terms

Absolute Carbon Emissions

In this report, absolute carbon emissions cover scope 1 and scope 2 emissions of the various types of greenhouse gases, expressed in tons of carbon dioxide equivalent. Reporting requirements are standardized under the GHG Protocol by the World Resources Institute and World Business Council for Sustainable Development. This lists the greenhouse gases that companies are expected to account for as: carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulphur hexafluoride (SF₆), and nitrogen trifluoride (NF₃).

Emissions are broken down into the following categories:

Scope 1 covers the direct emissions associated with the energy that a company produces for its own use.

Scope 2 covers the indirect emissions associated with the energy that a company purchases from third-party providers.

Scope 3 covers all other emission sources throughout the value chain (e.g., purchased goods, use of sold products, investments, business travel, etc.) but these are not quantified in this report.

Carbon Intensity

A relative metric suitable for comparing companies' performance. Sustainalytics divides absolute emissions by total revenues, which enables comparison of companies in different industries. Carbon intensity is expressed in tonnes of carbon dioxide equivalent per million USD of total revenue.

Carbon Risk

A risk related to a company's challenge to transition towards a low-carbon economy. A popular synonym is transition risk. This may cover a variety of risk sources including policy and legal, technology, market, and reputation. Climate change risk is a broader concept, comprising transition and physical climate-related risk.

Carbon Risk Exposure

One of the two dimensions of the Carbon Risk Rating, this reflects the extent to which a company is exposed to material carbon risks. Exposure can be considered as a sensitivity or vulnerability to carbon risks.

Carbon Risk Management

The second dimension of the Carbon Risk Rating, this measures a company's handling of material carbon issues through policies, programmes, quantitative performance and involvement in controversies.

Carbon Risk Rating Score (Unmanaged Risk Score)

The company's final score in the Carbon Risk Rating; it applies the concept of risk decomposition to derive the level of unmanaged risk for a company.

Unmanaged Risk

Material ESG risk that has not been managed by a company. This includes two types of risk. Firstly, unmanageable risks that stem from the intrinsic nature of the products or services of a company and/or the nature of a company's business. Secondly, risks that could be managed by a company through suitable initiatives, but which are yet unmanaged.

Weighted Scores

Sustainalytics normalizes the security weights of the matched security results within the selected portfolio and benchmark to equal 100% of the total portfolio weight, by evenly redistributing unmatched security weights and by combining the weights of securities matched to the same company. If there are no security weights available, Sustainalytics will assign equal weights to all securities. Weighted Scores are calculated by aggregating normalized security weighted scores.

About This Report

Sustainalytics' Carbon Risk Ratings are designed to help investors identify and understand financially material carbon risks at the security and portfolio level and how they might affect the long-term performance for equity and fixed income investments. The Carbon Risk Ratings combined with qualitative analyses, provide clients with a differentiated risk signal and deeper insights into the materiality of certain carbon issues for a company and what the company is or is not doing to manage them effectively. Sustainalytics normalizes the security weights of the matched security results within the selected portfolio and benchmark to equal 100% of the total portfolio weight, by evenly redistributing unmatched security weights and by combining the weights of securities matched to the same company. If there are no security weights available, Sustainalytics will assign equal weights to all securities.
