2. INDEX REVIEWS

2.1 REVIEW FREQUENCY AND RELEVANT DATES

Review frequency:	Quarterly
Review Effective Date:	After the market close of the third Friday of March, June, September and December.
Review Cut-Off Date:	After the market close of the penultimate Friday of February, May, August and November.
Review Announcement Date:	At least two days before the Review Effective Date.
Review Weighting Announcement Date:	Two days before the Review Effective Date.

2.2 REVIEW SELECTION

Step 1: Index Universe

Index Universe definition

The Index Universe consists of the companies included in the Euronext Eurozone 300 index; at reviews this means included after the Review Effective Date.

Step 2: Eligibility screening at reviews

Companies with an average daily turnover below 10 million € over a year are not eligible. Should this step lead to a number of eligible Companies below 150, additional Companies will be added based on the highest average daily turnover until there are 150 eligible Companies. Subsequently the 150 largest Companies in terms of free float market capitalization are eligible.

Step 3: Selection Ranking

Eligible Companies are ranked on V.E ESG score. In case of an equal score the company with the highest free float market capitalization will rank higher.

The Euronext ESG Providers Methodologies document gives a detailed background on various scoring methodologies.

Step 4: Selection of constituents at the reviews

The 100 highest ranking companies will be selected in the index.

2.3 PERIODICAL WEIGHTING UPDATE

Weighting method

The index is Non-Market Capitalisation weighted, based on a normalized ESG score.

The Weighting Factors are explained in the following paragraphs.

Number of shares

The Number of Shares will be calculated such that each Company will have a weight that is proportional to the normalized ESG score, based on the following formula:

$$\text{Normalized_ESG_Score}_i = 1 + 9 \times \frac{ESG\ Score_i - Min_{ESG\ Score}}{Max_{ESG\ Score} - Min_{ESG\ Score}}$$

A floor of 0.50% is applied to each index constituent.

The Number of Shares will be rounded to the nearest whole number.

The Number Of Shares are determined based on the closing prices of the Companies to be included in the Index on the Review Weightings Announcement Date.

Free Float factor

The Free Float Factor is not applied for this Index Family.

Capping Factor

The Capping Factor is not applied for this Index Family.

3.2 BASE CURRENCY

The Base Currency of this index family is Euro.

3.3 PUBLICATION

The opening level is calculated using the last known prices of traded constituents or in the case of constituents that have non-traded, halted or suspended status, the previous day reference prices or estimated prices (for IPOs, buyouts and swap offers).

The official opening level is the first level published after a share price is available for all constituents. Index levels published before the official opening level is published are considered pre-opening index levels.

If, for whatever reason, share prices are not available for all constituents five minutes after Euronext Markets (as defined in the Euronext harmonised rule book) started regular daytime trading, the official opening level will be published as soon as the companies whose share prices are available of the current trading day represent at least 80% of the value of the index at the close of the previous trading day.

The index is calculated based on the most recent prices of transactions concluded on the main markets in each of the countries that are included in the index. The level of the index is in principle published every 15 seconds. The index is calculated from 09:00 hours until Euronext Markets stop regular daytime trading on the days when the specific main markets as well as the Euronext Markets are open for trading.

The closing level is the last level disseminated on the trading day.
