A company is deemed eligible for the Index if it derives revenues from at least one of the eligible RBICS L6 activities listed above.

Step 3: Selection Ranking

Companies are ranked on their Free Float Market Capitalisation.

Step 4: Selection of constituents at the reviews

The 30 eligible companies with the largest Free Float Market Capitalisation are selected. If fewer than 30 eligible companies are available, all eligible companies are included in the Index.

2.3 PERIODICAL WEIGHTING UPDATE

Weighting method

The index is Free Float Market Capitalisation weighted.

The Weighting Factors are explained in the following paragraphs.

Number of Shares

At each review, the number of shares included in the index will be updated with the number of shares listed on the Review Cut-Off Date.

Free Float Factor

The Free Float Factor is determined based on the Review Cut-Off Date.

Capping Factor

A Capping Factor is calculated based on the Review Weighting Date such that:

- Individual cap: Each Company included in the index has a maximum weight of 10%.

3.3 PUBLICATION

The opening index level is disseminated at the same time as the first index level.

The index is calculated based on the most recent prices of transactions concluded on the main markets in each of the countries that are included in the index. The level of the index is in principle published every 15 seconds. The index is calculated from 09:00 hours until US Markets stop regular daytime trading on the days when Euronext Markets are open for trading.

The closing level is the last level disseminated on the trading day.
