1. GENERAL

This document is applicable to the PSI® family ("Index Family"), which consists of all the Indices as mentioned in the Reference Table.

The PSI family is designed to reflect the price level trends in the trading of shares listed on Euronext Lisbon.

Euronext Lisbon is the Administrator of this Index Family. The PSI Committee is appointed as independent supervisor of the PSI index family ("Independent Supervisor").

Euronext N.V. or its subsidiaries (hereinafter jointly "Euronext") owns all intellectual and other property rights to the index, including the name, the composition and the calculation of the index. Information regarding trademarks and intellectual property rights of Euronext is located at <https://www.euronext.com/terms-use>.

Previous version notes

18-01 Change of definition of Free Float Factor and move of Review Cut-Off date, update of governance naming, removal of minimum Free Float Factor requirement

19-01 Addition of the PSI 20 ex Banks indices.

20-01 Change of free float velocity threshold from 25% to 15% with additional possibility to select max 2 companies with at least 10% ff velocity at annual review.

20-02 Integration of ESG Disclosures and update for ICB classification definition changes

23-01	20 Dec 2023	Amendment on the liquidity analysis after an IPO	EIA_2023-675_PSI

2. INDEX REVIEWS

2.1 REVIEW FREQUENCY AND RELEVANT DATES

Review frequency:	Quarterly, with an Annual review in March
Review Effective Date:	After the market close of the third Friday of March, June, September and December.
Review Cut-Off Date:	After the market close of the penultimate Friday of February, May, August and November.
Review Announcement Date:	At least six trading days before the Review Effective Date.
Review Weighting Announcement Date:	Two trading days before the Review Effective Date.

2.2 REVIEW SELECTION

Step 1: Index Universe

Index Universe definition

The Index Universe consists of Companies admitted to listing on Euronext Lisbon. For the PSI ex Banks companies classified in the ICB Super Sector Banks (3010) are excluded.

Continuous eligibility screening

Companies trading in other currencies than Euro are not eligible for the index. Furthermore only Companies traded continuously are eligible.

Step 2: Eligibility screening at reviews

Liquidity Analysis

The shares of a Company must have a Free Float Velocity of at least 15%. Maximum 2 Companies that have a Free Float Velocity of at least 10% may also be included at the annual review in case the selection based on the standard threshold yields fewer than 20 constituents for the index.

The following Companies are not eligible:

- A. Companies removed in relation to a merger or acquisition after the previous Review Effective Date; and
- B. Companies admitted to listing less than 20 trading days before the Review Cut-Off Date; and
- C. Other Companies or institutions as determined by Index Design based on substantial negative forecasts regarding liquidity, depth, regularity or continuity of market price formation; and
- D. Companies that have a Free Float Market Capitalisation of less than € 100 million. At quarterly reviews current constituents that have at least € 75 million Free Float Market Capitalisation remain eligible.

The Independent Supervisor may decide to consider a newly listed Company eligible even if it is listed less than 20 trading days, if the liquidity from the listing date till the Review Cut-off Date gives enough certainty that the Company will pass the liquidity screening criteria and the Free Float Market Capitalisation of the Company is well above the threshold to be included in the Index.

Step 3: Selection Ranking

Companies within the Index Universe that fulfil the eligibility requirements are ranked based on Free Float Market Capitalisation on the Review Cut-Off Date. The Free Float Factors applied for the selection ranking and free float velocity calculation at each review are based on the Free Float Factors on the Review Cut-Off Date.

Step 4: Selection of constituents at the reviews

Annual Review:

The 18 highest ranking companies will be selected, furthermore the 2 highest ranking companies from those ranking 19th to 22nd are selected whereby current constituents are preferred over companies that aren't part of the index at the moment.

If there are fewer than 20 eligible companies that fulfil the minimum velocity and Free Float Market Capitalisation criteria, no additional companies are added to the selection as there is no minimum number of constituents.

PSI ex Banks: all the companies expected to be included in the PSI® after the close of business of the review effective date and not pertaining to the ICB Super Sector Banks (3010) are selected.

Quarterly reviews (in June, September and December):

Current constituents will be removed from the index if they rank lower than 25 or if their free float market capitalisation has become less than € 75 million. Constituents will not be removed at the quarterly review due to their free float velocity becoming lower than the required minimum.

Eligible non constituent companies may be added to the index at the occasion of the quarterly review if they rank 15 or higher. Furthermore, the highest ranking eligible non constituent companies will be added at the quarterly review if the index would otherwise consist of fewer than 20 constituents.

Should the index consist of more than 20 companies after the removal of low ranking constituents and the addition of eligible non constituents or due to a split up or similar situation, then the lowest ranking current constituent(s) will be selected for removal in order to bring the number of constituents down to 20.

PSI ex Banks: all the companies expected to be included in the PSI after the Review Effective Date and not pertaining to the ICB Super Sector Banks (3010) are selected.

2.3 PERIODICAL WEIGHTING UPDATE

Weighting method

The index is Free Float Market Capitalisation weighted.

The Weighting Factors are explained in the following paragraphs.

Annual Review:

Number of shares

The Number of Shares of a company included in the Index Family will be updated to the listed Number of Shares on the Review Cut-Off Date, taking into account adjustments due to Corporate Actions.

Free Float factor

The Free Float Factor of a Company included in the Index Family will be updated to the Free Float Factor on the Review Cut-Off Date.

Capping Factor

A Capping Factor is calculated based on the Review Weightings Announcement Date such that the Companies included in the index have a maximum weight of 12%.

PSI ex Banks: The capping factors of the Companies included in the Index will be equal to the capping factors in the PSI index. This means that the maximum weight of the PSI ex Banks exceeds the maximum percentage of the PSI.

Quarterly Reviews:

Number of shares

The Number of Shares of a Company included in the Index will be updated to number of shares listed on the Review Cut-Off Date if the Free Float Factor on the Review Cut-Off date deviates by 2 or more bands ($\geq 10\%$) from the Free Float Factor currently applied in the index and/or if the number of shares listed on the Review Cut-Off Date deviates by more than 20% from the current number of shares included in the index.

For Companies, if any, to be added to an index the number of shares will be the number of shares listed on the Review Cut-Off Date.

Free Float factor

The Free Float Factor of a Company included in the Index will be updated to Free Float Factor on the Review Cut-Off Date if the Free Float Factor on the Review Cut-Off date deviates by 2 or more bands ($\geq 10\%$) from the Free Float Factor currently applied in the index and/or if the number of shares listed on the Review Cut-Off Date deviates by more than 20% from the current number of shares included in the index.

For Companies, if any, to be added to an index the Free Float Factor will be the Free Float Factor on the Review Cut-Off Date.

Capping Factor

For Companies, if any, to be added to an Index, a Capping Factor is calculated based on the Review Weighting Announcement Date such that the companies have a maximum weight of 12%.

PSI ex Banks: The capping factors of the Companies included in the Index will be equal to the capping factors in the PSI index. This means that the maximum weight of the PSI ex Banks exceeds the maximum percentage of the PSI.

3.2 BASE CURRENCY

The Base Currency of this index family is Euro.

3.3 PUBLICATION

The level of the Indices are in principle published every 15 seconds starting from 09:00. Index levels published before the official opening level is published are considered pre-opening index levels.

The official opening level is the first level published after a share price is available for all Companies included in the Index.

If share prices are not available for all constituents five minutes after Euronext Markets started regular daytime trading, the official opening level will be published as soon as the companies whose share prices are available of the current trading day represent at least 80% of the value of the index at the close of the previous trading day.

The closing level is the last level disseminated on the trading day.

4. ESG DISCLOSURES

EXPLANATION OF HOW ESG FACTORS ARE REFLECTED IN THE KEY ELEMENTS OF THE BENCHMARK METHODOLOGY	
Item 1. Name of the benchmark administrator.	Euronext Lisbon
Item 2. Type of benchmark	Equity Benchmark
