Edito

Dear reader,

We are proud to present you with our brand new market activity report for warrants & certificates which aims to offer greater transparency on the use of these products by investors as well as their respective trends. The report provides unique insight into products listed on each of the different NYSE Euronext regulated markets as well as an aggregated view.

The launch of our new market activity report coincides with an extremely active month of August for warrants and certificates. In fact, it was a record month with more than **3.6** billion Euros traded for **600,000** transactions. The previous record was set in September 2007.

The daily average traded value was **155** million Euros, **70%** more than in July and **50%** more than year-to-date. In terms of trades, the daily average was close to 26,000, nearly **40%** higher than in July, and over **25%** higher than year-to-date.

Listings followed the same trend hitting a new record with just over **25,000** products listed at the end of August.

Even though volumes on investment products have significantly increased over recent

months, it is the leveraged products which still attract the most attention from the investor community, and represent nearly **87%** of the total traded value and 91% of all the total trades in the warrants & certificates segment.

While commodities and indices are the underlyings which have benefited the most from this increase in activity, a new underlying class is attracting a lot of interest from investors: leveraged indices. In August, products on these underlyings represented close to **6%** of all the trades and traded value in the segment. When compared to the previous month, trades and traded value increased by **88%** and **45%** respectively.
