## Editorial

For the month of March 2012, activity levels on the warrants and certificates markets of NYSE Euronext in Europe continued to hover around the levels observed in January and February 2012. Even though the first quarter of the year has shown improvement in trading activity compared to December 2011, the results are less positive when compared to the same months last year. Volatility is one of the key reasons for the relatively slow trading activity. If we look at the main traded underlying, the AEX index, the first quarter of 2012 has been the fourth lowest in terms of volatility over the last five years.

The average daily traded value recorded on our markets for March 2012 is €71 million, up 1 percentage point (p.p.) versus last month and down 41 p.p. versus last year. The biggest decline has been recorded in trading on **plain vanilla warrants**, which is down by 18 p.p. in traded value compared to last month and by 67 p.p. compared to March last year. **Plain vanilla warrants** were the second most popular trading product type used by investors in March last year. This year, however, both **indexation products** propelled by leveraged indices and **leveraged knock outs with maturities** have surpassed plain vanilla warrants significantly in terms of traded value. Trading in **open-end leveraged knock out products** shows by far the most significant levels of trading by product type, with a market share of 58%.

Products with **leveraged indices** as their underlying recorded a 29 p.p. increase

month-on-month in value traded, and are poised to take over commodities as the third most traded asset class. In terms of specific underlyings, most noteworthy are the **S&P 500** (+84 p.p. month on month), which entered the top 10 most traded underlyings for warrants and certificates, and the newly launched **CACx10 indices**, on which products are starting to be introduced. The **AEX index** remains by far the most traded underlying measured by value traded with a market share of 23% of all recorded transacted value across the warrants and certificates markets of NYSE Euronext in Europe.

The geographic origin of the most traded underlyings is still very local, with **France** and the **Netherlands** continuing to dominate in terms of traded value with 36% and 29% market share. However, in terms of growth, it is clear that investors are starting to invest significantly in underlyings from the **United States of America, Germany** and **Japan**.

The market leader in March 2012 in terms of traded value on warrants and certificates is **RBS** with a market share of 31%. **Société Générale** had the best month-on-month increase in market share (18 p.p.) and consequently has re-established its number two issuer ranking with a 17% market share, at the expense of **Commerzbank**, which now has a 14% market share.

Please feel free to make any suggestions regarding our monthly activity reports in regards to how we can continue to improve the quality of provided information.
