Editorial

Even though there were fewer trading days in June than in May, the overall activity on warrants & certificates in June was slightly higher than during the previous month. As a result, the average daily activity grew 7% in June with **71M€** vs. **67M€** in May, despite a lower average daily number of trades (**15.6K** vs. **16.3K**).

Market-specific figures highlight discrepancies between NYSE Euronext Amsterdam and NYSE Euronext Paris. On the Dutch market, the average daily value traded is up by nearly **20%** while it is down by just over 9% on the French Exchange.

This increase of activity on NYSE Euronext Amsterdam could be explained, in part, by the introduction of extended trading hours on the warrants & certificate segment. Since May 28, nearly **1,500** products issued by ABN Amro and RBS can be traded between 8am and 9:05am, and close to **2,500** products between 5:30pm and 6:30pm. Since June 25, three other issuers (Citi, Commerzbank and ING) have also started to offer trading on their products during extended trading hours. Currently, investors have access to nearly **3,000** products during early trading (8am and 9:05am) and almost **4,500** products during late trading (5:30pm to 6:30pm).

The extended trading hours' activity has kicked off on a pretty good note, even though only 2 issuers were active during the extended trading hours for the greatest part of the month. The average number of trades executed during early trading was nearly **60%** of the average hourly activity during normal trading hours (on the concerned products), and it was just over **45%** during late trading. It is interesting to note that the order-to-trade ratio during late trading is almost identical to the order-to-trade ratio during early trading.

As expected, the majority of orders sent during the extended trading hours, are generated out of The Netherlands (where the products are listed) but we have observed a non-negligible amount generated outside the Netherlands also, nearly **17%** of the orders received during early and late trading is generated out of Belgium, France and Switzerland (vs. **19%** during normal trading hours). The number of non-Dutch members who are already able to send orders during extended trading hours is very encouraging and lays a good foundation for success of the upcoming extension of the service to Euronext Paris (currently planned for Q4 2012).

June was a very active month in terms of new listings with an **18%** rise in number of new listings vs May. BNP Paribas contributed strongly by multi-listing a selection of their French listed products on NYSE Euronext Brussels, (mainly Leverage KO Open-End and Leverage KO Open-End BEST products).

On June 21, Barclays launched two Leverage and two Short certificates (x5 and x7) linked to the CAC40 on NYSE Euronext Paris, in the footsteps of Société Générale's success with their certificates linked to Leverage and Short indices calculated and published by NYSE Euronext.

In June, on NYSE Euronext Paris, certificates linked to Leverage and Short indices represented just over **40%** of the value traded and **24%** of the trades (vs. **38%** and **23%** respectively in May).
