2025 UNIVERSAL REGISTRATION DOCUMENT

The English version of the Universal Registration Document was filed on 27 March 2026 with the AMF, as the competent authority under Regulation (EU) 2017/1129, without prior approval pursuant to Article 9 of said regulation.

The Universal Registration Document may be used for the purposes of an offer to the public of financial securities or the admission of financial securities to trading on a regulated market if completed by a securities note and, if applicable, a summary and any amendments to the Universal Registration Document. The whole is approved by the AMF in accordance with Regulation (EU) 2017/1129.

This is a reproduction translated in English of the official version of the Annual financial report/Universal Registration Document established in ESEF (European Single Electronic Format), filed with the AMF and available on the AMF website. This reproduction is available on the website of Crédit Agricole S.A.

WORKING EVERY DAY IN THE INTEREST OF OUR CUSTOMERS AND SOCIETY

Interview with
Eric Vial, Chairman of the Board of Directors,
and **Olivier Gavalda**, Chief Executive Officer

Mr Chairman, how do you look back on 2025?

First and foremost, I want to emphasize that 2025 has been a pivotal year for the governance of Crédit Agricole S.A. Indeed, Olivier GAVALDA took office as Chief Executive Officer on May 14, 2025, and, for my part, I became Chairman of the Board of Directors as of January 1, 2026.

I would like to pay tribute to our predecessors, Dominique LEFEBVRE and Philippe BRASSAC, whose commitment to the Group's cohesion and attachment to its values have left a lasting mark on Crédit Agricole over the past 10 years.

The Group's performance, particularly that of 2025, reflects the commitment of all Crédit Agricole employees who embody its values on a daily basis. I am particularly grateful to our 2,100 colleagues at CA Ukraine who, despite the armed conflict, continue their mission with determination, serving customers and the local economy.

In an unstable environment, marked by increasing unpredictability in international relations, and in France by the political climate and public debt challenges, the Group approaches 2026 with confidence, thanks to solid fundamentals and a clear direction, reaffirmed with ACT 2028, an ambitious strategic plan perfectly aligned with the Regional Banks' 10-year project.

We move forward united around a common ambition: to be useful through proximity, for our clients and for society. Our strong results enable us to finance the real economy, close to the territories, in France, in Europe, and wherever we operate.

Olivier Gavalda, how would you describe Crédit Agricole's performance in 2025?

Despite an environment marked by uncertainty and erratic events, both Crédit Agricole Group and Crédit Agricole S.A. recorded strong results in 2025.

Crédit Agricole Group achieved net income of €8.7 billion, an increase of 1.3%, while Crédit Agricole S.A. recorded net income of €7.1 billion, unchanged compared with 2024, despite the tax surcharge.

These positive results reflect the Group's steady trajectory of growth over the past decade, with revenues again rising to reach €39.6 billion at Group level (+3.9%) and €28.1 billion for Crédit Agricole S.A. (+3.1%). The particularly dynamic commercial activity throughout the year demonstrates the power of our universal banking model. We won 2.1 million customers, and all of our businesses achieved significant commercial successes.

We confirm our excellent solvency level, with a CET1 ratio of 17.3% for the Group, the highest among the major European systemic banks. This ratio is 11.8% for Crédit Agricole S.A., well above the target of 11% that we set for ourselves.

Building on these solid financial foundations, Crédit Agricole S.A.'s momentum in partnerships and investments continued in 2025, including through structural partnerships and targeted acquisitions in Europe, Asia and the United States. These key transactions have strengthened the Group's position as a leading European player and accelerated its development in markets with high potential.

All these results are fully in line with the ACT 2028 pathway and have increased our confidence in our ability to achieve the targets we have set for growth in revenues (>3.5%), net income Group share (>€8.5 billion), the cost/income ratio (<55%) and the RoTE (>14%).

Eric Vial, Chairman of the Board of Directors of Crédit Agricole S.A., and Olivier Gavalda, Chief Executive Officer of Crédit Agricole S.A.

I Olivier Gavalda, can you tell us about Crédit Agricole S.A.'s new Medium-Term Plan?

Launched in November 2025, the ACT 2028 strategic plan is far-reaching and lays the groundwork for our future.

It sets out three main ambitions for Crédit Agricole S.A. and the Group in general: we want to be a leading bank in Europe and in new technologies, while remaining the leader in transitions.

We have numerous assets to succeed. Firstly, roots that are well embedded around the customer. Secondly, a stable shareholding structure that allows us to reconcile profitability and long-term investment, taking up a natural position as a market consolidator. Our decentralised model is efficient and powerful, and fosters innovation. Finally, the power of the universal banking model makes us a resilient, and a solid player.

We are already starting to implement this strategic plan. Many investments made in 2025 are already benefiting our customers. We have invested in innovations that are now visible: for example, tokenised deposits and funds.

This boost will continue in 2026, with several emblematic initiatives in France and abroad. In particular, our pan-European savings platform will be launched in Germany in the next few months.

Our transformation efforts will also intensify, including in artificial intelligence and the enhanced use of our data. We will also continue to simplify and industrialise our processes.

All these projects, combined with the value created by our recent acquisitions, give me confidence that we can achieve the ambitious targets of our ACT 2028 plan and propel the Group towards the future.

I Mr Chairman, can you shed some light on the Group's strategy in addressing societal and environmental issues?

First, it is important to remember that Crédit Agricole is the leading financier of the French economy.

Our performance allows us to invest in technological, environmental, demographic, and social transitions by creating future-oriented businesses that meet our clients' needs and drive growth for all our activities.

The Group intends to remain a leader in the ecological transition economy by reaffirming its Net Zero trajectories, strengthening its climate strategy, and mobilizing resources for nature. Our ambitions also aim to amplify the Group's impact on the vitality of territories and just transition by facilitating access to sustainable housing and essential services, and by supporting agricultural and food transitions.

Crédit Agricole Group also provides new solutions to support the major intergenerational transfer, which covers both retirement planning and support for "aging well." Thus, in very concrete terms, the "Crédit Agricole Santé & Territoires" business has developed initiatives aimed at combating medical deserts by contributing to the creation of healthcare centers or hubs, and improving senior care through personal services.

New technological activities will also emerge, including the new digital trust business that was announced as part of the ACT 2028 plan.

The Group, which is built on its mutual values, has developed by supporting major societal changes. More than ever, our purpose is to support our clients with a focus on utility and protection, both today and tomorrow, by offering solutions adapted to their needs. These values, reaffirmed and strengthened within our ACT 2028 plan, demonstrate the Group's fidelity to its purpose of acting in the interest of our clients and society.

WORKING EVERY DAY IN THE INTEREST OF OUR CUSTOMERS AND SOCIETY

OUR RAISON D'ÊTRE IN ACTION

In 2025, amid geopolitical and economic turbulence, the Crédit Agricole Group demonstrated the strength of its cooperative model and the power of its teams' collective commitment. The Group deployed its full range of expertise to support regional development while enhancing its usefulness in serving its customers and society.

Crédit Agricole's end is to be a trusted partner to all its customers:

- Its solid position and the diversity of its expertise enable Crédit Agricole to offer all its customers ongoing support on a daily basis and for their projects in life, in particular by helping them to guard against uncertainties and to plan for the long term.
- Crédit Agricole is committed to seeking out and protecting its customers interests in all it does. It advises them with transparency, loyalty and pedagogy.
- It places human responsibility at the heart of its model: it is committed to helping all its customers benefit from the best technological practices, while guaranteeing them access to competent, available local teams that can ensure all aspects of the customer relationship.

With a strong cooperative and mutualist identity and drawing on a governance representing its customers, Crédit Agricole:

- Supports the economy, entrepreneurship and innovation in France and abroad: it is naturally committed to supporting its regions.
- Takes intentional action in societal and environment fields by supporting progress and transformations.
- Serves everyone: from the most disadvantaged to the wealthiest households, from local professionals to large international corporates.

This is how Crédit Agricole demonstrates its usefulness and availability to its customers, and the commitment of its 160,000 employees to excellence in both customer relations and operations.

GROUP PERIMETER

Crédit Agricole group includes Crédit Agricole S.A. as well as all of the regional banks and local banks and their subsidiaries.

3. Non-significant (-0.013%).

OUR UNIVERSAL CUSTOMER-FOCUSED BANKING MODEL – A GLOBAL RELATIONSHIP BANK FOR ALL

Crédit Agricole Group's universal customer-focused banking model is based on the close association of its retail banks with its specialised business lines. The Regional Banks, LCL and our international retail banks are at the heart of this model, based on recognised know-how in the distribution of all the financial products and services developed by the Group to all types of customers in France and internationally.

This model underscores the commitment of Crédit Agricole Group and its specialised subsidiaries to be the trusted partner of all of its customers and to cover the full breadth of their needs: financing, payment instruments, insurance, savings management, real estate, international expansion, energy transition support and technology services. All of these services and skills are offered in a close relationship based on the Group's retail banks in France (Regional Banks, LCL, BforBank) and internationally (including Crédit Agricole Italia and CA Bank Polska etc.).

The contacts maintained by employees and elected representatives of Local and Regional Banks in the field provide solid knowledge of customers and their problems over the long term. This understanding of the expectations and needs of customers, together with the strength of the Group's networks, enable Crédit Agricole S.A.'s specialised business lines to constantly improve their offerings and their competitiveness.

This universal and customer-focused model demonstrated its strength, resilience and usefulness to all stakeholders, including during the unprecedented events of the last years. These events also serve to underscore the value of the Group's project, implemented in 2019, which focuses on customers, people and society, and which has been formalised in a ten-year vision plan for Regional Banks, and in Crédit Agricole S.A. strategic plan "ACT 2028" launched in November 2025.

The objectives of Crédit Agricole S.A. within the Crédit Agricole Group

Central body: represents the Crédit Agricole Group before the monetary and banking authorities	Central bank of the Crédit Agricole Group	Head of the network: manages the domestic and international subsidiaries of the Group

Crédit Agricole Group's business model

Driving sustainable value

MACROTRENDS

OUR MODEL

UNIVERSAL CUSTOMER-FOCUSED BANKING MODEL

Our DNA

A cooperative Group with mutualist values

Three principles of action:

Usefulness

A determination to work in the interest of society as a whole and to make progress accessible to everyone.

Universality

A principled commitment to serving everyone, in all regions, and using all channels to address the wealth management concerns of its customers.

Availability

An original model, based on relationship banks, which brings together the products and services of the Group's specialised business lines; a long-standing presence in all regions to serve their development.

OUR RAISON D'ÊTRE

"WORKING EVERY DAY IN THE INTEREST OF OUR CUSTOMERS AND SOCIETY"

This is embodied by the three dimensions of the **Group Project**:

CUSTOMER PROJECT

Defines our priorities so we can act in the interest of each of our customers, based on the goals set out in our Raison d'être.

HUMAN-CENTRIC PROJECT

Ensures that the Group's women and men have a key role to play in companies that are increasingly governed by digital processes.

SOCIETAL PROJECT

Publicises our goal of acting in the collective interest of society, based on three priorities: climate, social cohesion and agricultural and agri-food adaptation.

OUR RESOURCES

A DIVERSE GEOGRAPHIC FOOTPRINT

Universal banking facilities

39 Regional Banks, LCL, CA Italia
8,065 retail banking branches

CRÉDIT AGRICOLE GROUP BUSINESS LINES AT 31 DECEMBER 2025

RETAIL BANKING

REGIONAL BANKS

MISSION: Present throughout France, the 39 Regional Banks, which are cooperative entities and fully fledged banks, support the projects of their customers: individuals, high-net-worth clients, farmers, SMEs, corporates, public sector players and social economy players.

OUR OFFERING: A universal and relationship-based approach supported by a full range of products and services, accessible across all channels, designed to meet the needs of all our customers (from the most modest to the most affluent) in the areas of banking, insurance, real estate, health, energy transition, mobility, and more.

25.5 million customers (including 21.2 million individual customers)	12.2 million mutual shareholders	25.2% Market share of loans to individuals
---	---	---

LCL

MISSION: LCL is the only domestic network bank in France to focus exclusively on retail banking and insurance. It covers all markets: individual customers, SMEs and small businesses, and private and corporate banking, with strong positioning among urban customers.

OUR OFFERING: LCL provides a complete range of banking products and services, financing, insurance, savings and wealth management, payment services and cash flow management. With branches, located mainly in urban areas with high development potential, and an online banking service (mobile app and website), it provides a close customer relationship.

Loans outstanding €174bn (including €106bn in home loans)	Total customer assets €259bn	6.0 million individual customers
---	---	---

INTERNATIONAL RETAIL BANKING

MISSION: Crédit Agricole's international retail banks are located in Italy, Poland, Ukraine and Egypt. They serve all types of customers (individuals, small businesses, agricultural and food processing businesses and corporates – from SMEs to multinationals), working closely with the Group's specialised business lines and activities.

OUR OFFERING: The international retail banks offer a range of banking and specialised financial services as well as savings and insurance products, in synergy with the Group's other business lines (Crédit Agricole CIB, CAA, Amundi, Indosuez WM, CACF, CAL&F etc.).

Loans outstanding €70.6bn	Customer assets €77.9bn	5.4 million customers
--	--	---------------------------------

ASSET GATHERING

INSURANCE

MISSION: As France's leading insurer ⁽¹⁾, Crédit Agricole Assurances is highly focused on the needs of its customers, whether they are individuals, SMEs, corporates or farmers.

TARGET: To be useful and effective, from designing solutions and services to handling claims.

OUR OFFERING: A full and competitive range, tailored to customers' needs in terms of savings/retirement, death & disability/creditor/group and property & casualty insurance, and backed by the efficiency of the largest banking network in Europe and international partnerships outside the Group.

Revenues ⁽²⁾ €52.4bn	Savings/retirement assets under management €373bn	Number of property and casualty insurance contracts 17.9 million
--	--	---

ASSET MANAGEMENT

MISSION: Amundi is the leading European asset manager in terms of assets under management and ranks in the top 10 worldwide ⁽³⁾. The Amundi Group manages €2,380 billion ⁽⁴⁾ in assets and has six international management platforms (Paris, London, Dublin, Milan, Tokyo and San Antonio via its strategic partnership with Victory Capital).

OUR OFFERING: Amundi offers its more than 200 million customers in Europe, Asia and the rest of the world a comprehensive range of savings and investment solutions in active management, ETFs and index tracker solutions, structured products, private assets, with a commitment to maintaining its leadership in responsible investment and the energy transition. This offering is enhanced with services and technological tools covering the entire savings value chain.

Assets under management ⁽⁴⁾ €2,380bn	No. 1 European asset management company ⁽³⁾	Present in 34 countries
--	--	--

WEALTH MANAGEMENT

MISSION: Indosuez Wealth Management comprises Crédit Agricole Group's wealth management activities ⁽⁵⁾ in Europe, Asia-Pacific and the Middle East. Renowned for the breadth of its offering and its international reach on a human scale, it operates in 15 locations around the world.

OUR OFFERING: Indosuez Wealth Management offers a tailored approach, allowing each of its customers to preserve and grow their wealth in a manner which best fits their aspirations. Its multi-disciplinary teams draw on excellence, experience and expertise to provide customers with appropriate, sustainable solutions.

SPECIALISED FINANCIAL SERVICES

PERSONAL FINANCE AND MOBILITY

MISSION: A major player in personal finance and provider of all types of mobility solutions in Europe, Crédit Agricole Personal Finance & Mobility offers its customers and partners financing solutions as well as a full range of mobility-related leasing, insurance and services solutions. It aims to support the major transitions that are transforming our society – housing and ageing well through the energy renovation of homes, evolving consumer uses and mobility – and has set itself the target of being the leader in electric mobility in Europe and one of the leaders in energy renovation in France. Digital and innovation are strategic priorities, to build, along with customers, a credit experience that meets their expectations: simple, fast, smooth and secured.

OUR OFFERING: A complete multi-channel range of financing, leasing of varying duration, insurance and service solutions available online, in branches of CA Personal Finance & Mobility subsidiaries and at its banking, institutional, distribution and automotive partners.

BforBank

- +460,000 customers, including 10,000 customers in Germany

CA Transitions & Energies

- Financing: €15 billion in total arranged financing for renewable energy projects by 2030.
- Production: 2 GW in installed capacity by 2028.
- Electricity supply: 500 GWh by 2026 (i.e. the annual consumption of 196,000 inhabitants)
- +300,000 private homes supported by 2028.
- +€550 million in decarbonisation projects on the corporate market supported by R3 by 2028, 50% of which are financed by the Group.

CA Santé & Territoires

- Healthcare: three majority stakes acquired: Medicalib (services to access paramedical care – September 2023), Omedys (assisted and augmented territorial teleconsultation – December 2023), Office Santé (care homes and health centres – July 2024).
- Ageing: acquisition of a majority stake in CetteFamille (shared housing for the elderly – July 2025) and acquisition of Petits-fils (home care services for the elderly – July 2025).
- Production of care and services.

RETAIL BANKING

REGIONAL BANKS

BUSINESS AND ORGANISATION

As cooperative entities and fully fledged banks, Crédit Agricole's Regional Banks (CRCA) hold leading positions in all local markets in France, both for adult individuals and individuals aged 18 and under. These Regional Banks are leaders in the agricultural and SME markets and rank second in the corporate market.

Drawing on the expertise of the Crédit Agricole Group, they market a wide range of products and services designed to meet their customers' financial and wealth management needs: payment instruments, insurance, savings, financing, long-term financing, real estate and international support. They have a network of nearly 5,300 branches, reinforced by around 4,700 Relais points located in shops, and offer their customers a comprehensive range of remote banking services.

As the business bank for 81% of farmers (source: Adéquation 2025), they rely on a network of more than 2,200 dedicated advisors and remain the clear leader in providing banking services to private individuals.

The Regional Banks are also leaders in the SME market, both in terms of supporting private and business needs, with a penetration rate of 23% (source: Pépites CSA 2023-2024). Crédit Agricole's 4,800 business banking advisers and experts provide daily support to our entrepreneurial customers, helping them to reach new milestones.

Crédit Agricole has confirmed its leading position in the corporate market with a commercial penetration rate of 40% (source: Kantar 2025). Thanks to their 2,000 corporate account managers, the Regional Banks are specifically organised to advise and support all corporates in their region (start-ups, SMEs and MSEs) and to continue supporting local authorities and, more broadly, local public sector and social economy players.

CUSTOMER PROJECT

Crédit Agricole draws on the complementary strengths of its three retail banks to consolidate its position in France. As universal banks serving all customer segments, the Regional Banks offer a comprehensive range of solutions, combining digital technology with human excellence, and contribute to the economic vitality of their regions:

- a differentiated approach to meet the needs of each customer (young people, families, high-net-worth individuals, corporates);
- the widest range of solutions, digital convenience and human excellence;
- shaping the regions by contributing to economic vitality (financing, construction, renovation) and accelerating transitions (energy, mobility, demographics).

A CONNECTED, HUMAN BANKING MODEL FOR ALL

ENSURING AN OMNICHANNEL RELATIONSHIP WHERE HUMAN RESPONSIBILITY BRINGS TRUST, DISCERNMENT AND SITUATIONAL INTELLIGENCE

The Crédit Agricole ecosystem offers a comprehensive approach to the needs of each and every individual, at the most local level, whether those needs relate to banking, insurance, real estate or the press, or are driven by new societal challenges (health, ageing, the energy transition etc.).

The Group is pursuing extensive work to offer natively digital solutions with fully digital offerings and customer journeys, organised around the mobile app, which guarantees autonomy for our customers and serves as a gateway to the Crédit Agricole universe. Our approach is driven by a highly relationship-intensive model based on a foundation of digital excellence, where human responsibility brings trust, discernment and situational intelligence.

The momentum is strong, with production lead times shortening and usage increasing significantly. For example, 64% of Regional Bank customers used the website and app in 2025, compared with 50% in 2020: this represents 14.7 million active customers as at September 2025 (+0.6 million in one year).

In 2025, the “Ma Banque” mobile app for Regional Bank customers accelerated the enhancement of its features and the integration of autonomous business processes (real-time management of immediate debit cards, managing transfer limits, tracking complaints, widgets, signing up for passbook accounts, securities accounts & equity savings plans, and a 100% digital mortgage application process up to preliminary approval). It now has 11.7 million active users.

REACHING A NEW MILESTONE IN RELATIONSHIP EXCELLENCE AND OFFERING A SUCCESSFUL CUSTOMER AND ADVISOR EXPERIENCE

For the thirteenth measurement of the strategic NPS (Net Promoter Score) in 2025, Crédit Agricole confirmed its upward trend in all markets, excluding SMEs, and ranked among the top three retail banks in France. In the individual customers market, the NPS gained 3 points to reach +18. In the high-net-worth and corporate markets, Crédit Agricole has made a leap forward in customer experience: the NPS reached high levels, at +20 for high-net-worth customers, up 17 points, and +39 for corporates, up 11 points, positioning Crédit Agricole as the leader in the corporate market.

Each year, in order to supplement customer feedback mechanisms and thus continue to improve the customer experience, the Group conducts a survey of the feedback mechanisms used by the Regional Banks, which include in particular:

- strategic regional NPS across all customer markets;
- event-based or branch-based NPS;
- ad hoc and qualitative surveys;
- e-reputation analysis;
- qualitative analysis of customer feedback.

The various aspects of the customer experience are constantly evolving, with ever-higher standards. Due to the current social climate, customers are increasingly looking for guidance and support from their bank.

High standards of customer experience provide our customers with points of comparison almost daily and raise their expectations: personalised advice, autonomy and accountability of contact persons, consideration, recognition of loyalty, smooth processes and zero defects.

This encourages us to continually review our customer relationship model through large-scale programmes that have been or are being rolled out across Crédit Agricole entities:

- The Distribution Incubator, to accelerate the distribution transformation of the Regional Banks within an omnichannel framework. The Incubator aims to be an observatory of the organisations and operating methods of the Regional Banks' distribution networks, with the aim of detecting and sharing best practices, identifying common issues and possible solutions, testing them and learning from the practices of other distribution networks.

This shared framework fosters convergence and professionalisation, drawing on both internal Group initiatives and best practices observed in other distribution networks. The aim is to support the evolution of operational models and enhance the overall efficiency of the networks, both in terms of productivity and the quality of service provided to customers and mutual shareholders.

The Incubator covers all markets, with a particular focus on the retail market, and takes into account all distribution channels: branches, customer relationship centres, middle offices and new forms of collectives.

- The Relationship Model, which aims to make customer focus second nature in our daily habits, concerns and practices. This programme is based on the autonomy, responsibility and expertise of team members, i.e. human accountability, with symmetry of attention as the basis for collective functioning. It supports the digital, human and organisational transformations of the Regional Banks and other Group entities, both in France and internationally, at the heart of our model of a connected, human bank for all.

Since its launch in 2020, almost all of the Regional Banks have rolled this model out to all their team members and managers. Other Group entities that interact directly with Regional Bank customers also apply this approach, with the aim of ensuring that customers perceive our universal relationship signature, regardless of which Crédit Agricole entity the team member with whom they are interacting belongs to.

A new Advisory Approach has also been designed with the aim of advising customers in a fair and educational manner. Its roll-out is continuing in the Regional Banks.

- The Group's Customer Irritants Battle Plan involves developing and implementing anti-irritant plans (prevention, detection, resolution, cross-functional communication and governance initiatives) at each entity and at the Group level.

Since 2020, we have resolved around 80 of what we call the “Top Irritants”, i.e. those that have the greatest impact on customer satisfaction, which have been dealt with at the Group level (when entities are unable to resolve them independently).

Significant work has also been carried out to improve communication with our customers, in terms of correspondence and the wording of transactions on account statements for the various product and service ranges and digital channels.

The operational excellence initiatives of each entity, including the Regional Banks, have continued to expand in order to improve the customer experience and its underlying processes and to develop a culture of continuous improvement.

CUSTOMER AND COLLECTIVE INTERESTS AT THE HEART OF OUR ACTIONS

OFFERS THAT SERVE THE INTERESTS OF CUSTOMERS AND SOCIETY

- **Ma Banque au Quotidien**, our range of everyday banking offers developed in collaboration with our customers, consists of five offers (EKO, Globe-Trotter, Essentiel, Premium, Prestige) to meet all needs. Depending on the offer chosen, our customers can benefit from a bank card, insurance for their purchases and/or travel, a flat rate for their transactions abroad etc. These offers are available online or in their local branch and, of course, always include access to an advisor. More than 2.3 million customers were subscribed to a Ma Banque au Quotidien package at the end of 2025. In 2025, we launched MBQ youth rates (Essentiel: €3 for 18-25 year-olds, €6 for 26-30 year-olds / / Premium: €5 for 18-25 year-olds, €9 for 26-30 year-olds) and no fees abroad for this target group.
- **Zero-interest Loan (PTZ) Booster by CA**: In this context, in order to support its customers, Crédit Agricole extended the PTZ Booster offer until the end of 2025 (26,400 projects supported for €519 million, with a 58% prospect rate) and rolled out the Booster Offer for first-time buyers (67,000 projects for €1.15 billion). The Regional Banks are thus the leading distributors of zero-interest loans (42.5% market share in terms of number at the end of Q2 2025) and Eco-PTZ loans (32.4% market share in terms of number at the end of Q2 2025).

PROTECTING OUR CUSTOMERS AND SECURING THEIR LIFE PATHS

- **Support for senior citizens**: with the number of people aged over 75 set to grow significantly to 8.4 million by 2030 (+29% vs. 2022: 6.5 million) and with 8.7 million customers aged 55 and over, Crédit Agricole is rolling out dedicated approaches and offerings. In 2025, Crédit Agricole rolled out the Alphonse Retirement Coaching programme (pilot) to support our customers as they transition into retirement. For ageing at home, a new preferential-rate home renovation loan and advance offer (Prêt et Avance Adaptation Logement) was launched, and campaigns were rolled out to promote our complementary tele-assistance and personal services solutions.
- **Support for financial vulnerability**: In a difficult economic climate, 3.3% of Crédit Agricole's individual customers are financially vulnerable, requiring stronger prevention and support measures. To improve the detection of these situations, the Group raised its monthly credit flow threshold to €1,727 on 1 October 2025, enabling more customers to benefit from the cap on bank charges. As a reminder, since the end of 2022, an algorithm has been helping advisers to intervene early with personalised analysis and tailored solutions, while since October 2022, CA has been waiving all incident fees for customers with the dedicated vulnerable customer package (Compte à Composer Module Budget Protégé), going beyond the legal requirements. In addition, the bank offers a range of EKO solutions to make its financial services accessible to as many people as possible.

A DEVELOPMENT STRATEGY EXPANDED TO NEW REGIONS AND GROWTH DRIVERS

- The **entrepreneur market** has entered a phase of accelerated innovation. The reform of electronic invoicing, which will become mandatory in 2026, began to take effect in 2025 with a gradual increase in usage. This has opened up a field of major opportunities to support entrepreneurs in managing their financial flows and administrative processes. Customer expectations are also shifting significantly towards greater digitalisation, simplicity, autonomy and availability, while maintaining a high need for advice and human contact. To support its customers in this evolution, Crédit Agricole has implemented Kolecto, a comprehensive and modular platform that serves the entire customer value chain.
- **Rollout of the advisory approach and HR bank system for corporates**: The "HR Bank" project aims to address the challenges of corporate attractiveness as an employer and regulatory compliance for corporate executives within the framework of the value sharing law. This is a comprehensive commercial approach designed to address the social benefits needs of corporate customers ranging from VSBs and SMEs to MSEs. This approach draws on the expertise of CA Assurances (health and death & disability insurance), Amundi and CA Titres (group retirement, employee savings), and Worklife (employee benefits: meal vouchers, sustainable mobility packages etc.).

IN SUMMARY, AND FOR EACH MARKET

YOUTH MARKET

Online banks and neo-banks continued their aggressive expansion in 2025, outperforming Crédit Agricole in all segments. BoursoBank captured up to 28% of students, 20% of young professionals and 16% of minors, compared with 8%, 10% and 14%, respectively, for Crédit Agricole.

In response, Crédit Agricole rolled out two major campaigns: Mozaïc Black, aimed at minors, with sustainable innovations (free card until the age of 17, sign up from the age of 10) and attractive offers (bonuses of €80/€30, Team Vitality visuals), and the "C'est Carré" student scheme offering four tailored seasonal solutions (MBQ Jeunes, the "Sans Tes Parents" student loan, home and car insurance for young people at preferential rates).

New customers aged 0-34 increased by 6.9% in 2025, reaching 640,000 new young customers (mainly aged 12-17), bringing this customer base to 8 million and making Crédit Agricole the bank of choice for one in four young people in France. Performance was particularly remarkable, with a 24% increase in new customers aged 12-17, a record Mozaïc Black card equipment rate of 37.6% (+7.5 points), 316,000 cards taken out (+40%), and 712,000 MBQ Jeunes packages, 52% of which Premium versions, since its launch in March 2025.

INDIVIDUAL MARKET

The year 2025 remained marked by an economic climate that weighed on household confidence and purchasing power.

The property market saw an upturn with a 10% increase in transactions over 12 months (945,000-950,000 expected in the existing market at the end of 2025, compared with 845,000 in 2024, despite a 9.8% decline in new properties), stimulated by the extension of the zero-interest loan to new properties without geographical restrictions to facilitate access to home ownership.

In this context, in order to support its customers, Crédit Agricole extended the PTZ Booster offer until the end of 2025 (26,400 projects supported for €519 million, with a 58% prospect rate) and rolled out the Booster Offer for first-time buyers (67,000 projects for €1.15 billion). The Regional Banks are thus the leading distributors of zero-interest loans (42.5% market share in terms of number at the end of Q2 2025) and Eco-PTZ loans (32.4% market share in terms of number at the end of Q2 2025).

At the same time, Crédit Agricole has optimised its digital home loan process, making it possible to obtain preliminary approval in less than 10 minutes for any type of project and automatically access a digital space to compile the application.

HIGH-NET-WORTH CUSTOMER MARKET

Between 2020 and 2025, the high-net-worth customer market experienced strong growth in an increasingly competitive environment. In France, more than 4.4 million high-net-worth households (14.5% of all households) constitute a strategic target.

In 2025, Crédit Agricole confirmed the downward trend in its penetration rate that began in 2021. It thus moved into **second place**, just behind Caisse d'Épargne, while BoursoBank continues to grow and ranks third among wealth management banks.

Market share in primary banking remained relatively stable among network banks in 2025, with Crédit Agricole holding an 18% market share in primary banking.

SAVINGS OFFERS THAT SERVE THE INTERESTS OF CUSTOMERS AND SOCIETY

The household savings rate reached a record high of 18.9% of gross disposable income, supported by the resilience of the revenues of wealthy households and pensioners, against a backdrop of economic uncertainty and demographic ageing. Balance sheet savings slowed sharply, with outflows from regulated passbook accounts and term deposit accounts, while life insurance accelerated its inflows thanks to the upturn in euro funds and the resilience of diversified unit-linked products. Securities showed signs of recovery, particularly in collective real estate management and ETF investment, with a record number of individual investors in equities.

Crédit Agricole's inflows outperformed the market, with market share gains across all segments. Investment flows (including demand deposits) rose by 3.8% (+€35 billion) year-on-year at the end of November, mainly driven by life insurance, which increased by €17 billion to €240 billion (+7.5%). Bank savings grew by 1.8% (+€11 billion), with an increase in Livret A savings accounts (+€4.4 billion, +5%), a recovery in demand deposits (+3% to €202 billion) and continued outflows from home purchase savings plans (-€6.5 billion). Securities rose by 7.7% (+€6.8 billion), thanks in particular to UCITS (+15.2%), supported by the Group's savings strategy and buoyant markets.

ENTREPRENEURIAL MARKET

In 2025, the French entrepreneurial market remains dynamic, with more than 6 million corporates and 1 million new businesses created each year, mainly driven by micro-entrepreneurs, young people and a growing female presence (40%). Despite an uncertain economic climate and 65,000 business failures each year, the sector is stabilising. Digital transformation is accelerating, particularly with the arrival of mandatory electronic invoicing in 2026, creating opportunities for Crédit Agricole to support customers seeking digitalisation and personalised advice.

In this context, Crédit Agricole confirmed its role as a benchmark bank for entrepreneurs in 2025. Crédit Agricole remains the leading bank for entrepreneurs in France and ranks third in the market in terms of customer satisfaction, with an NPS of +12.

The Crédit Agricole Group ramped up the roll-out of comprehensive solutions in 2025 to support entrepreneurs in the success of their professional activities while accelerating our capture. These offerings include:

- the roll-out of Kolecto, a comprehensive and modular platform that serves the entire customer value chain and enables customers to prepare for the transition to mandatory electronic invoicing in 2026;
- the digitisation of the subscription process for UptoPay, a mobile payment solution.

In line with the initiatives launched in 2024, the Group has also strengthened the relational aspect of these offers, notably with offers tailored to healthcare professionals, such as Paymed One, and continues to make progress in developing offers and services designed to support our customers' energy transition.

PUBLIC SECTOR AND SOCIAL ECONOMY

The financial position of local authorities remains healthy overall, although it is marked by investment choices influenced by the 2026 municipal elections and budgetary constraints requiring trade-offs. Given the scale of the environmental and societal projects they are leading, these authorities are increasingly moving towards pooling resources through the development of semi-public companies and the transfer of powers to inter-municipal bodies.

The social housing market remains under severe pressure due to a multi-factor crisis requiring an overhaul of the economic model to respond to multiple transitions (energy, demographic and social).

Crédit Agricole maintains a strong position with local authorities (serving two out of three, NPS up 22 points) despite an erosion of its market share in outstandings to 15%, with a strong foothold in small and medium-sized local authorities. In social housing, the bank retained its financial market share while seeing its commercial share jump, with a notable increase in short- and medium- to long-term loans.

Crédit Agricole supports four out of ten associations (570,000 customers), ranking second in the employer associations segment.

Customer satisfaction has increased significantly across all segments, placing the bank in the top three for both local authorities and social landlords, with a notable improvement among large associations.

CORPORATE MARKET

Crédit Agricole is the leader in terms of customer satisfaction, with a NPS of +39 (up 11 points). Its commercial penetration strengthened, while its market share in lending rose to 12.3% of outstandings at the end of June 2025. International business showed strong momentum, particularly visible in flows, which increased by 11% at the end of October 2025.

After a decline in 2024, corporate lending rose sharply (+20%) to nearly €15 billion in November 2025, with loan outstandings increasing by 1.8% to €104 billion. The default rate remained stable (4.0%), but the sensitive rate rose to 7.7% (+2.5 points).

Against a backdrop of strong competition on the liabilities side, inflows increased by 2.9% with balance sheet outstandings of €85.7 billion and off-balance sheet outstandings up 2.7%, bringing total inflows to €102 billion (+2.9%).

Products related to employee schemes showed marked growth: employee savings at €3.6 billion (+12.3%), savings/retirement at €1.2 billion (+19.5%), and strong growth in the number of employees covered by health insurance (+17.3%) and group death & disability (+4.8%).

The Group has rolled out its e-invoicing solutions with Kolecto for VSB and small SMEs and Doxallia for large SMEs, MSEs and large corporates. At the same time, the EDI Advanced portal was launched to meet the complex needs of multi-banked companies, with the aim of strengthening the main relationship, capturing more flows and developing revenues, particularly among SMEs/MSEs that are not accessible with the standard offering.

The "HR Bank" project aims to address the challenges of corporate attractiveness as an employer and regulatory compliance for corporate executives within the framework of the value sharing law. This is a comprehensive commercial approach designed to address the social benefits needs of corporate customers ranging from VSBs and SMEs to MSEs.

Finally, in 2025 almost all regional banks rolled out "HR Bank", an integrated commercial approach to support companies of all sizes (from VSBs, SMEs and MSEs) in meeting their challenges in terms of employer attractiveness and regulatory compliance, particularly in the context of the value sharing law. This initiative aims to offer comprehensive solutions in terms of employee benefits, thereby meeting the strategic needs of executives in their human resources management.

AGRICULTURAL MARKET

In 2025, French agriculture proved resilient in the face of numerous challenges: climate and health risks, an uncertain geopolitical context, food sovereignty and generational renewal. Crédit Agricole provided concrete solutions to farmers in terms of advice and support, risk management, transition support and financing solutions tailored to everyone and to the entire operating cycle.

The Group is the leader in banking with an 81% penetration rate.

LCL

LCL is the only domestic network bank to focus exclusively on retail banking and insurance.

LCL aims to be the bank and insurance provider for all entrepreneurs.

BUSINESS AND ORGANISATION

As a universal bank, LCL meets the needs of all types of customers (individuals, small businesses, private banking and wealth management, corporates and institutional customers), drawing on its expertise and Crédit Agricole Group's wealth of know-how.

LCL's ambition is to offer customers a personalised relationship experience that is a combination of human contact and remote access. Its six million individual customers thus have the choice of using the bank how they want, where they want and when they want via their preferred channel.

Capitalising on its strategic urban presence, LCL offers services for the entire region.

LCL now has a network of nearly 1,400 branches, completed by the remote customer service centres provided by "LCL Mon Contact" and by digital solutions such as the "LCL Mes Comptes" app and websites, giving its customers total freedom in using its banking services. Whether in-branch or online, LCL is committed to fully understanding the needs of its customers. By rethinking and digitising certain processes such as opening an account or taking out a mortgage loan, a commercial loan or insurance, it seeks to facilitate subscription to its main products.

LCL Banque Privée has 194,000 private banking clients to whom it offers comprehensive, tailored property and financial advice on financing, everyday banking and wealth management through its 97 regional centres of expertise.

Through its specialised subsidiary "Angle Neuf", LCL helps its customers to grow their wealth through real estate.

The 401,000 SMEs and small businesses – skilled craft workers, retailers, professionals and other small businesses – benefit from the support of 1,260 specialist advisers and the 99 "Espace Pros" fully dedicated to professional clientele. Advisers serve as a single contact point to help their customers manage their daily business and to achieve their business and personal projects. LCL is a major player in the financing of professionals, granting €3.3 billion in loans annually through its subsidiary Interfimo.

LCL Banque des Entreprises relies on its national network of 70 geographic locations to provide its 32,000 customers with its full range of expertise: corporate finance for SME takeovers and acquisitions, market activities, international trade and payments, employee savings schemes, and specific support for start-ups, tailored to each stage of their life cycle (seed, growth and expansion). As a player of choice in the mid-cap sector, today LCL is the bank to approximately half of all medium-sized enterprises (MSEs). LCL Banque des Entreprises also reaffirms its comprehensive approach and its desire to assist executives with their wealth management plans by expanding its Wealth Management teams in Paris and across France.

To assist the network, the middle office, electronic payments and flow management and support functions serve all customers and make an active contribution to operational excellence.

2025 HIGHLIGHTS

- ▶ **CUSTOMER SATISFACTION IS AN ABSOLUTE PRIORITY FOR LCL, WHICH RECEIVED SEVERAL AWARDS IN 2025:**
 - LCL confirmed its position as the highest-rated bank on Google in 2025, winning the gold award for best retail customer satisfaction from Wizville for the second consecutive year with a score of 4.76/5;
 - LCL was voted Customer Service of the Year for the fourth time in 2026;
 - it won the award for best network of advisors in 2025 at the Cytewire Private Banking Awards 2025.
- ▶ **LCL continues to strengthen the digitalisation of its processes and products:**
 - 77% of its customers are digital (individual and SME customers carrying out more than three transactions per month on the transactional website or app).
 - an optimised instant account-opening journey: open an account with a digital payment card in ten minutes via the app and the transactional website;
 - a new simple, fun and secure app for teenagers, **Mouv by LCL**, which allows them to manage their spending while giving parents control via their LCL Mes comptes app;
 - **self-care equipment pathways with 11 new online sales pathways** accessible to customers at any time and covering all their needs (insurance, credit, savings, cards etc.);
 - increased customer autonomy thanks to the option of making flexible payments on life insurance policies, the launch of Wero etc.;
 - an **innovative, personalised and 100% digital wealth management approach** with the roll-out of **LCL Mon Patrimoine**;
 - a **New Real Estate Customer Experience** accessible online and in-branch for customers and prospects, bringing together all digital and real estate project monitoring features;
 - the creation of a comprehensive, 100% digital offering on the **professional market** to capture **professionals** and simplify their procedures;
 - Money Vox Awards for network banks for the best website and the best app.
- ▶ **LCL pursues a proactive and ambitious CSR policy:**
 - increase in initiatives for **the professional integration of young people through employment and training**, including work-study programmes and work-experience internships for high-school students;
 - development of a range of services to promote social and digital inclusion, support for **vulnerable customers** with the creation of an Advice and Expertise Centre for Protected Customers
 - development of **“green” offerings**: loans and investments for all customer markets: the “LCL Impact Climat” and “LCL Impact Sociétal et Solidaire” funds, green structured funds for Private and Retail Banking;
 - development of an **advisory service** for individual customers in their independent **eco-renovation** projects (simulators, advice etc.) with the roll-out of the “Ecorénov LCL” website;
 - launch of **Care Entrepreneurs**, a non-banking partnership scheme designed to support entrepreneurs beyond their financial needs;
 - continued support for customers in their energy transition through new partnerships developed under the Smart Business Entreprises and SmartBusiness Pro programmes;
 - organisation of the fifth edition of the “Grand Prix des Entreprises Engagées” (Committed Company Grand Prix), which rewards companies that take the most ambitious action to tackle climate change;
 - an exemplary net zero trajectory: plan to reduce the carbon footprint in order to reduce operating GHG emissions by at least 50% by 2030 and integration of the carbon footprint reduction into the employee profit-sharing agreement.
- ▶ **At the end of 2025, LCL adopted a new brand identity to support its strategic ambitions and illustrate its positioning around the Energy of Entrepreneurship: “LCL: Moving forward” motto.**

INTERNATIONAL RETAIL BANKING

BUSINESS AND ORGANISATION

At 31 December 2025, international retail banks were located in Italy, Poland, Ukraine and Egypt.

Within Crédit Agricole S.A., the strategic oversight of those subsidiaries (excluding Italy) is carried out by the International Banking Division (DBI). It has three main tasks:

- act on behalf of Crédit Agricole S.A. Parent Company as a shareholder and integrator of the Group's operations;
- collaborate with the subsidiaries to define strategy and ensure that the guidelines set out in the Medium-Term Plan (MTP) are implemented and that performance is monitored;
- support the subsidiaries in their development by steering major projects, providing the Group's expertise and sharing best practices developed in the international banks or other retail banks, strengthening synergies not only with the Group's entities in the same businesses, LCL and Regional Banks, but also among the various international banks.

CRÉDIT AGRICOLE ITALIA

Crédit Agricole Italia's strengths lie in its regional roots and proximity to its customers. Operating in 14 of the 20 country's regions, Italy is Crédit Agricole S.A.'s second-largest domestic market, with the Group's other business lines (consumer finance, corporate and investment banking, asset management, insurance, fund management and custody services, and private banking).

Its offering is designed for individuals and their families, corporates and institutional customers through specialised networks: individuals, private banking, financial advisers and corporate banking. The synergies developed between the bank and the Group business lines enable Crédit Agricole Italia to offer a wider and more integrated offering.

The year 2025 was marked by the development of new products and services with the support of the Group's business lines, all aimed at offering more digital products and services, in line with our social commitments. CA Italia was voted number one for customer satisfaction for the third year running, and gained more than 200,000 new customers during the year.

CA Italia has around 1,200 branches, and about 12,300 employees, and serves over 2.9 million customers, with a balance sheet of more than €90 billion. The Bank ranks seventh among Italian banks in terms of outstanding loans.

2025 HIGHLIGHTS

- ▶ **Customer satisfaction:** in 2025, for the third consecutive year, the Bank again achieved the highest Net Promoter Score (NPS) among Italian banks.
- ▶ **Digital innovation:** the digital offering continues to evolve and has become a core element of the customer service strategy. The new Split&Go service now allows users to split expenses autonomously via the app, while the Robo4Advisory AI service offers personalised investments and provides managers with automated storytelling. Meanwhile, the incorporation of GenAI is transforming the real estate credit sector by automating document analysis and real-time validation.
- ▶ **Acceleration of digitisation:** in 2025, digital innovation enabled the acquisition of approximately 80,000 new customers through online channels (40% of the total), with high levels of customer digitisation. With the launch of the *Compte Pro* account, SMEs and individual corporates can now onboard 100% remotely. This development simplifies access to banking services through a fully digital mode, providing a practical response to the flexibility needs of new customers.
- ▶ **Enhancement of the ESG offering:** Crédit Agricole Italia has reiterated its strong commitment to sustainability, making its ESG strategy the centre of its banking operations to guide individuals and corporates in the environmental transition. Production of real estate loans reached €4.2 billion (+3% vs. 2024), and "green mortgages" gradually increased, representing 30% of the total, thanks to dedicated promotional initiatives. The offering for corporates is expanding, with more than €1 billion in ESG loans. The Bank's position as a facilitator of the energy transition is consolidated by a market share of 66.5% for lease financing in renewable energy.
- ▶ **Support for the Italian agri-food sector:** Crédit Agricole Italia has signed a master agreement with the Ministry of Agriculture to support the development of the agri-food sector. This agreement establishes a cap of €3 billion and is part of a broader support programme that includes specialised advisory services and initiatives for young farmers.
- ▶ **Regional expansion:** the Bank is expanding its presence in a new region, Abruzzo, with the opening of a new division in Pescara that incorporates the retail agency and specialised channels within a "hub" structure. This new division brings technological innovation and attention to employees, with the aim of developing the new region through a synergistic and integrated approach between channels.
- ▶ **Renewing local roots:** strengthening our commitment to the various regions where we operate through the development and structured coordination of five Villages by CA that are helping to accelerate more than 200 start-ups, and the seven regional committees, as truly prioritised points of contact between the region and the Bank to identify levers of development for the region.
- ▶ **Commitment for employees:** the signing with the Group's unions of several agreements relating to the 2025 company bonus, the renewal of the health insurance policy and the Generational Renewal Plan (Solidarity Fund), with the entry of 500 new resources, including 100 fixed-term contract stabilisations, while voluntary departures of 750 employees were recorded, including 500 departures for access to the Social Fund and about 250 for retirement.
- ▶ **Upgrade of Moody's rating of CA Italia:** on 25 November, following the upgrade of Italy's sovereign rating to Baa2 from Baa3 with a stable outlook, Moody's revised its assessment of Italian financial institutions, including CA Italia, which was upgraded from Baa1 to A3, with a stable outlook (previously positive).

CRÉDIT AGRICOLE BANK POLSKA

Crédit Agricole Bank Polska provides support to its customers through one of the largest networks of agencies and partnerships in Poland (359 branches and partner outlets, including 145 partner branches), as well as intensively developed digital channels and a modern and constantly expanding range of products and services.

With 3,500 employees, it works with 1.5 million customers across all key segments of the market. By leveraging synergies among the Group entities in Poland, it is developing a customer-centric universal banking relationship model.

In 2025, the bank pursued a strategy based on organic growth in the number of active customers, through the quality of its interpersonal

and digital relationships and higher and more diversified profitability, playing a significant role in the green transition process and a leading position in consumer finance (with a market share close to a 20% in instalment loans).

In line with its Medium-Term Plan, the bank introduced Prime accounts for its customers, as well as the first VISA Signature card on the Polish market, launched its first advisory services division, developed its range of green loans and energy transition loans for individuals and corporates, broadened its Agro offer, introduced an auto insurance package and made Samsung Pay, VISA Mobile, Mastercard Click to Pay and BLIK recurring payments available to customers.

2025 HIGHLIGHTS

- ▶ A+ rating from Fitch Ratings
- ▶ 3rd place in the “Newsweek’s Friendly Bank” ranking.
- ▶ 7th place in the overall “ESG Classification” for “Responsible management” and 1st place in the “G” category of this ranking.
- ▶ Two major awards in the “ESG Innovator” competition.
- ▶ Organisation of the first “CA Green Day” conference for corporate customers.
- ▶ Opening of the first advisory services division in Łódź.
- ▶ Financing of the first prefabricated fattening farm in Poland.
- ▶ Co-financing of loans for the largest corporates in Poland: KGHM, Allegro, LPP and InPost.
- ▶ Continuing the #MniejPlastiku (Less Plastic) environmental campaign, a record involvement of more 50,000 volunteers took part in a clean-up of the Oder and Vistula rivers.

CRÉDIT AGRICOLE EGYPT

Crédit Agricole Egypt (CAE) is a major player in the Egyptian financial sector, operating through a network of 85 branches and more than 2,500 employees serving over 500,000 customers. From a commercial standpoint, Crédit Agricole Egypt serves all customer segments, from individuals to corporates, offering them a wide range of financial solutions and supporting their energy transition initiatives.

By leveraging its strong global and local presence, CAE has developed a comprehensive offering of treasury and financing management offer and trade finance, serving more than 50% of multinational clients from the Group in Egypt.

In 2025, Crédit Agricole Egypt strengthened its market position with tangible progress in customer experience and growth, sustainable finance, operational excellence, digital leadership, support for SME growth and societal impact.

2025 HIGHLIGHTS

- ▶ Top 20 for the fourth consecutive year (Forbes Middle East).
- ▶ Winner of the “Excellence in Customer Experience Enhancement” award at FINNOVEX North Africa 2025.
- ▶ “Digital Banking Provider of the Year in Egypt 2025” for the second consecutive year and “Best Digital Banking Experience, Egypt 2025” from World Business Outlook as well as the “Most Innovative Retail Banking App in Egypt 2025” award for the fifth consecutive year in Global Banking & Finance magazine for the banki mobile app.
- ▶ Top Employer in 2025 by the Top Employer Institute.
- ▶ Acquisition of 100% of the shares of Just Finance SAE, a consumer finance company, by CAE’s subsidiary, Egyptian Housing Finance Company (EHFC), specialized in mortgage and leasing.
- ▶ Expansion of solar energy, electric mobility and smart-home financing.
- ▶ 49% of retail customers digitally active, with 20 million transactions across all digital channels in 2025.
- ▶ 80% increase in total SMEs loans, exceeding the “CBE initiative ratio”.
- ▶ Continuation of the partnership with the Alexandria Sporting Club (since 1980), to foster community experiences for customers.
- ▶ Signing by CAE and Schneider Electric of a master agreement to participate in sustainable financing opportunities through energy audits.
- ▶ Continuation of a partnership with the French University in Egypt to strengthen its commitment to support young people and financial inclusion.
- ▶ Launch and completion of the first cohort of the culture of innovation programme, involving more than 2,300 employees.
- ▶ Crédit Agricole Egypte Foundation supported 42,000 people in various fields such as sustainable agriculture, financing medical equipment and women’s empowerment programmes.

CRÉDIT AGRICOLE UKRAINE

Crédit Agricole Ukraine has 137 branches, 264 ATMs and 2,200 employees serving more than 390,000 individual, SME, farmer and agri-food, corporate and multinational customers. Classified as a systemically important bank since 2023, the bank was once again recognised in 2025 as the country's most reliable bank and the best bank for farmers.

Since the war began in February 2022, priority has been given to the safety of employees and to adapting and securing the operational model and customer services. In 2025, Crédit Agricole Ukraine continued to implement its strategic plan focused on recovery – the Ambitions to Invest in Recovery (AIR) plan. The bank mainly focuses the agricultural and automotive sectors, works with the IT sector and invests in the development of customer products and programmes, cash management solutions for businesses, and leasing.

The bank contributes to the economic recovery through business investment and support for customers and society:

- Almost all of its branches continue continuously to operate without interruption and essential customer services were reinforced. At the same time, the bank has continued to develop its digital solutions. Online onboarding of people and a digital card were launched. This significantly improved the customer journey and enables individuals anywhere in the world to become bank customers in just a few minutes.

- Maintaining a leading position in car financing, with a market share of around 25%. More than 80,000 customers purchased cars thanks to Crédit Agricole loans. In 2025, Crédit Agricole renewed its ISO 9001:2015 certification in the “Car Loans” category.
- Support and guiding of the Ukrainian agricultural sector through participation in the government programme and loan guarantee agreements with the EBRD and the International Finance Corporation since late 2023. €440 million – the value of the bank's agreements with the EBRD and the International Finance Corporation since late 2023.
- The bank is investing in the recovery of the energy sector. 10% of new power generation capacity was financed by Crédit Agricole.
- Since the war began, the bank, with the Group support, has significantly strengthened its societal commitments. UAH190 million was allocated to charitable causes under the We Care! programme. The largest initiative was the construction of an intensive care unit at the Kiev Perinatal Centre. This UAH50 million project included a complete overhaul of the contract and the purchase of 130 pieces of modern medical equipment.

2025 HIGHLIGHTS

- ▶ In February 2025, Crédit Agricole Ukraine set up online onboarding for individual customers. This enables individuals anywhere in the world to become a bank customer in just a few minutes.
- ▶ 1st place in the Car Loans category in the “25 Leading Banks of Ukraine” awards.
- ▶ 1st place for best agri-food services according to the “Banker Awards 2025”.
- ▶ 2nd place among banks category of the Business Champions awards of Forbes Ukraine Media.
- ▶ Crédit Agricole received awards in the Social Support Leader category in the “Top 100. Largest Companies” and “Delo.ua”.

ASSET GATHERING

INSURANCE

BUSINESS AND ORGANISATION

Crédit Agricole Assurances (CAA) is France's leading insurer ⁽¹⁾ in terms of premium income and the leading bankinsurer ⁽²⁾ in Europe.

Crédit Agricole Assurances's positions are supported by a full and competitive range of products, tailored to the specific requirements of each domestic market and each local partner, as well as by the power of Crédit Agricole Group distribution network.

SAVINGS/RETIREMENT

CAA confirmed its position as the leading life insurer in France ⁽³⁾ in terms of premium income and assets under management.

It offers its customers a wide range of policies for saving, transmitting capital, financing projects or preparing for retirement.

In France, CAA primarily distributes its products to customers of Regional Banks and LCL: individual customers, high net worth customers, farmers, SMEs and small businesses and corporates.

Internationally, CAA is present through the Crédit Agricole Group entities in Italy, Luxembourg and Poland, where it continues to export

and adapt its bankinsurer know-how. It is continuing its development via distribution agreements with external partners in Italy, Portugal, Spain, Japan and Luxembourg. In addition, it is expanding through other network types, such as independent wealth management advisers and online banks with BforBank.

DEATH & DISABILITY/CREDITOR/GROUP INSURANCE

CAA is the leading provider of individual death & disability insurance in France ⁽⁴⁾ and is the top provider of creditor insurance ⁽⁵⁾.

The group or death & disability/creditor insurance offering caters for customers wishing to:

- protect themselves and their families from the financial implications of a serious personal accident;
- repay a loan in the event of short-term disability, long-term disability, unemployment thanks to guarantees linked to consumer or home finance;
- and for its corporate customers, provide their employees with a supplementary group health and death & disability insurance contract.

(4) Source: L'Argus de l'assurance, 18 April 2025 (data at end-2024).

(5) Source: L'Argus de l'assurance, 23 May 2025 (data at end-2024).

The death & disability/health offering works through the Crédit Agricole banking networks both in France and abroad. In group insurance, CAA and Amundi have joined forces to become a leading provider of social protection for corporates. With expertise in creditor insurance, CAA offers its services through around 50 partners, retail banks and specialised finance companies in seven countries.

PROPERTY AND CASUALTY INSURANCE

CAA is the leading car, home and healthcare banksurser ⁽¹⁾ and the sixth-largest insurer of property and liability in France ⁽²⁾.

It offers a full range of property and casualty insurance policies to individual customers, SMEs and corporates: protection of personal

property (car, home etc.), protection of farming and business assets, protection of mobile electronic devices for households, legal protection, supplementary health insurance, personal accident cover, specialist policies for the agricultural market, professional liability insurance, card theft protection (in case of fraudulent use of lost or stolen payment instruments). In France, it markets its products to customers of the Regional Banks and LCL. In Italy and Poland, CA Assicurazioni and CATU distribute their products via the Group entities CA Italia and CA Bank Polska respectively, and also via partners outside the Group such as Banco BPM in Italy in the case of PiùVera Assicurazioni. In Portugal, Mudum Seguros benefits from the Novobanco banking network and other partnerships outside the Group.

2025 HIGHLIGHTS

- ▶ **A high level of revenues, particularly in savings/retirement**, with significant positive net inflows in euros for the second consecutive year.
- ▶ **CAA continues to develop its responsible offering**: CAA, in cooperation with Crédit Agricole CIB and CATE, launched a “CATI” fund (Crédit Agricole Transition Infrastructure Debt Fund) which was featured in the “Best initiative contributing to the energy transition (climate and biodiversity)” category of the AGEFI Couronnes awards. CAA also expanded its creditor insurance offering with an unprecedented breakthrough on the market: no extra premium or exclusion for people with breast, prostate or testicular cancer.
- ▶ **CAA acquired a minority stake in Whysol Renewables to support this company in the production of solar and wind renewable energy and battery storage in Italy.**
- ▶ **Pacifica, CAA’s property and casualty insurance subsidiary, launched a new multi-risk renewable energy offering** to support renewable energy producers.
- ▶ **CAA opened a new branch in Stuttgart for its subsidiary, Crédit Agricole Creditor Insurance.** The aim is to roll out a range of innovative products, adapted to the five market segments targeted by CACI as a priority: consumer finance, mortgage loans, credit cards, SME cover and the specific needs of operators in the mobility sector.
- ▶ **CAA successfully placed a €750 million issue of Tier 1 subordinated bonds** and completed the full repayment of its grandfather clause subordinated debt.
- ▶ **CAA and LCL entered into exclusive negotiations with AnaCap for the joint acquisition of the Milleis Group.**
- ▶ **Entry into the scope of consolidation** of the Abanca SG companies in Spain and the companies acquired through 65% stakes from Banco BPM at the end of 2023, recently renamed PiùVera Assicurazioni ⁽³⁾ and PiùVera Protezione in Italy.

ASSET MANAGEMENT

BUSINESS AND ORGANISATION

A TRUSTED PARTNER FOR ITS CLIENTS

Amundi offers individual investors through its 600 distributor partners and 1,000 institutional investors and corporates a rich and diverse range of savings and investment solutions as well as services and technology.

Present in the main global financial markets, Amundi illustrates its know-how through all investment universes: active management (bonds, equity or multi-assets), ETFs and index solutions, structured products and private assets (real estate, private equity, private debt, infrastructure), whether directly or through its strategic partnerships. Its offering therefore includes investment solutions as well as services (training, marketing and client service) along with digital and technological tools to serve clients.

Amundi’s know-how is further enhanced by its unique expertise in financial and non-financial research, allowing it to support its clients in their investment decisions.

For individual investors, Amundi distributes its savings products through long-term partnerships with numerous distributors and

institutions specialised in this field. In Europe and Asia, Amundi offers personalised savings solutions, innovative services and value-added investment advice; these offers are tailored to the needs and risk profile of each individual investor. In a context of profound changes in the market, Amundi has solid advantages to strengthen its relationships with new digital players, in particular a recognised ability to manage their open architecture thanks to a broader range of services and technological tools. Locally, Amundi has also developed strategic partnerships with major players to offer a targeted solutions in some rapidly developing countries.

For its institutional and corporate clients, Amundi draws on its extensive expertise, global presence and research-based investment culture to provide a comprehensive approach of investment products and tailored solutions.

Listed since November 2015, Amundi remains the leading market capitalisation (€14.5 billion as at 31 December 2025) among listed traditional asset managers in Europe. In buoyant stock markets in 2025, Amundi’s share price closed the year at €70.60, up 10% over the year.

(1) Source: *L’Argus de l’assurance*, 28 November 2025 (data at end-2024).

(2) Source: *L’Argus de l’assurance*, 12 December 2025 (data at end-2024).

(3) Banco BPM Assicurazioni was incorporated into the latter company on 1 November 2025.

STRATEGIC ACHIEVEMENTS

The year 2025, which marked the end of the 2022-2025 strategic plan, confirmed Amundi's excellence in achieving its strategic targets: increased diversification and strong growth in assets under management and results, while maintaining the highest operating profitability among its peers worldwide. The year was also marked by the completion of three successful external growth operations (Alpha Associates, aixigo and Victory Capital), for an expected combined three-year return on investment of more than 12%.

Thanks to its partnership model and unrivalled distribution capabilities, its client-centric organisation, its industrial approach and its high level of operational efficiency, combining local footprints with global management and distribution capabilities, Amundi is well positioned to take advantage of industry trends, according to the strategic axes of its new 2028 Medium-Term Plan.

2025 HIGHLIGHTS

- ▶ **ETFs and index solutions:** ETFs exceeded €300 billion in assets under management at the end of December 2025 to €342, driven by the record inflows over the year (+€46,5 billion), with the platform diversifying across all client segments and outside Europe:
 - numerous commercial successes, especially in the service of our digital clients;
 - innovations: ongoing development of the range of active ETFs, development of lifecycle ETFs to support savings/retirement needs.
- ▶ **Third-party distribution:** commercial success with inflows of +32,6 billion euros, a record high. Contribution from all regions and expertise: more than 600 distributors, including 45 digital partners.
- ▶ **Expansion in Asia:** total assets under management reached €475 billion at the end of 2025. Inflows amounted to +€33 billion for the year, positive in the nine countries where Amundi is established, coming from joint ventures (India, China and South Korea) and direct distribution (Hong Kong, Japan, Malaysia, Singapore, Taiwan and Thailand). The success of the Indian joint venture, SBI FM, was confirmed, with assets under management of €276 billion and SBI's announcement of the entity's plans for an IPO in 2026.
- ▶ **Real assets:** continuation of the launch of new strategies, such as Amundi Prima, an evergreen solution allowing savers to access investment opportunities in European private markets while supporting transitions. Amundi Alpha Associates' expertise secured several innovative mandates, including a private debt mandate from a German pension fund.
- ▶ **Announcement of the long-term partnership with ICG,** including a planned 9,9% equity stake, aimed at enhancing the private assets offering for wealth management clients.
- ▶ **Active management:** Launch of the first "tokenised" money market fund, success of the Smart Solutions offering.
- ▶ **US expertise:** finalisation of the strategic partnership with Victory Capital, enabling Amundi to tap into a broader range of high-performing US and global markets investment strategies, to serve its clients in Europe and Asia.
- ▶ **Responsible investment:**
 - Amundi ranks first among the ten largest global asset managers for its voting policy on environmental and societal issues ⁽¹⁾.
 - Launch of new biodiversity euro credit and green bond funds.
 - The Ambitions 2025 plan exceeded its target, with close to 1,500 additional companies committed to the climate since 2021.
- ▶ **Technology and services:**
 - **Technology:** more than 80 clients in 15 countries for Amundi Technology at the end of 2025, with 2025 revenues reaching €116 million. The ALTO range of solutions now includes four main modules with strong development potential, particularly among wealth managers.
 - **Services:** the Fund Channel distribution platform exceeded €600 billion in assets at the end of 2025 and was ranked "Best Distribution Platform" for the 4th consecutive year by the consulting and research firm Platforum.
- ▶ **Customer recognition:**
 - Amundi has the best usage rate among French individual investors regardless of their age and is in first position in terms of in-depth knowledge of the markets (CSA Amundi 2024 barometer – Image and reputation).
 - An NPS (Net Promoter Score) survey of 6,000 bank advisors of partner networks in France shows a remarkably positive level, with an average of 74 (vs. 70 in 2024)
 - For institutional clients, the NPS (Kantar 2024) remained at a solid level, reaching 40, up 5 points compared to 2024. 84% of customers rate their experience with Amundi as very good or excellent.
- ▶ **Announcement of the new 2028 strategic plan: *Invest for the future.***

WEALTH MANAGEMENT

BUSINESS AND ORGANISATION

Crédit Agricole Group's Wealth Management business line operates under the global brand Indosuez Wealth Management.

Indosuez Wealth Management comprises around 4,250 employees in 15 locations across Europe, Asia and the Middle East.

For more than 150 years, Indosuez Wealth Management has offered a tailored approach that allows each of its customers to preserve and grow their wealth in a manner which best fits their aspirations.

In response to its customers' expectations, Indosuez Wealth Management has expanded its value proposition in favour of more sustainable development and a more responsible economy in cooperation with other Group entities.

In France, the partnership between Indosuez Wealth Management France and the Regional Banks is based on the complementarity of approaches and is a key asset in meeting the constantly changing expectations of Crédit Agricole Group's wealthy customer base.

In 2024, Indosuez acquired a majority stake in the share capital of Belgian bank Degroof Petercam.

Degroof Petercam further enhances Indosuez's value proposition and its wide range of services and international network, thanks to complementary expertise:

- recognised expertise in investment solutions in the market with an extensive range of funds, including an ESG range;
- Corporate Finance and Global Markets activities;
- fund servicing capabilities to enhance the current value proposition.

The combination of Indosuez and Degroof Petercam's complementary expertise has resulted in the creation of a European leader in wealth management, offering a continuum of services and offerings incorporating Advice & Financing, Investment Solutions, Fund Servicing & Technological and Banking Solutions to cater for the needs of its customers.

2025 HIGHLIGHTS

- ▶ **Integration of Degroof Petercam:** finalisation of all capital restructuring operations (14 in total) in mid-2025, in line with the schedule, making it possible to fully unlock the potential for synergies.
- ▶ **A new business-oriented organisation** to better meet the needs of customers: the structure has now been strengthened by the creation of three business divisions: Advisory, Financing and Coverage (AFC), Investment Management (IM) and Fund Technology & Banking Services (FTBS) are overseen by Mathieu Ferragut, Peter De Coensel and Pierre Masclet, respectively.
- ▶ **Governance developments:** new Chief Executive Officers for Banque Degroof Petercam Belgium (Sylvie Huret), CFM Indosuez in Monaco (Bénédicte Chrétien) and Azqore (Franck Bernay).
- ▶ **Acquisition of Banque Thaler** in September 2025, strengthening its presence on the Swiss market. This transaction will allow Banque Thaler's customers to benefit from an expanded offering, the Group's international expertise and its wealth management, financing and asset management solutions.
- ▶ **The signing in June 2025, for CFM Indosuez – Indosuez Wealth Management's Monaco subsidiary – of an agreement to acquire BNP Paribas Group's wealth management customers in Monaco.** These customers will benefit from continuous support, recognised local expertise and a full range of products and services, thanks to the unique positioning of CFM Indosuez in the Principality of Monaco.
- ▶ **Acquisition of a minority stake (30%) in WDX** (a company that markets two CLM/CRM solutions) in October 2025
- ▶ **Achievement of all targets in the 2025 MTP and launch of the new 2028 MTP.** Some concrete initiatives:
 - launch of the "GF Select" offering, allowing the Regional Banks to independently offer Indosuez wealth management solutions to their very high net worth clients;
 - launch of a Corporate Advisory offering, jointly with Crédit Agricole CIB, with the aim of creating a French leader with a new entity: Indosuez Corporate Advisory.
- ▶ **Roll-out of coverage for our large clients** to offer our continuum of offers and services to Indosuez and Crédit Agricole Group customers
- ▶ **International recognition with nearly 100 awards achieved for all our activities** (Best Private Equity Offering and Best UHNW Team Europe and Asia ⁽¹⁾; Grands Prix 2025 in asset management ⁽²⁾) and our geographic locations (Best Private Bank in Luxembourg and Best Bank in Monaco ⁽³⁾).

SPECIALISED FINANCIAL SERVICES

PERSONAL FINANCE AND MOBILITY

A major player in personal finance and provider of all types of mobility solutions in Europe, Crédit Agricole Personal Finance & Mobility (CA Personal Finance & Mobility) offers its customers and partners financing and car rental solutions of varying duration, incorporating their transition challenges into mobility, housing – around energy renovation of homes and ageing well – and consumption.

Present in 22 countries, in Europe, in China and in Morocco, CA Personal Finance & Mobility draws on its know-how and expertise to improve customer satisfaction, commercial success and customer retention policies of its banking, institutional, distribution and automotive partners. Committed to helping its customers balance their budgets, it supports its most vulnerable customers by teaching them how to manage their finances and avoid taking on too much debt.

CA Personal Finance & Mobility is composed of the following entities:

- consolidated entities: CA Consumer Finance S.A. (activities in France, notably through its Sofinco brand), Agos (Italy, 61% owned), Credibom (Portugal), Creditplus Bank (Germany), Sofinco Espagne, CA Auto Bank and its subsidiary Drivalia (present in 19 European countries and Morocco), CA Mobility (50/50 joint venture with CAL&F) and Hiflow (France, 76% owned);
- equity-accounted entities: Wafasalaf (Morocco, 49% owned), GAC-Sofinco AFC and, since the beginning of 2025, GAC-Sofinco Leasing (50/50 joint ventures with Guangzhou Automobile Group Co, China) and Leasys (a European leader in long-term car rental through a 50/50 joint venture with Stellantis).

CA Personal Finance & Mobility is a robust and socially cohesive company, with a strong customer base, solid and diversified partnerships and modern tools and processes. It knows how to anticipate new consumer trends and the expectations of its partners. CA Personal Finance & Mobility took action in 2025 to support the economy and to help its customers, its partners and society rise to the challenges of the transition. Despite a contraction in the automotive market, this year the entity also developed several new partnerships around electric mobility in order to accompany the deep transformations of the auto sector and new mobility trends with sustainable and inclusive solutions. It also developed solutions to support professionals in the housing sector and their customers in order to facilitate the implementation of energy renovation projects in housing, and is continuously innovating to meet new consumption challenges, simplifying and securing credit pathways through solutions based on the best digital standards, and developing payment services adapted to new uses, such as split payment.

- **A leader in consumer finance and provider of all types of mobility solutions in Europe, with employees fully committed to customers, partners and society:**
 - Nearly 17 million customers;
 - €122.5 billion in gross managed loans at end-2025 (of which €67.6 billion consolidated) with a comprehensive offering to meet new consumer uses, combining digitisation of processes, omni-channel points of contact and quality human support, a driver of the Crédit Agricole Group's development;
 - €65 billion in car loan outstandings at end-2025.
- **CA Personal Finance & Mobility aims to become the European leader in electric mobility** with a target of multiplying mobility production by 1.3 compared with the end of 2024, a financing rate for new electric vehicles 10 points higher than the market in 2028 and a reduction of -50% in the carbon intensity of auto financing by 2030 (vs 2020). These targets will be achieved through the expansion of Leasys, the geographical footprint of CA Auto Bank, which covers 19 European countries and Morocco, the development of Drivalia and the signing of new partnerships with fully electric carmakers. The development of motor vehicle financing in historical CA Personal Finance & Mobility entities, through Agilauto, the long-term leasing company of the Crédit Agricole Group and the creation of a full and ambitious catalogue of associated services under the CA Mobility Services brand will participate in this trajectory.
- **At the same time, the entity is intensifying its commitment to the energy renovation of homes and ageing well**, in order to support the sustainable transformation of housing, with a target of financing €1.5 billion in works across the CA Personal Finance & Mobility group by 2028. This ambition is based on support for professionals in the housing sector and dedicated financing solutions for households.
- CA Personal Finance & Mobility is also seeking to expand quickly and is set to generate €145 billion in outstandings by 2028, including €30 billion in outstandings with Crédit Agricole Group banks, through support of the business activity at the Group's banks, development of its organic growth and through partnerships, as well as through its targeted acquisition strategy.

2025 HIGHLIGHTS

- Further development towards becoming a leader in electric mobility, with the creation of Agos Renting, a new service dedicated to long-term car rental in Italy, the launch of StartPro Mobility by Agilauto, a socially inclusive leasing offer to support SMEs, the expansion of partnerships with manufacturers and the development of new locations of Agilauto Partage, a vehicle-sharing solution rolled out for individual customers in rural areas and for corporate fleets via a partnership with OpenFleet.
- The intensification of the “Éco-renovons” (“Renovate together”) programme, a package of offers and services to become a leader in energy renovation in France, with Sofinco now a financial agent and partner of ANAH, and an approach extended to the silver economy to support professionals in the housing sector and their clients in the face of national housing renovation issues.
- Creditplus was recognised for its excellent service, earning the highest Net Promoter Score in Germany for the second consecutive year. In France, Sofinco won second place at the AFRC’s Customer Relationship Awards, by offering an innovative subscription journey that is 100% digital and instant.
- A digital experience at the highest level, with a common CRM solution for B2C and B2B for four of our main entities, the roll-out of which is in progress.
- An award-winning employee experience: Crédit Agricole Personal Finance & Mobility was certified as a Great Place to Work® for the fourth consecutive year and awarded the “Best Workplaces” label for the second year in France. This distinction is added to those already achieved by Sofinco in Spain, Credibom in Portugal and Agos in Italy.
- An acceleration of societal and environmental ambitions with the obtaining of B Corp certification for Credibom in Portugal and Creditplus in Germany, Lucie 26,000 label in France for Sofinco and the renewal for the third time of the CSR label of the Confédération générale des entreprises du Maroc (General Confederation of Moroccan Enterprises) for Wafasalaf.

LEASING & FACTORING

BUSINESS AND ORGANISATION

With €36.2 billion in outstandings financed, of which 31% internationally, and a presence in ten European countries, Crédit Agricole Leasing & Factoring is one of the European leaders in leasing, factoring, renewable energy financing (in partnership with CAT&E) and sustainable infrastructure. Close to its banking and non-banking partners, Crédit Agricole Leasing & Factoring has supported the activity of SMEs, corporates, farmers and local authorities for more than 60 years, offering them tailor-made solutions that promote their development but also their transitions to a more inclusive world that consumes fewer resources for the planet.

LEASING FINANCING

Crédit Agricole Leasing & Factoring offers rental financing solutions that meet the investment and equipment renewal needs of its customers, with an increasingly responsible approach. Its recognised expertise in advisory and risk analysis services brings real added value to their investments in property and equipment (IT operational leasing, long-term car rental, *leasing with purchase*

option, real estate leasing and lease-back). By encouraging use-based economy and “multi-life” (for IT equipment and mobility), Crédit Agricole Leasing & Factoring also makes the circular economy a central part of its ambitions, and offers its customers stand-out solutions that are more sustainable (in particular thanks to its subsidiary Olinn, an adapted company).

FACTORING

Crédit Agricole Leasing & Factoring meets the needs of businesses and professionals for financing and managing their accounts receivable, both for their day-to-day operations and for their expansion plans, in France and internationally: financing of customer invoices, dunning and collection of customer invoices, cover against insolvency risk and managed services (depending on the solutions). Thanks to its network, CAL&F supports its customers and partners in the main European countries and finances them much further afield, with a range of innovative products that meet their needs (digitalised journeys) and respond to regulatory changes (electronic invoicing) as well as societal challenges (an exclusive range of CSR offers was launched in 2024).

2025 HIGHLIGHTS

- 15th anniversary of Crédit Agricole Leasing & Factoring, which was formed in March 2010 through the merger of two Group entities: Crédit Agricole Leasing and Eurofactor (the Group’s factoring subsidiary).
- Definitive acquisition of Merca Leasing (one of the top 10 independent leasing companies in Germany). This strategic operation strengthens Crédit Agricole Leasing & Factoring’s presence in the highly dynamic German leasing market and supports CAL&F’s international growth.
- Affirmation of the positioning of Crédit Agricole Leasing & Factoring in its markets, with gains in market share in France and abroad ⁽¹⁾.
- Consolidated NPS (Net Promoter Score) remains high (at record levels), and increased compared with 2024.
- Membership of the Institut national de l’économie circulaire (National Institute of Circular Economy – INEC), the Organisation pour le renouveau de l’économie par l’environnement (Organisation for Economic Renewal through the Environment – ORÉE) and Circul’R, three major networks in the field of sustainable development and the circular economy. This commitment confirms Crédit Agricole Leasing & Factoring’s willingness to act collectively for a more sustainable economy.
- 1st edition of the “Circular Economy Circles”, a new roundtable bringing together Group entities and committed players from the world of the circular economy, aimed at promoting the sharing of experiences and the highlighting of innovative transformation initiatives.

LARGE CUSTOMERS

CORPORATE AND INVESTMENT BANKING

BUSINESS AND ORGANISATION

Crédit Agricole Corporate and Investment Bank (Crédit Agricole CIB) is the corporate and investment banking arm of the Crédit Agricole Group. It supports the Bank's customers, Corporates and Financial Institutions, by covering their financial needs across the globe, offering a broad range of products and services in capital markets, investment banking, structured finance, international trade and transaction banking. Crédit Agricole CIB model is based on a predominantly Corporate client base (65% of the 2025 commercial revenues) and a powerful and coordinated international network (64% of revenues are generated outside of France).

Client relations are the responsibility of senior bankers (Coverage teams) who work in the same division as the investment bank, to strengthen the customer-centric approach. A special Sustainable Banking team also advises and supports customers in their sustainable finance and energy transition activities by providing expertise that has been globally recognised for years. Lastly, a new team was added to the division in 2021, responsible for relationship and business development of MSE customers for the entire Crédit Agricole Group. Investment advisory expertise for these customers was further boosted in 2022 by the integration of SODICA, which has now become Crédit Agricole Midcap Advisors.

Corporate and investment banking is composed of two business divisions: Financing activities (which includes structured finance and commercial banking) and Capital Markets and Investment Banking.

FINANCING ACTIVITIES

- The Energy & Real Assets division, dedicated to **structured finance**, is primarily tasked both in France and abroad with originating, advising on, structuring and financing investment transactions that are typically backed by collateral (planes, boats, corporate real estate, commodities etc.), or providing similar services for complex and structured credit. It operates

mainly in the mobility, real estate, natural resources, power and infrastructure sectors, as well as energy transition. In 2025, Crédit Agricole CIB confirmed its global leadership in structured financing while maintaining cautious risk management

- The **commercial banking** division includes several businesses:
 - the Corporate and Leveraged Finance (CLF) division encompasses leveraged finance, telecoms finance and funds, as well as bilateral and syndicated vanilla loan origination, creating a leading origination platform for corporate and financial institution financing. Crédit Agricole CIB is positioned as a leader: it was the first bookrunner in the syndicated loan segment in terms of volume in France and the second largest in EMEA in 2025 ⁽¹⁾;
 - the **International Trade & Transaction Banking** division, which is tasked with helping Corporate and Financial Institution customers manage their cash flows, payment instruments and accounts in addition to supporting their international trade and transaction banking needs.

CAPITAL MARKETS AND INVESTMENT BANKING

- The main mission of the **Investment Bank** is to offer a full range of high value-added solutions to deal with the strategic issues of major customers.
- **Capital Markets** comprises the hedging and financing activities for customers in the primary and secondary markets, i.e. all buy/sell and structuring transactions on the fixed income, foreign exchange and credit markets as well as bond issuances, securitisation and treasury transactions. Crédit Agricole CIB has maintained its leading position in French corporate issues ⁽¹⁾ for the sixth year in a row. Crédit Agricole CIB maintained its leadership positions in Top 5 bond issues, ranking fourth worldwide in all bonds in euros ⁽¹⁾ and first position in Green, social & sustainable bonds in euros ⁽²⁾.

⁽¹⁾ Source: Refinitiv.

⁽²⁾ Source: Bloomberg.

2025 HIGHLIGHTS

► Evolution of the governance of Crédit Agricole CIB.

The year 2025 was marked by several developments in the governance of Crédit Agricole CIB.

Jean-François Balaÿ was appointed Chief Executive Officer of Crédit Agricole CIB, succeeding Xavier Musca, who had held this position for three years.

Stéphane Ducroizet was appointed Deputy Chief Executive Officer in charge of financing activities and effective second executive officer.

In the Executive Committee, Natacha Gallou was appointed Senior Regional Officer for the Americas region, Eric de Lambilly took responsibility for Risk Management and Permanent Controls and Claire Ferry was appointed Director of Human Resources.

► Acceleration of the digital transformation plan

Artificial intelligence is a key transformation lever for Crédit Agricole CIB, which aims to make it available to all its employees. In 2025, the Bank began rolling out Alfred, a tool based on generative artificial intelligence (GenAI) structured around two main features: the analysis and production of documents and an intelligent virtual assistant able to interact with the employee to create content, reformulate, correct, translate or generate ideas. By changing working methods, these tools that incorporate AI enable teams to make efficiency gains and ultimately improve the quality of the customer relationship.

► A new commitment of €1 billion in sustainable finance.

As part of its new Medium-Term Plan, Crédit Agricole CIB is committed to achieving €1 billion in sustainable finance revenues by 2028, which corresponds to an average annual growth rate (CAGR) of 11%. The Bank has thus confirmed its intention to remain the benchmark bank in sustainable finance. In 2025, Crédit Agricole CIB confirmed its leading positions by ranking first in the world in the league tables as a high volume bookrunner for green, social and sustainable euro bond issues (source: Bloomberg) as well as for sustainable syndicated loans (source: Refinitiv).

► Roll-out of the J'Agis platform within the Bank.

The J'Agis platform is a new social engagement system for all employees based in France. It allows them to easily engage with associations and organisations of general interest that are partners of the Group.

Employees on permanent contracts with more than six months length of service now have five days per year of their working time to carry out an assignment within an association.

This programme is part of the Societal Project and the Human-centric Project, and concretely illustrates the Group's commitments to society. It complements existing initiatives, such as the end-of-career societal engagement leave, workplace giving, Duo Day (a day of workplace shadowing for people with disabilities), and the Coups de Pouce (a programme supporting charitable projects driven by employees).

ASSET SERVICING

BUSINESS AND ORGANISATION

CACEIS is a European leader in custody and fund administration services, with an international presence. Its business is growing steadily in terms of assets and geographical scope.

With 7,000 employees in 17 countries, CACEIS offers a comprehensive range of asset servicing solutions. The Group's competence centres are organised by activity and ensure a unified set of reliable services for all clients, wherever they operate. Furthermore, with a global presence across all time zones, the Group provides follow-the-sun

coverage for all client services. Each entity has local experts that ensure a close working relationship with all stakeholders.

CACEIS is implementing a digitisation strategy throughout its value chain, for the benefit of its clients. It constantly adapts to market trends and incorporates new technologies to enhance the user experience, increase the efficiency and security of operations and optimise the distribution channels for its products.

2025 HIGHLIGHTS

► Celebration of 20 years of existence of CACEIS, which is today a benchmark player in asset servicing. With an initial presence in five European countries, CACEIS has expanded its reach to 17 countries across four continents and boasts one of the highest profit margins in the sector.

► Finalisation of the acquisition by Crédit Agricole S.A. of Santander's 30.5% stake in CACEIS. Crédit Agricole S.A. now holds 100% of the capital of CACEIS. CACEIS and Santander are maintaining their long-term partnership, and their joint venture in Latin America will remain under joint control.

► MiCA approval obtained to operate in all EU countries offering three services related to crypto-assets: custody and administration of crypto-assets, reception and transmission of orders (RTO) and transfer of crypto-assets.

► Introduction of the fee exemption for one year for new funds or sub-funds falling under Article 9 of the SFDR Regulation or their equivalents in other jurisdictions.

► Roll-out of the "Follow-the-Sun – Data Anywhere, Anytime" model, which, thanks to the strengthening of CACEIS's footprint in Asia and North America, ensures the availability and processing of data 24 hours a day, five days a week.

SPECIALISED BUSINESSES AND SUBSIDIARIES

CACIF – CRÉDIT AGRICOLE CAPITAL INVESTISSEMENT & FINANCE

CACIF holds the investments of Crédit Agricole S.A. in funds managed by private equity management companies, almost exclusively through IDIA Capital Investissement, which invests in unlisted companies. Most of these investments are used to finance

expansion capital transactions and buyouts in French SMEs and MSEs and to a lesser extent in growth capital and innovation in targeted business sectors.

IDIA CAPITAL INVESTISSEMENT

IDIA Capital Investissement, Crédit Agricole Group's national private equity management company, manages and provides advisory services for nearly €2.9 billion in assets. IDIA Capital Investissement invests an average of €150 million a year in expansion capital, buyout capital and growth capital transactions.

IDIA supports the development of French SMEs and MSEs and their executives by investing Crédit Agricole Group equity in minority shareholdings, with a unit investment target in the range of €1 million to €50 million in all business sectors. The management company invests in expansion capital, buyout capital and growth capital and has recognised expertise in all sectors, particularly in agri-food, wine, health and energy transition.

IDIA Capital Investissement is a forerunner in proprietary ESG private equity investing. It acts as a responsible investor and promotes green financing, as reflected in its signing of the Investors for Growth Commitment Charter of France Invest. In 2020 and 2021, IDIA Capital Investissement signed the United Nations Principles for Responsible Investment (PRI) and joined the initiative Climat International (ICI).

IDIA Capital Investissement also manages the land, forestry and wine-growing grouping of the Crédit Agricole Group and monitors the investments of Crédit Agricole S.A. in specific funds.

2025 HIGHLIGHTS

- ▶ **€147 million invested in 2025**, with €131 million allocated to 15 new equity investments. IDIA was an active minority shareholder in 125 shareholdings at end-2025.
- ▶ After the consecutive launch of two thematic funds ("Ambition Agri-Agro Investissement" ("3Ai") in 2023 and then "Energy & Low Carbon Economy" ("2EBC") in 2024) in order to fulfil the Group's ambitions to support transitions, we launched **two new funds, including:**
 - **a co-investment fund**, launched in partnership with Crédit Agricole Assurances, aimed at supporting the development of SMEs and MSEs across all territories through the support of the Group's regional vehicles;
 - **a debt fund, designed to support agricultural cooperatives, in collaboration with La Coopération Agricole (LCA).**

CRÉDIT AGRICOLE IMMOBILIER

Crédit Agricole Immobilier is a global real estate player, a subsidiary of the Crédit Agricole Group, that supports individuals, corporates and communities in all their real estate projects.

With strong local roots, Crédit Agricole Immobilier relies on three business lines: property services for individuals (transactions, rental, rental management, condominium trustee, renovation) distributed under the commercial brand Square Habitat, property development and property management, an activity in which Crédit Agricole Immobilier is the leader in France.

Our 1,800 employees contribute to the emergence of responsible real estate, creating value and accelerating inclusivity. Committed to biodiversity and reducing the carbon footprint of its activities, Crédit Agricole Immobilier is NF Habitat HQE certified, a member of the association and director of the International Biodiversity and Property Council (IBPC), a member of the Renewable Energy and Building Recovery Booster (ENR&R) and supports the Low Carbon Building Development Association (BBCA).

2025 HIGHLIGHTS

- ▶ **Continuation of the Banque-Immo project**, integration of property services for individuals (transactions, rental and rental management) across Crédit Agricole Group branches, and offerings associated with the launch of renovation solutions.
- ▶ Continuation of Crédit Agricole Immobilier's commitment to **low-carbon real estate and biodiversity, notably with:**
 - delivery of the 72,000 m² green campus at Stellantis in Poissy (78), incorporating the creation of 20,000 m² of green spaces in full soil;
 - launch of the transformation work on the Nanterre hospital with the creation of 234 housing units, a hotel residence of 134 studios and a third location for local services.
- ▶ **French leader in property management** in France by revenues.
- ▶ Membership in Cynéo, a facilitator of the circular economy that aims to standardise the integration of recycled materials in construction and renovation projects in residential and commercial buildings.

CRÉDIT AGRICOLE PAYMENT SERVICES

CA Payment Services is responsible for managing the Group's payment strategy, operating its processing platforms, supervising transactions, guaranteeing transaction security and ensuring banking representation. Moreover, CA Payment Services is approved by the French Regulatory and Resolution Supervisory Authority (ACPR), as a payment institution carrying out hybrid activities.

Together with the entities within the Group Payment business line, which it is tasked with coordinating, CA Payment Services designs and develops offerings for the Group's banks and supports them in the distribution of payment services.

2025 HIGHLIGHTS

- ▶ **New governance of the Group Payment business line.** Within the Group, payment expertise lies with nine specialised entities: AVEM, CA NEOPS, CA Payment Services, CAWL, Cofilmo, Linxo, Okali, Paymed and Santeffi. In order to strengthen strategic and operational coordination, and thus gain agility, a new governance of the Group Payment business line has been established, led by CAPS.
- ▶ **WERO: the mobile payment service** project led by CA Payment Services on behalf of the Group. European Payments Initiative (EPI) launched Wero, an instant payment service. Since May, the Request to Pay feature has enabled users to request a transfer simply via a phone number or email address.
- ▶ **Evolution of the MBQ Jeunes offering** with an exclusive Mozaïc card for 12 to 17-year-olds in the colours of Team Vitality.
- ▶ **VoP (Verification of Payee)** Since 9 October, Crédit Agricole has been offering automatic checking that the IBAN matches the name of the beneficiary before each payment, in accordance with European regulations. This will help to limit fraud and error.
- ▶ **Ongoing experimentation on innovations**, with a clear focus on customer usage:
 - Cashback: a fluid solution to give back purchasing power;
 - Payment ring: pay for local purchases with a connected ring.
- ▶ **The Net Promoter Score (NPS)** has been rising steadily for several years. It has now reached a **record level of +42**.
- ▶ **Anti-fraud:** CA Payment Services was one of those selected from the call for expressions of interest launched by the Government on AI in the service of efficiency. Its project "Protecting payments in real time", developed with AdvanThink, uses AI models to detect and prevent fraud during transactions.
- ▶ **Launch of the CAWL e-commerce offering:** CAWL, the joint venture created by the partnership between Crédit Agricole and Worldline, a specialist in merchant payment services, has reached a major milestone with the launch of its first acceptance offer for e-commerce.

CRÉDIT AGRICOLE GROUP INFRASTRUCTURE PLATFORM

The Crédit Agricole Group Infrastructure Platform (CA-GIP) brings together 80% of the IT production, infrastructure and technology platforms of Crédit Agricole Group. CA-GIP acts as a partner in major developments with Crédit Agricole Group entities for the benefit of their customers.

CA-GIP is made up of 2,200 employees spread over the French regions, with the target of responding to the challenges of the digital revolution that the Crédit Agricole Group is addressing in order to strengthen its competitive position.

CA-GIP's ambition is to develop new innovative platforms adapted to new practices, while guaranteeing a high level of security and confidentiality. All of these factors confirm and demonstrate its CSR commitment. CA-GIP is projecting a clear and ambitious vision for 2030: to solidify its position as a technological leader, drive the Group's digital transformation and ensure reliable, high-performance and industrialised IT.

2025 HIGHLIGHTS

- ▶ **Acceleration of our customer relationships** with regular contact (events, booklet on key achievements etc.), part of a process of transparency and continuous improvement.
- ▶ **Partnership with the start-up Biomemory to explore DNA data storage.** This partnership offers the opportunity to explore the optimisation of digital archive management while reducing the environmental impact of IT infrastructure.
- ▶ **Success of DORA compliance** (European regulation to ensure operational resilience to digital risks by strengthening security, continuity and incident management) through a tripartite CA-GIP/entities/Group approach.

UNI-MÉDIAS

The media subsidiary of Crédit Agricole S.A., Uni-médias, continues to post good profitability in its sector.

Uni-médias has accelerated its transformation based on:

- the creation of a video hub to strengthen digital and social video production;
- a significant step-up in energy transitions on the ground in line with the Group's Societal Project.

2025 HIGHLIGHTS

- ▶ **WE DEMAÎN supports Crédit Agricole in the editorial strategy on transitions.**
- ▶ **Partnership with Prisma Media on the marketing of our programmatic inventory.**
- ▶ **Tie-in to the new Crédit Agricole Business Digital entity as a content and data reference partner.**
- ▶ **A 58% reduction in the carbon footprint since 2019 ⁽¹⁾.**

BFORBANK

BforBank is Crédit Agricole Group's online bank. Founded in 2009, it now operates in France and Germany and aims to become one of the market leaders in Europe by 2030.

BforBank stands out for its approach focused on customer autonomy, while offering transparent, simple and secure day-to-day support. Through this model, the online bank aims to make a lasting contribution to its customers' financial well-being by enabling them to better manage their finances, make informed decisions and build a sustainable balance between income, expenditure, savings and investments.

BforBank relies on innovative services that are accessible to all via a smooth and intuitive mobile app, combined with advisors available 24 hours a day, seven days a week via telephone, the app, chat and social networks.

Accessible without income requirements or commitments, BforBank offers essential everyday banking services with two bank account options: the free BforBASIC card and the BforZEN card, which costs €5 per month for an enhanced banking experience. It also offers a full range of savings products, including the Livret A savings account, the Livret de développement durable et solidaire (LDDS) sustainable development savings account, and the Compte sur Livret BFor+ savings account. The banking offering will continue to be extended gradually with the introduction of new products (joint account, life insurance etc.).

2025 HIGHLIGHTS

- ▶ **Launch of BforBank in Germany.**
- ▶ **New advertising campaign: "Money is hard to earn, so it should be easy to manage, save and invest".**
- ▶ **Digital Innovation Award presented by Confluent.**
- ▶ **Happy Trainees 2026 Label.**

CA TRANSITIONS & ENERGIES

In France, the National Low-Carbon Strategy set ambitious targets for renewable energy development, establishing the share of renewable energy in gross final energy consumption at 33%. To achieve these targets Crédit Agricole Transitions & Énergies (Transitions & Energies), has stepped up development of the entire Renewable Energy sector, throughout the country, notably with the

support of the Regional Banks and LCL through three complementary activities:

- financing and investment in renewable energy projects;
- production and supply of decarbonised electricity in direct distribution, in cooperation with actors in the regions;
- transition advisory services and solutions, supporting the sobriety of the Group's customers.

2025 HIGHLIGHTS

- ▶ Acquisition of COMWATT, specialised in the production and optimisation of solar energy consumption for individual customers with a view to launching a solar self-consumption offer in Q1 2026.
- ▶ Launch of a partnership with HelloWatt to enhance the J'écorénove mon logement ("I eco-renovate my home") offering and provide individuals with comprehensive support, from technical and economic analysis to carrying out renovation works.
- ▶ An increase in the stake in R3, a leader in corporate, social and environmental performance, to 70%, in order to provide comprehensive support to corporates.
- ▶ First business contracts signed with Selfee, a subsidiary of Crédit Agricole Transitions & Énergies (Transitions & Energies), a renewable electricity supplier in direct distribution.
- ▶ Internationalisation of the financing activity with new financing projects in Poland.

CA SANTÉ & TERRITOIRES

Created in 2023, Crédit Agricole Santé & Territoires offers a range of solutions to meet two long-term societal challenges:

- promoting access to primary care in the regions and thus helping to combat medical deserts through pragmatic solutions (health centres and clinics, assisted and augmented telemedicine, home healthcare etc.);

- supporting an ageing society through home healthcare, advice and non-medical housing.

Crédit Agricole Santé & Territoires has 20 employees and puts its expertise and that of its subsidiaries at the service of patients, healthcare professionals (GPs, specialists and paramedics), local authorities and healthcare institutions (regional professional health communities, boards, regional health agencies etc.).

2025 HIGHLIGHTS

- ▶ **Acquisition** in July 2025 of a majority stake in CetteFamille, which develops shared living solutions for the elderly in rural areas (85 houses on farms) and acquisition of Petits-fils, a leader in home care services that supports more than 28,000 elderly people.
- ▶ **Production of care and services in 2025:** 55 care homes; 15 health centres; 750,000 visits in an Office Santé centre/care home; 40,000 telehealth visits; 50,000 employees screened during a workplace health campaign; 85 senior shared-accommodation structures.

HIGHLIGHTS 2025

Acquisition of Nexity Property Management by CA Immobilier.

Acquisition of Office Santé by CA Santé & Territoires.

2025

INFORMATION ON THE SHARE CAPITAL AND SHAREHOLDERS

CHANGE IN SHARE OWNERSHIP OVER THE PAST THREE YEARS

The table below shows changes in the ownership of Crédit Agricole S.A. over the past three years:

Shareholders	Position at 31/12/2025			Position at 31/12/2024	Position at 31/12/2023
	Number of shares	% of voting rights ⁽³⁾	% of share capital ⁽⁴⁾	% of share capital	% of share capital
SAS Rue La Boétie ⁽¹⁾	1,921,090,370	63.50	63.49	62.45	59.69
Treasury shares ⁽²⁾	394,529	0.00	0.01	0.53	0.77
Employees (FCPE, PEE)	198,299,902	6.55	6.55	6.53	6.54
Institutional investors	659,380,759	21.80	21.79	23.55	23.85
Individual shareholders	246,594,390	8.15	8.15	6.94	9.16
TOTAL	3,025,902,350	100%	100%	100%	100%

(1) SAS Rue La Boétie is wholly owned by the Crédit Agricole Regional Banks.

(2) Treasury shares are directly held as part of share buyback programmes, recognised on Crédit Agricole S.A.'s balance sheet and as part of a liquidity agreement.

(3) % of voting rights corresponds to exercisable voting rights.

(4) % of share capital corresponds to theoretical voting rights.

There is no significant difference between theoretical voting rights (% of share capital) and exercisable voting rights (% of voting rights), presented in the above table.

THE OWNERSHIP STRUCTURE CHANGED SLIGHTLY IN 2025

The Regional Banks hold their majority stake in Crédit Agricole S.A. through SAS Rue La Boétie at 63.49% at end-2025 as compared to 62.45% at end-2024 and 59.69 at end-2023.

The increase in SAS Rue La Boétie's stake over 2025 is linked to a buyback programme of Crédit Agricole S.A.'s shares in the market between February 2025 and May 2025 for a total of €353 million. This is the third purchase of Crédit Agricole S.A. shares by SAS Rue La Boétie since 2022, the first having been carried out between November 2022 and May 2023 for an amount of €960 million and the second between August 2023 and May 2024 for an amount of €1 billion.

In addition, in February 2025, SAS Rue La Boétie reiterated its intention not to increase its stake to more than 65% of Crédit Agricole S.A.'s capital. Like the two previous operations, this operation is driven by patrimonial approach.

Employee profit-sharing through the company savings plans (PEE) and employee share ownership plans (FCPE) stood at 6.55% at the end of 2025, almost stable compared to the end of 2024. The share of institutional investors at 21.79% at the end of 2025 is down slightly compared to the end of 2024.

The share of individual shareholders is increasing at the end of 2025 to 8.15% compared to 6.94% in 2024.

Overall, the free float was down over 2025, to 30% versus 30.5% at end-2024.

RECENT CHANGES IN SHARE CAPITAL

The table below shows changes in Crédit Agricole S.A.'s share capital over the past five years:

Date and type of transaction	Total of capital (in euros)	Number of shares
Share capital at 31/12/2020	8,750,065,920	2,916,688,640

Share capital at 31/12/2025	9,077,707,050	3,025,902,350

DIVIDEND POLICY

On 31 December 2025, the share capital of Crédit Agricole S.A. amounted to €9,077,707,050, divided into 3,025,902,350 shares with a par value of €3 each.

The dividend policy is defined by the Board of Directors of Crédit Agricole S.A. It may take into account, in particular, the Company's earnings and financial position, as well as the dividend policy practices of leading French and international companies in the sector. Crédit Agricole S.A. gives no guarantee as to the amount of the dividend which will be paid in any given financial year.

For financial year 2021, the Board of Directors of Crédit Agricole S.A. proposed to the General Meeting on 24 May 2022 to distribute a dividend of €1.05 per share, of which €0.85 related to 50% pay-out policy and €0.20 of continued 2019 dividend catch-up.

For financial year 2022, the Board of Directors of Crédit Agricole S.A. proposed to the General Meeting on 17 May 2023 to distribute a dividend of €1.05 per share, of which €0.85 related to 50% pay-out policy and €0.20 of 2019 dividend catch-up finalisation.

For financial year 2023, at the General Meeting of 22 May 2024 the Board of Directors of Crédit Agricole S.A. proposed a dividend of €1.05 per share.

For financial year 2024, at the General Meeting of 14 May 2025 the Board of Directors of Crédit Agricole S.A. proposed a dividend of €1.1 per share.

For financial year 2025, at the General Meeting of 20 May 2026 the Board of Directors of Crédit Agricole S.A. proposed a dividend of €1.13 per share.

For the last five financial years, Crédit Agricole S.A. distributed the following dividends, as indicated in the table below:

	For the year 2025	For the year 2024	For the year 2023	For the year 2022	For the year 2021
Net dividend per share (in euros)	1.13	1.10	1.05	1.05	1.05
Payout ratio ⁽¹⁾	50%	50%	54%	62%	57%

(1) Total dividends payable (ex. treasury shares) divided by adjusted net income Group share

STOCK MARKET DATA

CRÉDIT AGRICOLE S.A. SHARE

STOCK MARKET PERFORMANCE

SHARE PRICE FROM 31 DECEMBER 2020 TO 31 DECEMBER 2025

THE CURVES ARE REBASED ON CRÉDIT AGRICOLE S.A.'S SHARE PRICE AT 31 DECEMBER 2020.
MONTHLY CHANGE IN THE SHARE PRICE AND IN THE VOLUME OF SHARES TRADED

Between 31 December 2020 and 31 December 2025, the Crédit Agricole S.A. share price increased from €10.36 to €17.55, i.e. a rise of +69.4% in five years.

Over 2025 alone, the share price increased by 32.1%.

The total number of Crédit Agricole S.A. shares traded between 1 January and 31 December 2025 on Euronext Paris was 1.31 billion (1.29 billion in 2024), with a daily average of 5.12 million (5.03 million in 2024). Over this period, the stock traded at a high of €17.78 and a low of €13.10.

STOCK MARKET INDEXES

Crédit Agricole S.A. shares are listed on Euronext Paris, Compartment A, ISIN Code: FR0000045072.

They are included in several indexes: the CAC 40, the Stoxx Europe 600 Banks Index (made up of 44 banking institutions in Europe), and the FTSEurofirst 80 Index (representative of the largest companies in the eurozone by market capitalisation).

Crédit Agricole S.A. strengthens its global CSR performance and maintains itself in the main socially responsible indexes, which bring together the best performing companies according to strict ESG criteria (for example, FTSE4Good, Euronext Eurozone 100 ESG). With regard to themed indexes, Crédit Agricole S.A. shares are notably included in the Euronext CAC 40 Governance index and the Euronext Low Carbon 100 Europe PAB index.

(1) Net book and tangible book value per share, after deduction of dividend to pay.

SHAREHOLDER RETURN

The table below shows the total shareholder return for retail investors in Crédit Agricole S.A. shares.

The calculation, based on the market price at the time of the investment (initial public offering on 14 December 2001, or the beginning of the year in other cases), takes into account the reinvestment of received dividends (until 2005, this included a tax credit for 2004, which accounted for 50% of the amount distributed),

but does not include the loyalty dividend of €0.035 per share paid for 2014 and 2015. The valuations are based on the closing share price on the day of the investment.

The calculation also assumes that investors sold their pre-emptive subscription rights and used the disposal proceeds to take up the rights issued at the end of October 2003, January 2007 and July 2008. All results are presented before tax impact

Holding period	Average annualised return	Cumulative gross return
1 financial year (2025)	+41.1%	+41.1%
2 financial years (2024 and 2025)	+24.9%	+56.2%
3 financial years (2023 to 2025)	+30.9%	+124.3%
4 financial years (2022 to 2025)	+18.0%	+93.9%
5 financial years (2021 to 2025)	+20.2%	151.3%
10 financial years (2016 to 2025)	+11.5%	+198.0%
Since the stock market listing (14/12/2001)	+5.3%	+249.7%

- (1) Outstanding loans dedicated to these causes in line with the internal Sustainable Assets Framework and general financing of Template 10 of Pillar 3 ESG at 30 September 2025 (€18 billion). Details in parts 2.4.1.5 and 3.2.3 of the sustainability report.
- (2) Metric defined in part 2.4.1. "Metrics related to financing of transitions" section.
- (3) Voluntary metrics.
- (4) Target of 14 GW by the end of 2025. Details in part 2.2.1.5 of the sustainability report.
- (5) Outstanding amounts of Crédit Agricole Assurances (listed investments managed directly, listed investments managed under management mandate and unlisted investments managed directly) and Amundi Transition Énergétique. Voluntary metric.

A LONG-TERM COMMITMENT

For over 20 years, Crédit Agricole has been demonstrating its involvement through its various commitments.

Signatory of the

- ▶ Women's Empowerment Principles in 2022;
- ▶ Net Zero Banking Alliance, Net Zero Asset Owner Alliance, Net Zero Asset Managers Initiative since 2021;
- ▶ Finance for Biodiversity Pledge ⁽¹⁾ since 2021;
- ▶ Principles for sustainable insurance since 2021;
- ▶ Tobacco Free Finance Pledge since 2020;
- ▶ UNEP FI since 2019;
- ▶ Principles for Responsible Banking and Collective Commitment to Climate Action since 2019;
- ▶ Business For Inclusive Growth (B4IG) since 2019;
- ▶ Poseidon Principles since 2019;
- ▶ One Planet Sovereign Wealth Fund Asset Manager Initiative since 2019;
- ▶ Manifesto for the Inclusion of People with Disabilities in Economic Life since 2019;
- ▶ Science-Based Targets since 2016;
- ▶ RE100 since 2016;
- ▶ Charter for the energy efficiency of commercial buildings since 2013;
- ▶ Responsible Purchasing Charter since 2010;
- ▶ Corporate diversity Charter since 2008;
- ▶ Parenthood Charter since 2009, renewed in 2022;
- ▶ Principles for Responsible Investment since 2006;
- ▶ United Nations Global Compact since 2003.

Cofounding member

- ▶ Finance for Tomorrow since 2017;
- ▶ International Integrated Reporting Council (IIRC) since 2016;
- ▶ Mainstreaming Climate Action Within Financial Institutions since 2015;
- ▶ Catalytic Finance Initiative since 2015;
- ▶ French Business Climate Pledge since 2015;
- ▶ BBKA association (low-carbon building design) since 2015;
- ▶ Green Bonds Principles since 2014;
- ▶ Portfolio Decarbonization Coalition since 2014;
- ▶ Equator Principles since 2003.

Participant

- ▶ Eurosif ⁽²⁾ (European Sustainable Investment Forum) since 2023;
- ▶ Task force on Nature-related Financial Disclosures (TNFD) since 2022;
- ▶ Asia Investor Group on Climate Change (AIGCC) since 2020;
- ▶ Climate Action 100+ since 2017;
- ▶ Task Force on Climate Financial Disclosures since 2017;
- ▶ Montreal Carbon Pledge since 2015;
- ▶ Paris Appeal on Climate Change since 2015;
- ▶ Call for carbon pricing at the initiative of the World Bank Group in 2014;
- ▶ The Institutional Investors Group on Climate Change (IIGCC) since 2003.

Other positions

- ▶ Modern Slavery Statement since 2017.

By relying on its ESG strategy and of all the actions implemented by the entities, Crédit Agricole S.A. is consolidating its non-financial performance. In 2025, it reaffirmed its place on the leading socially responsible investment indexes:

- ▶ rated A on climate change and A on supplier engagement by CDP;
- ▶ rated AA by MSCI since 2022;
- ▶ rated 17.7 by Sustainalytics;
- ▶ rated C+ Prime by ISS-ESG since 2022;
- ▶ rated 92% by the Workforce Diversity Initiative ⁽³⁾ (up 20 points on 2021).

(1) Amundi commitment.

(2) Eurosif, the European Sustainable Investment Forum, is the leading pan-European association promoting Sustainable Finance at the European level. Its membership is comprised of Sustainable Investment Fora (SIFs) from across the EU, Switzerland and the UK. Most of these SIFs have a broad and diverse membership themselves, including asset managers, institutional investors, index providers and ESG research and analytics firms.

(3) The Workforce Disclosure Initiative measures the transparency of published data on a variety of topics including human capital, governance and procurement.

1. GENERAL INFORMATION

1.1. BASIS FOR PREPARING REPORTS

1.1.1 GENERAL BASIS FOR PREPARING SUSTAINABILITY REPORTS

Crédit Agricole S.A. has prepared its sustainability report on the basis of the same scope as the consolidated financial statements.

Crédit Agricole S.A.'s own operations are defined as those involving entities under exclusive control, while those involving entities for which it exercises joint control or significant leverage are to be considered part of the undertaking's value chain, as defined in part 1.3.1.2 "Crédit Agricole S.A.'s value chain".

Taxonomy reporting is produced on the basis of the prudential scope of consolidation, as required by Regulation 2021/2178.

The table below lists the Crédit Agricole S.A. entities at 31 December 2025 that are exempt from preparing an individual or consolidated sustainability report in their own management report.

COMPANIES EXEMPT FROM PUBLISHING THEIR OWN REPORTS AND COVERED BY CRÉDIT AGRICOLE S.A.'S REPORT

CACEIS Bank
CACEIS S.A.
Crédit Agricole Leasing & Factoring
CA Indosuez
Crédit Agricole Bank Polska S.A.
Banque Degroof Petercam
LCL
Agos
Creditplus Bank AG
Crédit Agricole Personal Finance & Mobility

1.1.2 DISCLOSURES IN RELATION TO SPECIFIC CIRCUMSTANCES

This report has been prepared in accordance with the obligations set by the transposition into French law of the European Directive on the disclosure of sustainability information (known as the "CSRD" 2022/2464/EU Directive) and of the European Regulation 2020/852 of 18 June 2020, as amended by the European Delegated Regulation 2026/73 published on 8 January 2026 (so-called "Taxonomy" regulation). The preparation of the sustainability information was carried out in a context of uncertainty regarding the interpretation of the texts for the financial sector players, represented by the financing, insurance or asset management businesses within Crédit Agricole S.A.

In preparing this second sustainability report, and despite the progress made since the first report, Crédit Agricole S.A. was sometimes faced with a lack of established reference frameworks, the unavailability of certain data and difficulties in collecting information, particularly on its value chain. In this context, the Crédit Agricole Group has striven to comply with the requirements of the ESRS in force at the date of preparation of the sustainability report, relying on the data available within the deadlines set for its preparation.

DOUBLE MATERIALITY ANALYSIS

Regarding the double materiality analysis, and more particularly that related to the value chain, the Crédit Agricole Group was faced with limitations related to the availability of data, the degree of maturity of evaluation methodologies and their ability to cover the diversity of its activities. Assumptions, projections and structuring approximations detailed in the relevant sections of the report were used. This analysis will be reassessed in future years, based on changes to the framework (methodology, available data, other regulatory changes impacting actors in the value chain) and, where appropriate, sector-specific frameworks, particularly on Nature themes (see part 1.4.1.3 "Description of the process to identify and assess material impacts, risks and opportunities related to other environmental issues").

INFORMATION PRESENTED IN THE REPORT

For all the information presented in this report, the Crédit Agricole Group has chosen approaches applicable from the first financial year, using methodologies and estimates for several categories of data, including those relating to the value chain, such as the calculation of greenhouse gas emissions. Where an estimate has been used, a specific mention is made in the paragraph where the data is disclosed. For example, with regard to greenhouse gas emissions, the information necessary to understand the data can be found in part 2.4.2 "Gross Scopes 1, 2, 3 GHG emissions and total GHG emissions", following the table "Total GHG emissions broken down by Scopes 1 and 2 and significant Scope 3 emissions".

TRANSITION PLAN

Information on the specific disclosure requirements for the Transition Plan is provided in part 2.2.1 "Transition plan for climate change mitigation".

EUROPEAN TAXONOMY

The information published in the sections "Regulatory framework and requirements" and "Methodology for determining aligned assets" of part 2.4.5 "Information published on activities related to the EU Taxonomy" present the main methodological assumptions used by Crédit Agricole Group to assess, in particular, the alignment of loans granted to individuals.

PERSPECTIVE

In the future, to take into account market best practices and recommendations as well as a better knowledge of these new regulatory and normative provisions, the Group may have to develop certain reporting and communication practices, as well as the internal control mechanism relating to the production of sustainability information, in a process of continuous improvement.

1.2. SUSTAINABILITY GOVERNANCE

1.2.1 BOARD OF DIRECTORS

1.2.1.1 COMPOSITION AND DIVERSITY OF THE BOARD OF DIRECTORS

COMPOSITION OF THE BOARD OF DIRECTORS

See Chapter 3 "Report of the Board of Directors", parts 1.1 "Information relative to the Board's composition and ways of operating", except for paragraphs 5 to 9 and 2 "Additional information on corporate officers".

DIVERSITY OF THE BOARD OF DIRECTORS

See Chapter 3 "Report of the Board of Directors", part 1.1.3 "Governance and diversity policy", section "Board diversity policy".

1.2.1.2 EXPERTISE OF THE BOARD OF DIRECTORS

REQUIREMENTS IN TERMS OF BOARD EXPERTISE

See Chapter 3 "Report of the Board of Directors", part 1.1.3 "Governance and diversity policy", section "Knowledge and skills".

ANNUAL ASSESSMENT OF THE BOARD OF DIRECTORS

See Chapter 3 "Report of the Board of Directors", part 1.1.3 "Governance and diversity policy", sections "Knowledge and skills" and "Assessment of the Board of Directors".

TRAINING OF THE BOARD OF DIRECTORS

See Chapter 3 "Report of the Board of Directors", part 1.1.3 "Governance and diversity policy", section "Training of the Board of Directors".

The Board's training programme is drawn up taking into account (i) the needs and/or requests expressed by Directors and (ii) the Group's priority issues, including impacts, risks and opportunities.

In 2025, all Board members attended at least one of the following training sessions:

- training on internal models: modelling process and model governance;
- a presentation of a benchmark on the application of the CSRD regulation based on the production of the first sustainability reports;

- an overview of regulatory news.

Several specialised training courses have also been held within certain committees, including:

- for members of the Audit Committee: a fiscal update, with a focus on the temporary additional corporate income tax, a presentation of the impacts of IFRS 18 and an update on cooperative investment certificates (*certificats coopératifs d'investissement* or CCIs);
- for members of the US Risk Committee: regulatory changes in the United States, the outlook for financial regulation, presentation of the economic environment and an update on anti-money laundering and international sanctions regulations.

In addition, Directors not from the Regional Banks benefit from an immersion experience at a Regional Bank.

The Board's training programme for 2026 includes, in addition to individual or committee training, group sessions on the following topics:

- a session on tokenisation in finance;
- regulatory and compliance news, with a focus on the Digital Operational Resilience Act (DORA) regulation;
- a presentation on the Group's new geographic areas with a focus on Asia;
- a review of partnerships and joint ventures within the Group.

This 2026 training programme may be updated in line with current events. It should be noted that the Board of Directors' group training sessions are led by in-house and/or third-party experts.

ADDITIONAL INFORMATION ON CORPORATE OFFICERS

See Chapter 3 "Report of the Board of Directors", part 2 "Additional information on corporate officers".

COMPOSITION OF THE BOARD OF DIRECTORS AT 31 DECEMBER 2024

See Chapter 3 “Report of the Board of Directors”, part 2.1 “Composition of the Board of Directors at 31 December 2025”.

MANDATES AND POSITIONS HELD BY CORPORATE OFFICERS

See Chapter 3 “Report of the Board of Directors”, part 2.2 “Mandates and positions held by corporate officers”.

1.2.1.3 ROLE OF THE BOARD OF DIRECTORS IN MONITORING IMPACTS, RISKS AND OPPORTUNITIES

ALLOCATION OF RESPONSIBILITIES WITHIN CORPORATE GOVERNANCE

The division of powers between the Board of Directors and Executive Management is set out in Articles 15 to 17 of the Articles of Association, which are available to consult at Crédit Agricole S.A.’s registered office and on its website: www.credit-agricole.com.

See also Chapter 3 “Report of the Board of Directors”, part 1.1.4 “Other information required by Articles L. 225-37-4 and L. 22-10-10 of the French Commercial Code”, sections “Limitations placed by the Board of Directors on the powers of the Chief Executive Officer”, “Agreements between corporate officers and subsidiaries” and “Control procedure for regulated agreements and agreements relating to ordinary transactions entered into under normal conditions”. Finally, see part 1.2.1 “Board activity”, section “Related-party agreements”.

INTEGRATION OF SUSTAINABILITY MATTERS WITHIN THE BOARD OF DIRECTORS AND ITS SPECIALISED COMMITTEES

At its plenary meetings, the Board ensures the consistency of the undertaking’s commitments and project of the undertaking with regard to social and environmental issues, particularly:

- when examining strategic projects;
- when reviewing the Risk Management Framework submitted for adoption, if the scope of the activities concerned justifies it, in particular to ensure that climate and environmental risks are taken into account.

In addition, the matters submitted to the decision of the Board of Directors are reviewed in advance by one or more of its seven specialised committees, which are responsible for preparing the Board’s deliberations and/or submitting their opinions and recommendations to the Board. In the environmental and social field, Crédit Agricole S.A. has chosen to assign specific responsibilities to two committees:

- the review of the ESG policy, including climate strategy monitoring ahead of the General Meeting, has been entrusted to the Societal Commitment Committee;
- the review of non-financial information, and in particular the preparation and monitoring of the sustainability reports of Crédit Agricole S.A. and Crédit Agricole Group, has been entrusted to the Audit Committee. The regulatory changes to be expected in environmental matters, in particular in connection with the “Omnibus” Directive are carried out jointly with the collaboration with the Societal Commitment Committee.

Notwithstanding these specific responsibilities, the Board has reaffirmed its ambition to maintain a cross-functional approach to CSR issues, involving most of the specialised committees, depending on the subject. The specialised committees are involved in the following areas in particular:

- the Risk Committee, for the effects of climate risk on the various other risk levels;
- the Compensation Committee, to assess the ESG performance of executives;
- the Appointments and Governance Committee, to promote a culture of ethics within the Group;
- the Strategic Committee, for understanding ESG risks in external growth operations, and in the guidelines for the Medium-Term Plan.

THE ACTIVITY OF THE BOARD OF DIRECTORS AND ITS SPECIALISED COMMITTEES

All of the Board’s supervisory activities are set out in Chapter 3, part 1.2 “Board activity in 2025” and more specifically part 1.3 “Activities of the Board’s specialised committees”.

The main issues examined by the Board in relation to sustainability, following reviews, advice and/or proposals from the specialised committees, are as follows:

1. After analysis by the Audit Committee:

- the sustainability reports and the monitoring of the process used to draw them up, in conjunction with the Societal Commitment Committee, and in particular the task plan for sustainability information certifiers.

2. After analysis by the Risk Committee:

- the Annual Internal Control Report and the half-yearly report on internal control, drawn up under the coordination of the Group Risk department;
- changes in credit, market, operational and security risks, as well as the risk dashboard and monitoring of IT and cybersecurity risks;
- approving the Risk Frameworks that govern risk-taking in the Group’s main areas of activity;
- in the area of legal affairs, the progress of ongoing litigation and administrative investigations;
- the report on compliance with anti-money laundering and terrorist financing;

3. After analysis by the Strategy Committee:

- preparation of the ACT 2028 Medium-Term Plan;
- planned disposals and acquisitions (see Chapter 3, part 1.2 “Board activity in 2025”, “Strategic guidelines” section).

4. After analysis by the Compensation Committee:

- the fixed compensation, annual personal variable compensation, and the terms and conditions and criteria used to determine the annual variable compensation of the executive corporate officers (Chairman, Chief Executive Officer and Deputy Chief Executive Officers), taking into account regulatory provisions as well as the CSR performance criteria that were and will be presented to the General Meeting as part of the ex-ante and ex-post vote on executive compensation;
- an update on preparations for the implementation of the Pay Transparency Directive;
- the guidelines of the Human Project, as part of the ACT 2028 Medium-Term Plan;
- the share capital increase reserved for employees.

5. After analysis by the Appointments and Governance Committee:

- the election of Eric Vial as Chairman of the Board of Directors, succeeding Dominique Lefebvre as of 1 January 2026;
- the regulation of the duration of the Chief Executive Officer’s duties and the related amendment of the Board’s Rules of Procedure (see Chapter 3, part 1.2 “Board activity in 2025”, “Strategic guidelines” section);
- the results of the self-assessment of the Board’s operation and its individual and collective expertise, and possible ways of improving governance;
- the independence of Directors in accordance with the Afep/ Medef Code and areas of non-compliance with this Code;
- the progress of work on succession plans for Crédit Agricole S.A.’s key functions;

- the updating of the Board of Directors' Rules of Procedure and those of certain specialised committees, and in particular:
 - the updating of the Rules of Procedure of the Board, the Risk Committee and the Audit Committee regarding the reporting of internal audit subjects to the Audit Committee,
 - the updating of the Rules of Procedure of the Board and the Risk Committee regarding the monitoring of risks related to information and communication technologies, particularly with regard to the DORA regulation,
 - the updating of the Board's Rules of Procedure following the updating of the Code of Ethics;
- the amendment of the following two procedural notes:
 - the Board's procedural note setting out the principles of the succession processes followed by the Board for its Chairman, the Chief Executive Officer and members of the Executive Committee identified as key functions,
 - the Board's procedural note on the profiles, skills and availability required to perform the duties of Director of Crédit Agricole S.A.,
 - the procedural note of Crédit Agricole S.A.'s Board of Directors on the consideration of social and environmental issues in determining activity guidelines;
- the policy on gender equality at work and equal pay within Crédit Agricole S.A. Parent Company, and the initiatives undertaken at Crédit Agricole S.A. group level to promote gender equality at work, diversity and equal representation in management bodies;
- discussions with the Group Head of Compliance on the rolling out of the ethical culture and its assessment, including the updating of the Code of Ethics and the Code of Conduct.

6. After analysis by the Societal Commitment Committee:

- the review of the Vigilance Plan, which forms part of the report on corporate governance approved by the Board of Directors;
- the climate dashboard, which is a monitoring tool for Crédit Agricole Group's decarbonisation pathways;
- the 2025 Carbon budget, included in the financial budget;
- the adoption of "Electricity" and "Road transport" sectoral policies;
- the regulatory changes to be expected in environmental matters, in particular in connection with the "Omnibus" Directive.

7. Other issues examined by the Board included:

- the review of the annual statement to the UK authorities under the Modern Slavery Act;
- the authorisation of related-party agreements.

THE ROLE OF THE BOARD IN BUSINESS CONDUCT

See Chapter 3, part 1.3.7 "Appointments and Governance Committee", section "Conflicts of interest policy".

See also the "Code of Ethics of Crédit Agricole Group" and "Crédit Agricole S.A. Directors' Code of conduct" included in the Rules of procedures of the Board of Directors, which are available to consult at Crédit Agricole S.A.'s registered office and on its website: www.credit-agricole.com.

Regarding expertise of the Board of Directors in matters related to business conduct, see part 1.2.1.2 "Expertise of the Board of Directors".

1.2.2 EXECUTIVE GOVERNANCE

There are 18 members of the Executive Committee, listed below.

COMPOSITION OF THE EXECUTIVE COMMITTEE AT 1 OCTOBER 2025

Chief Executive Officer	Olivier GAVALDA
Deputy Chief Executive Officer	Jérôme GRIVET
Chief Executive Officer of Crédit Agricole CIB, Head of Large Customers division	Jean-François BALAY
Chief Executive Officer of Amundi	Valérie BAUDSON
Director of Technology Transformation and Chief Executive Officer of CA-GIP	Olivier BITON
Chief Executive Officer of Crédit Agricole Italia and Group Senior Country Officer in Italy	Hugues BRASSEUR
Chief Sustainability and Impact Officer	Éric CAMPOS
Chief Executive Officer of Crédit Agricole Assurances and Chief Executive Officer of Predica	Nicolas DENIS
Deputy General Manager, Head of Transformation, Human Resources and Transitions division	Grégory ERPHELIN
Corporate Secretary	Véronique FAUJOUR
Deputy General Manager, Head of Customer, Development and Innovation division	Gérald GRÉGOIRE
Deputy General Manager, Head of Finance and Steering Division	Clotilde L'ANGEVIN
Chief Executive Officer of LCL	Serge MAGDELEINE
Deputy General Manager, Head of International Banking and Services division and Chief Executive Officer of Crédit Agricole Personal Finance & Mobility	Stéphane PRIAMI
Group Head of Control and Audit	Laurence RENOULT
Group Head of Compliance	Hubert REYNIER
Group Human Resources Director	Anne-Catherine ROPERS
Deputy General Manager, Head of Risk division	Valérie WANQUET

The Executive Committee is made up of 6 women and 12 men, i.e. approximately 33% women and 67% men.

Within Crédit Agricole S.A., the **Executive Committee** manages the operational development of the guidelines defined by the Board of

Directors. To carry out its tasks of managing, controlling and monitoring impacts, risks and opportunities, the Executive Committee relies on existing committees, which have been given additional tasks and roles to meet the expectations of the CSRD.

The **ESG Strategy Committee** reviews the components of the ESG strategy and proposes them to the Board of Directors' Societal Commitment Committee for approval. Its tasks include approving sector-specific policies, monitoring the implementation of ESG commitments (including climate change, support for customer transitions and accessibility of products and services), decision making on sensitive issues, examining very high-risk areas in terms of CSR, providing information on ESG ratings and handling controversies. Within the framework of the CSRD, two tasks have been added to the ESG Strategy Committee's mandate: approving the double materiality analysis and the sustainability report for Crédit Agricole S.A. This committee meets every two months and is made up of the Chief Executive Officer of Crédit Agricole S.A., the Deputy Chief Executive Officer, the Deputy General Manager in charge of the Transformation, Human Resources and Transitions division, the Chief Sustainability and Impact Officer, the Chief Executive Officer of Crédit Agricole CIB, the Chief Executive Officer of Amundi, the Chief Executive Officer of Crédit Agricole Assurances, the Head of the Group Risk department, the Group Head of Compliance, and the Corporate Secretary of Crédit Agricole S.A.

Initially created in 2022, the **Climate Sponsor Committee** oversees work related to defining Net Zero pathways. Chaired by the Chairman of a Regional Bank, this committee is made up of the Chief Executive Officers of Crédit Agricole S.A.'s main subsidiaries, representatives of the Regional Banks and representatives of Crédit Agricole S.A. Meetings are currently held on a quarterly basis, but may change as required.

Lastly, the **Sustainable Finance Regulation Umbrella Committee** coordinates all projects relating to sustainable finance. Chaired by the Deputy General Manager in charge of the Finance and Steering division and made up of representatives of the Executive Management of the subsidiaries and business lines, this committee approves Group standards relating to the sustainable finance regulations and monitors their implementation. This committee meets every two months.

In addition, the Executive Committee is represented in each business line by a specialised committee, which is responsible for monitoring and validating the impacts, risks and opportunities within its scope, as well as overseeing the resulting policies, action plans and targets. These various committees are decision-making committees for their business lines and are generally chaired by the Chief Executive Officer, the Deputy Chief Executive Officer or the relevant Deputy General Managers. The main committees of the business lines concerned are as follows:

- Crédit Agricole S.A.'s **Group Compliance Management Committee** is involved in defining, rolling out and monitoring compliance policies in the areas of ethics, avoiding conflicts of interest, combating corruption, combating financial crime, protecting whistle-blowers and detecting market abuse. This body, which meets on a monthly basis, is regularly kept up to date on the effectiveness of these policies, incidents and developments, and is involved in the validation process;
- Crédit Agricole S.A.'s **HR policies** are monitored by decision-making bodies such as the **HR Directors' Committee** (which meets monthly) of Crédit Agricole S.A., which determines and approves Human Resources policies (see part 3.1.2 "Policies, action plans and resources mobilised as part of the HR policy", for more detailed information on this subject);
- the strategy and decisions affecting the Responsible Purchasing Policy are the responsibility of the **Strategic Purchasing Committee**, a cross-functional body at Group level. This body is composed of a Regional Bank Chairman, Chief Executive Officers of the subsidiaries of Crédit Agricole S.A. and Regional Banks, and representatives of the Fédération Nationale du Crédit Agricole (FNCA) and of Crédit Agricole S.A.;

- the **Group Security Committee** (CSG), which reports to the Executive Committee, is the umbrella body for security governance within the Group. This decision-making committee defines the security strategy and assesses the Group's level of control in the field of information systems security.

For this update of the double materiality analysis, the conclusions were validated by the Executive Committee of Crédit Agricole S.A.

1.2.3 METRICS RELATED TO MANAGEMENT BODIES

EQUALITY WITHIN THE ADMINISTRATIVE, MANAGEMENT AND SUPERVISORY BODIES

	2025	2024
Members of the Board of Directors		
Women	50%	44%
Men	50%	56%
Members of the Executive Committee		
Women	33%	29%
Men	67%	71%
Average ratio of women to men	0.71	0.59*

* 2024 ratio adjusted in 2025 following a change in scope.

PERCENTAGE OF INDEPENDENT DIRECTORS

	2025	2024
Share of independent Directors (as a %)	33	33

1.2.4 INTEGRATION OF SUSTAINABILITY-RELATED RESULTS IN INCENTIVE SCHEMES

CONTRIBUTION OF ESG PERFORMANCE TO THE PAY OF EXECUTIVE CORPORATE OFFICERS

Aligned with the undertaking's social interest, the reward policy for executive corporate officers takes into account the dimensions of sustainable performance beyond short-term economic results alone.

Since 2023, Crédit Agricole S.A. has set CSR criteria to account for 20% of the annual variable compensation of its executives.

The weighting of CSR criteria in the allocation of the annual variable compensation of executive corporate officers is harmonised for the Chief Executive Officer and the Deputy Chief Executive Officers and broken down as follows:

- 10% for criteria relating to Societal CSR;
- 10% for criteria relating to Environmental CSR.

For 2025, the non-financial CSR criteria were based on the "Ambitions 2025" Medium-Term Plan (MTP). From 2026 onwards, these criteria will be based on the targets of the new "ACT 2028" MTP. The weighting of environmental and societal performance remains unchanged for the allocation of annual variable compensation.

For 2025 and until the General Meeting of 14 May 2025, the Chief Executive Officer also benefited from a 20% weighting for a criterion relating to the management of the managerial transition.

GRANT CRITERIA APPLICABLE TO THE ANNUAL VARIABLE COMPENSATION FOR THE YEAR 2025

Until the General Meeting of 14 May 2025:

			Philippe Brassac, Chief Executive Officer	Olivier Gavalda, Deputy Chief Executive Officer	Jérôme Grivet, Deputy Chief Executive Officer	Xavier Musca, Deputy Chief Executive Officer
Financial criteria (60%)	Scope – Crédit Agricole S.A.	Net income Group share – Cost/income ratio, excl. SRF – Return on tangible equity (equally weighted)	60%	30%	60%	30%
	Universal Banking division	Net income Group share – Cost/income ratio, excl. SRF – Risk-weighted assets (equally weighted)	-	30%	-	-
	Large Customers division	Net income Group share – Cost/income ratio, excl. SRF – Risk-weighted assets (equally weighted)	-	-	-	30%
Non-financial CSR criteria (20%)	Societal CSR (10%)	Promote the inclusion of young people through employment and training (number of young people welcomed into the Crédit Agricole Group per year)	5%	5%	5%	5%
		Collective dynamics (Employee survey)	5%	5%	5%	5%
	Environmental CSR (10%)	80% growth in Crédit Agricole CIB's exposure to low-carbon energy by 2025	4%	4%	4%	4%
		Increase the production capacity of renewable energy installations that CAA helps to finance to 14 GW by 2025	3%	3%	3%	3%
		Improve the carbon footprint of Crédit Agricole S.A.	3%	3%	3%	3%
Other non-financial criteria (20%)	Customer Project			7%	5%	5%
	Digital and technological transformation			7%	5%	5%
	Risk and compliance management			6%	10%	10%
	Management of the managerial transition		20%			

As of the General Meeting of 14 May 2025:

				Olivier Gavalda, Chief Executive Officer	Jérôme Grivet, Deputy Chief Executive Officer
Metrics					
Financial criteria (60%)	Scope – Crédit Agricole S.A.	Net income Group share – Cost/income ratio, excl. SRF – Return on tangible equity (equally weighted)		60%	60%
Non-financial CSR criteria (20%)	Environmental CSR (10%)	Growth in Crédit Agricole CIB's exposure to low-carbon energy by 2025		4%	4%
		Increase production capacity of CAA's equity-financed renewable energy facilities by 2025		3%	3%
		Improve the carbon footprint of Crédit Agricole S.A.		3%	3%
	Societal CSR (10%)	Promote the inclusion of young people through employment and training (number of young people welcomed into the Crédit Agricole Group per year)		5%	5%
		Collective dynamics (new Accountability index)		5%	5%
Other non-financial criteria (20%)	Customer Project			8%	7%
	Digital and technological transformation			5%	4%
	Risk and compliance management			7%	9%

Since 2024, with regard to long-term variable compensation awarded in the form of free performance shares, based on performance measured in 2023, the vesting criteria also include a 33.33% target linked to Crédit Agricole S.A.'s environmental and societal performance, thus replacing the FReD index.

In line with the “Ambitions 2025” plan, this environmental and societal performance is measured against two targets:

- contributing to the achievement of carbon neutrality by 2050;
- amplifying diversity and gender parity across all Crédit Agricole S.A. entities and within its governance.

For plans allocated before 2023, the FReD indicator remains in force. This is a tool for the appropriation and operational application of the Group's CSR issues. Each year, an audit is carried out by an independent firm to ensure the robustness of the system and the reliability of the assessment. The results obtained determine the payment of part of the deferred variable compensation and the long-term variable compensation of certain executives and employees. In 2025, Crédit Agricole S.A.'s FReD index stood at 2.26, with a target of 1.3.

2025 VESTING CRITERIA APPLICABLE TO THE LONG-TERM INCENTIVE COMPENSATION

Metrics		Weighting
Financial performance	Net income Group share	33.3%
Stock market performance	Market price/Tangible book value per share	33.3%
Environmental and societal performance	Contributing to the achievement of carbon neutrality by 2050	75% reduction in CO ₂ emissions linked to oil and gas sector financing by 2030
		7.0%
		50% reduction in the CO ₂ intensity of the automotive sector financing portfolio by 2030
	Amplify diversity and gender parity across all Crédit Agricole S.A. entities and within its governance	7.0%
		58% reduction in the CO ₂ intensity of the power sector financing portfolio by 2030
		7.0%
		% women on the Executive Committee
		3.1%
		% of women in strategic talent pools
		3.1%
		% of women in Executive Management
		3.1%
		% international profiles in succession plans
		3.1%

Detailed information on rewards for corporate officers for the 2025 performance year, as well as all information relating to the approval and updating of the terms and conditions of incentive systems, is available in the Universal Registration Document in Chapter 3 “Corporate governance”, part 4.2.3.1 “Process of defining the reward policy” and part 4.2.3.2 “Functions involved in the process of defining the reward policy”.

1.2.5 STATEMENT ON DUE DILIGENCE

See Appendix 2: Consistency between the sustainability report and due diligence.

1.2.6 RISK MANAGEMENT AND INTERNAL CONTROLS OVER SUSTAINABILITY REPORTING

DESCRIPTION OF THE ROLES AND RESPONSIBILITIES INVOLVED IN PRODUCING THE SUSTAINABILITY REPORT

The Financial Communication department oversees the process of producing and approving the sustainability reports of the Crédit Agricole Group and Crédit Agricole S.A., notably by working with all contributors to draw up a macro production schedule.

In addition, the Financial Communication department coordinates relations with the Statutory Auditors involved in verifying the sustainability reports of Crédit Agricole S.A. and the Crédit Agricole Group.

The Sustainability and Impact department oversees the ESG strategy in relation to environmental and societal issues. In addition, the Sustainability and Impact department coordinates the double materiality assessment.

The Group's various central departments, business lines and sectors contribute to the production of the sustainability report. To this end, they are responsible for:

- defining CSRD policies and action plans specific to their themes (human resources, compliance, risks, purchasing, sustainability and impact, etc.);
- drafting narratives and producing metrics in response to regulatory requirements;
- leading the double materiality assessment within their business lines or divisions;
- implementing corrective action plans to improve data quality.

DESCRIPTION OF APPROVAL FOR THE SUSTAINABILITY REPORT PRODUCTION PROCESS

The committee structure inherent in the process of approving Crédit Agricole S.A.'s sustainability report is explained in detail in part 2.1 "Governance" of this sustainability report.

PERMANENT CONTROL STRUCTURE

DESCRIPTION OF THE MAIN FEATURES AND ELEMENTS OF THE RISK MANAGEMENT AND INTERNAL CONTROL PROCESSES AND SYSTEMS RELATED TO SUSTAINABILITY REPORTING

The permanent control system for sustainability reporting is currently being structured. The aim is to include:

- at the entity level: controls to be carried out by entities contributing to this information and/or issuing their own sustainability reports;
- at the Group level: controls to be carried out by the central departments contributing to the information, and controls to be carried out by the teams in charge of the quantitative parts of the reporting.

This system aims to monitor sustainability-related activities and the associated risks. It shall consider the specific characteristics of the organisation, the control system already in place, and procedures and operating methods.

DESCRIPTION OF THE APPROACH USED FOR RISK ASSESSMENT

Risks related to sustainability reporting, or their associated risk factors, are assessed as part of the operational risk mapping for processes that are sufficiently stable from an operational perspective. This process analysis approach is governed by a methodology that is common to the entire Group.

The operational risk mapping is carried out by the operational departments with a second review conducted by the second line of defence. The maps are updated at intervals that depend on the criticality level of the processes and when new activities and/or new products or significant events impact their activities (reorganisations, IT migration, possible outsourcing, changes in the consolidated supervisory scope). This assessment shall consider recorded or potential operational losses identified during incident reporting and their consequences; the results of controls and their evolution; the regulatory environment; the results of internal or external audits; and the implementation of action plans. This practice is carried out continuously throughout the year by each department, cross-disciplinary function and entity.

DESCRIPTION OF THE MAIN RISKS IDENTIFIED AND THEIR MITIGATION STRATEGIES

The main risks identified with regard to sustainability reporting are as follows:

- failure to meet internally defined production deadlines;
- failure to collect and update data;
- failure to analyse data and/or risks; and
- non-compliance with sustainability and due diligence regulations.

In order to limit the identified risks, an operational control and second-line review system oversees the production of the sustainability report. The control system currently being implemented will mitigate the main risks identified.

The main conclusions from the internal control system are communicated to the Internal Control Committee of the Accounting and Regulatory Information department for the aggregation of quantitative data. In the event of an alert, the Group system common to all types of risk applies, with possible escalation to the Executive Committee of Crédit Agricole S.A.

THE INVOLVEMENT OF INTERNAL CONTROL IN MANAGING RISKS RELATED TO SUSTAINABILITY REPORTING

The internal control framework for sustainability reporting is based on the same model as the framework applicable to other types of risk. It relies on each employee and involves the Group's three lines of defence:

- the first line of defence, made up of the operational business lines, performs first-level controls (controls 1 and controls 2.1);
- the second line of defence, made up of the Risk Management and Compliance business lines, performs second-level controls (controls 2.2.);
- the third line of defence, consisting of the Audit-Inspection business line, performs third-level controls (periodic control).

1.3. SUSTAINABILITY STRATEGY

1.3.1 STRATEGY, BUSINESS MODEL AND VALUE CHAIN

1.3.1.1 CRÉDIT AGRICOLE S.A.'S GENERAL STRATEGY AND BUSINESS MODEL

Guided by its Raison d'être, Crédit Agricole S.A. is rolling out its universal customer-focused banking model, which aims to meet the needs of all its customers, in all territories, via all distribution channels. Crédit Agricole S.A. offers a wide range of financial products and services structured by its five core business lines: Asset Gathering, Retail Banking, Specialised Financial Services, Large Customers, Specialised Activities and Subsidiaries.

The core business lines offer their products and services to their own customers – such as individual, SME, farmer, corporate and local authority customers – and to those of the retail banks, in the following areas:

- supporting and advising customers at every stage of their lives;
- providing financing, savings and insurance solutions;
- developing investment solutions;
- offering complementary services (payment instruments, real estate, mobility, health, etc.).

The products and services offered are summarised below:

- bank accounts and payment management;
- financing activities;
- individual and group insurance: savings/retirement, death & disability/borrower's insurance and property and casualty insurance;
- savings and investment solutions;
- consulting services;
- specialised services: leasing, factoring.

The products and services and target customers are described in more detail in Chapter 1 "About Crédit Agricole S.A.".

In order to put its sustainability strategy into practice, on 1 December 2021 the Crédit Agricole Group unveiled its Societal Project, embodying the social and environmental dimension of its strategic vision. This ambitious plan is built around three fundamental pillars, reflecting the Group's commitment to act in the interests of society.

Firstly, the Group is tackling the climate challenge by committing itself to promoting a low-carbon economy. It is positioning itself as a key player in the financing of the energy transition, developing its business lines to integrate the climate emergency aspect into all its activities and supporting innovative, environmentally responsible projects, while striving to reduce its carbon footprint.

Secondly, Crédit Agricole focuses on social cohesion and inclusion. It promotes access to banking services for everyone by developing initiatives to combat financial insecurity and strengthening its role as a retail bank. Lastly, the Crédit Agricole Group is committed to supporting agricultural and agri-food transitions. It supports innovation and competitiveness in these sectors, which are essential to the economy and food sovereignty, while promoting sustainable practices that respect the environment.

Through this Societal Project, Crédit Agricole reaffirms its role as a committed stakeholder, aware of its responsibilities towards society and determined to contribute actively to a more sustainable and inclusive future.

10 COLLECTIVE COMMITMENTS TO THE SOCIETAL PROJECT

Taking action for climate and transition to a low carbon economy

- ▶ **#1** Contribute to carbon neutrality by 2050 through our own footprint and our investment and financing portfolios
- ▶ **#2** Advise and support all of our customers in their energy transition
- ▶ **#3** Integrate non-financial performance criteria into the analysis of 100% of our financing to undertakings and farmers

Strengthening cohesion and social inclusion

- ▶ **#4** Offer a range of products and services that do not exclude any customer, in order to foster social and digital inclusion and adapt to economic and societal changes
- ▶ **#5** Help to revitalise the most vulnerable regions and reduce social inequalities
- ▶ **#6** Promote the integration of young people through employment and training
- ▶ **#7** Increase gender parity and diversity across all Crédit Agricole entities and within its governance

Accomplish agricultural and agri-food transitions

- ▶ **#8** Support the evolution of techniques towards a competitive and sustainable agri-food system
- ▶ **#9** Enable French agriculture to contribute actively to the fight against climate change
- ▶ **#10** Contribute to strengthening food sovereignty

Crédit Agricole S.A.'s sustainability strategy is part of the Group's Societal Project and fully integrates its utility and universality ambition: to make progress accessible to everyone and support the major societal transformations. 2025 marked the culmination of "Ambitions 2025", through which Crédit Agricole S.A. expressed its commitment to being useful to society and defined its multi-year roadmap. This encourages the convergence of short- and medium-term issues with long-term issues and allows Crédit Agricole S.A. to pursue its development path by creating sustainable value for its customers and society.

In this way, Crédit Agricole S.A. supports all its customers in environmental transitions (energy, housing, mobility, etc.) and societal transitions (inclusion, health and ageing well, etc.) through all its product and service ranges. The sustainability strategy is based on five pillars:

- governance dedicated to the Societal Project strategy and its implementation;
- compliance in the interest of customers and society;
- an environmental strategy based on scientific facts;
- a social strategy driven by utility and universality;
- a support strategy for the agricultural and agri-food sectors.

Crédit Agricole has presented its new Medium-Term Strategic Plan, ACT 2028, which lays the foundations for its ambitions for the future as a leading bank in Europe, a leader in new technologies and a leader in transitions. The priorities of the Societal Project were updated in 2025 within this framework, defined following a collaborative effort involving Crédit Agricole S.A.'s central departments and the Group entities, and made public on 18 November 2025. They illustrate Crédit Agricole's reaffirmed ambition to lead the transition through two commitments:

- **to be a leader in the environmental transition economy:** Crédit Agricole has reaffirmed its Net Zero pathways and strengthened its Climate strategy. The Group aims to develop the widest range of responsible investments on the market and to position itself as a major player in climate change adaptation. Finally the Group innovates by launching two initiatives in favor of nature ⁽¹⁾;

- **to amplify its impact in order to support regional vitality and a "just transition":** the Group aims to establish itself as the leader in access to sustainable housing in France, while taking concrete actions that allow everyone to access essential services locally (health, mobility and renewable energy). True to its identity, Crédit Agricole continues to support the agricultural and agri-food transitions.

The Group will roll out its ambition for the 2026-2028 period, with a commitment structured around five quantitative metrics, which will be monitored from 2026 onwards. These metrics embody the Group's desire to place sustainability at the heart of its business in order to best serve its customers. Crédit Agricole S.A. is thus leveraging its role as a major banking and insurance player in both Europe and worldwide to support the environmental and societal transitions at the heart of the regions:

Metrics	Unit	2028 target	Entities concerned	Geographical coverage	Categories of customers involved
Green-brown ratio ⁽¹⁾	Ratio	90/10	Crédit Agricole Group	Global	All
Financing of environmental and social transitions ⁽²⁾	€bn	240	Crédit Agricole Group	Global	All
Corporate and Investment Banking revenues related to sustainable finance ⁽³⁾	€m	1,000	CACIB	Global	Corporates
Supported housing undergoing energy renovations	Number	600,000	CAPFM CAT&E	France	Individuals
Net inflows in retirement savings	€bn	75	Amundi	Europe	All

⁽¹⁾ Share of exposure to low-carbon energy vs. share of exposures linked to fossil fuel extraction (oil, gas, coal).

⁽²⁾ Financing of the environmental transition, financing of social inclusion and general financing of transitions.

⁽³⁾ Any transaction with a sustainable financing structure in line with market and Group standards.

ESSENTIAL INTANGIBLE RESOURCES

In order to meet the regulation ⁽²⁾, the Group defines essential intangible resources as those resources that do not have a physical substance on which the business model of the undertaking is fundamentally dependent and which are a source of value creation for the undertaking. Crédit Agricole Group approaches this topic in particular from the perspective of the added value created by its employees, amplified by its organisation:

- **Added value by employees:** Crédit Agricole Group considers that the added value of its employees is based on the depth of their expertise, the variety of their experiences and their behavioural skills (interactions with customers and colleagues) and the

responsibility exercised in proximity. In this capacity, it invests in a dynamic and innovative way to ensure their continuous development. For more information on this subject, see the Human Capital Development Policy in part 3.1.2.1 of this report;

- **The added value of the organisation carried by the collective:** by accelerating the managerial and cultural transformation through the Human Project, which puts human responsibility at the heart of its actions, the organisation set up by Crédit Agricole Group amplifies its usefulness towards its clients (Client Project) and society (Societal Project) and optimises its *Raison d'Être* "Working every day in the interest of our customers and society".

⁽¹⁾ CA Capital Naturel and a Climate & Nature Force

⁽²⁾ Article L. 232-1 amended by Order No. 2023-1142 of 6 December 2023 – Article 8.

BREAKDOWN OF REVENUES BY CONTROVERSIAL SECTORS

Crédit Agricole S.A. does not record any direct revenue from activities related to fossil fuels, chemicals, controversial weapons, tobacco within the scope of its Own Operations (production, marketing, etc.) that is to say excluding financing, investment and insurance activities.

1.3.1.2 CRÉDIT AGRICOLE S.A.'S VALUE CHAIN

Crédit Agricole S.A. operates in three main areas of activity: financing, investment and insurance. For all products and services, each area covers the design, marketing and distribution of offerings all the way to their use by end customers.

Crédit Agricole S.A. uses a variety of distribution channels to offer a wide range of services to its extensive customer base. Physical

branches provide direct, personalised contact with advisors. Online platforms and mobile applications are also channels for distributing products and services to all types of customers.

To ensure the smooth running of its business, Crédit Agricole S.A. uses suppliers in three main areas, namely property purchases, purchases of services, and IT hardware and software.

Activities related to financing, investment and insurance constitute Crédit Agricole S.A.'s value chain. This is illustrated in the diagram below, which shows the subsidiaries operating in each business division:

		FINANCING	INVESTMENT	INSURANCE	OWN OPERATIONS ⁽¹⁾
	ASSET GATHERING	Amundi	●		
		Crédit Agricole Assurances	●	●	
		CA Indosuez	●		
	RETAIL BANKING	LCL	●		
		International retail banks	●		
	SPECIALISED FINANCIAL SERVICES	Crédit Agricole Personal Finance & Mobility			
		Crédit Agricole Leasing & Factoring			
	LARGE CUSTOMERS	Crédit Agricole CIB	●		
		CACEIS	●		
	CORPORATE CENTRE	Crédit Agricole S.A. Parent Company	○	○	○
		IDIA & CACIF	●		
		Crédit Agricole Payment Services			●
		CA-GIP			●

		Crédit Agricole Transitions & Energies	●		
		Crédit Agricole Santé & Territoires			
		Crédit Agricole Immobilier			●

(1) Own operations correspond to other Group activities such as real estate management and IT.

○ As the parent company, Crédit Agricole S.A. Parent Company steers the financing, investment and insurance activities, but these are carried out by its subsidiaries.

1.3.2 INTERESTS AND VIEWS OF STAKEHOLDERS

1.3.2.1 CRÉDIT AGRICOLE S.A.'S MAIN STAKEHOLDERS

Crédit Agricole S.A.'s main stakeholders are as follows:

- customers (individuals, farmers, SMEs, entrepreneurs, undertakings, associations and public institutions);
- civil society and the general public;
- employees (including interns and work-study students), social partners and employee representative bodies;
- suppliers;
- shareholders, investors and rating agencies;
- public, regulatory and supervisory authorities.

Crédit Agricole S.A. interacts with these stakeholders throughout its value chain, as shown below:

(1) Various activities are carried out with undertakings through the management of asset portfolios or direct investment such as private equity.

1.3.2.2 CHALLENGES AND ORGANISATIONAL ARRANGEMENTS FOR CRÉDIT AGRICOLE S.A.'S COOPERATION WITH ITS STAKEHOLDERS

Crédit Agricole S.A. engages in ongoing dialogue with its stakeholders at all levels. These discussions foster understanding of each stakeholder's expectations and interests and enable Crédit Agricole S.A. to provide appropriate responses in the short-, medium- and long-term. They also allow Crédit Agricole S.A. to

understand the expectations and priorities that stakeholders may have with regard to its strategy and positioning. All Crédit Agricole S.A. subsidiaries and central departments contribute to this effort.

The table below presents the main challenges and expectations associated with each stakeholder, Crédit Agricole S.A.'s responses and the mechanisms implemented to interact with its stakeholders:

Key stakeholder challenges	Answers provided	Mechanisms implemented
CUSTOMERS		
<ul style="list-style-type: none"> Proposing solutions that serve the interests of customers and society Protecting customers and securing their life paths Ensuring a customer-centric omnichannel relationship, where human responsibility brings trust, discernment and situational intelligence 	<ul style="list-style-type: none"> Customer satisfaction-driven management Offers tailored to all customer profiles: from entry-level to wealth management, from VSB to large corporates Services accessible independently (websites and applications) and/or through responsible and committed representatives Comprehensive approach addressing customers' main needs Personalised customer support: expertise, advice and customisation Customers have full control over their data, in accordance with the Group's Personal Data Use Charter 	<ul style="list-style-type: none"> Customer feedback systems and satisfaction monitoring (measured by the Net Promoter Score) Barometers, marketing studies and co-construction workshops: biannual survey on changes in stakeholder expectations, annual barometer on the perception of CSR expectations among 2,500 customers and non-customers Innovation ecosystem (Data Lab, La Fabrique by CA, etc.)
CIVIL SOCIETY AND THE GENERAL PUBLIC		
<ul style="list-style-type: none"> Financing the economy and its players Contributing to economic development and local employment Generating a positive impact on the environment and society Supporting social inclusion and integration 	<ul style="list-style-type: none"> All Crédit Agricole S.A. business lines have joined the financial sector's Net-Zero alliances Membership of numerous "responsible" initiatives such as the Principles for Responsible Banking, Principles for Responsible Investment and Principles for Sustainable Insurance Support for culture, sports and solidarity through sports sponsorships and the "Sports as a School of Life" programme Youth programme welcoming 50,000 young interns and work-study students Grameen Crédit Agricole Foundation promoting economic development in rural areas of emerging countries. 	<ul style="list-style-type: none"> Scientific Committee of 10 external members providing guidance on environmental strategy Regular dialogue and exchanges with NGOs, particularly on climate strategy, deforestation and human rights CSR barometer Annual "Societal Commitment Index" survey of 5,000 people to assess perceptions of Crédit Agricole S.A.'s societal commitment in its environment Participation in national and international market initiatives, trade shows and events Media relations and social media presence Analysis and handling of controversies concerning (directly or indirectly) Crédit Agricole S.A.

<ul style="list-style-type: none"> Ensuring the transparency, reliability, clarity and comparability of information Implementing responsible governance practices Implementing prudent risk management 	<ul style="list-style-type: none"> Regular dialogue with investors and analysts through conferences and roadshows (in particular regarding equity, debt and governance) Publication of quarterly results, Universal Registration Document and Integrated Report Dedicated telephone number for individual shareholders Shareholder meetings in the regions where the Regional Banks are located 	<ul style="list-style-type: none"> Regular meetings between Crédit Agricole S.A.’s Executive Management, Financial Communication department, and investors and analysts Relationships established with financial and non-financial rating agencies Dialogue with individual shareholders: Shareholders’ Club, Liaison Committee, shareholder meetings, monthly newsletters, Annual General Meeting
PUBLIC, REGULATORY AND SUPERVISORY AUTHORITIES		
<ul style="list-style-type: none"> Complying with regulations Implementing control mechanisms Promoting a culture of ethics and compliance Acting in the interests of customers and society Ensuring transparency towards all stakeholders Implementing anti-corruption measures Developing a framework for climate and environmental risks, as well as reputational risk 	<ul style="list-style-type: none"> Ongoing dialogue with the European Central Bank and the French Regulatory and Resolution Supervisory Authority (ACPR) and participation in stress tests Publication of financial and non-financial results Publication of all regulatory reports and preparation of documents for the supervisory authorities Implementation of an internal reporting tool Cessation of activities in non-cooperative states and territories Limitation of activities relating to countries and sectors posing a risk to financial security Launch of operational projects relating to recent or future regulatory changes 	<ul style="list-style-type: none"> Maintaining regular communication with banking and financial supervisory and regulatory authorities Participation in market consultations

The results of the main measures implemented are regularly presented by the central departments responsible for them to Crédit Agricole’s executive and non-executive governance bodies: the Executive Committee, the Board of Directors and cooperative bodies. This gives the governance bodies a clear picture of the expectations and challenges specific to each category of stakeholder, which informs decision-making on Crédit Agricole S.A.’s sustainability policies.

The governance bodies were informed of the interests and views of stakeholders through presentations of:

- the detailed results of the new Trus Index, enabling members of the governance bodies to assess the priorities expressed by employees;
- results of the Net Promoter Score;
- the annual study on the Societal Commitment Index, which measures the perception of Crédit Agricole’s CSR commitments by customers, employees and the general public;
- the annual review of controversies.

1.3.2.3 PURPOSE AND IMPACT OF CRÉDIT AGRICOLE S.A.'S COOPERATION WITH ITS STAKEHOLDERS

Discussions with stakeholders allow Crédit Agricole S.A. to become aware of and understand their respective priorities, and to incorporate their expectations into its strategic thinking and sustainable development strategy.

The main findings of stakeholder feedback systems are regularly shared with the executive and non-executive governance bodies of Crédit Agricole S.A., its functions and its business lines. In 2025, these systems helped inform the discussions held as part of the definition of Crédit Agricole S.A.'s new Medium-Term Plan: "ACT 2028".

Listening to customers allows Crédit Agricole S.A. to assess the effectiveness of its customer relations by responding to their various needs and expectations. Customer feedback on CSR questionnaires helps Crédit Agricole to understand their expectations and to adopt a continuous improvement approach. The feedback obtained via the CSR barometer enables Crédit Agricole S.A. to define sustainability priorities for its customers.

Ongoing cooperation between Crédit Agricole S.A. and its employees aims to share Crédit Agricole's strategy while gathering the priorities, expectations and needs of employees. These discussions give employees the opportunity to bring attention to the difficulties and problems they encounter, leading to concrete, tailored actions to resolve the latter and support employees.

Crédit Agricole S.A.'s relationship with investors allows it to receive ongoing feedback from the market as well as on how investors perceive its strategy and actions.

Crédit Agricole S.A. is aware that the performance of its supply chain depends on solid relations with its suppliers. It therefore

encourages transparent, ongoing dialogue with its suppliers, taking into account feedback from the annual surveys it sends them, with a view to continuous improvement. This collaborative approach streamlines the process and ensures the satisfaction of each stakeholder. Crédit Agricole is also committed to clearly sharing its strategy and ambitions with its suppliers so that they can help it achieve its targets in the field of purchasing.

1.3.3 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

PRESENTATION OF IMPACTS, RISKS AND OPPORTUNITIES

The ESRS break down impacts, risks and opportunities into two components:

- the actual or potential positive and negative sustainability impacts of the undertaking's operations. This corresponds to impact materiality;
- the financial risks and opportunities generated by the undertaking's economic, social and natural environment. This corresponds to financial materiality.

Double materiality is a concept designed to combine financial materiality with impact materiality, as part of the assessment of an undertaking's performance.

The issues that emerge as material from Crédit Agricole S.A.'s second double materiality assessment are presented in the table below. As in 2024, the analysis is inconclusive on "Nature" themes, as specified in part 1.4.1.3 "Description of the process to identify and assess material impacts, risks and opportunities related to other environmental issues".

Standard	Topic	Impact materiality		Financial materiality	
		Positive impacts (number)	Negative impacts (number)	Risks (number)	Opportunities (number)
ESRS E1: Climate change	Climate change	1	1	3	1
	Operating environmental footprint		1		
	Support for customer transitions			2	1
ESRS S1: Corporate workforce	Attractiveness, talent retention and employee engagement			1	2
	Skills management	1			
	Human rights, health and safety	3		1	
	Social dialogue			1	
	Diversity and inclusion			2	
ESRS S4: Consumers and end-users	Accessibility and adaptation of offerings and social cohesion	1	2		
	Customer protection	1		1	
	Personal data protection			2	
	Protection of whistle-blowers			1	
ESRS G1: Business conduct	Business ethics and combating corruption		1	1	
	Responsible purchasing		1	1	
	Duty of vigilance towards suppliers			1	
Specific to Crédit Agricole	Combating financial crime and conflicts of interest			2	
	Cybersecurity		1		1

The list of material impacts, risks and opportunities has been grouped into themes, which are presented below. In addition, similar tables detailing their nature (positive or negative impact, risk, opportunity) and their position in the value chain are presented in the thematic parts of the report. The determination of material risks under the CSRD does not follow the same approach as for the Risk Factors presented in Chapter 4 of the Universal

Registration Document. These two regulatory measures have different objectives. The regulatory framework for risk factors is specifically designed to inform investors about the risks inherent in holding securities issued within Crédit Agricole S.A. This may result in differences in terms of identified risks between the Sustainability Report and the Risk Factors.

Topic	List of IROs	Time horizon	Reference in the report
ENVIRONMENT			
Support for customer transitions	Contribution to commercial development and improvement of the Group's image through its strong commitment to climate action	Long-term	2.1. Governance 2.2.1. Transition plan for climate change mitigation 2.3. Actions and resources in relation to climate change policies
	Reputational risk in the event of a lack of transparency or misleading communication on climate issues	Short-term	2.2.3. Material impacts, risks and opportunities and their interaction with the strategy and business model
	Risk of increased costs for the Group due to the investments required to transform its business model in order to decarbonise its activities and boost its resilience (data purchases, investments, resources, systems, limitation of certain activities)	Long-term	2.3. Actions and resources in relation to climate change policies
Climate change	The Group's positive impact on the climate through financing, investment and insurance activities contributing to the transition: dedicated loans and financing, committed financial savings, climate insurance products	Long-term	2.3. Actions and resources in relation to climate change policies
	Physical risk factors related to climate change that affect the bank's risks (credit, financial, operational)	Long-term	2.2.3. Material impacts, risks and opportunities and their interaction with the strategy and business model
	Transition risk factors related to climate change that affect the bank's risks (credit, financial, operational)	Medium-term	2.2.3. Material impacts, risks and opportunities and their interaction with the strategy and business model
	Negative impact of the Group's activities (investment, financing, insurance) on climate change	Long-term	2.3. Actions and resources in relation to climate change policies
	Regulatory and reputational risk related to the Group's activities that contribute to climate change	Invariable	2.2.3. Material impacts, risks and opportunities and their interaction with the strategy and business model
	Development of new services and solutions to support customers' transition to a low-carbon economy	Medium-term	2.2.1. Transition plan for climate change mitigation 2.3. Actions and resources in relation to climate change policies 2.4.1. Climate change mitigation targets
Operating environmental footprint	Negative impact of the operating footprint on the climate	Long-term	2.2.1. Transition plan for climate change mitigation 2.3.4. operating footprint 2.3.5. Voluntary contribution to carbon neutrality

Topic	List of IROs	Time horizon	Reference in the report
SOCIAL			
Accessibility and adaptation of offerings and social cohesion	Negative impact on certain categories of customers due to a lack of transparency and clarity in offerings (leading to exclusion and financial insecurity for the customers concerned)	Short-term	3.2.2.1. Accessibility of products and services Support for vulnerable populations and prevention of overindebtedness
	Negative impact on certain categories of customers caused by unsuitable offerings and/or the refusal of customer requests (exclusion, precariousness)	Short-term	3.2.2.1. Accessibility of products and services Support for vulnerable populations and prevention of overindebtedness
	Positive impact on the economically disadvantaged and/or people with disabilities due to accessible and inclusive offerings	Short-term	3.2.2.1. Accessibility of products and services Support for vulnerable populations and prevention of overindebtedness
Attractiveness, talent retention and employee engagement	Improving attractiveness through ambitious and innovative ESG practices	Invariable	3.1.1.1. The Human Project, a major driver of Crédit Agricole S.A.'s ambitions.
	Increased overall performance, employee retention, thanks to ambitious career and skills development policies	Invariable	3.1.2.1. Human capital development policy Human capital development policy
	Risks to employee attractiveness, retention and engagement due to the compensation policy and employee benefits	Invariable	3.1.2.1. Human capital development policy Human capital development policy
Social dialogue	Risks to the Group's image or overall performance due to a deteriorated social climate/dialogue	Invariable	3.1.2.2. Social dialogue
Diversity and inclusion	Internal and external image and reputational risk due to inadequate diversity and inclusion policies or discriminatory practices	Invariable	3.1.2.3. Diversity
	Risks associated with not knowing employee characteristics	Invariable	3.1.2.3. Diversity Diversity policy
Human rights, health and safety	Image and reputational risk in the event the health and safety of employees are endangered or human rights are not respected	Invariable	3.1.2.4. Working environment policy
	Improving employee health and safety through proactive work/life well-being policies	Invariable	3.1.2.4. Working environment policy Working environment policy
	Positive impact on employees in the event of social protection practices that are better than statutory practices	Invariable	3.1.2.4. Working environment policy Management of impacts, risks and opportunities
	Positive impact of sound practices on employees' rights to freedom of association and collective bargaining	Invariable	3.1.2.2. Social dialogue
Skills management	Positive impact on employees through good talent management and the implementation of ambitious skills development policies	Invariable	3.1.2.1. Human capital development policy
Customer protection	Regulatory risk related to products and services that are insufficiently adapted to customer needs and circumstances (banking inclusion, product governance)	Medium-term	3.2.2.3. Customer protection
	Positive impact on society related to products and services that are adapted to customer needs and circumstances (banking inclusion, product governance), contributing to social cohesion	Medium-term	3.2.2.4. Personal data protection
Personal data protection	Reputational risk in the event of leaks, theft or inappropriate use of personal data	Medium-term	3.2.2.4. Personal data protection
	Regulatory risk related to non-compliance with personal data protection regulations	Medium-term	3.2.2.4. Personal data protection

Topic	List of IROs	Time horizon	Reference in the report
GOVERNANCE			
Responsible purchasing	Reputational risk and regulatory risk in the case of non-responsible purchasing practices by the Group towards its suppliers, particularly as regards payment terms	Invariable	4.2.1.3. Impacts, risks and opportunities
	Negative impact on suppliers in the case of non-responsible purchasing practices by the Group, particularly as regards payment terms	Invariable	4.2.1.3. Impacts, risks and opportunities
Duty of vigilance towards suppliers	Reputational risk and regulatory risk in the case of accountability of the Group following an environmental, social or ethical breach – particularly in terms of corruption – by its suppliers	Invariable	4.2.1.3. Impacts, risks and opportunities
Business ethics and combating corruption	Regulatory risk in the event of non-compliance with the regulations and the expectations of the supervisory authorities in terms of business ethics and combating corruption	Invariable	4.1.4.1. Promoting an ethical culture 4.1.4.3. Combating corruption
	Negative impact on the living conditions of customers or stakeholders in the event of unethical practices (e.g. corruption)	Invariable	4.1.4.1. Promoting an ethical culture 4.1.4.3. Combating corruption
Protection of whistle-blowers	Regulatory and reputational risk in the event of the failure of the whistle-blower system for reporting unethical internal practices	Invariable	4.1.4.4. Protection of whistle-blowers
SPECIFIC			
Cybersecurity	Negative psychological impact or impact on daily life (such as identity theft) resulting from a breach of our customers' data protection	Long-term	3.2.2.2. Cybersecurity and combating cybercrime
	Financial risk following an inability to provide essential services and the associated operational cost to remedy the situation	Long-term	3.2.2.2. Cybersecurity and combating cybercrime 3.2.2.2.5. Action plans/measures for cyber incidents and business continuity plan
Combating financial crime and conflicts of interest	Regulatory risk in the event of failure to comply with the obligations in terms of combating financial crime	Invariable	4.1.4.5. Combating financial crime
	Regulatory risk in the event of insufficient detection of conflicts of interest and market abuse (market integrity)	Invariable	4.1.4.2. Avoidance of conflicts of interest 4.1.4.6. Avoidance of market abuse

POSITION IN THE VALUE CHAIN AND ACTIVITIES

Material impacts, risks and opportunities (IROs) are mainly cross-cutting among all financing, investment and insurance activities. Due to Crédit Agricole S.A.'s business model, climate IROs are mainly downstream of the value chain, with the exception of issues related to the operating footprint. Social IROs are divided between the own operations, for issues relating to the undertaking's own staff, and downstream for those relating to customers. Finally, governance-related impacts, risks and opportunities are upstream for issues relating to purchasing, and downstream/own operations for compliance issues.

EFFECTS ON THE BUSINESS MODEL, VALUE CHAIN, STRATEGY AND DECISION-MAKING PROCESS

The identified material impacts, risks and opportunities influence Crédit Agricole S.A.'s business model, value chain and strategy in different ways.

Regarding the current and future effects of climate change, climate and energy transition issues are likely to have an effect on the business model. In order to control these current and future effects, Crédit Agricole S.A. has undertaken an analysis of its portfolio of activities and defined targets for the reduction of funded emissions (in absolute or intensity) in high-emission sectors. At the same time, Crédit Agricole S.A. has identified levers to promote financing and investment in sectors aligned with sustainability targets. These adjustments to the strategy help meet growing stakeholder expectations and new regulatory requirements, while strengthening the business model's resilience to transition risks. In the medium and long term, the evolution of customer behaviour towards more sustainable solutions, as well as the intensification of regulatory constraints, should continue to influence Crédit Agricole S.A.'s strategic priorities. Climate issues are integrated into strategic decisions through a strengthened governance framework, as described in part 1.2 "Sustainability Governance".

Regarding the social issues related to employees and customers, their effects are considered to be controlled thanks to robust and proven policies implemented by Crédit Agricole S.A. (see part 3 "Social responsibility"). So these topics do not, to date, lead to any change in the business model, value chain or medium-term strategy.

STRATEGIC ACTIONS OR PLANS TO MANAGE IMPACTS, RISKS AND OPPORTUNITIES

Action plans covering all activities have been put in place. On the environmental front, climate change policies and actions strengthen Crédit Agricole S.A.'s ability to manage these challenges. On the social front, HR policies and actions (human capital development, social dialogue, diversity, working environment, and performance and pay) promote inclusion and well-being. In terms of governance, policies and actions (ethics, protection of whistle-blowers, anti-corruption, data protection, financial crime, market abuse and management of conflicts of interest) ensure rigorous compliance with regulations. In terms of purchasing, Crédit Agricole S.A. manages supplier relationships and payment practices responsibly. These plans are continually adjusted in line with market trends and stakeholder expectations.

EFFECTS OF IMPACTS ON THE ENVIRONMENT AND SOCIETY

The effects of impacts on the environment and society are described in the thematic sections of this report. To date, there is no evidence linking Crédit Agricole S.A.'s strategy and business

model directly to negative impacts on the environment. However, the Group's activities may have an impact on the climate (in gross terms and before taking into account the policies and action plans implemented) through the sectors it finances.

As far as society is concerned (the corporate workforce, customers and suppliers), the impact of Crédit Agricole S.A.'s strategy and activities is already tangible.

FINANCIAL EFFECTS OF RISKS AND OPPORTUNITIES ON THE FINANCIAL POSITION AND CASH FLOWS

The financial materiality analyses conducted by Crédit Agricole Group on the impact of physical and transition risks did not identify these risks as significant in the context of the resilience analysis.

RESILIENCE OF THE STRATEGY AND BUSINESS MODEL

The resilience of Crédit Agricole S.A.'s strategy and business model is based on its ability to anticipate and adapt to environmental, social and governance risks and impacts. To address significant risks and seize opportunities, policies and action plans have been put in place, as mentioned in part 2.3 "Actions and resources in relation to climate change policies" on strategic plans and actions to manage impacts, risks and opportunities. These policies and actions cover key areas such as climate change, management of relationships with suppliers, diversity and inclusion, and ethical governance. These plans are continually adjusted in line with market trends, stakeholder expectations and new regulations, ensuring resilience in the short-, medium- and long-term.

A more detailed analysis of climate change is available in part 2.2.2 "Material impacts, risks and opportunities and their interaction with the strategy and business model".

SIGNIFICANT MATERIALITY DIFFERENCES WITH THE ENTITIES

As mentioned in part 1.4 "Management of impacts, risks and opportunities", the double materiality assessment was conducted on the basis of the ratings of the companies contributing to the double materiality exercise. At the end of this exercise, material differences could be observed between the materiality at Crédit Agricole S.A. level and that of certain companies, similar to those identified in the 2024 financial year. These differences are not considered material and do not impact materiality at the Crédit Agricole S.A. level, as they do not impact materiality at the standard level. However, three IROs were classified as material in contrast to Crédit Agricole S.A., requiring specific measures within these entities to manage them (an opportunity and a negative impact in relation to ESRS E5 for Crédit Agricole Assurances, an opportunity in relation to ESRS S3 for Crédit Agricole Italia):

- circular economy: for Crédit Agricole Assurances, the circular economy is linked to its claims management activity. Crédit Agricole Assurances encourages the reuse of recycled parts and repairs. This has no impact on Crédit Agricole S.A.'s position on the circular economy;
- affected communities: for Crédit Agricole Italia, the theme of affected communities is linked to the integration of social criteria in its products and services and to foundations that hold a significant share of its capital. This has no impact on Crédit Agricole S.A.'s position on affected communities.

CA Auto Bank also estimated ESRS E2 (Pollution) to be material in relation to its automotive financing activities. This has no impact on Crédit Agricole S.A.'s position on pollution.

1.4. MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

1.4.1 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

1.4.1.1 GENERAL DESCRIPTION

In accordance with sustainability standards, the double materiality practice determines the information to be disclosed in the sustainability report by identifying material impacts, risks and opportunities (IROs). The scope of analysis encompasses Crédit Agricole S.A.'s own operations (consolidated scope) and the value chain (upstream/downstream). The analysis focuses on two dimensions: impact materiality (how Crédit Agricole S.A.'s activities impact its stakeholders or the environment) and financial materiality (how sustainable development issues affect Crédit Agricole S.A. and its financial performance). An IRO is material when at least one of its two dimensions is material.

Crédit Agricole S.A.'s materiality analysis methodology is the responsibility of the Sustainability and Impact department. It is developed in collaboration with the Group Risk department, the Compliance department, the Group Purchasing department and the Group Human Resources department, which are the major contributing departments. This methodology applies to all entities contributing to the double materiality ⁽¹⁾ practice.

The list of impacts, risks and opportunities (IROs) is defined and updated annually by Crédit Agricole S.A.'s central departments (Sustainability and Impact, Risk, Compliance, Human Resources, Purchasing, Public Affairs, Technological Transformation) by capitalising on the internal processes in place within Crédit Agricole S.A. (Operational risk mapping, duty of vigilance, work carried out on risks in line with ECB expectations, etc.) and taking into account activities (financing, investment and insurance), the value chain and the regulatory environment in which Crédit Agricole S.A. operates. Certain risks have been detected on the basis of the impacts identified (e.g. a reputational risk may arise from the negative impact of Crédit Agricole S.A.'s activities on climate) and of the analysis of dependencies on the subjects covered by the ESRs (e.g. Crédit Agricole S.A.'s exposure to sectors that may be disrupted by the impacts of climate change, leading to the identification of a physical risk on the topic of climate change). The list of IROs covers the ESRs and the specific topics identified by Crédit Agricole S.A., and may be updated to take into account any changes in the context, regulations or scope of the ESRs in future financial years.

The ESRs set out the criteria to be considered in measuring materiality.

Negative impacts are rated according to two dimensions:

- **probability** (for potential impacts only);
- **severity**, which is made up of:
 - scale: degree of the negative impact on people or the environment,
 - scope: geographical scope of the number of people or the environment affected by the impacts,
 - irremediability: whether and to what extent the negative impacts can be remedied.

Positive impacts are rated according to two dimensions:

- **probability** (for potential impacts only);
- **severity**, which is made up of:
 - scale: degree of the positive impact on people or the environment,
 - scope: geographical scope of the number of people or the environment affected by the impacts.

Risks and opportunities are rated according to two dimensions:

- **probability**;
- potential **scale** of financial effects.

There is no standard rating scale set out by the ESRs. They have been defined using the scales that already exist within Crédit Agricole S.A. as a basis, as far as possible. The probability and scale of financial effects are thus aligned with the scales used in risk mapping. These scales are applied by the entities, adapting them to their size or threshold.

Once the rating for each impact, risk or opportunity criterion has been finalised, a materiality score is calculated for each IRO ⁽²⁾ and compared with Crédit Agricole S.A.'s materiality threshold. The materiality threshold ⁽³⁾ is the point at which the impacts, risks and opportunities are material. It should be noted that IROs are not prioritised in any way other than material/non-material.

In operational terms, each company contributing to Crédit Agricole S.A.'s double materiality practice rates the IROs within its scope, complying with rating scales and relying as far as possible on existing processes within its entity (operational risk mapping, duty of vigilance, etc.) or using external studies (IPCC Report, ECB Guide, ESMA studies, Banque de France, etc.) and consulting internal operational experts (on climate, nature, purchasing, compliance, cybersecurity, etc.). The 2025 rating exercise also drew on the results of Crédit Agricole's annual CSR barometer. This barometer identifies the main CSR expectations expressed by a sample of 2,500 customers and non-customers. The results of this study reinforced Crédit Agricole S.A.'s analysis of the most material issues. The results are then validated by the governance of each entity and sent to Crédit Agricole S.A., which consolidates the feedback and reviews the results.

The ratings are then critically reviewed by all the Crédit Agricole central departments that took part in the rating exercise. The central departments then determine the materiality at the Crédit Agricole S.A. level on the basis of an expert assessment of company ratings. The results are then validated by the ESG Strategy Committee.

(1) Companies exceeding a consolidated balance sheet threshold of €5 billion and forming part of the value chain defined by Crédit Agricole S.A.: Amundi, Crédit Agricole CIB, Crédit Agricole Assurances, Crédit Agricole Italia, Crédit Agricole Leasing & Factoring, CACEIS, Crédit Agricole Personal Finance & Mobility, LCL, Crédit Agricole Bank Polska.

(2) Each rating criterion is assessed on a scale of 1 to 4, and a score is then determined as follows:

- for risks, the probability score is multiplied by the score for the potential scale of the financial effects, giving a maximum score of 16;
- for impacts, the probability score is multiplied by the severity score, defined as the maximum of the scale, scope and irremediability scores. The score obtained in this way also reaches a maximum of 16.

(3) Details of the materiality threshold: the materiality threshold is set at half the maximum score, i.e. 8 (greater than or equal to).

In accordance with regulations, material impacts, risks and opportunities are updated each year to take into account any changes in context, regulations or scope that have occurred since the previous financial year. This update focuses on the risks defined as material in the previous financial year, and takes into account any new contextual factors that require a review of the rating.

Sustainability risks are managed according to the same principles as other types of risks through Crédit Agricole S.A.'s overall risk management process. Material opportunities inform the strategy and actions taken by the relevant departments. These opportunities, of which there were four in 2025, are taken into account in existing decision-making and governance processes, with a view to integrating sustainability into the core activities of the departments. For example, opportunities related to climate change and the factors that led to their identification (studies, work by consulted experts) informed the work of the Climate Sponsor Committee and the working groups that defined the sustainability component of the ACT 2028 Medium-Term Plan.

1.4.1.2 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO CLIMATE CHANGE

Crédit Agricole Group's double materiality analysis process is described in the previous part 1.4.1.1 "General description".

1.4.1.2.1 NON-FINANCIAL RISKS IDENTIFIED BY CRÉDIT AGRICOLE GROUP

This part primarily aims to cover the potential financial impacts of climate risks (i.e. the IRO risks component), as a subset of the environmental risks within Crédit Agricole Group. The identification of negative impacts and dependencies linked to climate risks are addressed in part 1.3.3 "Material impacts, risks and opportunities and their interaction with strategy and business model" of the Sustainability Report.

CLIMATE RISK: DEFINITION ADOPTED

Climate risks materialise within the traditional risk categories (credit, operational, liquidity, market, reputational, etc.) and can be broken down into two categories:

- physical risks: financial effects of climate hazards caused by climate change;
- transition risks: financial effects of the process of adapting to a low-carbon economy.

In addition, the materiality of these risks results from their current or prospective impacts on the Group's counterparties or its assets.

CLIMATE RISK FACTORS IDENTIFIED BY CRÉDIT AGRICOLE GROUP

A Group taxonomy has been developed to provide a framework for analysing and measuring the impact of climate risk factors. This classification system is based on elements shared by all market players, including the regulatory authorities and supervisory authorities, as well as internal expertise. This list aims to meet the needs of most uses and will likely be updated regularly, in particular to take account of improved knowledge of climate risk factors and changes in the internal risk management system.

Analysis framework

Assessing the impacts of climate risks as part of the materiality analysis and stress testing requires consideration of both different time horizons and different climate scenarios.

Time horizons

The Crédit Agricole Group has defined four time horizons for its climate risk management framework. These time horizons have been chosen not only to align with current operational and budgetary cycles, but also to ensure consistency with longer-term strategic targets and global climate commitments.

The choice of these time horizons is also related to the profile of the portfolios and their effective average maturity according to the Group's credit activities:

- the short-term horizon is set at one year, in line with the budget horizon;
- the medium-term is set at 2030, aligned with intermediate Net Zero Banking Alliance (NZBA) commitments and with the targets defined by the European Union as part of the "Fit for 55" legislative package;
- the long-term horizon is set at 2040 in order to capture the long-term portion of exposures;
- the very-long-term horizon, set at 2050, aligns with the time frames set out in the NZBA commitments.

Climate scenarios

In assessing the effectiveness and relevance of various scenarios for sensitivity analyses within the financial sector, the scenarios defined by the Network for Greening the Financial System (NGFS) have proven to be a particularly appropriate choice. These scenarios are designed to address the specific risks and operational realities facing banks, providing information on transition risks, physical risks and macro-financial risks. In addition, the NGFS incorporates the latest updates in climate science and policies, ensuring that assessments are based on the most recent and comprehensive information available.

Three NGFS scenarios may be used to assess the impact of climate risks for Crédit Agricole Group:

- **Net Zero 2050** (orderly transition) outlines an ambitious but achievable future where global efforts will lead to net zero Greenhouse Gas emissions by 2050, aiming to limit warming to +1.5 degrees Celsius by 2100;
- **the delayed transition** (disorderly) presents a world where efforts to reduce Greenhouse Gas emissions are delayed, leading to a global temperature increase of +1.6 degrees Celsius by 2100;
- **current policies (Hot House World)** projects the results of continuing along current policy pathways, resulting in a global temperature increase of around +3 degrees Celsius by 2100.

In addition, when Crédit Agricole Group wishes to analyse the impact of physical events that are more significant than those projected in the NGFS scenarios, climate models aligned with RCPs (Representative Concentration Pathways) are used.

Climate stress test system

The results of climate stress tests, which are detailed in part 2.3.6 "Risk management system" on the resilience analysis, are also taken into account when assessing the risks identified in the double materiality analysis.

Identification and assessment of material risks related to climate change for each of the most significant categories of financial risk for the Group

Since 2024, the Crédit Agricole Group has conducted financial materiality analyses on all of the most significant financial risks for the Group, namely credit, operational, reputational, liquidity and market risks.

For credit risk, the analyses focused on physical and climate transition risks, Residential and Commercial Real Estate portfolios, and Corporate portfolios in France. The materiality of the physical risks was analysed for these portfolios, via a quantitative analysis carried out using European public climate models. In addition, the transition risks were analysed for these same portfolios via the stress test system.

For operational risk, the analyses focused on physical climate risk, real estate assets (retail spaces) and Crédit Agricole Group's headquarters in France. The analyses carried out are based on an analysis of historical losses combined with projections, and have made it possible to assess the impact of physical climate risk factors on operational losses.

With regard to reputational risk, the analyses conducted focused on climate transition risk across all business sectors and geographical areas in which Crédit Agricole Group operates. The analyses focused on litigation risks and resulted in a qualitative assessment of this risk, based on an analysis of Crédit Agricole Group's own history and, more broadly, on the banking industry scope.

For liquidity risk, the analyses conducted focused on physical and climate transition risks in Crédit Agricole CIB's Oil and Gas portfolio. They consisted of a qualitative and semi-quantitative analysis of this portfolio.

Market risk is divided between the banking book and the trading book. The analyses conducted focused on physical and climate transition risks for the Securities portfolios, interest rate positions (interest rate risk in the banking book), operational and structural foreign exchange positions, and the Crédit Agricole CIB portfolio.

With regard to banking book market risk, the analysis carried out consisted of a review of the portfolio composition combined with a forward-looking approach based on the World Resource Institute's public index. These analyses were carried out on the Securities portfolio and on interest rate/foreign exchange rate positions.

With regard to trading book market risk, an income statement sensitivity analysis was conducted on the Crédit Agricole CIB portfolio, in line with the NGFS delayed transition scenario, for physical and transition risks.

The results of all these analyses are described in more detail in the following paragraphs.

1.4.1.2.2 EFFECTS OF CLIMATE RISK FACTORS ON GROUP RISKS

In order to establish the materiality of climate risks, Crédit Agricole studied and measured the impact of climate risk factors (physical and transition) on the Group's risks. The first phase identified the level of transmission of climate factors through the bank's main risk categories (credit risk, reputation risk, operational risk, market risk, liquidity risk). This phase allowed the Group to identify the most significant factors and associated transmission channels for each type of risk, which are then prioritised in the assessment analyses.

Taking into account the scientific work and the main risk factors involved, the Group considers that:

- the physical risks related to climate change are potentially incurred in the short term for acute risks, and in the medium term for chronic risks;
- the transition risks related to climate change are potentially incurred in the short-term.

CREDIT RISK

The analysis of credit risk impacts within Crédit Agricole is carried out in a differentiated manner according to customer type, with different characteristics and transmission channels. The customer segments selected for risk analysis are: Residential Real Estate for private individuals, Commercial Real Estate, SMEs (including Agricultural) and Corporates. The conclusions of these analyses are detailed below.

Historical analysis of the effects of climate physical risk factors on credit risk

In the short term, the consequences of physical risks may impact the activities and physical assets financed or guaranteed by Crédit Agricole Group entities, thus weighing directly on loss given default. The probability of default could therefore be affected directly or indirectly by the physical risk.

For Corporate counterparties, the materiality analysis is based on an analysis of Group-level credit alerts. This analysis shows that in 2025, occurrences of climate risk factors in credit alerts increased compared with previous years. This trend mainly stems from counterparties in connection with the Agriculture and Agri-food sectors (impacted by successive climatic hazards in 2022-2023-2024) and the Automotive sector (due to the erratic transition to electricity of the European market). This analysis also makes it possible to identify that there are often multiple factors involved in the economic difficulties of our counterparties: the presence of a climate risk factor adds to other factors but, at the portfolio level, does not generate significant degradation of the risk profile.

For Individual and SME counterparties, the materiality analysis is based on an analysis of the correlation between default events and the occurrence of natural disasters over the last 10 years. It should be noted that the historical data available in the information systems only allows for the measurement of net risk, particularly after insurance claims have been paid out to customers. This analysis shows no correlation to date, a conclusion consistent with that of the Banque de France. Furthermore, it focuses on risk categories relevant to France, such as floods, droughts, landslides and severe cyclones. The limited impact observed can be explained by the role of insurers and national policies on compensation in the event of a natural disaster.

As such, and in light of these results, to date the history of physical risk cannot be considered as significant in the context of its integration into probability of default models. Nevertheless, this practice has been incorporated into Crédit Agricole's work permanently and will therefore allow these results to be re-evaluated periodically.

Forward-looking analysis of the effects of climate physical risk factors on credit risk

With regard to the residential property sector, the approach adopted has made it possible to assess the direct impact of natural disasters on the portfolios of individuals and small and medium-sized companies, covering 90% of outstanding mortgaged or guaranteed loans at the Crédit Agricole Group level. The effects of droughts as well as river flooding were analysed as a priority because of their direct impacts on building structures. The method involved cross-referencing two key metrics, the rate of soil shrinkage and swelling and the moisture content (Soil Wetness Index), to identify areas where the physical risk is predominant. In addition, the risk was assessed across the various short-, medium- and long-term time horizons, in line with the NGFS benchmark scenarios. For flood and drought risk, the RCP 8.5 scenario was included. In addition, the impacts have been analysed for certain countries, highlighting the sometimes pronounced geographical differences in the additional cost of risk in the event of chronic and acute events. The impacts on the Loss Given Default and the cost of risk were estimated by incorporating an impairment loss indicator on the property and a level of shock on the value of the collateral. The analysis concludes that the impacts will be limited across all time horizons defined by the Group.

For the Commercial Real Estate, MSE, SME and Large Corporate sectors, the chosen analysis method took into account the location and geographical distribution of assets, where available. In addition, a dedicated sector-specific study was conducted to establish a classification of sectors and sub-sectors, according to a degree of vulnerability, and to identify pockets of more localised vulnerability. A geographical analysis by country was carried out using macro-economic data based on the various sources, such as the World Bank, rating agencies, etc. The analysis of these sources was used to establish a risk categorisation on a scale of five levels for the “geography” area and three levels for the “sector” area. This approach allowed for an assessment of the level of portfolio sensitivity to acute and chronic climate risks, and to test any correlations between credit rating quality and sensitivity to physical climate risk. The results show a slightly greater sensitivity to acute risks, with certain combinations of geographic areas and sectors showing more pronounced sensitivities.

With regard to the Agriculture sector and SME counterparties, Crédit Agricole Group assessed the financial materiality of the impact of climate risk factors on the credit risk of this portfolio in France at the departmental level. This assessment shows that, regardless of the scenario, the impact of climate risk factors on the cost of risk is generally low at the portfolio level, with the exception of very long-term cold-related phenomena (including frost). It should be noted, however, that more significant and therefore material impacts could occur at the level of certain departments. Overall, these impacts will gradually increase over the coming decades and will require action on the part of all stakeholders in the sector. The most significant challenges are certainly beyond the time horizon of this analysis. However, French agriculture is faced with changing weather conditions and regular climatic hazards, forcing it to continually adapt.

Forward-looking analysis of the effects of climate transition risk factors on credit risk

Transition risk was assessed in line with the financial materiality analyses conducted, taking into account the four time horizons (short-, medium-, long- and very long-term) for the sectors with the highest emissions and the greatest sensitivity to the effects of the climate transition.

On the basis of the methodologies applied by the Group and work carried out with the supervisory authorities, an estimate of the impact on the cost of risk concluded that the overall impact was limited, and was already covered by provisioning strategies. All the analyses conducted have allowed for an assessment of the cost of the additional risk generated by the physical climate and transition risks using the various time horizons defined by the scenarios.

With regard to the Residential Real Estate sector, the chosen method takes sector-specific effects into account by applying migration matrices based on sector-specific growth data for the various scenarios. This approach made it possible to determine the impact on Loss Given Default. The analysis revealed that, across all time horizons and all scenarios, the transition risk is insignificant.

Furthermore, the analysis shows that the transition risk for the Commercial Real Estate sector is moderate for all time horizons and scenarios. For the Corporate and SME sector, the transition risk is moderate for the short-, medium- and long-term horizons across all scenarios, and is insignificant in the very long-term for the NGFS Net Zero and Current Policies scenarios.

At this stage, of all the risks analysed, the results show that the transition risk is considered to be the most significant in the medium-term. Despite this, it remains below the financial materiality thresholds established as part of the Group’s methodology.

Integration of ESG risks into the credit process

The Group’s methodological framework has been designed to cover all regions where it operates, including countries with low volumes, in order to provide a comprehensive view of risks. It also takes into account all business sectors and adapts to the specific needs of different customers using tools tailored to their risk profile.

Risk classification is based on existing internal systems and previous work. It includes materiality assessments of climate risk factors, concentration analyses and specific assessments for sectors such as agriculture and for countries such as France and the United States. In addition, it takes into account analyses of environmental risks and sector-specific CSR and Net Zero policies.

The methodology thus enables countries, sectors and counterparties to be classified according to three risk levels: (i) High, (ii) Medium, (iii) Low.

Furthermore, for all customer segments, the Group’s credit risk management system includes a set of complementary tools, thereby strengthening the Group’s ability to assess, steer and mitigate climate and environmental risks at the counterparty level:

- customer questionnaires: available for all customer segments except individuals, and administered by the first line of defence;
- climate risk score: for the entire Corporate portfolio, using an internal method or external scores;
- expert Group review: for the very large corporate segments, in the form of expert analyses to examine transactions classified as “at risk” or “potentially at risk”. This review is backed by dedicated governance provided by the second line of defence;
- watch lists: for the large and very large corporate segments, used to identify high-risk counterparties and employed for dynamic monitoring;

- portfolio management: to manage all segments at the geo-sector level. This management process combines sector-specific and geographical classification methods to reinforce the risk-based approach, highlighting geographical areas and sectors with a risk level defined as “high”.

The aim of these methods is to help the second line of defence anticipate potential environmental risks on operations deemed sensitive or medium/high risk. The geo-sector grids cover all the geographical areas and sectors in the portfolio, with a higher level of granularity for areas identified as presenting specific risks.

OPERATIONAL RISK: EFFECTS OF CLIMATE RISK FACTORS ON OPERATIONAL RISK

Operational risk is defined in Article 4(52) of the CRR as “the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, including, but not limited to, legal risk, model risk or information and communication technology (ICT) risk, but excluding strategic and reputational risk”. This definition is provided for in Regulation (EU) No. 2024/1623.

The management of these risks is based on seven main categories, defined by Basel II, which enable operational risks to be better identified, assessed and managed within the various Group entities. These seven Basel categories are addressed across four areas, as part of the analysis of transmission channels:

- IT assets: security and efficiency of the Group’s physical and digital resources;
- customers: risks related to banking operations, customer behaviour and market compliance;
- employees: recruitment, training and integrity to maintain a strong organisational culture;
- suppliers: management of risks related to the supply chain and external partnerships, which are essential to operational continuity and service quality.

These four areas ensure a comprehensive and effective approach to operational risk management.

Analysis of transmission channels has identified flooding as the main climate risk factor related to operational risks. In addition, the current impacts of climate risk factors are identified through the collection of incidents and alerts. Currently identified in losses using a keyword, new data will be integrated into operational loss collection tools in 2026.

Although they may represent a significant volume at the local or regional level, these losses are, at this stage, considered to be of little significance since they represent between 0.02% and 0.86% of the total losses linked to operational risks at the Crédit Agricole Group level over the period between 2015 and the first half of 2025, and do not require a change in the operational risk management framework in the short-term. It should be noted that the events associated with physical risks referenced by member financial institutions in the ORX (Operational Risk Data Exchange) database are mainly due to flooding.

Prospective analysis of losses linked to a climate risk factor and forward-looking scenario

A forward-looking analysis was carried out to supplement the results of the retrospective analysis, both in terms of the scope covered and the method used. This analysis was conducted using

the three NGFS scenarios over the four time horizons described above. The retrospective analysis of climate risk factors identified flooding as the main risk for the Group. In addition, the Group’s data allowed it to geolocate its assets in France, in order to feed this analysis. This method made it possible to map the regions most affected in terms of operating losses due to the physical risk of flooding, and to estimate the prospective losses according to the scenarios. The quantification results are rough estimates, before taking into account guarantees (including insurance).

REPUTATIONAL RISK: EFFECTS OF CLIMATE RISK FACTORS ON REPUTATIONAL RISK

Crédit Agricole Group has been reporting on its environmental and societal commitments for several years. The nature of its activities, the composition of its corporates portfolio and the Group’s international reach expose it to reputational risks and potential litigation relating to climate and social issues.

To manage these risks, Crédit Agricole has rolled out a system focused on:

- the avoidance of these risks: a specific analysis is carried out to enable early detection of signals that could lead to reputational risks for the Group, including in relation to customers facing media exposure or involved in litigation, depending on their exposure;
- managing these risks: Crédit Agricole is committed to open engagement with civil society stakeholders, particularly Non-Governmental Organisations and associations, and responds to requests for explanations. In addition, a reputational crisis management system is in place to manage and limit the impact of any potential accusations, if necessary.

This system has been rolled out across all departments (Sustainability and Impact, Customer Relations, Legal, Compliance, Communications, Risk Management), which are in constant contact with management in order to ensure optimal coordination when managing controversial cases.

The impact of physical risk on reputation is fairly limited; however, the management of resulting operational risk may have negative indirect effects on the Group’s image and the quality of its operations. Transition risk and Crédit Agricole’s ability to support its customers who are the most vulnerable and exposed to transition risk could have a more direct effect on the Group’s image.

The materiality analysis took into account a detailed retrospective review of the controversies that Crédit Agricole has had to face, without being the subject of legal action. Most of these controversies have involved NGOs. Although Crédit Agricole has never been the subject of legal action, the landscape is evolving in terms of climate-related reputational risk, with growing expectations of NGOs and a growing sensitivity of public opinion to climate issues. According to analyses of external databases, these mainly concern the fossil fuel sectors, allegations of greenwashing practices and failure to respect public commitments.

Crédit Agricole Group considers the reputational risks relating to physical risks and transition risks to be a consequence of primary risks, and has deemed them to be limited in the short term (within one year). On the basis of information available to date, such risks may be moderate in the medium- and long-term (2030/2050). There is a framework in place.

LIQUIDITY RISK: EFFECTS OF CLIMATE RISK FACTORS ON LIQUIDITY RISK

The liquidity risk for a banking establishment can arise from a reduction in customer deposits and/or the blocking of refinancing mechanisms. The management of liquidity risk is coordinated, for the Crédit Agricole Group, by the Group Financial Steering department, within the Finance department of Crédit Agricole S.A.

Liquidity risk management is also based on metrics produced by Group and consolidated entities. It is also managed through regular stress tests, over two different time horizons, one short-term (less than three months) and the other medium-term (three years).

The Group Risk department provides a second opinion on liquidity risk management through standards, metrics and limits, and participates in the liquidity governance bodies.

In terms of physical risk, in response to a disaster, undertakings may have to use part of their reserves and credit lines to cover their immediate needs or losses, resulting in a reduction in demand deposits and an increase in the use of credit. However, at a later stage, the withdrawn funds are likely to be reintroduced into the economy (via payments to the construction companies in charge of the repairs) and therefore to be returned to banks via corporate customers. Insurance cover can also mitigate losses, and the local nature of natural disasters limits their impact on a global bank such as Crédit Agricole Group.

To protect itself against these risks, Crédit Agricole Group monitors major weather events and conducts ad hoc studies based on major weather events. A number of analyses have been carried out (Storm Alex in the Provence-Alpes-Côte d'Azur region, flooding in the Aa, Liane and Canche river basins, etc.), demonstrating at this stage that such events have no impact at the local level, and even less so at the Group level.

Transition risks affect liquidity risk in several ways. First, they can reduce the value of liquidity reserves in central banks if the collateral valuation structure changes. For Crédit Agricole, this risk is considered low, as these deposits are not very sensitive to climate risks and are protected by effective risk management strategies. Secondly, the Bank's reputation could be affected if it does not honour its climate commitments, which could weaken the confidence of customers and institutional investors.

Stress tests were carried out in the first quarter of 2025 based on scenarios combining these components over several time horizons. These exercises showed that the Group can absorb the consequences of these adverse events without jeopardising its liquidity balance.

MARKET RISK: EFFECTS OF CLIMATE RISK FACTORS ON MARKET RISK

Based on the NGFS analysis and following the example of the regulatory climate stress tests proposed in the past by the ACPR and the ECB, it appears that the most significant climate risk factors for market positions stem from transition risks. These risks are more likely to generate systemic impacts, and therefore impact market positions that tend to concern large corporates.

These transition risk factors may be related to the public authorities' penalisation of activities that contribute to climate change through high greenhouse gas emissions. This may concern, for example, the introduction of climate taxation (or, conversely, subsidies), regulatory requirements, restrictive energy and transport policies (e.g. reduction of CO₂ emissions), the banning of certain environmentally harmful materials/chemicals, etc.

Companies may also find it difficult to adapt their business models to the new paradigms: changes in investor, consumer, supplier or employee behaviour; technological developments.

These climate factors apply to all exposures in market, credit and equity activities, and more particularly to those in the most carbon-intensive sectors. These exposures and their sensitivity have been mapped according to the European statistical classification of economic activities, NACE (Nomenclature of Economic Activities). Interest and inflation rates can also be linked to climate risk factors.

To assess the materiality of climate risks, risk weightings, calibrated according to a disorderly transition scenario, are applied to the sensitivities of the exposures. This scenario was designed in line with the projections of the NGFS, particularly with regard to carbon prices and CO₂ emissions. The weightings adversely impact sectors that are sensitive to climate risks.

A simulation was carried out on the Crédit Agricole CIB trading book and showed the low materiality of climate risks on credit and equity market positions.

For the financial materiality and resilience of the business model, see part 1.3.3 "Material impacts, risks and opportunities and their interaction with strategy and business model".

1.4.1.3 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO OTHER ENVIRONMENTAL ISSUES

1.4.1.3.1 INTRODUCTION AND RESOURCES USED

Proud of its cooperative and mutualist identity, Crédit Agricole supports the economy and innovation in France and abroad, while also committing to societal and environmental causes. We encourage sustainable practices and support our customers in their environmental transition with tailored solutions, even though we do not actually control their activities, while complying with our regulatory framework.

Our analysis was conducted in accordance with ESRS 1, combining top-down and bottom-up approaches to assess the Group's nature-related impacts, risks and opportunities (IRO). This work drew on the combined expertise of the Sustainability and Impact, Risk and ESG Coordination business lines of the Finance department, ensuring that the appropriate skills were available to address these issues.

As part of our materiality analysis, we conducted in-depth work on all environmental standards related to nature: ESRS E2 (Pollution), which covers the impacts of pollutants on air, water and soil; ESRS E3 (Water and marine resources), which addresses the sustainable management of freshwater resources and marine ecosystems; ESRS E4 (Biodiversity and ecosystems), which addresses the preservation of species and natural habitats; and ESRS E5 (Resource use and circular economy), which addresses the optimisation of resource use and waste reduction. Although these four standards have distinct, specific targets, they are interconnected and interdependent in many ways, sometimes justifying an integrated approach to their analysis.

1.4.1.3.2 CONTEXT

The regulatory framework for CSRD is evolving rapidly. The Omnibus Package aims to simplify sustainability reporting requirements while ensuring they remain aligned with the targets of the Green Deal. This simplification project, which is still under discussion, illustrates the European institutions' recognition of the current complexity of the system, and therefore the need for a gradual approach to achieve robust reporting on the sustainability issues covered by the ESRS.

1.4.1.3.3 FINDINGS

As part of its analysis of ESRS standards, the Group notes that the themes of Pollution (E2), Water (E3) and Resource use and circular economy (E5) have relatively well-established indicators and metrics. However, there is not yet a standard method for interpreting these metrics at the level of financing and investment portfolios and insurance products, which limits their operational use. For the topic of Biodiversity and ecosystems (E4), the challenge is twofold: the available metrics are still underdeveloped and the assessment methodologies have yet to be established.

1.4.1.3.4 LACK OF METHODOLOGY, SECTOR-SPECIFIC PATHWAYS AND OPERATIONAL REFERENCE FRAMEWORKS

ESRS related to Pollution (E2), Water (E3) and Resource use and circular economy (E5) are based on relatively well-established technical metrics (e.g. volumes withdrawn, pollutant emissions, recycling rates). However, the absence of performance thresholds, shared sector-specific pathways and operational benchmarks prevents these metrics from being translated into forward-looking judgements. Without standardised points of comparison or sector-specific target levels, it is impossible to determine whether a metric signals high risk, satisfactory performance or priority for improvement within a financing or investment portfolio.

The ESRS Biodiversity and ecosystems (E4) presents a simultaneous deficit of relevant metrics and robust assessment methods. Current tools are often fragmented, sector-specific or unsuitable for aggregation at the portfolio level. The lack of common methodologies and benchmark pathways prevents any reliable comparative assessment, impact projection or definition of transition strategies based on measurable targets. This situation reflects the intrinsic complexity of natural capital, whose diversity of species, ecosystems and ecological processes makes any single assessment approach impossible. Unlike the ESRS Climate (E1), the financial sector does not yet have a biodiversity metric such as tonne of CO₂ equivalent. The creation of stabilised sector-specific pathways, the development of shared operational benchmarks and the development of metrics adapted to financing and investment portfolios are necessary for making these metrics usable and effectively modelling risks. Exploratory work has led to the production of certain internal metrics. However, the figures obtained remain difficult to interpret in the absence of defined thresholds and pathways.

These multiple challenges explain the financial sector's difficulty in assessing the materiality of nature-related issues in a consistent manner. Nevertheless, this remains achievable, thanks to ongoing efforts, international initiatives and collaboration between scientists, financial institutions and regulatory authorities to forge the tools of tomorrow.

1.4.1.3.5 TAKING INTO ACCOUNT THE OPINIONS OF STAKEHOLDERS

The Group continues to closely monitor stakeholder opinions (rating agencies, investors and analysts, civil society, etc.) through various channels (meetings, questionnaires, surveys) and has observed that nature-related issues are not yet given significant consideration and are not as high a priority as climate-related issues, for example, illustrating a gradual approach to a particularly complex subject.

In this context, Crédit Agricole S.A. considers that it is not yet in a position to draw definitive conclusions on the double materiality analysis of nature-related issues for the 2025 financial year. The Group is continuing its work with the aim of developing a sufficiently robust and measurable methodology to determine which aspects of its counterparties' activities (and what proportion of these activities) and themes could be considered material or immaterial.

1.4.1.3.6 OUR EXPLORATORY WORK ON NATURE-RELATED ISSUES

The Group has carried out a great deal of exploratory work to develop methods for measuring the impacts, risks and opportunities associated with nature. This includes:

- In 2025, the Sustainability and Impact department conducted a top-down pilot project focusing on two sectors as samples: Agriculture and Residential Real Estate in France in the retail banking sector. The aim of this pilot project was (i) to produce an impact analysis of the activities financed in these two sectors on biodiversity, land use change, water consumption, climate change and water pollution, based on physical metrics, and (ii) to prioritise open data in order to avoid the pitfalls of collecting customer data. The modelling has methodological limitations: a top-down approach using aggregated territorial data rather than specific banking data; a customer portfolio that is not representative of the actual diversity of the assets financed (farms or types of housing); and excessive simplifications that do not take into account significant variations (types of financing, specific characteristics of the assets, geographical distribution) that heavily influence the assessment of environmental impacts.
- In 2024, Crédit Agricole S.A. teams studied the impacts and dependencies of the Group's financing portfolio with regard to various categories of nature-related factors, drawing in particular on international databases (ENCORE). Although aligned with market practices, such as the work of the Banque de France ⁽¹⁾ or the ECB ⁽²⁾, this work has significant limitations, notably the lack of forward-looking scenarios, the impossibility of studying the transmission of risks through to credit risk parameters in order to perform a detailed quantitative assessment.
- In 2023 and 2024, Crédit Agricole S.A., Amundi and Crédit Agricole CIB participated in two pilot projects of the Taskforce on Nature-Related Financial Disclosures (TNFD) in order to test the LEAP ⁽³⁾ process and provide feedback on the reporting framework proposed to financial institutions. We carried out these initial pilot projects on a non-representative sample of agri-food undertakings in our financing and investment portfolios:
 - TNFD pilot project on agri-food ⁽⁴⁾ with Iceberg Data Lab and I Care. The impact analysis was carried out using the Corporate Biodiversity Footprint (CBF) tool. The CBF covers three pressures: land use change, pollution (water and air) and climate change. The analysis of dependencies is less robust than that of impacts, particularly because tools such as ENCORE only cover direct impacts, which limits the scope of the assessment for Crédit Agricole, which is exposed to indirect activities. The "Locate" phase of LEAP is difficult to implement for financial institutions due to the lack of accurate geographical data on production sites and the supply chain. This hinders the detailed identification of impacts and dependencies;

(1) <https://www.banque-france.fr/fr/publications-et-statistiques/publications/perle-de-biodiversite-et-stabilite-financiere>

(2) ECB Climate and Nature Plan – <https://www.ecb.europa.eu/ecb/climate/our-climate-and-nature-plan/html/index.fr.html>

(3) The LEAP approach is designed to be used by organisations of all sizes, in all sectors and in all geographic areas. This integrated assessment approach is known as the LEAP approach, or "LEAP" for short (Locate, Evaluate, Assess and Prepare).

(4) <https://www.credit-agricole.com/en/responsible-and-committed/csr-home/news-and-publications/our-positions/2023/statement-on-biodiversity-and-natural-capital>

- TNFD pilot on agriculture and fisheries ⁽¹⁾ with UNEP FI and CDC Biodiversité. Asset managers face a major challenge: the lack of accurate geographical data for the undertakings in their portfolios and the lack of data on supply chain traceability. This constraint limits their ability to fully apply the LEAP approach, particularly when assessing indirect impacts and dependencies.

Since 2022, Crédit Agricole CIB has integrated nature and biodiversity issues into its environmental and social risk analysis, assessing the dependence and impact of corporate customers. This rating contributes to the assessment of overall ESG risk when granting credit and conducting annual reviews of counterparties. This system is still evolving, with new models to be integrated in the near future. The current system is not predictive and has not been tested on historical data; it is not mature enough for other risk uses. Nevertheless, the current results indicate that the portfolio under review has predominantly low levels of risk, suggesting limited dependence.

As part of its supervisory work, in line with the ECB guide on climate and environmental risks, the Crédit Agricole Group has conducted a new vulnerability analysis, strengthening the identification of scopes within its credit portfolio that are significantly exposed to environmental risks other than climate risk. The results of this analysis show that the portfolio as a whole has low to medium vulnerability. This analysis has enabled the prioritisation of sectors to be covered by environmental risk management in procedures and processes, in a context of limited data and methods for financial players.

1.4.1.3.7 THE GROUP IS WORKING TO PROMOTE NATURAL CAPITAL AND BIODIVERSITY

The fact that the Group considers that it is not in a position to draw definitive conclusions at this stage on the materiality of nature-related themes for the reasons outlined above does not call into question its stated commitment to promote natural capital ⁽²⁾ and biodiversity.

In particular, Crédit Agricole S.A. published a statement on biodiversity and natural capital ⁽³⁾ in September 2023. Aware of the major pressures exerted by human activities on ecosystems (pollution, overexploitation, land use change, invasive species, etc.), Crédit Agricole S.A. has defined five areas of action: assessing the impacts and risks associated with the loss of nature; integrating environmental criteria into its sector-specific policies; mobilising financial resources for activities that benefit nature; supporting collective initiatives; and reducing its direct footprint. It acts in particular through thematic funds (circular economy, blue economy, *Fonds Objectif Biodiversité* fund), criteria for excluding the financing of projects in protected areas (UNESCO World Heritage sites and Ramsar sites), environmental certifications for its real estate assets, and specific commitments such as the decision not to finance deep-sea mining projects.

1.4.2 DISCLOSURE REQUIREMENTS IN ESRs COVERED BY THE COMPANY'S SUSTAINABILITY REPORT

See Appendix 3: Coverage of disclosure requirements.

Although these actions are less mature than those developed for other material ESG issues and represent a limited share of the Group's commercial offering and financial results, they nevertheless demonstrate a willingness to take progressive action on these issues.

Crédit Agricole S.A. participates in the following coalitions in particular:

- in 2023, Crédit Agricole S.A. co-chaired the Nature Target Setting Working Group of the UNEP FI ⁽⁴⁾ Principles for Responsible Banking (PRB Nature) to develop an initial guide of recommended targets for banks, aligned with the Kunming-Montreal Agreement (Global Biodiversity Framework);
- since 2022, Crédit Agricole S.A. has been a member of the TNFD Forum and is also part of France's Consultation Group with *Entreprise pour l'Environnement* (EpE) and *Institut de la finance durable*, working to better identify, assess, manage and report on nature-related risks and opportunities.

Crédit Agricole S.A. intends to continue working with national and international coalitions to better understand the negative impacts and risks of environmental degradation. It is also seeking to better understand the positive impacts and opportunities to contribute to its protection, conservation and restoration.

1.4.1.3.8 CONCLUSION

In view of all the aforementioned difficulties and methodological limitations, the Group is not, at this stage, in a position to conclusively assess the materiality of ESRs E2 (Pollution), E3 (Water and marine resources), E4 (Biodiversity and ecosystems) and E5 (Resource use and circular economy) within the CSRD framework.

1.4.1.4 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO BUSINESS CONDUCT

As part of the Group's double materiality methodology, the Group Compliance department has defined the impacts, risks and opportunities (IRO), based on the existing standards, the mapping of non-compliance risks and the quantitative metrics available.

The IROs relating to business conduct are grouped into six material themes: promotion of an ethical culture, avoidance of conflicts of interest, protection of whistle-blowers, anti-corruption, combating financial crime and preventing market abuse.

The consolidated IRO ratings have been validated by the Group Compliance governance bodies (Management Committee).

In the area of Purchasing, IROs were identified using the AFNOR risk map based on the ISO 31000 "Risk management", ISO 20400 "Sustainable procurement" and ISO 26000 "Social responsibility" standards, and the internal operational risk management tool, in close collaboration with internal stakeholders.

2. RESPONSIBILITY FOR CLIMATE CHANGE

CLIMATE CHANGE

We are committed to combating climate change and aim to contribute to carbon neutrality by 2050.

Our transition plan is based on three complementary pillars:

- ramping up the roll-out of renewable and low-carbon energy,
- supporting the energy transition of all our customers, and
- pursuing our gradual exit from fossil fuel financing.

EXAMPLES OF CLIMATE CHANGE-RELATED IROS ⁽¹⁾

Positive impact

- Reduction of greenhouse gas (GHG) emissions through dedicated offerings

Risk

- Credit risk related to climate risks

Negative impact

- Impact of business activities on the climate

Opportunities

- Develop solutions that promote the energy transition

POLICIES AND ACTION PLANS

Example of policies

- Support for customer transitions
- Sector-specific roadmaps for the climate transition

Examples of action plans

- Pursuing commercial opportunities created by sustainable finance
- Sector-specific action plans to reduce GHG emissions linked to financing
- Climate risk management system

SELECTED PERFORMANCE METRICS

Financing the environmental transition ⁽²⁾

€53.2bn

GHG emissions linked to oil and gas sector financing (2020-2025) ⁽³⁾

-81%

Financing of low-carbon energy ⁽²⁾

€22.5bn

GHG emissions intensity linked to automotive sector financing (2020-2025) ⁽³⁾

-24%

⁽¹⁾ IRO: Impacts, risks and opportunities. Non-exhaustive list of IROs, see part 2.2.2 "Material impacts, risks and opportunities and their interaction with the strategy and business model".

⁽²⁾ Metrics defined in part 2.4.1, "Metrics related to financing of transitions" section.

⁽³⁾ Metrics defined in part 2.4.1.1.8 "Application in the sectors".

This table is for illustrative purposes only and is not intended to replace the information contained in the sustainability report.

2.1. GOVERNANCE

At the undertaking's highest levels, the Board of Directors of Crédit Agricole S.A., a listed undertaking and the corporate centre of the Crédit Agricole Group, ensures that the Group's strategy and activities take climate, environmental and social concerns and risks into account. In particular, it monitors the societal commitments, which are the subject of regular reporting. To facilitate the inclusion of social, climate and environmental issues and risks in its decision-making, the Board of Directors has established a Societal Commitment Committee. Chaired by the Chairman of the Board of Directors, it plays a key role in reviewing the Group's ESG strategy. The operational deployment of the ESG risk strategy and steering in the business lines is coordinated within cross-functional committees, placed under the authority of senior executives at the highest levels of the Crédit Agricole Group. Finally, it should be noted that the greenhouse gas (GHG) emission reduction targets, sector-specific decarbonisation pathways and action plans defined as part of the work to decarbonise the Group's financing portfolios are presented each year to Crédit Agricole S.A.'s Board of Directors.

Dedicated governance generally meets on a quarterly basis to inform, approve and steer the Group's climate change policies and Climate Transition Plan:

- **the Group Societal Project Committee**, which is chaired by a Regional Bank Chairman, meets three times a year and is made up of 12 members, half of whom are Chief Executive Officers of Crédit Agricole S.A. and the other half of whom are Regional Bank senior executives. It oversees the implementation of the Group's societal commitments and the alignment of its ESG strategy within Crédit Agricole Group, and examines prospective files relating to ESG issues. In 2025, the discussions and work usually carried out by this committee were incorporated into the development of Crédit Agricole S.A.'s 2026-2028 Medium-Term Plan;
- **the Board of Directors' Societal Commitment Committee**, chaired by the Chairman of the Board of Directors, reviews the Group's ESG strategy and analyses the results of all policies implemented and actions taken with regard to the Group's non-financial performance. It monitors changes in non-financial ratings;
- **the ESG Strategy Committee**, chaired by the Chief Executive Officer of Crédit Agricole S.A., reviews the components of the ESG strategy (sector-specific policies, standards, guidelines, position papers, methodologies, Net Zero pathways, etc.), submits them to the Crédit Agricole S.A. Board of Directors for approval with the opinion of the Societal Commitment Committee, and monitors the implementation of the Group's commitments;
- **the Heads of Sustainability and Impact Committee**, chaired by the Director of Sustainability and Impact, a member of the Crédit Agricole S.A. Executive Committee, meets monthly with the Heads of Sustainability and Impact of Crédit Agricole S.A.'s main entities. As part of a consultation and cooperation process, the members of this committee contribute their expertise to identify issues and propose a coherent overall approach in terms of Sustainability and Impact to the ESG Strategy Committee;

- **the Climate Sponsor Committee**, chaired by a Regional Bank Chairman and made up of the Chief Executive Officers of the Regional Banks and Crédit Agricole S.A., oversees the definition of the Group's Net Zero pathways and adaptation strategy;
- **the multi-disciplinary Scientific Committee**, composed of 10 external members who are recognised experts in climate and environmental issues, meets at least three times a year. Its mission is to shed light on issues relating to commitments and to draw up recommendations on ESG aspects;
- **the Group-level Individual Risks Committee**, chaired by Crédit Agricole S.A.'s Chief Executive Officer, is responsible for deciding on certain individual customer files requiring the approval of Executive Management, particularly those most sensitive to climate change risks;
- **the Group Risk Committee**, chaired by Crédit Agricole S.A.'s Chief Executive Officer, defines the Group's risk policy, sets overall Group limits, validates the risk frameworks of Crédit Agricole S.A. entities and business lines, and monitors the Group's major risks such as environmental risks, including risks related to climate change;
- **the role of the Board of Directors' Risk Committee** is to review the overall strategy and risk appetite of Crédit Agricole S.A. and the Crédit Agricole Group, as well as risk strategies, including environmental risks. It assists the Board of Directors in its role of overseeing the implementation of this strategy by Executive Directors and the Head of the Risk Management function;
- **the Audit Committee of the Board of Directors** is responsible, in particular, for monitoring the development of non-financial information and the control plan of the sustainability information certifiers.

The members of the Executive Committee have the skills and expertise required in their fields to understand the impact of climate and environmental risks. The other members also include climate and environmental aspects in their portfolios of expertise in their respective fields:

- the Steering and Control, Finance and Risk functions are heavily involved in risk management and non-financial communication;
- the Insurance division closely monitors trends in climate risk-related claims, and includes due diligence on climate and environmental risks in its Asset Management activities;
- the Investment for third parties division is at the forefront of climate issues, with Amundi's involvement;
- the Personal Finance & Mobility division is increasingly taking transition issues into account;
- the Large Customers and Universal Banking divisions finance and invest in renewable energy and low-carbon infrastructures, and support all customers in their transitions;
- the Agriculture and Agri-Food Division of Crédit Agricole S.A. supports the transition of customers in the agricultural sector.

2.2. STRATEGY

If we are to adapt and contain the effects of climate change and its ecological, socio-economic and geopolitical consequences, our entire model of growth must be critically examined in depth. The conclusions addressed to executives by the sixth climate assessment report of the Intergovernmental Panel on Climate Change (IPCC) on the consequences of a global temperature rise of more than 2°C call for a global rethink of the economy of the future.

Faced with this challenge, financial institutions are called upon to play their part in supporting the economy of tomorrow. Adopted by a significant number of international players, both government and private, as COP26 approached in November 2021, the target, known as “Net Zero 2050”, represented an important milestone on the path to be followed at the global level so that global warming does not exceed 1.5°C by 2100. As part of its Societal Project and the implementation of its climate change policies, Crédit Agricole Group is integrating its climate transition plan into its overall strategy. It has thus pledged to “Contribute to carbon neutrality by 2050 through its operating footprint and its investment and financing portfolios” and to “support all of its customers in their energy transition”.

The Crédit Agricole Group has joined several pioneering climate financing initiatives from the outset. Since 2003, it has been co-founder and signatory of the Equator Principles, a signatory of the United Nations Global Compact, the Climate Principles in 2008, the Science Based Targets Initiative in 2016, the Principles for Responsible Banking in 2019, the Principles for Responsible Investment in 2011, and the Principles for Sustainable Insurance in 2021. A co-founder of the Green Bonds Principles ⁽¹⁾, the Group has become a world leader in green bonds ⁽²⁾. By joining the three international alliances below in 2021 and 2022 ⁽³⁾, and in line with the commitments made as part of its membership of the Glasgow Financial Alliance for Net Zero (GFANZ), the Crédit Agricole Group is committed to contributing to achieve carbon neutrality by 2050:

- **Net Zero Banking Alliance ⁽⁴⁾ (NZBA), on the banking scope:** 10 priority sectors ⁽⁵⁾ (Oil and Gas, Power Production, Residential Real Estate, Commercial Real Estate, Agriculture, Automotive, Aviation, Shipping, Cement and Steel) covering approximately 60% ⁽⁶⁾ of Crédit Agricole Group's outstanding loans and representing more than 75% of global greenhouse gas emissions;
- **Net Zero Asset Managers Initiative ⁽⁷⁾ (NZAM), within the scope of investments for third parties:** target of reduction in carbon emissions relative to revenues of -30% by 2025 and -60% by 2030 vs. 2019 ⁽⁸⁾. As of 31 December 2025, 100% of portfolios covered by the Net Zero range have achieved a 30% reduction in carbon intensity, based on a reference baseline as of 31 December 2019;
- **Net Zero Asset Owner Alliance (NZAOA), within the scope of insurance business investments:** target of a -50% reduction in carbon emissions per million euros invested in 2029 vs. 2019 ⁽⁹⁾.

While each of the coalitions implies or initially implied commitments specific to each business line, certain requirements form a common base: the setting of both long-term (2050) and short-medium-term (2025, 2030) targets with interim milestones; the establishment of a baseline year for annual measurement of emissions; the choice of a stringent decarbonisation scenario recognised by science; and the validation of targets and trajectories by the highest governance bodies.

2.2.1 TRANSITION PLAN FOR CLIMATE CHANGE MITIGATION

2.2.1.1 CLIMATE TRANSITION PLAN TO CONTRIBUTE TO CARBON NEUTRALITY IN 2050

Within financial institutions, a distinction should be made between the transition plan for their own activities and transition plans relating to the value chain, in particular financing portfolios (sector-specific Net Zero pathways), insurance investment portfolios (euro funds and equity funds) and asset management portfolios (Net Zero range). With regard to these transition plans for the Group's portfolios, Crédit Agricole is adopting a top-down approach to align sector-specific decarbonisation pathways with those set out in the reference scenario.

Therefore, the concept of the transition plan described in this report refers to a set of sector-specific or activity-based transition plans carried out by the Group with the contribution of some of its subsidiaries (see part 2.3 “Actions and resources in relation to climate change policies” for details of the scope covered by each plan), and comparable to recognised scientific pathways and reference scenarios (see part 2.4 “Performance targets and measures”). These trajectories and scenarios are constantly evolving and may be updated in the coming years.

Lastly, it is emphasised that the Group's decarbonisation initiatives are developed within its relationship model through a comprehensive approach to the needs of its customers, as well as in the context of the specificities of the banking sector and the interdependence of decarbonisation levers. Therefore, the quantification of decarbonisation levers is a complex exercise, that is why their contribution to achieving GHG emission reduction targets should be considered globally.

The Group's transition plans for climate change mitigation are intended to provide an understanding of past, current and future mitigation efforts of some activities of the Group, and on specific sectors identified. This will ensure that its strategy and business model contribute to the transition to a sustainable economy.

(1) <https://www.ca-cib.fr/sites/default/files/2017-02/2014-03-doc-de-ref-2013-v3-fr.pdf>, page 46.

(2) Bloomberg, Green, Social & Sustainable Bonds EUR 2025.

(3) The Net Zero Insurance Alliance ceased to exist on 25 April 2024 and was replaced by the Forum for Insurance Transition to Net Zero (FIT).

(4) In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

(5) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

(6) This coverage ratio is calculated by considering in the numerator the total outstanding amounts in the 10 priority sectors identified in the NZBA framework and in the denominator the total exposures in “sectors contributing strongly to climate change” (Pillar 3 ESG definition) with a reprocessing along the upstream/downstream value chains of the sectors engaged.

(7) In January 2025, NZAM decided to suspend assessments of the implementation of signatories' commitments.

(8) The choice of 2019 as the baseline year allows for compliance with the following NZAOA recommendation: “Members' sub-portfolio targets shall strive for science-based GHG reductions versus YE2019 as described above in the range of 22-32 percent by YE2024, and 40-60 percent by YE2029” NZAOA TSP4”, and is part of Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

(9) Carbon footprint of listed equity and corporate bond investment portfolios and directly held real estate. The choice of 2019 as the baseline year is in line with the NZAOA's recommendations and Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

The Group's activities and sectors covered by these transition plans to date, regardless of the geographical area in which the business lines are present, are as follows:

- funding (eight sectors ⁽¹⁾: Oil & Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel);
- investment of the insurance business (euro funds and own funds) and investment for third parties (Net Zero range).

The assumptions associated with these transition plans are presented in the following parts of the report.

The Climate Transition Plan, including the transition plan of own operations and the sectoral transition plans, is a plan that Crédit Agricole Group has been implementing since June 2019 as part of its climate change policies and overall strategy. Its principle: gradually reallocate the Group's financing and investment portfolios, consistent with the targets of the 2015 Paris Agreement and reference scenarios including that of the International Energy Agency (IEA), to contribute to achieving carbon neutrality by 2050.

The climate transition plan of Crédit Agricole Group covers the scopes of the Group's carbon footprint as defined by the following GHG Protocols: Scopes 1 and 2 Greenhouse Gas (GHG) emissions linked to its own operations and energy consumption, Scope 3.6 emissions linked to business travel, and Scope 3.15 emissions linked to financing activities, investment of the insurance business (euro funds and own funds) and investment for third parties (Net Zero range). Reducing the carbon footprint of the downstream value chain is achieved through the sector-specific decarbonisation pathways and action plans described in this report.

This transition plan gained significant momentum in 2022 and was expanded in December 2023 and again in 2025 as part of the work for Crédit Agricole S.A.'s 2026-2028 Medium-Term Plan. It is based on three complementary areas:

1. carry out mass financing and investments in renewable energies, low-carbon infrastructure, clean technologies and energy efficiency projects (see part 2.3 "Actions and resources in relation to climate change policies");
2. support customers in their climate change-related transitions (see part 2.3 "Actions and resources in relation to climate change policies");
3. continue to reduce fossil fuel financing (see part 2.3.1.2 "Sector-specific action plans", sections on "Oil & Gas" and part 2.3.2.2 "Investment").

Crédit Agricole S.A. is not excluded from the European Union's "Paris-aligned Benchmarks" ⁽²⁾ given the sectoral exclusion criteria applied.

The other components of the Crédit Agricole Group's transition plan are set out in the following parts of the document:

- information relating to the administrative, management and supervisory bodies of Crédit Agricole Group that approve the climate transition plan is included in part 2.1 "Governance";
- the compatibility of the undertaking's GHG emission reduction targets with limiting global warming to 1.5°C in accordance with the Paris Agreement is presented in part 2.4 "Targets related to climate change mitigation";
- the decarbonisation levers identified and key actions planned in Crédit Agricole Group's own operations or in its downstream value chain are detailed in part 2.3 "Actions and resources in relation to climate change policies";
- information on the progress of the Climate Transition plan (operating footprint and downstream value chain) is given in part 2.4 "Performance targets and measures";
- transition plan coverage ratio: the transition plan does not systematically cover 100% of outstanding NZBA sectors to which the Group is committed.

(1) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

(2) This information is aligned with the Commission's Delegated Regulation (EU) 2020/1818 (climate benchmark regulation).

EXAMPLES OF CLIMATE TRANSITION PLAN ACHIEVEMENTS AT END-2025

For more information, see part 2.4 "Performance targets and measures".

(1) Baseline for the aviation sector: 2019

(2) Data at end 2023

(3) Renewable energies and nuclear power

(4) Crédit Agricole S.A. scope

2.2.1.2 OPERATING ENVIRONMENTAL FOOTPRINT

Although most of its GHG emissions are linked to its financing and investment activities in insurance and investment for third parties, the Crédit Agricole Group attaches great importance to reducing emissions due to the environmental footprint of its own operations as an undertaking, in line with its commitment to setting an example.

In line with its Net Zero commitment, it is committed to reducing the environmental impact of its operating footprint to help achieve the net-zero emissions target by 2050.

Crédit Agricole S.A. has therefore set itself the target of halving its Scopes 1 and 2 emissions and halving its Scope 3.6 emissions (business travel only) between 2019⁽¹⁾ and 2030. Similarly, aware of the impact of its value chain on its operating environmental footprint, it has set a target to decarbonise its purchases.

(1) The choice of 2019 as the baseline year is in line with SBTi requirements, which recommend that it be no more than two years before the year of publication of GHG emission reduction targets, and is in line with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

2.2.1.3 CLIMATE CHANGE POLICIES

As part of its climate strategy, the Crédit Agricole Group has implemented policies and management frameworks to prevent, mitigate and remedy impacts, manage risks and seize material opportunities (see part 2.2.3.1 “Material impacts, risks and opportunities”) related to climate change mitigation. These policies enable the Group to manage key sustainability matters and cover the following areas: climate change mitigation, energy efficiency and the roll-out of renewable energy. They cover the six pillars (see part 2.3, “Actions and resources in relation to climate change policies”).

The sector-specific CSR policies implemented by Crédit Agricole S.A. over several years specify the rules of engagement and the criteria, particularly climate criteria, incorporated into Crédit Agricole S.A.’s financing and investment policies. They reflect issues related to respect for human and social rights and environmental protection, including the fight against climate change. Seven Crédit Agricole S.A. sector-specific CSR policies ⁽¹⁾ are currently published on the following sectors that have a significant impact on the climate: energy (oil and gas, thermal coal, electricity), extractive industries (mining and metals), construction (transport infrastructure), transport (road transport), agriculture and forestry (deforestation and ecosystem conversion). These policies governing financing, investment, asset management and insurance businesses are regularly updated to align financial operations with Crédit Agricole S.A.’s long-term sustainability targets. In 2025, LCL adopted sector-specific policies relevant to its activity (e.g. oil and gas, mining and metals, etc.) by integrating climate and social criteria into its financing and relationship-building processes. Crédit Agricole CIB adopted four sector-specific policies related to the fight against climate change in the Nuclear Energy, Commercial Real Estate, Aeronautics and Shipping sectors.

FINANCING

Group entities incorporate an assessment of risks, particularly climate risks, a categorisation of these risks (high, medium, low) and an additional qualitative analysis for sectors identified as high risk into their credit decision-making process. This process has been put in place in order to respond, in an operational and consistent manner, to regulatory requirements concerning the consideration of risk factors, particularly climate risk factors, in credit assessments.

The Equator Principles are a risk management framework for project financing. They were developed to respond to the constraints and levers for action that exist in the project financing process. Although they cannot always be applied as they stand to other types of financing, they provide a useful methodological framework for taking into account and avoiding social and environmental impacts when the financing or financial advisory mandate appears to be linked to the construction of a specific industrial asset (factory, transport infrastructure, etc.).

Crédit Agricole CIB has been assessing the environmental or social sensitivity of transactions since 2009. This process ensures compliance with the exclusion criteria defined in the various sector-specific CSR policies and enables the analysis and even anticipation of potential controversies with customers.

INVESTMENTS IN THE INSURANCE BUSINESS

Crédit Agricole Assurances applies the above-mentioned sector-specific CSR policies to its investments, where relevant. Where necessary, these are supplemented by sector-specific policies specific to Crédit Agricole Assurances. This is the case, for example, with the oil and gas policy, which has been supplemented by a policy specific to Crédit Agricole Assurances, which deals with investments made directly in infrastructure.

INVESTMENTS FOR THIRD PARTIES (NET ZERO RANGE)

The Paris Agreement aims to limit the global average temperature increase to well below 2°C and calls on countries to pursue efforts to limit the increase to 1.5°C, which requires achieving net-zero greenhouse gas emissions by mid-century. Article 2.1 of the Paris Agreement sets out targets to align financial flows in order to make them consistent with a low-carbon and climate change-resilient pathway. Investors can play a role in decarbonising the real economy by seeking to direct their investments towards the least carbon-intensive undertakings. However, determining an undertaking’s alignment with the Paris Agreement targets remains a challenge to date. As a result, a significant portion of the broad spectrum of asset classes and regions of the world in which Amundi invests does not yet benefit from the analytical frameworks and data necessary for a comprehensive action plan. Nevertheless, certain measures can already be taken to support the commitment to actively contribute to global carbon neutrality targets by 2050. With regard to investments for third parties, the following principles have been adopted to align its funds with the Paris Agreement:

- Amundi has the capacity to steer the evolution of metrics related to the selected themes;
- Amundi can justify the explicit request from its customers for this steering.

Amundi’s ambition is to promote a wide range of Net Zero products and to be able to act on its customers’ mandates in order to support them in transforming their portfolios if they so wish.

Amundi has set minimum standards and exclusion policies on critical climate issues, triggering specific monitoring and escalation procedures when violations by an issuer are identified, which may lead to engagement, specific voting actions (where applicable) or exclusion.

Finally, Amundi supports its employees in understanding and implementing its Climate strategy.

INSURANCE

Crédit Agricole Assurances has been a signatory to the Principles for Responsible Investment since 2010 and has published an annual ESG-Climate report since 2017, in accordance with Article 29 of the French Energy and Climate Law. This report describes Crédit Agricole Assurances’ approach to integrating non-financial criteria into its investment analysis and decision-making processes.

REINSURANCE POLICY

Crédit Agricole Assurances uses reinsurance to mitigate underwriting risks and physical risk factors related to climate change. All underwriting risks are analysed annually in order to identify reinsurance options to be considered, in accordance with the targets set out in the reinsurance policy. This analysis leads to the selection of an optimal structure by the Reinsurance Committee (or another decision-making body under the responsibility of Executive Management). This structure, or its main characteristics, is presented to the Board of Directors prior to its implementation.

(1) <https://www.credit-agricole.com/en/responsible-and-committed/csr-home/our-commitments/governance-and-csr-sector-policies>

In this context, risk modelling is carried out through three main processes:

- modelling of climate, conflagration and dam failure risks, based on the assessment of capital at risk and the use of specific modelling software;
- modelling of other risks, in particular third-party liability, based on an analysis of historical claims; and
- analysis of the role of reinsurance and the protection it provides to the undertaking.

The financial strength of the reinsurer is assessed by its rating or, in the absence of a rating, by criteria validated by the Group. Sufficient diversification of investments between reinsurers is implemented to limit counterparty risk.

RISK SELECTION AND PRICING POLICY

Through its non-life insurance activities, Crédit Agricole Assurances is exposed to frequency risk and exceptional event risk.

When implementing its underwriting policy, Crédit Agricole Assurances takes care to model the various risk factors as accurately as possible, whether they are climate-related or not.

As the intensity of risks varies greatly depending on geographic area, Crédit Agricole Assurances sets its rates in such a way as to strike a balance between customer responsibility and risk pooling.

Crédit Agricole Assurances' aim is to maintain insurability in all territories.

OPERATING FOOTPRINT

To promote carbon neutrality by 2050, Crédit Agricole S.A. has based its operating footprint reduction targets (energy consumption in buildings, electrification of vehicle fleets, responsible digital technology, employee business travel and responsible purchasing) on a rigorous methodology, in line with the target of limiting global warming to 1.5°C by 2100.

2.2.1.5 METRICS LINKED TO THE GROUP'S CLIMATE STRATEGY

The metrics below are used to monitor Crédit Agricole S.A.'s climate strategy.

Performance indicators	Unit	2025	2024	Entities concerned
Portfolio of green assets meeting eligibility criteria of the Group Green Bond Framework of November 2023	€bn	24.70	21.69	CACIB
Financing of renewable energy	€m	412	312	LCL
Additional number of companies engaged on climate compared with 2021	Number	1,818	1,478	Amundi
Contribution to the financing of installed renewable energy capacity via investments	GW	16	14	CAA
Financing of renewable energy	€m	1,320	1,192	CAL&F
Unifergie commercial production (financing of renewable energy)	€m	1,377	1,292	CAL&F
Reduction of exposure to oil extraction and production compared to 2020 (outstanding financing)	US\$bn	2.05	3.20	CACIB
Reduction of exposure to oil extraction and production compared to 2020 (% change)	%	-72	-56	CACIB
Growth in low-carbon energy exposure compared to 2020 (outstanding financing)	€bn	20.00	17.20	CACIB
Growth in exposure to low-carbon energy compared to 2020 (% change)	%	170	132	CACIB
Exposure to thermal coal as a % of total outstandings	%	0.03	0.04	Amundi
Thermal coal exposure	€bn	0.20	0.41	CACIB
Financing of low-carbon energy	€bn	22.51	21.00	Crédit Agricole S.A.

Crédit Agricole S.A. pursues a policy of energy efficiency in its buildings in France, as demonstrated by its signing of the Ecowatt Charter.

Crédit Agricole S.A. regulates its employees' business travel through a travel policy that defines basic rules (travel class according to duration, type of transport used, etc.) to ensure compliance with the decarbonisation pathway, passenger safety and cost control.

The Group has implemented a "Responsible Purchasing" policy that applies to Crédit Agricole S.A. and its subsidiaries. This policy is set out in a "Responsible Purchasing" programme, rolled out within Crédit Agricole S.A. and its subsidiaries and detailed in part 4.2.5.5 "Taking action for the transition to a low-carbon economy".

The commitments are presented in part 2.3.4, "Operating footprint", and the targets in part 2.4.1.4, "Operating footprint targets".

2.2.1.4 CLIMATE IN CRÉDIT AGRICOLE GROUP'S BUDGET PLANNING

To meet the monitoring requirement for sector-specific decarbonisation pathways as part of the implementation of the Group's overall strategy, the steering of Net Zero commitments related to the financing of eight sectors ⁽¹⁾ (Oil and Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel) is integrated into the budget process of the banking activity. Carbon is managed as a scarce and diminishing resource. The carbon aspect of financing is monitored according to sector-specific decarbonisation pathways, either in absolute terms or in terms of intensity, with annual targets validated in line with the 2030 GHG emission reduction targets announced by Crédit Agricole Group. A dedicated carbon management team has been set up within the Group's Finance department. Climate impact is thus integrated into strategic decisions.

(1) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

All of these metrics are monitored by Crédit Agricole S.A. twice a year. Most of the metrics are presented at the highest level of Crédit Agricole S.A.'s governance through the ESG Strategy Committee chaired by the Chief Executive Officer of Crédit Agricole S.A., Olivier Gavalda, and to the Board of Directors via its Social Commitment Committee.

Additional number of companies engaged on climate compared with 2021

This metric counts the additional number of undertakings covered by a direct climate commitment over the period 2021-2025. The definition of the commitment is provided by the United Nations (UN) Principles for Responsible Investment according to four characteristics (nature of the commitment, theme of the commitment, commitment cycle and monitoring of commitments).

Contribution to the financing of installed renewable energy capacity through investments

This metric reflects the renewable energy production capacity (hydroelectricity, solar photovoltaic, onshore or offshore wind power – possibility of extension to storage assets) held by the Crédit Agricole Assurance Group through its unlisted strategic holdings.

Reduction in exposure to oil extraction and increase in exposure to low-carbon energy

These metrics show Crédit Agricole CIB's exposure to primary energy extraction, production and storage in terms of Exposure At Default (EAD). EAD allows both on-balance sheet and off-balance sheet assets to be accounted for. Low-carbon energy includes renewable energy and nuclear energy. Oil extraction and production refer to upstream oil in the value chain.

Outstanding thermal coal financing

This metric shows the sum of outstanding amounts (in EAD) of dedicated and non-dedicated financing related to thermal coal by Crédit Agricole CIB. Dedicated financing corresponds to amounts dedicated to thermal coal projects (the entire EAD amount).

Commercial production in renewable energy financing for Crédit Agricole Leasing & Factoring/Unifergie

The financing included in the metric relates to the following energy sources and equipment: wind, solar, geothermal, hydraulic, waste recovery, marine, biomass, methanisation, hydrogen, energy efficiency, low-carbon energy and public energy infrastructure. The measurement in euros is relevant because the data is based on financing provided by companies within the Crédit Agricole Leasing & Factoring scope.

Financing of low-carbon energy

Crédit Agricole S.A.'s low-carbon energy financing includes renewable energy financing by the entities LCL, Crédit Agricole Bank Polska, Crédit Agricole Leasing & Factoring/Crédit Agricole Transitions & Énergies (Transitions & Énergies), Crédit Agricole CIB and nuclear energy financing by Crédit Agricole CIB.

2.2.2 CLIMATE CHANGE ADAPTATION

Climate change is already having a growing economic and social impact: global losses have tripled in 25 years ⁽¹⁾, and a 3°C scenario could cause global GDP to fall by up to 22% by 2100 ⁽²⁾.

The Paris Agreement requires simultaneous action to be taken on mitigation (GHG emission reduction) and adaptation (preparing for the inevitable consequences of climate change). While mitigation has long dominated climate strategies, adaptation is now becoming essential.

France took a decisive step forwards on 10 March 2025 when the Ministry of Ecology presented its third National Climate Change Adaptation Plan (PNACC 3) ⁽³⁾ and its 52 concrete measures to adapt the country to the “visible and expected impacts of climate change”.

Financial institutions occupy a unique position: both because of their direct exposure to physical climate risks and because of their role in supporting the financing of the economy, they can direct capital towards resilient sectors, assess and adapt product pricing in line with climate risks, and support their customers in the transition to more resilient models.

Founded in the 19th century to finance agriculture, which was ignored by the banking system, Crédit Agricole Group has retained this value of societal utility by supporting major changes. With its model of local proximity, the Group is at the forefront of adaptation strategies because, unlike mitigation, which must take place at the global level, adaptation makes sense at the local level.

The Group is therefore structuring its adaptation strategy through a gradual approach, aligned with national (PNACC 3), European (EU Climate Adaptation Strategy) and international (UNEP, Paris Agreement) frameworks, to support its customers in their specific regional adaptation needs.

A PROGRESSIVE AND STRUCTURED APPROACH

Faced with the emergence of climate change adaptation issues, the Crédit Agricole Group is rolling out a pragmatic strategy to gradually integrate best scientific practices into its offering and processes, while responding to the urgent needs of customers and regions. Aligned with the Principles for Responsible Banking methodology, this strategy is structured around three phases:

- assessing risks and opportunities: understanding exposure to physical climate risks and identifying adaptation opportunities for customers and regions;
- defining strategy and targets: integrating adaptation considerations into the overall strategy and defining measurable targets;
- action plan and support: implementing its roadmap in practice through its activities and support for its customers.

The Group will focus its efforts on the sectors and regions most exposed to physical climate risks, such as agriculture, tourism, critical infrastructure, and forest and coastal areas.

This work is part of the market initiatives in which Crédit Agricole S.A. is involved: the UNEP-FI Principles for Responsible Banking's “Adaptation and Resilience” working group; the European Commission's “Mobilising Climate Resilience Financing” working group; and the Institute for Sustainable Finance's (ISF) “Financing Climate Change Adaptation” working group.

(2) <https://www.weforum.org/publications/the-cost-of-inaction-a-ceo-guide-to-navigating-climate-risk/>

(3) <https://www.ecologie.gouv.fr/actualites/gouvernement-lance-nouveau-plan-national-dadaptation-changement-climatique>

PILOT APPROACH AND REGIONAL EXPERIMENTATION

To implement its climate adaptation strategy, Crédit Agricole S.A. has opted for a pilot project approach, working closely with local players. This experimental approach provides a concrete understanding of each region's adaptation needs and enables the joint development of solutions tailored to the realities of each sector.

In 2025, Crédit Agricole Group launched several pilot projects in different regions. For example, LCL rolled out two pilot projects in 2025 to help its corporate customers adapt to climate change:

1. the "Adaptation pilot": a range of services to strengthen the climate resilience of undertakings, drawing on the expertise of the Group and external partners, including R3 for "Adaptation diagnostics";
2. the "Impact Lab": a collaborative initiative bringing together nine undertakings in the waste reprocessing sector to collectively identify climate risks and develop specific adaptation solutions.

These experiments constitute a laboratory for innovation in support of the Group's strategy, enabling it to capitalise on lessons learnt in the field to enrich methodologies and develop solutions that can be replicated on a larger scale.

CHALLENGES AND LIMITATIONS

Crédit Agricole S.A. recognises that implementing an ambitious climate adaptation strategy comes with significant challenges. Localised climate data and physical risk assessment methodologies remain imperfect, creating uncertainty in portfolio analyses. Furthermore, integrating adaptation considerations requires profound organisational transformation and significant investment in training and information systems.

Finally, financing adaptation often generates diffuse and long-term benefits that are difficult to quantify in traditional business models. The absence of a clear taxonomy and harmonised sector-specific standards complicates the identification, assessment and reporting of adaptation activities.

Despite these challenges, Crédit Agricole S.A. also sees them as opportunities for innovation. A gradual, collaborative approach allows us to move forwards pragmatically, taking advantage of lessons learnt and adjusting our strategy as knowledge and available tools evolve.

2.2.3 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

2.2.3.1 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

Based on its Climate Transition Plan and the double materiality analysis validated by the Group's governance bodies (see part 1 "General information"), the Group has identified the following main sources of Impacts, Risks and Opportunities related to climate change:

- the positive and negative impacts of supporting customers' transitions to contribute to carbon neutrality, a key element of the Group's climate change mitigation strategy;
- managing the positive and negative impacts of the Group's GHG emissions in relation to its operating footprint and its financing and investment business lines;
- the impact of climate risk factors (physical and transition risk) on the risk profile of Crédit Agricole Group customers;
- the pursuit of commercial opportunities created by sustainable finance with regard to climate issues, as well as the energy and environmental transition.

Description of IROs	Positioning in the value chain	Time horizon
Positive impacts		
– Climate change: The Group's positive impact on the climate through financing, investment and insurance activities contributing to the transition: dedicated loans and financing, committed financial savings, climate insurance products	Downstream value chain	Long-term
Negative impacts		
– Climate change: Negative impact of the Group's activities (investment, financing, insurance) on climate change	Downstream value chain	Long-term
– Operational environmental footprint: Negative impact of the operating footprint on the climate	Own operations	Long-term
Risks		
– Climate change: Physical risk factors related to climate change that affect the Group's risks (credit, financial, operational)	Downstream value chain	Long-term
– Climate change: Transition risk factors related to climate change that affect the Group's risks (credit, financial, operational)	Downstream value chain	Medium-term
– Climate change: Regulatory and reputational risk related to the Group's activities that contribute to climate change	Downstream value chain	Invariable
– Support for customer transitions: Reputational risk in the event of a lack of transparency or misleading communication on climate issues	Downstream value chain	Short-term
– Support for customer transitions: Risk of increased costs for the Group due to the investments required to transform its business model in order to decarbonise its activities and boost its resilience (data purchases, investments, resources, systems, limitation of certain activities)	Entire value chain	Long-term
Opportunities		
– Climate change: Development of new services and solutions to support customers' transition to a low-carbon economy	Downstream value chain	Medium-term
– Support for customer transitions: Contribution to commercial development and improvement of the Group's image through its strong commitment to climate action	Downstream value chain	Long-term

The material IROs for Crédit Agricole Group are presented in the table above. The qualitative and quantitative work described above has made it possible to identify the major risks affected by climate risk, which therefore need to be prioritised when developing the Group's risk management system. To date, the only short-term risk identified is credit risk, which is more impacted by physical and transition risks, particularly on Corporate portfolios (very large corporates, large corporates, medium-sized corporates and small corporates) in the most vulnerable sectors.

The climate stress test carried out in the first quarter of 2025 showed that climate risks have a very limited impact on market risk across all the time horizons defined by the Group, in line with the nature of the Group's market activities. However, their effects are reassessed on a regular basis. Nevertheless, they do not warrant any action within a one-year timeframe, nor does the transition risk for insurance activities.

2.2.3.2 INTERACTION WITH THE STRATEGY AND BUSINESS MODEL (INCLUDING BUSINESS MODEL RESILIENCE TO PHYSICAL/TRANSITION RISKS)

The financial materiality and resilience of the business model are discussed in the part 2.2.3.1 "Material impacts, risks and opportunities" above.

The climate scenario analyses also assess the resilience of the business model (see part 1.4.1.2 "Description of the process to identify and assess material impacts, risks and opportunities related to climate change").

2.3. ACTIONS AND RESOURCES IN RELATION TO CLIMATE CHANGE POLICIES

Within the framework of its relationship model, through a global approach to its customers' needs, the specific characteristics of the banking sector and the interdependence of decarbonisation levers, the Group's decarbonisation initiatives comprise a range of actions to reduce GHG emissions. The contribution of decarbonisation levers to the achievement of GHG emission reduction targets should therefore be considered globally.

The actions and resources allocated by the Crédit Agricole Group to meet the targets of the climate strategy, in line with its Societal Project initiated in December 2021, are based on six pillars to capture the various challenges of its business lines:

- supporting customers in their environmental and energy transition;
- implementing sector-specific action plans;
- rolling out investment action plans;
- a reduction in its operating footprint;
- a voluntary contribution to carbon neutrality;
- the implementation of an ambitious climate risk management system.

SUPPORTING ITS CUSTOMERS OR MAKING THE TRANSITION ACCESSIBLE TO AS MANY PEOPLE AS POSSIBLE

As part of its Societal Project initiated in December 2021, Crédit Agricole Group has adopted a proactive approach to supporting the transition of its customers in all markets (individuals, corporates, public authorities, SMEs, farmers). Its aim is to ensure that all economic and regional stakeholders are supported and assisted in the transformations that are currently underway and those to come. Crédit Agricole Group continues to play an active role in major societal transitions by providing all its customers with products and services that support the energy and environmental transition and by constantly pursuing a policy of innovation and progress.

This support takes the form of concrete actions within its operations, such as:

- in 2023, Crédit Agricole Group created an entity dedicated to energy and environmental transition: Crédit Agricole Transitions & Énergies (Transitions & Énergies). This entity supports and facilitates its customers' environmental transitions through financing and investment in renewable energy (RE) projects. It also contributes to the production and supply of low-carbon electricity through direct distribution chains, in cooperation with regional players. Finally, it offers transition consulting and solutions, supporting the Group's customers in their energy efficiency initiatives;
- training all employees and executives in CSR issues, and coordinating a network of energy experts and energy transition advisors;
- raising customer awareness of sustainability matters and of environmental and energy transition matters;
- banking support for customers' transition projects through the implementation of a wide range of financing solutions, such as targeted financing, sustainability-linked loans and sustainable savings solutions;
- support through insurance and banking-related products for transition projects such as the production and supply of renewable power and the protection of installations;
- sustainable mobility solutions;
- the identification and monitoring of financing in the sectors with the highest emissions (see part 2.3.2 "Sector-specific action plans");
- the creation of the Carbioz[®] platform, a solution for marketing carbon certificates bearing the "Label Bas Carbone" ("Low-Carbon Label"), originating from the transition of French farms.

PARA-BANKING SUPPORT FOR CORPORATE, PUBLIC SECTOR AND SOCIAL ECONOMY CUSTOMERS

Through Crédit Agricole Transitions & Énergies, the Crédit Agricole Group aims to accelerate the development of renewable energies in France and to support all its customers in their efforts to reduce their energy consumption and environmental impact.

In 2024, Crédit Agricole Transitions & Énergies launched, through its subsidiary R3, advisory services and solutions in the three main transition areas: CSR, decarbonisation and energy performance. These solutions are designed for SMEs, MSEs and large corporates, and adapted to their degree of maturity. These offerings provide end-to-end support to corporates, from diagnosis to strategy development and implementation. Its ambition is to accelerate change and encourage corporates to transform themselves, by developing concrete solutions to help them act effectively and sustainably.

PRODUCTION AND SUPPLY OF ELECTRICITY FROM RENEWABLE SOURCES

Crédit Agricole Transitions & Énergies offers a direct-distribution renewable energy aggregation and supply offering that enables local authorities to purchase low-carbon electricity locally and move towards covering 100% of their energy needs at controlled prices. The offering is based on carbon-free electricity supply contracts that enable local authorities to source their electricity either from an identified direct-distribution producer or on the market with a certificate of origin for the production. This offering is provided by Selfee, a subsidiary of Crédit Agricole Transitions & Énergies, an electricity market operator that enables the purchase via direct distribution chains, at a local price, of power produced locally, as the only intermediary of the energy producer.

These new renewable energy production solutions will be available to large corporates in the medium-term.

VOLUNTARY CONTRIBUTION: CARBIOZ OFFERING

The Carbioz offering, created with the aim of giving concrete form to Crédit Agricole Group's commitments to the environmental transition, was launched in March 2024.

Carbioz promotes an offering supported by agents who sell carbon credits generated by French agriculture and forestry to financing customers such as corporates, local authorities and associations wishing to engage in voluntary financing initiatives. Carbioz also offers a framework of trust, based on the Low Carbon Label established by the French government. Finally, Carbioz allows financing customers to choose and then formalise their voluntary carbon contribution, with secure record-keeping, and to benefit from a dedicated customer area with various reporting tools to support their climate strategy.

Since autumn 2024, in addition to the agricultural projects marketed by France Carbon Agri, Carbioz has expanded its offering and formed partnerships with Hummingbirds and EcoTree, providing Low Carbon Label certificates from French forestry projects. Carbioz also offers certificates from hedge planting with SOLENAT, as well as from arboriculture and field crops with its partners AMANDERA, Carbonapp and Carbon & Co.

This offering is intended for players who have completed their carbon assessment and defined their decarbonisation pathway. The carbon contribution consists of supporting projects to avoid or sequester greenhouse gas emissions (expressed in CO₂ equivalent) outside its value chain. Beyond carbon, voluntary contribution serves as a lever for action at the regional level in support of the environment and quality of life, particularly through various additional environmental benefits (biodiversity, water and air quality, etc.). The counterpart of this contribution is obtaining Emission Reduction Certificates ("carbon credits").

ORGANISATION OF SKILLS DEVELOPMENT FOR THE NETWORK AND CUSTOMERS, AND TRAINING FOR THE CUSTOMER ADVISORY BUSINESS LINE TO SUPPORT THE TRANSITION

To fulfil its role as an advisor and transition partner, Crédit Agricole Group organises skills development activities at all levels.

Training modules have been developed and rolled out, in particular to improve the skills of relationship managers. For example, IFCAM (the Crédit Agricole Group University) provides all Group entities with generic modules on sustainable savings and financing, and on CSR commercial approaches. At Crédit Agricole CIB, the ESG Academy is continuing with modular training courses tailored to specific needs. With Amundi Academy, Amundi accompanies and supports the marketing of its offerings with mainly digital promotion tools aimed at the advisors and experts of the Group's distribution networks.

CREATING AND COORDINATING NETWORKS OF ENERGY TRANSITION EXPERTS AND ADVISORS

Networks of experts have been established in certain Group entities. Their purpose is to promote sales, and they may also play a representative, educational or oversight role. These networks exist at LCL throughout France and at Crédit Agricole CIB internationally.

Crédit Agricole Transitions & Énergies has dedicated teams to strengthen its presence in the regions, coordinating a network of energy transition advisers in France who support corporate account managers, as well as a network of experts in the Group's Energy and Environment division in France and internationally (with a significant presence in Italy, Poland and Ukraine in particular).

LCL has an Energy division made up of experts serving the Corporate departments throughout France. It specialises in the energy transition and energy markets. It supports the growth of energy stakeholders (developers and producers of renewable energy, cleantech, greentech, etc.) and the energy decarbonisation of LCL's corporate customers who are energy consumers.

RAISING CUSTOMER AWARENESS

The Group has established a commercial CSR approach with the implementation of a strategic transition support process reinforced by an "ESG Maintenance Guide". Its ambition is to initiate a strategic dialogue from a transition perspective by identifying levers to support customers.

To encourage reflection and awareness on a given subject, or the sharing of best practices, a wide range of initiatives have been implemented for customers: webinars, training courses, conferences and dedicated programmes. At LCL, the Sustainable Solutions and Decarbonisation department supports the environmental and energy transition of corporate customers through a unique multi-disciplinary system: the Sustainable Finance division, regional Sustainable Solutions Managers, the Energy division specialising in the energy transition and energy markets, and a team responsible for sourcing, labelling and coordinating an ecosystem of green partners. This business line enables LCL to offer its corporate customers comprehensive support and concrete decarbonisation and energy transition solutions, from strategic advice to the roll-out and financing of transition solutions.

PARA-BANKING SUPPORT FOR INDIVIDUAL CUSTOMERS

CUSTOMER AWARENESS AND PROMOTION

LCL regularly runs four campaigns per year to raise awareness of energy renovation among its customers, whether homeowners or landlords. Each awareness campaign is conducted via email and push notifications.

SUPPORTING CUSTOMERS IN THEIR ENERGY RENOVATION PROJECTS THROUGH AN ALL-IN-ONE PLATFORM

Crédit Agricole Transitions & Énergies offers an online platform called "J'écorénove mon logement" (I'm eco-renovating my home), while LCL offers "Ecorénov'LCL" and a range of services to inform and guide customers and make their projects possible. This platform received a total of 1 million visits between January and September 2025.

The service allows prospective customers or customers of the French retail bank who wish to renovate their property to develop their project: the services help them identify the work to be carried out as a priority, to estimate its cost, the aid and financing they need, and to find a tradesperson. The advisor then takes the reins, proposing the Group's various financing offerings. To take things further, Crédit Agricole Transitions & Énergies has expanded its *J'écorénove mon logement* and *Ecorénov'LCL* offerings by partnering with Hello Watt, a specialist in energy-efficient renovation, to offer individuals a seamless experience and comprehensive support, from technical and economic studies to the completion of the work.

In June 2025, Crédit Agricole Transitions & Énergies acquired a majority stake in Comwatt, an undertaking specialising in the production and optimisation of solar energy consumption for individuals. This initiative will accelerate the development of concrete solutions to support Crédit Agricole S.A.'s individual customers in their decarbonisation projects and energy expenditure management.

In Italy, Agos has launched AgoràCasa, a free online simulator available on its website that allows users to assess the energy rating of their home in three simple steps: assessment, customisation and recommendations. Ultimately, it allows customers to identify the necessary improvement work and obtain an estimate of the associated costs. At the same time, Agos has launched Agos One, an innovative and unique loan solution designed for those who wish to invest in products aimed at improving the sustainability and energy efficiency of their homes.

PARA-BANKING SUPPORT FOR ENTREPRENEURIAL CUSTOMERS

Crédit Agricole S.A. supports its entrepreneurial customers in their comprehensive approach to transitions. Professional advisers receive support from energy transition advisers when a customer need has been identified. This system raises awareness among customers of the various solutions available to them, enabling them to approach transitions with greater peace of mind.

2.3.1 FINANCING

2.3.1.1 SUPPORTING CUSTOMERS

2.3.1.1.1 SUPPORTING THE CLIMATE TRANSITION OF CORPORATE, PUBLIC SECTOR AND SOCIAL ECONOMY CUSTOMERS

The Group offers sustainable financing solutions to support corporate, public sector and social economy customers in their transition projects:

- in 2018, Crédit Agricole S.A. established a Green Bond Framework, updated in 2023, which serves as a common framework for all Crédit Agricole Group issuing entities for their issues of Green Bonds for all entities, and Green Notes for Crédit Agricole CIB in particular;
- targeted financing is designed to fund projects that are subject to asset liability management on environmental issues (European Taxonomy climate change mitigation and adaptation targets) and social issues. The option of providing preferential pricing is left to the discretion of each entity;
- financing renewable energy projects: Crédit Agricole Transitions & Énergies finances renewable energy production and energy efficiency projects in conjunction with the Group's banks, through a financial and legal engineering offer, as well as financing offerings in various areas of sustainable energy (renewable energy, energy performance, environment). From 2020 to 2030, the ambition of Crédit Agricole Transitions & Énergies is to mobilise €19 billion in renewable energy financing provided by Crédit Agricole Group entities in France;
- sustainability-linked loans finance activities where the interest rate is indexed to the undertaking's own ESG performance criteria, enabling customers to align their CSR strategy with the financing of their growth or operations;
- Crédit Agricole Leasing & Factoring's energy transition financing solutions for corporates, SMEs, and farmers (Green Solutions) to finance energy transition equipment for corporates, SMEs and farmers who want to reduce their energy bill and their carbon footprint and place environmental issues at the heart of their business model. The range consists of three offerings: LED lighting, green mobility and solar self-consumption;
- an offer for the renovation of real estate assets (real estate leasing) to finance their energy renovation work;
- Crédit Agricole Leasing & Factoring's CSR factoring range supports companies in their energy and societal transition, depending on their segment and maturity in terms of CSR;
- the EIB and Bpifrance transition financing packages are financial mechanisms designed to support France's energy and environmental transition. As a major player in the French banking sector, Crédit Agricole Group acts as a facilitator, loan distributor and advisor, making EIB and Bpifrance resources more accessible to corporates and local authorities.

Crédit Agricole Italia offers:

- "Scoring ESG Linked" financing featuring a reward system, with a reward linked to an overall assessment of the customer's sustainability performance detected periodically by an ESG score obtained through an evaluation questionnaire that the customer can complete online;
- "SACE Green" financing, guaranteed by the Italian export credit agency, for investment projects in line with the environmental targets set by the agency;

- a digital supply chain platform that enables undertakings at the upstream end of a production chain to assess the ESG positioning of their suppliers. Based on performance measured by an ESG score, it offers the most virtuous suppliers in terms of ESG a discount in exchange for the early payment of invoices.

2.3.1.1.2 SUPPORT FOR INDIVIDUAL CUSTOMER CLIMATE TRANSITIONS

To reduce financed GHG emissions, Crédit Agricole Group offers a range of offerings and solutions to its individual customers. The most important of these are described below.

FINANCING OFFERING

Reinvigorating the distribution of all eco-PTZ interest-free loan options

The interest-free eco-loan (eco-PTZ) is a zero-rate loan subsidised by the French government to finance energy improvements on residential properties. The list of work eligible for financing is drawn up by the public authorities. Regional banks and LCL are the leading distributors of eco-PTZ zero interest rate loans, with a market share of 35% in 2025.

Retail banking in France is committed to promoting the various options of this regulated loan, such as the Eco-PTZ Ma Prime Rénov' renovation loan. The introduction of the complementary eco-PTZ at the end of 2024 allows customers who have already benefited from an eco-PTZ, but not used the full entitlement, to apply for the additional amount for other work.

A clearer, wider range of transition-related loans to meet all needs

The aim is to offer an alternative to customers who are not eligible for the eco-PTZ or who wish to supplement it in order to finance all types of energy renovation projects or the acquisition of energy transition equipment.

SOLUTIONS PROMOTING LOW-CARBON MOBILITY

The Group's businesses lines are developing a range of products and services to promote low-carbon mobility.

Retail banking in France offers more advantageous rates than the standard scale for the purchase of vehicles emitting less than 50 g of CO₂/km, bicycles and motorised personal mobility devices, and recharging stations. The retail banking networks in France also offer insurance policies that encourage the purchase of electric vehicles, car-sharing and drivers with low annual mileage.

Crédit Agricole Personal Finance & Mobility has set itself the goal of becoming a leader in electric mobility:

- Agilauto, which is committed to more sustainable mobility for all, provides turnkey mobility solutions to individual, SME and corporate customers of the retail bank (LCL) in France through rentals with a purchase option and long-term rental offerings;
- CA Auto Bank, present in 18 European countries and Morocco, regularly enters into strategic partnerships with international electric vehicle manufacturers, enabling it to offer more sustainable financing and mobility solutions to an ever-wider audience. Since early 2024, CA Auto Bank and Drivalia have signed the following new partnerships: in Italy, Spain, France, Germany and Switzerland, they collaborate with BYD to develop financing offerings dedicated to electric vehicles. In France and Switzerland, they have partnered with Cadillac to support the launch of its first 100% electric model;

- since 2009, Crédit Agricole Personal Finance & Mobility has been a partner of Chinese manufacturer GAC through the GAC-Sofinco joint venture. This partnership will be strengthened in 2025 with the creation of GAC-Sofinco Leasing, offering financial and operational leasing solutions on the Chinese market. With a portfolio of more than 190,000 vehicles and nearly 300 employees, GAC-Sofinco Leasing supports the GAC Group's brands. 64% of leasing contracts already cover electric vehicles.

Furthermore, more than a year after its launch, Agilauto Partage, the 100% electric rural car-sharing service, is establishing itself as an innovative response to the challenges of mobility in underserved rural areas by making the use of electric vehicles more widespread at a time when many French drivers have never used one. The aim is to roll out this solution across France.

To encourage lower-carbon or carbon-free travel, LCL offers a loan to promote the energy transition within mobility, consisting of a personal loan at a preferential rate to finance the purchase of new or used vehicles, including electric or hybrid cars emitting less than 50 g of CO₂/km, bicycles (electric or non-electric), and electric motorised personal mobility vehicles. In addition, LCL offers a preferential-rate loan for the purchase of a mechanical or electric bicycle, with an interest rate of 0% with no loan application fees for part of the year. For customers who own a 100% electric car, LCL offers car insurance with a green bonus (€100 refunded in the first year of coverage). For all cars insured by LCL Assurances, refurbished parts are regularly suggested to customers in the event of a claim. LCL also offers a specific insurance policy covering the risks associated with the ownership and use of motorised personal mobility vehicles (MPMV), the use of which has grown considerably in urban areas.

MAKING ENERGY-EFFICIENT HOME RENOVATION WORK ACCESSIBLE TO AS MANY PEOPLE AS POSSIBLE

With the launch of Sofinco Éco-Transitions, Sofinco has taken a strong step towards supporting individuals, construction professionals and other players in energy renovation. With the ambition of financing €3 billion-worth of work over the next three years, representing 300,000 renovations in France, Sofinco intends to support the government's targets to renovate energy-inefficient buildings and unlock housing renovation by supporting housing professionals (tradespersons, diagnosticians, real estate agents, etc.) and their customers. Sofinco Éco-Transitions goes beyond financing and offers a comprehensive package of services designed to simplify and streamline energy renovation projects for private individuals. To achieve this, Sofinco will draw on its knowledge of the sector, its network of more than 3,000 qualified professionals and its high-performance digital tools.

2.3.1.1.3 SUPPORTING THE CLIMATE TRANSITION OF ENTREPRENEURIAL CUSTOMERS AND SMES

The entrepreneur and professional market covers a wide range of customers, due to the multitude and disparity of business sectors (tradespersons, retail traders, self-employed professionals, etc.), to the volume of revenues, to consulting and support needs, which can range from simple to the complex, and to very different uses. This market is still developing, driven by micro-entrepreneurs and sole traders, with changing customer behaviours and expectations. Driven by technological, societal and regulatory changes, it is expected to be reshaped by 2030 with the emergence of new entrepreneur profiles: "slashers" (professionals who combine several activities), employees who also have a professional activity, young people, seniors, entrepreneurs involved in impactful projects, etc.

DEDICATED OFFERINGS AND FINANCING

In light of these changes, it is essential to provide entrepreneurs with structured support tailored to their circumstances, enabling them to combine economic performance with climate commitment. LCL supports its SME customers with electric mobility financing solutions (electric mobility loan, long-term car rental, rental with purchase option, etc.) and partners who are transition experts. To allow entrepreneurs to make a greater contribution, environmental investments are also offered in the "LCL Trésorerie Pro" range. In addition, there is a responsible savings offering, with funds selecting undertakings engaged in the energy transition process: LCL Compensation Carbone Actions Monde, LCL Compensation Carbone Multi Stratégies and FCP Solidarité Habitat et Humanisme.

TRANSITION LOANS

Following on from the targeted transition loan offering for the corporate market, a pilot scheme for SMEs was launched in the second quarter of 2025. In line with regulations, this offering will initially support customers in four areas: energy renovation, renewable energies, clean transport and mobility (including infrastructure) and energy-efficient buildings. A training programme, linked to the roll-out of the offering, has been offered to employees.

MOBILITY

A comprehensive range of mobility solutions (including electric mobility) is available to all SMEs through three scalable offers (Essential, Business and Business+).

A targeted approach for healthcare professionals (nurses and doctors) is currently being developed with the help of Agilauto (long-term rental offer with preferential terms).

2.3.1.1.4 SUPPORTING THE CLIMATE TRANSITION OF CUSTOMERS IN THE AGRICULTURAL SECTOR

As a long-standing partner of farmers (eight out of 10 French farmers are Crédit Agricole customers), Crédit Agricole has always been committed to supporting major changes in the agriculture and agri-food industries. In an increasingly complex environmental, societal and political context, one of its missions is to help its farming customers remain competitive while adapting to the effects of climate change and limiting their impact on the environment.

ACTION PLANS FOR CUSTOMERS IN THE AGRICULTURAL SECTOR

Crédit Agricole's ambitions for the agricultural sector are based on four major actions:

- training Group employees on agricultural transition issues;
- raising awareness among farming customers of the challenges of agricultural transitions and assessing their maturity in these areas in order to better support them through these transitions;
- developing and sharing advice, tools and banking or insurance products designed for farming customers to support them in their transitions; and
- supporting research and innovation to help farmers in their transitions.

AGRIVOLTAICS

Crédit Agricole Transitions & Energies is working to develop additional tools to support its customers in their agrivoltaic projects. In partnership with Crédit Agricole S.A.'s agriculture market, it offers Regional Banks a skills development kit including explanatory materials and tools for use in agrivoltaic projects.

At the same time, in 2025 Crédit Agricole Transitions & Energies created a joint venture with JPEE (a renewable energy project developer) whose mission is to develop local renewable energy assets by making a sustainable contribution to the installation, maintenance or development of agricultural production.

2.3.1.1.5 SUPPORTING CUSTOMERS' ADAPTATION TO THE IMPACTS OF CLIMATE CHANGE

In order to support the adaptation of all stakeholders in society to the impacts of climate change, Crédit Agricole S.A. is developing a structured, continuous improvement approach and is giving itself the means to systematically integrate climate resilience considerations into its activities.

Crédit Agricole S.A. has affirmed its interest in positioning itself in the adaptation and resilience economy by providing financial products and services, investing in adaptation projects, supporting its customers and raising their awareness of climate risks and opportunities. In addition, Crédit Agricole S.A. works closely with development financial institutions and public authorities. With its cooperative model rooted in the regions, Crédit Agricole Group has a unique advantage and a distinctive role to play in making adaptation a lever for local transformation in the public interest.

Aware of the specific needs inherent in each customer profile, the Group intends to offer support that best meets adaptation requirements.

INDIVIDUAL CUSTOMERS

The annual frequency of severe natural phenomena has quadrupled over the last 20 years compared to the previous 40 years. Individuals are mainly exposed to the risks of flooding (56% of natural disasters recorded ⁽¹⁾), clay shrinkage-swelling (50% of homes exposed ⁽²⁾) and heat waves.

Crédit Agricole Group is currently structuring itself and equipping itself with the necessary resources (data, tools, expertise, etc.) to help its customers identify the vulnerabilities of their real estate assets to the impacts of climate hazards and implement specific adaptation measures to make their properties more resilient (e.g. installation of submersible pumps, raising the height of buildings, reinforcing houses with soil humidification, insulation/greening to improve summer comfort).

While systems designed to finance and support individuals in their energy efficiency projects primarily address the issue of climate change mitigation, they also cover adaptation to the effects of climate change. By improving insulation in homes, thermal renovation also helps to improve comfort during the summer, and can help individuals become more resilient in the face of extreme weather phenomena such as heat waves.

As part of the project to adapt the tourism industry in Savoie, the Group assessed the exposure and vulnerability of all of its customers' real estate assets to six climate hazards (heat waves, loss of snow cover, high winds, forest fires, river flooding and clay shrinkage-swelling) using a predictive model based on two IPCC scenarios (RCP 4.5 and RCP 8.5) for different time horizons (2050, 2100).

CORPORATE CUSTOMERS

Physical climate risks are also having a growing impact on undertakings' value chains (machine breakdowns, supply chain difficulties and even business interruptions).

Crédit Agricole S.A. supports its corporate customers both in identifying vulnerabilities within their value chains (vulnerability assessment) and in making the necessary adaptation investments to strengthen their resilience (water consumption reduction plans, financing for optimised heating networks, diversification of raw material supplies, etc.).

LCL has rolled out a pilot customer adaptation journey for corporates, aimed at helping them identify, qualify, manage and monitor their physical climate risks. The aim of this journey is to offer solutions to improve undertakings' resilience through dedicated offerings and partnerships. At the same time, LCL has created Lab'Impact, which brings together undertakings from the same business sector to reflect on how to transform their value chain to adapt to climate risks.

FARMING CUSTOMERS

Farmers are facing increasingly extreme weather events (droughts, floods, frosts, hailstorms, water stress, etc.), which are making farms, crops, livestock and, consequently, their incomes increasingly vulnerable.

Crédit Agricole Group is aware of its leading role in supporting its farming customers in adopting more sustainable and resilient practices. This is a matter of agricultural and food sovereignty for the regions. The Group is positioning itself to raise its customers' awareness of the risks they face locally and to meet their investment needs in order to make their farms more resilient.

PUBLIC SECTOR CUSTOMERS

Public authorities are also bearing the brunt of the consequences of climate change (heat islands, coastal erosion, flooding, forest fires, etc.), highlighting the need to redevelop land and adapt public infrastructure and buildings (schools, hospitals, heritage sites, etc.). To do this, they must integrate climate adaptation into all their policies: urban planning, mobility, water management, risk avoidance and energy transition.

Crédit Agricole S.A. intends to take on the role of providing support by supplying the necessary financing for regional projects (de-impermeabilisation, greening, sustainable rainwater management, renovation of buildings and infrastructure, etc.) and strengthening collaborations and partnerships with public and regional players.

Crédit Agricole Transitions & Énergies has signed a partnership agreement with Engie Solutions to facilitate access to global energy performance contracts for public buildings. The aim is to offer deferred payment to local authorities wishing to launch a Global Energy Performance Contract. This deferred financing should enable them to facilitate their decision making and subsequently implement these contracts for their property portfolios.

AVOIDANCE

See part 2.3.3 "Insurance", and more specifically 2.3.3.1.2 "Supporting customers' adaptation to the impacts of climate change".

2.3.1.2 SECTOR-SPECIFIC ACTION PLANS

As previously indicated, as part of its Climate Transition Plan and its membership of the Net Zero Banking Alliance ⁽³⁾ (NZBA) in 2021, Crédit Agricole Group defined decarbonisation pathways for eight sectors (Oil and Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel) and made resource commitments for the Residential Real Estate and Agriculture sectors. The Group prepared and implemented the following sector-specific action plans and decarbonisation levers, with a view to achieving the GHG emission reduction targets defined in its financing portfolios. These levers respond to the climate change-related impacts, risks and opportunities identified as material for the Group.

The definition of the scope by sector is described in part 2.4.1.1, "Financing targets".

(2) <https://www.adaptation-changement-climatique.gouv.fr/dossiers-thematiques/impacts/retrait-gonflement-des-argiles>

(3) In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

OIL & GAS

- End all funding for new fossil fuel extraction projects;
- End the financing of independent producers, whose activities are focused exclusively on the exploration and production of oil and gas;
- Review on a case-by-case basis corporate financing for energy companies, based on a regularly updated assessment, taking into account their commitments to the transition;
- refuse advisory mandates for bond issues of undertakings involved in the exploration and production of fossil hydrocarbons, except those relating to green bonds or sustainability-linked bonds;
- Prioritise customers who are strongly committed to reducing their carbon footprint, and who act as catalysts for the development of decarbonisation solutions (renewable energy, carbon capture and storage technologies, hydrogen production);
- continue to reduce financing for oil extraction: -72% of Crédit Agricole CIB's exposure ⁽¹⁾ to oil extraction in 2025 compared to 2020;
- withdraw from unconventional oil and gas ⁽²⁾ and exclude financing of projects in the Arctic ⁽³⁾.

POWER PRODUCTION

- Significantly increase the funding of renewable energy in France from 2020 to 2030, to reach a total of €15 billion (Crédit Agricole Transitions & Énergies). The financing reached at the end of 2025 was €6.5 billion;
- Increase exposure to low-carbon energy: 170% increase in Crédit Agricole CIB's exposure to low-carbon energy (production and storage) in 2025 compared to 2020 for a target of +80%;
- Expand the customer base, bringing in new customers to better reflect the growing diversity of the sector;
- Selectively withdraw from fossil fuel-based generation units by completing the exit from thermal coal by 2030 (EU and OECD) and 2040 (rest of the world).

AUTOMOTIVE

- Finance one in two new hybrid or electric vehicles and one in three new 100% electric vehicles by 2025. In a difficult Chinese and European market environment, these targets could not be achieved, with a result at the end of 2025 of 39% of new vehicles financed with hybrid or electric engines, and 16% of new vehicles financed with full electric engines. (Crédit Agricole Personal Finance & Mobility);
- promote the transition of private individuals and corporates to more sustainable vehicles and alternative mobility through tools such as short- and long-term rentals, social leasing or innovative initiatives such as partnerships with new players in the electric vehicle segment (Agilauto, Agilauto-Partage, Drivalia, etc.);
- Support carmakers in the investments needed to electrify their vehicles;
- Support the transformation of the sector by financing new players, such as battery manufacturers and recharging solution operators, carmakers exclusively dedicated to electric vehicles, and with a close monitoring of carmakers' carbon emission trajectories.

SHIPPING

- work with customers to estimate the carbon score of each ship in the portfolio or those to be built, and establish measures to finance the necessary investments (retrofit financing) to align with the Bank's Net Zero policy for ships where possible;
- Develop a proactive policy to finance the building of new ships using sustainable fuels, in collaboration with export credit agencies, in order to:
 - support customers in their orders for new-generation ships,
 - speed up the dismantling of the most polluting ships;
- Launch an improvement process to bring the methodology for calculating financed emissions into line with current regulations and industry standards.

AVIATION

- Give priority to financing fourth-generation aircraft, which are the most fuel-efficient;
- Engage in the sustainable fuels value chain;
- Maintain an ongoing dialogue with customers on sustainability matters.

COMMERCIAL REAL ESTATE

- Play a major role in financing the massive need for renovation work, by supporting customers and taking advantage of local regulations;
- Put energy efficiency at the heart of business efforts and risk policies by developing all-in-one, turnkey solutions to facilitate energy management in all buildings;
- Continue to improve the quality of data to supplement knowledge of the portfolio and of customers' efforts.

CEMENT

- Engage in a continuous dialogue with customers to encourage the adoption of intensity targets below 500 kgCO₂e/tonne of cement, for gross emissions of Scopes 1 and 2;
- continue to support the significant financing needs of its customers to achieve their decarbonisation targets (new infrastructure, CCUS development ⁽⁴⁾, electrification);
- Steer the cement portfolio, taking into account the CO₂e intensity targets set by customers, by reallocating assets in favour of cement producers with the most ambitious decarbonisation strategies.

STEEL

- Engage in continuous dialogue with customers not aligned with a 1.5°C trajectory to examine how Crédit Agricole can support them in their decarbonisation;
- Development of financing for projects involving low-carbon steel production technologies;
- Management of the Steel portfolio, with reallocation in favour of customers with the most ambitious decarbonisation plans.

⁽¹⁾ The exposure used is the Exposure At Default (EAD). The allocation percentage is on capital expenditure.

⁽²⁾ Or those of counterparties whose revenues from such activities exceed 30%; shale oil, shale gas, extra-heavy oil, including tar sands oil.

⁽³⁾ AMAP area for the terrestrial Arctic and beyond the Köppen line for the maritime Arctic.

⁽⁴⁾ Carbon Capture, Utilisation and Storage.

The Group also made commitments to invest resources in the Residential Real Estate and Agriculture sectors:

RESIDENTIAL REAL ESTATE

- Make comprehensive, high-performance renovation the focus of all discussions with customers, particularly when they are acquiring a new property with an energy performance certificate (EPC) of E, F and G;
- Develop innovative customer solutions, while mobilising financial engineering resources. This is the aim of the “J’écórénove mon logement” and “Ecorénov’LCL” platforms, for example;
- Adapt lending and pricing policies to encourage renovation;
- Capitalise on local roots to strengthen local initiatives, particularly through partnerships and raising customer awareness;
- Improve reliability in EPC collection by making loans conditional on the customer submitting the EPC for the property to be financed (properties other than new-build);
- Implement differentiated offerings for the acquisition of a property depending on its energy performance to support customers in their transition;
- Develop a customer advice and support strategy, through the establishment of tools to assist in sales, raise awareness in/train the networks, promote financing solutions on a regular basis, particularly the Eco-PTZ interest-free loan.

AGRICULTURE

- Crédit Agricole Group is committed to supporting the agricultural world in its efforts to reduce carbon emissions while strengthening food sovereignty, by supporting the roadmaps established by the industry and the sectors, on both the national level in France and at the individual level;
- at the national level, Crédit Agricole aims to support *Ferme France*⁽¹⁾ by structuring the voluntary carbon credit market, supporting innovation, and assisting with the transition of upstream and downstream players in the sector;
- at the regional level, Crédit Agricole is strengthening its support for farmers in their transition process: by engaging in dialogue with them to assess their maturity on transition issues, by supporting them in their efforts through dedicated tools, and by developing new offerings promoting renewable energy at the farm level (agrivoltaics, methanisation, solar energy, etc.).

OPERATIONAL MONITORING OF THE NET ZERO STRATEGY AND STEERING AND CARBON MANAGEMENT

Crédit Agricole Group has established a climate strategy that is being implemented in particular through the integration of decarbonisation pathways for eight sectors⁽²⁾ (Oil & Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel) into its overall strategic planning. The performance metrics relating to these targets have been formalised and validated at the Group governance level. In parallel with its financial budgeting work, the Group has gradually established a carbon (CO₂) budget, already applied to the 2024 financial year to define the 2025 budget, thus reinforcing the framework for its ambitions and its alignment with the long-term targets to reduce greenhouse gas emissions in Europe and worldwide.

2.3.2 INVESTMENT

2.3.2.1 SUPPORTING CUSTOMERS

2.3.2.1.1 SUPPORTING THE CLIMATE TRANSITION OF CORPORATE, PUBLIC SECTOR AND SOCIAL ECONOMY CUSTOMERS

SUPPORT THROUGH SUSTAINABLE SAVINGS

Amundi offers a comprehensive range of Net Zero Ambition funds to guide savings towards investment solutions that aim to support issuers' climate transition. This range is designed to cover the main asset classes, management styles and geographical areas. Amundi has developed its own investment framework that defines the minimum conditions that must be met for an active management product to be labelled “Net Zero Ambition”:

- an overall carbon intensity reduction target enabling the portfolio's progress to be monitored in relation to the reduction pathways of the benchmark universe, compatible with limiting global warming to 1.5°C above pre-industrial levels;
- a requirement of a minimum exposure to high climate impact sectors to encourage the transition in these key sectors;
- targeted exclusions of issuers in sectors deemed incompatible with the objective of transitioning to a low-carbon economy.

SUPPORT FOR AGRICULTURAL AND AGRI-FOOD UNDERTAKINGS

Crédit Agricole Group has allocated a budget of €1 billion to four funds (capital innovation, debt, etc.) intended to finance and invest in the development of a competitive and sustainable agricultural and agri-food system. The investment proposition that serves as a guide to financing and investment decision-making covers the topics of climate change adaptation, mitigation, preservation of natural resources, animal welfare and the circular economy, as well as others such as generational renewal and the evolution of consumption habits, etc.

In 2023, four funds were structured and launched:

- ambition Agri-Agro Investissement: a €300 million private equity fund with IDIA;
- CA Ambition Agri Agro Tech: a €65 million innovation capital fund (target: €100 million) with Supernova Invest (investment in Seederal (development of electric tractors) in May 2025);
- Amundi Ambition Agri Agro Lending Europe: a €140 million private debt fund with Amundi;
- InvestEU, a €210 million European first-loss guarantee fund.

2.3.2.1.2 SUPPORT FOR INDIVIDUAL CUSTOMER CLIMATE TRANSITIONS

SAVINGS SOLUTIONS THAT SUPPORT THE TRANSITION

Responsible savings products that include climate-related themes are offered to retail banking customers in a category of investment solutions called “Committed Financial Savings”. Depending on the case, these products are eligible for life insurance policies, equity savings plans and/or ordinary securities accounts. For example, Predica and CAAR, subsidiaries of Crédit Agricole Assurances, offer unit-linked products in this category in multi-support life insurance and pension policies distributed through their partner networks.

The financial investment proposal made to the customer is constructed taking into account their knowledge and experience of financial instruments and the investment horizon, and the level of diversification and risk intensity desired for this investment. Since 2024, this proposal has also taken into account the customer's appetite for sustainable savings.

(1) *Ferme France* refers to the entire French agricultural ecosystem.

(2) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

2.3.2.2 ACTION PLANS

2.3.2.2.1 ASSET MANAGEMENT

In line with the Group's Societal Project, Amundi has defined an ESG Ambitions 2025 plan which sets three targets:

- to increase the importance placed on its savings solutions in terms of responsible investment;
- to engage as many corporates as possible in defining credible strategies for alignment to the Net Zero 2050 target;
- to ensure the alignment of its employees and shareholders to its new ambitions.

Amundi implements its ESG Ambitions 2025 plan through 10 commitments, including the integration of a binding management target in line with the Net Zero 2050 pathway into the actively managed open-end funds of the Net Zero Ambition range. Amundi also aims to continue expanding its ESG ETF offering. In 2025, 42% of the ETF product range consisted of ESG ETFs.

2.3.2.2.2 INVESTMENTS IN THE INSURANCE BUSINESS

In line with the Group's Societal Project, Crédit Agricole Assurances highlights its determination to be a major player in the energy transition through its commitments, by promoting the decarbonisation of the real economy in partnership with its customers:

- divestment from thermal coal: Crédit Agricole Assurances has committed to removing thermal coal from its investment portfolios by 2030 in order to meet climate change mitigation targets;
- being a major investor in renewable energy:
 - as a leader in institutional investment, Crédit Agricole Assurances has committed to developing its investments in renewable energy and helped finance an installed capacity of 16 GW at the end of September 2025 on a wholly owned basis (for a target of 14 GW),
 - since 2013, Crédit Agricole Assurances has joined forces with various partners to invest in renewable energy installations;
- since September 2024, in line with the Net Zero Asset Owned Alliance (NZAOA) position paper on oil and gas, and its oil and gas sector policy, Crédit Agricole Assurances has committed to ceasing to invest in new oil and gas infrastructures, and to encourage players in the sector to set decarbonisation targets compatible with 1.5°C scenarios.

Crédit Agricole Transitions & Énergies has two funds providing it with the resources to initiate and source projects, with the ambition of achieving €1 billion to boost the renewable energy sector thanks to the Group's expertise. This new investment capacity, based on dedicated funds, contributes to strengthening developers' equity capital and the acquisition of production assets. Crédit Agricole Transitions & Énergies is targeting 2 GW of installed production capacity from assets held by the Group in 2028. At the end of 2025, the installed production capacity from assets held by the Group amounted to 372.7 MW.

To support the environmental transition, LCL also offers individuals the opportunity to save and invest in different asset classes, enabling them to take action to protect the environment. This is particularly true of the LCL Impact Climat range of investments, which has been available since 2020. In addition, LCL Compensation Carbone funds offer wealth management customers the opportunity to reduce the carbon footprint of their portfolio by at least 20% compared to their investment universe.

LCL Private Banking customers can also give meaning to their investments through LCL Better World, the first market allocation composed entirely of funds contributing to the United Nations Sustainable Development Goals within life insurance mandates.

Since 2024, LCL has been offering two green debt securities that allow for responsible saving: LCL Impact Ville Durable for Retail Banking and LCL Autocall City Transition for Private Banking and Wealth Management. These securities are intended exclusively to finance or refinance LCL's sustainable residential real estate projects.

2.3.3 INSURANCE

2.3.3.1 SUPPORTING CUSTOMERS

2.3.3.1.1 SUPPORTING THE CLIMATE TRANSITION OF ENTREPRENEURIAL CUSTOMERS, SMES, INDIVIDUALS AND CUSTOMERS IN THE AGRICULTURAL SECTOR

SUPPORTING THE AGRICULTURAL SECTOR IN THE FACE OF CLIMATE RISK

Crédit Agricole Assurances supports farmers in facing climate risks and offers insurance coverage for most standing crops (field crops, vegetables, vines, tree crops) against weather events that may affect them, such as drought, hail, floods, frost, etc. By the end of 2025, Crédit Agricole Assurances will manage nearly 38,215 climate insurance policies (crop, grassland and hail insurance).

Premium reductions are implemented to encourage the use of protection systems, reducing the impact of weather events on crops. In addition, the subsidy advances offered by Crédit Agricole Assurances facilitate access to crop insurance.

Finally, Crédit Agricole Assurances continues to support the reform of crop insurance through research aimed at adapting the agricultural insurance offering and providing a dedicated response to farmers engaged in a transition process. This support has taken the form of:

- active participation in all working groups with stakeholders to ensure that this system provides a sustainable response to the challenges of protecting farmers against climate hazards;
- the implementation of an ambitious support system for advisers working with farmers to enable them to make informed choices about managing climate risks relating to their crops;
- the possibility of being designated as a contact person to manage claims estimates for the management of uninsured grasslands and uninsured crops belonging to customers, under the National Solidarity Fund for all farmers.

Since 2024, Crédit Agricole Assurances has also become the administrator of national solidarity compensation payments on behalf of the public authorities to 46,664 farmers.

ACTION PLANS FOR ENTREPRENEURIAL CUSTOMERS, SMES AND CUSTOMERS IN THE AGRICULTURAL SECTOR

Crédit Agricole Assurances has introduced property and casualty insurance coverage for renewable energy installations (solar panels, wind turbines, methanisation) within the multi-risk professional and agricultural policies sold by retail banks in France.

In the Corporates market, Crédit Agricole Assurances sells insurance policies covering photovoltaic panels, either through its multi-risk Corporate policies or its multi-risk SME policies.

As the second-largest insurer of farmers in France, Crédit Agricole Assurances has been committed since 2020 to supporting French agriculture in the development of renewable energy through its multi-risk agricultural insurance policies, which cover renewable energy installations (photovoltaic panels on roofs or in fields, solar trackers, solar shade structures) and agricultural methanisation installations. Insurance for these installations is essential to secure renewable energy production and agricultural operations.

DEVELOPMENT OF RENEWABLE ENERGY

Crédit Agricole Assurances has introduced property and casualty coverage within its multi-risk home insurance policies to encourage the development of renewable energy installations.

The multi-risk home offering, launched in June 2024, covers photovoltaic and thermal solar panels, solar trackers declared at the time of subscription, domestic wind turbines less than 12 metres high. This contract also covers heat pumps and electric charging stations in order to contribute to energy transition in France.

ACTIONS TAKEN IN THE CONTEXT OF PROPERTY AND CASUALTY INSURANCE CLAIMS MANAGEMENT

In order to encourage its policyholders to adopt more virtuous behaviour, several actions have been implemented in the context of property and casualty insurance claims management:

- car insurance: work carried out in France in 2024 to identify the areas with the highest GHG emissions in automotive claims management led to the publication of the white paper “Les émissions de CO₂ de la gestion des sinistres automobiles en France” (CO₂ emissions from automotive claims management in France). This work has made it possible to propose concrete ways of reducing GHG emissions linked to the handling of damaged vehicles, such as:
 - the decarbonisation of assistance and expertise services (vehicle fleet, route optimisation),
 - the provision of replacement vehicles (assistance companies and garages),
 - eco-friendly repair of damaged vehicles (paintwork, refurbished parts, low-carbon processes);
- Home insurance: Crédit Agricole Assurances has developed several partnerships to promote responsible replacement in the event of damage covered by home insurance, as part of its home appliance repair services. When products cannot be repaired, refurbished replacement products are offered;
- “Tous Mobiles” insurance: Crédit Agricole Assurances covers all mobile digital devices in the home against theft, accidental damage, fraudulent use of mobile phones and theft of accessories. As part of its claims management process, Crédit Agricole Assurances gives priority to repair or replacement with a refurbished device, and offers a compensation/repair process. If the device can be repaired at a cost lower than the replacement value, the repair will be carried out at a repair centre designated by Crédit Agricole Assurances (a partnership with two nationally approved centres has been established for this purpose).

2.3.3.1.2 SUPPORTING CUSTOMERS' ADAPTATION TO THE IMPACTS OF CLIMATE CHANGE

AVOIDANCE OF CLIMATE RISK

Short-term risk avoidance: weather alerts

Crédit Agricole Assurances supports its policyholders by warning them about weather events (storms, risk of flooding, hail, etc.) and suggesting preventive actions to take in order to limit their impact.

Launched in 2020, roll-out of the weather alert service is continuing. LCL offers this additional free service to customers with car, home or Agri/Pro multi-risk insurance policies. In 2025, 2,865,551 alert text messages were sent (25% more than in 2024). These text messages alerted 776,486 customers in areas affected by adverse weather conditions, enabling them to seek safety and receive avoidance advice tailored to the weather event they were experiencing (strong winds and rain, thunderstorms, snow/frost, flooding, and heatwaves for people over the age of 70).

Medium- and long-term climate risk avoidance

Since June 2024, Crédit Agricole Assurances has implemented a personalised flood risk avoidance plan: customers automatically receive avoidance information sheets based on the risks identified in their policy applications.

At the same time, Crédit Agricole Assurances is participating, alongside the main property and casualty insurers in France, in the remediation component of the “Drought Initiative”: a five-year project launched in September 2023 by France Assureurs, Caisse Centrale de Réassurance and Mission Risques Naturels, which aims to protect single-family homes from drought. This initiative is testing different methods of repairing damage caused by clay shrinkage and swelling in real-life conditions.

In addition, Crédit Agricole Nord de France and Crédit Agricole Assurances jointly led a test in 2025 on the implementation of an adaptation approach for their customers in order to reduce the vulnerability of their homes to flood risk. The main aim of the test, which took place in several municipalities, was to assist customers of the Regional Bank exposed to flood risk in initiating a vulnerability assessment and then carrying out adaptation work where necessary, by:

- raising their awareness of flood risk;
- informing them about the subsidy schemes they may be eligible for;
- putting them in touch with government departments for a flood assessment (which is then carried out by a partner assessor involved in the test);
- offering them two specific financing options; and
- providing them with an explanatory guide on the adaptation process, possible works, subsidy schemes and financing options.

Crédit Agricole Assurances is launching a new vegetation fire risk avoidance initiative. To do this, Crédit Agricole Assurances has partnered with Kayrros, an undertaking specialising in satellite data analysis and artificial intelligence, to develop a vegetation fire avoidance solution. The solution chosen is a platform that assesses a region's exposure to vegetation fire risks and supports customers by raising their awareness of the right avoidance measures to take to reduce the spread of fires at the junction between homes and forests, in particular the obligation to clear brush.

Following a pilot programme launched by Crédit Agricole d'Aquitaine and Kayrros in 2022, the system was rolled out nationwide.

2.3.4 OPERATING FOOTPRINT

Aware of the impact of its own operations on the environment, Crédit Agricole S.A. remains committed to using less carbon-intensive electricity, with the aim of achieving 100% renewable electricity by 2030 at all sites in France and worldwide, and is continuing its efforts to reduce energy consumption by maintaining actions to anchor these new behaviours over time. In 2025, the level was 90% for Crédit Agricole S.A.

These actions focus on four main categories:

- the operation of buildings through actions related to efficiency (temperature controls in winter and summer, contract with a bonus/malus scheme for energy savings, inter-company building use competition – CUBE), energy efficiency (change of fuel) and renovation (costing of the work required to achieve the established targets, allowing the roll-out of various optimisation scenarios for the Ile-de-France campuses). These actions help to reduce greenhouse gas emissions linked to the energy consumption of buildings. Furthermore, in France, the Crédit Agricole Group has an EDF electricity contract with a guarantee of origin.

Between 2019 ⁽¹⁾ and 2025, these actions reduced Crédit Agricole S.A.'s GHG emissions by 69%, corresponding to an investment of more than €25 million in 2025 for the Paris-region campuses (Evergreen and SQYPark). The Evergreen and SQYPark sites are scheduled to undergo energy-efficiency renovations between 2025 and 2027, representing an investment of more than €40 million for Evergreen and more than €18 million for SQYPark;

- responsible IT through the operation of data centres (constant improvement of the data centre's energy optimisation; indirect free-cooling) and reducing the carbon footprint of the Crédit Agricole information system (environmental compatibility IS, GreenPact) to manage the low-carbon transformation of the Group's IT system. This is achieved by combining reduced-consumption and eco-efficiency approaches, the promotion of eco-design best practices and an IT equipment end-of-life management procedure. These actions help to reduce emissions linked to the energy consumed by IT facilities;
- travel for business trips (increased use of remote working and meetings; travel policy limiting the use of air travel to journeys that would take more than four hours by train) and vehicle fleet (electrification of the fleet of company and service vehicles; charging units for employees; eco-driving training). These actions help to reduce emissions linked to the use of company vehicles and those generated by employees when travelling for business. Between 2019 and 2025, these actions reduced Crédit Agricole S.A.'s GHG emissions from business travel by 46%. For Crédit Agricole S.A. Parent Company, between 2019 and 2025, an amount of €2.2 million was invested in the transition from internal combustion vehicles to low-emission vehicles (<50 g). An investment of €2.8 million is planned between 2026 and 2030 to continue these actions;
- the actions taken to decarbonise procurement are detailed in part 4.2.5.5 "Taking action for the transition to a low-carbon economy".

2.3.5 VOLUNTARY CONTRIBUTION TO CARBON NEUTRALITY

During the transition to the Net Zero target and simultaneously with its efforts to reduce emissions as part of its decarbonisation strategy, Crédit Agricole S.A. made commitments to contribute to global carbon neutrality. Crédit Agricole S.A. has adopted a policy of voluntary contribution to carbon neutrality on a portion of its emissions by financing environmental projects that promote the reduction of greenhouse gas emissions into the atmosphere or their sequestration. The use of carbon credits is a last resort, once all options for reducing direct and indirect emissions have been fully exhausted.

Since they were launched in 2011, the Crédit Agricole Group has invested more than €12 million in the Livelihoods Carbon Funds, which finance projects that help fight climate change, restore natural ecosystems and improve the living conditions of rural communities. The Livelihoods Funds finance projects for reforestation and restoration of degraded ecosystems, agroforestry, regenerative agriculture, and small-scale rural energy (improved stoves) in Africa, Asia, Latin America and, since 2021, in France (*Sols de Bretagne* project). In 2017, Crédit Agricole Group committed to contributing to global carbon neutrality for the direct carbon footprint of Crédit Agricole S.A. and its subsidiaries (within Scopes 1, 2 and 3, business travel only) by 2040, through the Livelihoods Carbon Funds in which Crédit Agricole S.A. and Crédit Agricole CIB have invested (Livelihoods Carbon Fund 1 & 2).

Each year, the emissions of Crédit Agricole S.A. are counted to calculate the amount of the contribution needed. Crédit Agricole S.A. then cancels VCU (Verified Carbon Units) certificates up to this footprint. These certificates are financed by the investments of Crédit Agricole CIB and Crédit Agricole S.A. in the Livelihoods Carbon Fund SICAV-SIF (LCF).

A Livelihoods Investment Committee, composed of representatives of each partner investor, meets quarterly and participates directly and actively in the activities of the fund. Its main role is to study the proposals for projects and to make decisions in this regard. The Livelihoods carbon projects are measured and audited by independent organisations to provide partner investors with carbon credits that meet the highest international standards (Gold Standard & VERRA). The credits issued by Livelihoods are based on the calculation of carbon emissions already sequestered or reduced. They are not calculated on the basis of future carbon sequestration or reduction estimates. Each year, companies receive carbon credits from projects in which they have invested, up to the amount of their investment in the funds.

To date, Crédit Agricole S.A. is able to disclose information on the quality and credibility of carbon credits cancelled during the year only for the Verra, Gold Standard and Low Carbon Label quality standards.

In addition, certain Group entities have purchased carbon credits with Carbioz (mentioned above in part 2.3 "Actions and resources in relation to climate change policies"), thereby financing decarbonisation projects carried out by French farms that have been awarded the Low Carbon Label certification.

This year, Crédit Agricole S.A. voluntarily contributed 166,526 tonnes of CO₂e of carbon credits to global carbon neutrality.

2.3.6 RISK MANAGEMENT SYSTEM

Crédit Agricole Group has implemented a comprehensive risk governance and management system. Further information on this system is available in part 1.4.1 "Description of the process to identify and assess material impacts, risks and opportunities" of this sustainability report.

The aim of Crédit Agricole Group's environmental risk management system is to take into account the interactions between natural systems (atmosphere, hydrosphere, geosphere and biosphere) and human activities that are transmitted to banking risks, both through physical climate risk factors (hazards generated or influenced by climate change, such as floods and droughts), transition climate risk factors (impacts of economic, technological and regulatory actions to reduce GHG emissions) and other environmental risk factors. It is worth noting that the "environmental risk" analyses defined in this section do not cover the "Nature" ESRS topics (E2 "Pollution", E3 "Water and marine resources", E4 "Biodiversity and ecosystems" and E5 "Resource use and circular economy").

The different environmental risk factors, which may arise over different time horizons with varying intensity and frequency, are treated differently within the overall risk management framework, with a priority approach for climate change factors, see part 1.4.1 "Description of the processes to identify and assess material impacts, risks and opportunities" in this sustainability report.

(1) The choice of 2019 as the baseline year is in line with SBTi requirements, which recommend that it be no more than two years before the year of publication of GHG emission reduction targets, and is in line with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

CRÉDIT AGRICOLE GROUP RESILIENCE ANALYSIS

The analysis of the resilience of the Group's strategy and business model is conducted in the form of climate stress tests.

The Crédit Agricole Group integrates climate risks into its stress testing system:

Budgetary stress test: since 2024, climate considerations have been incorporated into the annual budgetary stress test scenario, which contributes to capital requirements planning and enables the Group's profitability to be estimated over a three-year horizon.

A central macroeconomic scenario determines the reference economic and financial assumptions over three years. It is based on the quarterly scenario developed by the Group Economic Research department (ECO) in collaboration with Group experts. It is proposed by ECO and submitted to Executive Management for approval to ensure that it reflects the Group's views on macroeconomic and financial developments over a three-year period. In parallel with this central scenario, an internal stress scenario is defined, taking into account all Crédit Agricole Group's significant risks, including climate risks that arise from its business model and operating environment, in a context characterised by tense macroeconomic and financial conditions.

The aim of the stress scenario is therefore to measure the impact of a global shock on the Group's central solvency trajectory over a three-year period and thus identify the most sensitive portfolios in adverse conditions.

Dedicated climate stress tests: Since 2024, the internal stress test framework has provided for a climate stress test to be carried out every two years on credit risk and market risk, with targets, characteristics, horizons and scenarios adapted to changes in risks and the context. These climate stress tests cover material financial risks within the meaning of Double Materiality, i.e. physical risk and transition risk related to climate change.

The 2024 exercise covered the Crédit Agricole Group's scope with a medium-term horizon (2030), consistent with the Fit-for-55 scenario analysis exercise conducted by the ECB in 2024. Following on from the climate risk materiality analysis carried out in the first half of 2024, the following scenarios were selected:

- Net Zero 2050 (Orderly), in which global efforts will lead to net zero greenhouse gas emissions by 2050 (warming limited to 1.5 degrees Celsius by 2100);
- current policies (Hot House World), corresponding to the continuation of current policy pathways (global temperature rise of approximately +3 degrees Celsius by 2100).

Assumptions for projections of sector-specific economic variables were determined by the ECO service, and a panel of experts projected the evolution of the Group's balance sheet, known as the dynamic balance sheet, in line with these scenarios. This evolution also incorporates the Group's climate strategy, which aims to ramp up the development of renewable energy and the divestment from fossil fuels.

This stress test made it possible to observe the impact of shocks on the cost of risk, risk-weighted assets (RWA) and net interest margin (NIM). It revealed that the impact of climate risks on the Group's profitability and solvency is low. In fact, the results for the financial year are absorbable and consistent with the budget set for 2025.

To address significant risks and seize opportunities, policies and action plans have been put in place, as mentioned in part 2.3 "Actions and resources in relation to climate change policies" on strategic plans and actions to manage impacts, risks and opportunities. These plans are regularly adjusted in line with market trends, stakeholder expectations and new regulations, ensuring resilience in the short-, medium- and long-term.

RISK MANAGEMENT SYSTEM

The risk management system described in part 1.4.1 "Description of the processes for identifying and assessing material impacts, risks and opportunities" in this sustainability report enables the risk component to be integrated into all of the undertaking's decision-making processes, involving company players at various levels. ESG risks are gradually being integrated into this framework and into the committee structure defined by the Group's Risk Management department.

With regard to environmental risks, Crédit Agricole Group has taken measures to strengthen its risk management framework, in particular through:

- materiality analyses of environmental risk factors in different geographical areas (France, United States), business sectors (Agriculture, Residential Real Estate) and themes (Nature). These analyses are supplemented by the definition of an action plan aimed at improving or supplementing the methodological framework for these analyses;
- assessment of the impact of environmental risks on economic capital adequacy and the development of methods to take into account environmental risks, where relevant;
- finally, integration of these risks into the permanent control system with a common reference framework covering risks inherent to the ESG theme, and which will be added to gradually.

In addition, the Crédit Agricole Group integrates these risks into its credit approval processes, in particular by:

- integration of environmental risks into lending decision-making processes developed in the large corporates ⁽¹⁾ portfolio via an ESG score on counterparties;
- roll-out of ESG questionnaires in retail banking in France and Italy;
- managing portfolios across all customer segments by identifying the business sectors and geographic areas most sensitive to the geo-sector matrix prepared by the Group;
- adjustment of escalation processes for sensitive projects/transactions;
- establishment of quarterly analyses on the identification of environmental factors in credit alerts;
- conducting materiality analyses across different geographical areas (France, United States), business sectors (Agriculture, Residential Real Estate) and themes (Nature).

ESG criteria are integrated into the credit granting process, as described in part 1.4.1.2 "Description of the processes to identify and assess material impacts, risks and opportunities related to climate change" of this sustainability report.

Within the Group, business continuity is part of the operational risk management system and is a fundamental component of the internal control system. It is based in particular on risk mapping (RCSA) to plan and prioritise actions according to risk. Similarly, business continuity is based on an internal procedural note setting out the risk management system for the continuity and recovery of Crédit Agricole Group activities.

Within this framework, each Group entity draws up a business continuity plan (BCP) aimed at maintaining at least the essential activities serving customers and partners in the event of a disaster, possibly in a degraded and temporary manner, and then gradually restoring all activities.

(1) Customers of the Group's CIB activities.

The Group's method for implementing continuity and recovery processes is extensively documented. It includes:

- methodological guides for developing BCPs;
- Information System security policies for IT crisis scenarios;
- the Group's general crisis management policy; and
- operational kits for Business Continuity Plan Managers and IT Contingency Plan Managers, specifying their respective roles.

In addition, BCPs are regularly updated and tested to ensure their effectiveness in real crisis situations. Crédit Agricole Group entities must roll out these plans within their local subsidiaries or branches, adapting them as necessary to local legal and regulatory requirements.

In addition, the Group has defined five mandatory crisis scenarios for which all entities must be prepared. These scenarios take into account climate risk factors such as floods, high winds and heat waves. This illustrates the Group's commitment to limiting operational losses and strengthening its resilience to external environmental threats.

This comprehensive approach is an essential pillar of the Group's BCP, designed to ensure business continuity.

In terms of reputation risk and the risk of disputes related to environmental risks, the Group incorporates an "ESG" component into its processes for new products and services, and has in place a crisis communication management system. It has also developed a management framework for reputational risks including on ESG aspects (incorporating environmental aspects).

In the case of market and liquidity risk, the materiality analyses conclude that there is a low impact of environmental risk factors in these two risk categories, all time horizons included. A process of periodic review of the materiality of climate factors on these risks is defined to detect the evolution of risks and adapt risk management accordingly.

Finally, Crédit Agricole Group has introduced an internal climate stress test system and conducted the first internal exercise at the end of 2024. At the same time, work is under way to adapt the models to improve the approach to taking environmental factors into account.

2.4. PERFORMANCE TARGETS AND MEASURES

In order to meet the targets set out in its climate change policies and contribute to achieving carbon neutrality by 2050, the Crédit Agricole Group has set targets for reducing GHG emissions. These targets address material sustainability matters on its operating footprint and for each of its major businesses: financing ⁽¹⁾, investment of the insurance business (euro funds and own funds) and asset management (Net Zero range). The scopes selected for the double materiality analysis, the GHG emissions inventory and the definition of targets are broadly consistent, without strictly coinciding. These scopes are explained in order to ensure the transparency and consistency of the information published.

2.4.1 CLIMATE CHANGE MITIGATION TARGETS

2.4.1.1 FINANCING TARGETS

Through its work in connection with its membership of the NZBA ⁽²⁾, Crédit Agricole Group has introduced a methodology which combines a bottom-up and progressive approach. This consists of working together to build a common methodology based on science and on market standards which is shared between the different entities without geographical distinction. Work is then carried out on these contributions individually within each of the entities, to take into account any business line specificities, local and regional considerations and finally to capitalise on each area of expertise. Once the contributions by entity have been finalised, consolidation at Group level enables presentation of unified sector-specific decarbonisation pathways for the Crédit Agricole Group as a whole. Despite recent developments in the NZBA, Crédit Agricole has reaffirmed its Net Zero commitments ⁽³⁾ and reinforced its climate strategy in Crédit Agricole S.A.'s 2026-2028 Medium-Term Plan.

2.4.1.1.1 DEFINITION OF TARGETS

GHG emission reduction targets are based on scientific methodologies and data. These emissions are specific to each sector, which is why one or more indicators are or will be defined for each one. Crédit Agricole Group's approach and methodology are summarised below.

The GHG emission reduction targets are:

- **based on scientific data:** to align its portfolios with the target of limiting global warming to 1.5°C in accordance with the Paris Agreement, the Crédit Agricole Group has considered the International Energy Agency's (IEA) Net Zero Emissions by 2050 scenario (NZE scenario) to determine its sector-specific decarbonisation pathways and has been supported by its Scientific Committee. This scenario has been replaced in certain sectors by specific recognised scenarios that are applicable to them;
- **specific to each sector:** each sector has a role to play in the energy transition to a low-carbon world, with its own specificities and its own levers of action. GHG emission reduction targets have therefore been defined on a sector-by-sector basis;
- **useful in each business line's decision-making process:** for each sector, one or more metrics have been defined to assess companies' performance and progress towards decarbonisation. These indicators are tracked and monitored so as to engage customers in ongoing dialogue and to make informed financing decisions;
- **based on the best data available to date:** determining the starting point of emissions by sector requires collecting and refining multiple sources of data. The quantity and quality of available data can have a considerable impact on these baseline figures. Given the gaps that currently exist in the available data, the Group plans to update its methodologies as the data improves and as this information becomes available.

⁽¹⁾ For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

⁽²⁾ In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

⁽³⁾ Decarbonisation pathways defined for 2030 in eight sectors (Oil & Gas, Power Production, Automotive, Commercial Real Estate, Cement, Aviation, Shipping and Steel) and ambitions set out in two sectors (Residential Real Estate and Agriculture).

2.4.1.1.2 ESTABLISHMENT OF STAGES

The approach is based on five major stages in which Crédit Agricole Group has opted for key methodological choices:

2.4.1.1.3 MATERIALITY ANALYSIS AND PRIORITISATION OF SECTORS

TEN PRIORITY SECTORS ⁽¹⁾

In 2022, and as a first step, the Group committed to GHG emission reduction targets in five sectors: Oil and Gas, Power Production, Automotive, Commercial Real Estate and Cement. Then, in 2023, the Group extended its action to five other key sectors of the economy: residential real estate, aviation, steel, agriculture and shipping.

When choosing the 10 priority sectors, the Group took into account a variety of factors:

- their contribution to global greenhouse gas emissions;
- the Crédit Agricole Group's exposure to these sectors;
- the existence of recognised sector-specific decarbonisation pathways based on scientific data for these sectors;
- their inclusion in the list of sectors prioritised by the Science Based Targets Initiative (SBTi) and NZBA ⁽²⁾;
- the feasibility of calculating the baseline and defining pathways during this first phase of work.

2.4.1.1.4 CALCULATION OF THE BASELINE OF FINANCED EMISSIONS BY SECTOR

SCOPE OF OUTSTANDINGS CONSIDERED

To set achievable targets, the Group first estimated the baseline of financed emissions for each sector taken into consideration. The establishment of these baselines required several methodological questions to be addressed. The Group thus determined the scope of assets included to measure its exposure to its customers. To date, a certain number of considerations have resulted in all medium and long-term (>1 year) lending to corporates and individuals being taken into account ⁽³⁾:

- medium and long-term loans correspond to the real financing activities of each sector;
- short-term lending, which is more volatile with more complex management procedures, often represents operational, treasury or consumer finance debt;
- more than 90% of Crédit Agricole Group loans granted to corporates are medium or long-term;
- Crédit Agricole's decarbonisation levers are lower in the short-term: the commitment of its customers and financing of the transition require implementation in the long term.

PCAF METHODOLOGY

To calculate the baselines of the Net Zero pathways ⁽⁴⁾, the Group used the financed emissions calculation methodology developed by the Partnership for Carbon Accounting Financials (PCAF) – a global initiative to measure and disclose financed greenhouse gas emissions, which the Group joined in 2022. This methodology is recognised by the GHG Protocol, which is the benchmark for carbon accounting standards. PCAF attributes customer emissions to the institutions that finance them according to the following formula:

Financed emissions: (Group exposure/Value of the enterprise or of the asset financed) x Emissions of the customer or of the asset.

To attribute financed emissions to banking institutions, the PCAF methodology only takes into account the funds used (funds actually debited from the credit available to the customer). However, the Group considers that the funds committed (total lending made available to the customer by Crédit Agricole Group) reflect the Group's commitment towards its customers more precisely and provide for a more stable measurement ⁽⁵⁾.

For each calculation of financed emissions, PCAF introduces a quality score for the data of between 1 and 5. A score of 1, which is the highest score, means that the data used is from the actual data of the financed customer and that the calculation of emissions for this customer has been verified by a third party. A score of 5, which is the lowest score, means that the data used is from sector and/or regional data, held on the basis of averages (proxies).

2020 AS THE BASELINE YEAR

Finally, the Group chose 2020 as the baseline year and 2030 as the interim target year. This choice of 2020 as the baseline is in line with SBTi and NZBA ⁽⁶⁾ requirements, which recommend that it is no more than two years before the year of publication of the GHG emission reduction targets. This decision was also driven by the fact that Covid-19 had no significant impact on financing in 2020. An exception was made for the Aviation sector, for which 2019 was chosen as the baseline year in order to neutralise the effect of Covid-19, meet NZBA requirements and align with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

⁽¹⁾ For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

⁽²⁾ In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

⁽³⁾ Note that for the oil & gas and shipping sectors only medium- and long-term loans are recognised on the balance sheet.

⁽⁴⁾ For more information, see part 2.4 "Targets and performance measures", "Net Zero pathways alignment metrics" section, "Net Zero pathways" table.

⁽⁵⁾ With the exception of the Oil & Gas and Shipping sectors.

⁽⁶⁾ In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

2.4.1.1.5 SELECTION OF METRICS (PHYSICAL INTENSITY VERSUS ABSOLUTE) AND OF THE SCENARIO

HOW CAN EMISSIONS REDUCTIONS BE QUANTIFIED?

One of the key decisions when defining a climate strategy consists of selecting the unit of measurement for emissions. It can either be a reduction target in absolute value of emissions, or a reduction target in intensity of emissions, according to sector-specific issues:

- for a target in absolute value, a fixed greenhouse gas emission reduction target is set, for example, to reduce emissions by 75% by 2030 compared to the 2020 baseline;
- for a target in carbon intensity, a target rate of greenhouse gas emissions is set in relation to a specific flow of activity, for example kilograms of CO₂ released per megawatt/hour (MWh).

THE ADVANTAGES OF EMISSION INTENSITY

The Group considers that opting to measure the physical intensity of emissions is the most appropriate measurement. It has the advantage of encouraging sectors to transition towards players, projects and technologies with lower emissions. While a target in absolute value could result in withdrawal from certain customers, an intensity target enables the Group to support its customers towards the climate transition. For example, in the Power Production sector, an intensity target allows for financing to be steered towards renewable energy.

This choice to set a target in physical intensity was validated by Crédit Agricole's Scientific Committee. Where applicable, it may be reviewed according to regulatory injunctions or market standards.

AN EXCEPTION: THE OIL AND GAS SECTOR

One exception to this is the Oil and Gas sector for which an absolute reduction is deemed necessary to contribute to the achievement of the net zero emission targets: the main lever for decarbonising a barrel of oil is not to extract it.

CHOOSING A REFERENCE SCENARIO

To contribute to achieving the target of net zero emissions by 2050, the Group is following emission reduction pathways consistent with external "credible" scenarios⁽¹⁾. For most sectors, it has considered the International Energy Agency's (IEA) Net Zero Emissions by 2050 scenario, published in May 2021 and updated in September 2023, to determine its sector-specific decarbonisation pathways. This "Net Zero" roadmap was defined to meet the Paris Agreement's target of limiting the global temperature rise to 1.5°C by 2100 compared to pre-industrial levels. For the Aviation, Shipping, Steel, Commercial Real Estate and Residential Real Estate sectors, the Group has replaced this scenario with specific recognised scenarios that are applicable.

For example, for commercial and residential real estate, the Group has replaced this scenario with the Carbon Risk Real Estate Monitor (CRREM) v2021 scenario, which has an equivalent carbon budget, in order to take into account certain sectoral specificities and rely on a better geographical and/or sectoral granularity.

The decarbonisation targets published by the Crédit Agricole Group for the Oil and Gas, Power Production, Automotive, Aviation, Shipping, Cement⁽²⁾ and Steel⁽³⁾ sectors are defined in line with the baseline scenarios used. This approach ensures methodological consistency between the Group's pathways and those of the scientific scenarios used. For the Commercial Real Estate sector, the decarbonisation target is based on convergence with the emission levels projected in the CRREM v2021 scenario.

2.4.1.1.6 DEFINITION OF INTERIM TARGETS

Based on the metrics and scenarios used, for each sector the Group set an interim target by 2030 and determined the appropriate pathway towards this target. It was then implemented through specific action plans for the business lines concerned. To achieve this, Crédit Agricole S.A.'s Net Zero teams work together on a regular basis with the subsidiaries and entities. For each sector, one or more indicators have been or will be defined to capture the performance and progress of enterprises towards decarbonisation.

These indicators are tracked and monitored at Group level (operational teams and decision-making bodies) so as to engage customers in ongoing dialogue and to make informed financing decisions. The sector-specific decarbonisation pathways are therefore fully integrated into the business thinking of the business lines. In total, more than 900 people are involved in the implementation and monitoring of action plans.

It should be noted that in line with the ESG Pillar 3 regulatory framework, every six months the Group shall disclose emissions according to the format required by the regulatory authorities, including Scopes 1, 2 and 3.

2.4.1.1.7 CONTINUOUS IMPROVEMENT OF DATA AND UPDATING OF SCENARIOS, TARGETS AND PLANS

The emission scenarios, such as those of the IEA, are generally updated annually to reflect relevant changes in terms of energy and emissions. These updates can result in adjustments to the pathways, which may make it necessary to update the GHG emission reduction targets. At the same time, new data may become available, allowing for an improvement in the measurement of greenhouse gas emissions. As a result, a key stage in this methodology consists of regularly reassessing the input data and key hypotheses, to assess whether a recalibration of the targets is necessary.

2.4.1.1.8 APPLICATION IN THE SECTORS

Presented below is detailed information for each of the sectors prioritised, of the metric used, the 2020⁽⁴⁾ baseline and the 2030 interim reduction target. The values are based on available data and projections of scenarios at December 2023. Future updates of the scenarios used or other data (for example, to reflect changes, technologies available or economic conditions) may result in changes to the pathway required to contribute to achievement of the 1.5°C target, and therefore to the Group's targets for these sectors.

Improving the availability and quality of data can also have an impact on the 2020 baseline in some sectors⁽⁵⁾. The Group will pay particular attention to the evolution of these parameters and will assess the relevance of recalibrating its baselines and its GHG emission reduction targets. In addition, in this initial stage it prioritises the calculation of the emissions it finances based on its granting of long- and medium-term lending. This scope is subject to change.

The Group is committed to annually disclosing its emissions, in intensity or in absolute value, concerning the sectors in which it is involved, in addition to any major changes to the methodologies.

(1) It should be noted that for the scenarios for the eight sectors (Oil & Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel), the baseline used by the Crédit Agricole Group is not identical to that of the reference scenario.

(2) For the Cement sector, the IEA scenario projections are for Scope 1 emissions, not Scopes 1 and 2, which means they cannot be compared with the Group's commitment.

(3) For the Steel sector, the Group has chosen to align itself with the scope of the Sustainable Steel Principles, which is broader than that taken into account in the NZE pathway.

(4) For the Aviation sector, the reference year 2019 was chosen to neutralise the impact of the COVID-19 crisis. This choice meets the NZBA requirements, which recommend that it be no more than two years before the year of publication of GHG emission reduction targets, and is in line with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

(5) For the Aviation sector, the reference year 2019 was chosen to neutralise the impact of the COVID-19 crisis. This choice meets the NZBA requirements, which recommend that it be no more than two years before the year of publication of GHG emission reduction targets, and is in line with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

OIL & GAS

- Entity concerned: Crédit Agricole CIB;
- Scope: Scopes 1 and 2 for all actors in the value chain (Exploration & Production, refining, transport, distribution, service, trading), Scopes 1, 2, 3 for Extraction & Production players;
- Metric: absolute amount of greenhouse gas emissions linked to the financing of customers involved in oil and gas-related activities;
- 2020 baseline: 24.3 MtCO₂e financed (on the basis of financing in the balance sheet);
- Reduction target for 2030: -75% ⁽¹⁾ in the balance sheet;
- 2030 target: 6.1 MtCO₂e;
- Reference scenario: IEA's NZE scenario (2021);
- Reference scenario reduction target: -29%.

POWER PRODUCTION

- Entities concerned: Crédit Agricole CIB, Crédit Agricole Leasing & Factoring (in partnership with Crédit Agricole Transitions & Énergies, LCL and in liaison with the Regional Banks);
- Scope: Scope 1;
- Metric: amount in intensity (gCO₂e/kWh) of greenhouse gas emissions related to financing of customers involved in power generation;
- 2020 baseline: 224 gCO₂e/kWh;
- Reduction target for 2030: 58%;
- 2030 target: 95 gCO₂e/kWh;
- reference scenario: IEA's NZE scenario (2021) ⁽²⁾;
- Reference scenario reduction target: 68% ⁽³⁾;

COMMERCIAL REAL ESTATE

- Entities concerned: Crédit Agricole CIB, LCL, Crédit Agricole Leasing & Factoring, Crédit Agricole Italia;
- Scope: Scopes 1 and 2 (building use);
- Metric: amount in intensity (kgCO₂e/m²/year) of greenhouse gas emissions related to financing of buildings for SMEs and Corporates;
- 2020 baseline: 36.4 kgCO₂e/m²/year ⁽⁴⁾;
- Reduction target for 2030: 40%;
- 2030 target: 22 kgCO₂e/m²/yr;
- Reference scenario: CRREM scenario – Global, Decarbonisation Pathways 2021;
- Reference scenario reduction target: convergence with CRREM v2021.

AUTOMOTIVE

- Entities concerned: Crédit Agricole CIB, Crédit Agricole Personal Finance & Mobility, Crédit Agricole Leasing & Factoring;
- Scope: Scope 3 of car makers and Scope 1 of users;
- Metric: amount in intensity (gCO₂/km) of greenhouse gas emissions linked to financing car makers and light vehicles only (personal loans, leasing ⁽⁵⁾, securitisation);
- 2020 baseline: 190 gCO₂/km;
- Reduction target for 2030: 50%;
- 2030 target: 95 gCO₂/km;
- Reference scenario: IEA's NZE scenario (2021);
- Reference scenario reduction target: -46%.

SHIPPING

- Entity concerned: Crédit Agricole CIB;
- Scope: Scope 1 well-to-wake (including upstream emissions linked to fuel production) for cargo shipping;
- Metric: amount in carbon intensity (gCO₂e/dwt.nm) of greenhouse gas emissions linked to financing ships;
- 2020 baseline: 6.22 gCO₂e/dwt.nm per maximum tonnage transportable per nautical mile (dwt.nm ⁽⁶⁾, taking into account emissions linked to the production of fuel (Well-to-Wake (WTW) approach);
- Reduction target for 2030: -36% intensity of shipping compared to 2020;
- 2030 target: 3.98 gCO₂e/dwt.nm;
- Reference scenario: NZBA shipping scenario (1.5°C Initiative for Shipping ⁽⁷⁾ and DNV Maritime Advisory);
- Reference scenario reduction target: between -36% and -49%.

AVIATION

- Entity concerned: Crédit Agricole CIB;
- Scope: Scopes 1 and 3 well-to-wake emissions (including emissions from fuel combustion and upstream emissions linked to kerosene production);
- Metric: amount in intensity (gCO₂e/RTK ⁽⁸⁾) of greenhouse gas emissions linked to the financing of airlines and aircraft lessors;
- 2019 baseline ⁽⁹⁾: 1,003 gCO₂e/RTK;
- Reduction target for 2030: 25%;
- 2030 target: 750 gCO₂e/RTK;
- Reference scenario: "prudent scenario" of the Mission Possible Partnership (MPP) industrial coalition aligned to a 1.5°C pathway (NZBA) ⁽¹⁰⁾;
- Reference scenario reduction target: -21%.

(1) Twice as fast as the reduction in the IEA's NZE scenario.

(2) The IEA's NZ scenario has since been reviewed upwards twice with milestones of 165 gCO₂e/kWh in 2022 and 186 gCO₂e/kWh in 2023. The IEA's scenario takes into account the economic and physical realities. The Group will engage in discussions on its capacity to maintain a pathway aligned to the IEA's initial NZ scenario from 2021 and on the need to adjust its pathway to the latest recommendations.

(3) The starting point for the IEA's reference scenario is higher than that of the Crédit Agricole Group.

(4) Following the announcement of the pathway in 2022, the baseline was lowered from 46 to 36.4 kgCO₂e/m²/year due to the integration into the scope of the Regional Banks' portfolios, which are structurally lower in carbon and, more on the periphery, of work to improve the quality of the data, which led to an adjustment to the baselines of Crédit Agricole S.A. entities. Carbon intensity reduction target kept at 40% by 2030 (compared to 2020) i.e. a 2030 target of 22 kgCO₂e/m²/year (compared to 27.7 previously). From 31 December 2025, the Crédit Agricole Group will take CRREM v2 data into account when calculating its financed emissions.

(5) For Crédit Agricole Personal Finance & Mobility, only "finance leases" are taken into account in the NZ scope.

(6) Dead Weight Tonnage by nautical mile. For now, the scope excludes passenger transport pending the IMO's approval and implementation of the correction factors for the carbon intensity indicator formula for passenger ships.

(7) A group of 10 banks involved in shipping financing activities formed the 1.5°C Initiative for Shipping and tasked DNV Maritime Advisory with creating "ambitious but realistic" upward pathways while meeting, based on the assumptions provided, a 1.5°C or slightly higher (<1.6°C) ambition.

(8) RTK = Revenue Tonne Kilometre.

(9) For the Aviation sector, the reference year 2019 was chosen to neutralise the impact of the COVID-19 crisis. This choice meets the NZBA requirements, which recommend that it be no more than two years before the year of publication of GHG emission reduction targets, and is in line with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

(10) Model following a methodology similar to SBTi SDA (Sectoral Decarbonisation Approach).

CEMENT

- Entity concerned: Crédit Agricole CIB;
- Scope: Scopes 1 and 2, in gross emissions (taking into account emissions linked to the combustion of alternative fuels);
- Metric: amount in intensity (kgCO₂e/t) of greenhouse gas emissions linked to the financing of cement-producing customers;
- 2020 baseline: 671 kgCO₂e/t ⁽¹⁾;
- Reduction target for 2030: 20%;
- 2030 target: 537 kgCO₂e/t;
- Reference scenario: IEA's NZE scenario (2021);
- Reference scenario reduction target ⁽²⁾: -22%.

STEEL

- Entities concerned: Crédit Agricole CIB;
- Scope: Scopes 1 and 2 of integrated steel-producing customers + part of Scope 3 of non-integrated steel-producing customers (system of set limits defined by the Sustainable STEEL Principles);
- Metric: amount in intensity (tCO₂e/tonne of crude steel) of greenhouse gas emissions linked to the financing of steel-producing customers;
- 2020 baseline: 1.88 tCO₂e/t;
- Reduction target for 2030: 26%;
- 2030 target: 1.4 tCO₂e/t;
- Reference scenario: NZE SSP (Sustainable STEEL Principles) scenario, adapted from the IEA's NZE scenario;
- Reference scenario reduction target ⁽³⁾: -23%.

The Crédit Agricole Group has made commitments to invest resources in the Residential Real Estate and Agriculture sectors:

RESIDENTIAL REAL ESTATE

The French target of 12.4 kgCO₂e/m²/yr ⁽⁴⁾ in 2030 represents a strong ambition, and Crédit Agricole Group made a commitment to means rather than results, without setting a target, and to support property owners through decarbonisation that will be based on the mobilisation of all stakeholders (owner, public policy, construction sector), while taking into account the heterogeneity of territories in terms of greenhouse gas emissions from housing.

AGRICULTURE

Crédit Agricole Group is committed to supporting the agricultural world in its efforts to reduce carbon emissions while strengthening food sovereignty, by supporting the roadmaps established by the industry and the sectors, and at Ferme France national level and at individual farm levels.

2.4.1.2 INVESTMENT TARGETS**INVESTMENTS IN THE INSURANCE BUSINESS**

As an investor, Crédit Agricole Assurances contributes to the reduction of greenhouse gas emissions worldwide by reducing the carbon footprint of its investment portfolios ⁽⁵⁾.

In 2025, Crédit Agricole Assurances has pursued the decarbonisation pathway for its portfolios and set itself a new commitment by 2029 on a broader scope: Crédit Agricole Assurances is committed to reducing the carbon footprint (in tonnes equivalent of CO₂ per million euros invested) of its listed equity and corporate bond investment and directly held property portfolio by 50% by the end of 2029 compared to the end of 2019 ⁽⁶⁾. As a result, the carbon footprint of this portfolio has decreased by 62% compared to 31 December 2019, from 88 tonnes of CO₂ per million euros invested to 33 tonnes of CO₂ per million euros invested at 31 December 2025.

These targets have been set as part of Crédit Agricole Assurances' involvement in the NZAOA.

In accordance with the NZAOA protocol, Crédit Agricole Assurances is working to broaden the scope of its carbon footprint reduction targets.

The NZAOA protocols contain science-based target carbon footprint reduction ranges for investment portfolios. To establish these reduction ranges, the NZAOA consulted extensively with various university institutions on the scenarios and conclusions of the IPCC's Special Report on Global Warming of 1.5°C and of the IPCC's Sixth Assessment Report (for 2025 and 2030 respectively). The NZAOA recognises that the IPCC reports provide a complete and balanced assessment of the status of scientific, technical and socio-economic knowledge on climate change, its impacts and future risks, in addition to options for reducing the pace at which climate change is occurring.

INVESTMENT FOR THIRD PARTIES

For its Net Zero product offering, Amundi uses the Net Zero Emissions by 2050 (NZE) scenario developed by the IEA as a basis to set decarbonisation targets. The carbon intensity reduction targets correspond to absolute reduction targets per unit of real growth between now and 2025 and 2030. The minimum reduction targets for the portfolios covered by Amundi's internal Net Zero methodology are assessed on a portfolio-by-portfolio basis and are as follows:

- in carbon intensity in relation to revenues on Scopes 1, 2 and direct upstream Scope 3, compared to a baseline at 31 December 2019 ⁽⁷⁾:
 - 30% reduction by 2025,
 - 60% reduction by 2030,
 - As of 31 December 2025, 100% of portfolios covered by the Net Zero range have achieved a 30% reduction in carbon intensity, based on a reference baseline as of 31 December 2019.

In addition, the Net Zero strategies apply a requirement of a minimum exposure to high climate impact sectors to encourage the transition in these key sectors. Finally, Amundi's Net Zero Ambition strategy portfolios must also comply with the requirement not to invest in undertakings or projects associated with a significant negative impact on the portfolio's stated target of mitigating climate change ⁽⁸⁾.

2.4.1.3 INSURANCE TARGETS

Apart from the targets relating to investments in the insurance business mentioned above, no targets have been set for the insurance business at this stage.

(1) Physical production is in tonnes of cementitious material, which avoids double counting and defines a comparable intensity between producers, in line with the recommendations of the Global Cement and Concrete Association (GCCA).

(2) The IEA scenario projections are for Scope 1 emissions, not Scopes 1 and 2, which means they cannot be compared with the Group's commitment.

(3) For Cement and Steel, the NZE reference scenario is based on the sector's Scope 1 only.

(4) Target defined by CRREM v2021 scenario.

(5) Investment means assets held in respect of the euro funds of contracts with guaranteed capital and own funds of the insurance business.

(6) The choice of 2019 as the baseline year is in line with the NZAOA's recommendations and Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

(7) The choice of 2019 as the baseline year allows for compliance with the following NZAOA recommendation: "Members' sub-portfolio targets shall strive for science-based GHG reductions versus YE2019 as described above in the range of 22-32 percent by YE2024, and 40-60 percent by YE2029" NZAOA TSP4", and is part of Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

(8) The methodology can be applied to listed equities and to corporate bonds (sovereign bonds will potentially be included once the methodologies for this asset class have been stabilised). The analysis is cumulative over time, with the time horizons set at 2025 and 2030. The scopes taken into account by default are Scopes 1, 2, and 3 upstream (with a minimum of Scopes 1 and 2), and the methodology does not take negative emission technologies into account. The carbon reduction targets are based on the IEA's Net Zero 2050 scenario.

2.4.1.4 OPERATING FOOTPRINT TARGETS

To promote carbon neutrality by 2050, Crédit Agricole S.A. has based its operating footprint reduction targets on the goal of limiting global warming to 1.5°C by 2100. To do this, Crédit Agricole S.A. has followed the recommendations of the SBTi.

According to the SBTi recommendations, which are based on the 1.5°C scenarios listed by the IPCC, Scopes 1 and 2 emissions must follow a linear reduction pathway of -4.2% per year in absolute emissions, i.e. a target of -46.2% by 2030, based on the 2019 baseline. The reduction pathways established by Crédit Agricole for Scopes 1, 2 and 3.6 are more ambitious, with an expected reduction of -50% in GHG emissions between 2019 and 2030.

In 2025, Crédit Agricole S.A. reduced its GHG emissions by 69% for Scopes 1 and 2 and by 46% for Scope 3.6.

These targets are based on the following methodological principles:

- aligned with science: consistent with the reduction expected to be necessary to follow a 1.5°C scenario;
- established according to an absolute contraction approach: the absolute contraction approach imposes a linear reduction in absolute emissions for undertakings in the financial sector for Scopes 1 and 2;
- established over a broad scope: the selected scope covers 95% of current emissions for Scopes 1 and 2. All energy consumption and the vehicle fleet are included. A voluntary commitment has also been made to set targets for business travel; and
- broken down at entity level: the Group's reduction target is broken down into targets at subsidiary level, taking into account the degree of decarbonisation of their respective operating footprints.

Crédit Agricole S.A. has voluntarily undertaken to reduce by 50% part of its Scope 3.6 emissions, i.e. those linked to business travel, by 2030 compared to 2019. Since 2025, Crédit Agricole S.A. has chosen to manage these emissions in terms of Full-Time Equivalent (FTE) over the 2025-2030 period in order to take into account the organic and external growth of its subsidiaries.

In addition, Crédit Agricole S.A. remains committed to using less carbon-intensive electricity, with the aim of achieving 100% renewable electricity consumption by 2030 at all its French and international sites.

LCL has reduced fuel oil consumption in its buildings by replacing 86% of fuel oil boilers and aims to phase them out completely by 2026.

The Group Purchasing department has set a target for the Crédit Agricole S.A. scope, based on the SBTi requirements specific to financial institutions for categories 1-14 of Scope 3 (non-financial footprint): Crédit Agricole S.A. is committed to making 40% of its external expenditure with suppliers who have adopted science-based reduction targets by 2027. The target of 40% was achieved in 2025.

All of the metrics monitored at the Crédit Agricole S.A. level on the operating footprint and included in the Group's reports are in line with the frameworks set by the GRI G4 and GHG Protocol frameworks.

2.4.1.5 GHG EMISSION REDUCTION KEY METRICS AND ALIGNMENT WITH NET ZERO PATHWAYS

NET ZERO PATHWAYS

	Metric	2020 baseline	2025	2024	2030 target	Entities concerned
Oil & Gas	MtCO ₂ e	24.3	4.5	7.2	6.1	CACIB
	%		-81%	-70%	-75%	
Power production	gCO ₂ e/kWh	224	125	160	95	CACIB, CAL&F
	%		-44%	-29%	-58%	
Automotive	gCO ₂ e/km	190	145	151	95	CACIB, CAL&F, CAPFM
	%		-24%	-21%	-50%	
Aviation	gCO ₂ e/RTK	1,003	830	866	750	CACIB (Baseline 2019)

This table shows changes in Crédit Agricole S.A.'s Net Zero commitments by sector. The definition of the sectors is identical to that available in the "Destination 2050" Guide and reiterated in the sector-specific breakdowns above. The sector's metric, the value for 2025 (2024 for Shipping), the 2020 Baseline, the 2030 target and the contributing entities are presented in this table.

OIL & GAS

The financed emissions associated with the Oil & Gas portfolio have decreased sharply, by -81% compared to 2020, thus exceeding the -75% target set for 2030. This reduction is the result of the selective approach implemented by Crédit Agricole S.A. to support energy companies committed to the transition, with significant reductions in exposure to the most emissive clients and an accelerated deployment of the commitment announced in 2023 to stop financing independent producers.

POWER PRODUCTION

The pathway continues its downward trend, thanks to enhanced support to renewable energies. In particular, Crédit Agricole CIB's exposure to low-carbon energy increased 2.6-fold in 2025 compared to 2020, thus exceeding the commitment to achieve a +80% increase by 2025. In parallel, Crédit Agricole S.A. has continued to decarbonise its financed energy mix, with a reduction of fossil fuels financings and in particular the implementation of the commitment to phase out thermal coal by 2030 in OECD and EU countries and 2040 in the rest of the world.

AUTOMOTIVE

The carbon intensity of the portfolio has decreased by 24% compared to the 2020 baseline. Crédit Agricole S.A. continues to support the decarbonisation of the sector by acting on both supply and demand. We support manufacturers in the electrification of their range, and we encourage individuals and professionals to move towards low-carbon mobility by developing new types of financing.

AVIATION

The average carbon intensity of the portfolio has decreased by 17% compared to a 2019 baseline. This reduction is due to the very high share of 4th Generation aircraft in the new financings implemented since 2019, despite a very competitive market. Crédit Agricole S.A. will continue to support the sector's decarbonisation, by increasing its financings of the most fuel-efficient assets, with an objective of 90% of 4th Generation aircraft within the Aviation portfolio in 2030, and by contributing to the development of the sustainable aviation fuels ecosystem.

SHIPPING

The carbon intensity of the portfolio is decreasing, with a -16% reduction at end 2024 vs. a 2020 baseline. This reduction is due to the exit of emissive assets, the intensity reduction of assets that remained in the portfolio, and the lower intensity of new production. To reach the -36% target set for 2030, Crédit Agricole S.A. will continue to support its clients in the deployment of decarbonisation solutions such as the retrofit of vessels, the use of green fuels, and the development of slow steaming.

COMMERCIAL REAL ESTATE

The carbon intensity of the portfolio is decreasing, with a -32% reduction compared to a 2020 baseline. This reduction is partly linked to the expansion of the scope of activities included in the calculation (operating property for LCL), which has had a positive effect on the reduction in emissions intensity. In addition, Crédit Agricole S.A. is pursuing its strategy of selecting the most committed customers and the most decarbonised assets in the sector. As the challenges are very different depending on the regions where assets are located, Crédit Agricole S.A. continues to improve its data collection in order to refine its calculation methodology and therefore the steering of its trajectory.

ACHIEVED AND EXPECTED GHG EMISSION REDUCTION RELATED TO THE OPERATING FOOTPRINT

Unit	Baseline	2025	2025	2024	2024	2030 target	Reduction remaining
	tCO ₂ eq	tCO ₂ eq	%	tCO ₂ eq	%	%	%
GHG emissions – Scopes 1 and 2	125,749	38,521	-69%	43,193	-66%	-56%	
GHG emissions – Scope 3.6							
Business travel	44,141	23,809	-46%	29,619	-33%	-49%	-3%

The table shows the commitments to reduce emissions linked to the operating footprint (Scopes 1, 2 and 3.6), as well as the monitoring of GHG emissions, within the scope of Crédit Agricole S.A. It allows for a comparison with the baseline year 2019, the year 2024 and the target set for 2030. The 2019 baseline data corresponds to the

Crédit Agricole S.A. scope as established in 2021. Entities have been recommended to report on a rolling period from 1 November 2024 to 31 October 2025, to allow the report to be produced on time. Some entities are not in line with this rolling year due to their own reporting constraints.

INDICATORS RELATED TO FINANCING OF TRANSITIONS

	2025	2024
TOTAL FINANCING OF ENVIRONMENTAL TRANSITION (in millions of euros)	53,244	47,422
O/w energy-efficient buildings	29,952	30,938
O/w clean transport and mobility	7,137	5,157
O/w others	16,155	11,327

The table above shows outstanding loans dedicated to the environmental transition (dedicated financing, either directly or through other organisations such as the European Investment Bank (EIB) or Caisse des Dépôts) according to the Crédit Agricole Group's internal sustainable assets and liabilities framework at 30 September 2025.

2.4.2 GROSS SCOPES 1, 2, 3 GHG EMISSIONS AND TOTAL GHG EMISSIONS

TOTAL GHG EMISSIONS BROKEN DOWN BY SCOPES 1 AND 2 AND SIGNIFICANT SCOPE 3 EMISSIONS

	Retrospective data			Milestones and target years			Annual target as a %/baseline
	Baseline	2024	2025	% 2025/ 2024	2025	2030	2050
Scope 1 GHG emissions							
Scope 1 gross GHG emissions (tCO ₂ eq)	42,606	22,685	18,144		32,340	19,863	53%
Percentage of Scope 1 GHG emissions arising from regulated emission trading schemes (%)							
Scope 2 GHG emissions							
Scope 2 gross GHG emissions based on location (tCO ₂ eq)		62,989	68,649				
Scope 2 gross GHG emissions based on the market (tCO ₂ eq)	83,143	20,508	20,377		60,560	35,228	58%
Significant Scope 3 GHG emissions							
Total gross indirect GHG emissions (Scope 3) (tCO ₂ eq)		164,137,127	165,600,091				
1. Purchased goods and services							
[Optional sub-category: Cloud and data centre IT services]							
2. Capital goods							
3. Fuel- and energy-related activities (not included in Scope 1 or Scope 2)							
4. Upstream transportation and distribution							
5. Waste generated in operations							
6. Business travel	44,141	29,619	23,809		33,156	22,604	49%
7. Employee commuting							
8. Upstream leased assets							
9. Other indirect emissions							
10. Processing of sold products							
11. Use of sold products							
12. End-of-life treatment of sold products							
13. Downstream leased assets							
14. Franchises							
15. Investments		164,107,508	165,576,282				
TOTAL GHG EMISSIONS							
Total GHG emissions (location-based) (tCO₂eq)		164,222,801	165,686,884				
Total GHG emissions (market-based) (tCO₂eq)		164,180,320	165,638,612				

The table presents GHG emissions broken down by Scopes 1 and 2 and the significant Scope 3 GHG emissions (3.6 and 3.15) of Crédit Agricole S.A., with the exception of Crédit Agricole Assurances and Amundi relating to Scope 3.15, whose situations are presented below.

Scope 3 emissions (categories 1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12, 13 and 14) are excluded due to operational constraints. Only Scope 1 and 2 emissions, as well as Scope 3 category 6 and category 15, on which Crédit Agricole S.A. and a number of its entities make public commitments, are published in the sustainability report. In addition, methodological work is being undertaken to be able to account for the emissions of Crédit Agricole S.A. under Scope 3.1 “Purchased goods and services” in 2026.

EMISSIONS RELATED TO THE OPERATING FOOTPRINT

Entities were advised to report on a rolling year running from 1 November 2024 to 31 October 2025, to allow the report to be produced on time. Some entities are not in line with this rolling year due to their own reporting constraints.

Scope 1 emissions include those related to the entity's fleet of vehicles (diesel, petrol) and the energy consumption of buildings (gas, fuel oil). Diesel and petrol consumption are accounted for within the French scope. Scope 2 emissions include the heating network, the cooling network and electricity, and are calculated according to two approaches: location-based and market-based. In the latter approach, Scope 2 is limited to emissions related to unguaranteed electricity. The 2024 data for location-based scope 2 has been adjusted as a result of a calculation refinement. Scope 3.6 emissions correspond to business travel by rail and air. The update of emission factors in 2025 results in an increase in scope 2 and a decrease in scope 3.6. The table shows actual data only.

Internally, Crédit Agricole S.A. monitors its operating footprint more exhaustively. Entities excluded from this table for all metrics are entities that do not report through the Greenway tool, in particular those with fewer than 100 FTEs at the date of the annual update of the tool, whose actual or extrapolated data represent: 24 tCO₂eq for Scope 1, 480 tCO₂eq for Scope 2 and 1,385 tCO₂eq for Scope 3.6.

EMISSIONS RELATED TO THE FINANCING PORTFOLIO

CALCULATION METHOD

For banking institutions, Scope 3.15 – financed emissions – is the most significant greenhouse gas emissions item. Scope 3.15 emissions are calculated using the Partnership for Carbon Accounting Financials (PCAF) methodology across the scope. Regarding the Agriculture sector, Crédit Agricole has carried out methodological work since 2022 in relation to the subsidiaries' roadmaps to calculate more precisely the financed emissions associated with the sector. The 2024 data have been recalculated to reflect this methodological change, which contributes to a slight increase in total GHG emissions.

SCOPE

The calculations take into account six asset classes identified by the PCAF, i.e. listed equity and corporate bonds, business loans and unlisted equity, project finance, commercial real estate, mortgages and motor vehicle loans. Emissions related to long-term car rental activities are classified under category 3.15.

Crédit Agricole's work on the calculation of financed emissions, in terms of the asset classes taken into account and the approach used, considers the GHG Protocol's minimum requirements, to which other relevant asset classes deemed as relevant for the Group are added. The scope of calculation therefore includes emissions related to portfolios of equities, bonds, loans and project finance for non-financial companies, as well as loans to individuals in the residential real estate and automotive sectors.

The following are excluded from the total emissions presented in the table: emissions related to investments in asset management and insurance activities, financed emissions related to sovereign debt outstanding, loans to financial institutions, trading activities, and loans to individuals outside the residential real estate and automotive sectors, as well as outstanding amounts in sectors other than those contributing significantly to climate change (NACE codes K, J, M to U) in accordance with the definition of the scope of template 1 of ESG Pillar 3.

The bank does not include financed emissions associated with the sovereign asset class in its scope 3.15 due to its unstable nature and these data are therefore not representative. Indeed, sovereign assets are subject to particularly volatile market dynamics: exposure relates to a temporary stock, which can vary significantly from day to day. Disclosing this data would present a snapshot of a highly variable situation that is not representative of the bank's actual or long-term exposure to these assets.

Excluding the aforementioned asset classes, the calculation of financed GHG emissions covers a base of Crédit Agricole S.A.'s outstanding financing amounting to € 402 438 million.

Emissions related to investments of the asset management and insurance activities are presented individually and not consolidated in the table.

CALCULATION DETAILS

As defined by the PCAF, financed emissions are the emissions of the counterparty pro rata to an allocation factor defined as the ratio of the financing granted to the counterparty value. It should be noted that for operational reasons, Crédit Agricole S.A. currently applies the PCAF business loan methodology to all non-financial undertakings, regardless of the type of exposure (loan, bond, project financing).

The PCAF methodology covers customer emissions when the data are available. Data may be reported on the basis of the counterparty disclosures, or estimated, either by data providers or internally via specific calculations or through sector-specific propagations. The calculation of the different scopes of GHG emissions is as follows:

Scopes 1 and 2: based on the GHG data provided by customers, supplemented by internal or external estimates. In the absence of data, a sector-specific approximation is applied, with emissions considered uniform and mainly related to energy consumption.

Scope 3: more complex to measure due to lack of global standards and reliable data. The information collected from customers or external service providers is prioritised. In the absence of customer information, estimates are made on certain counterparties, relying in particular on the work of the NZBA or on data deemed usable. The Group does not apply estimates obtained by sectoral propagation for the calculation of Scope 3 in the absence of reliable collected or estimated data.

Accounting for all the GHG emissions of its customers inherently involves a multiple counting bias for the financial institution, as some customers are suppliers to others. For example, when financing a car manufacturer, the Group accounts for the emissions associated with its entire value chain, in particular the emissions associated with the fuel consumed by the vehicles sold. At the same time, when financing an oil company, the emissions associated with the combustion of the oil products sold are accounted for. To address the multiple counting of GHG emissions, the Group has carried out preliminary work to gain a view of GHG emissions that is as close as possible to their physical reality, relating to the value chains of fossil fuels and electricity. The approach is to retain the highest carbon emissions from combustion within each of these value chains, as an integrated company would do.

By applying these adjustments to the two sectors mentioned, the theoretical GHG emissions reported within the scope of Crédit Agricole CIB are reduced from 128.8 million tCO₂eq to 77.6 million tCO₂eq.

DATA QUALITY

For the residential real estate and automotive sectors, the PCAF scores are 4.8 and 2.47 respectively. For other sectors, the coverage rate with actual data amounts to 19.3%. The considered bases total €402,437,640,182.

EMISSIONS RELATED TO INVESTMENTS IN ASSET MANAGEMENT AND INSURANCE ACTIVITIES

ASSET MANAGEMENT

Amundi doesn't include in its carbon footprint the third-party investments. Indeed, Amundi refers to the GHG Protocol, which only takes into account, in its "minimum requirements", emissions related to direct financing of companies in the form of equity, debt, and project financing. Thus, the calculation for other types of activities is considered optional at this stage, particularly for investment and asset management activities. Amundi calculates the carbon intensity of its Net Zero product range portfolios, which stands at 98 tCO₂e per million euros of revenue as of 31 December 2025.

INSURANCE

The amount of GHG emissions for investments for Crédit Agricole Assurances activities is 46.8 million tCO₂eq.

The amount of emissions is linked to:

- **the investments managed directly by Crédit Agricole Assurances** for the euro-denominated funds of life and pension insurance policies and its own funds, show an emissions amount of 38.1 million tCO₂eq. It corresponds to the Scopes 1, 2 and 3 upstream of issuers, when they exist and data is available. This portfolio represents a total outstanding amount of €325.9 billion corresponding to the following asset classes:
 - to listed corporate equities and bonds for a total outstanding amount of €178.7 billion: total emissions of 15.5 million tCO₂eq, calculated on an outstanding amount of €148.9 billion, representing a coverage rate of 83.3%,
 - unlisted corporate equities and bonds and infrastructure for a total outstanding amount of €22.6 billion: total emissions of 1.2 million tCO₂eq calculated on an outstanding amount of €12.7 billion, representing a coverage rate of 56.1%,

- real estate for a total outstanding amount of €20.5 billion: total emissions of 0.1 million tCO₂eq and an outstanding amount of €15.2 billion, representing a coverage rate of 74%,
- sovereign assets for a total outstanding amount of €80.5 billion: total emissions of 16.9 million tCO₂eq calculated on an outstanding amount of €77.9 billion, representing a coverage rate of 96.7%,
- other types of assets (such as money market funds, derivatives, diversified and alternative funds) for a total outstanding amount of €23.6 billion: total emissions of 4.4 million tCO₂eq calculated on an outstanding amount of €13.1 billion, representing a coverage rate of 55.8%.

The emissions coverage ratio calculated for this portfolio as a whole is thus 82.2%.

- **the assets carried by Crédit Agricole Assurances** for the unit-linked life and pension insurance policies, the outstanding amount of which is € 115.6 billion. The related greenhouse gas emissions reach a volume of 8.7 million tCO₂eq (coverage ratio of 68.9%). The assets mainly correspond to UCITS and corporate securities.

Crédit Agricole Assurances has also calculated an amount of 273,269 tCO₂eq for property and casualty insurance, which corresponds to the GHG emissions from management of motor vehicle claims (in France and abroad) and home claims (French scope).

The calculation methodology used to determine GHG emissions related to the management of a motor vehicle claim is presented in detail in the White Paper "CO₂ emissions of auto claims management in France" published in July 2024. This calculation follows the entire process of a car claim management, from the intervention of the assistance company to the repair of vehicles, and the estimated emissions are based on data provided by the various stakeholders.

With regard to housing, a gradual approach has been adopted by initially targeting water damage claims: these claims accounted for more than half of claims opened in 2025 with relatively available data.

The calculation approach is based on two structuring principles of action: in-depth collaboration with the entire value chain; and working with expert partner firms to identify and integrate physical emission factors into their databases.

2.4.2.1 OPERATING FOOTPRINT

FOCUS – OPERATING FOOTPRINT (IN TCO₂EQ)

Metrics	2025	2024
Scope 1	18,144	22,685
of which gas	11,659	12,231
of which fuel oil	331	750
of which vehicle fleet	6,153	9,704
Scope 2 (market-based)	20,377	20,508
of which electricity	10,792	12,759
of which electricity of data centres	728	2,445
of which heating network	8,120	5,101
of which cooling network	737	203

The table presents Scope 1 and Scope 2 GHG emissions for Crédit Agricole S.A., broken down by emission item. Entities were advised to report on a rolling year from 1 November 2024 to 31 October 2025 to allow the report to be produced on time. Some entities are not in line with this rolling year due to their own reporting constraints.

The Scope 2 emissions presented here are market-based, thus limiting them to emissions from electricity that is not guaranteed.

GHG EMISSIONS RELATED TO ENERGIES AND BUSINESS TRAVEL

	Unit	2025	2024
GHG emissions related to energies/m ²	tCO ₂ eq/m ²	0.0138	0.0139
GHG emissions related to business travels/FTE	tCO ₂ eq/FTE	0.2867	0.3646

The table presents the GHG emission intensity ratios for the Crédit Agricole S.A. scope.

The ratio of GHG emissions related to building energy consumption per square metre is calculated from energy data according to the market-based methodology on the total surface area. The 2024 data has been adjusted following a correction in the calculation of the total surface area.

The ratio of GHG emissions linked to business travel per FTE is calculated based on total FTEs.

ENERGY CONSUMPTION AND MIX

Data related to energy consumption and production could not be verified. Indeed, the production process implemented at the level of Crédit Agricole Group does not allow, at this stage, the collection and review of all E1-5 datapoints and their full alignment with the CSRD regulatory requirements. The Group is working on improving this process in order to publish this data at some point.

2.4.2.2 EMISSIONS RELATED TO THE FINANCING PORTFOLIO

GHG EMISSIONS RELATED TO FINANCING

	Unit	2025	2024
Total financed emissions	tCO ₂ eq	165,576,282	164,107,508
Carbon intensity of outstandings	tCO ₂ eq/€m	411	414

The table shows the total indirect emissions of scope 3 category 15 from the table in part 2.4.2 "Total GHG emissions broken down by Scopes 1 and 2 and significant Scope 3 emissions", supplemented by the ratio of intensity of emissions in terms of euros financed. The scope of financing included in this ratio is identical to that indicated in the section "Financed emissions", "Scope" above. The stock base considered here is €402,438 million.

2.4.3 GHG REMOVALS AND GHG MITIGATION PROJECTS FINANCED THROUGH CARBON CREDITS

CARBON CREDITS CANCELLED DURING THE REFERENCE PERIOD

	2025	2024
Amounts from removals and reduction projects (in tCO ₂ eq)	166,526	121,917
of which VERRA (in tCO ₂ eq)	62,274	71,232
of which Gold Standard (in tCO ₂ eq)	104,252	45,213
of which Label Bas Carbone (in tCO ₂ eq)	0	0
Other	0	5,472

The table shows the total amount of carbon credits cancelled during the reporting period, as well as details by label within the scope of Crédit Agricole S.A. Carbon credits for which the entity has a document confirming cancellation (Certificate of Verified Carbon Unit (VCU) Retirement) from the label are counted as

cancelled carbon credits. In the case of the Low-Carbon Label, the number of "GHG Emission Reductions" attributed under its framework (recognised by the Prefect of the region concerned) is recorded.

CARBON CREDITS PLANNED TO BE CANCELLED IN THE FUTURE

	Amount of carbon credits in 2025	Amount of carbon credits in 2024
Total (tCO ₂ eq)	292,528	472,519

The table presents the quantity of carbon credits planned to be cancelled in the future, for all labels within the Crédit Agricole S.A. scope.

It includes the number of carbon credits from projects verified by the labels, but not yet delivered (identified by Livelihoods

documents or other documents), as well as the number of projected "GHG Emission Reductions" in the process of being financed but not yet "Recognised" (recorded in the LBC register), i.e. not yet allocated by the Prefect on behalf of the financier.

2.4.4 INTERNAL CARBON PRICING

Crédit Agricole Group has not opted to implement an internal carbon pricing scheme.

2.4.5 INFORMATION PUBLISHED ON ACTIVITIES RELATED TO THE EU TAXONOMY

The information relating to the European Green Taxonomy published in this report is based on Delegated Regulation (EU) 2026/73, made public on 4 July 2025 and published in the OJEU on 8 January 2026.

REGULATORY FRAMEWORK AND REQUIREMENTS

The EU Taxonomy Regulation 2020/852 of 18 June 2020 establishes a framework for defining environmentally sustainable economic activities, i.e. economic activities that pass the following three tests:

I) they make a substantial contribution to an environmental objective;

II) they do no significant harm to any of the other environmental objectives presented in the regulation;

III) they are carried out in a way that meets certain minimum social safeguards.

Activities that meet these three criteria are said to be “Taxonomy-aligned”.

This regulation sets the following objectives:

- climate change mitigation;
- climate change adaptation;
- sustainable use and protection of water and marine resources;
- transition to a circular economy;
- pollution prevention and control;
- protection and restoration of biodiversity and ecosystems.

The Taxonomy Regulation has been supplemented by five Delegated Acts:

- **the Article 8 Delegated Act 2021/2178:** concerns the content and presentation of the information to be disclosed by undertakings subject to the Non-Financial Reporting Directive (NFRD) and then CSRD directives from 1 January 2025;
- **the Climate Delegated Act 2021/2139:** describes the “eligible” activities and the technical screening criteria for determining “alignment” with the two climate objectives of “climate change mitigation” and “climate change adaptation”. Regulation 2023/2485 amends this text to introduce new eligible economic activities and new technical criteria applicable for assessing alignment. The alignment of these new activities has been under consideration since this decree was issued;
- **the Gas and Nuclear Delegated Act 2022/1214:** concerns economic activities related to the gas and nuclear sectors in terms of climate objectives;
- **the Environmental Delegated Act 2023/2486:** describes the “eligible” activities and the technical screening criteria used to assess the “alignment” with the other four environmental objectives, also applicable to credit institutions since this act came into force;
- **Delegated Act 2026/73:** concerning the mechanism for simplifying the content and presentation of information to be disclosed on environmentally sustainable activities.

According to the provisions of Article 8 of the Delegated Regulation, the reporting requirements applicable to credit institutions are progressive:

- Since the 2022 reporting year (on the basis of data at 31 December 2021), Crédit Agricole S.A. publishes annually (i) the proportion of “eligible” assets (i.e. financing activities described in the delegated acts) and “non-eligible” assets under the Climate Delegated Act and (ii) the proportion of assets excluded solely from the numerator of the ratio and the proportion excluded from both the numerator and the denominator of the ratio; as from the 2023 reporting year, eligibility is calculated on the basis of the Taxonomy’s six environmental objectives.
- Since 31 December 2023, Crédit Agricole S.A. has disclosed the proportion of “aligned” assets (the Green Asset Ratio or GAR), i.e. assets financing eligible activities that pass the three Taxonomy alignment tests. This alignment analysis is carried out on the basis of (i) information published by non-financial undertakings and financial undertakings subject to the Non-Financial Reporting Directive (NFRD), and subsequently to the Corporate Sustainability Reporting Directive (CSRD) from 1 January 2025, (ii) as well as on the basis of the Delegated Act’s technical criteria covering retail customers, local authorities, and dedicated finance.
- Crédit Agricole S.A. also discloses additional metrics:
 - ratio for assets under management: the proportion of assets under management financing Taxonomy-aligned economic activities, compared to total assets under management;
 - financial guarantee ratio: represents the proportion of financial guarantees backing loans and advances and other debt instruments on undertakings (financial and non-financial) intended to finance Taxonomy-aligned economic activities.

- Finally, the publication of Delegated Act 2026/73 of 4 July 2025 suspended, until January 2028, the disclosure requirements for additional KPIs relating to the trading book and fees and commissions received for services other than loans and asset management. These metrics are therefore not published by Crédit Agricole S.A. on the basis of data at 31 December 2025, in accordance with regulatory expectations.

The diagram below shows all the information to be disclosed.

Since the decree of 31 December 2024, Crédit Agricole S.A. has disclosed its eligibility ratios for the four complementary environmental objectives as well as the GAR Flow based on revenues and Capex ⁽¹⁾. For the publication of 31 December 2025, the alignment ratios for the four complementary environmental objectives are disclosed for the first time.

Crédit Agricole S.A. does not disclose the additional KPI on Financial Conglomerates. The scope of this metric is indeed already largely covered by the other KPIs disclosed (green asset

ratios and assets under management ratios), which include all the Group's material activities (banking, asset management, insurance and non-financial subsidiaries that are equity-accounted for regulatory purposes). Furthermore, publication of the conglomerate ratio could lead to the production of potentially contradictory information on the scope of the activities covered by this ratio and in the other KPIs, given the different weighting methods for the aligned assets: balance sheet logic for the green asset ratios and assets under management ratios, whereas the approach used for the conglomerate ratio is based on revenues.

(1) Capex is the abbreviation of capital expenditure.

METHODOLOGY FOR DETERMINING ALIGNED ASSETS

Since the financial year ended 31 December 2023, credit institutions have been required to publish the proportion of Taxonomy-aligned assets.

Aligned activities are defined and described by the Climate Delegated Act and the Environmental Delegated Act.

In order to determine the alignment of assets with the Taxonomy, the following assets are considered eligible for the Taxonomy:

- home loans, renovation loans and vehicle financing to individuals (loans granted from 1 January 2022) for households;
- housing finance and dedicated finance (finance whose purpose is known and which concerns an activity eligible for the taxonomy) for local authorities;
- commercial and residential property collateral seized and held for sale;
- exposures to financial and non-financial counterparties subject to the Corporate Sustainability Reporting Directive (CSRD), for which the eligible ratio is available in their publications and for which data could be collected.

On the basis of the eligible assets listed above, the Taxonomy-aligned assets are identified according to two analysis angles:

- for general financing, on the basis of information published by CSRD financial and non-financial counterparties, in particular the green asset ratios, green revenues and green capital expenditure, which are collected from the external data provider Clarity AI (actual data, without any estimate), or where appropriate, retrieved from customers' sustainability reports;
- for financing where the purpose is known, based on the characteristics of the financed asset by applying the technical criteria for Taxonomy alignment.

Mortgage loans considered to meet the Taxonomy criteria are those that (i) have the best energy performance and (ii) are not subject to chronic or acute physical risk.

Properties with an energy performance level in the top 15% of the national or regional building stock (for properties with a building permit submitted before 31 December 2020) or with energy consumption at least 10% below the threshold set by the NZEB – Nearly zero-emission building regulation (for properties with a building permit submitted after 31 December 2020), meet the Taxonomy's substantial contribution criteria.

For the purposes of analysing the alignment of residential real estate in France, and based, on one hand, on studies carried out by the *Observatoire de l'immobilier durable* (Observatory for Sustainable Real Estate) and, on the other hand, on the interpretative note of the French Ministry of Ecological Transition and Territorial Cohesion, Crédit Agricole Group defines the residential properties with an energy performance level in the top 15% of the French building stock as the properties with primary energy consumption of below 135 kWhEP/m² per year. Crédit Agricole Group also considers buildings constructed according to the RT2012 thermal regulation to meet this criterion, as regulation RT2012 establishes an energy consumption ceiling of 50 kWhEP/m² per year, which is lower than 135 kWhEP/m² per year.

Mortgage loans to finance new residential buildings for which the first drawdown took place between 1 January 2017 and 31 December 2020 (the date on which the substantial contribution criterion came to an end) correspond to constructions complying with regulation RT2012. The reason is that regulation RT2012 was implemented in 2013, but building permits issued up to January 2016 had a validity period of two years which could be extended on two occasions by one additional year, which resulted in a maximum period of four years between the issuance date of the permit and the date the mortgage loan was granted/the date of first drawdown from the mortgage loan. Between 1 January 2013 (date of entry into force of regulation RT2012) and 31 December 2016, a building could therefore be constructed with a building permit which was not RT2012 compliant.

Furthermore, in accordance with the interpretation note of the French Ministry of the Economy and Ecological Transition, properties subject to the RE2020 environmental regulations must comply with the NZEB -10% criterion.

The identification and assessment of physical risks, within the framework of the "Climate change adaptation" DNSH, were based on the methodology used for table 5 "Banking portfolio – Physical risk metrics potentially related to climate change: Exposures subject to a physical risk" of ESG Pillar 3. This methodology aims to identify the hazards to which buildings are exposed and to assess the risks on the basis of a 2050 scenario. The hazards taken into account in the methodology are floods due to overflow of rivers or submersive waves, clay shrinkage-swelling and sea level rises. The share of properties subject to chronic or acute physical risk is considered non-aligned if no restructuring plan is in place. Therefore, by applying this methodology to residential properties, € 1.7 billion are excluded from the GAR's numerator.

In addition, the analysis of Minimum Social Safeguards (MSS) was not carried out at loan level for retail activities, as Crédit Agricole S.A. considers MSS to be complied with de facto in its portfolio, which is mainly a loan book for residential mortgage in France for which current regulations allow compliance with minimum social criteria. In addition, the Sustainable Finance Platform report ⁽¹⁾ of October 2022 stated that social minimums do not apply to households.

It should be noted that car loans and home renovation loans could not be Taxonomy-aligned due to a lack of evidence collected from customers to verify the technical criteria.

To calculate the GAR, the amount of **aligned assets** is compared to the amount of **covered assets**, which corresponds to total assets, excluding the following items:

- exposures to companies not subject to the CSRD (financial and non-financial companies outside the EU, small and medium-sized companies in the EU below the thresholds for subjection);
- derivatives, overnight interbank loans, cash and cash equivalents and other assets (including loans not dedicated to retail customers);
- other not eligible for Taxonomy exposures to financial and non-financial counterparties subject to the CSRD, retail customers and local authorities.

FIGURES FOR CRÉDIT AGRICOLE S.A. SCOPE AT 31 DECEMBER 2025

OPERATIONAL APPLICATION OF THE DISCLOSURE REQUIREMENTS UNDER ARTICLE 8 OF THE TAXONOMY REGULATION

Crédit Agricole Group's Societal Project, the expression of the Group's CSR/ESG strategy, integrates three key dimensions: taking action for the climate and transition to a low-carbon economy; strengthening social cohesion and inclusion; and accomplishing agricultural and agri-food transitions.

The criteria for alignment with the European Taxonomy, a regulation which to date covers only the environmental aspect, have been integrated into the design and approval process for certain products and the formalisation of commitments made to customers and counterparties, particularly in the following areas:

- on the liabilities side, a new green bond framework was published in November 2023, replacing the framework put in place in 2018 on the occasion of Crédit Agricole S.A.'s initial green bond issue;
- the framework is harmonised for all Crédit Agricole Group entities and serves as a reference for the Group's green securities issues, distributed to institutional and retail investors. Rapid development of the sustainable finance ecosystem since 2018, the introduction of the European Taxonomy and the strengthening of Crédit Agricole Group's environmental and climate strategy

prompted this update of this Group emissions framework. In concrete terms, the substantial contribution criterion has been adopted as one of the criteria for the selection of assets eligible for financing by these green bond issues;

- in order to support the Group's customers in their transition to a more sustainable business and to develop sustainable financing and savings offerings in a structured and secure way, the Group has decided to draw up an internal framework defining Crédit Agricole Group's sustainable assets. This framework also makes it possible to identify assets eligible for financing through sustainable liabilities;
- in terms of product governance, any entity wishing to market a new "sustainable product", and which would refer to a Taxonomy alignment where applicable, must obtain the prior and explicit authorisation of its New Activities and Products Committee (NAP Committee), which is responsible for verifying that all the conditions necessary for distribution have been met in terms of legal and regulatory compliance as well as operational aspects. It must also ensure that its offering complies with the standards of the aforementioned internal framework, demonstrate its ability to apply the collective rules in force and submit its application to Crédit Agricole S.A. for approval.

EUROPEAN TAXONOMY INDICATORS FOR SUSTAINABLE ACTIVITIES

ILLUSTRATIVE TABLE OF THE GAR COMPOSITION TURNOVER-BASED BY COUNTERPARTY TYPE

(in millions of euros)

	2025					2024*				
Covered assets in denominator	735,924					731,096				
	Total	Eligible	Aligned	Of which Taxonomy-eligible	Of which Taxonomy-aligned (GAR Turnover-based)	Total	Eligible	Aligned	Of which Taxonomy-eligible	Of which Taxonomy-aligned (GAR Turnover-based)
Covered assets in numerator	735,924	364,297	45,419	49.50%	6.17%	731,096	361,184	44,830	49.40%	6.13%
Financial undertakings	548,227	214,495	26,842	39.13%	4.90%	545,191	216,911	26,566	39.79%	4.87%
Non-financial undertakings and Local governments financing	51,416	17,912	5,195	34.84%	10.10%	51,666	19,063	6,839	36.90%	13.24%
Households	136,207	131,890	13,382	96.83%	9.83%	134,216	125,210	11,425	93.29%	8.51%
Of which loans collateralised by residential immovable property	111,824	109,996	13,382	98.37%	11.97%	107,347	106,468	11,425	99.18%	10.64%

* Based on the methodology set out by Commission Delegated Regulation (EU) 2026/73 of 4 July 2025.

For the first time, this year, Crédit Agricole S.A. is publishing the above voluntary table, which presents the GAR stock (Revenues view) for financial years 2024 and 2025, broken down by counterparty type. As a reminder, the calculation method used for 2025 was based on the information available in Commission Delegated Regulation (EU) 2026/73 of 4 July 2025.

To facilitate comparability, it was therefore necessary to recalculate the GAR level achieved in 2024. Thus, the impact of these methodological changes resulted in an improvement in the ratio, which increased from 3.64%, as disclosed in the previous sustainability report, to 6.13%.

Using the same calculation method, the 2025 GAR of 6.17% is relatively stable compared with 2024.

TEMPLATE 0 - SUMMARY OF KPIS TO BE DISCLOSED BY CREDIT INSTITUTIONS UNDER ARTICLE 8 TAXONOMY REGULATION

At 31 December 2025

		Total exposure to Taxonomy-aligned activities			% coverage KPI (%) (over total assets)		Non assessed exposures (% of covered assets)*	Non assessed exposures (% of covered assets)*
		Turnover-based	CapEx-based	Turnover-based	CapEx-based		Turnover-based	CapEx-based
Main KPI	Green asset ratio (GAR) stock	45,419	51,221	6.17%	6.96%	38.74%		

* In accordance with Article 7(8) of Commission Delegated Regulation (EU) 2026/73.

							Non assessed exposures (% of covered assets)*	Non assessed exposures (% of covered assets)*
		Total exposure to Taxonomy- aligned activities		KPI (%)	KPI (%)	% coverage (over total assets)		
		Turnover-based	CapEx-based	Turnover-based	CapEx-based		Turnover-based	CapEx-based
Additional KPIs	GAR (flow)	17,439	19,406	5.50%	6.12%	46.35%		
	Trading book							
	Financial guarantees	808	1,034	6.25%	7.99%	0.68%		
	Assets under management**	76,410	75,799	8.16%	8.10%	49.27%		
	Fees and commissions income							

* In accordance with Article 7(8) of Commission Delegated Regulation (EU) 2026/73.

** The external alignment data provided by MSCI covers 49% for the turnover KPI and 56% for the Capex KPI of the total assets in the denominator (assets under management). This improved coverage is mainly due to changes in the methodological rules for the denominator (exclusion of derivatives and non-CSRD companies). With identical methodology, the coverage would have been 29% for the turnover KPI and 33% for the Capex KPI.

At 31 December 2024

		Total environmentally sustainable assets	KPI (Revenue basis)	KPI (Capex basis)	% coverage (over total assets)	% of assets excluded from the numerator of the GAR (Article 7 (2) and (3) and Section 1.1.2. of Annex V)	% of assets excluded from the denominator of the GAR (Article 7 (1) and Section 1.2.4 of Annex V)
Main KPI	Green asset ratio (GAR) stock	44,830	3.64%	4.38%	66.27%	57.62%	33.73%
Additional KPIs							
	GAR (flow)	18,929	4.19%	4.76%	62.16%	54.00%	37.84%
	Trading book						
	Financial guarantees	891	3.72%	4.86%			
	Assets under management *	49,583	3.05%	4.09%			
	Fees and commissions income						

* Source: MSCI, Amundi. Alignment data provided by MSCI covers 24% for the KPI (Revenue basis) and 14% for the KPI (Capex basis) of total assets of the denominator (assets under management).

The European Commission's publication of 17 December 2025 specifies, in particular, the need to maintain the publication of KPIs at 31 December 2024 for comparability purposes. The KPIs published in Model 0 on 31 December 2024, in accordance with regulatory requirements, have not been recalculated using the methods set out in the new Delegated Act 2026/73.

Crédit Agricole S.A. disclosed the GAR Flow on 31 December 2025 using a methodology that only takes into account new transactions during the year, without considering repayments or divestments.

To comply with the provisions of the publication of European Commission notice of 8 November 2024, Crédit Agricole S.A. publishes the main key performance indicator, the GAR stock, in terms of revenues and Capex, of its main entities exempt from publication of individual sustainability reports. These entities are as follows:

- LCL: 10.64% (revenues) and 10.92% (Capex);
- Crédit Agricole Leasing & Factoring: 7.19% (revenues) and 9.66% (Capex);
- Crédit Agricole Personal Finance & Mobility: 0.57% (revenues) and 0.87% (Capex).

In addition to these ratios, as a financial conglomerate, Crédit Agricole S.A. publishes the principal key performance indicator, in terms of revenues and CapEx, of its subsidiaries engaged in activities in the areas of asset management and insurance:

- Crédit Agricole Assurances:
 - Investment ratio: 4.65% (revenues) and 5.92% (Capex),
 - Subscription ratio: 6.46% (revenues),
 - Weighted ratio: 4.77% (revenues) and 5.96% (Capex);
- Amundi: 8.16% (revenues) and 8.06% (Capex).

In accordance with Article 4 of Delegated Act 2026/73 of 4 July 2025, Crédit Agricole Assurances has chosen not to implement the new provisions set out in the text as of the 2025 financial year, and discloses its taxonomy reporting on the basis of the requirements set out in the previous Regulations (EU) 2021/2178, (EU) 2021/2139 and (EU) 2023/2486. The level of KPIs disclosed in this report therefore does not benefit from the structural improvements provided for in the new Delegated Act.

3. SOCIAL RESPONSIBILITY

OUR EMPLOYEES

Faced with the challenges of a constantly changing world, Crédit Agricole Group asserts itself as a responsible employer that:

- engages and encourages all its employees to be bold through the pursuit of its cultural transformation;
- places trust at the heart of its culture, strengthening collective spirit and promoting cross-functional collaboration;
- by constantly cultivating fairness and inclusion;
- by investing in the development of target and emerging skills to ensure the employability of its employees;
- through ongoing social dialogue.

EXAMPLES OF EMPLOYEE-RELATED IROS ⁽¹⁾

Opportunities

- Increased overall performance and employee retention through career support and skills development

Opportunities

- Improving attractiveness through ambitious and innovative ESG practices

Positive impact

- Improved employee health/safety

⁽⁴⁾ A community of executives and managers drawn from all business lines and functions worldwide.

This table is for illustrative purposes only and is not intended to replace the information contained in the sustainability report.

3.1. OWN WORKFORCE/OWN WORKERS

3.1.1 STRATEGY

3.1.1.1 THE HUMAN PROJECT, A MAJOR DRIVER OF CRÉDIT AGRICOLE S.A.'S AMBITIONS

To work every day in the interest of its customers and society, Crédit Agricole S.A. has coordinated its action around the 2022-2025 Medium-Term Plan, the Customer Project, the Societal Project and the Human Project.

Crédit Agricole S.A.'s organisational, managerial and cultural transformation relies on male and female employee-driven actions: for the Customer Project, work on relational excellence, for the Human Project, the development of empowered teams, and for the Societal Project, efforts to step up societal commitment.

The Human Project focuses on local human accountability to offer customers permanent access to a trained, independent contact person acting within a clear framework of delegation. It is based on a deep conviction: "human accountability is a necessity". Training actions and tests have been carried out by teams and individuals to support them in the development of the Customer Project and the Societal Project.

The Human Project places individual and collective responsibility at the heart of the Group's managerial, cultural and human transformation. It recognises the individual and collective engagement and performance of employees. It promotes the development of employee skills and offers them a variety of career and mobility opportunities, through its learning-based corporate culture.

Crédit Agricole S.A.'s new Medium-Term Plan, ACT 2028, was unveiled on 18 November 2025. The Human Project is continuing. It aims to build commitment through trust in order to support the Group's ambitions and development in three key areas: Empowering to accelerate; Transforming through skills; Uniting through trust.

In an ever-changing environment and in the face of multiple transformations (artificial intelligence, digital, environmental, social), Crédit Agricole S.A. acts as a responsible employer for all its employees across the world ⁽¹⁾. In 2025, for the first time, Crédit Agricole Group ranked first in the LinkedIn Top Companies ranking. This distinction recognises the Group's HR policy and talent support, cementing its position as a leader in skills development.

Crédit Agricole S.A. is also the winner of the 2025 Youth Employment Award from the Humpact rating agency.

In addition, by signing the UNI Global Union Global Agreement, Crédit Agricole S.A. has reaffirmed its commitment to respecting all laws on employment, freedom of association, collective bargaining agreements, health and safety regulations at national level, as well as internationally recognised human rights and applicable laws, in all the markets where it operates. It is also committed to promoting employee training as a key element in the human rights-related risk management system. In its Code of Ethics, Crédit Agricole S.A. reiterates that it carries out its activities in all parts of the world in respect of the fundamental human and social rights. The code of conduct also specifies that, with regard to relations between company employees or with all of its stakeholders, human rights and people's fundamental social rights must be rigorously applied. Accordingly, as part of its Global Agreement, Crédit Agricole S.A. confirms that it will continue to:

- respect the UN Guiding Principles on Business and Human Rights;

- implement its own reasonable measures to prevent, mitigate and, where applicable, strive to remedy any potential harmful effects that its activities and business lines may have on human rights according to the guidance given by the UN Guiding Principles on Business and Human Rights;
- respect the provisions of the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work adopted on 18 June 1998 and the corresponding conventions. This includes the right of all employees to organise, join a trade union and engage in collective bargaining;
- adhere to the OECD Guidelines for Multinational Enterprises (2011) and the Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy (ILO, fifth edition, 2017).

Lastly, Crédit Agricole S.A. is committed to respecting international and national legislation as well as the provisions of agreements in all countries in which it operates, and to ensuring fair employment and working conditions for all its employees.

3.1.1.2 THE VARIOUS PILLARS OF THE HR POLICY

To reinforce its Responsible Employer promise and establish it in the long term, Crédit Agricole S.A.'s commitment is focused on five main pillars, to respond to the impacts, risks and opportunities identified by the HR division (for more information, see part 1.3.3 "Material impacts, risks and opportunities and their interaction with strategy and business model"):

- 1. Human capital development:** Crédit Agricole S.A. promotes continuous training and skills development to ensure the employability and functional mobility of employees, as well as the development of all forms of leadership;
- 2. Social dialogue:** Crédit Agricole S.A. encourages a rich social dialogue, which is both constructive and respects human rights, freedom of association and trade union rights, and promotes actively listening to employees;
- 3. Diversity and inclusion:** Crédit Agricole S.A. pursues an inclusive policy at all levels of the organisation, preventing and firmly opposing any form of discrimination and promoting equal opportunities in order to ensure the robustness of its workforce;
- 4. Working environment:** Crédit Agricole S.A.'s social policy ensures that it offers working and employment conditions that guarantee safety and preserve health, as well as the quality of life and working conditions of employees;
- 5. Performance and compensation:** The Crédit Agricole S.A. remuneration policy is based on the values of accountability and transparency, enabling Group employees to be rewarded for their performance in a fair way, while respecting international standards.

Lastly, the targets of the HR business line are defined by the continuous improvement of the metrics presented in parts 3.1.1.4 "Workforce" and 3.1.3 "Quantitative data and targets" as well as by the commitments made at the launch of the "Ambitions 2025" MTP. These commitments resulted from working groups led by the Strategic Studies department with employees from various entities. Thus, for the year 2025: gender diversity, the youth plan and CSR training for all are detailed in parts 3.1.2 "Policies, action plans and resources mobilised as part of the HR policy" and 3.1.3 "Quantitative data and targets".

⁽¹⁾ To find out more about the specifics of Crédit Agricole S.A.'s employees, refer to part 3.1.1.4 "Workforce".

3.1.1.3 MANAGEMENT AND GOVERNANCE OF IMPACTS, RISKS AND OPPORTUNITIES WITHIN THE HR DIVISION

While Crédit Agricole S.A.'s HR strategy is influenced by impacts, risks and opportunities that affect all employees without distinction in all countries where Crédit Agricole S.A. operates, the material risks and opportunities are mainly directly related to the own workforce.

HR governance, structured around a monthly HR Directors' Committee, enables policy convergence within Crédit Agricole S.A. and its subsidiaries, while respecting the specific business and local characteristics of the various entities.

In addition, an annual survey available in 18 languages is conducted in all entities according to a schedule that they choose. Listening to employees and taking their feedback into account has a positive impact, as measured in particular by the consistently high participation rate in the surveys.

This approach, which is both "local" and "global", meets the expectations of employees and all stakeholders thanks to the five policies dedicated to the women and men who make up the Group. These policies are implemented on a long-term basis and respond to impacts, risks and opportunities (IRO), as detailed below in part 3.1.2 "Policies, action plans and resources mobilised as part of the HR policy":

1. Human capital development;
2. Social dialogue;
3. Diversity;
4. Working environment;
5. Performance and compensation.

The actions described in these policies are implemented on a regular and ongoing basis (most often annually, but can be modified and adjusted according to external constraints).

The positive impacts identified contribute to our opportunities, are driven by the Human Project and are steered by the HR teams of Crédit Agricole S.A., in conjunction with the HR teams of each entity:

- for the HR Development department: through annual Career Committees, the HR Transformation communities and work carried out alongside the Fédération Nationale du Crédit Agricole (FNCA). It is a community of HR specialists with more than 15 employees who coordinate and implement the strategy;
- for the Social Policy department: a team of more than 10 employees organises regular discussions with employee representatives and trade unions, as well as with professional organisations. It also manages and coordinates, with the entities, all social actions intended for employees;
- lastly, with regard to compensation matters, Crédit Agricole S.A.'s Compensation department, composed of more than 15 employees, oversees the compensation policy. It applies rigorous governance standards, structured around the Compensation Policy Control Committee, the Compensation Committee and the Board of Directors. Collaboration with the compensation teams of all Group entities ensures consistent implementation of policies, thereby perfectly aligning compensation schemes with Crédit Agricole S.A.'s strategy and values.

Proactive talent management, in connection with the implementation of ambitious skills development and compensation policies, improves the Group's attractiveness and employee retention. This is in addition to the implementation of proactive policies for employee well-being (in and outside work) and diversity and inclusion, which guarantee an improvement in the conditions necessary for employee health and safety.

Together, these positive impacts influence Crédit Agricole S.A.'s strategy and business model and ultimately guarantee increased robustness and improved overall performance.

3.1.1.4 WORKFORCE

The quantitative data relating to Crédit Agricole S.A.'s workforce published here is intended to provide an overview of the Group's approach to employment, in particular:

- the scope and nature of the impacts of its employment practices, in order to provide contextual information that helps to understand the information disclosed; and
- to serve as a basis for calculating the quantitative measures disclosed in part 3.1.3 "Quantitative data and targets".

Workforce by gender

Gender	2025		2024	
	Number of employees (FTE)	% of employees (FTE)	Number of employees (FTE)	% of employees (FTE)
Female	42,875.04	51.63%	42,259.99	52.02%
Male	40,169.81	48.37%	38,984.09	47.98%
Other*	-	-	-	-
Not reported	-	-	-	-
TOTAL EMPLOYEES	83,044.85	100.00%	81,244.08	100.00%

* Gender as specified by the employees themselves.
Scope covered: 100%

This table covers all employees (active and inactive) on permanent and fixed-term contracts (including corporate officers, excluding Directors), expressed in full-time equivalent (FTE) at 31 December 2024 and 2025.

See Note 7 "Employee benefits and other compensation" in the "Notes to the consolidated financial statements" of the Universal Registration Document to cross-reference the most representative figure in Crédit Agricole S.A.'s financial statements.

Definitions:

- **Executive corporate officers:** an executive corporate officer (CEO or Deputy CEO) is a person who holds a corporate position on behalf of the legal entity they represent and who is compensated for this position.
- **Fixed-term contracts:** excluding interns, work-study students (apprenticeship contracts and professional training contracts), employees under industrial agreements for training through research, international volunteers, seasonal employees and temporary workers (temporary workers are non-employees).
- **Inactive employees:** employees who receive pay but are no longer working, or those who no longer receive pay and are no longer working, but who are still linked to the entity through an employment contract.
- **Full-time equivalent (FTE):** the activity rate of each employee on a permanent or fixed-term contract present at 31 December 2024 and 2025, based on their theoretical working time. Example: an employee working 50% part-time will have an activity rate of 0.5. Do not confuse "activity rate" with "presence rate": a full-time employee with a suspended contract will have a presence rate of 0 but an activity rate of 1, while an employee on part-time medical leave retains their contractual hours (maintenance of said hours is defined by the collective bargaining agreement and follows the sick leave scheme).
- **Individuals:** An employee counts as one individual.
- **Gender M/F/O/NR:** the genders "Other" (O: Other) and "Not reported" (NR: Not reported) only apply in countries where legislation allows them. France does not allow this.

BREAKDOWN OF WORKFORCE BY REGION/COUNTRY (THRESHOLD OF 50 OR MORE EMPLOYEES, REPRESENTING AT LEAST 10% OF THE TOTAL WORKFORCE)

Region/Country	2025		2024	
	Number of employees (FTE)	% of employees (FTE)	Number of employees (FTE)	% of employees (FTE)
Western Europe	67,244.44	80.97%	65,156.12	80.20%
o/w France	39,027.62	47.00%	38,300.36	47.14%
o/w Italy	15,626.55	18.82%	15,657.78	19.27%
Eastern Europe	7,590.48	9.14%	7,718.79	9.50%
Asia – Oceania	4,535.93	5.46%	4,337.10	5.34%
Africa	2,421.00	2.92%	2,409.00	2.97%
North America	988.00	1.19%	1,359.07	1.67%
Near and Middle East	146.00	0.18%	146.00	0.18%
Central and South America	119.00	0.14%	118.00	0.15%
TOTAL EMPLOYEES	83,044.85	100.00%	81,244.08	100.00%

Scope covered: 100%.

This table covers all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in full-time equivalent (FTE) at 31 December 2024 and 2025. Geographic areas have been defined by significant region and on the basis of those existing in the Universal Registration Document.

The decline in headcount in North America is mainly due to the disposal of three Amundi subsidiaries in the United States on 1 April 2025 (representing a reduction of 447 employees).

EMPLOYEES BY CONTRACT TYPE, BROKEN DOWN BY GENDER

	Reporting period: 1 January 2025 to 31 December 2025

* Gender as specified by the employees themselves.
Scope covered: 100%.

These tables cover all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in full-time equivalent (FTE) on a full-time or part-time basis at 31 December 2024 or 2025. The number of non-guaranteed hours employees takes into account, for example, zero-hour contracts. This is a type of employment contract that has developed in the European Union, but also in the United Kingdom (holiday contracts at universities or "work for hire" contracts for proof-readers in the publishing industry, for example). Its main feature is that the employer does not specify any working hours or minimum working time in the contract. The employee is paid only for the hours worked, and must be available at any time of the day.

EMPLOYEES BY CONTRACT TYPE, BROKEN DOWN BY REGION

	Reporting period: 1 January 2025 to 31 December 2025							
	Western Europe	Eastern Europe	Asia – Oceania	Africa	North America	Near and Middle East	Central and South America	TOTAL
Number of employees (in FTE)	67,244.44	7,590.48	4,535.93	2,421.00	988.00	146.00	119.00	83,044.85
Number of permanent employees (permanent contracts) (in FTE)	66,046.61	6,903.36	4,172.03	1,474.00	988.00	145.00	119.00	79,848.00
Number of temporary employees (fixed-term contracts) (in FTE)	1,197.84	687.12	363.90	947.00	-	1.00	-	3,196.86
Number of non-guaranteed hours employees (in FTE)	-	-	-	-	-	-	-	-
Number of full-time employees (in FTE)	61,592.00	7,514.00	4,531.00	2,421.00	988.00	146.00	119.00	77,311.00
Number of part-time employees (in FTE)	5,652.44	76.48	4.93	-	-	-	-	5,733.85

	Reporting period: 1 January 2024 to 31 December 2024							
	Western Europe	Eastern Europe	Asia – Oceania	Africa	North America	Near and Middle East	Central and South America	TOTAL
Number of employees (in FTE)	65,156.11	7,718.78	4,337.10	2,409.00	1,359.07	146.00	118.00	81,244.06
Number of permanent employees (permanent contracts) (in FTE)	63,852.80	6,980.03	3,925.20	1,524.00	1,359.07	145.00	118.00	77,904.10
Number of temporary employees (fixed-term contracts) (in FTE)	1,303.31	738.76	411.90	885.00	-	1.00	-	3,339.97
Number of non-guaranteed hours employees (in FTE)	-	-	-	-	-	-	-	-
Number of full-time employees (in FTE)	59,566.00	7,631.00	4,332.00	2,409.00	1,357.00	146.00	118.00	75,559.00
Number of part-time employees (in FTE)	5,590.11	87.79	5.10	-	2.07	-	-	5,685.07

Scope covered: 100%.

These tables cover all full-time and part-time employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in full-time equivalent (FTE) at 31 December 2024 and 2025.

EMPLOYEE TURNOVER

	2025	2024
Employee turnover rate (CSRD formula)	7.19%	7.59%

Scope covered: 100%.

This indicator covers all employees active during the year on permanent contracts (including executive corporate officers, excluding Directors), expressed in number of individuals. Permanent contracts have been used to calculate this metric, as it does not seem appropriate to calculate a turnover rate for employees on fixed-term contracts. "Inactive" employees are excluded from the scope.

The calculation formula (CSRD formula) used is: Number of permanent contract departures in year N / Number of permanent contract employees active at 01/01/N (or, failing that, at 31/12/N-1).

The reasons for departure taken into account are: resignations, retirements, redundancies, other departures (contract termination by mutual agreement, termination of probationary period, death, other). An employee who is present on 31/12/N, but who leaves the undertaking on that day, will be considered to have left on 01/01/N+1.

The turnover rate (formula according to France's INSEE requirements) calculated on hires and departures was 7.72% in 2025, compared with 8.43% in 2024.

The calculation formula used is [(Number of permanent contract hirings in year N + Number of permanent contract departures in year N) / 2] / Number of permanent contract employees active at 01/01/N (or, failing that, at 31/12/N-1).

The reasons for hiring taken into account are: external recruitment, permanent contract conversions.

Permanent contract conversions take into account employees whose contract is converted into a permanent contract during the year if they were hired under a permanent contract within three months of the end of their previous contract and if they were hired by the same entity as their previous contract.

Data restatement: the figure disclosed in the 2024 sustainability report used the INSEE calculation formula, i.e. 8.43%. The 2024 figure has been corrected in the table above and now shows the 2024 turnover rate calculated using the CSRD formula.

REASONS FOR DEPARTURE (EMPLOYEES ON PERMANENT CONTRACTS)

	2025				2024			
	France	Other countries	Total	%	France	Other countries	Total	%
Resignation	925	1,987	2,912	51.20%	960	1,980	2,940	51.75%
Retirement	664	350	1,014	17.83%	578	300	878	15.46%
Lay-off	290	352	642	11.29%	322	336	658	11.58%
Death	16	22	38	0.67%	23	26	49	0.86%
Other	562	520	1,082	19.02%	549	607	1,156	20.35%
TOTAL PERMANENT CONTRACT DEPARTURES	2,457	3,231	5,688	100.00%	2,432	3,249	5,681	100.00%

Scope covered: 100%.

This table covers all employees active during 2024 and 2025 on permanent contracts (including executive corporate officers, excluding Directors), expressed as a number of employees. "Inactive" employees are excluded from the scope.

"Other" refers in particular to cases of termination by mutual agreement (*rupture conventionnelle*) and termination during the probationary period (at the initiative of the employee or employer).

3.1.2 POLICIES, ACTION PLANS AND RESOURCES MOBILISED AS PART OF THE HR POLICY

3.1.2.1 HUMAN CAPITAL DEVELOPMENT

GOVERNANCE

Crédit Agricole S.A.'s development of human capital is defined, managed and coordinated through the following decision-making bodies, by order of importance:

- the Executive Committee, Crédit Agricole S.A.'s umbrella committee with decision-making powers. It meets twice per month;
- the HR Directors' Committee (monthly) to define and share the Human Capital Development Policy within all entities of Crédit Agricole S.A.;
- the Strategic Workforce Planning Committee (three times a year) in charge of monitoring the strategy and its foreseeable consequences on employment.

These bodies are responsible for monitoring and assessing the effectiveness of this human capital development policy and the associated actions (including through quantitative metrics).

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material Impacts, Risks and Opportunities (IROs) identified and addressed through the human capital development theme, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Positive impact		
– Positive impact on employees through good talent management and the implementation of ambitious skills development policies	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ⁽¹⁾ ESG practices	Own operations	Invariable
– Increased overall performance and employee retention, thanks to ambitious career and skills development policies	Own operations	Invariable

(1) The opportunity "Improving attractiveness through ambitious and innovative ESG practices" is common to all Crédit Agricole S.A.'s HR policies and therefore refers to Human Capital Development, Social Dialogue, Diversity, Working Environment, and Performance & Compensation. In terms of human resources, Crédit Agricole S.A.'s attractiveness is measured and analysed every year through employer brand rankings and turnover monitoring (see "Employee turnover" table in part 3.1.1.4 "Workforce" above).

The impact and opportunities associated with the human capital development policy are examined by Crédit Agricole S.A.'s Human Resources department and analysed annually by the HR Directors' Committee.

HUMAN CAPITAL DEVELOPMENT POLICY

CONTEXT/AMBITIONS

With the aim of positively impacting its employees and contributing to the development of their skills, Crédit Agricole S.A. regularly identifies and proposes new solutions. It is therefore very active in seeking out new skills development offerings and professional mobility opportunities to meet the expectations and needs of its employees.

Since 2019, the implementation of the Human Project has encouraged empowerment, discernment, confidence, courage and initiative. In terms of skills, this approach fosters a culture of curiosity, training and mobility. The Human Project allows each employee to play a full part in their own career path, to make progress and to develop skills in both management and business expertise.

These opportunities promote sustainable employability, boost overall employee performance and enhance the undertaking's attractiveness in the interests of its customers.

SCOPE OF APPLICATION

This policy applies to Crédit Agricole S.A. and its subsidiaries worldwide.

CONTENT AND ACTION PLANS

1. TRAINING

Key training principles

For Crédit Agricole S.A., dynamic and innovative employee support and the implementation of skills development policies are ongoing challenges. Crédit Agricole S.A. therefore invests in the professional development and lifelong training of its employees, wherever they may be in the world. It emphasises diversified career paths within its business lines, regions and geographic areas.

Employee training objectives are defined on a global level for all regulatory matters (via the Group's training body, IFCAM/ Compliance). Cross-functional business lines such as the Information Systems business line also define general action plans that complement the training action plan targets of each entity. All these collective targets are added to the individual targets defined at the end-of-year assessments.

As such, Crédit Agricole S.A. offers a wide range of opportunities for skills development, focusing on two key areas:

- promoting **continuous skills development** and continuous adaptation in order to keep pace with changes in the business and ensure the long-term employability of employees;
- supporting **the acquisition of new skills** and anticipating change.

Crédit Agricole S.A.'s culture of continuous training and learning is rooted in its identity.

Crédit Agricole S.A. is organised in a consistent way – thanks in particular to its training body, IFCAM – in order to regularly roll out all the training courses needed on an annual basis for the development of its employees' skills. With regard to regulatory and mandatory training, which is constantly changing, Crédit Agricole S.A. is mindful of preparing its employees to work every day in the interest of its customers and society. The active management of these programmes and their timetable are adjusted at business line level according to their specific features and ecosystems.

This is why Crédit Agricole S.A. has chosen to manage its reporting in line with four themes:

- mandatory regulatory reporting;

- CSR, including the mandatory “At the heart of the Societal Project” training course;
- other hard skills, such as AI;
- soft skills.

Each business line and location then defines training programmes according to its own priorities and needs.

A training pilot community is led by the Group HR department to define annual priorities (for example, artificial intelligence in 2024 and 2025 and CSR since 2022).

This community also encourages the sharing of best practices and helps capitalise on the collective approach when responding to employee and business line needs.

In 2025, subsidiaries continued to encourage the development of their employees through various training initiatives.

- CACEIS supports its employees in new business lines by offering training courses on cryptocurrencies (“Crypto-assets: the fundamentals” and “Legal training on crypto-assets”);
- to support digital transformation and skills development among employees, Crédit Agricole CIB launched an extensive training programme through its Digital Academy, based on a framework of nine digital competencies with the aim of mastering new target skills. This Academy now offers a comprehensive, international training programme ranging from familiarisation to expert level. It also offers structured training courses;
- LCL supports the evolution of roles and the development of skills through various training courses, including, for example, the preparation of branch network advisers by supporting their future mobility through a programme designed to help them understand the fundamentals of their future role, thus enabling them to be better prepared when they assume their new positions;
- Crédit Agricole Italia has launched the “Top Skill Program”. This is an internal academy for high-potential managers, combining technical and cross-functional training on banking, delivered by qualified internal trainers, and management training provided by external service providers.

At the same time, IFCAM, Crédit Agricole Group's university, has strengthened its strategic role in supporting employees facing multiple transitions. The actions taken focus on several areas:

1. Integration of ESG issues into career paths:
 - strengthening training in sustainable finance, Net Zero alignment and green finance,
 - development of specific skills for agricultural, professional and corporate markets,
 - new training courses on real estate and responsible investment;
2. Development of emerging sectors:
 - creation of courses dedicated to healthcare and ageing well,
 - skills development in strategic customer ecosystems (health, silver economy, prevention);
3. Digital transformation and AI:
 - modules on generative AI and its ethical use,
 - training on responsible data use,
 - promotion of digital uses to strengthen team adaptation;

4. Inclusive corporate culture:

- avoidance of unconscious bias and combating discrimination,
- development of interpersonal skills and intergenerational cooperation,
- measures to promote professional equality and diversity of career paths.

These initiatives demonstrate the Group's commitment to preparing its employees for environmental, social and technological transitions, in line with its promise to support all its customers in their own transitions.

Metrics relating to skills development are available in part 3.1.3.5 "Training and skills development metrics" of this report.

Supporting employees

To accelerate transformation through accountability, empowerment and the organisational, managerial and cultural transformation instilled by the Human Project, Crédit Agricole S.A. offers all its employees dynamic, increasingly personalised career paths to help them develop their skills.

Crédit Agricole S.A. relies in particular on IFCAM, the Crédit Agricole Group's university, to offer its employees a range of professional certifications for the many business lines in the Group and specialised markets. In addition, each specialised business line also selects the most appropriate suppliers according to regional needs and the expertise sought.

For France, some of the courses listed in the *Répertoire national des certifications professionnelles* (French National Directory of Professional Certifications – RNCP), the *Répertoire spécifique* or the *Valorisation des acquis de l'expérience* (VAE) are eligible for the *Compte personnel de formation* (Personal Training Account – CPF) and are recognised by the French government.

To accelerate its managerial and cultural transformation, Crédit Agricole S.A. launched a partnership in 2024 with a global digital training platform that operates in 24 languages.

This project brings all employees on board, to help them always develop their potential through the continuous learning opportunities of self-training. In 2025, 100% of Crédit Agricole S.A. employees worldwide were given unlimited access to the Group's training, skills development and mobility programmes.

The main advantages of this platform are:

- a response to the desire to provide all Crédit Agricole S.A. entities with a complementary, innovative and up-to-date training offer;
- a response to the increasingly demanding employer-brand challenges and candidate search worldwide;
- a cultural transformation to meet the challenges of professional mobility and to encourage HR teams, managers and employees to rethink and dare embark on innovative, and even groundbreaking, career paths.

The partnership focuses on four areas:

- recruitment, with the unlimited publication and promotion of job vacancies to encourage internal mobility;
- data analysis, by providing and using data to help manage current and future employment in all our regions and locations;

- career paths and mobility, through skills improvement, greater visibility of possible mobility opportunities and a shared, unified internal pool of candidates;
- training, with coverage of training needs (tech, Digital for All, new trends, AI) and a regularly updated training offering, to contribute to the development of employee skills in an increasingly effective way.

By 31 December 2025, all Crédit Agricole S.A. entities had initiated the roll-out of the platform, and 49,533 employees had accessed the platform through this partnership.

Training metrics are available in part 3.1.3.5 "Training and skills development metrics" of this report.

Supporting the Societal Project

Crédit Agricole S.A. and IFCAM are aware of the environmental, societal and climate issues at stake, and are developing a training ecosystem focusing on two objectives:

- to anticipate business developments to encourage employees to upgrade their skills;
- to offer corporate social responsibility training, to understand these issues and inspire collective action.

The "At the heart of the Societal Project" module is the core of this programme. It highlights Crédit Agricole S.A.'s commitments to the environment, social inclusion and agricultural and agri-food transitions. Accessible to everyone, this module forms the basis of dedicated programmes for each business line. The target for 2025 is to provide CSR training to 100% of employees.

To ensure that all Crédit Agricole S.A. employees can broaden their knowledge, there is a diverse range of resources offered, designed to draw on different learning systems (podcasts, webinars, e-learning, face to face, etc.).

In line with the Group's *Raison d'Être*, all Group executives and employees are trained in CSR issues.

In just three years, at 31 December 2025, 98% of Crédit Agricole S.A. employees worldwide had completed training on CSR. This level is similar to that of 2024. In addition, numerous awareness-raising initiatives such as conferences, "fresques" and workshops have been organised within Crédit Agricole S.A.

In support of the continuous learning culture and to ensure that all employees are aware of and trained in CSR issues, Crédit Agricole's various business lines regularly improve the programmes offered to employees according to their specificities and expertise.

In 2025, a large amount of content was developed and rolled out with IFCAM, with the aim of capitalising on business-specific approaches targeted according to their timetables and expertise, in order to make it easier for employees in all business lines and geographical regions to adopt the Societal Project.

In 2025, IFCAM, Crédit Agricole Group's university, stepped up its role as a strategic lever to support employees in adapting to transitions.

The actions taken strengthen the Group's ability to anticipate changes, promote a shared culture and support the responsible transformation of its business lines, in line with its promise to support all its customers in their transitions.

Alongside training courses for its employees, and to ensure that its executives embrace the Human Project and ramp up the managerial and cultural transformation of the Group, a custom Executive programme was carried out from September 2023 to November 2024 in collaboration with HEC Paris and SDA Bocconi, in support of the 2025 Ambitions MTP. This programme, entitled “Un leadership pour développer sans cesse le potentiel de chacun” (“Leadership to continuously develop everyone’s potential”) took over from the previous programme “Leadership, Sens et Mise en responsabilité” (“Leadership, Meaning and Accountability”) implemented in the previous 2019-2022 MTP.

Imagined as a genuine organisational, cultural and managerial transformation, the Human Project aims to gradually and lastingly instil a culture of human accountability.

As part of this programme, leaders, as players in the Human Project and the Societal Project, can accelerate their own transformation and management style with regard to their team, in particular by building trust. Through trust, human intelligence is developed, whether emotional, relational or situational, with the aim of increasing motivation and commitment, while boosting productivity and operational and societal performance.

The programme’s aim was to link science to current and future issues that executives face.

During the 2022-2025 MTP, 100% of invited executives participated in this programme and received training.

As part of the new ACT 2028 MTP, a new programme will be rolled out to cover all executives at Crédit Agricole Group.

Crédit Agricole S.A. is also mindful of creating the conditions for sustainable employability by adapting business lines and skills to technological, societal and environmental developments (Artificial Intelligence, Net Zero transition, etc.).

Crédit Agricole S.A. takes a constant interest in technological developments, and numerous initiatives are being launched by entities to use Artificial Intelligence to bolster human intelligence in all its business lines.

In 2024, the HR Directors’ Committee was trained in generative AI. Generative AI represents an opportunity to improve both customer experience and the experience of all employees, in particular because Artificial Intelligence frees up the time once occupied by low-added-value tasks. To this end, an AI training programme package was launched in the fourth quarter of 2024 for all Crédit Agricole S.A. employees in France. The roll-out continued internationally in 2025. At the end of 2025, 70,455 employees of Crédit Agricole S.A. had been trained worldwide.

These training initiatives complement business-line initiatives in the use of AI with the roll-out of intuitive and secure chatbots, such as “Aria” at LCL, “Alfred” at Crédit Agricole CIB, and “SécuriChat” at the Crédit Agricole S.A. Parent Company, and which are currently being rolled out in other subsidiaries.

Metrics relating to training and skills development are available in part 3.1.3.5 “Training and skills development metrics” of this report.

Organisational, managerial and cultural transformation

The organisational, managerial and cultural transformation that the Human Project has supported since 2019 has helped develop new ways of working and strengthen the collective spirit.

Crédit Agricole S.A. entities support this approach by establishing dedicated programmes for each team, based on the fundamentals of the Human Project.

These support sessions with coaches, as well as small-group joint-development workshops, give employees the opportunity to reflect together on concrete actions they can take to put the Human Project into practice in their teams.

The year 2023 was marked by the accelerated steering of sessions to adopt the Human Project as part of its development, the creation of the community of Human Project pilots and the continued implementation of co-development workshops in all entities. 2024 was the year in which the Group ramped up its managerial and cultural transformation internationally.

In 2025, the final year of the 2022-2025 MTP, a total of 68,967 employees, representing 83% of employees worldwide, took part in the Group’s organisational, managerial and cultural transformation.

In addition, Crédit Agricole S.A. measures its cultural transformation and the extent to which accountability is instilled via an annual survey. Crédit Agricole S.A. employees with permanent contracts and on the payroll at 30 September 2025 worldwide were asked to complete a new questionnaire consisting of 28 closed questions and three open questions on the theme of trust.

The results of the annual surveys conducted among Crédit Agricole S.A. employees make it possible to identify the main concerns of employees, by business line, and to measure the effects of the managerial, organisational and cultural transformation, in particular through the analysis of verbatim accounts. For 2025, the participation rate in the annual Trust Index (TI) survey was 80%. This level is proof of our ongoing commitment to work every day in the interest of our customers and society. 78% of employees recommend Crédit Agricole S.A. as a good employer, four points higher than in 2022, at the start of the “Ambitions 2025” MTP.

Employees across all entities are informed by the HR department of the overall results for their entity. A report is also provided to the social partners for each scope, and business meetings (plenary sessions) are dedicated to precise scope-by-scope reporting. Following these meetings, depending on the scope, ad hoc action plans are implemented and managed by each subsidiary.

On 16 January 2025, around 100 executives and employees from Crédit Agricole Group gathered to launch the second season of the Human Project Ambassadors programme. These ambassadors, drawn from all regions worldwide, are tasked with promoting the Human Project and showcasing the diversity of all the Group’s business lines, expertise and know-how, particularly on social media but also within their entities and teams.

In order to strengthen the corporate culture and create cross-functional relationships, Crédit Agricole Italia offers employees a new means of expression through Il Podcast, an innovative, dynamic and participatory internal communication project. This initiative, which was launched on Podcast Day 2024, already has seven episodes and involves nearly 45 employee-podcasters in all stages of its creation. The podcast covers a variety of topics: the new brand signature, water conservation, philosophical coaching, inclusion, sustainable development, responsible tourism and IT training.

2. PROFESSIONAL ASSESSMENT

Crédit Agricole S.A. employees worldwide benefit from an “Evaluation and Development” campaign designed to enhance individual and overall performance, in compliance with local regulations. This campaign takes place at least on an annual basis, but its frequency can be adjusted to suit local regulatory requirements. It allows everyone to play an active role in their own development and performance, and helps build employee loyalty.

Metrics relating to performance evaluations are available in part 3.1.3.5 “Training and skills development metrics” of this report.

Accountable appraisal

A new appraisal formula was adopted in 2022, in conjunction with the Human Project, with the aim of updating and simplifying the annual appraisal process.

It is based on a self-assessment, an appraisal by the employee's direct manager, the joint definition of future targets, and ongoing communication and feedback.

Employees are responsible for initiating their own appraisal and defining their own targets for the following year. The manager is responsible for supporting employees in formalising a qualitative and contextualised assessment and in defining future targets. In addition to these one-on-one appraisals, there is also the possibility of receiving cross-functional feedback for development purposes.

This strengthens situational intelligence by enabling other players to impact the perception of the employee and the manager.

It also provides an opportunity for managers and employees to discuss hard and soft skills, performance evaluation and workload. Managerial skills are also assessed where appropriate.

Business and soft skills training are discussed as part of these appraisals, in order to meet the needs and expectations of employees in terms of progress, job retention and career development.

Career review

In France, the purpose of the mandatory “career review” is to discuss employees' career development, wishes, and training and mobility needs. This is a dedicated, formalised and constructive meeting centred on employees' prospects for advancement, their skills, training needs and wishes for professional advancement and mobility.

At Crédit Agricole S.A., a career review is held every year for employees in France (the legal requirement is every two years).

In compliance with French social standards, a “career review” of the employee's career path is organised.

3. CAREER MANAGEMENT

Crédit Agricole S.A. takes a holistic approach to employee skills development, creating a virtuous circle of constant learning. This starts with defining a personalised career path, which then leads to concrete mobility through a training programme designed to ensure success in assuming new responsibilities.

To strengthen inter-entity mobility, the Crédit Agricole Group Mobility Charter was launched on 12 November 2024. The aim of the Charter is to facilitate professional mobility through a shared and structured framework. In line with the Group's organisational procedures, this charter standardises the conditions for mobility, highlighting the opportunity for cross-functional career paths between the Group's different business lines.

Mobility guarantees professional growth, the development of each employee's skills and the diversity of their experience, thereby creating a genuine career dynamic.

In order to guarantee the employability of all its employees and to continuously support them in developing new skills, the Group encourages its employees to dare to embark on robust career paths. Crédit Agricole S.A. thus values internal mobility as an essential driver to support employees in their development throughout their professional career.

Metrics relating to mobility and promotions are available in part 3.1.3.5 “Training and skills development metrics” of this report.

Personalised career paths

Working closely with the dedicated Human Resources teams and management, each employee can build their career, prepare for mobility, receive training and develop their potential through innovative programmes. In this way, all Crédit Agricole S.A. employees are encouraged to take responsibility for their own development and the development of others.

Ever more ambitious in its commitment to accelerating mobility, Crédit Agricole S.A. encourages personalised career paths by filling two-thirds of positions through internal mobility. 2025 was the year of a decidedly forward-looking mobility policy, with two editions of Mobilijobs, events dedicated to internal mobility and designed to meet the specific needs of every employee, intern, work-study student and manager worldwide.

Executive succession planning

The purpose of the Crédit Agricole **Director, Deputy General Manager and Chief Executive Officer Pathways** is to:

- identify and select the executives who will ensure the transformation of Crédit Agricole S.A. by embodying its values (succession planning);
- ensure a diversity of executive profiles that will drive performance and collective wealth;
- encourage the emergence of Crédit Agricole S.A. executives to help strengthen synergies;
- strengthen a shared culture and values based on an updated leadership model.

These executive pathways (*Parcours Dirigeants*) are designed as tools for assessing and helping define an individual development plan in order to access executive positions.

They give everyone a chance to get to know themselves better, develop their open-mindedness and expand their knowledge of Crédit Agricole S.A.

During these Pathways, Crédit Agricole Group executives are invited to participate in the various stages of the evaluation process.

This programme is inclusive, as it covers all Crédit Agricole S.A. entities worldwide.

The Crédit Agricole Pathways thus help develop a sense of Group identity among executives, strengthened through regular mobility between organisational spheres (Crédit Agricole S.A./Regional Banks) in the service of a shared collective.

In 2025, Crédit Agricole S.A. held 22 assessment sessions for 87 participants in order to evaluate their development potential.

Crédit Agricole S.A. also supports its top talent by offering a one-year mentoring programme. Male and female employees registered in this programme meet their mentors (executives) and receive targeted coaching, particularly in soft skills. The intersection between the Regional Banks and Crédit Agricole S.A. (e.g. a mentor from a Regional Bank and a mentee from a subsidiary, or vice versa) also helps to strengthen cross-functional collaboration within the Group and improve understanding of specialised business lines and local issues.

This Group-wide mentoring programme promotes fluidity and cross-functional collaboration between all entities and Regional Banks within the Crédit Agricole Group and prepares future executives to take on broader responsibilities. Since its creation in 2017, this programme has supported 112 women and 18 men.

Mentoring and leadership development programmes are also available within the specialist business lines of Crédit Agricole S.A.'s subsidiaries, with a particular focus on female talent:

- CACEIS has been running a women's leadership programme since December 2022, with the aim of promoting the career paths of female employees and strengthening diversity within management teams. To date, 160 women have benefited from this support, which is structured around two complementary pathways: "Be Enterprising" for emerging talent and "Be Inspiring" for established talent. This programme, which combines individual and group support, aims to promote a balance between well-being and performance, offer an innovative approach to personal and professional development, and promote career development opportunities. As a result, 32% of participants changed jobs after completing the programme;
- LCL launched the second edition of the *Elles comme Leaders* programme in the summer of 2025. Launched in 2024, this empowerment programme supports female managers in their career development and encourages them to take an ambitious approach to their career paths. It is fully in line with the undertaking's commitment to promoting equal opportunities and supporting women's careers in management positions;
- in March 2025, the Crédit Agricole S.A. Parent Company launched Lead'Her, a new mentorship programme aimed at female talent. This initiative is a strategic lever for accelerating diversity in all business lines and increasing the number of women in decision-making bodies. Lead'Her aims to foster more inclusive, responsible and inspiring leadership by supporting female employees in their professional and personal development.

3.1.2.2 SOCIAL DIALOGUE

GOVERNANCE

Crédit Agricole S.A.'s Social Dialogue policy is monitored by its decision-making bodies, the Executive Committee and the Crédit Agricole S.A. HR Directors' Committee. These bodies determine and approve, where necessary, the aspects of the Social Dialogue policy.

The Social Dialogue policy is conducted and coordinated within employee representative bodies established under collective agreements, such as:

- the Consultation Committee, whose role is to inform and discuss strategic projects, monitor Crédit Agricole S.A.'s results and the employment situation. It meets twice per year;
- the Crédit Agricole S.A. group's trade union correspondents are drawn from this committee and aim to strengthen local social dialogue by sharing information of a social nature in an informal and constructive manner. They meet eleven times per year;
- the Strategic Workforce Planning Committee (SWPC) (informative), in charge of monitoring the strategy and its foreseeable consequences on employment, meets three times a year;

- the *Observatoire des métiers* (Job Trends Watch Unit) (informative), carries out forward-looking analyses of changes in professions and skills. It meets twice per year.

In addition, monitoring committees bring together representatives of the Group's Social Policies/Social Relations department with representatives of the trade unions that have signed the Group's agreements, in particular the Global Agreement and the agreement relating to employee representatives.

Furthermore, Crédit Agricole S.A.'s Human Resources department meets two or three times a year with the Group's five main trade unions at bilateral meetings. At the end of June/beginning of July 2025, when he took up his post, the Chief Executive Officer met with the four Group-level representative trade unions.

Lastly, 100% of Crédit Agricole S.A. employees are covered by the Global Agreement, which forms the basis of the Group's social policy, supplemented by agreements and collective bargaining agreements concluded in accordance with the various applicable national laws.

At Crédit Agricole Group level, social dialogue is embodied through the European Works Council (EWC) and the Group Committee, which are two institutions common to Crédit Agricole S.A. and the Regional Banks. These committees are responsible for dealing with Group-wide issues relating to economic, social and financial matters. They were established by collective agreements at Group level.

- The EWC Select Committee met twice during 2025. The annual plenary meeting was held at the end of the year to discuss, among other things, the general performance of the Group and Crédit Agricole Personal Finance & Mobility. In addition, in June 2025, the Select Committee members, accompanied by an external expert, carried out a study in Belgium.
- During 2025, the Group Committee met twice in plenary session. The Economic Committee and the CSR Committee also held their annual meetings. In addition to monitoring the Group's overall performance and results, these meetings provided an opportunity to present various topics relating to the Group's current affairs (e.g. presentation of the results of the 2024 annual survey, presentation of the 2024 Sustainability Report, information and discussions on Worldline and CAWL, Retail Banking and BforBank).
- In October 2025, EWC and Group Committee members attended a one-day training session covering a presentation of the Group, its history, strategy and activities, as well as an introduction to financial analysis.

FRAMEWORKS AND REFERENCES

Crédit Agricole S.A. complies with the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work adopted on 18 June 1998 and amended in 2022, as well as the Tripartite Declaration on Multinational Enterprises and Social Policies (ILO). It also applies the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinational Enterprises. In its code of conduct, Crédit Agricole S.A. reaffirms that respect for human rights and fundamental social rights must be rigorously applied.

Furthermore, in its 2025 vigilance plan, Crédit Agricole states that the challenges in terms of respect for human rights and fundamental freedoms enshrined in France's international commitments include, in particular: the fight against forced labour, slavery and child labour.

The above rights and principles are also taken into account in HR risk mapping, which enables Crédit Agricole S.A. to identify, analyse and prioritise the risks of serious harm that its activities could cause.

Lastly, the Global Agreement provides for a dispute resolution mechanism “in the event of difficulties in implementing the rights or standards arising from the agreement”.

Crédit Agricole S.A. and its subsidiaries comply with all legal, regulatory and contractual provisions relating to labour relations.

These commitments are included in the Global Agreement signed with UNI Global Union in July 2019 and renewed in October 2023, which reiterates, among other things, the commitment to

respecting human rights, freedom of association and trade union rights. A seventh Disability Agreement (2023-2025), a still-active Strategic Workforce Planning Agreement signed in 2012 and an Agreement relating to Employee Representatives complete the contractual framework for social dialogue at Crédit Agricole S.A. and its subsidiaries.

All these documents are available on the website ⁽¹⁾.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material IROs identified and addressed through the social dialogue theme, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Positive impact		
– Positive impact of sound practices on employees’ rights to freedom of association and collective bargaining	Own operations	Invariable
Risk		
– Risk to the Group’s image or overall performance due to a deteriorated social climate/dialogue	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ESG practices*	Own operations	Invariable

* For further information about this opportunity, please refer to the IRO table in part 3.1.2.1 “Human Capital Development policy”.

The impact, risk and opportunity associated with the social dialogue policy are examined by Crédit Agricole S.A.’s Human Resources department and analysed annually by the HR Directors’ Committee.

SOCIAL DIALOGUE POLICY

CONTEXT/AMBITIONS

In the Global Agreement signed in July 2019 and October 2023, Crédit Agricole S.A. stated that social dialogue was one of the cornerstones of its social pact. Trade union rights, employee representation and collective bargaining are fundamental rights that Crédit Agricole S.A. respects and encourages. Crédit Agricole S.A. firmly believes that transparent and responsible social dialogue helps to strengthen mutual trust between stakeholders, support transformations and adapt to changes in the environment, particularly legal and regulatory changes.

To complement the conventional framework, Crédit Agricole S.A. has drafted a “Social Dialogue” HR policy, updated in 2024, available on its website.

Social dialogue is defined as a set of mechanisms for informing, consulting, coordinating, and/or negotiating with social partners. It is based on qualitative dynamics specific to each entity depending on its culture, business, geographical location and applicable national legislation. Quantitative monitoring metrics cannot be used to measure its quality.

SCOPE OF APPLICATION

This policy applies to all employees of Crédit Agricole S.A. and its subsidiaries worldwide.

CONTENT AND ACTION PLANS

1. Collective bargaining coverage and social dialogue

Crédit Agricole S.A. is aware that the quality of social dialogue depends on the smooth functioning of relations (negotiation, consultation or simple exchange of information) between Crédit Agricole S.A.’s subsidiaries and their employee representatives. As a result, Crédit Agricole S.A.’s entities conduct local social dialogue in line with their own environments, activities, challenges and cultures, and organise it through their own bodies and social calendar, in accordance with the French Labour Code and local regulations.

Outside the operation of these bodies, Crédit Agricole S.A., having identified that a deteriorated climate and social dialogue could create a risk to its image or a reduction in its overall performance, attaches great importance to the commitment of all its employees to social dialogue.

In this way, social dialogue is seen as a factor in the balance of social relations and the development of the entities’ performance. To encourage this, Crédit Agricole S.A. signed an open-ended agreement in 2019 on the career paths of employee representatives, ensuring sound practices have a positive impact on employees’ rights to freedom of association and collective bargaining. This Group-level agreement provides for several types of actions to promote commitment to employee representation, notably in terms of career management and interviews, and special compensation monitoring.

(1) <https://www.credit-agricole.com/en/responsible-and-committed/a-responsible-employer>

The momentum of social dialogue in Crédit Agricole S.A. entities was illustrated in 2025 by the signing of a number of agreements on the following topics:

- experienced employees and senior staff at Crédit Agricole Assurances, Amundi, Crédit Agricole Personal Finance & Mobility, Crédit Agricole Leasing & Factoring and Crédit Agricole Payment Services;
- the solidarity leave donation scheme at Crédit Agricole CIB;
- trade union rights and social dialogue at Crédit Agricole Personal Finance & Mobility;
- gender equality at work at Crédit Agricole Leasing & Factoring and CACEIS;
- the roll-out of remote working and an agreement on trade union resources at Crédit Agricole Italia.

At Crédit Agricole S.A. level, negotiations on the Inclusion of People with Disabilities agreement have been finalised.

Metrics relating to collective bargaining coverage and social dialogue are available in part 3.1.3.1 “Collective bargaining coverage and social dialogue” of this report.

2. Managing reorganisations

Supporting employees in the event of a reorganisation is a major concern for social dialogue. Crédit Agricole S.A. firmly believes that transparent and responsible social dialogue at corporate level is the best way to support change and strengthen mutual trust between Management and employees.

As part of the Global Agreement, Crédit Agricole S.A. undertakes to ensure that any entity that is considering a restructuring plan with a significant impact on employment announces the plan in good time so that a dialogue with employee representatives and management can be initiated to find socially responsible solutions to limit the consequences of these reorganisations for employees. If this impact is transnational in nature, the European Works Council is informed at the same time as local authorities. Crédit Agricole S.A.’s robustness and the wide variety of its business lines and locations are assets that support transformation.

Crédit Agricole S.A. pays close attention to the management of change and systematically implements measures to support employees in the context of these projects. These measures are defined by the entities as part of a local social dialogue (discussion workshops, internal mobility schemes, etc.), with particular attention paid to the physical and mental health of employees and their safety.

Crédit Agricole S.A. encourages its subsidiaries to take measures to manage reorganisations smoothly.

For example:

- in order to become the leader in asset servicing, CACEIS is transforming its organisation by implementing a new “One CACEIS” model;
- As part of its organisational simplification projects, Amundi has supported these changes by prioritising internal mobility and, where necessary, implementing external mobility support measures in accordance with local social processes.

3. Stakeholder involvement

As a key element of the social dialogue policy of Crédit Agricole S.A. and its subsidiaries, stakeholder involvement (in the form of social dialogue with the Social and Economic Committee in particular ⁽¹⁾ and whistleblowing systems ⁽²⁾) aims to nourish discussions and enhance the Group’s social policy.

This goes beyond complying with legal obligations to inform and/or consult employee representatives, both in the countries where they operate and at European level. These complementary qualitative interactions with employee representatives provide elements for assessing the quality of dialogue with staff.

Since 2024, Crédit Agricole S.A. has closely involved its social partners in the development of its Vigilance Plan:

- the members of the Consultation Committee and the Group trade union representatives are management’s preferred points of contact. Each year, these two bodies are involved in the implementation of Crédit Agricole S.A.’s Vigilance Plan;
- as part of the global agreement concluded on 7 October 2023, Crédit Agricole S.A. undertook to organise an annual meeting of the Agreement Monitoring Committee specifically dedicated to the procedures for drawing up and implementing the Vigilance Plan, in order to benefit from the expertise of UNI Global Union, an international trade union federation, in the field of human rights and fundamental labour rights.

3.1.2.3 DIVERSITY

GOVERNANCE

Crédit Agricole S.A.’s diversity policy is defined, managed and coordinated through different decision-making bodies, by order of importance:

- the Executive Committee;
- the HR Directors’ Committee, which brings together the HR Directors of the various entities of Crédit Agricole S.A., on a monthly basis to define and share the roadmap for the Human Resources strategy and diversity policy within each entity;
- the central disability team, which coordinates the monitoring of commitments under the Group disability agreement as well as reporting to the relevant bodies. Members of the Monitoring Committee and joint working group are appointed by the representative labour organisations.

These bodies are responsible for monitoring and evaluating the effectiveness of this policy and related actions.

The Community of Diversity representatives meets monthly to implement actions at Crédit Agricole S.A. and local levels, thus reinforcing Crédit Agricole S.A.’s inclusive culture. It also shares best practices within the entities and pools them, particularly through Diversity events and especially through Diversity Month, during which a large number of training courses and conferences are offered.

These actions help to prevent, mitigate or correct any discrimination and promote diversity and inclusion in general.

(1) For more information on the annual surveys, see part 3.1.2.1 “Human capital development”, Section 1 “Training” and “Organisational, managerial and cultural transformation” of this report.

(2) For more information on the reporting system, see part 3.1.2.4 “Working environment”, Section 1 “Occupational health” and part 4.1.4.4 “Protection of whistle-blowers” of this report.

FRAMEWORKS AND REFERENCES

Crédit Agricole S.A.'s commitments to diversity are based on:

- the diversity policy (see section “Diversity policy”, “Context/Ambitions” below);
- the Financi'Elles Commitment Charter signed on 1 July 2021, which aims, through its 10 commitments, to implement ambitious human resources policies in terms of gender equality, sources of financial performance, creativity and innovation;
- the *Charte Potentielles* (Potential Diversity Charter), signed by all Crédit Agricole S.A.'s gender diversity networks, which aims to boost gender diversity through awareness-raising initiatives;
- the UNI Global Union Agreement, in force for the period 2023-2027;
- the seventh Group Disability Agreement, signed unanimously by Crédit Agricole S.A.'s representative trade unions for the period 2023-2025, pursuant to Article 67 of France's Law of 5 September 2018 “for the freedom to choose one's professional future” applicable from 1 January 2024. In addition, negotiations took place with Crédit Agricole S.A.'s four representative trade unions for the signing and implementation of a new Disability Agreement for the period 2025-2028: this eighth agreement will be the Group's first non-approved agreement.

The Disability Agreement is overseen by the central disability team, in conjunction with HR representatives in the subsidiaries. Successive agreements have led to changes in the professional practices of all players involved, as well as in everyone's view of the importance of diverse profiles and skills as a factor for cohesion, progress, and social and managerial innovation.

All these documents are available on the website ⁽¹⁾.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material IROs identified and addressed through the diversity theme, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Risk		
– Internal and external image and reputational risk due to inadequate diversity and inclusion policies or discriminatory practices	Own operations	Invariable
– Risk associated with not knowing employee characteristics	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ESG practices*	Own operations	Invariable

* For further information about this opportunity, please refer to the IRO table in part 3.1.2.1 “Human Capital Development policy”.

The risks and opportunity associated with the diversity policy are examined by Crédit Agricole S.A.'s Human Resources department and analysed annually by the HR Directors' Committee.

Crédit Agricole S.A. needs to know the characteristics of its employees; in particular, it monitors its workforce, gender breakdown, types of contracts and staff turnover in order to offer all its employees the same development and career opportunities in the interests of equal opportunities. This information is published in part 3.1.1.4 “Workforce” and in all the tables in part 3.1.3 “Quantitative data and targets”.

DIVERSITY POLICY

CONTEXT/AMBITIONS

As part of its “Ambitions 2025” Medium-Term Plan, Crédit Agricole S.A. rolled out an ambitious diversity policy. It amplifies the Societal Project and bolsters Crédit Agricole S.A.'s *Raison d'Être*. It is a driver for attracting and retaining employees, meeting challenges and preparing the undertaking for the future. Its roll-out limits the risk to Crédit Agricole S.A.'s image and reputation that could arise from inadequate diversity and inclusion policies or discriminatory practices.

Crédit Agricole S.A. is amplifying gender equality at work by giving all employees the same opportunities to access positions, promotions and benefits on the basis of their skills and performance. Through this policy, the culture of value and meritocracy is encouraged by promoting gender diversity in all business lines and at all levels of the organisation. For example, it places the inclusion of people with disabilities at the heart of Crédit Agricole S.A.'s social and societal responsibility.

Crédit Agricole S.A.'s Diversity policy addresses all forms of diversity (gender, age, disability, sexual orientation, ethnicity, socio-cultural background, multigenerational, etc.) through initiatives at Crédit Agricole S.A. and across its business lines.

It is based on five commitments:

- equal opportunities: giving all employees the same opportunities to access positions, promotions and benefits on the basis of their skills and performance;
- openness and curiosity: taking an interest in others, being open to differences and accepting them, raising awareness and understanding of the diversity policy and highlighting its benefits to ramp up and reinforce an inclusive corporate culture;
- representativeness: reflecting our customers and our ever-changing society, taking into account a number of criteria (age, disability, gender equality), in all business lines and at all levels of the organisation;
- solidarity: placing mutual aid and collaboration at the centre of our policies, through internal actions and external initiatives;
- responsibility: making the promotion of diversity everyone's business.

To complement this framework, Crédit Agricole S.A. has drafted a Diversity policy in-house and published it on its website.

(1) <https://www.credit-agricole.com/en/responsible-and-committed/a-responsible-employer>

SCOPE OF APPLICATION

This policy applies to Crédit Agricole S.A. and its subsidiaries worldwide.

Supported by the members of Crédit Agricole S.A.'s Executive Committee and the Chief Executive Officers of each subsidiary, the Diversity Policy is implemented at all levels of the organisation. In this way, all the undertaking's players – executives, managers and employees – are involved in promoting and implementing the undertaking's commitments to diversity and inclusion.

CONTENT AND ACTION PLANS

1. Gender equality at work

Gender equality at work and diversity are key to the efficiency and robustness of our organisations, and are supported by the Human Project.

For Crédit Agricole S.A., the diversity of teams in a fast-changing environment is a driver of performance, commitment and attractiveness.

Crédit Agricole S.A. strives for gender equality at work, regardless of differences: equity in recruitment, training, promotion, compensation and work-life balance.

Particular attention is also paid to respecting equal pay between men and women ⁽¹⁾. The strengths of equal pay lie in particular in the distribution of individual pay rises and promotions that are balanced between women and men, as well as in the effective management of compensation upon return from maternity leave.

Crédit Agricole S.A. also implements a structured, fair recruitment process that is aligned with its social responsibility commitments. Crédit Agricole S.A. strictly complies with French law, which limits the situations in which temporary workers may be used. Preference is therefore given to permanent or fixed-term internal employment.

Each application received is carefully reviewed within a maximum of one month. The selection process consists of five key stages (application submission, pre-selection of applications, operational interview, interview with Human Resources and job offer, if applicable), aimed at ensuring both the efficiency of the process and the quality of the candidate experience. After pre-selection, successful candidates meet first with an operational manager and then with a representative from Human Resources. This approach allows us to assess their skills, motivation and how well they match the Group's values. Each application is treated impartially and inclusively, in accordance with Crédit Agricole S.A.'s principles of diversity, equal opportunities and non-discrimination.

With regard to regulatory obligations, as provided for under France's Rixain law on accelerating gender equality at work, Crédit Agricole S.A. disclosed, on 1 March 2025, the gender representation gaps among executive managers and among members of decision-making bodies.

Nine entities of Crédit Agricole S.A. are concerned, and while some have already reached the thresholds set by the Rixain law (i.e. the application of a quota of at least 30% of each gender among executive managers and decision-making bodies at 1 March 2026), or are very close, three of them must continue their efforts and are subject to enhanced monitoring, with, for example, for one of them, the roll-out of succession plans on a global scale.

This ambition – the challenge of increasing the representation of women in all entities – is a priority for Crédit Agricole S.A., and builds on two principles:

- gender balance in all talent pools; and
- systematic identification of women in succession plans.

Since 2022, the Diversity policy has been shared and rolled out within all entities of Crédit Agricole S.A., which have all made its main principles and approach their own. Diversity Week in March and Diversity Month in November are both used as major opportunities to raise the awareness of and engage all employees on these matters.

Diversity Week was held from 10 to 14 March 2025, echoing International Women's Day. The programme focused on the concepts of diversity and equal opportunities and encouraged reflection on the drivers that need to be activated to build a more inclusive society. The impact of artificial intelligence on equal opportunities, algorithmic bias and the inspiration that sports can offer in promoting greater diversity were just some of the topics covered. On this occasion, Crédit Agricole CIB offered a series of interactive workshops combining innovation and education to provide a better understanding of the mechanisms of unconscious bias. These sessions addressed issues related to artificial intelligence and its risks, as well as augmented reality experiences that gave employees a more concrete understanding of invisible disabilities and gender discrimination in the workplace.

In 2025, "Diversity Month" ran from 3 to 28 November. With equal opportunities as its central theme, it explored topics such as confidence, professional boldness and combating stereotypes through conferences, testimonials and practical workshops. The entire programme was available in French and English and provided both in-person and remote attendance to ensure the whole Group could attend.

European Disability Employment Week (EDEW) was one of the highlights of the event. It showcased the concrete actions taken to promote the inclusion of people with disabilities, including initiatives to raise awareness of stereotypes, accounts from employees and presentations of support mechanisms implemented within the Group. The week also provided an opportunity to recognise the commitment of internal networks and partner associations that contribute to advancing inclusion on a daily basis.

The *J'agis* skills sponsorship programme was also highlighted, and employees were offered specific assignments related to diversity (gender, social), disability and intergenerational commitment. Rolled out in 10 entities in France, *J'agis* enables employees to volunteer their working time to partner associations. In line with the Group's Human Project and Societal Project, this programme helps boost engagement and attractiveness, promoting social cohesion and equal opportunities in the regions.

At the same time, Crédit Agricole S.A. is continuing its commitment to an inclusive culture through awareness-raising and training initiatives. These initiatives aim to raise awareness of biases and stereotypes, promote equal opportunities and combat all forms of discrimination. They are aimed at all employees, with specific measures for managers and executives, in order to firmly embed these issues in the Group's managerial practices and HR policies.

(1) For further details on equal pay for women and men, see part 3.1.2.5 "Performance and compensation" and Chapter 3, part 4 "Reward policy" of the Universal Registration Document.

Crédit Agricole Assurances reaffirms its commitment to combating sexist behaviour and harassment by applying a zero-tolerance policy. Since signing the StOpE corporate sexism charter in 2023, all employees in France have been trained or are being trained upon their hiring. Specific actions are also being taken to combat violence against women and domestic violence, in particular through the training of Human Resources managers.

Crédit Agricole Italia has entered into two key partnerships:

- a partnership with Fondazione Onda, initiated in 2023, in support of the Violence Project, an initiative to raise awareness of all forms of sexist violence;
- a collaboration with Valore D, an association dedicated to gender equality and the promotion of female talent, particularly through the YOUNICITY platform, to help strengthen initiatives to develop and raise the profile of female employees.

Also in Italy, Agos, Crédit Agricole Personal Finance & Mobility's Italian subsidiary, is celebrating the fourth anniversary of its Wond(h)er community, which aims to support women by promoting empowerment, networking and collaboration. Nearly one in three women in the undertaking (around 300 people) have joined the community, across all professions and levels, at the head office and in branches throughout Italy, and meet up at around 10 events each year.

Crédit Agricole CIB is also continuing to roll out the *Fresque de la Diversité* programme, which is offered to all employees with a particular focus on managers. This programme aims to raise awareness of biases and stereotypes and to encourage an inclusive culture within teams.

Lastly, CACEIS has set up an international Diversity and Inclusion barometer to gather employees' perceptions of their knowledge of CACEIS's Diversity & Inclusion policy and commitments, their perception of inclusion and their perception of equal opportunities. CACEIS's goal is to create:

- an inclusive working environment where everyone feels valued, respected and responsible, and where equal opportunities are a principle;
- an environment that embraces diversity of profiles as a driver of innovation to achieve the common goal of customer satisfaction.

Metrics relating to gender diversity are available in parts 3.1.1.4 "Workforce" and 3.1.3.2 "Diversity" of this report.

2. Intergenerational commitment

In line with its historic approach to inclusion and equal opportunities, Crédit Agricole S.A. stepped up its commitment to young people with the launch of its Youth Plan in 2022.

A vehicle for integration, this Plan helps the younger generations find their place in a sustainable society by welcoming high school students on their mandatory work experience week, work-study students, international work experience volunteers and other contracts dedicated to young people.

Discovering Crédit Agricole S.A.'s business lines helps them to acquire skills and fine-tune their career plans so that they can enter the world of work. At Crédit Agricole S.A., it is also an opportunity for each of the Group's areas of expertise to develop their knowledge and practices in the face of constantly changing uses, thanks to the diversity of these young profiles and backgrounds.

In 2025, Crédit Agricole S.A. exceeded again its commitment by offering opportunities (internships, work study, international volunteers) to around 13,800 young people (target: 12,000 young people per year).

On 23 October 2025, the annual onboarding event for Crédit Agricole Group work-study students, interns and international work-experience volunteers was held at the Evergreen site.

These young people were able to participate in person and remotely in this event sponsored by the Fédération Nationale du Crédit Agricole, Crédit Agricole S.A. and IFCAM. Launched following a survey conducted among work-study students from previous years, this event enhances knowledge of the Group, raises awareness of the diversity of its business lines and strengthens the team spirit, with employees discussing their career paths and mobility within the Group, as well as work-study students sharing their experiences.

This event was an opportunity to reaffirm the Youth Plan 2022-2025, which is at the heart of the Human Project and societal commitments, as well as the key role of work-study students in preparing the company of tomorrow and ramping up the Group's managerial transformation. This event complements the actions implemented within the entities and Regional Banks to encourage the integration of work-study students, and to continue to support and train young people.

Since 2019, the Crédit Agricole Group has also been taking part in the national *Mon stage de troisième* (My middle school work experience week) initiative, which aims to offer high-quality observation work experience placements to students from priority education networks.

The Group's ambition is to welcome 750 pupils each year, i.e. 5% of the target assigned in France to private-sector undertakings, including 300 for Crédit Agricole S.A..

A team has been set up within Group Human Resources to coordinate the HR teams of the various subsidiaries and offer a dynamic and fun orientation programme to pupils, enabling them to familiarise themselves with the Group's business lines. These work experience placements are organised with the support of associations approved by the French steering group: *Viens voir mon taf*, *Tous en stage*, *Un stage et après*.

For the year 2025, 252 middle school pupils were thus welcomed at Crédit Agricole S.A. for their week-long work experience placement.

More than 200 high school pupils were also hosted under the same conditions.

At the same time, through the "J'agis" skills sponsorship programme, employees from all entities were able to get involved with associations working to promote youth inclusion and equal opportunities, in particular through mentoring initiatives or advice and coaching sessions to encourage integration into the workplace. For example, a major youth initiative took place from 10 to 17 June, with nine associations receiving support, nearly 350 hours of engagement and nearly 100 employees involved in supporting 80 young people.

Through "J'agis", employees can deepen their social and societal commitment in support of the Societal Project by working with beneficiary organisations operating in one of the following three areas:

- taking action for climate and transition to a low-carbon economy;
- strengthening cohesion and social inclusion;
- accomplishing agricultural and agri-food transitions.

Crédit Agricole S.A. also intends to remain a model for the inclusion of all generations in value creation. To this end, in its 2012 agreement on Strategic Workforce Planning, it encourages the employment of seniors. It highlights measures for general application such as retirement and health assessments for employees aged 55 and over.

Since 2023, Crédit Agricole CIB has offered "end-of-career societal commitment leave" (agreement signed in 2022 with all trade unions). This specific leave enables employees approaching retirement to carry out assignments for associations or public interest organisations for a period of six to 24 months, while remaining employees of Crédit Agricole CIB.

In order to ensure intergenerational balance within the Group, Crédit Agricole Assurances has expanded its policy in favour of experienced employees, with a corporate agreement in France aimed at maintaining employment. Crédit Agricole Assurances is committed to:

- professional development for senior employees in terms of mobility, training and compensation, with a particular focus on providing training for employees aged 50 and over;
- end-of-career planning and the transition from working life to retirement, including possible subsidised part-time working arrangements;
- providing specific training for people aged 55 and over on the topic of preparing for retirement.

Crédit Agricole Italia is committed to supporting the inclusion of all generations in value creation, notably through the launch of an internal survey to gain a better understanding of the different generations within the undertaking (the “Gen-Mix” survey). This survey is accompanied by a brochure that outlines the values, merits and biases identified, and offers useful advice on how to address the challenges and opportunities of working with colleagues of different ages. A newsletter has also been produced for all employees to help them better understand the four generations working side by side.

The Group’s diversity networks are also involved in this subject. On 9 October 2025, GREAT (Gender Respect Equality at Target, CACEIS network) and Potenti’Elles from Crédit Agricole S.A. hosted a web conference dedicated to the transformation of workplace relationships in a multigenerational environment. More than 150 employees participated.

Lastly, at the Crédit Agricole S.A. Parent Company in France, employees who are considering ending their careers and anticipating their retirement mainly use the “time savings account” scheme. This scheme allows them to take leave at the end of their careers.

Metrics on the age breakdown of employees are available in part 3.1.3.2 “Diversity” of this report.

3. International representation

Crédit Agricole S.A. is proactive regarding the internationalisation of its employee pools.

Increased vigilance is underpinned by the Career Committees that take place each year in all Group entities, including international entities. In this way, Crédit Agricole S.A. encourages the emergence and recognition of international profiles, particularly in succession plans, with a target of 30% by 2025.

At the end of 2025, succession plans included 33% international profiles.

To complement this proactive approach to the internationalisation of executives, a target of 25% international candidates in the strategic talent pools for leadership positions by the end of 2025 has also been set.

To this end, every year, a series of executive Pathway tests are conducted for international candidates. This year, a Learning Expedition was launched in May with 19 international participants from 16 different entities. The aims of this Learning Expedition were:

- to immerse international employees in the world of Crédit Agricole (familiarisation with head offices and entities);
- to discover and deepen their knowledge of the Group and its strategy;
- to develop their (multicultural) network and create an international community of candidates for this Pathway;

- to meet Group executives/leaders (executive Pathway alumni) and envision themselves as future Pathway participants.

At 31 December 2025, 22% of the Pathway’s strategic talent pools were made up of international candidates.

Crédit Agricole S.A.’s internationalisation will accelerate with the ACT 2028 MTP, which sets a target of 30% international candidates in strategic talent pools by the end of 2028.

Building on the success of the inter-entity mentoring programme (IBD Mentoring Program) launched in 2024 by the International Banking division, the programme was launched again for the second time in the summer of 2025 using the same format (eight mentees and eight mentors).

In 2025, Crédit Agricole S.A. also launched a pilot mentoring programme in Asia, designed to support employees in this historic and strategic region for the Group. This programme builds on the creation of inter-entity pairs (Crédit Agricole CIB, CACEIS, Amundi, Indosuez, Crédit Agricole Assurances) in several countries in the region (Malaysia, Singapore, Hong Kong, Japan, China).

For CACEIS, which is present in 17 countries, cultural codes are the key to working better together. It is essential to shed light on the local culture and on working culture, and to adapt communication and working methods in order to foster good relations and productive exchanges. To meet these challenges, the undertaking has launched a series of conferences dedicated to cultural codes in the workplace.

The APAC Women Leadership Programme, a personal development programme launched in 2024 by Crédit Agricole CIB Hong Kong, was renewed in November 2025 for a second cohort of female employees who will receive close support in their professional careers.

Metrics on the international presence of our employees are available in part 3.1.3.2 “Diversity” of this report.

4. Disability

Crédit Agricole S.A. pursues a proactive policy in favour of equal rights and opportunities, and places the inclusion of people with disabilities at the heart of its corporate social responsibility. To this end, its seventh Disability Agreement 2023-2025 provides for the recruitment of 200 people with disabilities, including at least 60 permanent contracts and 50 work-study students. This target was exceeded on 31 December 2025 (269 hires).

Crédit Agricole S.A.’s Disability policy is designed to recognise the skills of each individual, whatever their uniqueness. It aims to create a working environment that brings out the best in everyone, and defines diversity and inclusion as essential drivers of Crédit Agricole S.A.’s performance and growth. This ambition is reflected in the various areas of the Group’s disability agreement. Crédit Agricole S.A. is particularly committed to recruitment and professional integration, as demonstrated by its participation in dedicated school forums and the establishment of specialised partnerships, which help to instil an inclusive culture right from the recruitment process.

In addition to its recruitment plan, measures to retain employees are also being implemented. Adequate support is provided in order to meet all the needs of employees with disabilities, such as the implementation of technical solutions (workstation adaptations, adapted transport, improved accessibility of the premises, installation of specific software), human solutions (interpreters, assistants, etc.) and organisational solutions (teleworking arrangements, etc.). Communication, awareness-raising and training initiatives also help to combat discrimination and stereotypes.

Initiatives are organised throughout the year, including training for managers, the publication of a newsletter and specific workshops during Group internal mobility events. During European Disability Employment Week (EDEW), Crédit Agricole S.A. invites all its employees to conferences and awareness-raising events.

Crédit Agricole S.A. is also reiterating its commitment to those with disabilities on an international scale. Accordingly, as part of its Global Agreement, Crédit Agricole S.A. undertakes to combat all forms of discrimination, whether direct or indirect, and to promote the integration of employees with disabilities in all its subsidiaries.

Working with IFCAM, Crédit Agricole S.A. has created training modules on combating discrimination and implicit decision-making bias. They are aimed 100% of Crédit Agricole S.A. employees. This programme also includes comic strips and videos raising awareness of disability issues, produced by the internal training group “Handicap, j’agis pour l’inclusion” (Disability: I’m taking action for inclusion). The aim is to facilitate the adoption of inclusive practices (management, recruitment, welcoming and guiding people with disabilities).

As it does every year, in 2025, during European Disability Employment Week, Crédit Agricole S.A. offered all employees:

- challenges and actions specifically related to disability via the “J’Agis” platform;
- a round table discussion accessible by videoconference on the theme “Twenty years after the 2005 Disability Law, have we broken the taboos?”;
- a web conference to highlight the activities of Olinn, the Group’s undertaking working specifically with disabled people;
- a broadcast of the conference “Une conférence perchée, les pieds sur terre” (A conference with your head in the clouds and your feet on the ground), to promote a better understanding of mental health issues, break down stereotypes and reflect on a more inclusive professional environment.

3.1.2.4 WORKING ENVIRONMENT

GOVERNANCE

Crédit Agricole S.A.’s work environment is defined, managed and promoted through various decision-making bodies listed below, by order of importance.

Governance is supported by an umbrella committee, the Group Security Committee, whose aim is to establish and oversee the implementation of a common strategy within the Group, aimed at the convergence of technological choices and major projects, broken down according to the constraints specific to each site.

The purpose of Crédit Agricole S.A.’s Physical Security and Safety business line is to establish and oversee the implementation of a common strategy for Crédit Agricole S.A.

The business line is managed by the Physical Security and Safety department, which is responsible for four areas:

- designing the Physical security and safety policy for the Crédit Agricole Group;
- managing the Crédit Agricole Group’s physical security system;
- providing advice and support (protection of people and property) within the Crédit Agricole Group;
- coordinating and leading the Crédit Agricole Group’s Physical Security and Safety business line.

These bodies are responsible for monitoring and evaluating the effectiveness of this policy and related actions.

Other initiatives were also proposed locally by subsidiaries (conferences, escape games, Duo Days, etc.).

A Café Joyeux Inside restaurant was opened in 2024 on the Montrouge campus and is enjoying growing success. Café Joyeux is the first brand of coffee shops to employ people with intellectual disabilities, with all profits reinvested in the association’s work. Since its inauguration, at least six waiters with cognitive and intellectual disabilities have been welcoming Group employees every day.

In addition, Crédit Agricole Italia established the Disability Manager role in 2024. This is a regulated role (employees have received specific training to support people with disabilities within the undertaking) to promote the creation of an increasingly inclusive and accessible working environment. In 2025, four employees had already assumed this position, and five others are undergoing dedicated training.

In addition, Crédit Agricole Assurances published a new practical guide dedicated to disabilities in May 2025. This guide summarises the measures proposed by the undertaking (organisation of time and workstation, financial assistance, psychological support, dedicated contacts, etc.), as well as all the information needed to obtain Disabled Worker Status, with the aim of supporting Crédit Agricole Assurances employees who perform their duties with a disabling illness or disability.

Disability metrics are available in part 3.1.3.4 “Disabilities” of this report.

The topics of health, safety and working conditions fall within the scope of the organisational methods specific to each entity. In France, the Health, Safety and Working Conditions Committee (HSWCC), which is part of the works council (Economic and Social Committee), is responsible for dealing with issues relating to these topics in each undertaking. This committee oversees the protection of employee health, contributes to the prevention of workplace risks and helps to improve working conditions.

For their part, health and work-life balance policy guidelines are defined at Crédit Agricole S.A. level and implemented and enhanced by each entity through its own social dialogue.

FRAMEWORKS AND REFERENCES

Crédit Agricole S.A.’s Work Environment policy is regulated by several reference documents:

- the UNI Global Union Agreement, in force for the period 2023-2027;
- Charter on new ways of working, updated in 2018;
- Code of Ethics, last updated in 2025;
- “Health, safety and quality of life at work” HR policy, last updated in 2025.

These documents are available on the website ⁽¹⁾.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material IROs identified and addressed through the working environment theme, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Positive impacts		
– Improving employee health and safety through proactive work/life well-being policies	Own operations	Invariable
– Positive impact on employees in the event of social protection practices that are better than statutory practices	Own operations	Invariable
Risk		
– Image and reputational risk in the event the health and safety of employees are endangered or human rights are not respected	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ESG practices*	Own operations	Invariable

* For further information about this opportunity, please refer to the IRO table in part 3.1.2.1 “Human Capital Development policy”.

The impacts, risks and opportunities associated with the working environment policy are examined by Crédit Agricole S.A.’s Human Resources department and analysed annually by the HR Directors’ Committee.

WORKING ENVIRONMENT POLICY

CONTEXT/AMBITIONS

As a responsible employer, Crédit Agricole S.A.’s commitments to health, safety and security for all its employees are as follows:

- protecting the health, safety and security of employees working on its various sites;
- complying with local regulations and legislation regarding health and safety;
- adapting to new ways of working;
- making it easier to achieve work/life balance.

To complement this framework, Crédit Agricole S.A. has drafted a Health, Safety and Quality of Life at Work HR policy, updated in 2025 and available on its website ⁽¹⁾.

SCOPE OF APPLICATION

This policy applies to all employees of Crédit Agricole S.A. and its subsidiaries worldwide.

CONTENT AND ACTION PLANS

1. Health in the workplace

Work-related risks can have an impact on employee health, resulting in illnesses or accidents. It is the employer’s responsibility to eliminate or reduce these risks in order to ensure employee safety and protect their physical and mental health.

Crédit Agricole S.A. and its subsidiaries are committed to ensuring good working and employment conditions and to protecting their employees against any form of violence, abuse, work-related harassment or discrimination, and have implemented procedures to prevent, detect such behaviour and resolve these situations, while respecting the rights of individuals. These commitments are reiterated in the Global Agreement, which was renewed in 2023. Crédit Agricole S.A. gives employees the possibility of using an internal whistle-blowing mechanism if they witness or are victims of serious events or events contrary to the internal Code of Conduct and if they have not been able to use normal hierarchical channels for reporting problems (fear of retaliation, pressure from superiors, superiors involved, etc.). This system guarantees the anonymity of the person making the report and ensures that there will be no retaliation against them. It is accessible to all employees on the corporate website. For more information on the Group’s whistle-blowing platform, see part 4.1.4.4 “Protection of whistle-blowers”.

The Global Agreement also encourages Crédit Agricole S.A. and its subsidiaries to promote measures to support employees who are victims of domestic violence, as this violence affects all aspects of the lives of the women and men who suffer from it, including their professional activities. For example, Crédit Agricole CIB informs, advises and supports employees who are victims of domestic and intra-family violence in their efforts, in accordance with the code of ethics and professional secrecy guaranteed by their social worker. Paid leave may also be granted to facilitate any actions that need to be taken.

To preserve employees’ physical and mental health:

- Crédit Agricole S.A. conducts awareness-raising initiatives (screenings, harassment, ethics, bias, cognitive disability);
- Crédit Agricole S.A. entities are equipped with procedures, tools, charters and training relating to harassment, discrimination and mediation. Harassment advisors are also appointed within the entities to guide, inform and support employees.

Throughout the world, Crédit Agricole S.A. and its subsidiaries comply with local health and safety regulations and legislation, in order to develop and maintain a working environment and conditions that guarantee the physical and mental health and safety of employees at work, including in a digital and/or remote working environment.

These principles are implemented and supplemented by the entities according to their own environment, operations, challenges and culture. In France, Crédit Agricole S.A. and its subsidiaries draw up a Single Occupational Risk Assessment Document (*Document unique d’évaluation des risques professionnelles* – DUERP), which is updated annually in consultation with their HSWCC. Based on this document, they define their Annual Programme for the Prevention of Occupational Risks and Improvement of Working Conditions (*Programme annuel de prévention des risques professionnels et d’amélioration des conditions de travail* – PAPRIACT) to reduce the physical and mental risks to which their employees may be exposed.

Some entities have opted for the services of an occupational health and safety adviser to create and roll out an action plan for the management and prevention of psychosocial risks. Others offer training courses on the prevention of psychosocial risks.

(1) <https://www.credit-agricole.com/en/responsible-and-committed/a-responsible-employer>

Crédit Agricole S.A. cares about the well-being of its employees by providing ergonomic premises and workstations, defibrillators and by implementing a number of initiatives to support its employees in their professional activities:

- awareness-raising initiatives and conferences on health-related topics (prevention of musculoskeletal disorders, on-site osteopathy sessions, sophrology, stress management, identification of psychosocial risks, etc.);
- arrangements for the prevention of psychosocial risks (hotlines, counselling service, social workers, on-site psychologist);
- a range of sports activities to help reduce stress and enhance well-being for all;
- access to on-site or external occupational medical practitioners who monitor hygiene conditions in the workplace, prevent risks, monitor employee health and advise employers and employees;
- annual cancer screening, prevention and awareness campaigns (skin, breast, etc.); vaccination campaigns; advice on ergonomics, nutrition, stress management, breathing; personalised support for employee caregivers; mental health awareness and mediation are also rolled out within Crédit Agricole S.A.

In France:

- several entities have rolled out training courses for HR teams, elected representatives, managers or employees on the subject of psychosocial risks;
- some entities continue to offer assistance to employees in returning to work following maternity leave or long-term illness, in partnership with an external service provider;
- CACEIS has adopted “Guidelines on the avoidance and handling of psychological and sexual harassment within the CACEIS Group”, which apply to all entities within the CACEIS Group. Through these Guidelines, CACEIS is committed to doing everything possible to ensure effective prevention in order to eliminate all forms of harassment, through awareness-raising and training initiatives designed to mobilise and empower all stakeholders within the Group. In addition, CACEIS has published a charter and recommendations for France on the avoidance and handling of psychological and sexual harassment and sexist behaviour. CACEIS has also proposed a virtual reality solution to prevent professional burnout;
- Amundi has created a health programme running from April to November 2025 on the theme of “Taking daily action for our mental health”.

In addition, Crédit Agricole Italia has a procedure in place for the avoidance and management of incidents of violence or harassment in the workplace. The entity has also updated its health monitoring and accident management procedures (included in the Occupational Health and Safety Management System, which comprises a policy, a manual and 25 procedures). Lastly, as part of its “Good Life” project, Crédit Agricole Italia has launched initiatives aimed at raising employee awareness of the importance of physical and mental health and ensuring concrete solutions for their well-being.

Occupational health and absenteeism metrics are available in part 3.1.3.6 “Health and safety metrics” of this report.

2. Safety and security at work

Safety

Safety covers all the systems and resources rolled out to deal with unintentional technical, physical, chemical and environmental risks to people and property (accidental fire, weather hazards, workplace accidents).

The Crédit Agricole S.A. strategy regarding physical safety is based on risk prevention, particularly by training employees to enable them to adopt appropriate behaviour and acquire suitable safety practices.

Keeping employees informed is also a major objective.

Physical security

Security covers all the systems and resources used to combat intentional risks associated with acts intended to harm or damage people and tangible and intangible assets (intrusion, theft, damage).

Crédit Agricole S.A.’s physical security strategy is based on three pillars: anticipate, prevent, train/inform. These three pillars are understood as follows:

- anticipate, through security monitoring (assessing the state of threats likely to impact the Group’s activities and the safety of its people and infrastructures in France and abroad) and relations with government departments responsible for territorial intelligence, the fight against terrorism and maintaining public order;
- prevent, through site access control systems compliant with the recommendations of the French National Information Systems Security Agency (*Agence nationale de la sécurité des systèmes d’information* – ANSSI), and technical security systems adapted to the issues at stake;
- train/inform, through a Special Security Plan (*Plan particulier de mise en sûreté* – PPMS), which aims to help employees react by informing them of the attitudes to adopt, in e-learning training and continuous information via Group channels.

A support system for international employees and expatriates is also in place: the Physical Security and Safety department carries out a country risk assessment, which is regularly updated based on information provided by its risk analysis providers, the Ministry for Europe and Foreign Affairs and its local contacts.

In 2025, the Security and Safety department organised two days dedicated to occupational health and safety: one on the Montrouge campus and the other on the Saint-Quentin-en-Yvelines campus, in conjunction with the entities present and medical services. The aim of these days was to raise employee awareness of occupational risks and also to teach them the right habits to adopt when faced with risks at home.

The workshops and activities offered provided a practical and interactive approach to:

- fire safety, with evacuation drills and real-life scenarios (fire training tray, demonstrations by the fire brigade);
- road risks, through an escape game and car rollover simulator demonstrations;
- risks associated with lithium batteries and electrical installations, through practical and educational demonstrations;
- life-saving techniques, led by healthcare professionals, to improve immediate response capabilities;
- stress at work, musculoskeletal disorders and addiction, addressed through prevention workshops led by experts;
- fun and immersive activities, designed as a smart way to tackle potentially anxiety-inducing topics and encourage the adoption of prevention messages.

Crédit Agricole S.A. also offers its employees training in the form of e-learning modules. All of these actions are part of a comprehensive approach aimed at developing a genuine health and safety culture within the Group and strengthening everyone’s preparedness, both professionally and personally.

3. Work/life balance

Parenthood

As a signatory to the Parenting Charter since 2009 (commitment renewed in 2022), Crédit Agricole S.A. and its subsidiaries have implemented numerous measures to facilitate work-life balance, particularly for employees who are parents. Several subsidiaries are also signatories to the Charter of 15 Commitments for Work-Life Balance.

In its two Global Agreements, Crédit Agricole S.A. has made a strong commitment to parenting by granting all Crédit Agricole S.A. entities 16 weeks of maternity leave on full pay for new mothers and 28 calendar days of paternity leave on full pay for new fathers.

100% of our employees are covered by maternity leave or paternity leave.

These measures reflect Crédit Agricole S.A.'s commitment to gender equality and work-life balance. In most of the countries where Crédit Agricole S.A. operates, these maternity and paternity leave periods go beyond current local requirements.

Crédit Agricole S.A. attaches great importance to flexibility in the duration and organisation of work (part-time/reduced-time), teleworking, the right to disconnect, sabbatical leave or days off for family events (sick children, death, marriage, back-to-school, etc.).

In addition to this leave, entities are encouraged to put in place measures such as adoption leave in order to foster consideration of the diversity of (co-)parenting situations. As a factor of gender equality at work, these periods of extended leave mark Crédit Agricole S.A.'s strong commitment to equality between women and men.

The Group also pays particular attention to its employees who are caregivers. In France, in addition to existing statutory leave (family solidarity leave, caregiver leave, parental leave), entities have implemented measures to assist these employees, such as a listening and advice platform, dedicated guides, additional teleworking days, flexible working hours, donated days, etc.

Crédit Agricole S.A. and its subsidiaries offer a range of services to eligible employees, such as day-care facilities and access to after-school and holiday childcare centres for their children (see "Social benefits" below for more information).

As part of its gender equality at work agreement, Crédit Agricole Personal Finance & Mobility has renewed its part-time assistance scheme for single-parent families in 2025 (covering 95% of wage for 80% working time).

Crédit Agricole Italia has launched a project aimed at recognising "well-being" as one of the Group's core values, through the economic quantification of the benefits provided by the undertaking.

Telework

All Crédit Agricole S.A. entities in France and in Italy are covered by a teleworking agreement.

Provided that the activities are eligible for teleworking, employees can telework for up to 40% of their annual working time, with flexibility offered on the scheduling of teleworking days. The risks related to isolation and the feeling of exclusion in the context of teleworking have been studied and are taken into account in each entity's Single Occupational Risk Assessment Document (DUERP).

As regards international operations, each entity adjusts its policy in accordance with local standards and within the limits defined at Crédit Agricole S.A. level.

The 2023 Global Agreement formalised the principles governing the use of teleworking applicable across all Crédit Agricole S.A. entities.

Campuses

Crédit Agricole S.A. firmly believes that Quality of Life and Working Conditions are a major driver of economic performance and employee engagement. Thus, aware that a pleasant working environment contributes to the well-being of employees, Crédit Agricole S.A. actively integrates nature and biodiversity at its sites.

The Montrouge (Evergreen) and Saint-Quentin (SQY Park) sites have different certifications related to biodiversity and implement concrete actions for the sustainable maintenance of green spaces, combined with a programme of activities offered to employees.

Social offer

Crédit Agricole S.A. offers the employees of subscribing entities (France scope) a wide range of services designed to promote work-life balance as much as possible, in line with the ambitions of the Group's Human Project and Societal Project. Employees can take advantage of the banking benefits offered by the Group, a corporate day-care, or day-care facilities with a service provider, sports offers run by CA Sports through 19 sports associations, a childcare centre close to the SQY Park campus for children of employees aged between 3 and 12 years old every Wednesday and during the school holidays, the services offered by Action Logement Services (social housing, services and financial aid for employees, whether they are young workers, employees on secondment or employees in difficulty).

As such, in 2025:

- around 388 parent-employees benefited from a day-care place;
- more than 2,320 employees signed up for the Group's sports activities;
- on average, the Manet childcare centre welcomed 89 children per day, i.e. around 10,274 days of childcare provided in total over the year;
- the Group's banking offer targets nearly 39,000 eligible individuals for 15,500 beneficiaries through 11 distribution networks;
- lastly, nearly 190 employees benefited from social housing through Action Logement.

Social protection

Through identification of the positive impact of proactive employee benefit policies on improving the health and social protection of its employees, Crédit Agricole S.A. affirms its strong commitment to social protection for its employees. It takes the form of coverage for all employees, provided by undertaking-specific and/or public schemes, which support them during major events in their professional and personal lives: illness, unemployment, parental leave (maternity/paternity/adoption), disability/invalidity, death and retirement.

This comprehensive approach reflects Crédit Agricole S.A.'s desire to offer its employees social protection, enabling them to approach the different stages of their professional and personal lives with peace of mind. It aims to align with local practices in each country, preserve the specific characteristics of each entity while guaranteeing a common basis of protection, and ensure a process of continuous improvement combining social performance and regulatory compliance. This approach is based on an analysis of market practices and strict compliance with local regulations. Each entity therefore assesses its existing benefit schemes and identifies areas requiring adjustment.

The Global Agreement signed with UNI Global Union on 9 October 2023 formalises commitments in the areas of health, disability, invalidity and death (Article 5.5). This agreement structures the Group's overall approach to social protection.

In France, all employees benefit from social protection that goes beyond legal requirements, including supplementary group schemes (i.e. coverage of healthcare costs, retirement savings and financial support in the event of disability, invalidity or death). In addition, an innovative system for pooling group insurance schemes, developed as part of a social responsibility approach, offers additional benefits: improved coverage, personalised assistance services and enhanced support in managing psychosocial risks.

Internationally, all employees enjoy additional social protection that meets local legal standards and around 90% of Crédit Agricole Group employees benefit from supplementary social protection that exceeds local legal standards (health, disability/invalidity cover, retirement).

Each entity adapts its schemes to local legislation and market practices, guaranteeing health and life insurance coverage for its employees. This approach ensures protection for employees and their dependants in the event of loss of income due to illness, unemployment, maternity/paternity, parental leave, disability/invalidity or death.

In accordance with Article 5.5 of the Global Agreement, Crédit Agricole S.A. conducts regular and comprehensive reviews of all social protection schemes in force in all entities. The results of this analysis are shared with the monitoring committee as part of the established governance process.

This analysis identifies opportunities for improvement and harmonisation, while respecting local social dialogue and the specific national contexts of each entity.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

With reference to the Performance and Pay theme, the following risks and opportunities were deemed material by Crédit Agricole S.A. as part of the double materiality analysis prior to drafting this report:

Description of IROs	Positioning in the value chain	Time horizon
Risk		
– Risk to employee attractiveness, retention and engagement due to the compensation policy and employee benefits	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ESG practices*	Own operations	Invariable

* For further information about this opportunity, please refer to the IRO table in part 3.1.2.1 "Human Capital Development policy".

Crédit Agricole S.A.'s Performance and Compensation policy addresses the opportunities and risks identified above.

The risk and opportunity associated with the performance and compensation policy are examined by Crédit Agricole S.A.'s Human Resources department and analysed annually by the HR Directors' Committee.

PERFORMANCE AND COMPENSATION POLICY CONTEXT/AMBITIONS

Crédit Agricole S.A. promotes a reward policy based on fairness and common rules for all employees in compliance with the applicable regulatory framework. This policy ensures internal consistency as well as external competitiveness of pay through benchmarks with peers. In particular, it aims to have a positive impact on the Group's attractiveness and on employee retention, loyalty and engagement.

Thus, in addition to the targets of Crédit Agricole S.A.'s Compensation Policy, the Group's ambitions in terms of performance and compensation in all of its locations worldwide are as follows:

- to build loyalty, allow Crédit Agricole S.A. employees to grow and help them to give their best;

Citizen engagement

In France, in line with the national legislation in force, if an employee is a member of the military or national police operational reserve, he or she may benefit from an annual leave allowance of at least ten working days per calendar year.

Additionally, to help promote the engagement of citizens in local democracy and in line with the national legislation in force, in France if an employee is a candidate in local or national elections, he or she may benefit from annual leave up to 20 working days to take part in the electoral campaign.

3.1.2.5 PERFORMANCE AND COMPENSATION

GOVERNANCE

Crédit Agricole S.A. applies a rigorous process to establish its compensation policy. This process, and the functions involved in drawing up this policy, are detailed in Chapter 3, part 4.2.3.1 "Process of defining the compensation policy" of this Universal Registration Document.

The bodies described therein are responsible for monitoring and evaluating the effectiveness of this policy and related actions.

FRAMEWORKS AND REFERENCES

Chapter 3, part 4.2.2 "Regulatory framework for compensation policies" of this Universal Registration Document, which is updated annually, details the frameworks and references applicable to Crédit Agricole S.A.'s compensation policy.

- to recognise individual and collective performance over the long term;
- to align the interests of employees with those of Crédit Agricole S.A. and its shareholders;
- to promote a responsible reward policy that provides a framework for risk-taking and complies with the national, European and international legal and regulatory environment in force;
- to promote sound and effective risk management;
- to guarantee a gender-neutral reward policy.

SCOPE OF APPLICATION

This policy applies to Crédit Agricole S.A. and its subsidiaries worldwide. As such, it applies to all permanent and fixed-term employees of Crédit Agricole S.A. and its subsidiaries, whatever their activity or function. In addition, each subsidiary may apply other compensation principles detailed in its own performance and compensation policy.

CONTENT AND ACTION PLANS

1. Compensation

Crédit Agricole S.A. has defined a responsible reward policy in line with the mutualist values of the Group, based on fairness and rules common to all employees. The reward policy is one of the three founding principles of the Human Project: empowering employees, strengthening customer focus and fostering an atmosphere of trust. This policy includes provisions on gender neutrality and processes aimed at reducing any compensation gaps. The reward policy for Crédit Agricole S.A. employees is composed of fixed, variable and peripheral elements, corresponding to various targets. Each employee receives all or part of these elements based on their level of responsibility, skills and performance.

In addition, Crédit Agricole S.A.'s compensation policy aims to align the interests of executive managers with those of shareholders over the long term through the use of economic, stock market, environmental and societal performance criteria (for more information, see part 1.2.4 "Integration of sustainability-related results in incentive schemes" above).

In terms of collective variable compensation, incentive and profit-sharing agreements combined with employer matching systems allow employees to be directly involved in the Group's annual results. This is one of the pillars of the Group's social pact.

Compensation metrics are available in part 3.1.3.7 "Compensation metrics" of this report.

2. Gender equality at work in terms of compensation

Crédit Agricole S.A.'s compensation policy is gender-neutral, with particular attention paid to ensuring equal pay for women and men. To measure these gaps, in France the Group uses the gender equality at work index, established by the French government, by calculating and tracking:

- the gender pay gap;
- the gap in the breakdown of individual raises by gender;
- the gender gap in promotions;
- the number of female employees receiving a raise after returning from maternity or adoption leave;
- the number of people of the under-represented gender in the top 10 highest earners.

This index is supported by a proactive approach: depending on the results and any gaps identified, the Group allocates a dedicated budget in France to work towards reducing these gaps. As such, over the period covered by the "Ambitions 2025" MTP, measures dedicated to equal pay between women and men have led to an increase in total payroll of €30 million. The effectiveness of these actions is shown in the gender equality index. In 2025, the entities of the Crédit Agricole S.A. Group achieved an average index score of 90/100, up 2 points compared with 2024. The Group is also committed to reducing the pay gap between women and men in all of its locations, and complies with local requirements in this area, and, in particular, the Pay Transparency Directive adopted on 30 March 2023, which will be transposed in all European Union countries.

Crédit Agricole S.A. is also pursuing its commitment to advancing gender equality at work by means other than just pay. This commitment is reflected in the signing of agreements covering fairness in recruitment, training, promotion and compensation, as well as work-life balance. For more information, see in part 3.1.2.3 "Diversity" the section dedicated to "Diversity policy", "Content and action plans" and "Gender equality at work" and in part 3.1.2.4 "Working environment" the section on the "Working environment policy", "Content and action plans", "3. Work/life balance" and the table "Agreements signed by topic" in part 3.1.3.1 "Collective bargaining coverage and social dialogue".

Gender pay gap metrics are available in part 3.1.3.7 "Compensation metrics" of this report.

3. Ratio of the remuneration of the highest-paid person to the median remuneration of employees

The equity ratio, as defined by France's Law on Business Growth and Transformation (*Plan d'action pour la croissance et la transformation des entreprises* – the PACTE legislation), can be consulted in Chapter 3, part 4.4.3.4 "Comparative approach to compensation" of this Universal Registration Document.

The ratio of the highest to median earnings is available in part 3.1.3.7 "Compensation metrics" of this report.

4. Adequate wages

Crédit Agricole S.A.'s aim is to offer its employees attractive, motivating compensation packages that enable it to retain the skills it needs while being aligned with its Medium-term plan and the interests of its various stakeholders. Through its Human Project, Crédit Agricole S.A. promotes a reward policy based on fairness and common rules for all employees in compliance with the applicable regulatory framework. This policy ensures internal consistency as well as external competitiveness of compensation through comparative analyses carried out with peers. The Global Agreement ⁽¹⁾ signed in 2023 reflects these ambitions by reaffirming the principle of pay equity. This translates, among other things, into compensation and benefits that ensure an appropriate standard of living for the individuals concerned and their families under equitable conditions and that are consistent with risk management objectives.

The Group applies the recommendations of the standard to calculate an adequate wage based on national minimum wages, where they exist, and on benchmarks proposed by the Fair Wage Network, an internationally recognised external organisation. When the Fair Wage Network benchmark is used, the adequate wage determined corresponds to the wage that allows workers and their families, depending on their geographical location, to have an acceptable standard of living while participating in social and cultural life. It aims to cover the basic needs of a family, including all necessary areas of expenditure, and in particular: housing (according to UN-Habitat criteria), food (enough to ensure 2,200-3,000 kilo-calories/adult/day), child care, education, healthcare, transport, communication, and a percentage left over for leisure and/or for precautionary savings in order to meet any unforeseen expenses.

Adequate wage metrics are available in part 3.1.3.3 "Adequate wages" of this report.

3.1.3 QUANTITATIVE DATA AND TARGETS

3.1.3.1 COLLECTIVE BARGAINING COVERAGE AND SOCIAL DIALOGUE

COLLECTIVE BARGAINING COVERAGE AND SOCIAL DIALOGUE

Coverage Rate	Collective Bargaining Coverage		Social dialogue
	Employees – EEA	Employees – Non-EEA	Workplace representation (EEA only)
	(For countries with >50 empl. representing >10% total empl.)	(Estimate for regions with >50 empl. representing >10% total empl.)	(For countries with >50 empl. representing >10% total empl.)
	2025		
0-19%			
20-39%			
40-59%			
60-79%			
80-100%	France, Italy		France, Italy
	2024		
0-19%			
20-39%			
40-59%			
60-79%			
80-100%	France, Italy		France, Italy

Scope covered: all countries with more than 50 employees representing more than 10% of the total number of employees, it being specified that 100% of Crédit Agricole S.A. and its subsidiaries' employees are covered by the Global Agreement concluded on 9 October 2023.

The level of collective bargaining coverage at the country level is closely linked to the national legal provisions in force. The same applies to workplace representation, which depends in particular on the number of employees and their willingness to get involved. In any event, Crédit Agricole S.A. promotes social dialogue in all its entities, as stated in Article 2 of the above-mentioned Global Agreement.

Data restatement: the data required for the publication of collective bargaining coverage and social dialogue are limited to countries with more than 50 employees representing more than 10% of Crédit Agricole S.A.'s total employees. In the table above, the 2024 data have been adjusted to reflect this clarification and therefore cover only France and Italy.

These tables cover all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in natural persons at 31 December 2024 and 31 December 2025.

The European Economic Area (EEA) comprises 30 countries: the 27 members of the European Union, plus Iceland, Norway and Liechtenstein.

A collective bargaining agreement is defined as any written agreement relating to working conditions concluded between an employer, a group of employers or one or more employers' organisations on the one hand, and one or more organisations representing the employees on the other, or, in the absence of such organisations, the representatives of the workers concerned, duly elected and mandated by the latter in accordance with national legislation. This agreement or convention may be concluded at the establishment level, undertaking level, branch level or any other level chosen by the signatories; for example: sectoral, national, branch or undertaking collective bargaining agreement or convention, etc.

According to the applicable national legislation, an employee representative and/or trade union representative is defined as a company employee, appointed or elected to represent and defend the interests of employees in dealings with the employer. The employee representative may also be appointed or elected by a trade union organisation or its members, in accordance with the applicable national provisions. They may have special rights (e.g. information and consultation rights) and may conclude collective agreements. Exercise of these representative functions is guaranteed by the applicable national legislation, for example: works councils, staff delegate, trade union delegate, staff delegation.

AGREEMENTS SIGNED BY TOPIC

	France		Other countries	
	2025	2024	2025	2024
Compensation and benefits	45	34	30	37
Training	1	1	12	12
Employee representative bodies	2	7	11	5
Employment	9	4	17	5
Working time	2	4	18	14

Health and safety	4	5	9	8
Other	15	21	11	32
TOTAL NUMBER OF AGREEMENTS SIGNED	81	80	113	115

Scope covered: 100%.

This table lists, by theme, the number of corporate agreements or amendments signed by Crédit Agricole S.A. during 2024 and 2025, testifying to the momentum of its social dialogue.

For further information on the measures implemented with regard to social dialogue, please refer to part 3.1.2.2 “Social dialogue policy”, and more specifically “Content and action plans” and “Collective bargaining coverage and social dialogue” of this report.

3.1.3.2 DIVERSITY

BREAKDOWN OF TOP MANAGEMENT BY GENDER

	2025		2024	
	In number of individuals	As a %	In number of individuals	As a %
Breakdown of Executive Committee ⁽¹⁾	18	100.00%	17	100.00%
Women	6	33.33%	5	29.40%
Men	12	66.67%	12	70.60%
Others ⁽²⁾	-	-	-	-
Not reported	-	-	-	-
Breakdown of Top Management	356	100.00%	351	100.00%
Women	94	26.40%	91	25.93%
Men	262	73.60%	260	74.07%
Others ⁽²⁾	-	-	-	-

Breakdown of managers by gender	16,930	100.00%	16,576	100.00%
Women	6,854	40.48%	6,660	40.20%
Men	10,076	59.52%	9,916	59.80%
Others ⁽²⁾	-	-	-	-
Not reported	-	-	-	-

(1) Metric monitored as part of the “Ambitions 2025” MTP.

(2) Gender as specified by the employees themselves.

Scope covered: 100%.

For Crédit Agricole S.A., Top Management includes the CEOs, Deputy General Managers and Directors approved through internal processes.

In addition to the above metrics, Crédit Agricole S.A. also monitors the feminisation of its Top 1000, meaning the community of executives and managers drawn from all the business lines and functions worldwide. This rate was 39% in 2025, compared with 39.4% in 2024.

Data restatement: data for 2024 has been corrected as regards the CSRD scope.

For further information on the actions implemented with regard to gender equality at work, please refer to part 3.1.2.3 “Diversity policy”, and more specifically the section “Content and action plans”, “1. Gender equality at work” of this report.

BREAKDOWN OF EMPLOYEES BY AGE (IN FTE)

	2025	2024
Under 30:	10,638.90	10,646.58
of which < 25	1,841.92	1,965.73
of which 25-30	8,796.98	8,680.85
Between 30 and 50:	44,732.60	44,251.72
of which 30-34	9,783.50	9,541.09
of which 35-39	10,362.88	10,496.00
of which 40-44	12,490.01	12,660.77
of which 45-49	12,096.21	11,553.86
Over 50:	26,858.35	25,543.76
of which 50-54	11,240.68	10,804.13
of which 55-59	9,636.75	9,487.66
of which 60-64	5,472.05	4,769.72
of which ≥ 65	508.87	482.25
Not reported:	815.00	802.00
TOTAL	83,044.85	81,244.06
AVERAGE AGE	44.20	43.90

Scope covered: 100%.

For each age range, this table covers all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in Full-time Equivalent (FTE) at 31 December 2024 and 2025. The “not reported” line indicates countries where the collection of age-related data is prohibited (notably the United States). For average age, calculations are based on natural persons.

Those under 30, those aged 30-50 and those over 50 represented 12.81%, 53.86% and 32.34%, respectively, of the workforce in 2025, compared with 13.10%, 54.46% and 31.44% in 2024. The age category not disclosed for local regulatory reasons represented approximately 1% of the headcount.

For Age, the calculation formula used is: (Reference date – Date of birth) / 365.25 (the reference date being the last day of the month).

For Average Age, the calculation formula used is: (Age on the last day of the month x Number of people of that age) / Total workforce.

For further information on the actions implemented with regard to intergenerational collaboration, please refer to part 3.1.2.3 “Diversity policy”, and more specifically the section “Content and action plans”, “2. Intergenerational commitment” of this report.

INTERNATIONAL METRICS

	2025	2024
Number of nationalities	135	134
INTERNATIONAL PROFILES IN SUCCESSION PLANS	33%	25%

International profiles have been identified in the various geographic areas for inclusion in executive succession plans. They are expressed in number of Natural Persons.

As a reminder, Crédit Agricole S.A. has set itself a target of 30% international profiles in succession plans by the end of 2025.

For further information on the actions implemented with regard to international representation, please refer to part 3.1.2.1 “Human capital development policy”, and more specifically the section “Content and action plans”, “3. Career management”, as well as part 3.1.2.3 “Diversity Policy”, and more specifically the section “Content and action plans”, “3. International representation” of this report.

YOUTH PLAN METRIC

	2025	2024
Total number of young people welcomed	13,879	13,276

Scope covered: 100%.

This metric is monitored as part of the 2022-2025 Medium-Term Plan, and records the number of young people under the age of 30 within Crédit Agricole S.A. at 31 December 2024 and 2025 (date of birth after 1 January 1995) who are on contracts other than permanent contracts (work-study students, interns, Industrial Agreements for Training through Research, international volunteers, seasonal employees and fixed-term contracts). The figure is expressed in natural persons.

As a reminder, as part of the 2022-2025 MTP, the Group committed to welcoming and training more than 50,000 young people by 2025, including 21,200 young people for Crédit Agricole S.A. and its subsidiaries. In total, since the start of the 2022-2025 MTP, 51,619 young people have been welcomed.

The calculation formula used is: young employees at end-January N + new hires between February and end-December N.

For more information on the Youth Plan, please refer to part 3.1.2.3 “Diversity policy”, and more specifically the section “Content and action plans”, “2. Intergenerational commitment” of this report.

3.1.3.3 ADEQUATE WAGES

EMPLOYEES EARNING ABOVE THE ADEQUATE WAGE IN EACH COUNTRY

	2025	2024
Percentage of employees earning above the adequate wage in each country	100.00%	100.00%

Scope covered: all employees on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in natural persons at 31 December 2024 and at 31 December 2025.

Definitions:

- Employee for the sole purposes of this “adequate wage” metric: a person bound to the undertaking by an employment contract who receives a wage in return for work performed. Employees who are temporarily not performing any actual work may receive compensation; these employees (classified as inactive) are not included in the above definition of employees receiving a wage in return for actual work.

Data restatement: in year N-1, both active and inactive employees were taken into account. In view of the precise definition of the term employee, we felt it necessary to refine our publication of metrics and to adopt a single definition of employees (which excludes inactive employees). In the table above, the N-1 data has been corrected to reflect this precise definition.

- **Wage:** the theoretical gross annual wage paid over the year. For part-time employees or those joining the entity during the year, the gross annual wage paid over the year has been adjusted to 100% (full-time equivalent).
- **Adequate wage:** Crédit Agricole S.A. has adopted the definition of the Fair Wage Network, an internationally recognised external organisation (for more information on the adequate wage, see part 3.1.2.5 “Performance and compensation”, and more specifically the section “Content and action plans”, “Adequate wages”). The adequate wage used by Crédit Agricole S.A.

corresponds to the adequate wage for a family of two adults and a number of children corresponding to the country’s fertility rate, adjusted for the number of workers in the household. Only active employees receive a wage and are included in this table. Employees who are considered inactive receive compensation.

For further information on the actions implemented with regard to adequate wages, please refer to part 3.1.2.5 “Performance and compensation policy”, section “Content and action plans”, “4. Adequate wages” of this report.

3.1.3.4 DISABILITIES

EMPLOYEES WITH DISABILITIES

	2025	2024
Percentage of employees with disabilities*	5.39%	4.10%

* France scope, i.e. 47% of the workforce.

This metric covers all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors) in France, expressed in natural persons at 31 December 2024 and 2025.

It differs from the employment rate (obligation to employ workers with disabilities – OETH) calculated according to French regulations, which includes all employees who have declared their disability to their employer (permanent contracts, fixed-term contracts, interns, temporary workers) in proportion to their time worked during the year. Greater weight is applied to employees

aged 50 and over. In 2024, this employment rate was 5.95% in France. At the end of 2025, this provisional rate was 6.22%. The final rate for 2025 will be known in April 2026 and will be published on the website at the end of the annual disability reporting campaign (in 2026 for the year 2025).

For further information on the actions implemented with regard to disabilities, please refer to part 3.1.2.3 “Diversity policy”, and more specifically the section “Content and action plans”, “4. Disabilities” of this report.

3.1.3.5 TRAINING AND SKILLS DEVELOPMENT METRICS

PERFORMANCE AND CAREER DEVELOPMENT REVIEWS

	2025	2024
Percentage of active employees participating in regular performance and career development reviews (in %)	87.03%	87.00%
Women	85.95%	86.90%
Men	88.18%	87.10%
Other*	-	-
Not reported	-	-
Percentage of employees participating in regular performance and career development reviews (in %)	85.71%	85.92%
Women	83.99%	85.30%
Men	87.60%	86.60%
Other*	-	-
Not reported	-	-

* Gender as specified by the employees themselves.
Scope covered: 100%.

This table covers 100% of employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in natural persons at 31 December 2024 and 2025. It takes into account reviews conducted during the calendar year (performance reviews, career reviews and other individual reviews – return from maternity leave, long-term illness, etc.).

Accountable appraisals are largely rolled out within Crédit Agricole S.A., which pays particular attention to the skills development of its employees and to feedback. It is a key moment of the year between employees and their manager.

Metrics are calculated from 1 January to 31 December, it being understood that within Crédit Agricole S.A.:

- annual appraisal campaigns run from November of year N-1 and end at the latest in March of year N;
- some employees do not have interviews, for example in specific situations such as sick leave, maternity leave, retirement during the interview period, or new hires (less than three months’ seniority).

For further information on the actions implemented with regard to reviews, please refer to part 3.1.2.1 “Human capital development policy”, and more specifically the section “Content and action plans”, “2. Professional assessment” of this report.

TRAINING TIME

	2025	2024
Average number of training hours per employee:	32.74	31.02
Women	33.15	31.48
Men	32.30	30.51
Others*	-	-
Not reported	-	-
TOTAL NUMBER OF TRAINING HOURS	2,779,371.07	2,577,668.00

* Gender as specified by the employees themselves.
Scope covered: 100%.

This table covers all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in natural persons at 31 December 2024 and 2025. The total number of training hours is monitored as part of the 2022-2025 Medium-term plan.

Training includes in-person, e-learning and regulatory training. As soon as an action meets the following two criteria, it is counted as a training action: a clearly identified skills target, and minimum traceability (actual or fixed).

In 2025, 100% of employees completed at least one training course, as in 2024.

For further information on the actions implemented with regard to training, please refer to part 3.1.2.1 “Human capital development policy”, and more specifically the section “Content and action plans”, “1. Training” of this report.

TRAINING TOPICS

	2025				2024			
	Total hours	%	o/w France	o/w other countries	Total hours	%	o/w France	o/w other countries
Hard skills training	1,475,054	53.07%	613,759	861,295	1,437,133	54.40%	577,583	859,550
Soft skills training	595,413	21.42%	183,156	412,257	593,264	22.50%	203,586	389,678
Regulatory training	648,349	23.33%	264,516	383,833	526,199	19.90%	205,810	320,389
CSR & sustainable development training	60,554	2.18%	23,008	37,546	83,517	3.20%	37,420	46,097

Scope covered: 100%.

This table covers all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in natural persons at 31 December 2024 and 2025. The CSR & Sustainable Development training metric is monitored as part of the 2022-2025 Medium-term plan. Hard skills training includes all job-related training and AI; soft skills training includes training related to efficiency, leadership-management, personal development and training provided by the digital platform; regulatory training includes all mandatory training related to jobs, but also to ethics, anti-money laundering and combating the financing of terrorism, etc.

Lastly, CSR & Sustainable Development training courses cover all training courses taken by professionals in these areas as part of the MTP. As a reminder, under the 2022-2025 MTP, 100% of Crédit Agricole S.A. Directors and employees must have taken these

training courses (see part 3.1.2.1, section on “Human capital development”, “Human capital development policy”, “Content and action plans”, “Training” and “Supporting the Societal Project”).

In 2025, 100% of employees completed at least one training course, as in 2024.

As a reminder, mandatory training courses – including those on CSR topics – are classified as regulatory training courses. The decline in the completion rate of other CSR training courses is due to the end of the “CSR for All” campaign in 2025.

For further information on the actions implemented with regard to training, please refer to part 3.1.2.1 “Human capital development policy”, and more specifically the section “Content and action plans”, “1. Training” of this report.

PROMOTIONS IN FRANCE

	2025		2024	
	Total	%	Total	%
Total promotions in France	2,650	100.00%	2,968	100.00%
Women	1,515	57.17%	1,715	57.78%
Men	1,135	42.83%	1,253	42.22%

Scope covered: France (i.e. 47% of employees).

This table covers active employees on permanent contracts (including executive corporate officers, excluding Directors) in France, expressed in natural persons at 31 December 2024 and 2025. It should be noted that employees who left the company during the year but were promoted are included: this is a count of the number of promotions, not the number of people promoted, as an employee may be promoted several times during the year.

Promotions of active employees on permanent contracts during the year are defined as promotions resulting in a change of classification (managers/non-managers) and/or a change of classification level within one of these two classifications, for Crédit Agricole S.A.'s collective bargaining agreements.

For further information on the actions implemented with regard to career development, please refer to part 3.1.2.1 "Human capital development policy", and more specifically the section "Content and action plans", "3. Career management" of this report.

HIRING & MOBILITY

	2025					
	Women	Men	Other*	Not reported	Total (NP)	Total (%)
Permanent hires	3,202	3,331	-	-	6,533	100.00%
Of which external hires	2,434	2,691	-	-	5,125	78.45%
Of which hired following a previous contract with the Group (fixed-term contract, work-study, internship, etc.)	768	640	-	-	1,408	21.55%
Of which under 30	1,423	1,449	-	-	2,872	43.96%
Of which between 30 and 50	1,537	1,601	-	-	3,138	48.03%
Of which over 50	203	207	-	-	410	6.28%
Of which age not reported	39	74	-	-	113	1.73%
Of which hired in France	1,590	1,670	-	-	3,260	49.90%
Of which hired outside France	1,612	1,661	-	-	3,273	50.10%
Internal mobility on permanent contracts (between and within entities)	4,993	4,664	-	-	9,657	100.00%

	2024					
	Women	Men	Other*	Not reported	Total (NP)	Total (%)
Permanent hires	3,477	3,439	-	-	6,916	100.00%
Of which external hires	2,572	2,697	-	-	5,269	76.19%
Of which hired following a previous contract with the Group (fixed-term contract, work-study, internship, etc.)	905	742	-	-	1,647	23.81%
Of which under 30	1,529	1,528	-	-	3,057	44.20%
Of which between 30 and 50	1,699	1,569	-	-	3,268	47.25%
Of which over 50	200	258	-	-	458	6.62%
Of which age not reported	49	84	-	-	133	1.92%
Of which hired in France	1,666	1,632	-	-	3,298	47.69%
Of which hired outside France	1,811	1,807	-	-	3,618	52.31%
Internal mobility on permanent contracts (between and within entities)	5,861	5,142	-	-	11,003	100.00%

* Gender as specified by the employees themselves.
Scope covered: 100%.

These tables cover active employees on permanent contracts (including executive corporate officers, excluding Directors), expressed in natural persons at 31 December 2024 and 2025. The internal mobility rate of 12% is calculated as follows: (Internal mobilities of permanent employees/average annual headcount) x 100.

The organisations are in a stabilisation phase after acquisitions that took place within the Crédit Agricole S.A. perimeter. In addition, external recruitment flows outside of the Youth Plan are closely monitored.

Definitions:

- **Permanent hires:** these include direct external hires on permanent contracts and conversions into permanent contracts of interns, work-study students, seasonal employees, international volunteers, employees under industrial agreements for training through research and fixed-term employees, i.e. interns, work-study students, seasonal employees, international volunteers, employees under industrial agreements for training through research, and fixed-term employees contracts whose contracts

were converted into permanent contracts during the year. This conversion must take place within three months of the end of their internship, work-study, seasonal, international volunteer, industrial agreement for training through research, or fixed-term contract if it concerns the same entity as their previous contract.

- **Permanent-contract mobility:** this covers both intra- and inter-entity mobility:
 - intra-entity mobility: change of job and/or assignment within the same entity (excluding reorganisation, administrative modification, change of job reference framework, relocation, etc.);
 - inter-entity mobility within the Crédit Agricole Group.

For further information on the actions implemented with regard to career development and recruitment, please refer to part 3.1.2.1 "Human capital development policy", and more specifically the section "Content and action plans", "3. Career management" of this report.

3.1.3.6 HEALTH AND SAFETY METRICS

HEALTH AND SAFETY MANAGEMENT SYSTEM COVERAGE, WORKPLACE ACCIDENT INCIDENTS AND STAFF HEALTH PROBLEMS

	2025	2024
Percentage of workforce covered by the health and safety management system (%)	94.76%	93.50%
Number of deaths due to work-related accidents or illnesses	0.00	1.00
Number of workplace accidents	591.00	592.00
Frequency rate: number of accidents per 1,000,000 hours worked	4.28	4.35
Number of cases of work-related illness	17.00	11.00
Number of days of absence due to work-related accidents and illnesses	12,502.00	13,330.00
Severity rate: number of days lost due to work-related accidents and illnesses per 1,000 hours worked	0.09	0.10

Scope covered: 100%.

In this table, the metrics relating to the “percentage of workforce covered by the health and safety management system”, the “frequency rate” and the “severity rate” cover all employees (active and inactive) on permanent contracts and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in terms of natural persons at 31 December 2024 and 2025. The other metrics (number of deaths, number of workplace accidents and number of cases of work-related illness) are expressed in number of cases recorded over the period (2024 and 2025).

Definitions:

- **Days of absence:** in working days. The number of days lost is calculated by including the first and last full days of absence. Only calendar days should be taken into account: days on which the person concerned is not expected to work (e.g. weekends, public holidays) are therefore not counted as lost days.
- **Work-related accidents rejected by the MSA/Social Security (France):** if the work-related accident has been rejected by the MSA/Social Security and there is no appeal, it is not included in the statistics. On the other hand, if the MSA/Social Security has not yet made a decision or if the MSA/Social Security's decision to reject the claim is contested, the work-related accident is included in the statistics because it has in fact been declared.

ABSENTEEISM

	2025	2024
Absenteeism rate – Illness (excluding work-related illness)	2.73%	2.25%
Absenteeism rate – Work-related/commuting accidents and work-related illnesses	0.09%	0.09%
Absenteeism rate – Maternity, paternity, breast-feeding	1.17%	1.16%
Absenteeism rate – Authorised leave	0.43%	0.42%
Absenteeism rate – Other reasons ⁽²⁾	0.09%	0.10%
OVERALL ABSENTEEISM RATE	4.50%	4.02%
ABSENTEEISM RATE EXCLUDING MATERNITY, PATERNITY, BREAST-FEEDING ⁽¹⁾	3.33%	2.86%

(1) Metric monitored as part of the “Ambitions 2025” MTP.

(2) Unauthorised absences.

Scope covered: 100%.

This table shows absenteeism in calendar days among employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), during the period (2024 and 2025). The formula used to calculate the overall absenteeism rate is: average number of days absent per item/365.25 days.

For further information on the actions implemented with regard to employee health, please refer to part 3.1.2.4 “Working environment policy”, and more specifically the section “Content and action plans”, “1. Health in the workplace” of this report. Measures relating to parenthood are available in part 3.1.2.4 “Working environment policy”, and more specifically the section “Content and action plans”, “3. Work/life balance” of this report.

3.1.3.7 COMPENSATION METRICS

GENDER PAY GAP

	Employee categories	2025		
		Pay gap	Female employees	Male employees
Total Crédit Agricole S.A.		31.68%	52.40%	47.60%
Retail Banking in France	Total	13.92%	60.30%	39.70%
	<i>O/w managers:</i>	<i>10.01%</i>		
	<i>O/w non-managers:</i>	<i>0.58%</i>		
International Retail Banking		26.87%	54.70%	45.30%
Asset Gathering		26.43%	45.90%	54.10%
Large Customers division		31.69%	44.70%	55.30%
Specialised Financial Services		22.77%	56.00%	44.00%
	Employee categories	2024		
		Pay gap	Female employees	Male employees
Total Crédit Agricole S.A.		32.50%	52.90%	47.10%
Retail Banking in France	Total	13.80%	60.90%	39.10%
	<i>O/w managers:</i>	<i>9.90%</i>		
	<i>O/w non-managers:</i>	<i>0.80%</i>		
International Retail Banking		27.70%	54.70%	45.30%
Asset Gathering		27.90%	46.60%	53.40%
Large Customers division		32.90%	45.20%	54.80%
Specialised Financial Services		22.90%	56.20%	43.80%

Scope covered: 100%.

These tables cover all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), excluding entities in the process of being sold, at 31 December 2024 and 2025. The metrics are expressed as a gap percentage. The compensation taken into account in this calculation includes fixed annual compensation (FAC), individual variable compensation (IVC) and collective variable compensation (CVC), as well as recurring bonuses. For part-time employees, the gross annual wage paid over the year has been adjusted to 100% (full-time equivalent).

The calculation formula used is: (Average gross annual compensation level for male employees – average gross annual compensation level for female employees)/Average gross annual compensation level for male employees x 100.

The gender pay gap within Crédit Agricole S.A. was 31.68% in 2025. This gap is mainly due to the difference in gender distribution in the main business lines. We find a higher proportion of women in the Retail Banking and Specialised Financial Services business lines, where absolute pay levels are generally lower than in other business lines in the financial industry. By contrast, we find a higher proportion of men in the banking business lines dedicated to Large Customers and to Asset Gathering, where absolute pay levels are higher than in the previously mentioned business lines.

In Crédit Agricole S.A.'s French retail banking division, the pay gap was 13.92% in 2025.

Definitions:

- **Fixed annual compensation (FAC):** corresponds to the theoretical gross annual wage paid over the year.
- **Individual variable compensation (IVC):** corresponds to compensation linked to the employee's individual performance, such as bonuses, sales commissions or other variable target-based elements.

- **Collective variable compensation (CVC):** corresponds to collective variable compensation (profit-sharing, incentives, matching contributions) paid during the year in respect of the previous year to employees present at the end of the period.

For further information on the actions implemented with regard to employee compensation, please refer to part 3.1.2.5 "Performance and compensation policy", and more specifically the section "Content and action plans", "1. Compensation" of this report.

COMPENSATION RATIO

	2025	2024
Ratio of the remuneration of the highest-paid person to the median remuneration of employees	44.61	48.60

Scope covered: 100%.

This metric covers all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), excluding entities in the process of being sold, at 31 December 2024 and 2025. The metric is expressed as a gap ratio. The compensation taken into account in this calculation includes fixed annual compensation (FAC), individual variable compensation (IVC) and collective variable compensation (CVC). For part-time employees, the gross annual wage paid over the year has been adjusted to 100% (full-time equivalent). The median annual total remuneration of all employees excludes the highest-paid person.

The calculation formula used is: (gross fixed wage + individual variable + collective variable of the highest-paid person)/median annual total remuneration (FAC+IVC+CVC) of all employees (permanent and fixed-term contracts, excluding executive corporate officers and the highest-paid person).

The ratio between the highest and median pay of employees at Crédit Agricole S.A. is 44.61 to one. Crédit Agricole S.A. is the listed entity, the parent company for all the Group's business line subsidiaries and the corporate centre of Crédit Agricole Group. This ratio reflects a moderate compensation policy. Details of the

equity ratios for Crédit Agricole S.A.'s executive corporate officers, as provided for in the PACTE law, are presented in Chapter 3, part 4.4.3.4 "Comparative approach to compensation" of the Universal Registration Document.

MONTHLY AVERAGE GROSS BASE SALARY (FRANCE)

	2025	2024
Average monthly wage (in euros)	4,880	4,765
Women	4,345	4,237
Men	5,512	5,401
Managers	5,483	5,386
Women	4,982	4,882
Men	5,966	5,878
Non-managers	2,888	2,836
Women	2,885	2,839
Men	2,896	2,828

Scope covered: France (i.e. 47% of employees).

The average monthly wage is the sum of monthly wages divided by the number of employees on permanent contracts present at the end of the year. This table covers active employees on permanent contracts (including executive corporate officers, excluding Directors), expressed in natural persons, in France at 31 December 2024 and 2025. It distinguishes between manager and non-manager wages.

For further information on the actions implemented with regard to equal pay, please refer to part 3.1.2.5 "Performance and compensation policy", section "Content and action plans", "2. Gender equality at work in terms of compensation" of this report.

ADDITIONAL INFORMATION ON COMPENSATION

	2025	2024
Percentage of women among the top 10% of highest-earning employees in each subsidiary (fixed compensation) (%)	29.70%	29.40%
Collective variable compensation: profit-sharing		
Overall amount (in thousands of euros)	71,243.24	73,034.00
Average amount (in euros)	2,295.00	2,370.00
Number of beneficiaries	31,043.00	30,821.00
Collective variable compensation: incentives		
Overall amount (in thousands of euros)	237,763.20	221,339.00
Average amount (in euros)	5,287.00	5,039.00
Number of beneficiaries	44,971.00	43,924.00
Employer's additional contribution		
Overall amount (in thousands of euros)	68,448.20	61,301.00
Average amount (in euros)	1,886.00	1,742.00
Number of beneficiaries	36,299.00	35,197.00

Scope covered: 100%.

This table presents various metrics relating to compensation. It covers active and inactive employees on permanent contracts (including executive corporate officers, excluding Directors) in France only, expressed in natural persons at 31 December 2024 and 2025.

With regard to the percentage of women among the top 10% of highest-earning employees, this metric covers active employees on permanent contracts (including executive corporate officers, excluding Directors), expressed in natural persons at 31 December 2024 and 2025.

In addition, an annual offer to subscribe to Crédit Agricole S.A. share capital is made to Group employees and retirees in 23 countries, representing more than 90% of Crédit Agricole Group employees.

For more information on the measures implemented with regard to employee compensation, please refer to part 3.1.2.5 "Performance and remuneration policy", subsection "Content and action plans", "1. Compensation" of this report.

3.1.3.8 INCIDENTS, COMPLAINTS AND SEVERE HUMAN RIGHTS IMPACTS**WORK-RELATED HUMAN RIGHTS INCIDENTS AND SANCTIONS WITHIN THE WORKFORCE**

	2025	2024
Total number of reported incidents of discrimination and harassment (proven or unproven)	175	118
Number of complaints and claims filed concerning working conditions, equal treatment and opportunities for all, and other work-related rights, excluding incidents of discrimination and harassment	95	74
Through channels that allow the corporate workforce to raise concerns/complaints	95	74
Through National Contact Points for the OECD Guidelines for Multinational Enterprises	0	0
Total amount of fines, penalties and compensation paid for damages resulting from the complaints and claims described above	372,223	770,251
Of which the amount relates to incidents that have occurred	0	0
Reconciliation with the most relevant amount presented in the financial statements (Employee expenses included in the “Operating expenses” and detailed in the “Notes to the financial statements” of Chapter 6 of the URD pertaining to the consolidated financial statements of the 2025 URD)	10,270,000,000	9,657,000,000
Number of serious human rights incidents affecting the corporate workforce	0	0
Of which, number of cases of non-compliance with the UN Guiding Principles on Business and Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, or the OECD Guidelines for Multinational Enterprises	0	0
Total fines, penalties and compensation paid for serious human rights issues and incidents	0	0
Of which the amount relates to incidents that have occurred	0	0
Reconciliation with the most relevant amount presented in the financial statements (Employee expenses included in the “Operating expenses” and detailed in the “Notes to the financial statements” of Chapter 6 of the URD pertaining to the consolidated financial statements of the 2025 URD)	10,270,000,000	9,657,000,000

Scope covered: 100%.

Only incidents and complaints that have been investigated are included in this table, via multiple sources (dedicated tool, litigation, dedicated contact persons, HR department, etc.).

Only the amounts for definitively completed projects are shown here.

Definition of “serious incidents recorded”: incidents of discrimination, harassment or human rights violations (e.g. forced labour, human trafficking or child labour). These incidents are the result of legal proceedings, formal complaints or serious allegations concerning

the corporate workforce (permanent employees, fixed-term employees and interns, excluding contractors/purchasers), the circumstances of which the undertaking does not contest by any means whatsoever (press release, litigation, etc.). These incidents must have a strong impact in terms of image/reputational risk for the entity and come from an external source (e.g. public reports, press articles, TV broadcasts, a complaint filed against the entity by an advocacy association, etc.).

OUR CUSTOMERS

Social utility and universality, two core values for Crédit Agricole, are reflected in the Group's social strategy towards its customers.

Our responsibility towards our customers is based on three pillars:

- products and services that everyone can access;
- protection of customers and their personal data;
- cybersecurity.

EXAMPLES OF CUSTOMER-RELATED IROS ⁽¹⁾

Positive impact

- Offers for people who are economically disadvantaged or with disabilities

Risk

- Reputational in the event of theft of personal data

Negative impact

- On customers in the event of a cyber attack

POLICIES AND ACTION PLANS

Examples of policies

- Accessibility of products and services
- Personal data protection
- Customer protection

Examples of action plans

- Support for people who are economically disadvantaged or with disabilities
- Structuring for products and services for young people
- Raising awareness and promoting a culture of cyber risk among employees

This table is for illustrative purposes only and is not intended to replace the information contained in the sustainability report.

3.2. CONSUMERS AND END-USERS

3.2.1 STRATEGY

At the heart of Group Crédit Agricole's business model since it was founded, utility and universality are now essential values in an environment of profound societal changes that generate uncertainty and require support and inclusion for all. These commitments are reinforced in the ACT 2028 medium-term strategic plan, which aims in particular to amplify our impact in order to support regional vitality and a just transition.

This part addresses two main themes: the accessibility of offers to all customers, and the protection of customers and their data.

The societal benefits that underpinned Crédit Agricole Group's emergence as a major financial institution have been particularly obvious in recent years. Whether it is by supporting all customers during the health crisis or in the unsettled context of inflation, Crédit Agricole S.A. stands by its customers and supports them at every stage of their lives.

At the same time, the universality of Crédit Agricole Group, based on its cooperative and mutualist values, means that it serves everyone, in every region, and responds to all the financial concerns of its customers through all channels.

As a result, the Group, through all of its subsidiaries, offers all its products and services to all its customer segments so that all players in the economy and the regions are assisted and supported in current and future transformations.

This combination of social utility and universality is reflected in the social strategy that Crédit Agricole S.A. has adopted with regard to its customers:

1. **offering a range of products that does not exclude any customer** in order to promote social and financial inclusion, through products that are accessible to everyone no matter their financial situation, the continued digitisation customer journeys with a view to achieving omnichannel capabilities, a renewed commitment to young people and customers facing difficult circumstances, as well as a avoidance policy for insured persons;
2. **reducing social inequalities** through the arrangement of social bonds and investment in social housing, the support of actors with an impact from the social and solidarity economy and the promotion of initiatives with a societal stake.

The accessibility of products is an integral part of the Group's strategy and is in line with commitment number 4 of the Societal Project: Offer a range of products and services that do not exclude any customer, in order to foster social and digital inclusion and adapt to economic and societal trends.

At the same time, the Crédit Agricole Group strives to protect its customers and their legitimate interests through a transparent and fair relationship and advice focused on customer needs and satisfaction. The Compliance department is implementing these ambitions through the "Smart Compliance for Society" approach and its three pillars: the Societal Project, the Customer Project and the Human Project. In particular, the Customer Project contributes to the protection of customers and their data.

The customer protection and personal data protection systems are described in part 3.2.2.3 "Protection of customers and personal data".

3.2.1.1 INTERESTS AND VIEWS OF CONSUMERS AND END-USERS

It is crucial for Crédit Agricole S.A. to place customer relations at the heart of its banking processes. The Customer, Development and Innovation division is responsible for ensuring that this dialogue takes place and that its results underpin Crédit Agricole S.A.'s strategic approach.

This dialogue is based on systems implemented with a representative sample of customers from all markets: individual customers, high-net-worth individuals, SMEs, farmers and undertakings. It is conducted directly with the end consumers concerned or their legitimate representatives. The overall stakeholder engagement mechanism is described in part 1.3.2 "Interests and views of stakeholders". The diversity of the channels used and their regular implementation make it possible to assess the effectiveness of the dialogue.

These discussions enable Crédit Agricole Group to identify customer issues and expectations so that it can respond to the questions raised and follow up on them. The Group's responses are detailed in part 1.3.2 "Interests and views of stakeholders" of this report. Customer requests are taken into account in the development of Crédit Agricole S.A.'s strategy.

As mentioned in part 1.3.2 "Interests and views of stakeholders", Crédit Agricole S.A. has implemented several consultation and participation mechanisms to take its customers' interests and views into account in its decisions and activities:

- **monitoring customer satisfaction** measured by the Net Promoter Score (NPS): an annual satisfaction survey designed to reinforce relational excellence by identifying and dealing with the main reasons for customer complaints or inconveniences;
- **taking customer expectations into account** (barometers, marketing studies, co-construction workshops):
 - regular national and regional surveys: a national survey is conducted every two years to identify changes in customer expectations and the appearance of any new expectations or the evolution of those previously considered "weak signals";
 - conducting an annual CSR barometer survey of around 2,500 customers and non-customers to identify French people's concerns and expectations in terms of CSR and assess the impact on the perceived commitment of undertakings,
 - "Voix du Client" (Voice of the Customer) system within Crédit Agricole Assurances, designed to manage the resolution plan for all customer inconveniences identified,
 - proactivity and frequency of regular contact in order to maintain a close, human relationship with customers;
- **development of an innovation ecosystem** (Data Lab, management companies specialising in innovation, Lab Impact by LCL, LCL co-tenant of Climate House).

Channels dedicated to whistle-blowers and related policies are discussed in part 4.1.4.4 "Protection of whistle-blowers".

3.2.1.2 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH THE STRATEGY AND BUSINESS MODEL**SIGNIFICANT ACTUAL AND POTENTIAL IMPACTS, RISKS AND OPPORTUNITIES FOR CONSUMERS AND END-USERS**

Description of IROs	Positioning in the value chain	Time horizon
ACCESSIBILITY OF PRODUCTS AND SERVICES		
Positive impact		
– Positive impact on the economically disadvantaged and/or people with disabilities due to accessible and inclusive offerings	Downstream	Short-term
Negative impacts		
– Negative impact on certain categories of customers due to a lack of transparency and clarity in offerings (leading to exclusion and financial insecurity for the customers concerned)	Downstream	Short-term
– Negative impact on certain categories of customers caused by unsuitable offerings and/or the refusal of customer requests (exclusion, precariousness)	Downstream	Short-term
CYBERSECURITY AND COMBATING CYBERCRIME		
Negative impact		
– Negative psychological impact or impact on daily life (such as identity theft) resulting from a breach of our customers' data protection	Downstream	Long-term
Risk		
– Financial risk following an inability to provide essential services and the associated operational cost to remedy the situation	Downstream	Long-term
CUSTOMER PROTECTION		
Positive impact		
– Positive impact on society related to products and services that are adapted to customer needs and circumstances (banking inclusion, product governance), contributing to social cohesion	Downstream	Medium-term
Risk		
– Regulatory risk related to products and services that are insufficiently adapted to customer needs and circumstances (banking inclusion, product governance)	Downstream	Medium-term
PERSONAL DATA PROTECTION		
Risks		
– Reputational risk in the event of leaks, theft or inappropriate use of personal data	Entire value chain	Medium-term
– Regulatory risk related to non-compliance with personal data protection regulations	Entire value chain	Medium-term

Consumers and end-users on whom the undertaking is likely to have material impacts are taken into account in ESRS 2 as “customers”. Crédit Agricole S.A. customers include notably individuals, SMEs, entrepreneurs, corporates, associations and local authorities.

The impacts, risks and opportunities are linked to Crédit Agricole S.A.'s business model, in particular through:

- the need for the Group to fully assume its mutual-interest and universal banking role by making its products and services accessible to the most vulnerable people;
- the competitive advantage that improving the image of Crédit Agricole S.A. represents in social issues;
- the legal obligation to protect customers and their personal data.

Certain customer segments are identified as more vulnerable, such as the financially vulnerable, the young, and the elderly.

These customers may be exposed to specific negative impacts, particularly in terms of personal data protection, non-discrimination, or when they do not have clear and accessible information about products and services, which may lead to inappropriate or high-risk use.

Taking into account the potential negative impacts on certain categories of customers due to a lack of clarity or unsuitable offers is a major challenge for the Crédit Agricole Group, a mutual and cooperative organisation. With tens of thousands of customers potentially affected, particular attention is therefore paid to entry-level products and services in line with Crédit Agricole S.A.'s strategy and existing regulations.

The distribution of services can generate material positive impacts, as illustrated by inclusive solutions such as the Passerelle solidarity space, designed to support customers who are experiencing financial difficulties.

3.2.1.2.1 SCOPES OF APPLICATION

For part 3.2.2.1 “Accessibility of products and services”:

Entities concerned	<ul style="list-style-type: none"> – Crédit Agricole Assurances – Crédit Agricole Italia – LCL – Crédit Agricole Personal Finance & Mobility – Amundi
Stakeholders affected	<ul style="list-style-type: none"> – Individual customers – SMEs – Corporate customers – Farming customers
Geographical scope	– International
Exclusion	N/A
Additional details	<ul style="list-style-type: none"> – To assess the negative impact, the Company relied on the reports of the French Banking Inclusion Observatory (<i>Observatoire de l'inclusion bancaire</i> – OIB) on the risk of financial exclusion of people in a vulnerable situation, and on the Charter for banking inclusion and preventing overindebtedness (<i>Charte d'inclusion bancaire et de prévention du surendettement</i>). – Customers experiencing financial difficulties receive special attention when it comes to access to essential banking services (see in part 3.2.2.1 “Accessibility of products and services” the section dedicated to “Offer a range of products and services that do not exclude any customer and strengthen social cohesion” and more particularly “Support for vulnerable populations and prevention of overindebtedness”).

For part 3.2.2.2 “Cybersecurity and combating cybercrime”, information on the scope of application can be found in the dedicated sub-section.

For part 3.2.2.3 “Protection of customers and personal data”:

Entities concerned	– Crédit Agricole Group
Stakeholders affected	<ul style="list-style-type: none"> – Employees of Crédit Agricole – Customers
Geographical scope	– International
Exclusion	N/A
Additional details	<ul style="list-style-type: none"> – The regulatory framework for the protection of customers and personal data is implemented by the Group through policies that apply to all subsidiaries of Crédit Agricole S.A. and to Crédit Agricole Regional Banks. – The customer protection policy applies to the “Financing”, “Investment” and “Insurance” elements of the value chain, on the downstream side it concerns customers. – The personal data protection policy applies to the entire value chain and downstream to customers, employees and suppliers. – Employees of the Crédit Agricole Group are directly concerned by the system. Indirectly, the downstream chain is affected, as well as civil society.

3.2.1.2.2 FRAMEWORKS AND REFERENCES

Crédit Agricole S.A.’s social strategy contributes to compliance with the following regulatory frameworks:

- UN Guiding Principles on Business and Human Rights;
- ILO Declaration on Fundamental Principles and Rights at Work;
- OECD Guidelines,

and thus takes into account issues related to human rights.

Crédit Agricole S.A. has not had any cases of non-compliance with these principles in the past. Crédit Agricole S.A. is a signatory to the United Nations Global Compact and responds annually to its “Communication on Progress” questionnaire, which covers, among other things, all issues relating to undertakings and human rights. Crédit Agricole S.A. also responds to the Workforce Disclosure Initiative on the transparency of its commitments in terms of working conditions and human rights.

Through its products and services for vulnerable customers and by making entry-level products and services available, Crédit Agricole is helping to respond to several fundamental rights discussed in the above-mentioned documents such as the right to access to the healthcare system and the right to an adequate standard of living.

To protect its customers, Crédit Agricole S.A. complies with various regulatory and internal frameworks:

- **regulatory framework:** legislative, regulatory and professional obligations on the protection of customers are divided into four pillars (Quality of products and services, Transparency, Loyalty and Listening to customers). They stem from international regulations (e.g. Dodd Frank Act), European regulations (e.g. MiFID II, IDD, PSD2, etc.), national regulations (e.g. the right to banking services) or market commitments (e.g. customers experiencing financial difficulties);
- **customer protection standards:** to respect its obligations on customer protection, the Group has adopted a dedicated body of standards. These standards apply to Crédit Agricole Group as a whole on issues such as access to a bank account or the right to banking services, the processing of payment transactions disputed by customers, financial savings, insurance and the complaints system. They go hand in hand with core controls associated with each theme, which apply to the entire Crédit Agricole Group;

- **Code of Ethics:** the Code of Ethics expresses the Crédit Agricole Group's commitments to a behavioural approach driven by its values and principles for action vis-à-vis its customers. It expresses the Group's determination to do even more to provide the best possible service to its customers. In practical terms, this means promoting respect and support for customers and showing them loyalty, helping them to make decisions by proposing solutions tailored to their profile and interests, while informing them of the associated risks;
- **roles and responsibilities:** customer protection is everyone's responsibility, as specified in the Group's Code of Ethics. This involves compliance by all employees and executives with the rules and principles on customer protection and vigilance in their decision-making and daily actions.

In terms of **personal data protection**, the Group complies with various regulatory and internal frameworks:

- **regulatory framework:** the Crédit Agricole Group applies the European General Data Protection Regulation (GDPR), which came into force in 2018;
- **implementation:** to ensure respect for the rights and freedoms of individuals whose personal data is processed, the Crédit Agricole Group has set up a system based on the **following four pillars:** "Governance", "Standards", "Training" and "Control" (see part 3.2.2.3 "Protection of customers and personal data");
- **roles and responsibilities:** this system is overseen by the **Data Protection Officers** appointed within each entity who present an annual report on their activities to the most senior manager in their department, and then send it to the Group Compliance department.

3.2.2 POLICIES AND ACTION PLANS

Through the Group's Societal Project, Crédit Agricole S.A. has put in place a social strategy aimed primarily at (1) offering a range of products and services that do not exclude any customer. In addition, the Customer Project contributes to (2) the protection of customers and personal data.

Specific policies are applied to manage the impacts, risks and opportunities linked to these two aspects:

The action plans implemented on themes related to the accessibility of products and services and the protection of customers and personal data are ongoing and do not therefore have any time-bound milestones marking an end to the actions undertaken. These themes are monitored at the level of Crédit Agricole S.A.'s Governance (see parts 1.2.1 "Board of Directors" and 1.2.2 "Executive Governance").

3.2.2.1 ACCESSIBILITY OF PRODUCTS AND SERVICES

3.2.2.1.1 OFFER A RANGE OF PRODUCTS AND SERVICES THAT DO NOT EXCLUDE ANY CUSTOMER AND STRENGTHEN SOCIAL COHESION

Through a range of accessible and inclusive products and services, the Crédit Agricole S.A. is committed to supporting people who are economically disadvantaged and/or disabled. This is reflected in five principles:

1. access for all to offers and services;
2. support for vulnerable populations and prevention of overindebtedness;
3. a commitment to young people;
4. improving access to care and support for ageing;
5. supporting high-impact players promoting social cohesion.

ACCESS FOR ALL TO OFFERS AND SERVICES

To avoid certain customers finding themselves in a vulnerable situation and to protect them, LCL offers simple, clear and transparent products and services specifically for:

- individual customers (with LCL Essentiel offerings);
- SMEs (EKO Pro, LCL Essentiel Pro and Propulse offerings);
- customers with disabilities (accessibility of customer service numbers and digital channels; accessibility of the insurance claims management platform);

- insured persons (comprehensive approach to risk prevention and supporting individual customers, professionals, farmers and corporates to preserve their personal assets or their business assets/activity).

SUPPORT FOR VULNERABLE POPULATIONS AND PREVENTION OF OVERINDEBTEDNESS

Crédit Agricole S.A.'s support for all customers involves preventing overindebtedness and supporting vulnerable populations through:

- mechanisms designed to support customers experiencing financial difficulties (*Compte à Composer Budget Protégé* offer, customer support agency, LCL Initial);
- mechanisms for early detection of a potential financial difficulty;
- improving methods and broadening criteria for identifying situations of financial vulnerability, in particular by raising the monthly income threshold annually. This allows many more customers to benefit from limited bank charges;
- a comprehensive approach to helping farming customers in times of need (*Coups Durs Pro/Agri*);
- LCL'Aide, which helps combat economic violence by offering a simplified account opening process, support from a dedicated team, a debit card with systematic authorisation and exemption from account maintenance fees;

- support for entrepreneurs facing mental strain (mental fatigue, isolation, difficulty balancing work and personal life, etc.) with Care Entrepreneurs offered by LCL.

A RENEWED COMMITMENT TO YOUNG PEOPLE

LCL is committed to young people, offering them a range of products and services to help them achieve their projects according to their needs:

- everyday needs (LCL Jeune Actif, including preferential rates on certain bank cards; LCL Étudiant, for preferential rates on cards for students, with some cards even free of charge; LCL Flex, instant mini-loans at special rates, available without proof of income; an increased *Livret Jeune* savings account rate of 3.40% since 1 February 2025; driving licence loans at €1 per day);
- housing (Entre2Loc from LCL; rental insurance specifically for young tenants);
- studies (association with the state-guaranteed student loan scheme with Bpifrance; LCL x Interfimo studies solution for students aiming toward a self-employed career).

IMPROVING ACCESS TO CARE AND SUPPORT FOR AGEING

Access to healthcare and healthy ageing are major societal concerns in France. Crédit Agricole S.A. is investing in various areas in order to meet these major challenges:

- supporting independent professionals and healthcare employees, both medical and paramedical (Paymed One billing and collection solution; Interfimo Profession Libérale loan with €3,363 million granted in 2025, a housing loan offer for interns and heads of health clinics; a refinancing package of €400 million signed in 2024 in partnership with the European Investment Bank to promote business start-ups and an increase in the number of women in the health professions, of which €244 million was contractualised or reserved in 2025);

- home care (home adaptation loans, home adaptation assistance loans; Sofinco's next area of development is adapting homes for healthy ageing, which will aim to offer solutions tailored to residents' new needs);
- retirement (supplementary professional retirement fund).

Crédit Agricole Santé & Territoires, an entity created in 2023, is a provider of solutions designed to facilitate access to healthcare and support the ageing population in different regions. A subsidiary of the Crédit Agricole Group, Crédit Agricole Santé & Territoires aims to structure and amplify service offerings in the healthcare sector. Crédit Agricole Santé & Territoires offers pragmatic solutions to two major societal challenges:

- facilitating access to healthcare in all regions as part of care pathways and the principle of territoriality (development of telemedicine, support for new forms of medical practice, establishment of healthcare facilities in medical deserts, etc.);
- supporting the ageing population in terms of both home care services and non-medical accommodation.

SUPPORTING HIGH-IMPACT PLAYERS AND INVESTMENT SOLUTIONS PROMOTING SOCIAL COHESION

Crédit Agricole S.A. supports high-impact players in different areas:

- social housing (partnership with Action Logement, building project development aimed at creating social and inclusive housing for vulnerable people);
- social and economic development (Amundi Finance et Solidarité, LCL Impact Social et Solidaire, LCL Better World).

At the same time, Crédit Agricole S.A. also offers targeted financing (social loans) whose funds are allocated directly to an asset or project with a social benefit and issues social bonds as part of the Group's Social Financing Framework.

THE SOCIAL FINANCING FRAMEWORK FROM CRÉDIT AGRICOLE GROUP

The Framework put in place in 2020 for Crédit Agricole S.A.'s initial social bond issue was updated in 2025. It applies to all Crédit Agricole Group entities: Crédit Agricole S.A., Crédit Agricole Regional Banks, their subsidiaries and refinancing vehicles, including Crédit Agricole Home Loan SFH. Crédit Agricole Group social bonds are presented based on four structuring pillars defined by the Social Bond Principles (ICMA). The Social Financing Framework consists of six different eligible categories of social loans, some of which are new, such as education. It received a second opinion from the rating agency Moody's in November 2025. The experts at Moody's Ratings approved the methodology for identifying and selecting social assets included in the social portfolio, as well as the relevance of the eligibility criteria used to define the categories of eligible social loans.

RELiance ON PARTNERS DEDICATED TO SUPPORTING CREATORS/BUYERS

Crédit Agricole S.A. has relied on dedicated partners to enable as many people as possible to develop and secure their entrepreneurial project before they start, using a range of mechanisms (collateral-free loans, advice, coaching).

Every year, this collaboration results in the development of thousands of projects to stimulate the economic fabric of the regions and create jobs. Some of the major partners include:

- Initiative France offers to support entrepreneurs, upon application, by means of two distinct levers: financing through a 0% interest collateral-free loan and a guarantee (financed by a guarantee fund);
- *Réseau Entreprendre* is a network made up of business leaders who volunteer to support and finance entrepreneurs with job creation potential to help them successfully create, take over or grow their business via collateral-free loans and collective support in clubs;

- the purpose of France Active is to develop a more inclusive, sustainable economy and to promote access for project leaders to the creation (or rehabilitation) of companies with a social impact;
- ADIE supports and finances self-employed entrepreneurs through professional micro-loans.

SUPPORTING THE STAFF OF THE MINISTRY OF ARMED FORCES AND VETERANS

On 7 January 2026, Crédit Agricole announced a major partnership with the French Ministry of Armed Forces and Veterans. This national partnership aims to offer around 370,000 active members (military and civilian from the Ministry of the Armed Forces and gendarmes) attractive pricing advantages on a set of Crédit Agricole products: discounts on bank offers, preferential rates for home and consumer loans, insurance discounts, and personal services. It is fully in line with the Group's willingness to offer banking solutions to all and its long-standing commitment to national defense issues.

3.2.2.2 CYBERSECURITY AND COMBATING CYBERCRIME

3.2.2.2.1 STRATEGY

CONTEXT

Cybersecurity and IT risks (including resilience) are key issues that feature in the new “ACT 2028” Medium-Term Plan, which runs until the end of 2028. By managing these risks, the Crédit Agricole Group is affirming its position as a trusted player in the digital world. Its responsible data management and robust IT infrastructure help to ensure the protection of its own information and that of its customers. This new strategic plan is a continuation of Crédit Agricole S.A.’s “Ambitions 2025” plan, which already included a major technological dimension embodied in the “IT 2025” programme.

For several years, along with other major players in the banking and financial sectors, the Crédit Agricole Group has been confronted with a multi-sector cyber threat that could impact its IT system and that of its subcontractors. Aware of the challenges associated with digital security, Crédit Agricole Group deploys a cybersecurity strategy to protect itself against cyberthreats, which it has placed at the heart of its operational risk management priorities.

MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

Description of IROs	Positioning in the value chain	Time horizon
Negative impact		
– Psychological impact or impact on daily life (such as identity theft) resulting from a breach of our customers’ data protection	Downstream	Long-term
Risk		
– Financial risk following an inability to provide essential services and the associated operational cost to remedy the situation	Downstream	Long-term

FRAMEWORKS AND REFERENCES

The entire **Information Systems Security Regulatory Framework** consists of a set of documents structured around three levels:

- the **core policy** defines the principles of risk control related to an information systems security failure, and their implementation through security, organisational and operational measures. It is supplemented by several core procedures that outline the implementation of cross-cutting measures in the form of security rules. These documents constitute the core domain;
- each **domain policy** defines the security requirements specific to the domain’s theme;
- the **standards** outline the implementation of the domain policy, at operational or technical level.

3.2.2.2.2 GOVERNANCE

The Group’s Risk Appetite Statement, which is submitted each year to the Crédit Agricole S.A. Board of Directors for approval, includes key metrics relating to IT risk.

The **Group Security Committee**, at the Executive Management level, is the umbrella body for security governance within the Group. This decision-making committee defines the security strategy and assesses the Group’s level of control in the field of information systems security. The cybersecurity strategy and the level of threat protection it provides are reviewed regularly by the Crédit Agricole S.A. Board of Directors.

The internal control system, structured in three lines of defence, oversees the management of cyber-risk. The first line of defence, comprising the operational teams, includes a decentralised network of Chief Information Security Officers. This line is responsible for identifying the Group’s level of exposure to IT security risks and ensuring that it is kept within the set limits, taking into account the Group’s risk appetite and the information systems security policy measures.

The Group Risk department provides the second line of defence; it conducts continuous and independent monitoring at its own level by relying on a network of IT Systems Risk Managers, who report to the Head of Risk Management function of each Group company.

As a third line of defence, the Audit & Inspection business line, as part of its audit missions, checks the compliance of the information system with the security policy, as well as the level of IT risk control, and assesses the measures put in place by the first line and the second line of defence. In addition, Crédit Agricole Group has a cyber insurance policy that covers the financial impact of any attack on the information system and the loss of confidential data.

3.2.2.2.3 TARGETS

Crédit Agricole Group applies a range of IT security rules to protect its data and that of its customers, and to ensure the availability of IT systems.

The Information System Security Policy establishes a common framework for all stakeholders to meet the Group’s security targets.

3.2.2.2.4 SCOPES OF APPLICATION

The ISSP applies to all the undertakings included in the consolidated base surveillance scope of Crédit Agricole Group.

3.2.2.2.5 ACTION PLANS/SYSTEM

CONTROL AND MANAGEMENT

Security reviews, audits and tests are conducted periodically by the three lines of defence and external auditors to monitor the compliance and security of the information system.

The information system security control and management system relies on tools to assess and report on the Group’s level of control of information and communication technology (ICT) risks, including IT security risks (dashboard, especially control plan).

Lastly, Crédit Agricole Group has modelled its major cyber-risk scenarios to provide a risk-based view of the effectiveness of the security measures taken. These scenarios are reviewed regularly to incorporate new issues such as sovereignty.

Crédit Agricole has established an organisational structure and an Information Security business line consisting of experts. The Group security system relies on three operational entities:

- the CERT (Computer Emergency Response Team) is an outward-looking unit responsible for anticipating and responding to security incidents. Crédit Agricole Group's CERT is accredited by the TF-CSIRT and a member of FIRST;
- the CyberDefence Operational Centre designs and operates security, prevention, surveillance, backup and remediation systems;
- the SOC (Security Operation Centre) operates internal surveillance on the data centre and IT networks hosted entirely in France.

CYBER RISK AWARENESS AND CULTURE

Crédit Agricole Group actively raises its employees' awareness of cyber threats to remind them of the issues associated with individual habits and to ensure they maintain key reflexive responses. Awareness-raising is based on various communication channels (guides, training, targeted actions and themed exercises). Awareness-raising activities aimed at customers are also carried out regularly.

INFORMATION SYSTEM SECURITY POLICY (ISSP)

The ISSP is part of the overall framework established the Risk Management procedural note related to ICT and the Crédit Agricole Group's business continuity plan policy, which are issued by the Group Risk department. The ISSP is revised annually and incorporates the issues of availability, integrity, confidentiality and resilience of the Group's information systems and the main provisions of the Digital Operational Resilience Act (DORA). It defines the major principles of risk control, and their implementation through security, organisational and operational measures. It is supplemented by procedures and standards aimed at facilitating operational application. The regulatory framework is published on the Crédit Agricole Group Intranet. The General Digital Operational Resilience Strategy complements the regulatory framework for ICT operational risk management.

DORA COMPLIANCE

As part of compliance with the Digital Operational Resilience Act (DORA), monitoring of outsourced ICT services has been strengthened as part of a continuous improvement process.

Crédit Agricole Group is rolling out a tool for the ongoing assessment of the cybersecurity of suppliers integrated into the purchasing and management processes.

PROTECTION OF THE INFORMATION SYSTEM AND DATA

Access to the IT system is restricted to authorised users who have been authenticated (strong or multi-factor authentication) and with secure equipment (hardening of configurations). Information system partitioning is in place to protect our assets and data against cyber threats (isolation of administration environments, partitioning following the criticality of systems in particular). Data is classified and protected according to its sensitivity, including by encryption.

The security of IT outsourcing is analysed before contractualisation, governed by contractual clauses and supervised throughout the duration of the service. Rights to audit security are exercised.

OPERATION AND DEVELOPMENT

The IT project methodologies in place identify the risks and means of managing the security of systems and data upstream of their development in house or their purchase.

The operation of the IT system is regulated by procedures. IT System vulnerabilities are corrected in timely manner proportional to their level of risk.

CYBER INCIDENTS AND BUSINESS CONTINUITY PLAN

Detection and response measures are in place to identify all security risks, including attempts to extract data, and take appropriate action.

Crédit Agricole Group implements a comprehensive set of tests covering cybersecurity and resilience risks on an individual or overall basis.

The IT system is designed to meet the resilience targets required by the business lines and documented in their Business Continuity Plans (BCP). Solutions are implemented and tested against various scenarios involving IT system unavailability, whether the cause is logical or physical (including workstations), accidental or malicious.

3.2.2.3 CUSTOMER PROTECTION

Customer protection is an affirmed priority of Crédit Agricole Group. It is an integral part of the "Excellence in customer relations" and "Societal commitment" aspects of the Group Project which has three pillars: Customer Project, Human Project and Societal Project.

In terms of customer protection, the Compliance department leads work groups aimed at strengthening loyalty vis-à-vis customers (product governance).

Crédit Agricole S.A.'s aim is to protect customers and their legitimate interests through an approach based on the following systems:

- a **monitoring system** to identify future regulations and anticipate operational applications within the Group;
- the **operational application** of legislative, regulatory and professional obligations. For example:
 - taking the customer's situation into account in the marketing of savings products,
 - supporting customers in financial difficulty with tailored solutions (e.g. capping of fees, specific offer based on continuous pricing, financial education, guidance towards specialised structures, etc.);
- a **Product Governance system** governed by a body of procedures and controls defined by the Compliance department, with responsibility for implementation held by the entities. Product governance is aimed at ensuring the quality of the products and services offered to all customers through the marketing of tailored solutions while establishing an exchange of information between the producers and distributors of these products and services. The relevance of the offering is assessed through the identification of target customers and non-compatible customers, the clarity of documentation, the transparency of pricing and issues addressed (e.g. fight against money laundering and terrorist financing, ethics, ESG, taxation). The NAP (new products, new services, new activities) Committee studies files of new offerings and services before they are released onto the market and oversees their regular review. This committee's analysis of ESG issues ensures that ESG risk and customer protection are taken into account in the design of products;
- a **coordination and training system** for employees to promote the culture of customer protection;
- a **control system** overseeing the proper implementation of the standards;
- reports are submitted regularly to Crédit Agricole S.A.'s regulatory authorities (e.g. questionnaires on customer protection and commercial practices are sent to the APCR and the annual control report of Investment Service Providers in France is sent to the AMF).

3.2.2.4 PERSONAL DATA PROTECTION

The Crédit Agricole S.A. entities process the personal data of many stakeholders: customers, prospective customers, employees, candidates, administrators, providers, Internet users, etc.

To ensure that the rights and freedoms of individuals whose data is processed are respected, the Crédit Agricole S.A. entities have set up a system based on the following four pillars: “Governance”, “Standards”, “Training” and “Control” which are supervised by the Data Protection Officers (DPOs) appointed within each entity. In addition, the specific policies of each entity are published on their respective websites.

- The **“Governance” pillar** involves integrating the issue of personal data protection into the Group committees with respect to the roll-out of new products, new services and new activities (“NAP Committees”), the use of cloud-based IT services, or simply new data uses.
- The **“Standards” pillar** includes a section on personal data protection, updated at the beginning of 2023, which applies to all Crédit Agricole S.A. entities subject to the GDPR. The Group Compliance department monitors the implementation of this policy within the entities.
- The **“Training” pillar** helps Crédit Agricole Group employees to process personal data in compliance with the Standards. A

comprehensive and multi-faceted training programme. This programme includes mandatory training for all employees who are regularly exposed to the processing of personal data, special training to enhance the skills of DPOs, and awareness-raising sessions for specific business lines.

- The **“Control” pillar**: compliance with the rules set out in the Crédit Agricole S.A. standards is subject to integrated controls. The results of these checks are reported to the Group Compliance department every six months.

REQUESTS FOR THE EXERCISE OF RIGHTS RECEIVED BY GROUP ENTITIES

The Group Compliance department conducts an inventory every six months for Crédit Agricole Group of the number of requests for the exercise of rights received by the entities. These rights are understood to be those specified in the GDPR framework: access, rectification, deletion, limitation, opposition and portability.

The data reported by the entities undergoes consolidation, control and validation by the Group Compliance department.

	2025	2024
Number of requests for the exercise of rights received by Group entities	55,367	81,680

3.2.3 METRICS AND TARGETS

Crédit Agricole S.A. measures the effectiveness of its policies and actions using metrics, including:

- monitoring metrics at entity level to monitor its social impact;

- metrics linked to Crédit Agricole S.A.’s financing dedicated to social inclusion;
- monitoring metrics for social bonds issued.

IMPACT-MONITORING METRICS AND TARGETS

	Unit	2025	2024	Target value by 2030	Entity concerned
Number of customers in vulnerable situations supported	Number	124,125	99,934	60,000	LCL, CAPFM
Number of customers supported through a subscription to the entry-level offers	Number	190,475	183,569	300,000	LCL
% of indexed loans (with ESG criteria)	%	18%	14%		LCL

The metrics only relate to the scope of the entity indicated in the right-hand column.

INDICATORS RELATED TO FINANCING OF TRANSITIONS

	2025	2024
TOTAL FINANCING OF SOCIAL INCLUSION (in millions of euros)	14,379	11,940
O/w access to home ownership (home loans for low-income households, interest-free loans)	2,847	855
O/w health for everyone	5,897	5,950
O/w professionals and SMEs in fragile and rural areas to be revitalised	3,983	3,381
O/w others	1,652	1,754

The table above shows outstanding loans dedicated to social inclusion (dedicated financing, either directly or through other organisations such as the European Investment Bank (EIB) or Caisse des Dépôts) according to the Crédit Agricole S.A.’s internal sustainable asset framework at 30 September 2025.

SOCIAL BONDS

At 31 December 2025, social bonds issued by Group entities amounted to €10,901 million:

Issuer	2025		2024	
	Outstandings (millions of euros)	Number of issuances	Outstandings (millions of euros)	Number of issuances
Crédit Agricole S.A. Social bonds	7,219	24	5,378	19
Crédit Agricole Home Loan SFH Social Covered Bonds	182	26	2,250	2
Crédit Agricole CIB Social Notes	3,500	3	312	24
TOTAL	10,901	53	7,940	45

At 30 June 2025, Crédit Agricole S.A.'s social portfolio was concentrated in the Regional Banks (75%) and LCL (25%). Almost all this social portfolio is located in France. SMEs in disadvantaged areas are the most represented eligible category in the social portfolio (47%), followed by SMEs in the healthcare sector (31%), social housing (8%), public hospitals (9%), and finally cultural, sports and solidarity associations (4%) and public housing

institutions for elderly or dependent persons (1%). The social portfolio of Crédit Agricole Home Loan SFH consists exclusively of residential property loans from the Regional Banks. Crédit Agricole CIB's social portfolio consists of telecommunications projects in rural areas (65%), infrastructure projects in developing countries (20%) and investments in public hospitals (16%).

4. RESPONSIBILITY FOR BUSINESS CONDUCT

BUSINESS CONDUCT

Crédit Agricole Group is a trusted partner in its business relationships, through:

- compliance with regulatory and professional expectations;
- sound management of supplier relationships.

EXAMPLES OF IROS ⁽¹⁾ RELATED TO BUSINESS CONDUCT

Risk

- Regulatory in the event of non-compliance with regulations relating to business conduct

Risk

- Reputational and regulatory in the case of non-responsible purchasing practices, particularly as regards payment terms

Negative impact

- On customers in the event of unethical practices (for example, corruption)

POLICIES AND ACTION PLANS

Examples of policies

- Code of Ethics
- Conflict of interest avoidance and management policy
- Responsible purchasing policy

Examples of action plans

- Whistle-blowing system
- Identification of corruption risks
- Plan to improve supplier payment terms

SELECTED PERFORMANCE METRICS

Percentage of employees who have completed training on anti-money laundering and combating the financing of terrorism ⁽²⁾

96.6%

Sentences for violation of anti-corruption and anti-bribery laws ⁽³⁾

0

Average supplier payment term ⁽⁴⁾

24.4 days

⁽¹⁾ IRO: Impacts, risks and opportunities. Non-exhaustive list of IROs, see parts 4.1.4 and 4.2.1.3 below.

⁽²⁾ See part 4.1.4.5 "Combating financial crime".

⁽³⁾ See part 4.1.4.3 "Combating corruption".

⁽⁴⁾ See part 4.2.6.2 "Payment practices".

This table is for illustrative purposes only and is not intended to replace the information contained in the sustainability report.

4.1. ENSURING COMPLIANCE WITH REGULATORY AND PROFESSIONAL OBLIGATIONS

Business conduct within Crédit Agricole Group involves two major challenges: compliance with the regulatory and professional obligations coordinated by the Group Compliance department, and healthy management of business relations with suppliers, led by the Group Purchasing department.

4.1.1 GOVERNANCE

Business conduct is a matter overseen by the highest bodies within Crédit Agricole S.A.: the Board of Directors and its specialised committees (Appointments and Governance Committee, Board of Directors' Risk Committee, Executive Committee and Group Compliance Management Committee). These committees (and in particular the Group Compliance Management Committee ⁽¹⁾) are involved in defining, validating and monitoring the application of Compliance policies (Promoting an ethical culture, Avoidance of conflicts of interest, Combating corruption, Protection of whistle-blowers, Combating financial crime, Prevention of market abuse). They are kept regularly informed of the effectiveness of these policies and of incidents detected.

There is regular awareness-raising for members of the Board of Directors on Compliance as well as regulatory and professional obligations (e.g. conduct, ethics) in the form of dedicated training, as described in detail below.

4.1.2 COMPLIANCE STRATEGY

The role of the Group Compliance department is to ensure compliance, by the Crédit Agricole S.A. entities, executives and all employees, with the regulations and conduct applicable to banking and financial activities. The Group Compliance department also contributes to the implementation of Crédit Agricole S.A.'s voluntary commitments. More specifically, it oversees that non-compliance risk situations within all entities are prevented.

Thus, the Compliance business line has affirmed its commitment to implement the regulations on an operational basis and to promote an ethical culture within the Group. It is expressed and implemented through the Societal Project, the Customer Project and the Human Project, in line with the Group's *Raison d'Être* and Group Project.

Since 2019, Crédit Agricole S.A. has also promoted an ethical conduct with the adoption of its *Raison d'Être*: "Act every day in the interests of our customers and society". In particular, this involves:

- supporting everyone in the long term, on a daily basis and through long-term projects, and making loyalty, transparency and teaching the cornerstones of the advice we offer;
- placing empowered teams with human accountability at the heart of our model;
- guaranteeing our customers and teams access to the most secure technological best practices;
- being a trusted partner to all customers, from the most financially modest to the most affluent, from Very Small Businesses (VSBs) to the largest international groups.

4.1.3 REGULATORY FRAMEWORK

In terms of business conduct, Crédit Agricole S.A.'s obligations stem from various regulations in relation to conflicts of interest and financial market protection (e.g. MiFID, IDD, MAR, MAD), combating financial crime (e.g. AML/CFT programme of international sanctions and regulations), anti-corruption and protection of whistle-blowers (e.g. Sapin II law, duty of vigilance, Wasserman law, transposition in France of Directive (EU) 2019/1937, recommendations of the French Anti-corruption Agency).

(1) Compliance Management Committee, chaired by the Deputy Chief Executive Officer and belonging to the Executive Committee, responsible in particular for validating and examining compliance-related policies, procedures or problems.

4.1.4 POLICIES, TARGETS AND AMBITIONS, IMPACTS, RISKS AND OPPORTUNITIES AND THEIR SCOPE OF APPLICATION

The table below presents the negative impacts, risks and scopes of the Compliance policies of Crédit Agricole S.A. and its entities.

These policies, which take into account stakeholders, are developed as part of procedures issued by Crédit Agricole S.A. and rolled out by the entities. These procedures are available on the dedicated Intranets.

Description of IROs	Positioning in the value chain	Time horizon
Negative impacts		
– Negative impacts on the living conditions of customers or stakeholders in the event of unethical practices (e.g. corruption)	Entire value chain – Upstream: primarily employees and executives, suppliers, partners and partner companies, mutual shareholders, shareholders and investors – Downstream: customers	Invariable
– Negative impacts on the living conditions of customers or stakeholders in the event of unethical practices (e.g. corruption)	Entire value chain – Upstream: primarily investment in financial markets, relations with suppliers and partners, and employees – Downstream: customers	
Risks		
– Regulatory risk in the event of non-compliance with the regulations and the expectations of the supervisory authorities in terms of business ethics and combating corruption	Entire value chain – Upstream: primarily employees and executives, suppliers, partners and partner companies, mutual shareholders, shareholders and investors – Downstream: customers	Invariable
– Regulatory risk in the event of insufficient detection of conflicts of interest and market abuse (market integrity)	Entire value chain – Upstream: primarily mutual shareholders, shareholders and investors, rating agencies, suppliers, employees, partners and partner companies – Downstream: customers	Invariable
– Regulatory risk in the event of non-compliance with the regulations and the expectations of the supervisory authorities in terms of business ethics and combating corruption	Entire value chain – Upstream: primarily investment in financial markets, relations with suppliers and partners, and employees – Downstream: customers	
– Regulatory and reputational risk in the event of the failure of the whistle-blowing system for reporting unethical internal practices	Entire value chain: – Upstream: primarily employees (including former employees) – Downstream: individual customers	Invariable
– Regulatory risk in the event of failure to comply with the obligations in terms of combating financial crime	Entire value chain, upstream and downstream including customers, employees and suppliers.	Invariable

4.1.4.1 PROMOTING AN ETHICAL CULTURE

ACTION PLAN

The ethical culture roadmap is reviewed annually by the Appointments and Governance Committee of Crédit Agricole S.A.'s Board of Directors. It is based on the following pillars:

- **Group executives and Directors:** they are trained in compliance matters. In addition, the promotion of ethics is taken into account when assessing the performance and compensation of Crédit Agricole S.A.'s corporate officers;
- **Group employees:** they have in place ethical standards (Group Code of Ethics and Codes of Conduct) and are kept regularly informed (announcements, newsletter, etc.). Newcomers are made aware of the Code of Ethics and Code of Conduct when they take up their position;
- **the conduct risk and ethical risk control assessment system:** this is defined and coordinated by Crédit Agricole S.A., and is rolled out in the entities. Action and remediation plans are implemented where required.

Following an external audit of its ethical framework, Crédit Agricole S.A. updated the Group's Code of Ethics in 2025.

Each of the entities of Crédit Agricole S.A. is responsible for promoting and implementing the ethical culture. The Group Compliance department supports the entities in their implementation and coordination of this ethical culture. To this end, it leads a community of ethics advisors made up of representatives from Regional Banks and subsidiaries. Joint efforts are made to develop content that meets the needs of the entities, which is then shared with the community on a quarterly basis. The results of this content are monitored to assess its performance and identify areas for improvement.

METRICS AND TARGETS (INCLUDING STEERING)

GENERAL TRAINING ON COMBATING CORRUPTION AND PROFESSIONAL ETHICS AND CONDUCT

Crédit Agricole S.A. has in place a business conduct training system including modules dedicated to combating corruption and professional ethics and conduct. Some of these training modules are dispensed to all employees of Crédit Agricole S.A. and its entities,

while others target employees depending on the nature of their activity (e.g. real estate) or their position (e.g. employees exposed to corruption risk). These employees are identified by the entities taking into account their corruption risk mapping.

The members of the Boards of Directors also receive training on these Compliance matters which include combating corruption and professional ethics and conduct.

Name of training	Type of training	Format	Duration	Target audience Employees on permanent and fixed-term contracts of Crédit Agricole S.A. and its entities	Mandatory	Final quiz / mini success rate	Completion time from start date in the position	Renewal
Combating corruption	Newcomers (when taking up the position)	E-learning	30 mn	All employees on permanent and fixed-term contracts	Yes	Yes (80%)	Within three months	Every three years via Scan'Up or by completing the e-learning
	Refresher on Scan Up knowledge	E-learning	10 mn	All employees on permanent and fixed-term contracts needing to update their knowledge.	Yes	Yes (80%)	-	Every three years
	Square Habitat, Angle Neuf and similar	E-learning	30 mn	All employees on permanent and fixed-term contracts in the Group's real estate networks. Retail banking employees in France authorised as real estate employees may take this training as part of the ALUR law 42 hours rule.	Yes	Yes (80%)	Within three months	Every three years
	Further training for Correspondents	In-person	1 day	Current or recently appointed "Compliance/Anti-corruption" and/or "Compliance/Whistle-blower" correspondents. Employees from other departments contributing to the anti-corruption system: Purchasing, Audit, Risk, Human Resources.	No	No	-	No
	Further training for Exposed employees	E-learning	20 mn	Employees most exposed to corruption risks due to their business line.	Yes	Yes	Within three months	Every three years
Professional ethics and conduct	Newcomers (when taking up the position)	E-learning	45 mn	All employees on permanent and fixed-term contracts	Yes	Yes (80%)	Within three months	Every three years via Scan'Up or by completing the e-learning
	Refresher on Scan Up knowledge	E-learning	10 mn	All employees on permanent and fixed-term contracts needing to update their knowledge. ALUR law 42-hour compatible.	Yes	Yes (80%)	-	Every three years
Compliance matters	New Directors	In-person or remotely	2 h 30 mn	New Board members	Yes	No	Within the year	No
	Regulatory changes	In-person	1 h 30 mn	Board members	Yes	No	-	Every year

AWARENESS-RAISING AND TRAINING ON ETHICS

Every six months, the Group Compliance department calculates for Crédit Agricole S.A. the ratio between the number of employees who have completed the "Professional ethics and conduct" training and the number of employees who should complete the training over its reference period, as defined in the texts of the Group's governance.

The data required for this calculation is reported by the entities (via an internal tool) to the Group Compliance department, which validates the metric after carrying out a consistency check.

Each year, the Group Compliance department calculates for Crédit Agricole S.A. the ratio between the number of employees who have completed the ethics quiz and the number of employees who should complete the quiz, as defined in the Group's communications. The data required for this calculation is reported by the entities to the Group Compliance department, which validates the metric after carrying out a consistency check.

The "Ethics & You" quiz is a multiple-choice questionnaire, reviewed annually, with each question dealing with a specific ethical theme: employees are reminded of the main principles associated with ethics and the best practices to adopt through scenarios inspired by their day-to-day lives.

The content of these two training courses deliberately addresses ethical issues and topics developed in the Code of Conduct (e.g. promoting diversity, avoiding conflicts of interest, loyalty to our customers, combating fraud, etc.).

Module title	2025 completion rate	2024 completion rate
"Professional ethics and conduct" training	97.0%	96.7%
Ethics quiz	93.1%	83.7%

4.1.4.2 AVOIDANCE OF CONFLICTS OF INTEREST

ACTION PLAN

Ongoing action plans in the area of conflict of interest prevention are based on the following pillars:

- **employee training and awareness-raising:** training programmes are rolled out across all entities of Crédit Agricole S.A. They improve understanding of regulatory matters, responsibilities and risks associated with conflicts of interest. These consist of a specific e-learning and regular awareness-raising campaigns targeting executives and employees;
- **the conflict of interest prevention and management system is governed by a procedural framework** covering regulatory (including MiFID II and IDD) and personal conflicts of interest (including private mandates, personal links);
- **the control system:** defined by Crédit Agricole S.A., its aim is to ensure proper implementation of the standards in the entities according to their activities;
- **management of the conflict of interest detection and management system:** a tool is made available and administered by Crédit Agricole S.A. Conflicts of interest are handled locally at entity level, and at Crédit Agricole S.A. level for conflicts of interest between entities;
- **the management of conflicts of interest** is carried out using the Group tool. An annual report is presented to the decision-making bodies, and the Investment Services Compliance Report (ISCR) is sent to the AMF.

METRICS AND TARGETS

Metrics for the implementation and effectiveness of the systems for avoiding conflicts of interest are specific to each entity. Crédit Agricole S.A. and its entities are awaiting additional details on the sector-specific standards to settle on the selection of metrics to disclose.

4.1.4.3 COMBATING CORRUPTION

Themes and risks related to violations of integrity, including corruption and, in particular, bribery are covered by the anti-corruption measures in place within the Group.

ACTION PLAN

Ongoing action plans in the area of combating corruption are based on the following pillars:

- **employee training and awareness-raising:** training programmes are rolled out within the Crédit Agricole S.A. entities. They

improve understanding of the legal framework and help to identify each entity's challenges and responsibilities. Corruption plans and the related risks, due diligence to reduce these risks, recommended behaviour in response to solicitations, procedures for handling reports of inappropriate behaviour, and personal sanctions at both the disciplinary and penal levels in the event of violation are presented and illustrated;

- Anti-corruption representatives are also appointed by the governing body within each of the entities;
- **System framework based on:**
 - **the procedural note** on combating corruption and **control plans** associated with this note. In addition, accounting control procedures provide assurance that the books, registers and accounts are not used to mask corruption or influence peddling,
 - **the anti-corruption code of conduct.** In addition, a disciplinary regime provides for the sanctioning of employees in the event of violation of the Company's code of conduct;
- **at the same time, third-party assessment procedures and systems** also contribute to the framework for combating corruption. For example, a supplier risk profile analysis is carried out upstream of the business relationship, and due diligence is conducted throughout the relationship. Moreover, awareness is also raised about combating corruption among suppliers, through the sharing of the Crédit Agricole ethical approach and the formalisation of contractual clauses;
- **corruption risk management** is carried out on the basis of risk mapping implemented by the entities according to a methodology defined by Crédit Agricole S.A. This approach may result in reinforcement or remediation actions.

The entire anti-corruption system, together with the risk mapping and associated action plan is the subject of an **annual review** by the departments of each entity. In addition, **the management and implementation of the systems for combating corruption** within the entities of Crédit Agricole S.A. are carried out annually by the Group Compliance department, and followed up with an action plan for reinforcement or remediation where necessary;
- **handling of corruption incidents:** all corruption incidents are the subject of an investigation by the compliance services of the entity concerned, relying as needed on other expertise (audit, risk, human resources, etc.). The incidents and measures taken are presented at the entities' Internal Control Committees. Remediation measures include reinforcement of the procedures and controls for the process concerned, and potential disciplinary and legal sanctions. This ensures separation of the investigators (compliance service) and the chain of management involved in the corruption incident;
- **certification of the anti-corruption management system:** in 2017, Crédit Agricole Group was the first French bank to receive ISO 37001 certification, obtained through audits conducted by an independent body. This certification was renewed in 2019, 2022 and 2025 (three-year renewal format), demonstrating the Group's commitment to sustainably uphold high international standards in the fight against corruption.

METRICS AND TARGETS (INCLUDING STEERING)

"COMBATING CORRUPTION" TRAINING

Every six months, the Crédit Agricole S.A. Compliance department calculates the ratio between the number of employees of its entities who have completed the "Combating corruption" training (general module for all employees and module for the employees concerned in the most exposed business lines) and the number of employees who should complete the training in the reference period, as defined in the texts of the Group governance.

The data is collected from the entities through an internal tool and undergoes a consistency check by the Crédit Agricole S.A. Compliance department before validation.

Employees from so-called “exposed” entities are identified by the entities on the basis of corruption risk mapping (specific to each entity). For Crédit Agricole S.A., this represents 15.3% of the workforce. In this respect, positions with significant decision-making power or leverage are considered to be “exposed” positions. Examples include members of the entity’s Management Committee or Executive Committee, Directors, members of Commitment Committees, members of Credit Committees, managers and employees involved in financing, financial management, purchasing, sponsorship, real estate and human resources.

Through this system, all employees are covered by a regulatory training programme the completion rate of which is indicated below:

Name of training	2025 completion rate	2024 completion rate
Combating corruption – General module	97.3%	96.9%
Combating corruption – Most exposed business lines	96.9%	94.2%

SENTENCES AND FINES FOR VIOLATION OF ANTI-CORRUPTION AND ANTI-BRIBERY LAWS

The Crédit Agricole S.A. Compliance department conducts an inventory each year, for all its entities, of the number of sentences for violation of anti-corruption and anti-bribery laws. For this, it relies on the Operational Risk process and the Anti-corruption process.

The Crédit Agricole S.A. Compliance department can therefore confirm the number of sentences and the amount of the associated fines.

	2025	2024
Number of sentences for violation of anti-corruption and anti-bribery laws	0	0
Amount of associated fines (in thousands of euros)	0	0

4.1.4.4 PROTECTION OF WHISTLE-BLOWERS

ACTION PLAN

Ongoing action plans in the area of the protection of whistle-blowers are based on the following pillars:

- **Director and employee awareness-raising:** regular communications are sent to employees of the entities (including videos, files on the website, a newsletter, etc.) with an emphasis on the concept of good faith, to inform, reassure and instil confidence. In addition, the Code of Ethics and the codes of conduct of the entities include the key aspects of communication of the internal whistle-blowing mechanism;
- **the framework** for the Whistleblower mechanism is defined by the Group Compliance department in the form of procedures and an associated control plan, which are implemented by the entities of Crédit Agricole S.A.;
- **the Anti-Corruption Officer** is responsible for overseeing the anti-corruption programme and the annual management review, while the Internal Whistle-blowing Officer is responsible for receiving reports under the whistle-blowing procedure;
- the whistle-blowing mechanism comprises **two reporting channels**:
 - **whistle-blowing platform:** Crédit Agricole S.A. platform is secure and accessible 24/7 from a work or personal computer, available in nine languages, and is open to all individuals.

It guarantees total confidentiality of the information contained in the report and of the whistle-blower’s identity through data encryption. After the case has been handled, the data relating to the report is archived after anonymisation. The function is classified as “critical and important” according to the definition of the European Banking Authority and is the subject of special governance. The contract which governs this function sets out obligations in terms of results (e.g. handling time frames, times taken to implement an alternative solution) and reporting obligations (e.g. summary statement of incidents, steering committees, etc.),

- for Group employees, reporting an incident to their line manager, Human Resources department or Compliance department. In the event that reporting through the hierarchy is deemed inappropriate in a given situation (fear of retaliation, pressure from the hierarchy, hierarchy involved, etc.), the employee may use the whistle-blowing platform;
- maintenance of the **whistle-blowing mechanism**:
 - the mechanism meets the legal and regulatory requirements, guaranteeing for example anonymity where this option is selected by the whistleblower, confidentiality in its processing, handling of the report within seven working days, the management of access rights, and guarantees of non-retaliation against the whistleblower,
 - each report is therefore investigated impartially and rigorously by the authorised employees in the entities and/or by Crédit Agricole S.A. (Human Resources or Compliance business line). These employees receive dedicated training, the modules for which are created and maintained by the Compliance department. Employees handling whistle-blowing reports sign a confidentiality agreement,
 - during the report examination phase, communication between the whistle-blower and the person in charge of the case is possible via the secure dialogue box on the Group tool. Following examination, the whistle-blower is informed of the case’s closure,
 - employees in charge of handling reports may, depending on the type of report, seek cross-functional, independent expertise for analysis and decision-making on the action that should be taken. This independent expertise takes the form of an ad hoc “Internal Whistle-blowing Management Committee”, consisting of Compliance, Human Resources, Legal, Risk, Internal Audit and other managers, as required;
- **Management of the whistle-blowing mechanism:**
 - implementation of the “whistle-blowing” mechanism is managed through the implementation of the Anti-corruption mechanism. The annual anti-corruption questionnaire allows the Compliance department to identify if any aspects of the Whistle-blowing mechanism are not in place in the entities. If this is the case, the entities are requested to provide action plans which are monitored by the Group Compliance department,
 - a Group-level committee, chaired by the Head of Compliance in their capacity as Group Internal Whistle-blowing Officer, oversees internal reports during weekly closed-door meetings (Group Compliance and Group Legal) to manage the handling process within the Group. The Group Internal Whistle-blowing Officer may bring in other central departments (HR, Audit) as needed, if the complexity or sensitivity of a report so requires. If necessary, the Group Internal Whistle-blowing Officer may inform the Chief Executive Officer and/or Deputy General Manager,

- a Group-level committee meets once a year. A report is presented to the committee so that it can evaluate the mechanism based on statistical and qualitative data from reports and geographic areas of origin, and decide on any changes to the overall processing framework. The committee's assessment is taken into account, where appropriate, to update the risk map or to initiate internal controls on the malfunctions reported. Key data is forwarded to the Executive Management of Crédit Agricole S.A. via the Executive Committee and the Board of Directors.

METRICS AND TARGETS (INCLUDING STEERING)

In line with the aim of facilitating feedback on whistle-blowing, the Group monitors the number of reports over time on the dedicated platform.

WHISTLE-BLOWING REPORTS RECORDED IN THE GROUP INTERNAL WHISTLE-BLOWING TOOL

Each year, the Group Compliance department extracts the number of reports received in the internal tool for the entities of Crédit Agricole S.A. and Crédit Agricole parent company, i.e. the number of reports before handling. This provides an understanding of the reports that prove not to be relevant, following investigation.

The metric is validated internally by the Group Compliance department.

	2025	2024
Number of whistle-blowing reports recorded in the Group internal whistle-blowing tool (before handling)	237	158

4.1.4.5 COMBATING FINANCIAL CRIME

ACTION PLAN

Ongoing action plans in the area of combating financial crime are based on the following pillars:

- the Know Your Customer mechanism which includes:
 - Group standards including Know Your Customer obligations, which are regularly updated,
 - a body of controls (particularly regarding entry into a relationship and periodic review),
 - steering metrics which concern all customers of the entities while also paying particular attention to customers presenting the highest risk with regard to anti-money laundering and combating the financing of terrorism,
 - tools contributing to improving the reliability of data through native consistency checks and through the "Selfcare" initiative (Know Your Customer data is entered directly by the customer in the tool);
- the Anti-money laundering and combating the financing of terrorism ("AML/CFT") system is based on:
 - employee training in AML/CFT matters,
 - the classification of AML/CFT risks,

- getting to know customers of the entities through the risk profile assessment,
- the detection of atypical transactions and, where applicable, their reporting to financial intelligence units,
- the intra-group exchange of AML/CFT information,
- regular controls and audits;
- the mechanism for compliance with international sanctions is based on:
 - employee training in international sanctions,
 - getting to know the customers of the entities and their transactions,
 - assessment of the entities' exposure to international sanctions,
 - data screening and financial message filtering,
 - regular controls and audits.

Crédit Agricole S.A. has the ultimate authority for compliance with International Sanctions and for supervising control of the risks incurred. The Group entities are responsible for compliance with local sanction programmes.

COMBATING FRAUD

To protect customers and preserve the Group's interests, a structured system for combating fraud is implemented across all entities of Crédit Agricole S.A.

The governance of this system is also rolled out in all entities of Crédit Agricole S.A. It is governed by a procedural note and dedicated comitology. The Anti-fraud Steering Committee and the Fraud Prevention Community Committee meet quarterly with representatives from the Group subsidiaries and special functions.

In addition, IT tools have been strengthened this year at Group level, allowing for more effective cross-functional detection of fraudsters and, ultimately, better protection for the Group against the risk of fraud.

METRICS AND TARGETS (INCLUDING STEERING)

"COMBATING FINANCIAL CRIME" TRAINING

Every six months, the Group Compliance department calculates for Crédit Agricole S.A. the ratio between the number of employees who have completed and the number of employees who should complete the "International Sanctions" and "Anti-money Laundering and Combating the Financing of Terrorism" training over its reference period, as defined in the texts of the Group's governance.

The data is collected from the Crédit Agricole S.A. entities via an internal tool. This data is controlled and validated by the Group Compliance department.

Name of training	2025 completion rate	2024 completion rate
International Sanctions – General Module	98.0%	97.5%
Anti-money laundering and combating the financing of terrorism (AML/CFT) – General Module	96.6%	96.1%

4.1.4.6 AVOIDANCE OF MARKET ABUSE

ACTION PLANS

Ongoing action plans in the area of market abuse prevention and management are based on the following pillars:

- **Training and awareness-raising:** specific training programmes are rolled out across all Crédit Agricole S.A. entities concerned and provide an understanding of regulatory issues and responsibilities, as well as the associated risks. These programmes involve mandatory and non-mandatory training delivered to employees, and are targeted according to the position held. They are reviewed and adapted on a regular basis;
- **Framework of the Market Abuse system based on a body of procedures and controls:** procedures and controls form the framework for the risks of undermining the integrity of the financial markets and market abuse. This framework is regularly updated in response to regulatory changes;
- **Management of the Market Abuse detection and management system:** each entity is equipped with a market abuse detection tool which includes scenarios on price manipulation and insider trading. Each model is the subject of a frequent review to ensure the continued effectiveness of the systems with a view to detecting and reporting suspect orders and transactions;

- **Market Abuse management:** control metrics have been put in place at Crédit Agricole S.A. level. These relate to employees' personal transactions and the number of reports handled in relation to the volume generated. In addition, the theme of "Market Abuse" is the subject of annual reporting in the compliance report and the ISCR sent to the AMF.

Crédit Agricole S.A., as a corporate centre, assumes responsibility for the steering and governance of the Group market abuse monitoring and detection system. Steering committees with the entities concerned are held regularly, primarily with a view to ensuring ongoing improvement of the Group system.

METRICS AND TARGETS (INCLUDING STEERING)

Metrics for the implementation and effectiveness of the market abuse prevention systems are specific to each entity. Crédit Agricole S.A. and its entities are awaiting additional details on the sector-specific standards to settle on the selection of metrics to disclose.

4.2. SUPPLIER RELATIONS AND PAYMENT TERM PRACTICES

4.2.1 STRATEGY

4.2.1.1 EXTERNAL FRAMEWORKS AND REFERENCES

On 14 December 2010, Crédit Agricole S.A. signed the **Responsible Supplier Relations and Purchasing Charter** encouraging companies to adopt responsible practices towards their suppliers. The "Responsible Supplier Relations and Purchasing" label was granted to Crédit Agricole S.A. for the first time in 2014 for the parent company scope, then in 2017 for the scope of Crédit Agricole S.A. and its subsidiaries. It was renewed for three years in 2024 for the same scope. As part of this, the organisation and actions of Crédit Agricole S.A. were certified to be at a "conclusive" level (third level out of four) compared to the ISO 20400 normative framework.

This label is assessed on the basis of 15 criteria distributed across the following five areas:

- responsible supplier's commitments and their consistency with the Group CSR policy and strategy;
- the professional development of buyers and mediation development;
- the supplier relationship (respect of the contractual right and balance, mediation, supplier reviews);

- the integration of CSR into purchasing processes via responsible sourcing;
- the impacts of purchases on the economic competitiveness of the ecosystem, via the assessment of all costs in the life cycle and the contribution to regional development.

4.2.1.2 INTERNAL CONTEXT

Through a comprehensive double materiality analysis two material themes were established: "Management of relationships with suppliers" and "Payment practices". These are the subject of two policies forming an integral part of the Group's Responsible Purchasing policy.

In response to these issues and to contribute to the Company's overall performance, in 2018 Crédit Agricole Group introduced a Group Responsible Purchasing Policy, aimed at establishing long-term, balanced relationships with suppliers.

4.2.1.3 IMPACTS, RISKS AND OPPORTUNITIES

The IROs identified in the double materiality analysis are the following and are formulated in the form of a negative impact and two risks:

Description of IROs	Positioning in the value chain	Time horizon
Negative impact		
– Negative impact on suppliers in the case of non-responsible purchasing practices by the Group, particularly as regards payment terms	Upstream	Invariable
Risks		
– Reputational risk and regulatory risk in the case of accountability of the Group following an environmental, social or ethical breach – particularly in terms of corruption – by its suppliers	Upstream	Invariable
– Reputational risk and regulatory risk in the case of non-responsible purchasing practices by the Group towards its suppliers, particularly as regards payment terms	Upstream	Invariable

These IROs were identified using the AFNOR risk map, based on the ISO 31000 "Risk management", ISO 20400 "Sustainable procurement" and ISO 26000 "Social responsibility" standards, and the internal operational risk management tool, in close collaboration with internal stakeholders.

4.2.2 GOVERNANCE

The missions of the Group Purchasing department are based on four main pillars:

1. amplifying the Group's performance through the competitiveness of purchases;
2. containing and anticipating risks;
3. transforming purchasing into a responsible act;
4. excelling relationally and operationally.

The Group Purchasing department is composed of the following divisions:

- a division in charge of risks, compliance, permanent controls and outsourcing;
- a division in charge of the digitalisation of purchases;
- two Purchasing divisions made up of specialised buyers by category;
- a division dedicated to CSR;
- a corporate secretary in charge of communication, human resources and training.

All buyers of Crédit Agricole Group and their managers, purchasing assistants, purchasing support teams including those in charge of its information system and the analysis of Supplier risks form part of the Purchasing business line.

This business line has the role of designing and overseeing the daily operation of the Group Purchasing system. It is coordinated by the Group Purchasing department.

The strategy and decisions affecting the Responsible Purchasing Policy are the responsibility of the Strategic Purchasing Committee, a cross-functional body at Group level. This body is composed of a Regional Bank Chairman, Chief Executive Officers of the subsidiaries of Crédit Agricole S.A. and Regional Banks, and representatives of the Fédération Nationale du Crédit Agricole (FNCA) and of Crédit Agricole S.A.

4.2.3 TARGETS

The aim of the **Group Responsible Purchasing Policy** is to adapt to major challenges in the regions where the Group operates, to contribute to the overall performance of its companies and to act for the climate and transition to a low carbon economy. It is fully in line with the **Group's Code of Ethics and Societal Project**.

It aims to favour the purchase of a good or service taking into consideration both the **justified need** and **economic, societal and environmental aspects**, while ensuring **a balance in relations between the Company and its suppliers**, in respect of their reciprocal rights.

This policy is part of a **committed and responsible approach**, and is intended to be a **mutual vector for progress and innovation**. It is addressed at all **employees and players** in the **purchasing process** and their **suppliers**.

A low-carbon transition component was added to this policy in 2023. It is now based on six major pillars:

1. adopting a responsible behaviour with suppliers, and particularly in terms of payment terms;
2. contributing to the economic competitiveness of ecosystem;
3. constantly monitoring the quality of relationships with suppliers;
4. integrating environmental and societal aspects into our purchasing;
5. taking action for transition to a low-carbon economy;
6. including this Responsible Purchasing Policy in existing governance arrangements.

4.2.4 SCOPE OF APPLICATION

The Group Responsible Purchasing Policy applies to the scope of Crédit Agricole Group worldwide.

4.2.5 ACTION PLANS

Crédit Agricole Group adopts responsible behaviour in its relationship with suppliers and constantly monitors the quality of interactions it engages in with them. To this end, it applies a Group Responsible Purchasing Policy, broken down into operational actions.

The "ACT 2028" Medium-Term Plan, which sets out Crédit Agricole S.A.'s medium-term strategy, was announced at the end of November 2025. Its ambitions will be implemented at the Purchasing business line level and its challenges will be taken into account in subsequent financial years.

4.2.5.1 ADOPTING RESPONSIBLE BEHAVIOUR IN THE RELATIONSHIP WITH SUPPLIERS

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Monitor the balance of business relationships by adopting respectful practices and behaviours;
- Favour reciprocal commitments, respecting the rights of each party;
- Provide visibility in planning of purchases.

ACTION PLAN

MONITOR PAYMENT TERMS

Crédit Agricole S.A. actively monitors its supplier payment terms and assigns as much importance to SMEs as to other corporates. Payment terms are monitored quarterly at entity level and the consolidated reporting is presented to the Monitoring Committee consisting of representatives of the entities and the Group Purchasing department. This consolidated reporting is also shared each quarter at a Group level Supplier Risks Monitoring Committee.

By introducing this monitoring, a structured steering framework has been established and has contributed to reducing Crédit Agricole S.A.'s average payment terms which, at 31 December 2025, stood at 24.42 days (see part 4.2.6.2 "Payment practices").

In 2025, the reporting covered the following 14 entities: Crédit Agricole S.A. Parent Company, Crédit Agricole CIB, Amundi, Crédit Agricole Assurances, LCL, CACEIS, Crédit Agricole Leasing & Factoring, Crédit Agricole Personal Finance & Mobility, Indosuez Wealth Management, Crédit Agricole Payment Services, Unimédias, for France and the international scope.

IMPLEMENT A PLAN TO IMPROVE AVERAGE PAYMENT TERMS, PARTICULARLY BY REDUCING PAYMENT DELAYS

To reduce the number of invoices paid late, various entities have brought in payment term improvement plans. These action plans are monitored and involve the sharing of best practices at quarterly meetings dedicated to monitoring the above-mentioned payment terms.

In addition, a portion of the variable compensation of buyers and purchasing managers is indexed to their contribution to improving average payment terms and reducing the late payment of invoices.

4.2.5.2 CONTRIBUTING TO THE ECONOMIC COMPETITIVENESS OF THE ECOSYSTEM

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Encourage the diversity of regional corporates and strengthen social cohesion and inclusion;
- Promote discussions with local players and thereby contribute to regional development;
- Stimulate innovation with our suppliers to create value;
- Assess the overall cost of the life cycle.

ACTION PLAN

INCREASE INCLUSIVE PURCHASES (SHELTERED AND DISABILITY-FRIENDLY SECTOR)

The Purchasing business line promotes all of the inclusive purchases in order to strengthen social cohesion and inclusion, particularly in France, through:

- purchasing as a driver for the employment of vulnerable groups (sheltered and disability-friendly working structures, workforce integration structures);
- the use of undertakings in the sheltered and disability-friendly sector is an integral part of the Crédit Agricole S.A. group disability agreement ⁽¹⁾;
- purchasing to develop employment in the regions in which the Group operates;
- purchasing from companies located in rural revitalisation areas (ZRR), in priority urban neighbourhoods (QPV);
- purchasing from companies in the social and solidarity economy.

Training about how to implement an inclusive purchasing approach was delivered by the Group Purchasing department and resources are available for buyers to identify the relevant suppliers. The metrics are described in detail in part 4.2.6.1 “Management of the relationship with suppliers”.

4.2.5.3 CONSTANTLY MONITORING THE QUALITY OF RELATIONSHIPS WITH SUPPLIERS

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Involve buyers from the moment the need is expressed;
- Enhance the purchasing skills of internal players (buyers/decision-makers);
- Develop reciprocal company/supplier knowledge;
- Establish a mediation mechanism.

ACTION PLAN

COMMUNICATE REGULARLY WITH SUPPLIERS

To maintain a relationship based on trust with suppliers, promote communication, share strategic guidelines and messages, and to take into account their concerns, Crédit Agricole Group has implemented a system for active stakeholder engagement (buyers/suppliers/decision-makers) including the following actions:

- a dedicated page on the Corporate website ⁽²⁾, for information purposes, allowing suppliers to contact the Purchasing department;
- annual satisfaction surveys to gather feedback from suppliers and in-house decision-makers;
- an annual meeting named “les Rencontres Fournisseurs” (Suppliers’ Meeting), organised both in person and remotely with more than 700 participants;
- regular reviews with the main suppliers;
- a dedicated newsletter sent to them every six months, supplemented by a specific publication on decarbonisation.

The results and information gathered through these channels of dialogue contribute to the approach of ensuring ongoing improvement of Crédit Agricole Group’s Responsible Purchasing and its action plans.

TRAIN BUYERS IN CSR ISSUES

As part of its Group Responsible Purchasing Policy, the Purchasing business line monitors the training of buyers, particularly on environmental, societal and governance (ESG) aspects and their professional development in a constantly changing environment.

To this end, a global training programme dedicated to CSR and supplier risks is offered to all buyers, and more specifically:

- an e-learning which provides good CSR habits as part of the purchasing process;
- a purchasing CSR training module designed for newcomers within the Purchasing business line;
- specific training modules on the decarbonisation of purchases;
- a training module on awareness of supplier risks (KYS).

Aligned with the challenges of the Group Societal Project in terms of CSR and integration, new sessions on responsible purchasing and inclusive purchasing were rolled out in 2025.

On a more general basis, a Purchasing Intranet is made available to all players in the Purchasing business line. It lists a vast range of resources and documents related to the Purchasing business line, including the CSR Purchasing component.

IMPLEMENT A MEDIATION SYSTEM AND INFORM STAKEHOLDERS

Crédit Agricole Group has a strong commitment to responsible purchasing, at the foundation of which is a healthy and balanced relationship with its suppliers and subcontractors. In this regard, an in-house mediator is appointed within the Group.

The Chief Sustainability and Impact Officer, a member of the Executive Committee of Crédit Agricole S.A., is in position since 2018 for the Crédit Agricole S.A. scope. It has been extended to all entities of Crédit Agricole Group in France and internationally since 2020.

The assistance of the mediator may be sought as part of a voluntary mediation approach, either by a supplier or by an in-house service, when difficulties arise to make their positions understood. The officer’s role is to restore dialogue between the parties and overcome differences.

The “mediation” clause is generally included in most specifications and contracts.

The Purchasing business line regularly reminds its stakeholders of the role of the in-house mediator, particularly at Supplier Meetings and in the newsletters that are sent to them. Information on the system was provided to all employees in 2024.

Externally, the process of seeking the mediator’s assistance is visible in the Supplier area of the Group website ⁽²⁾ along with the generic contact email address and a video of the mediator presenting their role.

The assistance of the mediator was sought twice in 2025.

4.2.5.4 INTEGRATING ENVIRONMENTAL AND SOCIETAL ASPECTS INTO PURCHASING

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Identify and map risks and opportunities;
- Take CSR criteria into account when choosing a good or service, and when selecting suppliers.

ACTION PLAN

INTEGRATE THE CSR RATING OF SUPPLIERS INTO PURCHASING PROCESSES

Crédit Agricole Group places great importance on the quality of its sourcing and the prevention of CSR risks. To this end, the Purchasing business line has extended integration of the CSR dimension to all purchasing processes. This is to assess both the ESG performance of suppliers and that of the goods and services purchased.

The CSR performance of suppliers is assessed periodically, including when entering into a relationship, during the call for tenders phase and to coincide with dedicated assessment campaigns. It is entrusted to EcoVadis, a trusted third party. If a supplier's rating is below a minimum threshold, the supplier is invited to initiate a progress plan aimed at improving their rating.

The CSR assessment of goods and services purchased takes the form of CSR criteria, the weighting of which was increased in 2025 from 15% to a minimum of 20% of the overall assessment score during a Purchasing project, or between 20% and 30% minimum for the categories presenting high risks in environmental, social and ethical issues.

The CSR criteria, common to all purchasing projects, are divided into four categories:

- assessment of the supplier by an independent third party;
- assessment criteria on the supplier's approach in terms of inclusion;
- assessment criteria on the supplier's approach in relation to decarbonisation;
- specific criteria according to the purchasing category (see details in section "CSR risks" below).

See part 4.2.6.1 "Management of the relationship with suppliers".

This supplier CSR assessment system may be supplemented by on-site audits initiated in partnership with other banks and carried out by an external auditor. The on-site audit process covers the following components: Human rights, Health, Safety and Environment, particularly for the purchasing sectors and suppliers common to the banking sector. For instance, audits were carried out on cash transport, ATMs and document shuttle services for branches. In 2025, audits were conducted on suppliers common to the banking sector with regard to cleanliness.

MANAGE RISKS, AND SPECIFICALLY CSR RISKS

The Group Purchasing department has a Purchasing Risks division dedicated to risks, compliance and permanent controls. This division's role is to prevent and manage the various risks to which purchases are exposed, both by avoiding the generation of potential negative impacts on suppliers, and ensuring that working methods are in line with regulatory requirements.

The Purchasing business line has general Know Your Supplier (KYS) standards aimed at presenting the data and processes in place to manage supplier-related risks in the Group.

This approach includes:

- a KYS "umbrella" procedural note that includes the scope and key elements to use from the data and the expected processes both in the entities and centrally in the Group Purchasing department;
- three functional notes, which are more operational and detailed, on supplier identification (definition of identifiers, responsibilities and handling), supplier scoring (definition of three risk levels, low, medium and high, and operational consequences) and supplier screening (in terms of international sanctions, Sapin II and fraud/corruption-oriented negative information and duty of vigilance).

The entire risk management process is summarised in the diagram below:

OVERVIEW OF RISK AND COMPLIANCE MANAGEMENT ACTIONS IN PURCHASING

The Group Purchasing department organises and contributes to the completeness of supplier data, and to its enhancement, including for related parties (beneficial owners, main shareholders and senior executives). It also assumes responsibility for the control and monitoring of financial risks, in line with the entities, including for aspects related to financial health, economic dependence and concentration, as well as overseeing the gathering of legal documents on behalf of and in association with the entities.

This supplier knowledge plays a key role in applying the stipulations issued as part of the Sapin II law and Duty of Vigilance law as regards the “Knowledge of third parties” component, and in particular suppliers, and to comply with the regulatory provisions in place as regards international sanctions.

It thus enables:

- improved reliability in the screening of supplier data;
- establishment of a supplier risk profile and a standardised compliance score within the Group;
- implementation of constant vigilance measures, adapted to the degree of criticality of identified risks.

The Purchasing business line has a specific body for managing risks including CSR aspects and composed of representatives of various internal stakeholders of the Group. It meets quarterly to assess risks in financial, ethical, environmental and social aspects. Its decisions apply to all Crédit Agricole S.A. entities.

CSR RISKS

The approach to managing CSR risks steered by the Group Purchasing department incorporates risk identification and assessment elements into the purchasing process.

1. It is based primarily on a mapping of CSR risks by purchasing category, which was revised in 2025. This mapping established in partnership with various banks and supported by AFNOR is used to identify and prioritise the purchasing categories presenting salient risks with regard to the areas of ethics, social and environmental issues. In this regard, categories with a risk level deemed high (construction work, IT and telecom equipment and servers, fluids and energy, vehicles and advertising materials) have been identified and are the subject of enhanced monitoring in which assessment by a trusted third party is mandatory.
2. Upon signing the contract, suppliers are invited to commit to the principles set out in the “Responsible Purchasing Charter”, an initiative common to many banking and insurance providers in the market and also through a specific clause on respecting social and human rights.
3. In terms of corruption, the Group Purchasing department shares a supplier risk assessment system with the bank BPCE on a shared platform. This system meets the obligations of the Sapin II law and the recommendations of the AFA (French Anti-Corruption Agency). In 2024, the system was extended to the detection of risks related to the environment and social and human rights.

4. Finally, Crédit Agricole Group gives the employees of its suppliers and partners the possibility of using a whistle-blowing ⁽¹⁾ mechanism if they witness or are victims of serious events ⁽²⁾ or events contrary to the Code of Conduct and if they have not been able to use normal hierarchical channels for reporting problems. This whistle-blowing mechanism, under the responsibility of the Group Compliance department, guarantees the strictest confidentiality of the data contained in the report and of the whistle-blower's identity. After making a report, the whistle-blower receives an acknowledgement of receipt and is then informed of its admissibility as soon as possible. Following examination, the whistleblower is advised of the case's closure and the action that can be taken. For more information on the procedure to handle whistle-blowing reports, please refer to the Practical user guide for whistle-blowers ⁽³⁾.

4.2.5.5 TAKING ACTION FOR THE TRANSITION TO A LOW-CARBON ECONOMY

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Mobilise all our business lines to transform how they operate as part of a low-carbon initiative;
- Engage and encourage our suppliers to measure their carbon footprint and reduce their emissions;
- Consider the carbon weight criterion in the assessment, listing and monitoring of our suppliers.

ACTION PLAN

IMPLEMENT A LOW-CARBON PURCHASING PATHWAY

The low-carbon purchasing pathway project contributes to the Group's aim of "acting for the climate and the transition to a low-carbon economy" and forms an integral part of the environmental aspect of the Group Responsible Purchasing Policy. Scoping work led to an initial measurement of the carbon footprint of purchases of goods and services (Scope 3.1) based on external expenditure mainly associated with monetary emission factors (from ADEME) for the entire Crédit Agricole Group. This initial measurement identified the most emissions-intensive purchasing categories.

On the basis of this work and within the scope of Crédit Agricole S.A., the Group Purchasing department defined a target. This target is based on the SBTi requirements specific to financial institutions for Scope 3 categories 1-14 (non-financial footprint). Crédit Agricole S.A. is committed to making 40% of its external expenditure with suppliers who have adopted science-based reduction targets by 2027. At the end of 2025, Crédit Agricole S.A. had already made 40% of its external expenditure with suppliers who have adopted science-based reduction targets. In parallel, a roadmap is being developed, based on three projects:

1. framing and implementing emissions reduction by supporting all the players in the purchasing ecosystem in an adapted and harmonised system;
2. measuring and reporting emissions reductions taking into account reporting requirements;
3. defining and managing a governance system with the stakeholders and partners in the project.

In order to meet these challenges, new training modules have been added to the business line's professional development programme:

- a series entitled "La CASA des Achats Responsables" was created and distributed to all employees of the business line. This awareness-raising tool, consisting of several seasons and episodes, is designed to address the main themes of the Societal Project: season 1 entitled "CSR", season 2 entitled "Decarbonisation", etc.;
- most employees from the Purchasing business line also attended the La Fresque du climat training. This was an opportunity for them to understand the causes and consequences of climate change;
- in addition, one 1.5-hour training module was offered to all buyers on the decarbonisation of purchasing ("Decarbonisation challenges and my role as a buyer").

To help its SME suppliers commit to sustainability, Crédit Agricole S.A. has joined the Alliance for SME Decarbonisation initiative, led by *Pacte PME* alongside several major French groups. It supports SMEs in their carbon reduction pathways by offering them dedicated programmes.

Finally, Crédit Agricole S.A. has joined the "Achats 2030" collective, made up of 30 players committed to the environmental transition: seven French banks/insurers, 12 strategic suppliers, and independent experts. The collective aims to standardise carbon accounting for purchases, identify decarbonisation levers, and widely share its deliverables. In 2025, work focused on payment instruments, intellectual services, networks/telephony and transport/freight.

For the first time in 2025, Crédit Agricole S.A. was included in the Carbon Disclosure Project's (CDP) Supplier Engagement Assessment A list (the CDP is an international non-profit organisation that manages one of the world's largest environmental databases and measures the ability of undertakings to effectively take action on climate issues, with ratings from A to D-). The Group was recognised for its actions to engage its suppliers (rated B in 2023, then A- in 2024).

(1) Reference to the existence of this mechanism is made on the page dedicated to the whistle-blowing system on the Crédit Agricole website: <https://www.credit-agricole.com/en/group/ethics-compliance/whistleblowing-system>

(2) A crime, an offence, a threat or harm to the general interest, a violation or an attempt to conceal a violation of an international agreement duly ratified or approved by France, of unilateral action of an international organisation taken on the basis of such an agreement, of the law of the European Union, of the law or of the regulations.

(3) <https://www.credit-agricole.com/en/group/ethics-compliance/whistleblowing-system>

4.2.6 METRICS AND TARGETS

The data collection scope considered for the metrics “Management of the relationship with suppliers” is France. The data collection scope considered for the metrics “Payment practices” is global.

4.2.6.1 MANAGEMENT OF THE RELATIONSHIP WITH SUPPLIERS

To measure the effectiveness of its responsible approach to relationships with its suppliers, Crédit Agricole Group uses the following metrics:

Metric	Calculation method	2025 Results	2024 Results
Share of expenses by entities registered in France from suppliers registered in France	Sum of external expenses from companies registered in France (in euros)/Total external expenses in France and abroad (in euros)	81%	80%
Share of expenses by entities registered in France from SMEs registered in France	Sum of external expenses from SMEs registered in France (in euros)/Total external expenses in France (in euros)	28.24%	29.25%
Amount of “Inclusive Purchasing” expenses in France by entities registered in France (from the Sheltered and Disability-friendly Sector)	Sum of expenses from “EA/ESAT” (adapted companies and vocational rehabilitation centres) registered in France (in euros)	5,871,848	3,843,204
Share of expenses with suppliers registered in France who have been CSR-assessed by an independent third party	Sum of expenses from suppliers registered in France and with a CSR rating from an independent third party (EcoVadis) (in euros)/Total expenses incurred externally in France (in euros)	42.05%	41.59%

The amount of inclusive purchasing expenditure increased significantly in 2025. This increase can be explained by the policies and action plans implemented to encourage inclusive purchasing and improve data reliability.

4.2.6.2 PAYMENT PRACTICES

To implement a responsible approach to relations with its suppliers, Crédit Agricole Group uses three metrics as described below. The criteria used for these metrics are as follows:

- the categories of suppliers used by the Group are “Total” and “SME” (including very small businesses). The scope covered includes entities in France and abroad;
- Crédit Agricole Group’s standard payment term is 60 calendar days from the date the invoice is issued.

AVERAGE PAYMENT TERMS IN CALENDAR DAYS

Average payment terms (in days)	2025	2024
Total	24.42	26.86
Focus on SMEs	22.03	26.59

As a result of the implemented action plans, the average payment term has been reduced to less than 25 days.

The consolidated average payment term corresponds to the average payment period, i.e. the period between the invoice payment date and the invoice issuance date in calendar days, weighted by the total number of invoices.

Group level target: Remain below 40 days.

INVOICES PAID WITHIN THE STANDARD TERMS, IN NUMBER AND IN AMOUNT (IN %)

Payments made within the standard Group terms		2025	2024
In amount (as a %)	Total	94.41%	93.90%
	Of which SMEs	95.48%	91.43%
In number (as a %)	Total	94.26%	92.39%
	Of which SMEs	95.49%	90.26%

As a result of the implemented action plans, the rate of invoices paid within standard terms has improved, both in amount and number.

The categories of suppliers used by the Group are “Total” and “SME”.

Metric	Calculation method
Share of invoices paid within the standard Group terms, in amount (All suppliers)	(Total amount of invoices – amount of invoices paid late more than 60 days after the invoicing date) / total amount of invoices
Share of invoices paid within the standard Group terms, in amount (SME suppliers)	(Total amount of SME invoices – amount of invoices paid late, more than 60 days after the invoicing date to SMEs) / total amount of SME invoices
Share of invoices paid within the standard Group terms, in number (All suppliers)	(Total number of invoices – number of invoices paid late more than 60 days after the invoicing date) / total number of invoices
Share of invoices paid within the standard Group terms, in number (SME suppliers)	(Total number of SME invoices – number of invoices paid late, more than 60 days after the invoicing date to SMEs) / total number of SME invoices

Group level target: 100% over the next two years (at 31 December 2027).

ONGOING LEGAL PROCEEDINGS CONCERNING LATE PAYMENTS

Number of legal proceedings related to late payment of invoices during the reference period (calendar year from 1 January to 31 December).

Number of legal proceedings	2025	2024
Total	0	0

Metric	Calculation method
Number of ongoing legal proceedings during the reference period	Sum of legal proceedings related to late payment of invoices during the reference period

Target: Aiming for zero by 31 December 2026.

APPENDICES

APPENDIX 1: INCORPORATION BY REFERENCE

List of Data points (DP)/Disclosure requirements (DR)	Reference in management report	Reference in document
SBM-1 40 a) i) SBM-1 40 a) ii)	Chapter 1 of the 2025 URD: “Presentation of Crédit Agricole S.A.”	1.3.1.1. Crédit Agricole S.A.’s general strategy and business model
SBM-1 42 a) SBM-1 42 b)	Chapter 1 of the 2025 URD: “Crédit Agricole Group business model”	1.3.1.1. Crédit Agricole S.A.’s general strategy and business model

APPENDIX 2: CONSISTENCY BETWEEN THE SUSTAINABILITY REPORT AND DUE DILIGENCE

Essential elements of due diligence	Paragraphs in the sustainability report
a) Embedding due diligence in governance, strategy and business model	ESRS 2 GOV 2: 1.2.1. Board of Directors 1.2.2. Executive governance ESRS 2 GOV 3: 1.2.4. Integration of sustainability-related results in incentive schemes SBM-3: 1.3.3. Material impacts, risks and opportunities and their interaction with strategy and business model
b) Engaging with affected stakeholders in all key steps of the due diligence	ESRS 2 GOV 2: 1.2.1. Board of Directors 1.2.2. Executive governance SBM-2: 1.3.2. Interests and views of stakeholders IRO-1: 1.4.1.1. General description
c) Identifying and assessing adverse impacts	IRO-1: 1.4.1.1. General description SBM-3: 1.3.3. Material impacts, risks and opportunities and their interaction with strategy and business model
d) Taking measures to address those negative impacts	ESRS 2 MDR A/Topical ESRS: 2.2.1. Transition plan for climate change mitigation 2.3. Actions and resources in relation to climate change policies 3.2.2.1. Accessibility of products and services 3.2.2.2. Cybersecurity and combating cybercrime 4.1.4.1. Promoting an ethical culture 4.1.4.3. Combating corruption 4.2.5.1. Adopting responsible behaviour in the relationship with suppliers
e) Tracking the effectiveness of these efforts and communicating	ESRS 2 MDR M/MDR T/Topical ESRS: metrics and targets: 2.4. Performance targets and measures 3.2.3. Metrics and targets 4.1.4.1. Promoting an ethical culture 4.1.4.3. Combating corruption 4.2.6.2. Payment practices

APPENDIX 3: COVERAGE OF DISCLOSURE REQUIREMENTS

List of Disclosure Requirements (DR)	Reference
ESRS 2 – BP-1	1.1.1. General basis for preparing sustainability reports
ESRS 2 – BP-2	1.1.2. Disclosures in relation to specific circumstances
ESRS 2 – GOV-1	1.2.1. Board of Directors 1.2.2. Executive governance 1.2.3. Metrics related to management bodies
ESRS 2 – GOV-2	1.2.1. Board of Directors 1.2.2. Executive governance
ESRS 2 – GOV-3	1.2.4. Integration of sustainability-related results in incentive schemes
ESRS 2 – GOV-4	1.2.5. Statement on due diligence
ESRS 2 – GOV-5	1.2.6. Risk management and internal controls over sustainability reporting
ESRS 2 – SBM-1	1.3.1. Strategy, business model and value chain
ESRS 2 – SBM-2	1.3.2. Interests and views of stakeholders
ESRS 2 – SBM-3	1.3.3. Material impacts, risks and opportunities and their interaction with strategy and business model
ESRS 2 – IRO-1	1.4.1.1. General description
ESRS 2 – IRO-2	1.4.2. Disclosure requirements in ESRS covered by the company's sustainability reports
E1 – ESRS 2 – GOV-3	1.2.4. Integration of sustainability-related results in incentive schemes

REPORT ON THE CERTIFICATION OF SUSTAINABILITY INFORMATION AND VERIFICATION OF THE DISCLOSURE REQUIREMENTS UNDER ARTICLE 8 OF REGULATION (EU) 2020/852

(Year ended 31 December 2025)

This is a translation into English of the Statutory Auditors report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852 of the Company issued in French and it is provided solely for the convenience of English-speaking users.

This report should be read in conjunction with, and construed in accordance with, French law and the H2A guidelines on “Limited assurance engagement – Certification of sustainability reporting and verification of disclosure requirements set out in Article 8 of Regulation (EU) 2020/852”.

To the General Meeting of Shareholders

CRÉDIT AGRICOLE S.A.

12, place des États-Unis

92127 Montrouge Cedex

This report is issued in our capacity as statutory auditor of CRÉDIT AGRICOLE S.A. It covers the sustainability information and the information required by Article 8 of Regulation (EU) 2020/852, relating to the year ended 31 December 2025 and included in section 2.1 “Sustainability report – Crédit Agricole S.A.” of the group management report, hereinafter the “Sustainability report”.

Our work relating to this information was carried out in an evolving context characterized by uncertainties regarding the interpretation of the regulations and the development of market practices.

Pursuant to Article L. 233-28-4 of the French Commercial Code, CRÉDIT AGRICOLE S.A. is required to include the above mentioned information in a separate section of the group management report.

This information provides an understanding of the impacts of the Group’s activities on sustainability matters, as well as how these matters influence the Group’s business development, results and situation. Sustainability matters include environmental, social and governance issues.

In accordance with paragraph II of Article L. 821-54 of the aforementioned Code, our engagement consists in carrying out the procedures necessary to issue an opinion, expressing limited assurance, on:

- compliance with the requirements arising from the sustainability reporting standards adopted by the European Commission pursuant to Article 29b of Directive (EU) 2013/34 of the European Parliament and of the Council of 26 June 2013, as amended by Directive (EU) 2022/2464 of the European Parliament and of the Council of 14 December 2022 (hereinafter the ‘ESRS’ – European Sustainability Reporting Standards), in respect of the process implemented by CRÉDIT AGRICOLE S.A. to determine the information disclosed, which includes, where applicable, the obligation to consult the Works Council as provided for in the sixth paragraph of Article L.2312-17 of the French Labour Code;
- compliance of the sustainability information included in the Sustainability report with the requirements of L. 233-28-4 of the French Commercial Code, including ESRS; and
- compliance with the reporting requirements set out in Article 8 of Regulation (EU) 2020/852.

This engagement is carried out in compliance with the ethical rules, including independence, and quality control rules prescribed by the French Commercial Code.

It is also governed by the H2A guidelines on “Limited assurance engagement – Certification of sustainability reporting and verification of disclosure requirements set out in Article 8 of Regulation (EU) 2020/852”.

In the three separate sections of the report that follow, we present, for each of the sections of our engagement, the nature of the procedures that we carried out, the conclusions that we drew from these procedures and, in support of these conclusions, the elements to which we paid particular attention and the procedures that we carried out with regard to these elements. We draw your attention to the fact that we do not express a conclusion on any of these elements taken individually and that the procedures described should be considered in the overall context of the formation of the conclusions issued in respect of each of the three sections of our engagement.

Finally, where deemed necessary to draw your attention to one or more disclosures of sustainability information provided by CRÉDIT AGRICOLE S.A. in the group management report, we have included an emphasis of matter paragraph hereafter.

LIMITS OF OUR ENGAGEMENT

As the purpose of our engagement is to express limited assurance, the nature (choice of techniques), extent (scope) and timing of the procedures are less than those required to obtain reasonable assurance.

This engagement does not consist in guaranteeing the viability or the quality of the management of CRÉDIT AGRICOLE S.A., nor in providing an assessment – which would go beyond compliance with ESRS disclosure requirements – of the appropriateness of the choices made by CRÉDIT AGRICOLE S.A. in terms of action plans, targets, policies, scenario analyses and transition plans.

Furthermore, as forward-looking information is by nature uncertain, actual future outcomes may differ significantly from the forward-looking information presented in the Sustainability Report.

Report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852

However, our engagement enables us to express conclusions regarding the process for determining the published sustainability information, the information itself, and the information published pursuant to Article 8 of Regulation (EU) 2020/852, with respect to the absence of – or, conversely, the identification of – errors, omissions or inconsistencies of such significance that they could influence the decisions of readers of the information subject to our procedures

Sustainability information and the information required under Article 8 of Regulation (EU) 2020/852 may be subject to inherent uncertainty due to the state of scientific knowledge and the quality of the external data used. Certain information is sensitive to the methodological choices, assumptions and/or estimates applied in preparing it, as presented in the Group management Report.

COMPLIANCE WITH THE ESRS OF THE PROCESS IMPLEMENTED BY CRÉDIT AGRICOLE S.A. TO DETERMINE THE INFORMATION REPORTED, AND COMPLIANCE WITH THE REQUIREMENT TO CONSULT THE SOCIAL AND ECONOMIC COMMITTEE PROVIDED FOR IN THE SIXTH PARAGRAPH OF ARTICLE L. 2312-17 OF THE FRENCH LABOUR CODE

NATURE OF PROCEDURES CARRIED OUT

Our work consisted in verifying that:

- the process defined and implemented by CRÉDIT AGRICOLE S.A., including the obligation to consult the Works Council as required by the sixth paragraph of Article L. 2312-17 of the French Labour Code, enabled the entity, in accordance with the ESRS, to identify and assess its impacts, risks and opportunities related to sustainability matters, and to identify those impacts, risks and opportunities considered material that led to the publication of sustainability information in the Sustainability Report; and
- the information provided on this process is also compliant with the ESRS.

CONCLUSION OF THE PROCEDURES CARRIED OUT

Based on the procedures we performed, we did not identify any material errors, omissions or inconsistencies regarding the compliance of the process implemented by CRÉDIT AGRICOLE S.A. with the ESRS.

EMPHASIS OF MATTERS

Without qualifying the conclusion expressed above, we draw your attention to the information presented in the section 'Double materiality analysis' of paragraph 1.1.2 'Disclosures in relation to specific circumstances' and in paragraph 1.4.1.3 'Description of the processes for identify and assess material impacts, risks and opportunities to other environmental issues' of the Sustainability Report, which describe:

- the limitations explaining why Crédit Agricole S.A. considers that, for the 2025 financial year, it is not yet in a position to reach a definitive conclusion on the materiality of topics E2, E3, E4 and E5 (Pollution, Water and Marine Resources, Biodiversity and Ecosystems, and Resource Use and Circular Economy); and
- the exploratory work being pursued by the Group in order to develop a methodology that will enable it to conclude on the materiality of these topic.

ELEMENTS THAT RECEIVED PARTICULAR ATTENTION

We present below the matters to which we paid particular attention regarding the compliance of the process implemented by CRÉDIT AGRICOLE S.A. with the ESRS for determining the information disclosed.

The information relating to how CRÉDIT AGRICOLE S.A. updated its double materiality assessment process is provided in section 1.4.1.1 "General description" of the Sustainability Report.

Through interviews with the individuals we deemed appropriate and by reviewing the available documentation, we familiarized ourselves with the analyses carried out by CRÉDIT AGRICOLE S.A. to identify and assess the internal and external factors that led to the update of the double materiality analysis process.

Based on our professional judgment, our procedures notably consisted in:

- exercising professional skepticism with respect to the documentation of the analyses performed by the Group, as well as the approach implemented to identify the internal and external factors to be considered;
- assess the appropriateness of the contextual and regulatory elements considered by the Group in light of our knowledge of the Group;
- assessing the relevance of the significant changes made by the Group regarding the identification of stakeholders and the identification of impacts, risks and opportunities, as well as the assessment of impact materiality and financial materiality, in light of our knowledge of the Group and of sectoral analyses and competitive benchmarks that we deemed relevant;
- assessing, for the significant changes affecting actual and potential impacts, risks and opportunities, the compliance of the Group's impact materiality and financial materiality assessment process (including the setting of thresholds) with the criteria defined by ESRS 1;
- assessing the appropriateness of the description provided in section 1.4.1 "Description of the processes for identifying and assessing material impacts, risks and opportunities" of the Sustainability Report.

COMPLIANCE OF THE SUSTAINABILITY INFORMATION INCLUDED IN THE SUSTAINABILITY REPORT WITH THE REQUIREMENTS OF ARTICLE L. 233-28-4 OF THE FRENCH COMMERCIAL CODE, INCLUDING THE ESRS

NATURE OF PROCEDURES CARRIED OUT

Our procedures consisted in verifying that, in accordance with legal and regulatory requirements, including the ESRS:

- the disclosures provided enable an understanding of the general basis for the preparation and governance of the sustainability information included in the Sustainability report, including the basis for determining the information relating to the value chain and the exemptions from disclosures used;
- the presentation of this information ensures its readability and understandability;
- the scope chosen by CRÉDIT AGRICOLE S.A. for providing this information is appropriate; and
- on the basis of a selection, based on our analysis of the risks of non-compliance of the information provided and the expectations of users, that this information does not contain any material errors, omissions or inconsistencies, i.e. that are likely to influence the judgement or decisions of users of this information.

CONCLUSION OF THE PROCEDURES CARRIED OUT

Based on the procedures we have carried out, we have not identified material errors, omissions or inconsistencies regarding the compliance of the sustainability information included in the Sustainability report, with the requirements of Article L. 233-28-4 of the French Commercial Code, including the ESRS.

EMPHASIS OF MATTERS

Without calling into question the conclusion expressed above, we draw your attention to the paragraphs of the Sustainability Report that set out the scope of emissions considered, as well as the limitations relating to the availability and quality of the data – which persist – and the methodologies applied by the Group in these circumstances to produce the corresponding estimates:

- for the transition plan, paragraphs 2.2.1 “Transition plan for climate change mitigation” and 2.4.1 “Targets related to climate change mitigation”; and
- for the calculation of financed emissions relating to the value chain (category 15 of scope 3 under the GHG Protocol), paragraph 2.4.2 “Gross GHG emissions for scopes 1, 2, 3 and total GHG emissions”.

ELEMENTS THAT RECEIVED PARTICULAR ATTENTION

We present below the matters to which we paid particular attention regarding the compliance of the sustainability information included in the Sustainability Report with the provisions of Article L.233-28-4 of the French Commercial Code, including with the ESRS.

INFORMATION REPORTED IN RELATION TO CLIMATE CHANGE (ESRS E1 TO E5)

The information disclosed in respect of climate change (ESRS E1) is presented in Section 2 “Responsibility for climate change” of the Sustainability Report. We present below the matters to which we paid particular attention regarding the compliance of this information with the ESRS.

With regard to the information provided on total GHG emissions (ESRS E1-6), as mentioned in section 2.4.2 “Gross scopes 1, 2, 3 GHG emissions and total GHG emissions” of the Sustainability report, our work consisted primarily of:

- obtaining an understanding of the processes, methodologies, frameworks, data, and estimates used by the group to establish the information, including operational integration and associated internal control; and
- additionally, with regard to scope 1, scope 2 and scope 3 emissions (categories 1, 2 and 6) related to the group’s own operations:
 - assessing the appropriateness of the emission factors used and the calculation of the related conversions, as well as the calculation and extrapolation assumptions, taking into account the uncertainty inherent in the state of scientific or economic knowledge and the quality of the external data,
 - verifying, on a sample basis, the underlying data used to draw up the greenhouse gas emissions assessment and traced to supporting documents, as well as the accuracy of the calculations used to establish the estimated emissions;
- in addition, with regard to financed emissions (Scope 3, category 15 of the GHG Protocol):
 - understanding the scope of assets covered as described in the aforementioned note and assess its justification with regard to the applied framework,
 - verifying that the basis used for the calculation of financed emissions corresponds to the scope of assets covered as described and reconcile it with the consolidated balance sheet,
 - examining the method for determining the estimates, including the sectoral proxies used by the group,
 - verifying, on a sample basis, the accuracy of the calculations of financed emissions.

Report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852

Regarding the definition and information provided on the Transition Plan for climate change mitigation and adaption (ESRS E1-1), as mentioned in paragraph 2.2.1 “Transition plan for climate change mitigation” of the Sustainability report, our work consisted primarily to:

- assessing the information related to the scope retained for the Transition Plan (transition plan for own operations and sectoral transition plans on the value chain) as well as the processes, methodologies, frameworks, data, and estimates used by the group to establish the published information;
- assessing the compliance with the criteria set by ESRS E1, in particular the description of the main assumptions and reference climate scenarios underlying this plan, specified that we are not required to express a conclusion on the appropriateness or the level of ambition of the transition plan’s objectives;
- assessing the consistency of this transition plan with the commitments made by the group as transcribed in the governance minutes or other communications made by the group;
- assessing whether the transition plan is in line with the framework of the strategic plan as approved by the management and the group’s financial planning.

COMPLIANCE WITH THE REPORTING REQUIREMENTS SET OUT IN ARTICLE 8 OF REGULATION (EU) 2020/852

NATURE OF PROCEDURES CARRIED OUT

Our procedures consisted in verifying the process implemented by CRÉDIT AGRICOLE S.A. to determine the eligible and aligned nature of the activities of the entities included in the consolidation.

They also involved verifying the information reported pursuant to Article 8 of Regulation (EU) 2020/852, which involves checking:

- the compliance with the rules applicable to the presentation of this information to ensure that it is readable and understandable;
- on the basis of a selection, the absence of material errors, omissions or inconsistencies in the information provided, i.e. information likely to influence the judgement or decisions of users of this information.

CONCLUSION OF THE PROCEDURES CARRIED OUT

Based on the procedures we have carried out, we have not identified any material errors, omissions or inconsistencies relating to compliance with the requirements of Article 8 of Regulation (EU) 2020/852.

ELEMENTS THAT RECEIVED PARTICULAR ATTENTION

We determined that there were no specific items to communicate in our report.

1. GENERAL INFORMATION

1.1. BASIS FOR PREPARING REPORTS

1.1.1 GENERAL BASIS FOR PREPARING SUSTAINABILITY REPORTS

Crédit Agricole Group has prepared its sustainability report on the basis of the same scope as the consolidated financial statements.

The Group's own operations are defined as those involving entities under exclusive control, while those involving entities for which it exercises joint control or significant leverage are to be considered part of the undertaking's value chain, as defined in part 1.3.1.2 "Crédit Agricole Group's value chain".

Taxonomy reporting is produced on the basis of the prudential scope of consolidation, as required by Regulation 2021/2178.

The table below lists Crédit Agricole Group entities at 31 December 2025 that are exempt from preparing an individual or consolidated sustainability report in their own management report.

COMPANIES EXEMPT FROM PUBLISHING THEIR OWN REPORTS AND COVERED BY THE CREDIT AGRICOLE GROUP'S REPORTS

CACEIS Bank
CACEIS S.A.
Crédit Agricole Leasing & Factoring
CA Indosuez
Crédit Agricole Bank Polska S.A.
Banque Degroof Petercam
LCL
Agos
Creditplus Bank AG
Crédit Agricole Personal Finance & Mobility
Crédit Agricole du Nord-Est
Crédit Agricole de Champagne Bourgogne
Crédit Agricole de Nord Midi-Pyrénées
Crédit Agricole de Charente-Maritime Deux-Sèvres
Crédit Agricole des Côtes-d'Armor
Crédit Agricole de Charente Périgord
Crédit Agricole de Franche-Comté
Crédit Agricole du Finistère
Crédit Agricole d'Aquitaine
Crédit Agricole du Val de France
Crédit Agricole de Centre-Loire
Crédit Agricole de Lorraine
Crédit Agricole de Normandie
Crédit Agricole de Centre-France
Crédit Agricole de Pyrénées Gascogne
Crédit Agricole de Sud Méditerranée
Crédit Agricole d'Alsace Vosges
Crédit Agricole du Centre-Est
Crédit Agricole d'Anjou Maine
Crédit Agricole des Savoie
Crédit Agricole de Provence-Côte d'Azur
Crédit Agricole du Centre-Ouest
Crédit Agricole de l'Île de la Réunion

1.1.2 DISCLOSURES IN RELATION TO SPECIFIC CIRCUMSTANCES

This report has been prepared in accordance with the obligations set by the transposition into French law of the European Directive on the disclosure of sustainability information (known as the “CSRD” 2022/2464/EU Directive) and of the European Regulation 2020/852 of 18 June 2020, as amended by the European Delegated Regulation 2026/73 published on 8 January 2026 (so-called “Taxonomy” regulation). The preparation of the sustainability information was carried out in a context of uncertainty regarding the interpretation of the texts for the financial sector players, represented by the financing, insurance or asset management businesses within the Crédit Agricole Group.

In preparing this second sustainability report, and despite the progress made since the first report, Crédit Agricole Group was sometimes faced with a lack of established reference frameworks, the unavailability of certain data and difficulties in collecting information, particularly on its value chain. In this context, the Crédit Agricole Group has striven to comply with the requirements of the ESRS in force at the date of preparation of the sustainability report, relying on the data available within the deadlines set for its preparation.

DOUBLE MATERIALITY ANALYSIS

Regarding the double materiality analysis, and more particularly that related to the value chain, the Crédit Agricole Group was faced with limitations related to the availability of data, the degree of maturity of evaluation methodologies and their ability to cover the diversity of its activities. Assumptions, projections and structuring approximations detailed in the relevant sections of the report were used. This analysis will be reassessed in future years, based on changes to the framework (methodology, available data, other regulatory changes impacting actors in the value chain) and, where appropriate, sector-specific frameworks, particularly on Nature themes (see part 1.4.1.3. “Description of the process to identify and assess material impacts, risks and opportunities related to other environmental issues”).

INFORMATION PRESENTED IN THE REPORT

For all the information presented in this report, the Crédit Agricole Group has chosen approaches applicable from the first financial year, using methodologies and estimates for several categories of data, including those relating to the value chain, such as the calculation of greenhouse gas emissions. Where an estimate has been used, a specific mention is made in the paragraph where the data is disclosed. For example, with regard to greenhouse gas emissions, the information necessary to understand the data can be found in part 2.4.2 “Gross scopes 1, 2, 3 GHG emissions and total GHG emissions”, following the table “Total GHG emissions broken down by Scopes 1 and 2 and significant Scope 3 emissions”.

TRANSITION PLAN

Information on the specific disclosure requirements for the Transition Plan is provided in part 2.2.1 “Transition plan for climate change mitigation”.

EUROPEAN TAXONOMY

The information published in the sections “Regulatory framework and requirements” and “Methodology for determining aligned assets” of part 2.4.5 “Information published on activities related to the EU Taxonomy” present the main methodological assumptions used by Crédit Agricole Group to assess, in particular, the alignment of loans granted to individuals.

PERSPECTIVE

In addition, in the future, to take into account market best practices and recommendations as well as a better knowledge of these new regulatory and normative provisions, the Group may have to develop certain reporting and communication practices, as well as the internal control mechanism relating to the production of sustainability information, in a process of continuous improvement.

1.2. SUSTAINABILITY GOVERNANCE

In terms of sustainability, the Board of Directors of Crédit Agricole S.A., a listed company and the corporate centre of the Crédit Agricole Group, ensures that the Group's strategic guidelines take concerns and risks into account. It ensures the consistency of the undertaking's commitments and project as part of monitoring the implementation of the Societal Project. The Board takes sustainability matters and risks into account in its strategic decisions, based on the strategic analyses and risk management policies presented to it and on the risk framework review submitted for its adoption. Finally, it reports to the General Meeting on the

undertaking's ESG strategy and non-financial performance, ensuring the transparency and accuracy of this communication.

The integration of sustainability matters within the Board of Directors and its specialised committees is described below in part 1.2.1.3 "Role of the Board of Directors in monitoring impacts, risks and opportunities".

Executive governance of sustainability matters is described in part 1.2.2 "Executive governance".

1.2.1 BOARD OF DIRECTORS

1.2.1.1 COMPOSITION AND DIVERSITY OF THE BOARD OF DIRECTORS

COMPOSITION OF THE BOARD OF DIRECTORS

See Chapter 3 "Report of the Board of Directors", parts 1.1 "Information relative to the Board's composition and ways of operating", except for paragraphs 5 to 9 and 2 "Additional information on corporate officers".

DIVERSITY OF THE BOARD OF DIRECTORS

See Chapter 3 "Report of the Board of Directors", part 1.1.3 "Governance and diversity policy", section "Board diversity policy".

1.2.1.2 EXPERTISE OF THE BOARD OF DIRECTORS

REQUIREMENTS IN TERMS OF BOARD EXPERTISE

See Chapter 3 "Report of the Board of Directors", part 1.1.3 "Governance and diversity policy", section "Knowledge and skills".

ANNUAL ASSESSMENT OF THE BOARD OF DIRECTORS

See Chapter 3 "Report of the Board of Directors", part 1.1.3 "Governance and diversity policy", sections "Knowledge and skills" and "Assessment of the Board of Directors".

TRAINING OF THE BOARD OF DIRECTORS

See Chapter 3 “Report of the Board of Directors”, part 1.1.3 “Governance and diversity policy”, section “Training of the Board of Directors”.

The Board’s training programme is drawn up taking into account (i) the needs and/or requests expressed by Directors and (ii) the Group’s priority issues, including impacts, risks and opportunities.

In 2025, all Board members attended at least one of the following training sessions:

- training on internal models: modelling process and model governance;
- a presentation of a benchmark on the application of the CSRD regulation based on the production of the first sustainability reports;
- an overview of regulatory news.

Several specialised training courses have also been held within certain committees, including:

- for members of the Audit Committee: a fiscal update, with a focus on the temporary additional corporate income tax, a presentation of the impacts of IFRS 18 and an update on cooperative investment certificates (*certificats coopératifs d’investissement* or CCIs);
- for members of the US Risk Committee: regulatory changes in the United States, the outlook for financial regulation, presentation of the economic environment and an update on anti-money laundering and international sanctions regulations.

In addition, Directors not from the Regional Banks benefit from an immersion experience at a Regional Bank.

The Board’s training programme for 2026 includes, in addition to individual or committee training, group sessions on the following topics:

- a session on tokenisation in finance;
- regulatory and compliance news, with a focus on the Digital Operational Resilience (DORA) regulation;
- a presentation on the Group’s new geographic areas with a focus on Asia;
- a review of partnerships and joint ventures within the Group.

This 2026 training programme may be updated in line with current events. It should be noted that the Board of Directors’ group training sessions are led by in-house and/or third-party experts.

ADDITIONAL INFORMATION ON CORPORATE OFFICERS

See Chapter 3 “Report of the Board of Directors”, part 2 “Additional information on corporate officers”.

COMPOSITION OF THE BOARD OF DIRECTORS AT 31 DECEMBER 2025

See Chapter 3 “Report of the Board of Directors”, part 2.1 “Composition of the Board of Directors at 31 December 2025”.

MANDATES AND POSITIONS HELD BY CORPORATE OFFICERS

See Chapter 3 “Report of the Board of Directors”, part 2.2 “Mandates and positions held by corporate officers”.

1.2.1.3 ROLE OF THE BOARD OF DIRECTORS IN MONITORING IMPACTS, RISKS AND OPPORTUNITIES

ALLOCATION OF RESPONSIBILITIES WITHIN CORPORATE GOVERNANCE

The division of powers between the Board of Directors and Executive Management is set out in Articles 15 to 17 of the Articles of Association, which are available to consult at Crédit Agricole S.A.’s registered office and on its website: www.credit-agricole.com.

See also Chapter 3 “Report of the Board of Directors”, part 1.1.4 “Other information required by Articles L. 225-37-4 and L. 22-10-10 of the French Commercial Code”, sections “Limitations placed by the Board of Directors on the powers of the Chief Executive Officer”, “Agreements between corporate officers and subsidiaries” and “Control procedure for regulated agreements and agreements relating to ordinary transactions entered into under normal conditions”. Finally, see part 1.2.1 “Board activity”, section “Related-party agreements”.

INTEGRATION OF SUSTAINABILITY MATTERS WITHIN THE BOARD OF DIRECTORS AND ITS SPECIALISED COMMITTEES

At its plenary meetings, the Board ensures the consistency of the undertaking’s commitments and project of the undertaking with regard to social and environmental issues, particularly:

- when examining strategic projects;
- when reviewing the Risk Management Framework submitted for adoption, if the scope of the activities concerned justifies it, in particular to ensure that climate and environmental risks are taken into account.

In addition, the matters submitted to the decision of the Board of Directors are reviewed in advance by one or more of its seven specialised committees, which are responsible for preparing the Board’s deliberations and/or submitting their opinions and recommendations to the Board. In the environmental and social field, Crédit Agricole S.A. has chosen to assign specific responsibilities to two committees:

- the review of the ESG policy, including climate strategy monitoring ahead of the General Meeting, has been entrusted to the Societal Commitment Committee;
- the review of non-financial information, and in particular the preparation and monitoring of the sustainability reports of Crédit Agricole S.A. and Crédit Agricole Group, has been entrusted to the Audit Committee. The regulatory changes to be expected in environmental matters, in particular in connection with the “Omnibus” Directive are carried out jointly with the collaboration with the Societal Commitment Committee.

Notwithstanding these specific responsibilities, the Board has reaffirmed its ambition to maintain a cross-functional approach to CSR issues, involving most of the specialised committees, depending on the subject. The specialised committees are involved in the following areas in particular:

- the Risk Committee, for the effects of climate risk on the various other risk levels;
- the Compensation Committee, to assess the ESG performance of executives;
- the Appointments and Governance Committee, to promote a culture of ethics within the Group;
- the Strategic Committee, for understanding ESG risks in external growth operations, and in the guidelines for the Medium-Term Plan.

THE ACTIVITY OF THE BOARD OF DIRECTORS AND ITS SPECIALISED COMMITTEES

All of the Board's supervisory activities are set out in Chapter 3, part 1.2. "Board activity in 2025" and more specifically part 1.3. "Activities of the Board's specialised committees".

The main issues examined by the Board in relation to sustainability, following reviews, advice and/or proposals from the specialised committees, are as follows:

1. After analysis by the Audit Committee:

- the sustainability reports and the monitoring of the process used to draw them up, in conjunction with the Societal Commitment Committee, and in particular the task plan for sustainability information certifiers.

2. After analysis by the Risk Committee:

- the Annual Internal Control Report and the half-yearly report on internal control, drawn up under the coordination of the Group Risk department;
- changes in credit, market, operational and security risks, as well as the risk dashboard and monitoring of IT and cybersecurity risks;
- approving the Risk Frameworks that govern risk-taking in the Group's main areas of activity;
- in the area of legal affairs, the progress of ongoing litigation and administrative investigations;
- the report on compliance with anti-money laundering and terrorist financing.

3. After analysis by the Strategy Committee:

- preparation of the ACT 2028 Medium-Term Plan;
- planned disposals and acquisitions (see Chapter 3, part 1.2. "Board activity in 2025", "Strategic guidelines" section).

4. After analysis by the Compensation Committee:

- the fixed compensation, annual personal variable compensation, and the terms and conditions and criteria used to determine the annual variable compensation of the executive corporate officers (Chairman, Chief Executive Officer and Deputy Chief Executive Officers), taking into account regulatory provisions as well as the CSR performance criteria that were and will be presented to the General Meeting as part of the ex-ante and ex-post vote on executive compensation;
- an update on preparations for the implementation of the Pay Transparency directive;
- the guidelines of the Human Project, as part of the ACT 2028 Medium-Term Plan;
- the share capital increase reserved for employees.

5. After analysis by the Appointments and Governance Committee:

- the election of Eric Vial as Chairman of the Board of Directors, succeeding Dominique Lefebvre as of 1 January 2026;
- the regulation of the duration of the Chief Executive Officer's duties and the related amendment of the Board's Rules of Procedure (see above);
- the results of the self-assessment of the Board's operation and its individual and collective expertise, and possible ways of improving governance;
- the independence of Directors in accordance with the Afep/Medef Code and areas of non-compliance with this Code;
- the progress of work on succession plans for Crédit Agricole S.A.'s key functions;

- the updating of the Board of Directors' Rules of Procedure and those of certain specialised committees, and in particular:
 - the updating of the Rules of Procedure of the Board, the Risk Committee and the Audit Committee regarding the reporting of internal audit subjects to the Audit Committee;
 - the updating of the Rules of Procedure of the Board and the Risk Committee regarding the monitoring of risks related to information and communication technologies, particularly with regard to the DORA regulation;
 - the updating of the Board's Rules of Procedure following the updating of the Code of Ethics;
- the amendment of the following two procedural notes:
 - the Board's procedural note setting out the principles of the succession processes followed by the Board for its Chairman, the Chief Executive Officer and members of the Executive Committee identified as key functions;
 - the Board's procedural note on the profiles, skills and availability required to perform the duties of Director of Crédit Agricole S.A.;
 - the procedural note of the Board of Directors of Crédit Agricole S.A. relating to the consideration of social and environmental issues in the determination of activity guidelines.
- the policy on gender equality at work and equal pay within Crédit Agricole S.A. parent company, and the initiatives undertaken at Crédit Agricole S.A. group level to promote gender equality at work, diversity and equal representation in management bodies;
- discussions with the Group Head of Compliance on the roll-out of the ethical culture and its assessment, including the updating of the Code of Ethics and the Code of Conduct.

6. After analysis by the Societal Commitment Committee:

- the review of the Vigilance Plan, which forms part of the report on corporate governance approved by the Board of Directors;
- the climate dashboard, which is a monitoring tool for Crédit Agricole Group's decarbonisation pathways;
- the 2025 Carbon budget, included in the financial budget;
- the adoption of "Electricity" and "Road transport" sectoral policies;
- the regulatory changes to be expected in environmental matters, in particular in connection with the "Omnibus" Directive.

7. Other issues examined by the Board included:

- the review of the annual statement to the UK authorities under the Modern Slavery Act;
- the authorisation of related-party agreements.

THE ROLE OF THE BOARD IN BUSINESS CONDUCT

See Chapter 3, part 1.3.8 "Appointments and Governance Committee", section "Conflicts of interest policy".

See also the "Code of Ethics of Crédit Agricole Group" and "Crédit Agricole S.A. Directors' Code of conduct" included in the Rules of procedures of the Board of Directors, which are available to consult at Crédit Agricole S.A.'s registered office and on its website: www.credit-agricole.com.

Regarding expertise of the Board of Directors in matters related to business conduct, see part 1.2.1.2 "Expertise of the Board of Directors".

1.2.2 EXECUTIVE GOVERNANCE

There are 18 members of the Executive Committee, listed below.

COMPOSITION OF THE EXECUTIVE COMMITTEE AT 1 OCTOBER 2025

Chief Executive Officer	Olivier GAVALDA
Deputy Chief Executive Officer	Jérôme GRIVET
Chief Executive Officer of Crédit Agricole CIB, Head of Large Customers division	Jean-François BALAY
Chief Executive Officer of Amundi	Valérie BAUDSON
Director of Technology Transformation and Chief Executive Officer of CA-GIP	Olivier BITON
Chief Executive Officer of Crédit Agricole Italia and Group Senior Country Officer in Italy	Hugues BRASSEUR
Chief Sustainability and Impact Officer	Éric CAMPOS
Chief Executive Officer of Crédit Agricole Assurances and Chief Executive Officer of Predica	Nicolas DENIS
Deputy General Manager, Head of Transformation, Human Resources and Transitions division	Grégory ERPHELIN
Corporate Secretary	Véronique FAUJOUR
Deputy General Manager, Head of Customer, Development and Innovation division	Gérald GRÉGOIRE
Deputy General Manager, Head of Finance and Steering division	Clotilde L'ANGEVIN
Chief Executive Officer of LCL	Serge MAGDELEINE
Deputy General Manager, Head of International Banking and Services division and Chief Executive Officer of Crédit Agricole Personal Finance & Mobility	Stéphane PRIAMI
Group Head of Control and Audit	Laurence RENOULT
Group Head of Compliance	Hubert REYNIER
Group Human Resources Director	Anne-Catherine ROPERS
Deputy General Manager, Head of Risk division	Valérie WANQUET

The Executive Committee is made up of 6 women and 12 men, i.e. approximately 33% women and 67% men.

Within Crédit Agricole S.A., the **Executive Committee** manages the operational development of the guidelines defined by the Board of Directors. To carry out its tasks of managing, controlling and monitoring impacts, risks and opportunities, the Executive Committee relies on existing committees, which have been given additional tasks and roles to meet the expectations of the CSRD.

The **ESG Strategy Committee** reviews the components of the ESG strategy and proposes them to the Board of Directors' Societal Commitment Committee for approval. Its tasks include approving sector-specific policies, monitoring the implementation of ESG commitments (including climate change, support for customer transitions and accessibility of products and services), decision making on sensitive issues, examining very high-risk areas in terms of CSR, providing information on ESG ratings and handling controversies. Within the framework of the CSRD, two tasks have been added to the ESG Strategy Committee's mandate: approving the double-materiality analysis and the sustainability report for Crédit Agricole S.A. This committee meets every two months and is made up of the Chief Executive Officer of Crédit Agricole S.A., the Deputy Chief Executive Officer, the Deputy General Manager in charge of the Transformation, Human Resources and Transitions division, the Chief Sustainability and Impact Officer, the Chief Executive Officer of Crédit Agricole CIB, the Chief Executive Officer of Amundi, the Chief Executive Officer of Crédit Agricole Assurances, the Head of the Group Risk department, the Group Head of Compliance, and the Corporate Secretary of Crédit Agricole S.A.

Initially created in 2022, the **Climate Sponsor Committee** oversees work related to defining Net Zero pathways. Chaired by the Chairman of a Regional Bank, this committee is made up of the Chief Executive Officers of Crédit Agricole S.A.'s main subsidiaries, representatives of the Regional Banks and representatives of Crédit Agricole S.A. Meetings are currently held on a quarterly basis, but may change as required.

Lastly, the **Sustainable Finance Regulation Umbrella Committee** coordinates all projects relating to sustainable finance. Chaired by the Deputy General Manager in charge of the Finance and Steering division and made up of representatives of the Executive Management of the subsidiaries and business lines, this committee approves Group standards relating to the sustainable finance regulations and monitors their implementation. This committee meets every two months.

In addition, the Executive Committee is represented in each business line by a specialised committee, which is responsible for monitoring and validating the impacts, risks and opportunities within its scope, as well as overseeing the resulting policies, action plans and targets. These various committees are decision-making committees for their business lines and are generally chaired by the Chief Executive Officer, the Deputy Chief Executive Officer or the relevant Deputy General Managers. The main committees of the business lines concerned are as follows:

- Crédit Agricole S.A.'s **Group Compliance Management Committee** is involved in defining, rolling out and monitoring compliance policies in the areas of ethics, avoiding conflicts of interest, combating corruption, combating financial crime, protecting whistleblowers and detecting market abuse. This body, which meets on a monthly basis, is regularly kept up-to-date on the effectiveness of these policies, incidents and developments, and is involved in the validation process;

- Crédit Agricole S.A.'s **HR policies** are monitored by decision-making bodies such as the **HR Directors' Committee** of Crédit Agricole S.A. (which meets monthly), which determines and approves Human Resources policies (see part 3.1.2 "Policies, action plans and resources mobilised as part of the HR policy" for more detailed information on this subject);
- the strategy and decisions affecting the Responsible Purchasing Policy are the responsibility of the **Strategic Purchasing Committee**, a cross-functional body at Group level. This body is composed of a Regional Bank Chairman, Chief Executive Officers of the subsidiaries of Crédit Agricole S.A. and Regional Banks, and representatives of the Fédération nationale du Crédit Agricole (FNCA) and of Crédit Agricole S.A.;
- the **Group Security Committee** (CSG), which reports to the Executive Committee, is the umbrella body for security governance within the Group. This decision-making committee defines the security strategy and assesses the Group's level of control in the field of information systems security.

For this update of the double materiality analysis, the conclusions were validated by the Executive Committee of Crédit Agricole S.A.

1.2.3 METRICS RELATED TO THE BOARD OF DIRECTORS AND MANAGEMENT BODIES

EQUALITY WITHIN THE ADMINISTRATIVE, MANAGEMENT AND SUPERVISORY BODIES

	2025	2024
Members of the Board of Directors		
Women	50%	44%
Men	50%	56%
Members of the Executive Committee		
Women	33%	29%
Men	67%	71%
Average ratio of women to men	0.71	0.59*

* 2024 ratio adjusted in 2025 following a change in scope.

PERCENTAGE OF INDEPENDENT DIRECTORS

	2025	2024
Share of independent Directors (as a %)	33	33

1.2.4 INTEGRATION OF SUSTAINABILITY-RELATED RESULTS IN INCENTIVE SCHEMES

1. CRÉDIT AGRICOLE S.A.

For further information, please refer to the Crédit Agricole S.A. sustainability report, specifically part 1.2.4, "Integration of sustainability-related performance in incentive schemes".

2. CRÉDIT AGRICOLE REGIONAL BANKS

Each Crédit Agricole Regional Bank has its own reward policy (see part 3.1.2.5 "Performance and compensation" and more particularly the "Performance and compensation policy" section), which is based, for employees in particular, on the Crédit Agricole national collective bargaining agreement. As regards executives and corporate officers, the latter have a collective status that is subject to approval by the corporate centre. Thus, the reward for corporate officers adheres to this collective status and is subject to approval by the Board of Directors of each entity every year. In line with cooperative Retail Banking's Raison d'Être, compensation takes into account the dimensions of sustainable performance beyond short-term economic results alone without specific sustainability and climate incentive mechanisms forming part of the variable compensation.

1.2.5 STATEMENT ON DUE DILIGENCE

See Appendix 2: "Consistency between the sustainability report and due diligence".

1.2.6 RISK MANAGEMENT AND INTERNAL CONTROLS OVER SUSTAINABILITY REPORTING

DESCRIPTION OF THE ROLES AND RESPONSIBILITIES INVOLVED IN PRODUCING THE SUSTAINABILITY REPORT

The Financial Communication department oversees the process of producing and approving the sustainability reports of the Crédit Agricole Group and Crédit Agricole S.A., notably by working with all contributors to draw up a macro production schedule.

In addition, the Financial Communication department coordinates relations with the Statutory Auditors involved in verifying the sustainability reports of Crédit Agricole S.A. and the Crédit Agricole Group.

The Sustainability and Impact department oversees the ESG strategy in relation to environmental and societal issues. In addition, the Sustainability and Impact department coordinates the double materiality assessment.

The Group's various central departments, business lines and sectors contribute to the production of the sustainability report. To this end, they are responsible for:

- defining CSRD policies and action plans specific to their themes (human resources, compliance, risks, purchasing, sustainability and impact etc.);
- drafting narratives and producing metrics in response to regulatory requirements;
- leading the double materiality assessment within their business lines or divisions;
- implementing corrective action plans to improve data quality.

DESCRIPTION OF APPROVAL FOR THE SUSTAINABILITY REPORT PRODUCTION PROCESS

The committee structure inherent in the process of approving Crédit Agricole Group's sustainability report is explained in detail in part 2.1 "Governance of this sustainability report".

PERMANENT CONTROL STRUCTURE

DESCRIPTION OF THE MAIN FEATURES AND ELEMENTS OF THE RISK MANAGEMENT AND INTERNAL CONTROL PROCESSES AND SYSTEMS RELATED TO SUSTAINABILITY REPORTING

The permanent control system for sustainability reporting is currently being structured. The aim is to include:

- at the entity level: controls to be carried out by entities contributing to this information and/or issuing their own sustainability reports;
- at the Group level: controls to be carried out by the central departments contributing to the information, and controls to be carried out by the teams in charge of the quantitative parts of the reporting.

This system aims to control sustainability-related activities and associated risks, taking into consideration the specific characteristics of the organisation, the control system already in place, procedures and operating methods.

DESCRIPTION OF THE APPROACH USED FOR RISK ASSESSMENT

Risks related to sustainability reporting, or their associated risk factors, are assessed as part of the operational risk mapping for processes that are sufficiently stable from an operational perspective. This process analysis approach is governed by a methodology that is common to the entire Group.

The operational risk mapping is carried out by the operational departments with a second review conducted by the second line of defence. The maps are updated at intervals that depend on the criticality level of the processes and when new activities and/or new products or significant events impact their activities (reorganisations, IT migration, possible outsourcing, changes in the consolidated supervisory scope). This assessment shall consider: recorded or potential operational losses identified during incident

reporting and their consequences; the results of controls and their evolution; the regulatory environment; the results of internal or external audits; and the implementation of action plans. This practice is carried out continuously throughout the year by each department, cross-disciplinary function and entity.

DESCRIPTION OF THE MAIN RISKS IDENTIFIED AND THEIR MITIGATION STRATEGIES

The main risks identified with regard to sustainability reporting are as follows:

- failure to meet internally defined production deadlines;
- failure to collect and update data;
- failure to analyse data and/or risks; and
- non-compliance with sustainability and due diligence regulations.

In order to limit the identified risks, an operational control and second-line review system oversees the production of the sustainability report. The control system currently being implemented will mitigate the main risks identified.

The main conclusions from the internal control system are communicated to the Internal Control Committee of the Accounting and Regulatory Information department for the aggregation of quantitative data. In the event of an alert, the Group system common to all types of risk applies, with possible escalation to the Executive Committee of Crédit Agricole S.A.

THE INVOLVEMENT OF INTERNAL CONTROL IN MANAGING RISKS RELATED TO SUSTAINABILITY REPORTING

The internal control framework for sustainability reporting is based on the same model as the framework applicable to other types of risk. It relies on each employee and involves the Group's three lines of defence:

- the first line of defence, made up of the operational business lines, performs first-level controls (controls 1 and controls 2.1);
- the second line of defence, made up of the Risk Management and Compliance business lines, performs second-level controls (controls 2.2);
- the third line of defence, consisting of the Audit-Inspection business line, performs third-level controls (periodic control).

1.3. SUSTAINABILITY STRATEGY

1.3.1 STRATEGY, BUSINESS MODEL AND VALUE CHAIN

1.3.1.1 CRÉDIT AGRICOLE GROUP'S GENERAL STRATEGY AND BUSINESS MODEL

Guided by its Raison d'Être, Crédit Agricole Group is rolling out its universal customer-focused banking model, which aims to meet the needs of all its customers, in all territories, via all distribution channels. Crédit Agricole Group offers a wide range of financial products and services structured by its five core business lines: Asset Gathering, Retail Banking, Specialised Financial Services, Large Customers, Specialised Activities and Subsidiaries.

The core business lines offer their products and services to their own customers – such as individual, SME, farmer, corporate and local authority customers – and to those of the retail banks, in the following areas:

- supporting and advising customers at every stage of their lives;
- providing financing, savings and insurance solutions;
- developing investment solutions;
- offering complementary services (payment instruments, real estate, mobility, health etc.).

The products and services offered are summarised below:

- bank accounts and payment management;
- financing activities;
- individual and group insurance: savings/retirement, death & disability/borrower's insurance and property and casualty insurance;
- savings and investment solutions;
- consulting services;
- specialised services: leasing, factoring.

The products and services and target customers are described in more detail in Chapter 1 "About Crédit Agricole Group".

In order to put its sustainability strategy into practice, on 1 December 2021 the Crédit Agricole Group unveiled its Societal Project, embodying the social and environmental dimension of its strategic vision. This ambitious plan is built around three fundamental pillars, reflecting the Group's commitment to act in the interests of society.

Firstly, the Group is tackling the climate challenge by committing itself to promoting a low-carbon economy. It is positioning itself as a key player in the financing of the energy transition, developing its business lines to integrate the climate emergency aspect into all its activities and supporting innovative, environmentally responsible projects, while striving to reduce its carbon footprint.

Secondly, Crédit Agricole focuses on social cohesion and inclusion. It promotes access to banking services for everyone by developing initiatives to combat financial insecurity and strengthening its role as a retail bank. Lastly, the Crédit Agricole Group is committed to supporting agricultural and agri-food transitions. It supports innovation and competitiveness in these sectors, which are essential to the economy and food sovereignty, while promoting sustainable practices that respect the environment.

Through this Societal Project, Crédit Agricole reaffirms its role as a committed stakeholder, aware of its responsibilities towards society and determined to contribute actively to a more sustainable and inclusive future.

10 COLLECTIVE COMMITMENTS TO THE SOCIETAL PROJECT

Taking action for climate and transition to a low carbon economy

- ▶ #1 Contribute to carbon neutrality by 2050 through our own footprint and our investment and financing portfolios
- ▶ #2 Advise and support all of our customers in their energy transition
- ▶ #3 Integrate non-financial performance criteria into the analysis of 100% of our financing to undertakings and farmers

Strengthening cohesion and social inclusion

- ▶ #4 Offer a range of products and services that do not exclude any customer, in order to foster social and digital inclusion and adapt to economic and societal changes
- ▶ #5 Help to revitalise the most vulnerable regions and reduce social inequalities
- ▶ #6 Promote the integration of young people through employment and training
- ▶ #7 Increase gender parity and diversity across all Crédit Agricole entities and within its governance

Accomplish agricultural and agri-food transitions

- ▶ #8 Support the evolution of techniques towards a competitive and sustainable agri-food system
- ▶ #9 Enable French agriculture to contribute actively to the fight against climate change
- ▶ #10 Contribute to strengthening food sovereignty

Crédit Agricole's sustainability strategy is part of the Group's Societal Project and fully integrates its utility and universality ambition: to make progress accessible to everyone and support the major societal transformations. By formalising its Societal Project, the Group has expressed its commitment to being useful to society and defined its multi-year roadmap. This encourages the convergence of short- and medium-term issues with long-term issues and allows the Group to pursue its development path by creating sustainable value for its customers and society.

In this way, Crédit Agricole Group supports all its customers in environmental transitions (energy, housing, mobility etc.) and societal transitions (inclusion, health and ageing well etc.) through all its product and service ranges. The sustainability strategy is based on five pillars:

- governance dedicated to the Societal Project strategy and its implementation;
- compliance in the interest of customers and society;
- an environmental strategy based on scientific facts;
- a social strategy driven by utility and universality;
- a support strategy for the agricultural and agri-food sectors.

General information

Crédit Agricole has presented its new Medium-Term Strategic Plan, ACT 2028, which lays the foundations for its ambitions for the future as a leading bank in Europe, a leader in new technologies and a leader in transitions. The priorities of the Societal Project were updated in 2025 within this framework, defined following a collaborative effort involving Crédit Agricole S.A.'s central departments and the entities, and made public on 18 November 2025. They illustrate Crédit Agricole's reaffirmed ambition to lead the transition through two commitments:

- **to be a leader in the environmental transition economy:** Crédit Agricole has reaffirmed its Net Zero pathways and strengthened its Climate strategy. The Group aims to develop the widest range of responsible investments on the market and to position itself as a major player in climate change adaptation. Finally the Group innovates by launching two initiatives in favor of nature ⁽¹⁾;
- **to amplify its impact in order to support regional vitality and a “just transition”:** the Group aims to establish itself as the leader in access to sustainable housing in France, while taking concrete actions that allow everyone to access essential services locally (health, mobility and renewable energy). True to its identity, Crédit Agricole continues to support the agricultural and agri-food transitions.

The Group will roll out its ambition for the 2026-2028 period, with a commitment structured around five quantitative metrics, which will be monitored from 2026 onwards. These markers embody the Group's desire to place sustainability at the heart of its business in order to best serve its customers. Crédit Agricole is thus leveraging its role as a major banking and insurance player in both Europe and worldwide to support the environmental and societal transitions at the heart of the regions:

Metrics	Unit	2028 target	Entities concerned	Geographical coverage	Categories of customers involved
Green-brown ratio ⁽¹⁾	Ratio	90/10	Crédit Agricole Group	Global	All
Financing of environmental and social transitions ⁽²⁾	€bn	240	Crédit Agricole Group	Global	All
Corporate and Investment Banking revenues related to sustainable finance ⁽³⁾	€m	1,000	CACIB	Global	Corporates
Supported housing undergoing energy renovations	Number	600,000	CAPFM CAT&E.	France	Individuals
Net inflows in retirement savings	€bn	75	Amundi	Europe	All

(1) Share of exposure to low-carbon energy vs. share of exposures linked to fossil fuel extraction (oil, gas, coal).

(2) Financing of the environmental transition, financing of social inclusion and general financing of transitions.

(3) Any transaction with a sustainable financing structure in line with market and Group standards.

BREAKDOWN OF REVENUES BY CONTROVERSIAL SECTORS

Crédit Agricole Group does not record any direct revenue from activities related to fossil fuels, chemicals, controversial weapons, tobacco within the scope of its Own Operations (production, marketing etc.) that is to say excluding financing, investment and insurance activities.

(1) CA Capital Naturel and a Climate & Nature Force.

1.3.1.2 CRÉDIT AGRICOLE GROUP'S VALUE CHAIN

Crédit Agricole Group operates in three main areas: financing, investment and insurance. For all products and services, each area covers the design, marketing and distribution of offerings all the way to their use by end customers.

Crédit Agricole Group uses a variety of distribution channels to offer a wide range of services to its customer base. Physical

Activities related to financing, investment and insurance constitute Crédit Agricole Group's value chain. This is illustrated in the diagram below, which shows the subsidiaries operating in each business division:

branches provide direct, personalised contact with advisors. Online platforms and mobile applications are also channels for distributing products and services to all types of customers.

To ensure the smooth running of its business, Crédit Agricole uses suppliers in three main areas, namely property purchases, purchases of services, and IT hardware and software.

		FINANCING	INVESTMENT	INSURANCE	OWN OPERATIONS ⁽¹⁾

	Crédit Agricole Immobilier				●

(1) Own operations correspond to other Group activities such as real estate management and IT.

As the parent company, Crédit Agricole S.A. Parent Company steers the financing, investment and insurance activities, but these are carried out by its subsidiaries. With regard to the Regional Banks, Crédit Agricole S.A. Parent Company is positioned as the corporate centre that guides Group policies.

1.3.2 INTERESTS AND VIEWS OF STAKEHOLDERS

1.3.2.1 CRÉDIT AGRICOLE GROUP'S MAIN STAKEHOLDERS

The main Crédit Agricole Group stakeholders are:

- mutual shareholders;
- customers (individuals, farmers, SMEs, entrepreneurs, undertakings, associations and public institutions);
- civil society and the general public;
- employees (including interns and work-study students), social partners and employee representative bodies;
- suppliers;
- shareholders, investors and rating agencies;
- public, regulatory and supervisory authorities.

Crédit Agricole interacts with these stakeholders throughout its value chain, as shown below:

(1) Various activities are carried out with undertakings through the management of asset portfolios or direct investment such as private equity.

Stakeholders who are not part of the value chain.

1.3.2.2 CHALLENGES AND ORGANISATIONAL ARRANGEMENTS FOR CRÉDIT AGRICOLE GROUP'S COOPERATION WITH ITS STAKEHOLDERS

Crédit Agricole Group engages in ongoing dialogue with its stakeholders at all levels. These discussions foster the Group's understanding of each stakeholder's expectations and interests and enable it to provide appropriate responses in the short-, medium- and long-term. They also make it possible to understand the

expectations and priorities that stakeholders may formulate in relation to the Group's strategy and positioning. All Crédit Agricole Group entities contribute to this effort: the Regional Banks, Crédit Agricole S.A. subsidiaries, the Fédération nationale du Crédit Agricole (FNCA) and Crédit Agricole S.A. central departments.

The table below presents the main challenges and expectations associated with each stakeholder, the responses given by the Crédit Agricole Group and the mechanisms implemented to interact with these stakeholders:

Key stakeholder challenges	Answers provided	Mechanisms implemented
MUTUAL SHAREHOLDERS		
<ul style="list-style-type: none"> Ensuring the transparency, reliability, clarity and comparability of information Implementing responsible governance practices 	<ul style="list-style-type: none"> Publication of quarterly results, Universal Registration Document and Integrated Report Shareholder meetings in the regions where the Regional Banks are located Balanced distribution policy 	<ul style="list-style-type: none"> General Meetings open to all mutual shareholders Advisory Committees Advice from Local and Regional Banks
CUSTOMERS		
<ul style="list-style-type: none"> Proposing solutions that serve the interests of customers and society Protecting customers and securing their life paths Ensuring a customer-centric omnichannel relationship, where human responsibility brings trust, discernment and situational intelligence 	<ul style="list-style-type: none"> Customer satisfaction-driven management Offers tailored to all customer profiles: from entry-level to wealth management, from VSBs to Large Corporates Services accessible independently (websites and applications) and/or through responsible and committed representatives Comprehensive approach addressing customers' main needs Personalised customer support: expertise, advice and customisation Customers have full control over their data, in accordance with the Group's Personal Data Use Charter 	<ul style="list-style-type: none"> Customer feedback systems and satisfaction monitoring (measured by the Net Promoter Score) Barometers, marketing studies and co-construction workshops: biannual survey on changes in stakeholder expectations, annual barometer on the perception of CSR expectations among 2,500 customers and non-customers Innovation ecosystem (Villages by CA, Data Lab, and La Fabrique by CA etc.).
CIVIL SOCIETY AND THE GENERAL PUBLIC		
<ul style="list-style-type: none"> Financing the economy and its players Contributing to economic development and local employment Generating a positive impact on the environment and society Supporting social inclusion and integration 	<ul style="list-style-type: none"> All Group business lines have joined the financial sector's Net-Zero alliances Membership of numerous "responsible" initiatives such as the Principles for Responsible Banking, Principles for Responsible Investment and Principles for Sustainable Insurance Support for culture, sports and solidarity through sports sponsorships and the "Sports as a School of Life" programme Youth programme welcoming 50,000 young interns and work-study students Grameen Crédit Agricole Foundation promoting economic development in rural areas of emerging countries. 	<ul style="list-style-type: none"> Scientific Committee of 10 external members providing guidance on environmental strategy Regular dialogue and exchanges with NGOs, particularly on climate strategy, deforestation and human rights CSR barometer "Transitions Route", during which teams from the Sustainability and Impact department and the Regional Banks met with regional transition players: 130 people (entrepreneurs, farmers, start-up founders, researchers) met in 28 Regional Banks Annual "Societal Commitment Index" survey of 5,000 people to assess perceptions of Group's societal commitment in its environment Participation in national and international market initiatives, trade shows and events Media relations and social media presence Analysis and handling of controversies concerning (directly or indirectly) the Group

Key stakeholder challenges	Answers provided	Mechanisms implemented
EMPLOYEES, SOCIAL PARTNERS AND EMPLOYEE REPRESENTATIVE BODIES		
<ul style="list-style-type: none"> Establishing a work organisation that empowers employees Sharing the value created Offering training and enhanced support at every stage of an employee's career Expanding the diversity policy Ensuring high-quality social dialogue 	<ul style="list-style-type: none"> Support for cultural and managerial change: training programmes, coaching support and co-development workshops, the impact of which is measured in particular by the Accountability Index and the new Trust Index Teleworking agreements/Charters within entities Value sharing, in particular through share capital increases reserved for employees and profit-sharing and incentive agreements Youth programme welcoming 50,000 young interns and work-study students Eighth disability agreement and raising employee awareness of inclusion Global Agreement with UNI Global Union (trade union federation active in 150 countries) 	<ul style="list-style-type: none"> Training schemes to support employees' skills development New annual employee consultation questionnaire: Trust Index Discussions with management through business line plenary meetings Thematic and interactive webinars on current affairs and societal issues Social dialogue at local, national and international levels: 583 agreements signed worldwide in 2025 Regular meetings with employee representative bodies
SUPPLIERS		
<ul style="list-style-type: none"> Adopting responsible behaviour with suppliers, and particularly in terms of payment terms Contributing to the economic competitiveness of the ecosystem Constantly monitoring the quality of relationships with suppliers Integrating environmental and societal aspects into our purchasing Taking action for the transition to a low-carbon economy Including this Responsible Purchasing Policy in existing governance arrangements 	<ul style="list-style-type: none"> Signing of the Responsible Purchasing Charter (RFAR) for all Crédit Agricole S.A. group entities and 10 Regional Banks "Supplier Relations and Responsible Purchasing" labelling for all Crédit Agricole S.A. group entities and seven Regional Banks through La Médiation des entreprises and the <i>Conseil national des achats</i> (CNA) Comprehensive training programme dedicated to responsible purchasing and supplier risks Implementation of Vigilance Plan measures through supplier risk management Integration of CSR performance into supplier selection Management of payment terms Purchasing within the regions Decarbonisation approach for the purchase of goods and services 	<ul style="list-style-type: none"> A dedicated page on the corporate website for information purposes, allowing suppliers to contact the Purchasing department Regular satisfaction surveys to gather feedback from suppliers An annual supplier meeting, with in-person and remote attendance, with more than 700 participants and a different theme each year Business review sessions, in particular with strategic suppliers, in order to share strategies and news A dedicated newsletter sent to them every six months, supplemented by specific publications on decarbonisation
SHAREHOLDERS, INVESTORS AND RATING AGENCIES		
<ul style="list-style-type: none"> Ensuring the transparency, reliability, clarity and comparability of information Implementing responsible governance practices Implementing prudent risk management 	<ul style="list-style-type: none"> Regular dialogue with investors and analysts through conferences and roadshows (in particular regarding equity, debt and governance) Publication of quarterly results, Universal Registration Document and Integrated Report Dedicated telephone number for individual shareholders Shareholder meetings in the regions where the Regional Banks are located 	<ul style="list-style-type: none"> Regular meetings between Crédit Agricole S.A.'s Executive Management, Financial Communication department, and investors and analysts Relationships established with financial and non-financial rating agencies Dialogue with individual shareholders: Shareholders' Club, Liaison Committee, shareholder meetings, monthly newsletters, Annual General Meeting

Key stakeholder challenges	Answers provided	Mechanisms implemented
PUBLIC, REGULATORY AND SUPERVISORY AUTHORITIES		
<ul style="list-style-type: none"> – Complying with regulations – Implementing control mechanisms – Promoting a culture of ethics and compliance – Acting in the interests of customers and society – Ensuring transparency towards all stakeholders – Implementing anti-corruption measures – Developing a framework for climate and environmental risks, as well as reputational risk 	<ul style="list-style-type: none"> – Ongoing dialogue with the European Central Bank and the French Regulatory and Resolution Supervisory Authority (ACPR) and participation in stress tests – Publication of financial and non-financial results – Publication of all regulatory reports and preparation of documents for supervisors – Implementation of an internal reporting tool – Cessation of activities in non-cooperative states and territories – Limitation of activities relating to countries and sectors posing a risk to financial security – Launch of operational projects relating to recent or future regulatory changes 	<ul style="list-style-type: none"> – Maintaining regular communication with banking and financial supervisory and regulatory authorities – Participation in market consultations

The results of the main measures implemented are regularly presented by the central departments responsible for them to Crédit Agricole's executive and non-executive governance bodies: the Executive Committee, the Board of Directors and cooperative bodies. This gives the governance bodies a clear picture of the expectations and challenges specific to each category of stakeholder, which informs decision-making on Crédit Agricole S.A.'s sustainability policies.

The governance bodies were informed of the interests and views of stakeholders through presentations of:

- the detailed results of the new Trust Index, enabling members of the governance bodies to assess the priorities expressed by employees;
- results of the Net Promoter Score;
- the annual study on the Societal Commitment Index, which measures the perception of Crédit Agricole's CSR commitments by customers, employees and the general public;
- the annual review of controversies.

1.3.2.3 PURPOSE AND IMPACT OF CRÉDIT AGRICOLE GROUP'S COOPERATION WITH ITS STAKEHOLDERS

Discussions with stakeholders allow the Group to become aware of and understand their respective priorities, and to incorporate their expectations into its strategic thinking and sustainable development strategy. The main findings of stakeholder feedback systems are regularly shared with the Group's executive and non-executive governance bodies, its functions and its business lines. In 2025, these systems helped inform the discussions held as part of the definition of Crédit Agricole S.A.'s new ACT 2028 Medium-Term Plan.

Listening to customers allows Crédit Agricole Group to assess the effectiveness of its customer relations by responding to their various needs and expectations. Customer feedback on CSR questionnaires helps Crédit Agricole to understand their expectations and to adopt a continuous improvement approach. The feedback obtained via the CSR barometer enables the Group to define sustainability priorities for its customers.

Ongoing cooperation between Crédit Agricole Group and its employees aims to share the Group's strategy while gathering the priorities, expectations and needs of employees. These discussions give employees the opportunity to bring attention to the difficulties and problems they encounter, leading to concrete, tailored actions to resolve the latter and support employees.

Crédit Agricole Group's relationship with investors allows the Group to receive ongoing feedback from the market, as well as investors' perception of its strategy and actions.

Crédit Agricole Group is aware that the performance of its supply chain depends on solid relations with its suppliers. It therefore encourages transparent, ongoing dialogue with its suppliers, taking into account feedback from the annual surveys it sends them, with a view to continuous improvement. This collaborative approach streamlines the process and ensures the satisfaction of each stakeholder. The Group is also committed to clearly sharing its strategy and ambitions with its suppliers so that they can help it achieve its targets in the field of purchasing.

1.3.3 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

PRESENTATION OF IMPACTS, RISKS AND OPPORTUNITIES

The ESRS break down impacts, risks and opportunities into two components:

- the actual or potential positive and negative sustainability impacts of the undertaking's operations. This corresponds to impact materiality;
- the financial risks and opportunities generated by the undertaking's economic, social and natural environment. This corresponds to financial materiality.

Double materiality is a concept designed to combine financial materiality with impact materiality, as part of the assessment of an undertaking's performance.

The issues that emerge as material from Crédit Agricole's second double materiality assessment are presented in the table below. As in 2024, the analysis carried out by the Group is inconclusive on "Nature" themes, as specified in part 1.4.1.3 "Description of the processes to identify and assess material impacts, risks and opportunities related to other environmental issues".

Standard	Topic	Impact materiality		Financial materiality	
		Positive impacts (number)	Negative impacts (number)	Risks (number)	Opportunities (number)
ESRS E1: Climate change	Climate change	1	1	3	1
	Operating environmental footprint		1		
	Support for customer transitions			2	1
ESRS S1: Corporate workforce	Attractiveness, talent retention and employee engagement			1	2
	Skills management	1			
	Human rights, health and safety	3		1	
	Social dialogue			1	
	Diversity and inclusion			2	
ESRS S4: Consumers and end-users	Accessibility and adaptation of offerings and social cohesion	1	2		
	Customer protection	1		1	
	Personal data protection			2	
	Protection of whistle-blowers			1	
ESRS G1: Business conduct	Business ethics and combating corruption		1	1	
	Responsible purchasing		1	1	
	Duty of vigilance towards suppliers			1	
Specific to Crédit Agricole	Combating financial crime and conflicts of interest			2	
	Cybersecurity		1		1

The list of material impacts, risks and opportunities has been grouped into themes, which are presented below. In addition, similar tables detailing their nature (positive or negative impact, risk, opportunity) and their position in the value chain are presented in the thematic parts of the report. The determination of material risks under the CSRD does not follow the same approach as for the Risk Factors presented in Chapter 4 of the Universal

Registration Document. These two regulatory measures have different objectives. The regulatory framework for risk factors is specifically designed to inform investors about the risks inherent in holding securities issued within the Crédit Agricole Group and Crédit Agricole S.A. This may result in differences in terms of identified risks between the Sustainability Report and the Risk Factors.

Topic	List of IROs	Time horizon	Reference in the report
ENVIRONMENT			
Support for customer transitions	Contribution to commercial development and improvement of the Group's image through its strong commitment to climate action	Long-term	2.1. Governance 2.2.1. Transition plan for climate change mitigation 2.3. Actions and resources in relation to climate change policies
	Reputational risk in the event of a lack of transparency or misleading communication on climate issues	Short-term	2.2.3. Material impacts, risks and opportunities and their interaction with the strategy and business model
	Risk of increased costs for the Group due to the investments required to transform its business model in order to decarbonise its activities and boost its resilience (data purchases, investments, resources, systems, limitation of certain activities)	Long-term	2.3. Actions and resources in relation to climate change policies
Climate change	The Group's positive impact on the climate through financing, investment and insurance activities contributing to the transition: dedicated loans and financing, committed financial savings, climate insurance products	Long-term	2.3. Actions and resources in relation to climate change policies
	Physical risk factors related to climate change that affect the bank's risks (credit, financial, operational)	Long-term	2.2.3. Material impacts, risks and opportunities and their interaction with the strategy and business model
	Transition risk factors related to climate change that affect the bank's risks (credit, financial, operational)	Medium-term	2.2.3. Material impacts, risks and opportunities and their interaction with the strategy and business model
	Negative impact of the Group's activities (investment, financing, insurance) on climate change	Long-term	2.3. Actions and resources in relation to climate change policies
	Regulatory and reputational risk related to the Group's activities that contribute to climate change	Invariable	2.2.3. Material impacts, risks and opportunities and their interaction with the strategy and business model
	Development of new services and solutions to support customers' transition to a low-carbon economy	Medium-term	2.2.1. Transition plan for climate change mitigation 2.3. Actions and resources in relation to climate change policies 2.4.1. Climate change mitigation targets
Operating environmental footprint	Negative impact of the operating footprint on the climate	Long-term	2.2.1. Transition plan for climate change mitigation 2.3.4. operating footprint 2.3.5. Voluntary contribution to carbon neutrality

Topic	List of IROs	Time horizon	Reference in the report
SOCIAL			
Accessibility and adaptation of offerings and social cohesion	Negative impact on certain categories of customers due to a lack of transparency and clarity in offerings (leading to exclusion and financial insecurity for the customers concerned)	Short-term	3.2.2.1. Accessibility of products and services Support for vulnerable populations and prevention of overindebtedness
	Negative impact on certain categories of customers caused by unsuitable offerings and/or the refusal of customer requests (exclusion, precariousness)	Short-term	3.2.2.1. Accessibility of products and services Support for vulnerable populations and prevention of overindebtedness
	Positive impact on the economically disadvantaged and/or people with disabilities due to accessible and inclusive offerings	Short-term	3.2.2.1. Accessibility of products and services Support for vulnerable populations and prevention of overindebtedness
Attractiveness, talent retention and employee engagement	Improving attractiveness through ambitious and innovative ESG practices	Invariable	3.1.1.1. The Human Project, a major driver of Crédit Agricole S.A.'s ambitions.
	Increased overall performance, employee retention, thanks to ambitious career and skills development policies	Invariable	3.1.2.1. Human capital development Human capital development policy
	Risks to employee attractiveness, retention and engagement due to the compensation policy and employee benefits	Invariable	3.1.2.1. Human capital development Human capital development policy
Social dialogue	Risks to the Group's image or overall performance due to a deteriorated social climate/dialogue	Invariable	3.1.2.2. Social dialogue
Diversity and inclusion	Internal and external image and reputational risk due to inadequate diversity and inclusion policies or discriminatory practices	Invariable	3.1.2.3. Diversity
	Risks associated with not knowing employee characteristics	Invariable	3.1.2.3. Diversity Diversity policy
Human rights, health and safety	Image and reputational risk in the event the health and safety of employees are endangered or human rights are not respected	Invariable	3.1.2.4. Working environment
	Improving employee health and safety through proactive work/life well-being policies	Invariable	3.1.2.4. Working environment Working environment policy
	Positive impact on employees in the event of social protection practices that are better than statutory practices	Invariable	3.1.2.4. Working environment Management of impacts, risks and opportunities
	Positive impact of sound practices on employees' rights to freedom of association and collective bargaining	Invariable	3.1.2.2. Social dialogue
Skills management	Positive impact on employees through good talent management and the implementation of ambitious skills development policies	Invariable	3.1.2.1. Human capital development
Customer protection	Regulatory risk related to products and services that are insufficiently adapted to customer needs and circumstances (banking inclusion, product governance)	Medium-term	3.2.2.3. Customer protection
	Positive impact on society related to products and services that are adapted to customer needs and circumstances (banking inclusion, product governance), contributing to social cohesion	Medium-term	3.2.2.4. Personal data protection
Personal data protection	Reputational risk in the event of leaks, theft or inappropriate use of personal data	Medium-term	3.2.2.4. Personal data protection
	Regulatory risk related to non-compliance with personal data protection regulations	Medium-term	3.2.2.4. Personal data protection

Topic	List of IROs	Time horizon	Reference in the report
GOVERNANCE			
Responsible purchasing	Reputational risk and regulatory risk in the case of non-responsible purchasing practices by the Group towards its suppliers, particularly as regards payment terms	Invariable	4.2.1.3. Impacts, risks and opportunities
	Negative impact on suppliers in the case of non-responsible purchasing practices by the Group, particularly as regards payment terms	Invariable	4.2.1.3. Impacts, risks and opportunities
Duty of vigilance towards suppliers	Reputational risk and regulatory risk in the case of accountability of the Group following an environmental, social or ethical breach – particularly in terms of corruption – by its suppliers	Invariable	4.2.1.3. Impacts, risks and opportunities
Business ethics and combating corruption	Regulatory risk in the event of non-compliance with the regulations and the expectations of the supervisory authorities in terms of business ethics and combating corruption	Invariable	4.1.4.1. Promoting an ethical culture 4.1.4.3. Combating corruption
	Negative impact on the living conditions of customers or stakeholders in the event of unethical practices (e.g. corruption)	Invariable	4.1.4.1. Promoting an ethical culture 4.1.4.3. Combating corruption
Protection of whistle-blowers	Regulatory and reputational risk in the event of the failure of the whistleblower system for reporting unethical internal practices	Invariable	4.1.4.4. Protection of whistle-blowers
SPECIFIC			
Cybersecurity	Negative psychological impact or impact on daily life (such as identity theft) resulting from a breach of our customers' data protection	Long-term	3.2.2.2. Cybersecurity and combating cybercrime
	Financial risk following an inability to provide essential services and the associated operational cost to remedy the situation	Long-term	3.2.2.2. Cybersecurity and combating cybercrime 3.2.2.2.5. Action plans/measures for cyber incidents and business continuity plan
Combating financial crime and conflicts of interest	Regulatory risk in the event of failure to comply with the obligations in terms of combating financial crime	Invariable	4.1.4.5. Combating financial crime
	Regulatory risk in the event of insufficient detection of conflicts of interest and market abuse (market integrity)	Invariable	4.1.4.2. Avoidance of conflicts of interest 4.1.4.6. Avoidance of market abuse

POSITION IN THE VALUE CHAIN AND ACTIVITIES

Material impacts, risks and opportunities (IROs) are mainly cross-cutting among all financing, investment and insurance activities. Due to the Group's business model, climate IROs are mainly downstream of the value chain, with the exception of issues related to the internal footprint. Social IROs are divided between the own operations, for issues relating to the undertaking's own staff, and downstream for those relating to customers. Finally, governance-related impacts, risks and opportunities are upstream for issues relating to purchasing, and downstream/own operations for compliance issues.

EFFECTS ON THE BUSINESS MODEL, VALUE CHAIN, STRATEGY AND DECISION-MAKING PROCESS

The identified material impacts, risks and opportunities influence the Group's business model, value chain and strategy in different ways.

Regarding the current and future effects of climate change, climate and energy transition issues are likely to have an effect on the business model. In order to control these current and future effects, the Group has undertaken an analysis of its portfolio of activities and defined targets for the reduction of funded emissions (in absolute or intensity) in high-emission sectors. At the same time, the Group has identified levers to promote financing and investment in sectors aligned with sustainability objectives. These adjustments to the strategy help meet growing stakeholder expectations and new regulatory requirements, while strengthening the business model's resilience to transition risks. In the medium and long term, the evolution of customer behaviour towards more sustainable solutions, as well as the intensification of regulatory constraints, should continue to influence the Group's strategic priorities. Climate issues are integrated into strategic decisions through a strengthened governance framework, as described in part 1.2 "Sustainability Governance".

Regarding the social issues related to employees and clients, their effects are considered to be controlled thanks to robust and proven policies implemented by the Group (see part 3 "Social responsibility"). So these topics do not, to date, lead to any change in the business model, value chain or medium-term strategy.

STRATEGIC ACTIONS OR PLANS TO MANAGE IMPACTS, RISKS AND OPPORTUNITIES

Action plans covering all activities have been put in place. On the environmental front, climate change policies and actions strengthen the Group's ability to manage these challenges. On the social front, HR policies and actions (human capital development, social dialogue, diversity, working environment, and performance and compensation) promote inclusion and well-being. In governance, policies and actions (ethics, protection of whistle-blowers, anti-corruption, data protection, financial crime, market abuse and management of conflicts of interest) ensure rigorous compliance with regulations. In terms of purchasing, the Group manages relationships with suppliers and payment practices responsibly. These plans are continually adjusted in line with market trends and stakeholder expectations.

EFFECTS OF IMPACTS ON THE ENVIRONMENT AND SOCIETY

The effects of impacts on the environment and society are described in the thematic sections of this report. With regard to the environment, no evidence has been found to link negative impacts

with the Group's strategy and business model. On the other hand, although these negative impacts are not the result of the strategy and business model, activities may lead (in gross terms, without taking into account policies and action plans) to impacts on the climate as a result of the sectors financed. As far as society is concerned (the Company's workforce, customers and suppliers), the impact of the Group's strategy and activities is already tangible.

FINANCIAL EFFECTS OF RISKS AND OPPORTUNITIES ON THE FINANCIAL POSITION AND CASH FLOWS

The financial materiality analyses conducted by Crédit Agricole Group on the impact of physical and transition risks did not identify these risks as significant in the context of the resilience analysis.

RESILIENCE OF THE STRATEGY AND BUSINESS MODEL

The resilience of the Group's strategy and business model is based on its ability to anticipate and adapt to environmental, social and governance risks and impacts. To address significant risks and seize opportunities, policies and action plans have been put in place, as mentioned in part 2.3 "Actions and resources in relation to climate change policies" on strategic plans and actions to manage impacts, risks and opportunities. These policies and actions cover key areas such as climate change, management of relationships with suppliers, diversity and inclusion, and ethical governance. These plans are continually adjusted in line with market trends, stakeholder expectations and new regulations, ensuring resilience in the short-, medium- and long-term.

A more detailed analysis of climate change is available in part 2.2.2 "Material impacts, risks and opportunities and their interaction with the strategy and business model".

SIGNIFICANT MATERIALITY DIFFERENCES WITH THE COMPANIES

As mentioned in part 1.4 "Management of impacts, risks and opportunities", the double materiality assessment was conducted on the basis of the ratings of the companies contributing to the double materiality exercise. At the end of this exercise, material differences could be observed between the materiality at Group level and that of certain companies, similar to those identified in the 2024 financial year. These differences are not significant at Group level as they do not impact materiality at the level of a standard for Crédit Agricole Group. However, three IROs were classified as material in contrast to the Group, requiring specific measures within these entities to manage them (an opportunity and a negative impact in relation to ESRS E5 for Crédit Agricole Assurances, an opportunity in relation to ESRS S3 for Crédit Agricole Italia):

- circular economy: for Crédit Agricole Assurances, the circular economy is linked to its claims management activity. Crédit Agricole Assurances encourages the reuse of recycled parts and repairs. This has no impact on the Group's position on the circular economy;
- affected communities: for Crédit Agricole Italia, the theme of affected communities is linked to the integration of social criteria in its products and services and to foundations that hold a significant share of its capital. This has no impact on the Group's position on affected communities.

CA Auto Bank also estimated ESRS E2 (Pollution) to be material in relation to its automotive financing activities. This has no impact on the Group's position on pollution.

1.4. MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

1.4.1 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

1.4.1.1 GENERAL DESCRIPTION

In accordance with sustainability standards, the double materiality practice determines the information to be disclosed in the sustainability report by identifying material impacts, risks and opportunities (IROs). The scope of analysis encompasses the Group's own operations (consolidated scope) and the value chain (upstream/downstream). The analysis focuses on two dimensions: impact materiality (how Crédit Agricole Group's activities impact its stakeholders or the environment) and financial materiality (how sustainable development issues affect Crédit Agricole Group and its financial performance). An IRO is material when at least one of its two dimensions is material.

Crédit Agricole Group's materiality analysis methodology is the responsibility of the Sustainability and Impact department. It is developed in collaboration with the Group Risk department, the Compliance department, the Group Purchasing department and the Group Human Resources department, which are the major contributing departments. This methodology applies to all entities contributing to the double materiality ⁽¹⁾ practice.

The list of impacts, risks and opportunities (IROs) is defined and updated annually by Crédit Agricole S.A.'s central departments (Sustainability and Impact, Risks, Compliance, Human Resources, Purchasing, Public Affairs, Digital Transformation & IT), capitalising on the internal processes in place within the Group (operational risk mapping, duty of vigilance, work carried out on risks in line with ECB expectations etc.) and taking into account activities (financing, investment and insurance), the Group's value chain and the regulatory environment in which the Group operates. Certain risks have been detected on the basis of the impacts identified (e.g. a reputational risk may arise from the negative impact of the Group's activities on climate) and by considering dependencies on the subjects covered by the ESRs (e.g. the Group's exposure to sectors that may be disrupted by the impacts of climate change, leading to the identification of a physical risk on the topic of climate change). The list of IROs covers the ESRs and the specific themes identified by the Group, and may be updated to take into account any changes in the context, regulations or scope of the ESRs in future financial years.

The ESRs set out the criteria to be considered in measuring materiality.

Negative impacts are rated according to two dimensions:

- **probability** (for potential impacts only);
- **severity**, which is made up of:
 - scale: degree of the negative impact on people or the environment,
 - scope: geographical scope of the number of people or the environment affected by the impacts.
 - irremediability: whether and to what extent the negative impacts can be remedied.

Positive impacts are rated according to two dimensions:

- **probability** (for potential impacts only);
- **severity**, which is made up of:
 - scale: degree of the positive impact on people or the environment,
 - scope: geographical scope of the number of people or the environment affected by the impacts.

Risks and opportunities are rated according to two dimensions:

- **probability**;
- potential **scale** of financial effects.

There is no standard rating scale set out by the ESRs. They have been defined using the scales that already exist within the Group as a basis, as far as possible. The probability and scale of financial effects are thus aligned with the scales used in risk mapping. These scales are applied by the entities, adapting them to their size or threshold.

Once the rating for each impact, risk or opportunity criterion has been finalised, a materiality score is calculated for each IRO ⁽²⁾ and compared with the Group's materiality threshold. The materiality threshold ⁽³⁾ is the point at which the impacts, risks and opportunities are material. It should be noted that IROs are not prioritised in any way other than material/non-material.

In operational terms, each Group company contributing to Group's double materiality practice rates the IROs within its scope, complying with rating scales and relying as far as possible on existing processes within its entity (operational risk mapping, duty of vigilance etc.) or using external studies (IPCC Report, ECB Guide, ESMA studies, Banque de France etc.) and consulting internal operational experts (on climate, nature, purchasing, compliance, cybersecurity etc.). The 2025 rating exercise also drew on the results of Crédit Agricole's annual CSR barometer. This barometer identifies the main CSR expectations expressed by a sample of 2,500 customers and non-customers. The results of this study reinforced Group's analysis of the most material issues. The results are then validated by the governance of each entity and sent to Crédit Agricole S.A., which consolidates the feedback and reviews the results.

The ratings are then critically reviewed by all the Crédit Agricole central departments that took part in the rating exercise. The central departments then determine the materiality at Group level on the basis of an expert assessment of company ratings. The results are then validated by the Crédit Agricole S.A. Strategy Committee and by the Societal Commitment and Cooperative Identity Commission, Crédit Agricole's federal body.

⁽¹⁾ Companies exceeding a consolidated balance sheet threshold of €5 billion and forming part of the value chain defined by the Group: Amundi, Crédit Agricole CIB, Crédit Agricole Assurances, Crédit Agricole Italia, Crédit Agricole Leasing & Factoring, CACEIS, Crédit Agricole Personal Finance & Mobility, LCL, Crédit Agricole Bank Polska. Regional Banks: all 39 Regional Banks.

⁽²⁾ Each rating criterion is assessed on a scale of 1 to 4, and a score is then determined as follows:

- for risks, the probability score is multiplied by the score for the potential scale of the financial effects, giving a maximum score of 16;
- for impacts, the probability score is multiplied by the severity score, defined as the maximum of the scale, scope and irremediability scores. The score obtained in this way also reaches a maximum of 16.

⁽³⁾ Details of the materiality threshold: the materiality threshold is set at half the maximum score, i.e. 8 (greater than or equal to).

In accordance with regulations, material impacts, risks and opportunities are updated each year to take into account any changes in context, regulations or scope that have occurred since the previous financial year. This update focuses on the risks defined as material in the previous financial year, and takes into account any new contextual factors that require a review of the rating.

Sustainability risks are managed according to the same principles as other types of risks through Crédit Agricole S.A.'s overall risk management process. Material opportunities inform the strategy and actions taken by the relevant departments. These opportunities, of which there were four in 2025, are taken into account in existing decision-making and governance processes, with a view to integrating sustainability into the core activities of the departments. For example, opportunities related to climate change and the factors that led to their identification (studies, work by consulted experts) informed the work of the Climate Sponsor Committee and the working groups that defined the sustainability component of the ACT 2028 Medium-Term Plan.

1.4.1.2 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO CLIMATE CHANGE

Crédit Agricole Group's double materiality analysis process is described in the previous part 1.4.1.1 "General description".

1.4.1.2.1 NON-FINANCIAL RISKS IDENTIFIED BY THE GROUP

The main purpose of this section is to assess the potential financial impacts of climate risks (i.e. IRO risks component), as a subset of the environmental risks within Crédit Agricole Group. The identification of negative impacts and dependencies linked to climate risks are addressed in part 2.2.3.2 "Material impacts, risks and opportunities and their interaction with strategy and business model" of the Sustainability Report.

CLIMATE RISK: DEFINITION ADOPTED

Climate risks materialise within the traditional risk categories (credit, operational, liquidity, market etc.) and can be broken down into two categories:

- physical risks: financial effects of climate hazards caused by climate change;
- transition risks: financial effects of the process of adapting to a low-carbon economy.

In addition, the materiality of these risks results from their current or prospective impacts on the Group's counterparties or its assets.

CLIMATE RISK FACTORS IDENTIFIED BY CRÉDIT AGRICOLE GROUP

A Group taxonomy has been developed to provide a framework for analysing and measuring the impact of climate risk factors. This classification system is based on elements shared by all market players, including regulators and supervisors, as well as internal expertise. This list aims to meet the needs of most uses and will likely be updated regularly, in particular to take account of improved knowledge of climate risk factors as well as the changes in the internal risk management system.

Analysis framework

Assessing the impacts of climate risks as part of the materiality analysis and stress testing requires consideration of both different time horizons and different climate scenarios.

Time horizons

The Crédit Agricole Group has defined four time horizons for its climate risk management framework. These time horizons have been chosen not only to align with current operational and budgetary cycles, but also to ensure consistency with longer-term strategic targets and global climate commitments.

The choice of these time horizons is also related to the profile of the portfolios and their effective average maturity according to the Group's credit activities:

- the short-term horizon is set at one year, in line with the budget horizon;
- the medium-term is set at 2030, aligned with intermediate Net Zero Banking Alliance (NZBA) commitments and with the targets defined by the European Union as part of the "Fit for 55" legislative package;
- the long-term horizon is set at 2040 in order to capture the long-term portion of exposures;
- the very-long-term horizon, set at 2050, aligns with the time frames set out in the NZBA commitments.

Climate scenarios

In assessing the effectiveness and relevance of various scenarios for sensitivity analyses within the financial sector, the scenarios defined by the Network for Greening the Financial System (NGFS) have proven to be a particularly appropriate choice. These scenarios are designed to address the specific risks and operational realities facing banks, providing information on transition risks, physical risks and macro-financial risks. In addition, the NGFS incorporates the latest updates in climate science and policies, ensuring that assessments are based on the most recent and comprehensive information available.

Three NGFS scenarios may be used to assess the impact of climate risks for Crédit Agricole Group:

- **Net Zero 2050** (orderly transition) outlines an ambitious but achievable future where global efforts will lead to net zero Greenhouse Gas emissions by 2050, aiming to limit warming to +1.5 degrees Celsius by 2100;
- **the delayed transition** (disorderly) presents a world where efforts to reduce Greenhouse Gas emissions are delayed, leading to a global temperature increase of +1.6 degrees Celsius by 2100;
- **"Current policies"** (Hot House World) projects the results of continuing along current policy pathways, resulting in a global temperature increase of around +3 degrees Celsius by 2100.

In addition, when Crédit Agricole Group wishes to analyse the impact of physical events that are more significant than those projected in the NGFS scenarios, climate models aligned with RCPs (Representative Concentration Pathways) are used.

Climate stress test system

Crédit Agricole Group integrates climate risks into its stress testing system through the following:

- budget stress test or ICAAP stress test: Climate considerations have been incorporated into the annual budgetary stress test scenario, which contributes to capital requirements planning and enables the Group's profitability to be estimated over a three-year horizon;
- dedicated climate stress tests: The internal stress test framework has provided for a climate stress test to be carried out every two years on credit risk and market risk, with targets, characteristics, horizons and scenarios adapted to changes in risks and the context.

Specific climate stress tests revealed that the impact of climate risks on the Group's profitability and solvency is low. In particular, in 2024, the Group carried out a climate stress test on credit risk aimed at assessing its resilience to the transition to a low-carbon economy in line with the European ambitions set out in the "Fit-for-55" package for 2030 and the Group's commitment to climate action and the transition to a low-carbon economy. This exercise, based in particular on the NGFS Net Zero 2050 scenario, demonstrated that the impacts of the transition to Net Zero can be absorbed.

Identification and assessment of environmental risks for each of the most significant financial risk categories for the Group

Since 2024, the Crédit Agricole Group has conducted financial materiality analyses using a risk-based approach on all of the most significant financial risks for the Group, namely credit, operational, reputational, liquidity and market risk.

For credit risk, the analyses focused on physical and climate transition risks, Residential and Commercial Real Estate portfolios, and Corporate portfolios in France. The materiality of the physical risks was analysed for these portfolios, via a quantitative analysis carried out using European public climate models. In addition, the transition risks were analysed for these same portfolios via the stress test system.

For operational risk, the analyses focused on physical climate risk, real estate assets (retail spaces) and Crédit Agricole Group's headquarters in France. The analyses carried out are based on an analysis of historical losses combined with projections, and have made it possible to assess the impact of physical climate risk factors on operational losses.

With regard to reputational risk, the analyses conducted focused on climate transition risk across all business sectors and geographical areas in which Crédit Agricole Group operates. The analyses focused on litigation risks and resulted in a qualitative assessment of this risk, based on an analysis of Crédit Agricole Group's own history and, more broadly, on the banking industry scope.

For liquidity risk, the analyses conducted focused on physical and climate transition risks in Crédit Agricole CIB's oil and gas portfolio. They consisted of a qualitative and semi-quantitative analysis of this portfolio.

Market risk is divided between the banking book and the trading book. The analyses conducted focused on physical and climate transition risks for the Securities portfolios, interest rate positions (interest rate risk in the banking book), operational and structural foreign exchange positions, and the Crédit Agricole CIB portfolio.

With regard to Banking Book market risk, the analysis carried out consisted of a review of the portfolio composition combined with a forward-looking approach based on the World Resource Institute's public index. These analyses were carried out on the securities portfolio and on interest rate/foreign exchange rate positions.

With regard to Trading Book market risk, an income statement sensitivity analysis was conducted on the Crédit Agricole CIB portfolio, in line with the NGFS delayed transition scenario, for physical and transition risks.

The results of all these analyses are described in more detail in the following paragraphs.

1.4.1.2.2 EFFECTS OF CLIMATE RISK FACTORS ON GROUP RISKS

In order to establish the materiality of climate risks, Crédit Agricole studied and measured the impact of climate risk factors (physical and transition) on the Group's risks. The first phase identified the level of transmission of climate factors through the bank's main risk categories (credit risk, reputation risk, operational risk, market risk, liquidity risk). This phase allowed the Group to identify the most significant factors and associated transmission channels for each type of risk, which are then prioritised in the assessment analyses.

Taking into account the scientific work and the main risk factors involved, the Group considers that:

- the physical risks related to climate change are potentially incurred in the short term for acute risks, and in the medium term for chronic risks;
- the transition risks related to climate change are potentially incurred in the short-term.

CREDIT RISK

The analysis of credit risk impacts within Crédit Agricole is carried out in a differentiated manner according to customer type, with different characteristics and transmission channels. The customer segments selected for risk analysis are: Residential Real Estate for private individuals, Commercial Real Estate, SMEs (including Agricultural) and Corporates. The conclusions of these analyses are detailed below.

Historical analysis of the effects of climate physical risk factors on credit risk

In the short term, the consequences of physical risks may impact the activities and physical assets financed or guarantees by Crédit Agricole Group entities, thus weighing directly on loss given default. The probability of default could therefore be affected directly or indirectly by the physical risk.

For Corporate counterparties, the materiality analysis is based on an analysis of Group-level credit alerts. This analysis shows that in 2025, occurrences of climate risk factors in credit alerts increased compared with previous years. This trend mainly stems from counterparties in connection with the Agriculture and Agri-food sectors (impacted by successive climatic hazards in 2022-2023-2024) and the Automotive sector (due to the erratic transition to electricity of the European market). This analysis also makes it possible to identify that there are often multiple factors involved in the economic difficulties of our counterparties: the presence of a climate risk factor adds to other factors but, at the portfolio level, does not generate significant degradation of the risk profile.

For Individual and SME counterparties, the materiality analysis is based on an analysis of the correlation between default events and the occurrence of natural disasters over the last 10 years. It should be noted that the historical data available in the information systems only allows for the measurement of net risk, particularly after insurance claims have been paid out to customers. This analysis shows no correlation to date, a conclusion consistent with that of the Banque de France. Furthermore, it focuses on risk categories relevant to France, such as floods, droughts, landslides and severe cyclones. The limited impact observed can be explained by the role of insurers and national policies on compensation in the event of a natural disaster.

As such, and in light of these results, to date the history of physical risk cannot be considered as significant in the context of its integration into probability of default models. Nevertheless, this practice has been incorporated into Crédit Agricole's work permanently and will therefore allow these results to be re-evaluated periodically.

Forward-looking analysis of the effects of climate physical risk factors on credit risk

With regard to the residential property sector, the approach adopted has made it possible to assess the direct impact of natural disasters on the portfolios of individuals and small and medium-sized companies, covering 90% of outstanding mortgaged or guaranteed loans at the Crédit Agricole Group level. The effects of droughts as well as river flooding were analysed as a priority because of their direct impacts on building structures. The method involved cross-referencing two key metrics, the rate of soil shrinkage and swelling and the moisture content (Soil Wetness Index), to identify areas where the physical risk is predominant. In addition, the risk was assessed across the various short-, medium- and long-term time horizons, in line with the NGFS benchmark scenarios. For flood and drought risk, the RCP 8.5 scenario was included. In addition, the impacts have been analysed for certain countries, highlighting the sometimes pronounced geographical differences in the additional cost of risk in the event of chronic and acute events. The impacts on the Loss Given Default (LGD) and the cost of risk were estimated by incorporating a impairment loss indicator on the property and a level of shock on the value of the collateral. The analysis concludes that the impacts will be limited across all time horizons defined by the Group.

For the Commercial Real Estate, MSE, SME and Large Corporate sectors, the chosen analysis method took into account the location and geographical distribution of assets, where available. In addition, a dedicated sector-specific study was conducted to establish a classification of sectors and sub-sectors, according to a degree of vulnerability, and to identify pockets of more localised vulnerability. A geographical analysis by country was carried out using macro-economic data based on various sources, such as the World Bank, rating agencies etc. The analysis of these sources was used to establish a risk categorisation on a scale of five levels for the "geography" area and three levels for the "sector" area. This approach allowed for an assessment of the level of portfolio sensitivity to acute and chronic climate risks, and to test any correlations between credit rating quality and sensitivity to physical climate risk. The results show a slightly greater sensitivity to acute risks, with certain combinations of geographic areas and sectors showing more pronounced sensitivities.

With regard to the Agriculture sector and SME counterparties, Crédit Agricole Group assessed the financial materiality of the impact of climate risk factors on the credit risk of this portfolio in France at the departmental level. This assessment shows that, regardless of the scenario, the impact of environmental risk factors on the cost of risk is generally low at the portfolio level, with the exception of very long-term cold-related phenomena (including frost). It should be noted, however, that more significant and therefore material impacts could occur at the level of certain departments. Overall, these impacts will gradually increase over the coming decades and will require action on the part of all stakeholders in the sector. The most significant challenges are certainly beyond the time horizon of this analysis. However, French agriculture is faced with changing weather conditions and regular climatic hazards, forcing it to continually adapt.

Forward-looking analysis of the effects of climate transition risk factors on credit risk

Transition risk was assessed in line with the financial materiality analyses conducted, taking into account the four time horizons (short-, medium-, long- and very long-term) for the sectors with the highest emissions and the greatest sensitivity to the effects of the climate transition.

On the basis of the methodologies applied by the Group and work carried out with the supervisory authorities, an estimate of the impact on the cost of risk concluded that the overall impact was limited, and was already covered by provisioning strategies. All the analyses conducted have allowed for an assessment of the cost of the additional risk generated by the physical climate and transition risks using the various time horizons defined by the scenarios.

With regard to the Residential Real Estate sector, the chosen method takes sector-specific effects into account by applying migration matrices based on sector-specific growth data for the various scenarios. This approach has made it possible to determine the impact on the Loss Given Default. The analysis revealed that, across all time horizons and all scenarios, the transition risk is insignificant.

Furthermore, the analysis shows that the transition risk for the Commercial Real Estate sector is moderate for all time horizons and scenarios. For the Corporate and SME sector, the transition risk is moderate for the short-, medium- and long-term horizons across all scenarios, and is insignificant in the very long-term for the NGFS Net Zero and Current Policies scenarios.

At this stage, of all the risks analysed, the results show that the transition risk is considered to be the most significant in the medium-term. Despite this, it remains below the financial materiality thresholds established as part of the Group's methodology.

Integration of ESG risks into the credit process

The Group's methodological framework has been designed to cover all regions where it operates, including countries with low volumes, in order to provide a comprehensive view of risks. It also takes into account all business sectors and adapts to the specific needs of different customers using tools tailored to their risk profile.

Risk classification is based on existing internal systems and previous work. It includes materiality assessments of climate risk factors, concentration analyses and specific assessments for sectors such as agriculture and countries such as France or the United States. In addition, it takes into account analyses of environmental risks and sector-specific CSR and Net Zero policies.

The methodology thus enables countries, sectors and counterparties to be classified according to three risk levels: high, medium and low.

Furthermore, for all customer segments, the Group's credit risk management system includes a set of complementary tools, thereby strengthening the Group's ability to assess, steer and mitigate climate and environmental risks at the counterparty level:

- customer questionnaires: available for all customer segments except individuals, and administered by the first line of defence;
- climate risk score: for the entire Corporate portfolio, using an internal method or external scores;

- expert Group review: for the very large corporate segments, in the form of expert analyses to examine transactions classified as “at risk” or “potentially at risk”. This review is backed by dedicated governance provided by the second line of defence;
- watch lists: for the large and very large corporate segments, used to identify high-risk counterparties and employed for dynamic monitoring;
- portfolio management: to manage all segments at the geo-sector level. This management process combines sector-specific and geographical classification methods to reinforce the risk-based approach, highlighting geographical areas and sectors with a risk level defined as “high”.

The aim of these methods is to help the second line of defence anticipate potential environmental risks on operations deemed sensitive or medium/high risk. The geo-sector grids cover all the geographical areas and sectors in the portfolio, with a higher level of granularity for areas identified as presenting specific risks.

OPERATIONAL RISK: EFFECTS OF CLIMATE RISK FACTORS ON OPERATIONAL RISK

Operational risk is defined in Article 4(52) of the CRR as “the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, including, but not limited to, legal risk, model risk or information and communication technology (ICT) risk, but excluding strategic and reputational risk”. This definition is provided for in Regulation (EU) No. 2024/1623.

The management of these risks is based on seven main categories, defined by Basel II, which enable operational risks to be better identified, assessed and managed within the various Group entities. These seven Basel categories are addressed across four areas, as part of the analysis of transmission channels:

- IT assets: security and efficiency of the Group’s physical and digital resources;
- customers: risks related to banking transactions, customer behaviour and market compliance;
- employees: recruitment, training and integrity to maintain a strong organisational culture;
- suppliers: management of risks related to the supply chain and external partnerships, which are essential to operational continuity and service quality.

These four areas ensure a comprehensive and effective approach to operational risk management.

Analysis of transmission channels has identified flooding as the main climate risk factor related to operational risks. In addition, the current impacts of climate risk factors are identified through the collection of incidents and alerts. Currently identified in losses using a keyword, new data will be integrated into operational loss collection tools in 2026.

Although they may represent a significant volume at the local or regional level, these losses are, at this stage, considered to be of little significance since they represent between 0.02% and 0.86% of the total losses linked to operational risks at the Crédit Agricole Group level over the period between 2015 and the first half of 2025, and do not require a change in the operational risk management framework in the short-term. It should be noted that the events associated with physical risks referenced by member financial institutions in the ORX (Operational Risk Data Exchange) database are mainly due to flooding.

Prospective analysis of losses linked to a climate risk factor and forward-looking scenario

A forward-looking analysis was carried out to supplement the results of the retrospective analysis, both in terms of the scope covered and the method used. This analysis was conducted using the three NGFS scenarios over the four time horizons described above. The retrospective analysis of climate risk factors identified flooding as the main risk for the Group. In addition, the Group’s data allowed it to geolocate its assets in France, in order to feed this analysis. This method made it possible to map the regions most affected in terms of operating losses due to the physical risk of flooding, and to estimate the prospective losses according to the scenarios.

REPUTATIONAL RISK: EFFECTS OF CLIMATE RISK FACTORS ON REPUTATIONAL RISK

Crédit Agricole Group has been reporting on its environmental and societal commitments for several years. The nature of its activities, the composition of its corporate portfolio and the Group’s international reach expose it to reputational risks and potential litigation relating to climate and social issues.

To manage these risks, Crédit Agricole has rolled out a system focused on:

- the avoidance of these risks: a specific analysis is carried out and enables early detection of signals that could lead to reputational risks for the Group, including in relation to customers facing media exposure or involved in litigation, depending on their exposure;
- managing these risks: Crédit Agricole is committed to open engagement with civil society stakeholders, particularly Non-Governmental Organisations and associations, and responds to requests for explanations. In addition, a reputational crisis management system is in place to manage and limit the impact of any potential accusations, if necessary.

This system has been rolled out across all departments (Sustainability and Impact, Customer Relations, Legal, Compliance, Communications, Risk Management), which are in constant contact with management in order to ensure optimal coordination when managing controversial cases.

The impact of physical risk on reputation is fairly limited, however, the management of resulting operational risk may have negative indirect effects on the Group’s image and the quality of its operations. Transition risk and Crédit Agricole’s ability to support its customers who are the most vulnerable and exposed to transition risk could have a more direct effect on the Group’s image.

The materiality analysis took into account a detailed retrospective review of the controversies that Crédit Agricole has had to face, without being the subject of legal action. Most of these controversies have involved NGOs. Although Crédit Agricole has never been the subject of legal action, the landscape is evolving in terms of climate-related reputational risk, on the one hand due to growing expectations of NGOs and, on the other, due to the growing sensitivity of public opinion to climate issues. According to analyses of external databases, these mainly concern the fossil fuel sectors, allegations of greenwashing practices and failure to respect public commitments.

Crédit Agricole Group considers the reputational risks relating to physical risks and transition risks to be a consequence of primary risks, and has deemed them to be limited in the short term (within one year). On the basis of information available to date, such risks may be moderate in the medium- and long-term (2030/2050). An oversight and management framework is in place.

LIQUIDITY RISK: EFFECTS OF CLIMATE RISK FACTORS ON LIQUIDITY RISK

The liquidity risk for a banking establishment can arise from a reduction in customer deposits and/or the blocking of refinancing mechanisms. The management of liquidity risk is coordinated, for the Crédit Agricole Group, by the Group Financial Steering department, within the Finance department of Crédit Agricole S.A.

Liquidity risk management is also based on metrics produced by Group and consolidated entities. It is also managed through regular stress tests, over two different time horizons, one short-term (less than three months) and the other medium-term (three years).

The Group Risk department provides a second opinion on liquidity risk management through standards, metrics and limits, and participates in the liquidity governance bodies.

In terms of physical risk, in response to a disaster, undertakings may have to use part of their reserves and credit lines to cover their immediate needs or losses, resulting in a reduction in demand deposits and an increase in the use of credit. However, at a later stage, the withdrawn funds are likely to be reintroduced into the economy (via payments to the construction companies in charge of the repairs) and therefore to be returned to banks via corporate customers. Insurance cover can also mitigate losses, and the local nature of natural disasters limits their impact on a global bank such as Crédit Agricole Group.

To protect itself against these risks, Crédit Agricole Group monitors major weather events and conducts ad hoc studies based on major weather events. A number of analyses have been carried out (Storm Alex in the Provence-Alpes-Côte d'Azur region, flooding in the Aa, Liane and Canche river basins etc.), demonstrating at this stage that such events have no impact at the local level, and even less so at the Group level.

Transition risks affect liquidity risk in several ways. First, they can reduce the value of liquidity reserves in central banks if the collateral valuation structure changes. For Crédit Agricole, this risk is considered low, as these deposits are not very sensitive to climate risks and are protected by effective risk management strategies. Secondly, the Bank's reputation could be affected if it does not honour its climate commitments, which could weaken the confidence of customers and institutional investors.

Stress tests were carried out in the first quarter of 2025 based on scenarios combining these components over several time horizons. These exercises showed that the Group can absorb the consequences of these adverse events without jeopardising its liquidity balance.

MARKET RISK: EFFECTS OF CLIMATE RISK FACTORS ON MARKET RISK

Based on the NGFS analysis and following the example of the regulatory climate stress tests proposed in the past by the ACPR and the ECB, it appears that the most significant climate risk factors for market positions stem from transition risks. These risks are more likely to generate systemic impacts, and therefore impact market positions that tend to concern large corporates.

These transition risk factors may be related to the public authorities' penalisation of activities that contribute to climate change through high levels of greenhouse gas emissions. This may concern, for example, the introduction of climate taxation (or,

conversely, subsidies), regulatory requirements, restrictive energy and transport policies (e.g. reduction of CO₂ emissions), the banning of certain environmentally harmful materials and chemicals etc.

Undertakings may also find it difficult to adapt their business models to the new paradigms: changes in investor, consumer, supplier or employee behaviour and technological developments.

These climate factors apply to all exposures in market, credit and equity activities, and more particularly to those in the most carbon-intensive sectors. These exposures and their sensitivity have been mapped according to the European statistical classification of economic activities, NACE (Nomenclature of Economic Activities). Interest and inflation rates can also be linked to climate and environmental risk factors.

To assess the materiality of climate risks, risk weightings, calibrated according to a disorderly transition scenario, are applied to the sensitivities of the exposures. This scenario was designed in line with the projections of the NGFS, particularly with regard to carbon prices and CO₂ emissions. The weightings adversely impact sectors that are sensitive to climate risks.

A simulation was carried out on the Crédit Agricole CIB trading book and showed the low materiality of climate risks on credit and equity market positions.

For the financial materiality and resilience of the business model, see part 1.3.3 "Material impacts, risks and opportunities and their interaction with strategy and business model".

1.4.1.3 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO OTHER ENVIRONMENTAL ISSUES

1.4.1.3.1 INTRODUCTION AND RESOURCES USED

Proud of its cooperative and mutualist identity, Crédit Agricole supports the economy and innovation in France and abroad, while also committing to societal and environmental causes. We encourage sustainable practices and support our customers in their environmental transition with tailored solutions, even though we do not actually control their activities, while complying with our regulatory framework.

Our analysis was conducted in accordance with ESRS 1, combining top-down and bottom-up approaches to assess the Group's nature-related impacts, risks and opportunities (IRO). This work drew on the combined expertise of the Sustainability and Impact, Risk and ESG Coordination business lines of the Finance department, ensuring that the appropriate skills were available to address these issues.

As part of our materiality analysis, we conducted in-depth work on all environmental standards related to nature: ESRS E2 (Pollution), which covers the impacts of pollutants on air, water and soil; ESRS E3 (Water and marine resources), which addresses the sustainable management of freshwater resources and marine ecosystems; ESRS E4 (Biodiversity and ecosystems), which addresses the preservation of species and natural habitats; and ESRS E5 (Resource use and circular economy), which addresses the optimisation of resource use and waste reduction. Although these four standards have distinct, specific targets, they are interconnected and interdependent in many ways, sometimes justifying an integrated approach to their analysis.

1.4.1.3.2 CONTEXT

The regulatory framework for CSRD is evolving rapidly. The Omnibus Package aims to simplify sustainability reporting requirements while ensuring they remain aligned with the targets of the Green Deal. This simplification project, which is still under discussion, illustrates the European institutions' recognition of the current complexity of the system, and therefore the need for a gradual approach to achieve robust reporting on the sustainability issues covered by the ESRS.

1.4.1.3.3 FINDINGS

As part of its analysis of ESRS standards, the Group notes that the themes of Pollution (E2), Water (E3) and Resource use and circular economy (E5) have relatively well-established indicators and metrics. However, there is not yet a standard method for interpreting these metrics at the level of financing and investment portfolios and insurance products, which limits their operational use. For the topic of Biodiversity and ecosystems (E4), the challenge is twofold: the available metrics are still underdeveloped and the assessment methodologies have yet to be established.

1.4.1.3.4 LACK OF METHODOLOGY, SECTOR-SPECIFIC PATHWAYS AND OPERATIONAL REFERENCE FRAMEWORKS

ESRS related to Pollution (E2), Water (E3) and Resource use and circular economy (E5) are based on relatively well-established technical metrics (e.g. volumes withdrawn, pollutant emissions, recycling rates). However, the absence of performance thresholds, shared sector-specific pathways and operational benchmarks prevents these metrics from being translated into forward-looking judgements. Without standardised points of comparison or sector-specific target levels, it is impossible to determine whether a metric signals high risk, satisfactory performance or priority for improvement within a financing or investment portfolio.

The ESRS Biodiversity and ecosystems (E4) presents a simultaneous deficit of relevant metrics and robust assessment methods. Current tools are often fragmented, sector-specific or unsuitable for aggregation at the portfolio level. The lack of common methodologies and benchmark pathways prevents any reliable comparative assessment, impact projection or definition of transition strategies based on measurable targets. This situation reflects the intrinsic complexity of natural capital, whose diversity of species, ecosystems and ecological processes makes any single assessment approach impossible. Unlike the ESRS Climate (E1), the financial sector does not yet have a biodiversity metric such as tonne of CO₂ equivalent. The creation of stabilised sector-specific pathways, the development of shared operational benchmarks and the development of metrics adapted to financing and investment portfolios are necessary for making these metrics usable and effectively modelling risks. Exploratory work has led to the production of certain internal metrics. However, the figures obtained remain difficult to interpret in the absence of defined thresholds and pathways.

These multiple challenges explain the financial sector's difficulty in assessing the materiality of nature-related issues in a consistent manner. Nevertheless, this remains achievable, thanks to ongoing efforts, international initiatives and collaboration between scientists, financial institutions and regulators to forge the tools of tomorrow.

1.4.1.3.5 TAKING INTO ACCOUNT THE OPINIONS OF STAKEHOLDERS

The Group continues to closely monitor stakeholder opinions (rating agencies, investors and analysts, civil society etc.) through various channels (meetings, questionnaires, surveys) and has observed that nature-related issues are not yet given significant consideration and are also not as high a priority as climate-related issues, for example, illustrating a gradual approach to a particularly complex subject.

In this context, the Group considers that it is not yet in a position to draw definitive conclusions on the double materiality analysis of nature-related issues for the 2025 financial year. The Group is continuing its work with the aim of developing a sufficiently robust and measurable methodology to determine which aspects of its counterparties' activities (and what proportion of these activities) and themes could be considered material or immaterial.

1.4.1.3.6 OUR EXPLORATORY WORK ON NATURE-RELATED ISSUES

The Group has carried out a great deal of exploratory work to develop methods for measuring the impacts, risks and opportunities associated with nature. This includes:

- In 2025, the Sustainability and Impact department conducted a top-down pilot project focusing on two sectors as samples: Agriculture and Residential Real Estate in France in the retail banking sector. The aim of this pilot project was (i) to produce an impact analysis of the activities financed in these two sectors on biodiversity, land use change, water consumption, climate change and water pollution, based on physical metrics, and (ii) to prioritise open data in order to avoid the pitfalls of collecting customer data. The modelling has methodological limitations: a top-down approach using aggregated territorial data rather than specific banking data; a customer portfolio that is not representative of the actual diversity of the assets financed (farms or types of housing); and excessive simplifications that do not take into account significant variations (types of financing, specific characteristics of the assets, geographical distribution) that heavily influence the assessment of environmental impacts.
- In 2024, Crédit Agricole S.A. teams studied the impacts and dependencies of the Group's financing portfolio with regard to various categories of nature-related factors, drawing in particular on international databases (ENCORE). Although aligned with market practices, such as the work of the Banque de France ⁽¹⁾ or the ECB ⁽²⁾, this work has significant limitations, notably the lack of forward-looking scenarios, the impossibility of studying the transmission of risks through to credit risk parameters in order to perform a detailed quantitative assessment.
- In 2023 and 2024, Crédit Agricole S.A., Amundi and Crédit Agricole CIB participated in two pilot projects of the Taskforce on Nature-Related Financial Disclosures (TNFD) in order to test the LEAP ⁽³⁾ process and provide feedback on the reporting framework proposed to financial institutions. We carried out these initial pilot projects on a non-representative sample of agri-food undertakings in our financing and investment portfolios:

(1) <https://www.banque-france.fr/fr/publications-et-statistiques/publications/perle-de-biodiversite-et-stabilite-financiere>

(2) ECB Climate and Nature Plan – <https://www.ecb.europa.eu/ecb/climate/our-climate-and-nature-plan/html/index.fr.html>

(3) The LEAP approach is designed to be used by organisations of all sizes, in all sectors and in all geographic areas. This integrated assessment approach is known as the LEAP approach, or "LEAP" for short (Locate, Evaluate, Assess and Prepare).

- TNFD pilot project on agri-food ⁽¹⁾ with Iceberg Data Lab and I Care. The impact analysis was carried out using the Corporate Biodiversity Footprint (CBF) tool. The CBF covers three pressures: land use change, pollution (water and air) and climate change. The analysis of dependencies is less robust than that of impacts, particularly because tools such as ENCORE only cover direct impacts, which limits the scope of the assessment for Crédit Agricole, which is exposed to indirect activities. The “Locate” phase of LEAP is difficult to implement for financial institutions due to the lack of accurate geographical data on production sites and the supply chain. This hinders the detailed identification of impacts and dependencies;
- TNFD pilot on agriculture and fisheries ⁽²⁾ with UNEP FI and CDC Biodiversité. Asset managers face a major challenge: the lack of accurate geographical data for the undertakings in their portfolios and the lack of data on supply chain traceability. This constraint limits their ability to fully apply the LEAP approach, particularly when assessing indirect impacts and dependencies.

Since 2022, Crédit Agricole CIB has integrated nature and biodiversity issues into its environmental and social risk analysis, assessing the dependence and impact of corporate customers. This rating contributes to the assessment of overall ESG risk when granting credit and conducting annual reviews of counterparties. This system is still evolving, with new models to be integrated in the near future. The current system is not predictive and has not been tested on historical data; it is not mature enough for other risk uses. Nevertheless, the current results indicate that the portfolio under review has predominantly low levels of risk, suggesting limited dependence.

As part of its supervisory work, in line with the ECB guide on climate and environmental risks, the Crédit Agricole Group has conducted a new vulnerability analysis, strengthening the identification of scopes within its credit portfolio that are significantly exposed to environmental risks other than climate risk. The results of this analysis show that the portfolio as a whole has low to medium vulnerability. This analysis has enabled the prioritisation of sectors to be covered by environmental risk management in procedures and processes, in a context of limited data and methods for financial players.

1.4.1.3.7 THE GROUP IS WORKING TO PROMOTE NATURAL CAPITAL AND BIODIVERSITY

The fact that the Group considers that it is not in a position to draw definitive conclusions at this stage on the materiality of nature-related themes for the reasons outlined above does not call into question its stated commitment to promote natural capital ⁽³⁾ and biodiversity.

In particular, Crédit Agricole S.A. published a statement on biodiversity and natural capital ⁽⁴⁾ in September 2023. Aware of the major pressures exerted by human activities on ecosystems (pollution, overexploitation, land use change, invasive species etc.), Crédit Agricole S.A. has defined five areas of action: assessing the impacts and risks associated with the loss of nature; integrating environmental criteria into its sector-specific policies; mobilising financial resources for activities that benefit nature; supporting collective initiatives; and reducing its direct footprint. It acts in particular through thematic funds (circular economy, blue economy,

Fonds Objectif Biodiversité fund), criteria for excluding the financing of projects in protected areas (UNESCO World Heritage sites and Ramsar sites), environmental certifications for its real estate assets, and specific commitments such as the decision not to finance deep-sea mining projects.

Although these actions are less mature than those developed for other material ESG issues and represent a limited share of the Group's commercial offering and financial results, they nevertheless demonstrate a willingness to take progressive action on these issues.

Crédit Agricole S.A. participates in the following coalitions in particular:

- in 2023, Crédit Agricole S.A. co-chaired the Nature Target Setting Working Group of the UNEP FI ⁽⁵⁾ Principles for Responsible Banking (PRB Nature) to develop an initial guide of recommended targets for banks, aligned with the Kunming-Montreal Agreement (Global Biodiversity Framework);
- since 2022 Crédit Agricole S.A. has been a member of the TNFD Forum and is also part of France's Consultation Group with *Entreprise pour l'Environnement* (EpE) and *Institut de la finance durable*, working to better identify, assess, manage and report on nature-related risks and opportunities.

Crédit Agricole S.A. intends to continue working with national and international coalitions to better understand the negative impacts and risks of environmental degradation. It is also seeking to better understand the positive impacts and opportunities to contribute to its protection, conservation and restoration.

1.4.1.3.8 CONCLUSION

In view of all the aforementioned difficulties and methodological limitations, the Group is not, at this stage, in a position to conclusively assess the materiality of ESRS E2 (Pollution), E3 (Water and marine resources), E4 (Biodiversity and ecosystems) and E5 (Resource use and circular economy) within the CSRD framework.

1.4.1.4 DESCRIPTION OF THE PROCESS TO IDENTIFY AND ASSESS MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO BUSINESS CONDUCT

As part of the Group's double materiality methodology, the Group Compliance department has defined the impacts, risks and opportunities (IRO), based on the existing standards, the mapping of non-compliance risks and the quantitative metrics available.

The IROs relating to business conduct are grouped into six material themes: promotion of an ethical culture, avoidance of conflicts of interest, protection of whistle-blowers, anti-corruption, combating financial crime and preventing market abuse.

The consolidated IRO ratings have been validated by the Group Compliance governance bodies (Management Committee).

In the area of Purchasing, IROs were identified using the AFNOR risk map based on the ISO 31000 “Risk management”, ISO 20400 “Sustainable procurement” and ISO 26000 “Social responsibility” standards, and the internal operational risk management tool, in close collaboration with internal stakeholders.

1.4.2 DISCLOSURE REQUIREMENTS IN ESRS COVERED BY THE COMPANY'S SUSTAINABILITY REPORT

See Appendix 3: Coverage of disclosure requirements.

2. RESPONSIBILITY FOR CLIMATE CHANGE

2.1. GOVERNANCE

At the undertaking's highest levels, the Board of Directors of Crédit Agricole S.A., a listed undertaking and the corporate centre of the Crédit Agricole Group, ensures that the Group's strategy and activities take climate, environmental and social concerns and risks into account. In particular, it monitors the societal commitments, which are the subject of regular reporting. To facilitate the inclusion of social, climate and environmental issues and risks in its decision-making, the Board of Directors has established a Societal Commitment Committee. Chaired by the Chairman of the Board of Directors, it plays a key role in reviewing the Group's ESG strategy. The operational deployment of the ESG risk strategy and steering in the business lines is coordinated within cross-functional committees, placed under the authority of senior executives at the highest levels of the Crédit Agricole Group. Finally, it should be noted that the greenhouse gas (GHG) emission reduction targets, sector-specific decarbonisation pathways and action plans defined as part of the work to decarbonise the Group's financing portfolios are presented each year to Crédit Agricole S.A.'s Board of Directors.

Dedicated governance generally meets on a quarterly basis to inform, approve and steer the Group's climate change policies and Climate Transition Plan:

- **the Group Societal Project Committee**, which is chaired by a Regional Bank Chairman, meets three times a year and is made up of 12 members, half of whom are Chief Executive Officers of Crédit Agricole S.A. and the other half of whom are Regional Bank senior executives. It oversees the implementation of the Group's societal commitments and the alignment of its ESG strategy within Crédit Agricole Group, and examines prospective files relating to ESG issues. In 2025, the discussions and work usually carried out by this committee were incorporated into the development of Crédit Agricole S.A.'s 2026-2028 Medium-Term Plan;
- **the Board of Director's Societal Commitment Committee**, chaired by the Chairman of the Board of Directors, reviews the Group's ESG strategy and analyses the results of all policies implemented and actions taken with regard to the Group's non-financial performance. It monitors changes in non-financial ratings;
- **the ESG Strategy Committee**, chaired by the Chief Executive Officer of Crédit Agricole S.A., reviews the components of the ESG strategy (sector-specific policies, standards, guidelines, position papers, methodologies, Net Zero pathways etc.), submits them to the Crédit Agricole S.A. Board of Directors for approval with the opinion of the Societal Commitment Committee, and monitors the implementation of the Group's commitments;
- **the Heads of Sustainability and Impact Committee**, chaired by the Director of Sustainability and Impact, a member of the Crédit Agricole S.A. Executive Committee, meets monthly with the Heads of Sustainability and Impact of Crédit Agricole S.A.'s main entities. As part of a consultation and cooperation process, the members of this committee contribute their expertise to identify issues and propose a coherent overall approach in terms of Sustainability and Impact to the ESG Strategy Committee;
- **the Climate Sponsor Committee**, chaired by a Regional Bank Chairman and made up of the Chief Executive Officers of the Regional Banks and Crédit Agricole S.A., oversees the definition of the Group's Net Zero pathways and adaptation strategy;
- **the multi-disciplinary Scientific Committee**, composed of 10 external members who are recognised experts in climate and environmental issues, meets at least three times a year. Its mission is to shed light on issues relating to commitments and to draw up recommendations on ESG aspects;
- **the Group-level Individual Risks Committee**, chaired by Crédit Agricole S.A.'s Chief Executive Officer, is responsible for deciding on certain individual customer files requiring the approval of Executive Management, particularly those most sensitive to climate change risks;
- **the Group Risk Committee**, chaired by Crédit Agricole S.A.'s Chief Executive Officer, defines the Group's risk policy, sets overall Group limits, validates the risk frameworks of Crédit Agricole S.A. entities and business lines, and monitors the Group's major risks such as environmental risks, including risks related to climate change;
- the role of the **Board of Directors' Risk Committee** is to review the overall strategy and risk appetite of Crédit Agricole S.A. and the Crédit Agricole Group, as well as risk strategies, including environmental risks. It assists the Board of Directors in its role of overseeing the implementation of this strategy by Executive Directors and the Head of the Risk Management function;
- **the Audit Committee of the Board of Directors** is responsible, in particular, for monitoring the development of non-financial information and the control plan of the sustainability information certifiers.

The members of the Executive Committee have the skills and expertise required in their fields to understand the impact of climate and environmental risks. The other members also include climate and environmental aspects in their portfolios of expertise in their respective fields:

- the Steering and Control, Finance and Risk functions are heavily involved in risk management and non-financial communication;
- the Insurance division closely monitors trends in climate risk-related claims, and includes due diligence on climate and environmental risks in its Asset Management activities;
- the Investment for third parties division is at the forefront of climate issues, with Amundi's involvement;
- the Personal Finance & Mobility division is increasingly taking transition issues into account;
- the Large Customers and Universal Banking divisions finance and invest in renewable energy and low-carbon infrastructures, and support all customers in their transitions;
- the Agriculture and Agri-Food department of Crédit Agricole S.A. supports the Regional Banks to support their farming customers' agricultural transition.

2.2. STRATEGY

If we are to adapt and contain the effects of climate change and its ecological, socio-economic and geopolitical consequences, our entire model of growth must be critically examined in depth. The conclusions addressed to executives by the sixth climate assessment report of the Intergovernmental Panel on Climate Change (IPCC) on the consequences of a global temperature rise of more than 2°C call for a global rethink of the economy of the future.

Faced with this challenge, financial institutions are called upon to play their part in supporting the economy of tomorrow. Adopted by a significant number of international players, both government and private, as COP26 approached in November 2021, the target, known as “Net Zero 2050”, represented an important milestone on the path to be followed at the global level so that global warming does not exceed 1.5°C by 2100. As part of its Societal Project and the implementation of its climate change policies, Crédit Agricole Group is integrating its climate transition plan into its overall strategy. It has thus pledged to “Contribute to carbon neutrality by 2050 through its operating footprint and its investment and financing portfolios” and to “support all of its customers in their energy transition”.

The Crédit Agricole Group has joined several pioneering climate financing initiatives from the outset. Since 2003, it has been co-founder and signatory of the Equator Principles, a signatory of the United Nations Global Compact, the Climate Principles in 2008, the Science Based Targets Initiative in 2016, the Principles for Responsible Banking in 2019, the Principles for Responsible Investment in 2011, and the Principles for Sustainable Insurance in 2021. A co-founder of the Green Bonds Principles ⁽¹⁾, the Group has become a world leader in green bonds ⁽²⁾. By joining the three international alliances below in 2021 and 2022 ⁽³⁾, and in line with the commitments made as part of its membership of the Glasgow Financial Alliance for Net Zero (GFANZ), the Crédit Agricole Group is committed to contributing to achieve carbon neutrality by 2050:

- **Net Zero Banking Alliance ⁽⁴⁾ (NZBA), on the banking scope:** 10 priority sectors ⁽⁵⁾ (Oil & Gas, Power Production, Residential Real Estate, Commercial Real Estate, Agriculture, Automotive, Aviation, Shipping, Cement and Steel) covering approximately 60% ⁽⁶⁾ of Crédit Agricole Group's outstanding loans and representing more than 75% of global greenhouse gas emissions;
- **Net Zero Asset Managers Initiative ⁽⁷⁾ (NZAM), within the scope of investments for third parties:** target of reduction in carbon emissions relative to revenues of -30% by 2025 and -60% by 2030 vs. 2019 ⁽⁸⁾. As of 31 December 2025, 100% of portfolios covered by the Net Zero range have achieved a 30% reduction in carbon intensity, based on a reference baseline as of 31 December 2019;
- **Net Zero Asset Owner Alliance (NZAOA), within the scope of insurance business investments:** target of a -50% reduction in carbon emissions per million euros invested in 2029 vs. 2019 ⁽⁹⁾.

While each of the coalitions implies or initially implied commitments specific to each business line, certain requirements form a common base: the setting of both long-term (2050) and short/medium-term (2025, 2030) targets with interim milestones; the establishment of a baseline year for annual measurement of emissions; the choice of a stringent decarbonisation scenario recognised by science; and the validation of targets and trajectories by the highest governance bodies.

2.2.1 TRANSITION PLAN FOR CLIMATE CHANGE MITIGATION

Within financial institutions, a distinction should be made between the transition plan for their own activities and transition plans relating to the value chain, in particular financing portfolios (sector-specific Net Zero pathways), insurance investment portfolios (euro funds and equity funds) investment for third parties (Net Zero range) and asset management (Net Zero range). With regard to these transition plans for the Group's portfolios, Crédit Agricole is adopting a top-down approach to align sector-specific decarbonisation pathways with those set out in the reference scenario.

Therefore, the concept of the transition plan described in this report refers to a set of sector-specific or activity-based transition plans carried out by the Group with the contribution of some of its subsidiaries (see part 2.3 “Actions and resources in relation to climate change policies” for details of the scope covered by each plan), and comparable to recognised scientific pathways and reference scenarios (see part 2.4 “Performance targets and measures”). These trajectories and scenarios are constantly evolving and may be updated in the coming years.

Lastly, it is emphasised that the Group's decarbonisation initiatives are developed within its relationship model through a comprehensive approach to the needs of its customers, as well as in the context of the specificities of the banking sector and the interdependence of decarbonisation levers. Therefore, the quantification of decarbonisation levers is a complex exercise, that is why their contribution to achieving GHG emission reduction targets should be considered globally.

The Group's transition plans for climate change mitigation are intended to provide an understanding of past, current and future mitigation efforts of some activities of the Group, and on specific sectors identified. This will ensure that its strategy and business model contribute to the transition to a sustainable economy.

(1) <https://www.ca-cib.fr/sites/default/files/2017-02/2014-03-doc-de-ref-2013-v3-fr.pdf>, page 46.

(2) Bloomberg, Green, Social & Sustainable Bonds EUR 2025.

(3) The Net Zero Insurance Alliance ceased to exist on 25 April 2024 and was replaced by the Forum for Insurance Transition to Net Zero (FIT).

(4) In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

(5) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

(6) This coverage ratio is calculated by considering in the numerator the total outstanding amounts in the 10 priority sectors identified in the NZBA framework and in the denominator the total exposures in “sectors contributing strongly to climate change” (Pillar 3 ESG definition) with a reprocessing along the upstream/downstream value chains of the sectors engaged.

(7) In January 2025, NZAM decided to suspend assessments of the implementation of signatories' commitments.

(8) The choice of 2019 as the baseline year allows for compliance with the following NZAOA recommendation: “Members' sub-portfolio targets shall strive for science-based GHG reductions versus YE2019 as described above in the range of 22-32 percent by YE2024, and 40-60 percent by YE2029” NZAOA TSP4”, and is part of Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

(9) Carbon footprint of listed equity and corporate bond investment portfolios and directly held real estate. The choice of 2019 as the baseline year is in line with the NZAOA's recommendations and Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

The Group's activities and sectors covered by these transition plans to date, regardless of the geographical area in which the business lines are present, are as follows:

- financing (eight priority sectors ⁽¹⁾: Oil & Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel);
- investment of the insurance business (euro funds and own funds) and investment for third parties (Net Zero range).

The assumptions associated with these transition plans are presented in the following parts of the report.

The Climate Transition Plan, including the transition plan of own operations and the sectoral transition plans, is a plan that Crédit Agricole Group has been implementing since June 2019 as part of its climate change policies and overall strategy. Its principle: gradually reallocate the Group's financing and investment portfolios, consistent with the targets of the 2015 Paris Agreement and reference scenarios including that of the International Energy Agency (IEA), to contribute to achieving carbon neutrality by 2050.

The climate transition plan of Crédit Agricole Group covers the scopes of the Group's carbon footprint as defined by the following GHG Protocols: Scopes 1 and 2 Greenhouse Gas (GHG) emissions linked to its own operations and energy consumption, Scope 3.6 emissions linked to business travel, and Scope 3.15 emissions linked to financing activities, investment of the insurance business (euro funds and own funds) and investment for third parties (Net Zero range). Reducing the carbon footprint of the downstream value chain is achieved through the sector-specific decarbonisation pathways and action plans described in this report.

This transition plan gained significant momentum in 2022 and was expanded in December 2023 and again in 2025 as part of the work for Crédit Agricole S.A.'s 2026-2028 Medium-Term Plan. It is based on three complementary areas:

1. carry out mass financing and investments in renewable energies, low-carbon infrastructure, clean technologies and energy efficiency projects (see part 2.3 "Actions and resources in relation to climate change policies");
2. support customers in their climate change-related transitions (see part 2.3 "Actions and resources in relation to climate change policies");
3. continue to reduce fossil fuel financing (see part 2.3.1.2 "Sector-specific action plans", sections on "Oil & Gas" and part 2.3.2.2 "Investment").

Crédit Agricole Group is not excluded from the European Union's "Paris-aligned Benchmarks" ⁽²⁾ given the sectoral exclusion criteria applied.

The other components of the Crédit Agricole Group's transition plan are set out in the following parts of the document:

- information relating to the administrative, management and supervisory bodies of Crédit Agricole Group that approve the climate transition plan is included in part 2.1 "Governance";
- the compatibility of the undertaking's GHG emission reduction targets with limiting global warming to 1.5°C in accordance with the Paris Agreement is presented in part 2.4 "Targets related to climate change mitigation";
- the decarbonisation levers identified and key actions planned in Crédit Agricole Group's own operations or in its downstream value chain are detailed in part 2.3 "Actions and resources in relation to climate change policies";
- information on the progress of the Climate Transition plan (operating footprint and downstream value chain) is given in part 2.4 "Performance targets and measures".

Transition plan coverage ratio: the transition plan does not systematically cover 100% of outstanding NZBA sectors to which the Group is committed.

(1) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

(2) This information is aligned with the Commission's Delegated Regulation (EU) 2020/1818 (climate benchmark regulation).

EXAMPLES OF CLIMATE TRANSITION PLAN ACHIEVEMENTS AT END-2025

For more information, see part 2.4 "Performance targets and measures".

(1) Baseline for the aviation sector: 2019

(2) Data at end 2023

(3) Renewable energies and nuclear power

2.2.1.1 OPERATING ENVIRONMENTAL FOOTPRINT

Although most of its GHG emissions are linked to its financing and investment activities in insurance and investment for third parties, the Crédit Agricole Group attaches great importance to reducing emissions due to the environmental footprint of its own operations as an undertaking, in line with its commitment to setting an example.

In line with its Net Zero commitment, it is committed to reducing the environmental impact of its operating footprint to help achieve the net-zero emissions target by 2050.

Crédit Agricole S.A. has therefore set itself the target of halving its Scopes 1 and 2 emissions and halving its Scope 3 emissions (business travel only) between 2019⁽¹⁾ and 2030. Similarly, aware of the impact of its value chain on its operating environmental footprint, it has set a target to decarbonise its purchases.

(1) The choice of 2019 as the baseline year is in line with SBTi requirements, which recommend that it be no more than two years before the year of publication of GHG emission reduction targets, and is in line with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

2.2.1.2 CLIMATE CHANGE POLICIES

As part of its climate strategy, the Crédit Agricole Group has implemented policies and management frameworks to prevent, mitigate and remedy impacts, manage risks and seize material opportunities (see part 2.2.3.1 “Material impacts, risks and opportunities”) related to climate change mitigation. These policies enable the Group to manage key sustainability matters and cover the following areas: climate change mitigation, energy efficiency and the roll-out of renewable energy. They cover the six pillars (see part 2.3, “Actions and resources in relation to climate change policies”).

The sector-specific CSR policies implemented by Crédit Agricole S.A. over several years specify the rules of engagement and the criteria, particularly climate criteria, incorporated into Crédit Agricole S.A.’s financing and investment policies. They reflect issues related to respect for human and social rights and environmental protection, including the fight against climate change. Seven Crédit Agricole S.A. sector-specific CSR policies ⁽¹⁾ are currently published on the following sectors that have a significant impact on the climate: energy (oil and gas, thermal coal, electricity), extractive industries (mining and metals), construction (transport infrastructure), transport (road transport), agriculture and forestry (deforestation and ecosystem conversion). These policies governing financing, investment, asset management and insurance businesses are regularly updated to align financial operations with Crédit Agricole S.A.’s long-term sustainability targets. In 2025, LCL adopted sector-specific policies relevant to its activity (e.g. oil and gas, mining and metals etc.) by integrating climate and social criteria into its financing and relationship-building processes. Crédit Agricole CIB adopted four sector-specific policies related to the fight against climate change in the Nuclear Energy, Commercial Real Estate, Aeronautics and Shipping sectors.

FINANCING

Group entities incorporate an assessment of risks, particularly climate risks, a categorisation of these risks (high, medium, low) and an additional qualitative analysis for sectors identified as high risk into their credit decision-making process. This process has been put in place in order to respond, in an operational and consistent manner, to regulatory requirements concerning the consideration of risk factors, particularly climate risk factors, in credit assessments.

The Equator Principles are a risk management framework for project financing. They were developed to respond to the constraints and levers for action that exist in the project financing process. Although they cannot always be applied as they stand to other types of financing, they provide a useful methodological framework for taking into account and avoiding social and environmental impacts when the financing or financial advisory mandate appears to be linked to the construction of a specific industrial asset (factory, transport infrastructure etc.).

An analysis of the environmental or social sensitivity of transactions: Crédit Agricole CIB has been assessing the environmental or social sensitivity of transactions since 2009. This process ensures compliance with the exclusion criteria defined in the various sector-specific CSR policies and enables the analysis and even anticipation of potential controversies with customers.

INVESTMENTS IN THE INSURANCE BUSINESS

Crédit Agricole Assurances applies the above-mentioned sector-specific CSR policies to its investments, where relevant. Where necessary, these are supplemented by sector-specific policies specific to Crédit Agricole Assurances. This is the case, for example, with the oil and gas policy, which has been supplemented by an oil and gas policy specific to Crédit Agricole Assurances, which deals with investments made directly in infrastructure.

INVESTMENTS FOR THIRD PARTIES (NET ZERO RANGE)

The Paris Agreement aims to limit the global average temperature increase to well below 2°C and calls on countries to pursue efforts to limit the increase to 1.5°C, which requires achieving net-zero greenhouse gas emissions by mid-century. Article 2.1 of the Paris Agreement sets out targets to align financial flows in order to make them consistent with a low-carbon and climate change-resilient pathway. Investors can play a role in decarbonising the real economy by seeking to direct their investments towards the least carbon-intensive undertakings. However, determining an undertaking’s alignment with the Paris Agreement targets remains a challenge to date. As a result, a significant portion of the broad spectrum of asset classes and regions of the world in which Amundi invests does not yet benefit from the analytical frameworks and data necessary for a comprehensive action plan. Nevertheless, certain measures can already be taken to support the commitment to actively contribute to global carbon neutrality targets by 2050. With regard to investments for third parties, the following principles have been adopted to align its funds with the Paris Agreement:

- Amundi has the capacity to steer the evolution of metrics related to the selected themes;
- Amundi can justify the explicit request from its customers for this steering.

Amundi’s ambition is to promote a wide range of Net Zero products and to be able to act on its customers’ mandates in order to support them in transforming their portfolios if they so wish.

Amundi has set minimum standards and exclusion policies on critical climate issues, triggering specific monitoring and escalation procedures when violations by an issuer are identified, which may lead to engagement, specific voting actions (where applicable) or exclusion.

Finally, Amundi supports its employees in understanding and implementing its Climate strategy.

INSURANCE

Crédit Agricole Assurances has been a signatory to the Principles for Responsible Investment (PRI) since 2010 and has published an annual ESG-Climate report since 2017, in accordance with Article 29 of the French Energy and Climate Law. This report describes Crédit Agricole Assurances’ approach to integrating non-financial criteria into its investment analysis and decision-making processes.

REINSURANCE POLICY

Crédit Agricole Assurances uses reinsurance to mitigate underwriting risks and physical risk factors related to climate change. All underwriting risks are analysed annually in order to identify reinsurance options to be considered, in accordance with the targets set out in the reinsurance policy. This analysis leads to the selection of an optimal structure by the Reinsurance Committee (or another decision-making body under the responsibility of Executive Management). This structure, or its main characteristics, is presented to the Board of Directors prior to its implementation.

(1) <https://www.credit-agricole.com/responsable-et-engage/notre-strategie-rse-etre-acteur-d-une-societe-durable/nos-politiques-sectorielles>

In this context, risk modelling is carried out through three main processes:

- modelling of climate, conflagration and dam failure risks, based on the assessment of capital at risk and the use of specific modelling software;
- modelling of other risks, in particular third-party liability, based on an analysis of historical claims; and
- analysis of the role of reinsurance and the protection it provides to the undertaking.

The financial strength of the reinsurer is assessed by its rating or, in the absence of a rating, by criteria validated by the Group. Sufficient diversification of investments between reinsurers is implemented to limit counterparty risk.

RISK SELECTION AND PRICING POLICY

Through its non-life insurance activities, Crédit Agricole Assurances is exposed to frequency risk and exceptional event risk.

When implementing its underwriting policy, Crédit Agricole Assurances takes care to model the various risk factors as accurately as possible, whether they are climate-related or not.

As the intensity of risks varies greatly depending on geographic area, Crédit Agricole Assurances sets its rates in such a way as to strike a balance between customer responsibility and risk pooling.

Crédit Agricole Assurances' aim is to maintain insurability in all territories.

OPERATING FOOTPRINT

To promote carbon neutrality by 2050, Crédit Agricole S.A. has based its operating footprint reduction targets (energy consumption in buildings, electrification of vehicle fleets, responsible digital technology, employee business travel and responsible purchasing) on a rigorous methodology, in line with the target of limiting global warming to 1.5°C by 2100.

Crédit Agricole S.A. pursues a policy of energy efficiency in its buildings in France, as demonstrated by its signing of the Ecowatt Charter.

Crédit Agricole S.A. regulates its employees' business travel through a travel policy that defines basic rules (travel class according to duration, type of transport used etc.) to ensure compliance with the decarbonisation pathway, passenger safety and cost control.

The Group has implemented a "Responsible Purchasing" policy that applies to Crédit Agricole S.A. and its subsidiaries. This policy is set out in a "Responsible Purchasing" programme, rolled out within Crédit Agricole S.A. and its subsidiaries and detailed in part 4.2.5.5 "Taking action for the transition to a low-carbon economy".

The commitments are presented in part 2.3.4, "Operating footprint", and the targets in part 2.4.1.4, "Operating footprint targets".

2.2.1.3 CLIMATE IN CRÉDIT AGRICOLE S.A.'S BUDGET PLANNING

To meet the monitoring requirement for sector-specific decarbonisation pathways as part of the implementation of the Group's overall strategy, the steering of Net Zero commitments related to the financing of eight sectors ⁽¹⁾ (Oil and Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel) is integrated into the budget process of the banking activity. Carbon is managed as a scarce and diminishing resource. The carbon aspect of financing is monitored according to sector-specific decarbonisation pathways, either in absolute terms or in terms of intensity, with annual targets validated in line with the 2030 GHG emission reduction targets announced by Crédit Agricole Group. A dedicated carbon management team has been set up within the Group's Finance department. Climate impact is thus integrated into strategic decisions.

2.2.1.4 METRICS LINKED TO THE GROUP'S CLIMATE STRATEGY

The metrics below are used to monitor Crédit Agricole Group's climate strategy.

Performance indicators	Unit	2025	2024	Entities concerned
Portfolio of green assets meeting eligibility criteria of the Group Green Bond Framework of November 2023	€bn	24.70	21.70	CACIB
Financing of renewable energy	€m	412	312	LCL
Additional number of companies engaged on climate compared with 2021	Number	1,818	1,478	Amundi
Contribution to the financing of installed renewable energy capacity via investments	GW	16	14	CAA
Financing of renewable energy	€m	1,320	1,192	CAL&F
Unifergie commercial production (financing of renewable energy)	€m	1,377	1,292	CAL&F
Reduction of exposure to oil extraction and production compared to 2020 (outstanding financing)	US\$bn	2.05	3.20	CACIB
Reduction of exposure to oil extraction and production compared to 2020 (% change)	%	-72	-56	CACIB
Growth in low-carbon energy exposure compared to 2020 (outstanding financing)	€bn	20.00	17.20	CACIB
Growth in exposure to low-carbon energy compared to 2020 (% change)	%	170	132	CACIB
Exposure to thermal coal as a % of total outstandings	%	0.03	0.04	Amundi
Thermal coal exposure	€bn	0.20	0.41	CACIB
Financing of low-carbon energy	€bn	28.56	26.30	Groupe Crédit Agricole

(1) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

All of these metrics are monitored by Crédit Agricole S.A. twice a year. Most of the metrics are presented at the highest level of Crédit Agricole S.A.'s governance through the ESG Strategy Committee chaired by the Chief Executive Officer of Crédit Agricole S.A., Olivier Gavalda, and to the Board of Directors via its Societal Commitment Committee.

Additional number of undertakings engaged on climate compared with 2021

This metric counts the additional number of undertakings covered by a direct climate commitment over the period 2021-2025. The definition of the commitment is provided by the United Nations (UN) Principles for Responsible Investment according to four characteristics (nature of the commitment, theme of the commitment, commitment cycle and monitoring of commitments).

Contribution to the financing of installed renewable energy capacity through investments

This metric reflects the renewable energy production capacity (hydroelectricity, solar photovoltaic, onshore or offshore wind power – possibility of extension to storage assets) held by the Crédit Agricole Assurances Group through its unlisted strategic holdings.

Reduction in exposure to oil extraction and increase in exposure to low-carbon energy

These metrics show Crédit Agricole CIB's exposure to primary energy extraction, production and storage in terms of Exposure At Default (EAD). EAD allows both on-balance sheet and off-balance sheet assets to be accounted for. Low-carbon energy includes renewable energy and nuclear energy. Oil extraction and production refers to upstream oil in the value chain.

Outstanding thermal coal financing

This metric shows the sum of outstanding amounts (in EAD) of dedicated and non-dedicated financing related to thermal coal by Crédit Agricole CIB. Dedicated financing corresponds to amounts dedicated to thermal coal projects (the entire EAD amount).

Commercial production in renewable energy financing for Crédit Agricole Leasing & Factoring/Unifergie

The financing included in the metric relates to the following energy sources and equipment: wind, solar, geothermal, hydraulic, waste recovery, marine, biomass, methanisation, hydrogen, energy efficiency, low-carbon energy and public energy infrastructure. The measurement in euros is relevant because the data is based on financing provided by companies within the Crédit Agricole Leasing & Factoring scope.

Financing of low-carbon energy

The Group's low-carbon energy financing includes financing for renewable energy from the entities (Regional Banks, LCL, Crédit Agricole Bank Polska, Crédit Agricole Leasing & Factoring/Crédit Agricole Transitions & Énergies (Transitions & Énergies), Crédit Agricole CIB), as well as nuclear energy financing (Crédit Agricole CIB).

2.2.2 CLIMATE CHANGE ADAPTATION

Climate change is already having a growing economic and social impact: global losses have tripled in 25 years ⁽¹⁾, and a 3°C scenario could cause global GDP to fall by up to 22% by 2100 ⁽²⁾.

The Paris Agreement requires simultaneous action to be taken on mitigation (GHG emission reduction) and adaptation (preparing for the inevitable consequences of climate change). While mitigation has long dominated climate strategies, adaptation is now becoming essential.

France took a decisive step forwards on 10 March 2025 when the Ministry of Ecology presented its third National Climate Change Adaptation Plan (PNACC 3) ⁽³⁾ and its 52 concrete measures to adapt the country to the “visible and expected impacts of climate change”.

Financial institutions occupy a unique position: both because of their direct exposure to physical climate risks and because of their role in supporting the financing of the economy, they can direct capital towards resilient sectors, assess and adapt product pricing in line with climate risks, and support their customers in the transition to more resilient models.

Founded in the 19th century to finance agriculture, which was ignored by the banking system, Crédit Agricole Group has retained this value of societal utility by supporting major changes. With its model of local proximity, the Group is at the forefront of adaptation strategies because, unlike mitigation, which must take place at the global level, adaptation makes sense at the local level.

The Group is therefore structuring its adaptation strategy through a gradual approach, aligned with national (PNACC 3), European (EU Climate Adaptation Strategy) and international (UNEP, Paris Agreement) frameworks, to support its customers in their specific regional adaptation needs.

A PROGRESSIVE AND STRUCTURED APPROACH

Faced with the emergence of climate change adaptation issues, the Crédit Agricole Group is rolling out a pragmatic strategy to gradually integrate best scientific practices into its offering and processes, while responding to the urgent needs of customers and regions. Aligned with the Principles for Responsible Banking (PRB) methodology, this strategy is structured around three phases:

1. assessing risks and opportunities: understanding exposure to physical climate risks and identifying adaptation opportunities for customers and regions;
2. defining strategy and targets: integrating adaptation considerations into the overall strategy and defining measurable targets;
3. action plan and support: implementing its roadmap in practice through its activities and support for its customers.

The Group will focus its efforts on the sectors and regions most exposed to physical climate risks, such as agriculture, tourism, critical infrastructure, and forest and coastal areas.

This work is part of the market initiatives in which Crédit Agricole Group is involved: the UNEP-FI Principles for Responsible Banking's “Adaptation and Resilience” working group; the European Commission's “Mobilising Climate Resilience Financing” working group; and the Institute for Sustainable Finance's (ISF) “Financing Climate Change Adaptation” working group.

(3) <https://www.ecologie.gouv.fr/actualites/gouvernement-lance-nouveau-plan-national-dadaptation-changement-climatique>

PILOT APPROACH AND REGIONAL EXPERIMENTATION

To implement its climate adaptation strategy, Crédit Agricole Group has opted for a pilot project approach, working closely with local players. This experimental approach provides a concrete understanding of each region's adaptation needs and enables the joint development of solutions tailored to the realities of each sector.

In 2025, the Group launched several pilot projects in different regions. For example, Crédit Agricole des Savoie is leading a project focused on adapting the mountain tourism sector (co-creating resilience pathways and tailored financing solutions).

These experiments constitute a laboratory for innovation in support of the Group's strategy, enabling it to capitalise on lessons learnt in the field to enrich methodologies and develop solutions that can be replicated on a larger scale.

CHALLENGES AND LIMITATIONS

Crédit Agricole Group recognises that implementing an ambitious climate adaptation strategy comes with significant challenges. Localised climate data and physical risk assessment methodologies remain imperfect, creating uncertainty in portfolio analyses. Furthermore, integrating adaptation considerations requires profound organisational transformation and significant investment in training and information systems.

Finally, financing adaptation often generates diffuse and long-term benefits that are difficult to quantify in traditional business models. The absence of a clear taxonomy and harmonised sector-specific standards complicates the identification, assessment and reporting of adaptation activities.

Despite these challenges, Crédit Agricole Group also sees them as opportunities for innovation. A gradual, collaborative approach allows us to move forwards pragmatically, taking advantage of lessons learnt and adjusting our strategy as knowledge and available tools evolve.

2.2.3 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH STRATEGY AND BUSINESS MODEL

2.2.3.1 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

Based on its Climate Transition Plan and the double materiality analysis validated by the Group's governance bodies (see part 1 "General information"), the Group has identified the following main sources of impacts, risks and opportunities related to climate change:

- the positive and negative impacts associated with supporting customers' transitions in contributing to the achievement of carbon neutrality by 2050, a key pillar of the Group's climate change mitigation strategy;
- managing the positive and negative impacts of the Group's GHG emissions in relation to its operating footprint and its financing, insurance activity investment (euro funds and equity) and investment for third parties (Net Zero range) business lines;
- the impact of climate risk factors (physical and transition risk) on the risk profile of Crédit Agricole Group customers;
- the pursuit of commercial opportunities created by sustainable finance with regard to climate issues, as well as the energy and environmental transition.

Description of IROs	Positioning in the value chain	Time horizon
Positive impacts		
– Climate change: The Group's positive impact on the climate through financing, investment and insurance activities contributing to the transition: dedicated loans and financing, committed financial savings, climate insurance products	Downstream value chain	Long-term
Negative impacts		
– Climate change: Negative impact of the Group's activities (investment, financing, insurance) on climate change	Downstream value chain	Long-term
– Operational environmental footprint: Negative impact of the operating footprint on the climate	Own operations	Long-term
Risks		
– Climate change: Physical risk factors related to climate change that affect the Group's risks (credit, financial, operational)	Downstream value chain	Long-term
– Climate change: Transition risk factors related to climate change that affect the Group's risks (credit, financial, operational)	Downstream value chain	Medium-term
– Climate change: Regulatory and reputational risk related to the Group's activities that contribute to climate change	Downstream value chain	Invariable
– Support for customer transitions: Reputational risk in the event of a lack of transparency or misleading communication on climate issues	Downstream value chain	Short-term
– Support for customer transitions: Risk of increased costs for the Group due to the investments required to transform its business model in order to decarbonise its activities and boost its resilience (data purchases, investments, resources, systems, limitation of certain activities)	Entire value chain	Long-term
Opportunities		
– Climate change: Development of new services and solutions to support customers' transition to a low-carbon economy	Downstream value chain	Medium-term
– Support for customer transitions: Contribution to commercial development and improvement of the Group's image through its strong commitment to climate action	Downstream value chain	Long-term

The material IROs for Crédit Agricole Group are presented in the table above. The qualitative and quantitative work described above has made it possible to identify the major risks affected by climate risk, which therefore need to be prioritised when developing the Group's risk management system. To date, the only short-term risk identified is credit risk, which is more impacted by physical and transition risks, particularly on Corporate portfolios (very large corporates, large corporates, medium-sized corporates, small corporates) in the most vulnerable sectors.

The climate stress test carried out in the first quarter of 2025 showed that climate risks have a very limited impact on market risk across all the time horizons defined by the Group, in line with the nature of the Group's market activities. However, their effects are reassessed on a regular basis. Nevertheless, they do not warrant any action within a one-year timeframe, nor does the transition risk for insurance activities.

2.2.3.2 INTERACTION WITH THE STRATEGY AND BUSINESS MODEL (INCLUDING BUSINESS MODEL RESILIENCE TO PHYSICAL AND TRANSITION RISKS)

The financial materiality and resilience of the business model are discussed in the part 2.2.3.1 "Material impacts, risks and opportunities" above.

The climate scenario analyses also assess the resilience of the business model (see part 1.4.1.2 "Description of the process to identify and assess material impacts, risks and opportunities related to climate change").

2.3. ACTIONS AND RESOURCES IN RELATION TO CLIMATE CHANGE POLICIES

Within the framework of its relationship model, through a global approach to its customers' needs, the specific characteristics of the banking sector and the interdependence of decarbonisation levers, the Group's decarbonisation initiatives comprise a range of actions to reduce GHG emissions. The contribution of decarbonisation levers to the achievement of GHG emission reduction targets should therefore be considered globally.

The actions and resources allocated by the Crédit Agricole Group to meet the targets of the climate strategy, in line with its Societal Project initiated in December 2021, are based on six pillars to capture the various challenges of its business lines:

- supporting customers in their environmental and energy transition;
- implementing sector-specific action plans;
- rolling out investment action plans;
- a reduction in its operating footprint;
- a voluntary contribution to carbon neutrality;
- the implementation of an ambitious climate risk management system.

SUPPORTING ITS CUSTOMERS OR MAKING THE TRANSITION ACCESSIBLE TO AS MANY PEOPLE AS POSSIBLE

As part of its Societal Project initiated in December 2021, Crédit Agricole Group has adopted a proactive approach to supporting the transition of its customers in all markets (individuals, corporates, public authorities, SMEs, farmers). Its aim is to ensure that all economic and regional stakeholders are supported and assisted in the transformations that are currently underway and those to come. Crédit Agricole Group continues to play an active role in major societal transitions by providing all its customers with products and services that support the energy and environmental transition and by constantly pursuing a policy of innovation and progress.

This support takes the form of concrete actions within its operations, such as:

- in 2023, Crédit Agricole Group created an entity dedicated to energy and environmental transition: Crédit Agricole Transitions & Énergies (Transitions & Energies). This entity supports and facilitates its customers' environmental transitions through financing and investment in renewable energy (RE) projects. It also contributes to the production and supply of low-carbon electricity through direct distribution chains, in cooperation with regional players. Finally, it offers transition consulting and solutions, supporting the Group's customers in their energy efficiency initiatives;
- training all employees and executives in CSR issues, and coordinating a network of energy experts and energy transition advisors;
- raising customer awareness of sustainability matters and of environmental and energy transition matters;
- banking support for customers' transition projects through the implementation of a wide range of financing solutions, such as targeted financing, sustainability-linked loans and sustainable savings solutions;
- support through insurance and banking-related products for transition projects such as the production and supply of renewable power and the protection of installations;
- sustainable mobility solutions;
- the identification and monitoring of financing in the sectors with the highest emissions (see part 2.3.2 "Sector-specific action plans");
- the creation of the Carbioz* platform, a solution for marketing carbon certificates bearing the "Label Bas Carbone" ("Low-Carbon Label"), originating from the transition of French farms.

PARA-BANKING SUPPORT FOR CORPORATE, PUBLIC SECTOR AND SOCIAL ECONOMY CUSTOMERS

Through Crédit Agricole Transitions & Énergies, the Crédit Agricole Group aims to accelerate the development of renewable energies in France and to support all its customers in their efforts to reduce their energy consumption and environmental impact.

In 2024, Crédit Agricole Transitions & Énergies launched, through its subsidiary R3, advisory services and solutions in the three main transition areas: CSR, decarbonisation and energy performance. These solutions are designed for SMEs, MSEs and large corporates, and adapted to their degree of maturity. These offerings provide end-to-end support to corporates, from diagnosis to strategy development and implementation. Its ambition is to accelerate change and encourage corporates to transform themselves, by developing concrete solutions to help them act effectively and sustainably.

PRODUCTION AND SUPPLY OF ELECTRICITY FROM RENEWABLE SOURCES

Crédit Agricole Transitions & Énergies offers a direct-distribution renewable energy aggregation and supply offering that enables local authorities to purchase low-carbon electricity locally and move towards covering 100% of their energy needs at controlled prices. The offering is based on carbon-free electricity supply contracts that enable local authorities to source their electricity either from an identified direct-distribution producer or on the market with a certificate of origin for the production. This offering is provided by Selfee, a subsidiary of Crédit Agricole Transitions & Énergies, an electricity market operator that enables the purchase via direct distribution chains, at a local price, of power produced locally, as the only intermediary of the energy producer.

These new renewable energy production solutions will be available to large corporates in the medium-term.

VOLUNTARY CONTRIBUTION: CARBIOZ OFFERING

The Carbioz offering, created with the aim of giving concrete form to Crédit Agricole Group's commitments to the environmental transition, was launched in March 2024.

Carbioz promotes an offering supported by agents who sell carbon credits generated by French agriculture and forestry to financing customers such as corporates, local authorities and associations wishing to engage in voluntary financing initiatives. Carbioz also offers a framework of trust, based on the Low Carbon Label established by the French government. Finally, Carbioz allows financing customers to choose and then formalise their voluntary carbon contribution, with secure record-keeping, and to benefit from a dedicated customer area with various reporting tools to support their climate strategy.

Since autumn 2024, in addition to the agricultural projects marketed by France Carbon Agri, Carbioz has expanded its offering and formed partnerships with Hummingbirds and EcoTree, providing Low Carbon Label certificates from French forestry projects. Carbioz also offers certificates from hedge planting with Solenat, as well as from arboriculture and field crops with its partners Amandera, Carbonapp and Carbon & Co.

This offering is intended for players who have completed their carbon assessment and defined their decarbonisation pathway. The carbon contribution consists of supporting projects to avoid or sequester greenhouse gas emissions (expressed in CO₂ equivalent) outside its value chain. Beyond carbon, voluntary contribution serves as a lever for action at the regional level in support of the environment and quality of life, particularly through various additional environmental benefits (biodiversity, water and air quality etc.). The counterpart of this contribution is obtaining Emission Reduction Certificates (“carbon credits”).

ORGANISATION OF SKILLS DEVELOPMENT FOR THENETWORK AND CUSTOMERS, AND TRAINING FOR THE CUSTOMER ADVISORY BUSINESS LINE TO SUPPORT THE TRANSITION

To fulfil its role as an advisor and transition partner, Crédit Agricole Group organises skills development activities at all levels.

Training modules have been developed and rolled out, in particular to improve the skills of relationship managers. For example, IFCAM (the Crédit Agricole Group University) provides all Group entities with generic modules on sustainable savings and financing, and on CSR commercial approaches. At Crédit Agricole CIB, the ESG Academy is continuing with modular training courses tailored to specific needs. With Amundi Academy, Amundi accompanies and supports the marketing of its offerings with mainly digital promotion tools aimed at the advisors and experts of the Group's distribution networks.

CREATING AND COORDINATING NETWORKS OF ENERGY TRANSITION EXPERTS AND ADVISORS

Networks of experts have been established in certain Group entities. Their purpose is to promote sales, and they may also play a representative, educational or oversight role. These networks exist at LCL throughout France and at Crédit Agricole CIB internationally.

Crédit Agricole Transitions & Énergies has dedicated teams to strengthen its presence in the regions, coordinating a network of energy transition advisers in France who support corporate account managers, as well as a network of experts in the Group's Energy and Environment division in France and internationally (with a significant presence in Italy, Poland and Ukraine in particular).

LCL has an Energy division made up of experts serving the Corporate departments throughout France. It specialises in the energy transition and energy markets. It supports the growth of energy stakeholders (developers and producers of renewable energy, cleantech, greentech etc.) and the energy decarbonisation of LCL's corporate customers who are energy consumers.

RAISING CUSTOMER AWARENESS

The Group has established a commercial CSR approach with the implementation of a strategic transition support process reinforced by an “ESG Maintenance Guide” in the Regional Banks. Its ambition is to initiate a strategic dialogue from a transition perspective by identifying levers to support customers in the Corporate, Local Authority and Social Housing markets.

To encourage reflection and awareness on a given subject, or the sharing of best practices, a wide range of initiatives have been implemented for customers: webinars, training courses, conferences and dedicated programmes. At LCL, the Sustainable Solutions and Decarbonisation department supports the environmental and energy transition of corporate customers through a unique multi-disciplinary system: the Sustainable Finance division, regional Sustainable Solutions Managers, the Energy division specialising in the energy transition and energy markets, and a team responsible for sourcing, labelling and coordinating an ecosystem of green partners. This business line enables LCL to

offer its corporate customers comprehensive support and concrete decarbonisation and energy transition solutions, from strategic advice to the roll-out and financing of transition solutions.

Crédit Agricole Transitions & Énergies (Transitions & Énergies) organises webinars for the regional banks' corporate customers on topical issues (CSRD, energy market, self-consumption, deconsolidation arrangements etc.).

PARA-BANKING SUPPORT FOR INDIVIDUAL CUSTOMERS

CUSTOMER AWARENESS AND PROMOTION

The Regional Banks are heavily involved in their regions and are committed to playing an active role in local issues. In this context, as part of the renovation of their real estate portfolio, they took on a role that involved various stakeholders such as France Renov agencies (public renovation service), ADIL (*Association départementale d'information sur le logement* – Departmental Housing Information Agency), local tradespeople and Regional Bank Directors, who all recognise the importance of this issue.

LCL regularly runs four campaigns per year to raise awareness of energy renovation among its customers, whether homeowners or landlords. Each awareness campaign is conducted via email and push notifications.

SUPPORTING CUSTOMERS IN THEIR ENERGY RENOVATION PROJECTS THROUGH AN ALL-IN-ONE PLATFORM

Crédit Agricole Transitions & Énergies offers an online platform called “J'écórénove mon logement” (I'm eco-renovating my home) for the Regional Banks and “Écorénov'LCL” for LCL and a range of services to inform and guide their customers and make their projects possible. This platform received a total of 1 million visits between January and September 2025.

The service allows prospective customers or customers of the French retail bank who wish to renovate their property to develop their project: the services help them identify the work to be carried out as a priority, to estimate its cost, the aid and financing they need, and to find a tradesperson. The advisor then takes the reins, proposing the Group's various financing offerings. To take things further, Crédit Agricole Transitions & Énergies has expanded its *J'écórénove mon logement* and *Écorénov'LCL* offerings by partnering with Hello Watt, a specialist in energy-efficient renovation, to offer individuals a seamless experience and comprehensive support, from technical and economic studies to the completion of the work.

In June 2025, Crédit Agricole Transitions & Énergies acquired a majority stake in Comwatt, an undertaking specialising in the production and optimisation of solar energy consumption for individuals. This initiative will accelerate the development of concrete solutions to support Crédit Agricole Group's individual customers in their decarbonisation projects and energy expenditure management.

In Italy, Agos has launched AgoràCasa, a free simulator available on its website that allows users to assess the energy rating of their home in three simple steps: assessment, customisation and recommendations. Ultimately, it allows customers to identify the necessary improvement work and obtain an estimate of the associated costs. At the same time, Agos has launched Agos One, an innovative and unique loan solution designed for those who wish to invest in products aimed at improving the sustainability and energy efficiency of their homes.

DEVELOPMENT OF RENEWABLE ENERGY

See part 2.3.3 “Insurance”, part 2.3.3.1.3 “Supporting customers' adaptation to the impacts of climate change” section.

PARA-BANKING SUPPORT FOR ENTREPRENEURIAL CUSTOMERS

Crédit Agricole Group supports its entrepreneurial customers in their comprehensive approach to transitions:

- advisors at the Regional Banks have a Transitions Pro Interview Guide, which enables them to initiate awareness-raising discussions with their customers and to identify their progress and concerns regarding environmental issues;
- professional advisers receive support from energy transition advisers when a customer need has been identified. This system raises awareness among customers of the various solutions available to them, enabling them to approach transitions with greater peace of mind.

PARA-BANKING PARTNERSHIPS WITH CRÉDIT AGRICOLE TRANSITIONS & ÉNERGIES

In the case of Regional Banks, transition-related advisory services and solutions for entrepreneurs and SMEs are currently being considered.

2.3.1 FINANCING

2.3.1.1 SUPPORTING CUSTOMERS

2.3.1.1.1 SUPPORTING THE CLIMATE TRANSITION OF CORPORATE, PUBLIC SECTOR AND SOCIAL ECONOMY CUSTOMERS

The Group offers sustainable financing solutions to support corporate, public sector and social economy customers in their transition projects:

- in 2018, Crédit Agricole S.A. established a Green Bond Framework, updated in 2023, which serves as a common framework for all Crédit Agricole Group issuing entities for their issues of green bonds for all entities, and green notes for Crédit Agricole CIB in particular;
- targeted financing is designed to fund projects that are subject to asset liability management on environmental issues (European Taxonomy climate change mitigation and adaptation targets) and social issues. The option of providing preferential pricing is left to the discretion of each entity;
- financing renewable energy projects: Crédit Agricole Transitions & Énergies finances renewable energy production and energy efficiency projects in conjunction with the Group's banks, through a financial and legal engineering offer, as well as financing offerings in various areas of sustainable energy (renewable energy, energy performance, environment). From 2020 to 2030, the ambition of Crédit Agricole Transitions & Énergies is to mobilise €19 billion in renewable energy financing provided by Crédit Agricole Group entities in France;
- sustainability-linked loans finance activities where the interest rate is indexed to the undertaking's own ESG performance criteria, enabling customers to align their CSR strategy with the financing of their growth or operations;
- Crédit Agricole Leasing & Factoring's energy transition financing solutions for corporates, SMEs, and farmers (Green Solutions) to finance energy transition equipment for corporates, SMEs and farmers who want to reduce their energy bill and their carbon footprint and place environmental issues at the heart of their business model. The range consists of three offerings: LED lighting, green mobility and solar self-consumption;

- an offer for the renovation of real estate assets (real estate leasing) to finance their energy renovation work;
- Crédit Agricole Leasing & Factoring's CSR factoring range supports companies in their energy and societal transition, depending on their segment and maturity in terms of CSR;
- the EIB and Bpifrance transition financing packages are financial mechanisms designed to support France's energy and environmental transition. As a major player in the French banking sector, Crédit Agricole Group acts as a facilitator, loan distributor and advisor, making EIB and Bpifrance resources more accessible to corporates and local authorities.

Crédit Agricole Italia offers:

- "Scoring ESG-Linked" financing featuring a reward system, with a reward linked to an overall assessment of the customer's sustainability performance detected periodically by an ESG score obtained through an evaluation questionnaire that the customer can complete online;
- "SACE Green" financing, guaranteed by the Italian export credit agency, for investment projects in line with the environmental targets set by the agency;
- a digital supply chain platform that enables undertakings at the upstream end of a production chain to assess the ESG positioning of their suppliers. Based on performance measured by an ESG score, it offers the most virtuous suppliers in terms of ESG a discount in exchange for the early payment of invoices.

2.3.1.1.2 SUPPORT FOR INDIVIDUAL CUSTOMER CLIMATE TRANSITIONS

To reduce financed GHG emissions, Crédit Agricole Group offers a range of offerings and solutions to its individual customers. The most important of these are described below.

FINANCING OFFERING

Reinvigorating the distribution of all eco-PTZ interest-free loan options

The interest-free eco-loan (eco-PTZ) is a zero-rate loan subsidised by the French government to finance energy improvements on residential properties. The list of work eligible for financing is drawn up by the public authorities. Regional banks and LCL are the leading distributors of eco-PTZ zero interest rate loans, with a market share of 35% in 2025.

Retail banking in France is committed to promoting the various options of this regulated loan, such as the Eco-PTZ Ma Prime Rénov' renovation loan. The introduction of the complementary eco-PTZ at the end of 2024 allows customers who have already benefited from an eco-PTZ, but not used the full entitlement, to apply for the additional amount for other work.

A clearer, wider range of transition-related loans to meet all needs

The aim is to offer an alternative to customers who are not eligible for the eco-PTZ or who wish to supplement it in order to finance all types of energy renovation projects or the acquisition of energy transition equipment. In addition, the Regional Banks have set up an advance loan aid for renovation, allowing customers to start initial work before receiving the financial assistance. This new product range is offered across all Regional Banks at December 2025.

Crédit Agricole Immobilier, through its subsidiary Crédit Agricole Services Immobiliers Group, provides specific support for co-owned apartment blocks that are managed by the Square Habitat agency network. Launched in 2022, this project aims to encourage co-owners to undertake energy renovation works by supporting them from the technical assessment through to the completion of works, including a financial engineering solution (collection of subsidies and collective financing of the works). In 2025, within the portfolio managed by Square Habitat, 154 co-owned apartment blocks were engaged in renovation projects, representing nearly 4,000 homes.

In addition, Crédit Agricole Immobilier is gradually extending the same approach to individual landlords in the context of putting rental properties on the market.

SOLUTIONS PROMOTING LOW-CARBON MOBILITY

The Group's businesses lines are developing a range of products and services to promote low-carbon mobility.

Retail banking in France offers more advantageous rates than the standard scale for the purchase of vehicles emitting less than 50 g of CO₂/km, bicycles and motorised personal mobility devices, and recharging stations. The retail banking networks in France also offer insurance policies that encourage the purchase of electric vehicles, car-sharing and drivers with low annual mileage.

Crédit Agricole Personal Finance & Mobility has set itself the goal of becoming a leader in electric mobility:

- Agilauto, which is committed to more sustainable mobility for all, provides turnkey mobility solutions to individual, SME and corporate customers of the retail bank (Regional Banks and LCL) in France through rentals with a purchase option and long-term rental offerings.
- CA Auto Bank, present in 18 European countries and Morocco, regularly enters into strategic partnerships with international electric vehicle manufacturers, enabling it to offer more sustainable financing and mobility solutions to an ever-wider audience. Since early 2024, CA Auto Bank and Drivalia have signed the following new partnerships: in Italy, Spain, France, Germany and Switzerland, they collaborate with BYD to develop financing offerings dedicated to electric vehicles, in France and Switzerland with Cadillac to support the launch of its first fully electric model.
- Since 2009, Crédit Agricole Personal Finance & Mobility has been a partner of Chinese manufacturer GAC through the GAC-Sofinco joint venture. This partnership will be strengthened in 2025 with the creation of GAC-Sofinco Leasing, offering financial and operational leasing solutions on the Chinese market. With a portfolio of more than 190,000 vehicles and nearly 300 employees, GAC-Sofinco Leasing supports the GAC Group's brands. 64% of leasing contracts already cover electric vehicles.

Furthermore, more than a year after its launch, Agilauto Partage, the 100% electric rural car-sharing service, is establishing itself as an innovative response to the challenges of mobility in underserved rural areas by making the use of electric vehicles more widespread at a time when many French drivers have never used one. The aim is to roll out this solution across France.

To encourage lower-carbon or carbon-free travel, LCL offers a loan to promote the energy transition within mobility, consisting of a personal loan at a preferential rate to finance the purchase of new or used vehicles, including electric or hybrid cars emitting less than 50 g of CO₂/km, bicycles (electric or non-electric), and electric motorised personal mobility vehicles. In addition, LCL offers a preferential-rate loan for the purchase of a mechanical or electric bicycle, with an interest rate of 0% with no loan application fees for part of the year. For customers who own a 100% electric car, LCL offers car insurance with a green bonus (€100 refunded in the first year of coverage). For all cars insured by LCL Assurances, refurbished parts are regularly suggested to customers in the event of a claim. LCL also offers a specific insurance policy covering the risks associated with the ownership and use of motorised personal mobility vehicles (MPMV), the use of which has grown considerably in urban areas.

MAKING ENERGY-EFFICIENT HOME RENOVATION WORK ACCESSIBLE TO AS MANY PEOPLE AS POSSIBLE

With the launch of Sofinco Éco-Transitions, Sofinco has taken a strong step towards supporting individuals, construction professionals and other players in energy renovation. With the ambition of financing €3 billion-worth of work over the next three years, representing 300,000 renovations in France, Sofinco intends to support the government's targets to renovate energy-inefficient buildings and unlock housing renovation by supporting housing professionals (tradespersons, diagnosticians, real estate agents etc.) and their customers. Sofinco Éco-Transitions goes beyond financing and offers a comprehensive package of services designed to simplify and streamline energy renovation projects for private individuals. To achieve this, Sofinco will draw on its knowledge of the sector, its network of more than 3,000 qualified professionals and its high-performance digital tools.

2.3.1.1.3 SUPPORTING THE CLIMATE TRANSITION OF ENTREPRENEURIAL CUSTOMERS AND SMES

The entrepreneur and professional market covers a wide range of customers, due to the multitude and disparity of business sectors (tradespersons, retail traders, self-employed professionals etc.), to the volume of revenues, to consulting and support needs, which can range from simple to the complex, and to very different uses. This market is still developing, driven by micro-entrepreneurs and sole traders, with changing customer behaviours and expectations. Driven by technological, societal and regulatory changes, it is expected to be reshaped by 2030 with the emergence of new entrepreneur profiles: "slashers" (professionals who combine several activities), employees who also have a professional activity, young people, seniors, entrepreneurs involved in impactful projects etc.

ADVISORY APPROACH: TRANSITION PRO INTERVIEW GUIDE

Within the Regional Banks, an interview guide was made available to advisors at the end of 2024. This guide aims to evaluate the maturity of customers in terms of CSR through a series of questions.

It is also an opportunity for advisors to engage in a dialogue with their customers to raise awareness about the subject and to offer them tailored commercial solutions.

DEDICATED OFFERINGS AND FINANCING

In light of these changes, it is essential to provide entrepreneurs with structured support tailored to their circumstances, enabling them to combine economic performance with climate commitment. LCL supports its SME customers with electric mobility financing solutions (electric mobility loan, long-term car rental, rental with purchase option etc.) and partners who are transition experts. To allow entrepreneurs to make a greater contribution, environmental investments are also offered in the “LCL Trésorerie Pro” range. In addition, there is a responsible savings offering, with funds selecting undertakings engaged in the energy transition process: LCL Compensation Carbone Actions Monde, LCL Compensation Carbone Multi Stratégies and FCP Solidarité Habitat et Humanisme.

TRANSITION LOANS

Following on from the targeted transition loan offering for the corporate market, a pilot scheme for Regional Banks' SME customers was launched in the second quarter of 2025. In line with regulations, this offering will initially support customers in four areas: energy renovation, renewable energies, clean transport and mobility (including infrastructure) and energy-efficient buildings. A training programme, linked to the roll-out of the offering, has been offered to employees.

MOBILITY

A comprehensive range of mobility solutions (including electric mobility) is available to all SME customers of the Regional Banks through three scalable offers (Essential, Business and Business+).

A targeted approach for healthcare professionals (nurses and doctors) is currently being developed with the help of Agilauto (long-term rental offer with preferential terms).

2.3.1.1.4 SUPPORTING THE CLIMATE TRANSITION OF CUSTOMERS IN THE AGRICULTURAL SECTOR

As a long-standing partner of farmers (eight out of 10 French farmers are Crédit Agricole customers), Crédit Agricole has always been committed to supporting major changes in the agriculture and agri-food industries. In an increasingly complex environmental, societal and political context, one of its missions is to help its farming customers remain competitive while adapting to the effects of climate change and limiting their impact on the environment.

ACTION PLANS FOR CUSTOMERS IN THE AGRICULTURAL SECTOR

Crédit Agricole's ambitions for the agricultural sector are based on four major actions:

- training Group employees on agricultural transition issues and in particular, in Regional Banks, agricultural market managers and agricultural advisors who work in the field to support farming customers;
- raising awareness among farming customers of the challenges of agricultural transitions and assessing their maturity in these areas in order to better support them through these transitions;
- developing and sharing advice, tools and banking or insurance products designed for farming customers to support them in their transitions; and
- supporting research and innovation to help farmers in their transitions.

DEDICATED FINANCING AND OTHER SOLUTIONS

Since 2024, the Regional Banks have been rolling out “Trajectoires Agri” (Agri Pathways), a tool for dialogue between farming customers and their advisers, focusing on two topics: agricultural

transitions and farm resilience. This approach makes it possible to raise awareness and support customers on the topics of energy transition, GHG reduction/sequestration and climate risks. Trajectoires Agri includes an interview guide called the “Questionnaire Transition Agri” (Agricultural Transition Questionnaire), which raises customer awareness of the challenges of agricultural transition and assesses their level of maturity on environmental, social and regional issues.

“AGILOR TRANSITION” OFFERING

Launched at the beginning of 2025, this offering is intended to help farmers acquire agricultural equipment supporting climate mitigation and adaptation. It targets specific equipment that contributes to the development of agro-ecological practices (direct sowing, micro-irrigation, pit covers etc.); low-emission equipment (electric, biofuels); and preventative equipment for climate hazards (anti-hail devices etc.).

AGRIVOLTAICS

Crédit Agricole Transitions & Energies is working to develop additional tools to support its customers in their agrivoltaic projects. In partnership with Crédit Agricole S.A.'s agriculture market, it offers regional banks a skills development kit including explanatory materials and tools for use in agrivoltaic projects.

At the same time, in 2025 Crédit Agricole Transitions & Énergies created a joint venture with JPEE (a renewable energy project developer) whose mission is to develop local renewable energy assets by making a sustainable contribution to the installation, maintenance or development of agricultural production.

2.3.1.1.5 SUPPORTING CUSTOMERS' ADAPTATION TO THE IMPACTS OF CLIMATE CHANGE

In order to support the adaptation of all stakeholders in society to the impacts of climate change, Crédit Agricole Group is developing a structured, continuous improvement approach and is giving itself the means to systematically integrate climate resilience considerations into its activities.

Crédit Agricole Group has affirmed its interest in positioning itself in the adaptation and resilience economy by providing financial products and services, investing in adaptation projects, supporting its customers and raising their awareness of climate risks and opportunities. In addition, Crédit Agricole Group works closely with development financial institutions and public authorities. With its cooperative model rooted in the regions, Crédit Agricole Group has a unique advantage and a distinctive role to play in making adaptation a lever for local transformation in the public interest.

Aware of the specific needs inherent in each customer profile, the Group intends to offer support that best meets adaptation requirements.

INDIVIDUAL CUSTOMERS

The annual frequency of severe natural phenomena has quadrupled over the last 20 years compared to the previous 40 years. Individuals are mainly exposed to the risks of flooding (56% of natural disasters recorded), clay shrinkage-swelling (50% of homes exposed) and heat waves.

Crédit Agricole Group is currently structuring itself and equipping itself with the necessary resources (data, tools, expertise etc.) to help its customers identify the vulnerabilities of their real estate assets to the impacts of climate hazards and implement specific adaptation measures to make their properties more resilient (e.g. installation of submersible pumps, raising the height of buildings, reinforcing houses with soil humidification, insulation/greening to improve summer comfort).

While systems designed to finance and support individuals in their energy efficiency projects primarily address the issue of climate change mitigation, they also cover adaptation to the effects of climate change. By improving insulation in homes, thermal renovation also helps to improve comfort during the summer, and can help individuals become more resilient in the face of extreme weather phenomena such as heat waves.

As part of the project to adapt the tourism industry in Savoie, the Group assessed the exposure and vulnerability of all of its customers' real estate assets to six climate hazards (heat waves, loss of snow cover, high winds, forest fires, river flooding and clay shrinkage-swelling) using a predictive model based on two IPCC scenarios (RCP 4.5 and RCP 8.5) for different time horizons (2050, 2100). This assessment made it possible to identify the most at-risk assets and to implement an action plan allowing Crédit Agricole des Savoie to support its customers in making their properties more resilient (e.g. renovations to improve summer comfort).

CORPORATE CUSTOMERS

Physical climate risks are also having a growing impact on undertakings' value chains (machine breakdowns, supply chain difficulties and even business interruptions).

Crédit Agricole Group supports its corporate customers both in identifying vulnerabilities within their value chains (vulnerability assessment) and in making the necessary adaptation investments to strengthen their resilience (water consumption reduction plans, financing for optimised heating networks, diversification of raw material supplies etc.).

LCL has rolled out a pilot customer adaptation journey for corporates, aimed at helping them identify, qualify, manage and monitor their physical climate risks. The aim of this journey is to offer solutions to improve undertakings' resilience through dedicated offerings and partnerships. At the same time, LCL has created Lab'Impact, which brings together undertakings from the same business sector to reflect on how to transform their value chain to adapt to climate risks.

FARMING CUSTOMERS

Farmers are facing increasingly extreme weather events (droughts, floods, frosts, hailstorms, water stress etc.), which are making farms, crops, livestock and, consequently, their incomes increasingly vulnerable.

Crédit Agricole Group is aware of its leading role in supporting its farming customers in adopting more sustainable and resilient practices. This is a matter of agricultural and food sovereignty for the regions. The Group is positioning itself to raise its customers' awareness of the risks they face locally and to meet their investment needs in order to make their farms more resilient. As part of a consortium with other partners (Unigrains, InVivo and Sofiproteol), Crédit Agricole carried out an exploratory study entitled "Towards a resilient French agricultural sector by 2050", which evaluated the impact of climate and transition risks on the resilience of a sample of farms and provided a picture of the benefits of deploying some adaptation or transformation levers.

PUBLIC SECTOR CUSTOMERS

Public authorities are also bearing the brunt of the consequences of climate change (heat islands, coastal erosion, flooding, forest fires etc.), highlighting the need to redevelop land and adapt public infrastructure and buildings (schools, hospitals, heritage sites etc.). To do this, they must integrate climate adaptation into all their policies: urban planning, mobility, water management, risk avoidance and energy transition.

Crédit Agricole Group intends to take on the role of providing support by supplying the necessary financing for regional projects (de-imperméabilisation, greening, sustainable rainwater management, renovation of buildings and infrastructure etc.) and strengthening collaborations and partnerships with public and regional players.

Crédit Agricole Transitions & Énergies has signed a partnership agreement with Engie Solutions to facilitate access to global energy performance contracts for public buildings. The aim is to offer deferred payment to local authorities wishing to launch a global energy performance contract. This deferred financing should enable them to facilitate their decision making and subsequently implement these contracts for their property portfolios.

AVOIDANCE

See part 2.3.3 "Insurance", part 2.3.3.1.2 "Supporting customers' adaptation to the impacts of climate change".

2.3.1.2 SECTOR-SPECIFIC ACTION PLANS

As previously indicated, as part of its Climate Transition Plan and its membership of the Net Zero Banking Alliance ⁽¹⁾ (NZBA) in 2021, Crédit Agricole Group defined decarbonisation pathways for eight sectors (Oil and Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel) and made resource commitments for the Residential Real Estate and Agriculture sectors. The Group prepared and implemented the following sector-specific action plans and decarbonisation levers, with a view to achieving the GHG emission reduction targets defined in its financing portfolios. These levers respond to the climate change-related impacts, risks and opportunities identified as material for the Group.

The definition of the scope by sector is described in part 2.4.1.1, "Financing targets".

OIL & GAS

- End all funding for new fossil fuel extraction projects;
- End the financing of independent producers, whose activities are focused exclusively on the exploration and production of oil and gas;
- Review on a case-by-case basis corporate financing for energy companies, based on a regularly updated assessment, taking into account their commitments to the transition;
- Refuse advisory mandates for bond issues of undertakings involved in the exploration and production of fossil hydrocarbons, except those relating to green bonds or sustainability-linked bonds;
- Prioritise customers who are strongly committed to reducing their carbon footprint, and who act as catalysts for the development of decarbonisation solutions (renewable energy, carbon capture and storage technologies, hydrogen production);
- Continue to reduce financing for oil extraction: -72% of Crédit Agricole CIB's exposure ⁽²⁾ to oil extraction in 2025 compared to 2020;
- Withdraw from unconventional oil and gas ⁽³⁾ and exclude financing of projects in the Arctic ⁽⁴⁾.

⁽¹⁾ In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

⁽²⁾ The exposure used is the Exposure At Default (EAD). The allocation percentage is on capital expenditure.

⁽³⁾ Or those of counterparties whose revenues from such activities exceed 30%; shale oil, shale gas, extra-heavy oil, including tar sands oil.

⁽⁴⁾ AMAP area for the terrestrial Arctic and beyond the Köppen line for the maritime Arctic.

POWER PRODUCTION

- Significantly increase the funding of renewable energy in France from 2020 to 2030, to reach a total of €15 billion (Crédit Agricole Transitions & Énergies). The financing reached at the end of 2025 was €6.5 billion;
- Increase exposure to low-carbon energy: 170% increase in Crédit Agricole CIB's exposure to low-carbon energy (production and storage) in 2025 compared to 2020 for a target of +80%;
- Expand the customer base, bringing in new customers to better reflect the growing diversity of the sector;
- Selectively withdraw from fossil fuel-based generation units by completing the exit from thermal coal by 2030 (EU and OECD) and 2040 (rest of the world).

AUTOMOTIVE

- Crédit Agricole Personal Finance & Mobility had set itself high targets, including: to finance one in two new vehicles with a hybrid or electric engine and one in three new vehicles with a full electric engine by 2025. In a difficult Chinese and European market environment, these targets could not be achieved, with a result at the end of 2025 of 39% of new vehicles financed with hybrid or electric engines, and 16% of new vehicles financed with 100% electric engines;
- promote the transition of private individuals and corporates to more sustainable vehicles and alternative mobility through tools such as short- and long-term rentals, social leasing or innovative initiatives such as partnerships with new players in the electric vehicle segment (Agilauto, Agilauto-Partage, Drivalia etc.);
- Support carmakers in the investments needed to electrify their vehicles;
- Support the transformation of the sector by financing new players, such as battery manufacturers and recharging solution operators, carmakers exclusively dedicated to electric vehicles, and with a close monitoring of carmakers' carbon emission trajectories.

SHIPPING

- work with customers to estimate the carbon score of each ship in the portfolio or those to be built, and establish measures to finance the necessary investments (retrofit financing) to align with the Bank's Net Zero policy for ships where possible;
- Develop a proactive policy to finance the building of new ships using sustainable fuels, in collaboration with export credit agencies, in order to:
 - support customers in their orders for new-generation ships,
 - speed up the dismantling of the most polluting ships;
- Launch an improvement process to bring the methodology for calculating financed emissions into line with current regulations and industry standards.

AVIATION

- Give priority to financing fourth-generation aircraft, which are the most fuel-efficient;
- Engage in the sustainable fuels value chain;
- Maintain an ongoing dialogue with customers on sustainability matters.

COMMERCIAL REAL ESTATE

- Play a major role in financing the massive need for renovation work, by supporting customers and taking advantage of local regulations;
- Put energy efficiency at the heart of business efforts and risk policies by developing all-in-one, turnkey solutions to facilitate energy management in all buildings;

- Continue to improve the quality of data to supplement knowledge of the portfolio and of customers' efforts.

CEMENT

- Engage in a continuous dialogue with customers to encourage the adoption of intensity targets below 500 kgCO₂e/tonne of cement, for gross emissions of Scopes 1 and 2;
- continue to support the significant financing needs of its customers to achieve their decarbonisation targets (new infrastructure, CCUS development ⁽¹⁾, electrification);
- Steer the cement portfolio, taking into account the CO₂e intensity targets set by customers, by reallocating assets in favour of cement producers with the most ambitious decarbonisation strategies.

STEEL

- Engage in continuous dialogue with customers not aligned with a 1.5°C trajectory to examine how Crédit Agricole can support them in their decarbonisation;
- Development of financing for projects involving low-carbon steel production technologies;
- Management of the Steel portfolio, with reallocation in favour of customers with the most ambitious decarbonisation plans.

The Group also made commitments to invest resources in the Residential Real Estate and Agriculture sectors:

RESIDENTIAL REAL ESTATE

- Make comprehensive, high-performance renovation the focus of all discussions with customers, particularly when they are acquiring a new property with an energy performance certificate (EPC) of E, F and G;
- Develop innovative customer solutions, while mobilising financial engineering resources. This is the aim of the "J'écórénove mon logement" and "Écorénov'LCL" platforms, for example;
- Adapt lending and pricing policies to encourage renovation;
- Capitalise on local roots to strengthen local initiatives, particularly through partnerships and raising customer awareness;
- Improve reliability in EPC collection by making loans conditional on the customer submitting the EPC for the property to be financed (properties other than new-build);
- Implement differentiated offerings for the acquisition of a property depending on its energy performance to support customers in their transition;
- Develop a customer advice and support strategy, through the establishment of tools to assist in sales, raise awareness in/train the networks, promote financing solutions on a regular basis, particularly the Eco-PTZ interest-free loan.

AGRICULTURE

- Crédit Agricole Group is committed to supporting the agricultural world in its efforts to reduce carbon emissions while strengthening food sovereignty, by supporting the roadmaps established by the industry and the sectors, on both the national level in France and at the individual level.
- At the national level, Crédit Agricole aims to support *Ferme France* ⁽²⁾ by structuring the voluntary carbon credit market, supporting innovation, and assisting with the transition of upstream and downstream players in the sector.
- At the regional level, Crédit Agricole is strengthening its support for farmers in their transition process: by engaging in dialogue with them to assess their maturity on transition issues, by supporting them in their efforts through dedicated tools, and by developing new offerings promoting renewable energy at the farm level (agrivoltaics, methanisation, solar energy etc.).

(1) Carbon Capture, Utilisation and Storage.

(2) *Ferme France* refers to the entire French agricultural ecosystem.

OPERATIONAL MONITORING OF THE NET ZERO STRATEGY AND STEERING AND CARBON MANAGEMENT

Crédit Agricole Group has established a climate strategy that is being implemented in particular through the integration of decarbonisation pathways for eight sectors ⁽¹⁾ (Oil & Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel) into its overall strategic planning. The performance metrics relating to these targets have been formalised and validated at the Group governance level. In parallel with its financial budgeting work, the Group has gradually established a carbon (CO₂) budget, already applied to the 2024 financial year to define the 2025 budget, thus reinforcing the framework for its ambitions and its alignment with the long-term targets to reduce greenhouse gas emissions in Europe and worldwide.

2.3.2 INVESTMENT

2.3.2.1 SUPPORTING CUSTOMERS

2.3.2.1.1 SUPPORTING THE CLIMATE TRANSITION OF CORPORATE, PUBLIC SECTOR AND SOCIAL ECONOMY CUSTOMERS

SUPPORT THROUGH SUSTAINABLE SAVINGS

Amundi offers a comprehensive range of Net Zero Ambition funds to guide savings towards investment solutions that aim to support issuers' climate transition. This range is designed to cover the main asset classes, management styles and geographical areas. Amundi has developed its own investment framework that defines the minimum conditions that must be met for an active management product to be labelled "Net Zero Ambition":

- an overall carbon intensity reduction target enabling the portfolio's progress to be monitored in relation to the reduction pathways of the benchmark universe, compatible with limiting global warming to 1.5°C above pre-industrial levels;
- a requirement of a minimum exposure to high climate impact sectors to encourage the transition in these key sectors;
- targeted exclusions of issuers in sectors deemed incompatible with the objective of transitioning to a low-carbon economy.

SUPPORT FOR AGRICULTURAL AND AGRI-FOOD UNDERTAKINGS

Crédit Agricole Group has allocated a budget of €1 billion to four funds (capital innovation, debt etc.) intended to finance and invest in the development of a competitive and sustainable agricultural and agri-food system. The investment proposition that serves as a guide to financing and investment decision-making covers the topics of climate change adaptation, mitigation, preservation of natural resources, animal welfare and the circular economy, as well as others such as generational renewal and the evolution of consumption habits etc.

In 2023, four funds were structured and launched:

- ambition Agri-Agro Investissement: a €300 million private equity fund with IDIA;
- CA Ambition Agri Agro Tech: a €65 million innovation capital fund (target: €100 million) with Supernova Invest (investment in Seederal (development of electric tractors) in May 2025);
- Amundi Ambition Agri Agro Lending Europe: a €140 million private debt fund with Amundi;
- InvestEU, a €210 million European first-loss guarantee fund.

2.3.2.1.2 SUPPORT FOR INDIVIDUAL CUSTOMER CLIMATE TRANSITIONS

SAVINGS SOLUTIONS THAT SUPPORT THE TRANSITION

Responsible savings products that include climate-related themes are offered to retail banking customers in a category of investment solutions called "Committed Financial Savings". Depending on the case, these products are eligible for life insurance policies, equity savings plans and/or ordinary securities accounts. For example, Predica and CAAR, subsidiaries of Crédit Agricole Assurances, offer unit-linked products in this category in multi-support life insurance and pension policies distributed through their partner networks.

The Group is one of the first major institutions to offer a flexible, risk-free, capital-guaranteed savings account that is accessible to all and comes with a strong and verifiable promise: every euro in this account finances an eligible project. In this regard, the *Livret Engagé Sociétaire* savings account, launched in October 2022 by the Regional Banks, enables the customer to invest in sustainable projects, particularly supporting the decarbonisation of the real estate portfolio (for example, new housing complying with RT2012 and RE2020 standards, and financing of eco-PTZ zero percent loans), and to be informed about the projects supported by it.

The *Trajectoires Patrimoine* application, which supports the Group's advisory approach, enables advisors to guide their customers towards solutions that can address their wealth-building and development issues (investments, real estate, insurance cover). The financial investment proposal made to the customer is constructed taking into account their knowledge and experience of financial instruments and the investment horizon, and the level of diversification and risk intensity desired for this investment. Since 2024, this proposal has also taken into account the customer's appetite for sustainable savings.

2.3.2.2 ACTION PLANS

2.3.2.2.1 ASSET MANAGEMENT

In line with the Group's Societal Project, Amundi has defined an ESG Ambitions 2025 plan which sets three targets:

- to increase the importance placed on its savings solutions in terms of responsible investment;
- to engage as many undertakings as possible in defining credible strategies for alignment to the Net Zero target;
- to ensure the alignment of its employees and shareholders to its new ambitions.

Amundi implements its ESG Ambitions 2025 plan through 10 commitments, including the integration of a binding management target in line with the Net Zero 2050 pathway into the actively managed open-end funds of the Net Zero Ambition range. Amundi also aims to continue expanding its ESG ETF offering. In 2025, 42% of the ETF product range consisted of ESG ETFs.

2.3.2.2.2 INVESTMENTS IN THE INSURANCE BUSINESS

In line with the Group's Societal Project, Crédit Agricole Assurances highlights its determination to be a major player in the energy transition through its commitments, by promoting the decarbonisation of the real economy in partnership with its customers:

- divestment from thermal coal: Crédit Agricole Assurances has committed to removing thermal coal from its investment portfolios by 2030 in order to meet climate change mitigation targets;

(1) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

- being a major investor in renewable energy:
 - as a leader in institutional investment, Crédit Agricole Assurances has committed to developing its investments in renewable energy and helped finance an installed capacity of 16 GW in 2025 on a wholly owned basis (for a target of 14 GW),
 - since 2013, Crédit Agricole Assurances has joined forces with various partners to invest in renewable energy installations;
- since September 2024, in line with the Net Zero Asset Owned Alliance (NZAOA) position paper on oil and gas, and its oil and gas sector policy, Crédit Agricole Assurances has committed to ceasing to invest in new oil and gas infrastructures, and to encourage players in the sector to set decarbonisation targets compatible with 1.5°C scenarios.

Crédit Agricole Transitions & Énergies has two funds providing it with the resources to initiate and source projects, with the ambition of achieving €1 billion to boost the renewable energy sector thanks to the Group's expertise. This new investment capacity, based on dedicated funds, contributes to strengthening developers' equity capital and the acquisition of production assets. Crédit Agricole Transitions & Énergies is targeting 2 GW of installed production capacity from assets held by the Group in 2028. At the end of 2025, the installed production capacity from assets held by the Group amounted to 372.7 MW. These funds supplement the local and regional funds of the Regional Banks.

To support the environmental transition, LCL also offers individuals the opportunity to save and invest in different asset classes, enabling them to take action to protect the environment. This is particularly true of the LCL Impact Climat range of investments, which has been available since 2020. In addition, LCL Compensation Carbone funds offer wealth management customers the opportunity to reduce the carbon footprint of their portfolio by at least 20% compared to their investment universe.

LCL Private Banking customers can also give meaning to their investments through LCL Better World, the first market allocation composed entirely of funds contributing to the United Nations Sustainable Development Goals within life insurance mandates.

Since 2024, LCL has been offering two green debt securities that allow for responsible saving: LCL Impact Ville Durable for Retail Banking and LCL Autocall City Transition for Private Banking and Wealth Management. These securities are intended exclusively to finance or refinance LCL's sustainable residential real estate projects.

2.3.3 INSURANCE

2.3.3.1 SUPPORTING CUSTOMERS

2.3.3.1.1 SUPPORTING THE CLIMATE TRANSITION OF ENTREPRENEURIAL CUSTOMERS, SMES, INDIVIDUALS AND CUSTOMERS IN THE AGRICULTURAL SECTOR

SUPPORTING THE AGRICULTURAL SECTOR IN THE FACE OF CLIMATE RISK

Crédit Agricole Assurances supports farmers in facing climate risks and offers insurance coverage for most standing crops (field crops, vegetables, vines, tree crops) against weather events that may affect them, such as drought, hail, floods, frost etc. By the end of 2025, Crédit Agricole Assurances will manage nearly 38,215 climate insurance policies (crop, grassland and hail insurance).

Premium reductions are implemented to encourage the use of protection systems, reducing the impact of weather events on crops. In addition, the subsidy advances offered by Crédit Agricole Assurances facilitate access to crop insurance.

Finally, Crédit Agricole Assurances continues to support the reform of crop insurance through research aimed at adapting the agricultural insurance offering and providing a dedicated response to farmers engaged in a transition process. This support has taken the form of:

- active participation in all working groups with stakeholders to ensure that this system provides a sustainable response to the challenges of protecting farmers against climate hazards;
- the implementation of an ambitious support system for advisers working with farmers to enable them to make informed choices about managing climate risks relating to their crops;
- the possibility of being designated as a contact person to manage claims estimates for the management of uninsured grasslands and uninsured crops belonging to customers, under the National Solidarity Fund for all farmers.

Since 2024, Crédit Agricole Assurances has also become the administrator of national solidarity compensation payments on behalf of the public authorities to 46,664 farmers.

ACTION PLANS FOR ENTREPRENEURIAL CUSTOMERS, SMES AND CUSTOMERS IN THE AGRICULTURAL SECTOR

Crédit Agricole Assurances has introduced property and casualty insurance coverage for renewable energy installations (solar panels, wind turbines, methanisation) within the multi-risk professional and agricultural policies sold by retail banks in France.

In the Corporates market, Crédit Agricole Assurances sells insurance policies covering photovoltaic panels, either through its multi-risk Corporate policies or its multi-risk SME policies.

As the second-largest insurer of farmers in France, Crédit Agricole Assurances has been committed since 2020 to supporting French agriculture in the development of renewable energy through its multi-risk agricultural insurance policies, which cover renewable energy installations (photovoltaic panels on roofs or in fields [solar trackers, solar shade structures]) and agricultural methanisation installations. Insurance for these installations is essential to secure renewable energy production and agricultural operations.

DEVELOPMENT OF RENEWABLE ENERGY

Crédit Agricole Assurances has introduced property and casualty coverage within its multi-risk home insurance policies to encourage the development of renewable energy installations.

The multi-risk home offering, launched in June 2024, covers photovoltaic and thermal solar panels, solar trackers declared at the time of subscription, domestic wind turbines less than 12 metres high. This contract also covers heat pumps and electric charging stations in order to contribute to energy transition in France.

ACTIONS TAKEN IN THE CONTEXT OF PROPERTY AND CASUALTY INSURANCE CLAIMS MANAGEMENT

In order to encourage its policyholders to adopt more virtuous behaviour, several actions have been implemented in the context of property and casualty insurance claims management:

- Car insurance: work carried out in France in 2024 to identify the areas with the highest GHG emissions in automotive claims management led to the publication of the white paper "Les émissions de CO₂ de la gestion des sinistres automobiles en France" (CO₂ emissions from automotive claims management in France). This work has made it possible to propose concrete ways of reducing GHG emissions linked to the handling of damaged vehicles, such as:
 - the decarbonisation of assistance and expertise services (vehicle fleet, route optimisation);

- the provision of replacement vehicles (assistance companies and garages);
- eco-friendly repair of damaged vehicles (paintwork, refurbished parts, low-carbon processes).
- Home insurance: Crédit Agricole Assurances has developed several partnerships to promote responsible replacement in the event of damage covered by home insurance, as part of its home appliance repair services. When products cannot be repaired, refurbished replacement products are offered.
- “Tous Mobiles” insurance: Crédit Agricole Assurances covers all mobile digital devices in the home against theft, accidental damage, fraudulent use of mobile phones and theft of accessories. As part of its claims management process, Crédit Agricole Assurances gives priority to repair or replacement with a refurbished device, and offers a compensation/repair process. If the device can be repaired at a cost lower than the replacement value, the repair will be carried out at a repair centre designated by Crédit Agricole Assurances (a partnership with two nationally approved centres has been established for this purpose).

2.3.3.1.2 SUPPORTING CUSTOMERS' ADAPTATION TO THE IMPACTS OF CLIMATE CHANGE

AVOIDANCE OF CLIMATE RISK

Short-term risk avoidance: weather alerts

Crédit Agricole Assurances supports its policyholders by warning them about weather events (storms, risk of flooding, hail etc.) and suggesting preventive actions to take in order to limit their impact.

Launched in 2020, roll-out of the weather alert service is continuing. 28 Regional Banks and LCL offer this additional free service to customers with car, home or Agri/Pro multi-risk insurance policies. In 2025, more than 2,865,551 alert text messages were sent (25% more than in 2024). These text messages alerted more than 776,486 customers in areas affected by adverse weather conditions, enabling them to seek safety and receive avoidance advice tailored to the weather event they were experiencing (strong winds and rain, thunderstorms, snow/frost, flooding, and heatwaves for people over the age of 70).

Medium- and long-term climate risk avoidance

Since June 2024, Crédit Agricole Assurances has implemented a personalised flood risk avoidance plan: customers automatically receive avoidance information sheets based on the risks identified in their policy applications.

At the same time, Crédit Agricole Assurances is participating, alongside the main property and casualty insurers in France, in the remediation component of the “Drought Initiative”: a five-year project launched in September 2023 by France Assureurs, Caisse Centrale de Réassurance and Mission Risques Naturels, which aims to protect single-family homes from drought. This initiative is testing different methods of repairing damage caused by clay shrinkage and swelling in real-life conditions.

In addition, Crédit Agricole Nord de France and Crédit Agricole Assurances jointly led a test in 2025 on the implementation of an adaptation approach for their customers in order to reduce the vulnerability of their homes to flood risk. The main aim of the test, which took place in several municipalities, was to assist customers of the Regional Bank exposed to flood risk in initiating a vulnerability assessment and then carrying out adaptation work where necessary, by:

- raising their awareness of flood risk;
- informing them about the subsidy schemes they may be eligible for;
- putting them in touch with government departments for a flood assessment (which is then carried out by a partner assessor involved in the test);
- offering them two specific financing options; and
- providing them with an explanatory guide on the adaptation process, possible works, subsidy schemes and financing options.

Crédit Agricole Assurances is launching a new vegetation fire risk avoidance initiative. To do this, Crédit Agricole Assurances has partnered with Kayrros, an undertaking specialising in satellite data analysis and artificial intelligence, to develop a vegetation fire avoidance solution. The solution chosen is a platform that assesses a region's exposure to vegetation fire risks and supports customers by raising their awareness of the right avoidance measures to take to reduce the spread of fires at the junction between homes and forests, in particular the obligation to clear brush.

Following a pilot programme launched by Crédit Agricole d'Aquitaine and Kayrros in 2022, the system was rolled out nationwide. The platform is now available to all Regional Banks.

2.3.4 OPERATING FOOTPRINT

Aware of the impact of its own operations on the environment, Crédit Agricole Group remains committed to using less carbon-intensive electricity, with the aim of achieving 100% renewable electricity by 2030 at all sites worldwide, and is continuing its actions to reduce energy consumption to embed these new behaviours over time. In 2025, the level was 90% for Crédit Agricole S.A.

These actions focus on four main categories:

- the operation of buildings through actions related to efficiency (temperature controls in winter and summer, contract with a bonus/malus scheme for energy savings, inter-company building use competition – CUBE), energy efficiency (change of fuel) and renovation (costing of the work required to achieve the established targets, allowing the roll-out of various optimisation scenarios for the Île-de-France campuses). These actions help to reduce greenhouse gas emissions linked to the energy consumption of buildings. Furthermore, in France, the Crédit Agricole Group has an EDF electricity contract with a guarantee of origin;
- responsible IT through the operation of data centres (constant improvement of the data centre's energy optimisation; indirect free-cooling) and reducing the carbon footprint of the Crédit Agricole information system (environmental compatibility IS, GreenPact) to manage the low-carbon transformation of the Group's IT system. This is achieved by combining reduced-consumption and eco-efficiency approaches, the promotion of eco-design best practices and an IT equipment end-of-life management procedure. These actions help to reduce emissions linked to the energy consumed by IT facilities;
- travel for business trips (increased use of remote working and meetings; Travel policy limiting the use of air travel to journeys that would take more than four hours by train) and vehicle fleet (electrification of the fleet of company and service vehicles; charging units for employees; eco-driving training). These actions help to reduce emissions linked to the use of company vehicles and those generated by employees when travelling for business;
- the actions taken to decarbonise procurement are detailed in part 4.2.5.5 “Taking action for the transition to a low-carbon economy”.

2.3.5 VOLUNTARY CONTRIBUTION TO CARBON NEUTRALITY

During the transition to the Net Zero target and simultaneously with its efforts to reduce emissions as part of its decarbonisation strategy, Crédit Agricole Group made commitments to contribute to global carbon neutrality. It has adopted a policy of voluntarily contributing part of its emissions by financing environmental projects that promote the reduction of greenhouse gas emissions into the atmosphere or their sequestration. The use of carbon credits is a last resort, once all options for reducing direct and indirect emissions have been fully exhausted.

Since they were launched in 2011, the Crédit Agricole Group has invested more than €12 million in the Livelihoods Carbon Funds, which finance projects that help fight climate change, restore natural ecosystems and improve the living conditions of rural communities. The Livelihoods Funds finance projects for reforestation and restoration of degraded ecosystems, agroforestry, regenerative agriculture, and small-scale rural energy (improved stoves) in Africa, Asia, Latin America and, since 2021, in France (*Sols de Bretagne* project). In 2017, Crédit Agricole Group committed to contributing to global carbon neutrality for the direct carbon footprint of Crédit Agricole S.A. and its subsidiaries (within Scopes 1, 2 and 3, business travel only) by 2040, through the Livelihoods Carbon Funds in which Crédit Agricole S.A. and Crédit Agricole CIB have invested (Livelihoods Carbon Fund 1 & 2).

Each year, the emissions of Crédit Agricole S.A. and its subsidiaries are counted to calculate the amount of the contribution needed. Crédit Agricole Group then cancels VCU (Verified Carbon Units) certificates up to this residual footprint. These certificates are financed by the investments of Crédit Agricole CIB and Crédit Agricole S.A. in the Livelihoods Carbon Fund SICAV-SIF (LCF).

A Livelihoods Investment Committee, composed of representatives of each partner investor, meets quarterly and participates directly and actively in the activities of the fund. Its main role is to study the proposals for projects and to make decisions in this regard. The Livelihoods carbon projects are measured and audited by independent organisations to provide partner investors with carbon credits that meet the highest international standards (Gold Standard & Verra). The credits issued by Livelihoods are based on the calculation of carbon emissions already sequestered or reduced. They are not calculated on the basis of future carbon sequestration or reduction estimates. Each year, companies receive carbon credits from projects in which they have invested, up to the amount of their investment in the funds.

In addition, certain Group entities have purchased carbon credits with Carbioz (mentioned above in part 2.3 “Actions and resources in relation to climate change policies”), thereby financing decarbonisation projects carried out by French farms that have been awarded the Low Carbon Label certification.

To date, Crédit Agricole S.A. is able to disclose information on the quality and credibility of carbon credits cancelled during the year only for the Verra, Gold Standard and low carbon Label quality standards.

This year, Crédit Agricole Group voluntarily contributed 166,912 tonnes of CO₂e of carbon credits to global carbon neutrality.

2.3.6 RISK MANAGEMENT SYSTEM

Crédit Agricole Group has implemented a comprehensive risk governance and management system. Further information on this system is available in part 1.4.1 “Description of the process to identify and assess material impacts, risks and opportunities” of this sustainability report.

The aim of Crédit Agricole Group’s environmental risk management system is to take into account the interactions between natural systems (atmosphere, hydrosphere, geosphere and biosphere) and human activities that are transmitted to banking risks, both through physical climate risk factors (hazards generated or influenced by climate change, such as floods and droughts), transition climate risk factors (impacts of economic, technological and regulatory actions to reduce GHG emissions) and other environmental risk factors. It is worth noting that the “environmental risk” analyses defined in this section do not cover the “Nature” ESRS topics (E2 “Pollution”, E3 “Water and marine resources”, E4 “Biodiversity and ecosystems” and E5 “Resource use and circular economy”).

The different environmental risk factors, which may arise over different time horizons with varying intensity and frequency, are treated differently within the overall risk management framework, with a priority approach for climate change factors, see part 1.4.1 “Description of the process to identify and assess material impacts, risks and opportunities” in this sustainability report.

CRÉDIT AGRICOLE GROUP RESILIENCE ANALYSIS

The analysis of the resilience of the Group’s strategy and business model is conducted in the form of climate stress tests.

The Crédit Agricole Group integrates climate risks into its stress testing system:

Budgetary stress test: since 2024, climate considerations have been incorporated into the annual budgetary stress test scenario, which contributes to capital requirements planning and enables the Group’s profitability to be estimated over a three-year horizon.

A central macroeconomic scenario determines the reference economic and financial assumptions over three years. It is based on the quarterly scenario developed by the Group Economic Research department (ECO) in collaboration with Group experts. It is proposed by ECO and submitted to Executive Management for approval to ensure that it reflects the Group’s views on macroeconomic and financial developments over a three-year period. In parallel with this central scenario, an internal stress scenario is defined, taking into account all Crédit Agricole Group’s significant risks, including climate risks that arise from its business model and operating environment, in a context characterised by tense macroeconomic and financial conditions.

The aim of the stress scenario is therefore to measure the impact of a global shock on the Group’s central solvency trajectory over a three-year period and thus identify the most sensitive portfolios in adverse conditions.

Dedicated climate stress tests: Since 2024, the internal stress test framework has provided for a climate stress test to be carried out every two years on credit risk and market risk, with targets, characteristics, horizons and scenarios adapted to changes in risks and the context. These climate stress tests cover material financial risks within the meaning of double materiality, i.e. physical risk and transition risk related to climate change.

The 2024 exercise covered the Crédit Agricole Group's scope with a medium-term horizon (2030), consistent with the Fit-for-55 scenario analysis exercise conducted by the ECB in 2024. Following on from the climate risk materiality analysis carried out in the first half of 2024, the following scenarios were selected:

- Net Zero 2050 (Orderly), in which global efforts will lead to net zero greenhouse gas emissions by 2050 (warming limited to 1.5 degrees Celsius by 2100);
- current policies (Hot House World), corresponding to the continuation of current policy pathways (global temperature rise of approximately +3 degrees Celsius by 2100).

Assumptions for projections of sector-specific economic variables were determined by the ECO service, and a panel of experts projected the evolution of the Group's balance sheet, known as the dynamic balance sheet, in line with these scenarios. This evolution also incorporates the Group's climate strategy, which aims to ramp up the development of renewable energy and the divestment from fossil fuels.

This stress test made it possible to observe the impact of shocks on the cost of risk, risk-weighted assets (RWA) and net interest margin (NIM). It revealed that the impact of climate risks on the Group's profitability and solvency is low. In fact, the results for the financial year are absorbable and consistent with the budget set for 2025.

To address significant risks and seize opportunities, policies and action plans have been put in place, as mentioned in part 2.3 "Actions and resources in relation to climate change policies" on strategic plans and actions to manage impacts, risks and opportunities. These plans are regularly adjusted in line with market trends, stakeholder expectations and new regulations, ensuring resilience in the short-, medium- and long-term.

RISK MANAGEMENT SYSTEM

The risk management system described in part 1.4.1 "Description of the processes for identifying and assessing material impacts, risks and opportunities" in this sustainability report enables the risk component to be integrated into all of the undertaking's decision-making processes, involving company players at various levels. ESG risks are gradually being integrated into this framework and into the committee structure defined by the Group's Risk Management department.

With regard to environmental risks, Crédit Agricole Group has taken measures to strengthen its risk management framework, in particular through:

- materiality analyses of environmental risk factors in different geographical areas (France, United States), business sectors (Agriculture, Residential Real Estate) and themes (Nature). These analyses are supplemented by the definition of an action plan aimed at improving or supplementing the methodological framework for these analyses;
- assessment of the impact of environmental risks on economic capital adequacy and the development of methods to take into account climate and environmental risks, where relevant;
- finally, integration of these risks into the permanent control system with a common reference framework covering risks inherent to the ESG theme, and which will be added to gradually.

In addition, the Crédit Agricole Group integrates these risks into its credit approval processes, in particular by:

- integration of environmental risks into lending decision-making processes developed in the large corporates ⁽¹⁾ portfolio via an ESG score on counterparties;
- roll-out of ESG questionnaires in retail banking in France and Italy;
- managing portfolios across all customer segments by identifying the business sectors and geographic areas most sensitive to the geo-sector matrix prepared by the Group;

- adjustment of escalation processes for sensitive projects/transactions;
- establishment of quarterly analyses on the identification of environmental factors in credit alerts;
- conducting materiality analyses across different geographical areas (France, United States), business sectors (Agriculture, Residential Real Estate) and themes (Nature).

ESG criteria are integrated into the credit granting process, as described in part 1.4.1.2 "Description of the processes to identify and assess material impacts, risks and opportunities related to climate change" of this sustainability report.

Within the Group, business continuity is part of the operational risk management system and is a fundamental component of the internal control system. It is based in particular on risk mapping (RCSA) to plan and prioritise actions according to risk. Similarly, business continuity is based on an internal procedural note setting out the risk management system for the continuity and recovery of Crédit Agricole Group activities.

Within this framework, each Group entity draws up a Business Continuity Plan (BCP) aimed at maintaining at least the essential activities serving customers and partners in the event of a disaster, possibly in a degraded and temporary manner, and then gradually restoring all activities.

The Group's method for implementing continuity and recovery processes is extensively documented. It includes:

- methodological guides for developing BCPs;
- Information System security policies for IT crisis scenarios;
- the Group's general crisis management policy; and
- operational kits for Business Continuity Plan Managers and IT Contingency Plan Managers, specifying their respective roles.

In addition, BCPs are regularly updated and tested to ensure their effectiveness in real crisis situations. Crédit Agricole Group entities must roll out these plans within their local subsidiaries or branches, adapting them as necessary to local legal and regulatory requirements.

In addition, the Group has defined five mandatory crisis scenarios for which all entities must be prepared. These scenarios take into account climate risk factors such as floods, high winds and heat waves. This illustrates the Group's commitment to limiting operational losses and strengthening its resilience to external environmental threats.

This comprehensive approach is an essential pillar of the Group's BCP, designed to ensure business continuity.

In terms of reputation risk and the risk of disputes related to environmental risks, the Group incorporates an "ESG" component into its processes for new products and services, and has in place a crisis communication management system. It has also developed a management framework for reputational risks including on ESG aspects (incorporating climate aspects).

In the case of market and liquidity risk, the materiality analyses conclude that there is a low impact of environmental risk factors in these two risk categories, all time horizons included. A process of periodic review of the materiality of environmental factors on these risks is defined to detect the evolution of risks and adapt risk management accordingly.

Finally, Crédit Agricole Group has introduced an internal climate stress test system and conducted the first internal exercise at the end of 2024. At the same time, work is under way to adapt the models to improve the approach to taking environmental factors into account.

(1) Customers of the Group's CIB activities.

2.4. PERFORMANCE TARGETS AND MEASURES

In order to meet the targets set out in its climate change policies and contribute to achieving carbon neutrality by 2050, the Crédit Agricole Group has set targets for reducing GHG emissions. These targets address material sustainability matters on its operating footprint and for each of its major businesses: financing ⁽¹⁾, investment of the insurance business (euro funds and own funds) and asset management (Net Zero range). The scopes selected for the double materiality analysis, the GHG emissions inventory and the definition of targets are broadly consistent, without strictly coinciding. These scopes are explained in order to ensure the transparency and consistency of the information published.

2.4.1 CLIMATE CHANGE MITIGATION TARGETS

2.4.1.1 FINANCING TARGETS

Through its work in connection with its membership of the NZBA ⁽²⁾, Crédit Agricole Group has introduced a methodology which combines a bottom-up and progressive approach. This consists of working together to build a common methodology based on science and on market standards which is shared between the different entities without geographical distinction. Work is then carried out on these contributions individually within each of the entities, to take into account any business line specificities, local and regional considerations and finally to capitalise on each area of expertise. Once the contributions by entity have been finalised, consolidation at Group level enables presentation of unified sector-specific decarbonisation pathways for the Crédit Agricole Group as a whole. Despite recent developments in the NZBA, Crédit Agricole has reaffirmed its Net Zero commitments ⁽³⁾ and reinforced its climate strategy in Crédit Agricole S.A.'s 2026-2028 Medium-Term Plan.

2.4.1.1.1 DEFINITION OF TARGETS

GHG emission reduction targets are based on scientific methodologies and data. These emissions are specific to each sector, which is why one or more indicators are or will be defined for each one. Crédit Agricole's approach and methodology are summarised below.

The GHG emission reduction targets are:

- **based on scientific data:** to align its portfolios with the target of limiting global warming to 1.5°C in accordance with the Paris Agreement, the Crédit Agricole Group has considered the International Energy Agency's (IEA) Net Zero Emissions by 2050 scenario (NZE scenario) to determine its sector-specific decarbonisation pathways and has been supported by its Scientific Committee. This scenario has been replaced in certain sectors by specific recognised scenarios that are applicable to them;
- **specific to each sector:** each sector has a role to play in the energy transition to a low-carbon world, with its own specificities and its own levers of action. GHG emission reduction targets have therefore been defined on a sector-by-sector basis;
- **useful in each business line's decision-making process:** for each sector, one or more metrics have been defined to assess companies' performance and progress towards decarbonisation. These indicators are tracked and monitored so as to engage customers in ongoing dialogue and to make informed financing decisions;
- **based on the best data available to date:** determining the starting point of emissions by sector requires collecting and refining multiple sources of data. The quantity and quality of available data can have a considerable impact on these baseline figures. Given the gaps that currently exist in the available data, the Group plans to update its methodologies as the data improves and as this information becomes available.

2.4.1.1.2 ESTABLISHMENT OF STAGES

The approach is based on five major stages in which Crédit Agricole Group has opted for key methodological choices:

⁽¹⁾ For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

⁽²⁾ In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

⁽³⁾ Decarbonisation pathways defined for 2030 in eight sectors (Oil & Gas, Power Production, Automotive, Commercial Real Estate, Cement, Aviation, Shipping and Steel) and ambitions set out in two sectors (Residential Real Estate and Agriculture).

2.4.1.1.3 MATERIALITY ANALYSIS AND PRIORITISATION OF SECTORS

TEN PRIORITY SECTORS ⁽¹⁾

In 2022, and as a first step, Crédit Agricole Group committed to GHG emission reduction targets in five sectors: Oil & Gas, Power Production, Automotive, Commercial Real Estate and Cement. Then, in 2023, the Group extended its actions to five other key sectors of the economy: Residential Real Estate, Aviation, Steel, Agriculture and Shipping.

When choosing the 10 priority sectors, the Group took into account a variety of factors:

- their contribution to global greenhouse gas emissions;
- Crédit Agricole's exposure to these sectors;
- the existence of recognised sector-specific decarbonisation pathways based on scientific data for these sectors;
- their inclusion in the list of sectors prioritised by the Science Based Targets Initiative (SBTi) and NZBA ⁽²⁾;
- the feasibility of calculating the baseline and defining pathways during this first phase of work.

2.4.1.1.4 CALCULATION OF THE BASELINE OF FINANCED EMISSIONS BY SECTOR

SCOPE OF OUTSTANDINGS CONSIDERED

To set achievable targets, the Group first estimated the baseline of financed emissions for each sector taken into consideration. The establishment of these baselines required several methodological questions to be addressed. The Group thus determined the scope of assets included to measure its exposure to its customers. To date, a certain number of considerations have resulted in all medium and long-term (>1 year) lending to corporates and individuals being taken into account ⁽³⁾:

- medium and long-term loans correspond to the real financing activities of each sector;
- short-term lending, which is more volatile with more complex management procedures, often represents operational, treasury or consumer finance debt;
- more than 90% of Crédit Agricole Group loans granted to corporates are medium or long-term;
- Crédit Agricole's decarbonisation levers are lower in the short-term: the commitment of its customers and financing of the transition require implementation in the long term.

PCAF METHODOLOGY

To calculate the baselines of the Net Zero pathways ⁽⁴⁾, the Group used the financed emissions calculation methodology developed by PCAF, which stands for Partnership for Carbon Accounting Financials (a global initiative to measure and disclose financed greenhouse gas emissions, which the Group joined in 2022). This methodology is recognised by the GHG Protocol, which is the benchmark for carbon accounting standards. PCAF attributes customer emissions to the institutions that finance them according to the following formula:

Financed emissions: (Group exposure/Value of the enterprise or of the asset financed) x Emissions of the customer or of the asset.

To attribute financed emissions to banking institutions, the PCAF methodology only takes into account the funds used (funds actually debited from the credit available to the customer). However, the Group considers that the funds committed (total lending made available to the customer by Crédit Agricole Group) reflect the Group's commitment towards its customers more precisely and provide for a more stable measurement ⁽⁵⁾.

For each calculation of financed emissions, PCAF introduces a quality score for the data of between 1 and 5. A score of 1, which is the highest score, means that the data used is from the actual data of the financed customer and that the calculation of emissions for this customer has been verified by a third party. A score of 5, which is the lowest score, means that the data used is from sector and/or regional data, held on the basis of averages (proxies).

2020 AS THE BASELINE YEAR

Finally, the Group chose 2020 as the baseline year and 2030 as the interim target year. This choice of 2020 as the baseline is in line with SBTi and NZBA ⁽⁶⁾ requirements, which recommend that it is no more than two years before the year of publication of the GHG emission reduction targets. This decision was also driven by the fact that Covid-19 had no significant impact on financing in 2020. An exception was made for the Aviation sector, for which 2019 was chosen as the baseline year in order to neutralise the effect of Covid-19, meet NZBA requirements and align with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

2.4.1.1.5 SELECTION OF METRICS (PHYSICAL INTENSITY VERSUS AND ABSOLUTE) AND OF THE SCENARIO

HOW CAN EMISSIONS REDUCTIONS BE QUANTIFIED?

One of the key decisions when defining a climate strategy consists of selecting the unit of measurement for emissions. It can either be a reduction target in absolute value of emissions, or a reduction target in intensity of emissions, according to sector-specific issues:

- for a target in absolute value, a fixed greenhouse gas emission reduction target is set, for example, to reduce emissions by 75% by 2030 compared to the 2020 baseline;
- for a target in carbon intensity, a target rate of greenhouse gas emissions is set in relation to a specific flow of activity, for example kilograms of CO₂ released per megawatt/hour (MWh).

THE ADVANTAGES OF EMISSION INTENSITY

The Group considers that opting to measure the physical intensity of emissions is the most appropriate measurement. It has the advantage of encouraging sectors to transition towards players, projects and technologies with lower emissions. While a target in absolute value could result in withdrawal from certain customers, an intensity target enables the Group to support its customers towards the climate transition. For example, in the Power Production sector, an intensity target allows for financing to be steered towards renewable energy.

This choice to set a target in physical intensity was validated by Crédit Agricole's Scientific Committee. Where applicable, it may be reviewed according to regulatory injunctions or market standards.

(1) For residential real estate and agriculture, the Group has committed to an obligation of means rather than results.

(2) In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

(3) Note that for the oil & gas and shipping sectors only medium- and long-term loans are recognised on the balance sheet.

(4) For more information, see part 2.4 "Targets and performance measures", "Net Zero pathways alignment metrics" section, "Net Zero pathways" table.

(5) With the exception of the Oil & Gas and Shipping sectors.

(6) In October 2025, the coalition was impacted by a strategic change, the details of which will be finalised within six months to a year.

AN EXCEPTION: THE OIL AND GAS SECTOR

One exception to this is the Oil and Gas sector for which an absolute reduction is deemed necessary to contribute to the achievement of the net zero emission targets: the main lever for decarbonising a barrel of oil is not to extract it.

CHOOSING A REFERENCE SCENARIO

To contribute to achieving the target of net zero emissions by 2050, the Group is following emission reduction pathways consistent with external “credible” scenarios ⁽¹⁾. For most sectors, it has considered the IEA’s Net Zero Emissions by 2050 scenario, published in May 2021 and updated in September 2023, to determine its sector-specific decarbonisation pathways. This “Net Zero” roadmap was defined to meet the Paris Agreement’s target of limiting the global temperature rise to 1.5°C by 2100 compared to pre-industrial levels. For the Aviation, Shipping, Steel, Commercial Real Estate and Residential Real Estate sectors, the Group has replaced this scenario with specific recognised scenarios that are applicable. For example, for commercial and residential real estate, the Group has replaced this scenario with the Carbon Risk Real Estate Monitor (CRREM) v2021 scenario, which has an equivalent carbon budget, in order to take into account certain sectoral specificities and rely on a better geographical and/or sectoral granularity.

The decarbonisation targets published by the Crédit Agricole Group for the Oil & Gas, Power Production, Automotive, Aviation, Shipping, Cement ⁽²⁾ and Steel ⁽³⁾ sectors are defined in line with the baseline scenarios used. This approach ensures methodological consistency between the Group’s pathways and those of the scientific scenarios used. For the commercial real estate sector, the decarbonisation target is based on convergence with the emission levels projected in the CRREM v2021 scenario.

2.4.1.1.6 DEFINITION OF INTERIM TARGETS

Based on the metrics and scenarios used, for each sector the Group set an interim target by 2030 and determined the appropriate pathway towards this target. It was then implemented through specific action plans for the business lines concerned. To achieve this, Crédit Agricole S.A.’s Net Zero teams work together on a regular basis with the subsidiaries and entities. For each sector, one or more indicators have been or will be defined to capture the performance and progress of enterprises towards decarbonisation.

These indicators are tracked and monitored at Group level (operational teams and decision-making bodies) so as to engage customers in ongoing dialogue and to make informed financing decisions. The sector-specific decarbonisation pathways are therefore fully integrated into the business thinking of the business lines. In total, more than 900 people are involved in the implementation and monitoring of action plans.

It should be noted that in line with the ESG Pillar 3 regulatory framework, every six months the Group shall disclose emissions according to the format required by the regulator, including Scopes 1, 2 and 3.

2.4.1.1.7 CONTINUOUS IMPROVEMENT OF DATA AND UPDATING OF SCENARIOS, TARGETS AND PLANS

The emission scenarios, such as those of the IEA, are generally updated annually to reflect relevant changes in terms of energy and emissions. These updates can result in adjustments to the pathways, which may make it necessary to update the GHG emission reduction targets. At the same time, new data may become available, allowing for an improvement in the measurement of greenhouse gas emissions. As a result, a key stage in this methodology consists of regularly reassessing the input data and key hypotheses, to assess whether a recalibration of the targets is necessary.

2.4.1.1.8 APPLICATION IN THE SECTORS

Presented below is detailed information for each of the sectors prioritised, of the metric used, the 2020 ⁽⁴⁾ baseline and the 2030 interim reduction target. The values are based on available data and projections of scenarios at December 2023. Future updates of the scenarios used or other data (for example, to reflect changes, technologies available or economic conditions) may result in changes to the pathway required to contribute to achievement of the 1.5°C target, and therefore to the Group’s targets for these sectors. An improvement in the availability and quality of data may also have an impact on the 2020 baseline in certain sectors. The Group will pay particular attention to the evolution of these parameters and will assess the relevance of recalibrating its baselines and GHG emission reduction targets. In addition, in this initial stage it prioritises the calculation of the emissions it finances based on its granting of long- and medium-term lending. This scope is subject to change.

The Group is committed to annually disclosing its emissions, in intensity or in absolute value, concerning the sectors in which it is involved, in addition to any major changes to the methodologies.

OIL & GAS

- Entity concerned: Crédit Agricole CIB;
- scope: Scopes 1 and 2 for all actors in the value chain (Exploration & Production, refining, transport, distribution, service, trading), Scopes 1, 2, 3 for Extraction & Production players;
- Metric: absolute amount of greenhouse gas emissions linked to the financing of customers involved in oil and gas-related activities;
- 2020 baseline: 24.3 MtCO₂eq financed (on the basis of financing in the balance sheet);
- Reduction target for 2030: -75% ⁽⁵⁾ in the balance sheet;
- 2030 target: 6.1 MtCO₂eq;
- Reference scenario: IEA’s NZE scenario (2021);
- Reference scenario reduction target: -29%.

(1) It should be noted that for the scenarios for the eight sectors (Oil & Gas, Power Production, Commercial Real Estate, Automotive, Aviation, Shipping, Cement and Steel), the baseline used by the Crédit Agricole Group is not identical to that of the reference scenario.

(2) For the cement sector, the IEA scenario projections are for Scope 1 emissions, not Scopes 1 and 2, which means they cannot be compared with the Group’s commitment.

(3) For the steel sector, the Group has chosen to align itself with the scope of the Sustainable Steel Principles, which is broader than that taken into account in the NZE pathway.

(4) For the Aviation sector, the reference year 2019 was chosen to neutralise the impact of the COVID-19 crisis. This choice meets the NZBA requirements, which recommend that it be no more than two years before the year of publication of GHG emission reduction targets, and is in line with Crédit Agricole S.A.’s 2019-2022 Medium-Term Plan.

(5) Twice as fast as the reduction in the IEA’s NZE scenario.

POWER PRODUCTION

- Entities concerned: Crédit Agricole CIB, Crédit Agricole Leasing & Factoring (in partnership with Crédit Agricole Transitions & Énergies (Transitions & Énergies), the Regional Banks and LCL);
- Scope: Scope 1;
- Metric: amount in intensity (gCO₂e/kWh) of greenhouse gas emissions related to financing of customers involved in power generation;
- 2020 baseline: 224 gCO₂e/kWh;
- Reduction target for 2030: 58%;
- 2030 target: 95 gCO₂e/kWh;
- reference scenario: IEA's NZE scenario (2021) ⁽¹⁾;
- Reference scenario reduction target: 68% ⁽²⁾.

COMMERCIAL REAL ESTATE

- Entities concerned: Crédit Agricole CIB, LCL, Crédit Agricole Leasing & Factoring, Crédit Agricole Italia, the Regional Banks;
- Scope: Scopes 1 and 2 (building use);
- Metric: amount in intensity (kgCO₂e/m²/year) of greenhouse gas emissions related to financing of buildings for SMEs and Corporates;
- 2020 baseline: 36.4 kgCO₂e/m²/year ⁽³⁾;
- Reduction target for 2030: 40%;
- 2030 target: 22 kgCO₂e/m²/yr;
- Reference scenario: CRREM scenario – Global, Decarbonisation Pathways 2021;
- Reference scenario reduction target: convergence with CRREM v2021.

AUTOMOTIVE

- Entities concerned: Crédit Agricole CIB, Crédit Agricole Personal Finance & Mobility, Crédit Agricole Leasing & Factoring;
- Scope: Scope 3 of car makers and Scope 1 of users;
- metric: amount in intensity (gCO₂/km) of greenhouse gas emissions linked to financing car makers and light vehicles only (personal loans, leasing ⁽⁴⁾, securitisation);
- 2020 baseline: 190 gCO₂/km;
- Reduction target for 2030: 50%;
- 2030 target: 95 gCO₂/km;
- Reference scenario: IEA's NZE scenario (2021);
- Reference scenario reduction target: -46%.

SHIPPING

- Entity concerned: Crédit Agricole CIB;
- scope: Scope 1 well-to-wake (including upstream emissions linked to fuel production) for cargo shipping;
- Metric: amount in carbon intensity (gCO₂e/dwt.nm) of greenhouse gas emissions linked to financing ships;
- 2020 baseline: 6.22 gCO₂e/dwt.nm per maximum tonnage transportable per nautical mile (dwt.nm ⁽⁵⁾, taking into account emissions linked to the production of fuel (Well-to-Wake (WTW) approach);
- Reduction target for 2030: -36% intensity of shipping compared to 2020;
- 2030 target: 3.98 gCO₂e/dwt.nm;
- Reference scenario: NZBA shipping scenario (1.5°C Initiative for Shipping ⁽⁶⁾ and DNV Maritime Advisory);
- Reference scenario reduction target: between -36% and -49%.

AVIATION

- Entity concerned: Crédit Agricole CIB;
- scope: Scopes 1 and 3 well-to-wake emissions (including emissions from fuel combustion and upstream emissions linked to kerosene production);
- metric: amount in intensity (gCO₂e/RTK ⁽⁷⁾) of greenhouse gas emissions linked to the financing of airlines and aircraft lessors;
- 2019 baseline ⁽⁸⁾: 1,003 gCO₂e/RTK;
- Reduction target for 2030: 25%;
- 2030 target: 750 gCO₂e/RTK;
- Reference scenario: "prudent scenario" of the Mission Possible, Partnership (MPP) industrial coalition aligned to a 1.5°C pathway (NZBA) ⁽⁹⁾;
- Reference scenario reduction target: -21%.

CEMENT

- Entity concerned: Crédit Agricole CIB;
- Scope: Scopes 1 and 2, in gross emissions (taking into account emissions linked to the combustion of alternative fuels);
- Metric: amount in intensity (kgCO₂e/t) of greenhouse gas emissions linked to the financing of cement-producing customers;
- 2020 baseline: 671 kgCO₂e/t ⁽¹⁰⁾;
- Reduction target for 2030: 20%;
- 2030 target: 537 kgCO₂e/t;
- Reference scenario: IEA's NZE scenario (2021);
- Reference scenario reduction target ⁽¹¹⁾: -22%.

(1) The IEA's NZ scenario has since been reviewed upwards twice with milestones of 165 gCO₂e/kWh in 2022 and 186 gCO₂e/kWh in 2023. The IEA's scenario takes into account the economic and physical realities. The Group will engage in discussions on its capacity to maintain a pathway aligned to the IEA's initial NZ scenario from 2021 and on the need to adjust its pathway to the latest recommendations.

(2) The starting point for the IEA's reference scenario is higher than that of the Crédit Agricole Group.

(3) Following the announcement of the pathway in 2022, the baseline was lowered from 46 to 36.4 kgCO₂e/m²/year due to the integration into the scope of the Regional Banks' portfolios, which are structurally lower in carbon and, more on the periphery, of work to improve the quality of the data, which led to an adjustment to the baselines of Crédit Agricole S.A. entities. Carbon intensity reduction target kept at 40% by 2030 (compared to 2020) i.e. a 2030 target of 22 kgCO₂e/m²/year (compared to 27.7 previously). From 31 December 2025, the Crédit Agricole Group will take CRREM v2 data into account when calculating its financed emissions.

(4) For Crédit Agricole Personal Finance & Mobility, only "finance leases" are taken into account in the NZ scope.

(5) Dead Weight Tonnage by nautical mile. For now, the scope excludes passenger transport pending the IMO's approval and implementation of the correction factors for the carbon intensity indicator formula for passenger ships.

(6) A group of 10 banks involved in shipping financing activities formed the 1.5°C Initiative for Shipping and tasked DNV Maritime Advisory with creating "ambitious but realistic" upward pathways while meeting, based on the assumptions provided, a 1.5°C or slightly higher (<1.6°C) ambition.

(7) RTK = Revenue Tonne Kilometre.

(8) This choice meets the NZBA requirements, which recommend that it be no more than two years before the year of publication of GHG emission reduction targets, and is in line with Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

(9) Emissions reduction pathway – Model following a methodology similar to SBTi SDA (Sectoral Decarbonisation Approach).

(10) Physical production is in tonnes of cementitious material, which avoids double counting and defines a comparable intensity between producers, in line with the recommendations of the Global Cement and Concrete Association (GCCA).

(11) The IEA scenario projections are for Scope 1 emissions, not Scopes 1 and 2, which means they cannot be compared with the Group's commitment.

STEEL

- Entities concerned: Crédit Agricole CIB;
- Scope: Scopes 1 and 2 of integrated steel-producing customers + part of Scope 3 of non-integrated steel-producing customers (system of set limits defined by the Sustainable Steel Principles);
- Metric: amount in intensity (tCO₂e/tonne of crude steel) of greenhouse gas emissions linked to the financing of steel-producing customers;
- 2020 baseline: 1.88 tCO₂e/t;
- Reduction target for 2030: 26%;
- 2030 target: 1.4 tCO₂e/t;
- Reference scenario: NZE SSP (Sustainable STEEL Principles) scenario, adapted from the IEA's NZE scenario;
- Reference scenario reduction target ⁽¹⁾: -23%.

The Crédit Agricole Group has made commitments to invest resources in the Residential Real Estate and Agriculture sectors:

RESIDENTIAL REAL ESTATE

The French target of 12.4 kgCO₂e/m²/yr ⁽²⁾ in 2030 represents a strong ambition, and Crédit Agricole Group made a commitment to means rather than results, without setting a target, and to support property owners through decarbonisation that will be based on the mobilisation of all stakeholders (owner, public policy, construction sector), while taking into account the heterogeneity of territories in terms of greenhouse gas emissions from housing.

AGRICULTURE

Crédit Agricole Group is committed to supporting the agricultural world in its efforts to reduce carbon emissions while strengthening food sovereignty, by supporting the roadmaps established by the industry and the sectors, and at *Ferme France* national level and at individual farm levels.

2.4.1.2 INVESTMENT TARGETS**INVESTMENTS IN THE INSURANCE BUSINESS**

As an investor, Crédit Agricole Assurances contributes to the reduction of greenhouse gas emissions worldwide by reducing the carbon footprint of its investment portfolios ⁽³⁾.

In 2025, Crédit Agricole Assurances has pursued the decarbonisation pathway for its portfolios and set itself a new commitment by 2029 on a broader scope: Crédit Agricole Assurances is committed to reducing the carbon footprint (in tonnes equivalent of CO₂ per million euros invested) of its listed equity and corporate bond investment and directly held property portfolio by 50% by the end of 2029 compared to the end of 2019 ⁽⁴⁾. As a result, the carbon footprint of this portfolio has decreased by 62% compared to 31 December 2019, from 88 tonnes of CO₂ per million euros invested to 33 tonnes of CO₂ per million euros invested at 31 December 2025.

These targets have been set as part of Crédit Agricole Assurances' involvement in the NZAOA.

In accordance with the NZAOA protocol, Crédit Agricole Assurances is working to broaden the scope of its carbon footprint reduction targets.

The NZAOA protocols contain science-based target carbon footprint reduction ranges for investment portfolios. To establish these reduction ranges, the NZAOA consulted extensively with various university institutions on the scenarios and conclusions of the IPCC's Special Report on Global Warming of 1.5°C and of the IPCC's Sixth Assessment Report (for 2025 and 2030 respectively). The NZAOA recognises that the IPCC reports provide a complete and balanced assessment of the status of scientific, technical and socio-economic knowledge on climate change, its impacts and future risks, in addition to options for reducing the pace at which climate change is occurring.

INVESTMENT FOR THIRD PARTIES

For its Net Zero product offering, Amundi uses the Net Zero Emissions by 2050 (NZE) scenario developed by the IEA as a basis to set decarbonisation targets. The carbon intensity reduction targets correspond to absolute reduction targets per unit of real growth between now and 2025 and 2030. The minimum reduction targets for the portfolios covered by Amundi's internal Net Zero methodology are assessed on a portfolio-by-portfolio basis and are as follows:

- in carbon intensity in relation to revenues on Scopes 1, 2 and direct upstream Scope 3, compared to a baseline at 31 December 2019 ⁽⁵⁾:
 - 30% reduction by 2025,
 - 60% reduction by 2030.

As of 31 December 2025, 100% of portfolios covered by the Net Zero range have achieved a 30% reduction in carbon intensity, based on a reference baseline as of 31 December 2019.

In addition, the Net Zero strategies apply a requirement of a minimum exposure to high climate impact sectors to encourage the transition in these key sectors. Finally, Amundi's Net Zero Ambition strategy portfolios must also comply with the requirement not to invest in undertakings or projects associated with a significant negative impact on the portfolio's stated target of mitigating climate change ⁽⁶⁾.

2.4.1.3 INSURANCE TARGETS

Apart from the targets relating to investments in the insurance business mentioned above, no targets have been set for the insurance business at this stage.

2.4.1.4 OPERATING FOOTPRINT TARGETS

To promote carbon neutrality by 2050, Crédit Agricole S.A. has based its operating footprint reduction targets on the goal of limiting global warming to 1.5°C by 2100. To do this, Crédit Agricole S.A. has followed the recommendations of the SBTi.

According to the SBTi recommendations, which are based on the 1.5°C scenarios listed by the IPCC, Scopes 1 and 2 emissions must follow a linear reduction pathway of -4.2% per year in absolute emissions, i.e. a target of -46.2% by 2030, based on the 2019 baseline. The reduction pathways established by Crédit Agricole for Scopes 1, 2 and 3.6 are more ambitious, with an expected reduction of -50% in GHG emissions between 2019 and 2030.

In 2025, Crédit Agricole S.A. reduced its GHG emissions by 69% for Scopes 1 and 2 and by 46% for Scope 3.6.

⁽¹⁾ For Cement and Steel, the NZE reference scenario is based on the sector's Scope 1 only.

⁽²⁾ Target defined by CRREM v2021 scenario.

⁽³⁾ Investment means assets held in respect of the euro funds of contracts with guaranteed capital and own funds of the insurance business.

⁽⁴⁾ The choice of 2019 as the baseline year is in line with the NZAOA's recommendations and Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

⁽⁵⁾ The choice of 2019 as the baseline year allows for compliance with the following NZAOA recommendation: "Members' sub-portfolio targets shall strive for science-based GHG reductions versus YE2019 as described above in the range of 22-32 percent by YE2024, and 40-60 percent by YE2029" NZAOA TSP4", and is part of Crédit Agricole S.A.'s 2019-2022 Medium-Term Plan.

⁽⁶⁾ The methodology can be applied to listed equities and to corporate bonds (sovereign bonds will potentially be included once the methodologies for this asset class have been stabilised). The analysis is cumulative over time, with the time horizons set at 2025 and 2030. The scopes taken into account by default are Scopes 1, 2, and 3 upstream (with a minimum of Scopes 1 and 2), and the methodology does not take negative emission technologies into account. The carbon reduction targets are based on the IEA's Net Zero 2050 scenario.

These targets are based on the following methodological principles:

- aligned with science: consistent with the reduction expected to be necessary to follow a 1.5°C scenario;
- established according to an absolute contraction approach: the absolute contraction approach imposes a linear reduction in absolute emissions for undertakings in the financial sector for Scopes 1 and 2;
- established over a broad scope: the selected scope covers 95% of current emissions for Scopes 1 and 2. All energy consumption and the vehicle fleet are included. A voluntary commitment has also been made to set targets for business travel; and
- broken down at entity level: the Group's reduction target is broken down into targets at subsidiary level, taking into account the degree of decarbonisation of their respective operating footprints.

Crédit Agricole S.A. has voluntarily undertaken to reduce by 50% part of its Scope 3.6 emissions, i.e. those linked to business travel, by 2030 compared to 2019. Since 2025, Crédit Agricole S.A. has chosen to manage these emissions in terms of Full-Time Equivalent (FTE) over the 2025-2030 period in order to take into account the organic and external growth of its subsidiaries.

In addition, Crédit Agricole S.A. remains committed to using less carbon-intensive electricity, with the aim of achieving 100% renewable electricity consumption by 2030 at all its French and international sites.

LCL has reduced fuel oil consumption in its buildings by replacing 86% of fuel oil boilers and aims to phase them out completely by 2026.

The Group Purchasing department has set a target for the Crédit Agricole S.A. scope, based on the SBTi requirements specific to financial institutions for categories 1-14 of Scope 3 (non-financial footprint). Crédit Agricole S.A. is committed to making 40% of its external expenditure with suppliers who have adopted science-based reduction targets by 2027. The target of 40% was achieved in 2025.

All of the metrics monitored at the Crédit Agricole S.A. level on the operating footprint and included in the Group's reports are in line with the frameworks set by the GRI G4 and GHG Protocol frameworks.

2.4.1.5 GHG EMISSION REDUCTION KEY METRICS AND ALIGNMENT WITH NET ZERO PATHWAYS

NET ZERO PATHWAYS

	Metric	2020 baseline	2025	2024	2030 target	Entity(/ies) concerned
Oil & Gas	MtCO ₂ e	24.3	4.5	7.2	6.1	CACIB
	%		-81%	-70%	-75%	
Power production	gCO ₂ e/kWh	224	125	160	95	CACIB, CAL&F
	%		-44%	-29%	-58%	
Automotive	gCO ₂ /km	190	145	151	95	CACIB, CAL&F, CAPFM
	%		-24%	-21%	-50%	
Aviation	gCO ₂ e/RTK	1,003	830	866	750	CACIB (Baseline 2019)
	%		-17%	-14%	-25%	
Shipping	gCO ₂ e/DWT.nm	6.22	5.21	5.23	3.98	CACIB
	%		-16%	-16%	-36%	
Commercial real estate	kgCO ₂ e/m ² /year	36.4	29.6	31.8	22.0	CACIB, CAL&F, LCL, CA Italia, Regional Banks
	%		-19%	-13%	-40%	
Cement	kgCO ₂ e/t	671	638	693	537	CACIB
	%		-5%	3%	-20%	
Steel	tCO ₂ e/t	1.88	1.67	1.82	1.40	CACIB
	%		-11%	-3%	-26%	

The table shows the evolution of the Group's Net Zero commitments by sector. The definition of sectors is identical to that available in the "Destination 2050" Guide and recalled in the sectoral breakdowns above.

The sector metric, the value for 2025 (2024 for Shipping), the 2020 Baseline, the 2030 target, as well as the contributing entities are represented in this table.

OIL & GAS

The financed emissions of the portfolio have significantly decreased with a reduction of -81% since 2020, thus exceeding the -75% target set for 2030. This reduction is the result of the selective approach implemented by the Group to support energy companies committed to the transition, with significant reductions in exposures to the most emissive clients and an accelerated implementation of the commitment announced in 2023 to stop financing independent producers.

POWER PRODUCTION

The Power trajectory continues its downward trend, thanks to increased support for renewable energies. In particular, Crédit Agricole CIB's exposure to low-carbon energy increased 2.6-fold in

2025 compared to 2020, thus exceeding the commitment of a +80% increase by 2025. In parallel, the Group continues the decarbonisation of its financed energy mix, with a reduction in financing granted to fossil fuels and notably the implementation of the commitment to exit thermal coal by 2030 for OECD and EU countries and 2040 for the rest of the world.

AUTOMOTIVE

The carbon intensity of the portfolio has decreased by 24% compared to the 2020 baseline. The Group continues to support the decarbonisation of the sector by acting on both supply and demand. On one hand, we support manufacturers in the electrification of their range, and on the other hand, we encourage individuals and professionals to move towards low-carbon mobility by implementing new types of financing.

AVIATION

The average carbon intensity of the portfolio has been reduced by 17% compared to the 2019 baseline. This reduction is due to the predominant share of fourth-generation aircraft in new financing implemented since 2019, despite a highly competitive market. The Group continues to support sector players in their decarbonisation, by increasing its financing of the most fuel-efficient assets, with a goal of reaching 90% fourth-generation aircraft within the Aviation portfolio by 2030, and by contributing to the development of sustainable aviation fuels.

SHIPPING

The carbon intensity of the portfolio has decreased by 16% at the end of 2024 compared to the 2020 baseline. This reduction is due to the exit of emissive assets, the reduction of carbon intensities of assets in the portfolio, and the increase in new low-carbon intensity financing. In order to achieve the -36% target set for 2030, the

Group continues to support sector players in the deployment of decarbonisation solutions such as ship renovation, the use of green fuels, and the development of slow steaming.

COMMERCIAL REAL ESTATE

The carbon intensity of the portfolio has been reduced by 19% compared to the 2020 baseline. This reduction is partly linked to the broadening of the scope of activities included in the calculation (operating property for LCL) with a beneficial effect on the reduction of emissions intensity. Furthermore, the Group continues its strategy of selecting the most committed clients and the most decarbonised assets in the sector. As management challenges vary greatly depending on geography, the Group continues to improve data collection to refine its calculation methodology and thus the management of its trajectory.

INDICATORS RELATED TO FINANCING OF TRANSITIONS

	2025	2024
TOTAL FINANCING OF ENVIRONMENTAL TRANSITION (in millions of euros)	118,188	113,896
O/w energy-efficient buildings	85,219	87,734
O/w clean transport and mobility	7,249	5,216
O/w others	25,720	20,946

The table above shows outstanding loans dedicated to the environmental transition (dedicated financing, either directly or through other organisations such as the European Investment Bank (EIB) or Caisse des Dépôts) according to the Crédit Agricole Group's internal sustainable assets framework at 30 September 2025.

2.4.2 GROSS SCOPES 1, 2, 3 GHG EMISSIONS AND TOTAL GHG EMISSIONS

TOTAL GHG EMISSIONS BROKEN DOWN BY SCOPES 1 AND 2 AND SIGNIFICANT SCOPE 3 EMISSIONS

	Retrospective data			Milestones and target years				
	Baseline	2024	2025	% 2025/ 2024	2025	2030	2050	Annual target as a % / baseline
Scope 1 GHG emissions								
Scope 1 gross GHG emissions (tCO ₂ eq)		45,637	35,747					
Percentage of scope 1 GHG emissions arising from regulated emission trading schemes (%)								
Scope 2 GHG emissions								
Scope 2 gross GHG emissions based on location (tCO ₂ eq)		87,533	93,942					
Scope 2 gross GHG emissions based on the market (tCO ₂ eq)		30,066	30,797					
Significant Scope 3 GHG emissions								
Total gross indirect GHG emissions (scope 3) (tCO ₂ eq)		226,737,099	229,762,142					
1. Purchased goods and services								
[Optional sub-category: Cloud and data centre IT services]								
2. Capital goods								
3. Fuel- and energy-related activities (not included in Scope 1 or Scope 2)								
4. Upstream transportation and distribution								
5. Waste generated in operations								
6. Business travel		55,030	47,661					
7. Employee commuting								
8. Upstream leased assets								
9. Other indirect emissions								
10. Processing of sold products								
11. Use of sold products								
12. End-of-life treatment of sold products								
13. Downstream leased assets								
14. Franchises								
15. Investments		226,682,069	229,714,481					
TOTAL GHG EMISSIONS								
Total GHG emissions (location-based) (tCO ₂ eq)		226,870,269	229,891,831					
Total GHG emissions (marketbased) (tCO ₂ eq)		226,812,802	229,828,686					

The table presents GHG emissions broken down by Scopes 1 and 2 and the significant Scope 3 GHG emissions (3.6 and 3.15) of Crédit Agricole S.A., with the exception of Crédit Agricole Assurances and Amundi relating to Scope 3.15, whose situations are presented below.

Scope 3 emissions (categories 1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12, 13 and 14) are excluded due to operational constraints. Only Scopes 1 and 2

emissions, as well as Scope 3, category 6 and category 15, on which Crédit Agricole S.A. and a certain number of its entities make public commitments (Crédit Agricole for financing, Crédit Agricole S.A. for the operating footprint), are published in the sustainability report. In addition, methodological work is being undertaken to be able to account for the emissions of Crédit Agricole S.A. under Scope 3.1 "Purchased goods and services" in 2026.

EMISSIONS RELATED TO THE OPERATING FOOTPRINT

Entities were advised to report on a rolling year running from 1 November 2024 to 31 October 2025, to allow the report to be produced on time. Some entities are not in line with this rolling year due to their own reporting constraints.

Scope 1 emissions include those related to the entity's fleet of vehicles (diesel, petrol) and the energy consumption of buildings (gas, fuel oil). Diesel and petrol consumption are accounted for within the French scope. Scope 2 emissions include the heating network, the cooling network and electricity, and are calculated according to two approaches: location-based and market-based. In the latter approach, Scope 2 is limited to emissions related to unguaranteed electricity. The 2024 data for location-based scope 2 has been adjusted as a result of a calculation refinement. Scope 3.6 emissions correspond to business travel by rail and plane, and by car within the scope of the Regional Banks. The update of emission factors in 2025 results in an increase in scope 2 and a decrease in scope 3.6. The table shows only actual data.

Internally, the Group monitors its operating footprint more exhaustively. The entities excluded from this table for all metrics are Crédit Agricole S.A. subsidiaries that do not report through the Greenway tools, in particular those with fewer than 100 FTEs at the date of the annual update of the tool, whose actual or extrapolated data represent: 24 tCO₂eq for Scope 1, 489 tCO₂eq for Scope 2 and 1,385 tCO₂eq for Scope 3.6.

EMISSIONS RELATED TO THE FINANCING PORTFOLIO

CALCULATION METHOD

For banking institutions, Scope 3.15 – financed emissions – is the most significant greenhouse gas emissions item. Scope 3.15 emissions are calculated using the Partnership for Carbon Accounting Financials (PCAF) methodology across the scope. Regarding the Agriculture sector, Crédit Agricole has carried out methodological work since 2022 in relation to the subsidiaries' roadmaps to calculate more precisely the financed emissions associated with the sector. The 2024 data have been recalculated to reflect this methodological change, which contributes to a slight increase in total GHG emissions.

SCOPE

The calculations take into account six asset classes identified by the PCAF, i.e. listed equity and corporate bonds, business loans and unlisted equity, project finance, commercial real estate, mortgages and motor vehicle loans. Emissions related to long-term car rental activities are classified under category 3.15.

Crédit Agricole's work on the calculation of financed emissions, in terms of the asset classes taken into account and the approach used, considers the GHG Protocol's minimum requirements, to which other relevant asset classes deemed as relevant for the Group are added. The scope of calculation therefore includes emissions related to portfolios of equities, bonds, loans and project finance for non-financial companies, as well as loans to individuals in the residential real estate and automotive sectors.

The following are excluded from the total emissions presented in the table: emissions related to investments in asset management and insurance activities, financed emissions related to sovereign debt outstanding, loans to financial institutions, trading activities, and loans to individuals outside the residential real estate and automotive sectors, as well as outstanding amounts in sectors other than those contributing significantly to climate change (NACE codes K, J, M to U) in accordance with the definition of the scope of template 1 of ESG Pillar 3.

The bank does not include financed emissions associated with the sovereign asset class in its scope 3.15 due to its unstable nature and these data are therefore not representative. Indeed, sovereign assets are subject to particularly volatile market dynamics: exposure relates to a temporary stock, which can vary significantly from day to day. Disclosing this data would present a snapshot of a highly variable situation that is not representative of the bank's actual or long-term exposure to these assets.

Excluding the aforementioned asset classes, the calculation of financed GHG emissions covers a base of Crédit Agricole S.A.'s outstanding financing amounting to € 947 381 million.

Emissions related to investments of the asset management and insurance activities are presented individually and not consolidated in the table.

CALCULATION DETAILS

As defined by the PCAF, financed emissions are the emissions of the counterparty pro rata to an allocation factor defined as the ratio of the financing granted to the counterparty value. It should be noted that for operational reasons, Crédit Agricole S.A. currently applies the PCAF business loan methodology to all non-financial undertakings, regardless of the type of exposure (loan, bond, project financing).

The PCAF methodology covers customer emissions when the data are available. Data may be reported on the basis of the counterparty disclosures, or estimated, either by data providers or internally via specific calculations or through sector-specific propagations. The calculation of the different scopes of GHG emissions is as follows:

- Scopes 1 and 2: based on the GHG data provided by customers, supplemented by internal or external estimates. In the absence of data, a sector-specific approximation is applied, with emissions considered uniform and mainly related to energy consumption;
- Scope 3: more complex to measure due to lack of global standards and reliable data. The information collected from customers or external service providers is prioritised. In the absence of customer information, estimates are made on certain counterparties, relying in particular on the work of the NZBA or on data deemed usable. The Group does not apply estimates obtained by sectoral propagation for the calculation of Scope 3 in the absence of reliable collected or estimated data.

Accounting for all the GHG emissions of its customers inherently involves a multiple counting bias for the financial institution, as some customers are suppliers to others. For example, when financing a car manufacturer, the Group accounts for the emissions associated with its entire value chain, in particular the emissions associated with the fuel consumed by the vehicles sold. At the same time, when financing an oil company, the emissions associated with the combustion of the oil products sold are accounted for. To address the multiple counting of GHG emissions, the Group has carried out preliminary work to gain a view of GHG emissions that is as close as possible to their physical reality, relating to the value chains of fossil fuels and electricity. The approach is to retain the highest carbon emissions from combustion within each of these value chains, as an integrated company would do. By applying these adjustments to the two sectors mentioned, the theoretical GHG emissions reported within the scope of Crédit Agricole CIB are reduced from 128.8 million t_{eq} CO₂ to 77.6 million t_{eq} CO₂.

DATA QUALITY

For the Residential Real Estate and Automotive sectors, the PCAF scores are 3.8 and 2.47, respectively. For other sectors, the coverage ratio by actual data is 11.8%. The bases considered amount to €947,380,826,095.

EMISSIONS RELATED TO INVESTMENTS IN ASSET MANAGEMENT AND INSURANCE ACTIVITIES

ASSET MANAGEMENT

Amundi doesn't include in its carbon footprint the third-party investments. Indeed, Amundi refers to the GHG Protocol, which only takes into account, in its "minimum requirements", emissions related to direct financing of companies in the form of equity, debt, and project financing. Thus, the calculation for other types of activities is considered optional at this stage, particularly for investment and asset management activities. Amundi calculates the carbon intensity of its Net Zero product range portfolios, which stands at 98 tCO₂e per million euros of revenue as of 31 December 2025.

INSURANCE

The amount of GHG emissions for investments for Crédit Agricole Assurances activities is 46.8 million tCO₂e.

The amount of emissions is linked to:

- **the investments managed directly by Crédit Agricole Assurances** for the euro-denominated funds of life and pension insurance policies and its own funds, for an emissions amount of 38.1 million tCO₂e. It corresponds to the Scopes 1, 2 and upstream 3 of issuers, when they exist and data is available.

This portfolio represents a total outstanding amount of €325.9 billion corresponding to the following asset classes:

- listed corporate equities and bonds for a total outstanding amount of €178.7 billion: total emissions of 15.5 million tCO₂e, calculated on an outstanding amount of €148.9 billion, i.e. a coverage ratio of 83.3%,
- unlisted corporate equities and bonds and infrastructure for a total outstanding amount of €22.6 billion: total emissions of 1.2 million tCO₂e, calculated on an outstanding amount of €12.7 billion, i.e. a coverage ratio of 56.1%,
- real estate for a total outstanding amount of €20.5 billion: total emissions of 0.1 million tCO₂e and an outstanding amount of €15.2 billion, i.e. a coverage ratio of 74%,
- sovereign assets for a total outstanding amount of €80.5 billion: total emissions of 16.9 million tCO₂e calculated on an outstanding amount of €77.9 billion, i.e. a coverage ratio of 96.7%,

- other types of assets (such as money market funds, derivatives, and diversified and alternative funds) for a total outstanding amount of €23.6 billion: total emissions of 4.4 million tCO₂e calculated on an outstanding amount of €13.1 billion, i.e. a coverage ratio of 55.8%.

The emissions coverage ratio calculated for this portfolio as a whole is thus 82.2%.

- **the assets carried by Crédit Agricole Assurances** for the unit-linked life and pension insurance policies, the outstanding amount of which is €115.6 billion. The related greenhouse gas emissions reached a volume of 8.7 million tCO₂e (coverage ratio of 68.9%). The assets mainly correspond to UCITS and corporate securities.

Crédit Agricole Assurances has also calculated an amount of 273,269 tCO₂e for property and casualty insurance, which corresponds to the GHG emissions from management of motor vehicle claims (in France and abroad) and home claims (French scope).

The calculation methodology used to determine GHG emissions related to the management of a motor vehicle claim is presented in detail in the White Paper "CO₂ emissions of auto claims management in France" published in July 2024. This calculation follows the entire process of a car claim management, from the intervention of the assistance company to the repair of vehicles, and the estimated emissions are based on data provided by the various stakeholders.

With regard to housing, a gradual approach has been adopted by initially targeting water damage claims: these claims accounted for more than half of claims opened in 2025 with relatively available data.

The calculation approach is based on two structuring principles of action: in-depth collaboration with the entire value chain; and working with expert partner firms to identify and integrate physical emission factors into their databases.

2.4.2.1 OPERATING FOOTPRINT

FOCUS – OPERATING FOOTPRINT (IN TCO₂EQ)

Metrics	2025	2024
Scope 1	35,747	46,311
of which gas	21,154	25,514
of which fuel oil	821	1,504
of which vehicle fleet	13,772	19,292
Scope 2 (market-based)	30,797	29,917
of which electricity	17,060	19,409
of which electricity of data centres	728	2,445
of which heating network	12,187	7,846
of which cooling network	822	218

The table presents Scope 1 and Scope 2 GHG emissions for Crédit Agricole Group, broken down by emission item. Entities were advised to report on a rolling year from 1 November 2024 to 31 October 2025 to allow the report to be produced on time. Some entities are not in line with this rolling year due to their own reporting constraints.

The Scope 2 emissions presented here are market-based, thus limiting them to emissions from electricity that is not guaranteed.

GHG EMISSIONS RELATED TO ENERGIES AND BUSINESS TRAVEL

	Unit	2025	2024
GHG emissions related to energies/m ²	tCO ₂ eq/m ²	0.0095	0.0101
GHG emissions related to business travels/FTE	tCO ₂ eq/FTE	0.2975	0.3490

The table presents the GHG emission intensity ratios for the Group's scope.

The ratio of GHG emissions related to building energy consumption/m² is calculated from energy data according to the market-based methodology on the total surface area. The 2024 data has been adjusted following a correction in the calculation of the total surface area.

The ratio of GHG emissions linked to business travel per FTE is calculated based on total FTEs.

ENERGY CONSUMPTION AND MIX

Data related to energy consumption and production could not be verified. Indeed, the production process implemented at the level of Crédit Agricole Group does not allow, at this stage, the collection and review of all E1-5 datapoints and their full alignment with the CSRD regulatory requirements. The Group is working on improving this process in order to publish this data at some point.

2.4.2.2 EMISSIONS RELATED TO THE FINANCING PORTFOLIO

GHG EMISSIONS RELATED TO FINANCING

	Unit	2025	2024
Total financed emissions	tCO ₂ eq	229,714,481	226,682,069
Carbon intensity of stocks	tCO ₂ eq/€m	242	244

The table shows the total indirect emissions of Scope 3 category 15 from the table in part 2.4.2 "Total GHG emissions broken down by Scopes 1 and 2 and significant Scope 3 emissions", supplemented by the ratio of intensity of emissions in terms of euros financed. The scope of financing included in this ratio is identical to that indicated in the section "Financed emissions", "Scope" above. The stock base considered here is €947,381 million.

2.4.3 GHG REMOVALS AND GHG MITIGATION PROJECTS FINANCED THROUGH CARBON CREDITS

CARBON CREDITS CANCELLED DURING THE REFERENCE PERIOD

	2025	2024
Amounts from removals and reduction projects (in tCO₂eq)	166,912	140,975
of which VERRA (in tCO ₂ eq)	62,274	71,232
of which Gold Standard (in tCO ₂ eq)	104,638	59,421
of which Label Bas Carbone (in tCO ₂ eq)	0	4,850

The table shows the total amount of carbon credits cancelled during the reporting period, as well as details by label within the scope of Crédit Agricole Group. Carbon credits for which the entity has a document confirming cancellation (Certificate of Verified Carbon Unit (VCU) Retirement) from the label are counted as

cancelled carbon credits. In the case of the low-carbon Label, the number of "GHG Emission Reductions" attributed under its framework (recognised by the prefect of the region concerned) is recorded.

CARBON CREDITS PLANNED TO BE CANCELLED IN THE FUTURE

	Amount of carbon credits in 2025	Amount of carbon credits in 2024
Total (tCO ₂ eq)	333,372	487,001

The table presents the quantity of carbon credits planned to be cancelled in the future, for all labels within the Crédit Agricole Group scope.

It includes the number of carbon credits from projects verified by the labels, but not yet delivered (identified by Livelihoods documents or other documents), as well as the number of projected "GHG Emission Reductions" in the process of being

financed but not yet "Recognised" (recorded in the LBC register), i.e. not yet allocated by the Prefect on behalf of the financier.

2.4.4 INTERNAL CARBON PRICING

Crédit Agricole Group has not opted for the deployment of an internal carbon pricing mechanism.

2.4.5 INFORMATION PUBLISHED ON ACTIVITIES RELATED TO THE EU TAXONOMY

The information relating to the European Green Taxonomy published in this report is based on Delegated Regulation 2026/73, made public on 4 July 2025 and published in the OJEU on 8 January 2026.

REGULATORY FRAMEWORK AND REQUIREMENTS

The EU Taxonomy Regulation 2020/852 of 18 June 2020 establishes a framework for defining environmentally sustainable economic activities, i.e. economic activities that pass the following three tests:

- I) they make a substantial contribution to an environmental objective;
- II) they do no significant harm to any of the other environmental objectives presented in the regulation;
- III) they are carried out in a way that meets certain minimum social safeguards.

Activities that meet these three criteria are said to be “Taxonomy-aligned”.

This regulation sets the following objectives:

- climate change mitigation;
- climate change adaptation;
- sustainable use and protection of water and marine resources;
- transition to a circular economy;
- pollution prevention and control;
- protection and restoration of biodiversity and ecosystems.

The Taxonomy Regulation has been supplemented by five Delegated Acts:

- **the Article 8 Delegated Act 2021/2178:** concerns the content and presentation of the information to be disclosed by undertakings subject to the Non-Financial Reporting Directive (NFRD) and then CSRD directives from 1 January 2025;
- **the Climate Delegated Act 2021/2139:** describes the “eligible” activities and the technical screening criteria for determining “alignment” with the two climate objectives of “climate change mitigation” and “climate change adaptation”. Regulation 2023/2485 amends this text to introduce new eligible economic activities and new technical criteria applicable for assessing alignment. The alignment of these new activities has been under consideration since this decree was issued;
- **the Gas and Nuclear Delegated Act 2022/1214:** concerns economic activities related to the gas and nuclear sectors in terms of climate objectives;
- **the Environmental Delegated Act 2023/2486:** describes the “eligible” activities and the technical screening criteria used to assess the “alignment” with the other four environmental objectives, also applicable to credit institutions since this act came into force;
- **Delegated Act 2026/73:** concerning the mechanism for simplifying the content and presentation of information to be disclosed on environmentally sustainable activities.

According to the provisions of Article 8 of the Delegated Regulation, the reporting requirements applicable to credit institutions are progressive:

- Since the 2022 reporting year (on the basis of data at 31 December 2021), Crédit Agricole Group publishes annually (i) the proportion of “eligible” assets (i.e. financing activities described in the delegated acts) and “non-eligible” assets under the Climate Delegated Act and (ii) the proportion of assets excluded solely from the numerator of the ratio and the proportion excluded from both the numerator and the denominator of the ratio; as from the 2023 reporting year, eligibility is calculated on the basis of the Taxonomy’s six environmental objectives.
- Since 31 December 2023, Crédit Agricole Group has disclosed the proportion of “aligned” assets (the Green Asset Ratio or GAR), i.e. assets financing eligible activities that pass the three Taxonomy alignment tests. This alignment analysis is carried out on the basis of (i) information published by non-financial undertakings and financial undertakings subject to the Non-Financial Reporting Directive (NFRD), and subsequently to the Corporate Sustainability Reporting Directive (CSRD) from 1 January 2025, (ii) as well as on the basis of the Delegated Act’s technical criteria covering retail customers, local authorities, and dedicated finance.
- Crédit Agricole Group also discloses additional metrics:
 - ratio for assets under management: the proportion of assets under management financing Taxonomy-aligned economic activities, compared to total assets under management;
 - financial guarantee ratio: represents the proportion of financial guarantees backing loans and advances and other debt instruments on undertakings (financial and non-financial) intended to finance Taxonomy-aligned economic activities.

- Finally, the publication of Delegated Act 2026/73 of 4 July 2025 suspended, until January 2028, the disclosure requirements for additional KPIs relating to the trading book and fees and commissions received for services other than loans and asset management. These metrics are therefore not published by Crédit Agricole Group on the basis of data at 31 December 2025, in accordance with regulatory expectations.

The diagram below shows all the information to be disclosed.

Since the decree of 31 December 2024, Crédit Agricole Group has disclosed its eligibility ratios for the four complementary environmental objectives as well as the GAR Flow based on revenues and Capex ⁽¹⁾. For the publication of 31 December 2025, the alignment ratios for the four complementary environmental objectives are disclosed for the first time.

Crédit Agricole Group does not disclose the additional KPI on Financial Conglomerates. The scope of this metric is indeed already largely covered by the other KPIs disclosed (green asset ratios and

Article 8 of the Taxonomy Regulation has required credit institutions subject to the Non-Financial Reporting Directive (NFRD), and subsequently to the Corporate Sustainability Reporting Directive (CSRD), to disclose information on the eligibility for and alignment of assets with the Taxonomy since 31 December 2023.

assets under management ratios), which include all the Group's material activities (banking, asset management, insurance and non-financial subsidiaries that are equity-accounted for regulatory purposes). Furthermore, publication of the conglomerate ratio could lead to the production of potentially contradictory information on the scope of the activities covered by this ratio and in the other KPIs, given the different weighting methods for the aligned assets: balance sheet logic for the green asset ratios and assets under management ratios, whereas the approach used for the conglomerate ratio is based on revenues.

⁽¹⁾ Capex is the abbreviation of Capital Expenditure.

METHODOLOGY FOR DETERMINING ALIGNED ASSETS

Since the financial year ended 31 December 2023, credit institutions have been required to publish the proportion of Taxonomy-aligned assets.

Aligned activities are defined and described by the Climate Delegated Act and the Environmental Delegated Act.

In order to determine the alignment of assets with the Taxonomy, the following assets are considered eligible for the Taxonomy:

- home loans, renovation loans and vehicle financing to individuals (loans granted from 1 January 2022) for households;
- housing finance and dedicated finance (finance whose purpose is known and which concerns an activity eligible for the taxonomy) for local authorities;
- commercial and residential property collateral seized and held for sale;
- exposures to financial and non-financial counterparties subject to the Corporate Sustainability Reporting Directive (CSRD), for which the eligible ratio is available in their publications and for which data could be collected.

On the basis of the eligible assets listed above, the Taxonomy-aligned assets are identified according to two analysis angles:

- for general financing, on the basis of information published by CSRD financial and non-financial counterparties, in particular the green asset ratios, green revenues and green capital expenditure, which are collected from the external data provider Clarity AI (actual data, without any estimate), or where appropriate, retrieved from customers' sustainability reports;
- for financing where the purpose is known, based on the characteristics of the financed asset by applying the technical criteria for Taxonomy alignment.

Mortgage loans considered to meet the Taxonomy criteria are those that (i) have the best energy performance and (ii) are not subject to chronic or acute physical risk.

Properties with an energy performance level in the top 15% of the national or regional building stock (for properties with a building permit submitted before 31 December 2020) or with energy consumption at least 10% below the threshold set by the NZEB – Nearly zero-emission building regulation (for properties with a building permit submitted after 31 December 2020), meet the Taxonomy's substantial contribution criteria.

For the purposes of analysing the alignment of residential real estate in France, and based, on one hand, on studies carried out by the *Observatoire de l'immobilier durable* (Observatory for Sustainable Real Estate) and, on the other hand, on the interpretative note of the French Ministry of Ecological Transition and Territorial Cohesion, Crédit Agricole Group defines the residential properties with an energy performance level in the top 15% of the French building stock as the properties with primary energy consumption of below 135 kWhEP/m² per year. Crédit Agricole Group also considers buildings constructed according to the RT2012 thermal regulation to meet this criterion, as regulation RT2012 establishes an energy consumption ceiling of 50 kWhEP/m² per year, which is lower than 135 kWhEP/m² per year.

Mortgage loans to finance new residential buildings for which the first drawdown took place between 1 January 2017 and 31 December 2020 (the date on which the substantial contribution criterion came to an end) correspond to constructions complying with regulation RT2012. The reason is that regulation RT2012 was implemented in 2013, but building permits issued up to January 2016 had a validity period of two years which could be extended on two occasions by one additional year, which resulted in a maximum period of four years between the issuance date of the permit and the date the mortgage loan was granted/the date of first drawdown from the mortgage loan. Between 1 January 2013 (date of entry into force of regulation RT2012) and 31 December 2016, a building could therefore be constructed with a building permit which was not RT2012 compliant.

Furthermore, in accordance with the interpretation note of the French Ministry of the Economy and Ecological Transition, properties subject to the RE2020 environmental regulations must comply with the NZEB -10% criterion.

The identification and assessment of physical risks, within the framework of the "Climate change adaptation" DNSH, were based on the methodology used for table 5 "Banking portfolio – Physical risk metrics potentially related to climate change: Exposures subject to a physical risk" of ESG Pillar 3. This methodology aims to identify the hazards to which buildings are exposed and to assess the risks on the basis of a 2050 scenario. The hazards taken into account in the methodology are floods due to overflow of rivers or submersive waves, clay shrinkage-swelling and sea level rises. The share of properties subject to chronic or acute physical risk is considered non-aligned if no restructuring plan is in place. Therefore by applying this methodology to residential properties, €7.7 billion are excluded from the GAR's numerator.

In addition, the analysis of Minimum Social Safeguards (MSS) was not carried out at loan level for retail activities, as Crédit Agricole S.A. considers MSS to be complied with de facto in its portfolio, which is mainly a loan book for residential mortgage in France for which current regulations allow compliance with minimum social criteria. In addition, the Sustainable Finance Platform report ⁽¹⁾ of October 2022 stated that social minimums do not apply to households.

It should be noted that car loans and home renovation loans could not be Taxonomy-aligned due to a lack of evidence collected from customers to verify the technical criteria.

To calculate the GAR, the amount of **aligned assets** is compared to the amount of **covered assets**, which corresponds to total assets, excluding the following items:

- exposures to companies not subject to the CSRD (financial and non-financial companies outside the EU, small and medium-sized companies in the EU below the thresholds for subjection);
- derivatives, overnight interbank loans, cash and cash equivalents and other assets (including loans not dedicated to retail customers);
- other not eligible for Taxonomy exposures to financial and non-financial counterparties subject to the CSRD, retail customers and local authorities.

FIGURES FOR CRÉDIT AGRICOLE GROUP'S SCOPE AT 31 DECEMBER 2025

OPERATIONAL APPLICATION OF THE DISCLOSURE REQUIREMENTS UNDER ARTICLE 8 OF THE TAXONOMY REGULATION

Crédit Agricole Group's Societal Project, the expression of the Group's CSR/ESG strategy, integrates three key dimensions: taking action for the climate and transition to a low-carbon economy; strengthening social cohesion and inclusion; and accomplishing agricultural and agri-food transitions.

The criteria for alignment with the European Taxonomy, a regulation which to date covers only the environmental aspect, have been integrated into the design and approval process for certain products and the formalisation of commitments made to customers and counterparties, particularly in the following areas:

- On the liabilities side, a new green bond framework was published in November 2023, replacing the framework put in place in 2018 on the occasion of Crédit Agricole Group's initial green bond issue.
- The framework is harmonised for all Crédit Agricole Group entities and serves as a reference for the Group's green securities issues, distributed to institutional and retail investors. Rapid development of the sustainable finance ecosystem since 2018, the introduction of the European Taxonomy and the strengthening of Crédit Agricole Group's environmental and climate strategy

prompted this update of this Group emissions framework. In concrete terms, the substantial contribution criterion has been adopted as one of the criteria for the selection of assets eligible for financing by these green bond issues.

- In order to support the Group's customers in their transition to a more sustainable business and to develop sustainable financing and savings offerings in a structured and secure way, the Group has decided to draw up an internal framework defining Crédit Agricole Group's sustainable assets. This framework also makes it possible to identify assets eligible for financing through sustainable liabilities.
- In terms of product governance, any entity wishing to market a new "sustainable product", and which would refer to a Taxonomy alignment where applicable, must obtain the prior and explicit authorisation of its New Activities and Products Committee (NAP Committee), which is responsible for verifying that all the conditions necessary for distribution have been met in terms of legal and regulatory compliance as well as operational aspects. It must also ensure that its offering complies with the standards of the aforementioned internal framework, demonstrate its ability to apply the collective rules in force and submit its application to Crédit Agricole Group for approval.

EU TAXONOMY INDICATORS FOR SUSTAINABLE ACTIVITIES

ILLUSTRATIVE TABLE OF THE GAR COMPOSITION TURNOVER-BASED BY COUNTERPARTY TYPE

(in millions of euros)	2025					2024*				
	Covered assets in denominator					Covered assets in denominator				
	Total	Eligible	Aligned	Of which Taxonomy-eligible	Of which Taxonomy-aligned (GAR Turnover-based)	Total	Eligible	Aligned	Of which Taxonomy-eligible	Of which Taxonomy-aligned (GAR Turnover-based)
Covered assets in numerator	688,589	536,498	74,882	77.91%	10.87%	678,270	524,239	63,898	77.29%	9.42%
Financial undertakings	141,749	46,315	7,071	32.67%	4.99%	134,193	46,269	6,403	34.48%	4.77%
Non-financial undertakings and Local governments financing	69,803	26,876	6,719	38.50%	9.63%	70,281	27,876	8,331	39.66%	11.85%
Households	476,948	463,308	61,092	97.14%	12.81%	473,759	450,094	49,164	95.00%	10.38%
of which loans collateralised by residential immovable property	450,626	439,474	61,092	97.53%	13.56%	439,911	429,620	49,164	97.66%	11.18%

* Based on the methodology set out by Commission Delegated Regulation (EU) 2026/73 of 4 July 2025.

For the first time, this year, Crédit Agricole Group is publishing the above voluntary table, which presents the GAR stock (Revenues view) for financial years 2024 and 2025, broken down by counterparty type. As a reminder, the calculation method used for 2025 was based on the information available in Commission Delegated Regulation (EU) 2026/73 of 4 July 2025.

To facilitate comparability, it was therefore necessary to recalculate the GAR level achieved in 2024. Thus, the impact of these methodological changes resulted in an improvement in the ratio,

which increased from 4.26%, as disclosed in the previous sustainability report, to 9.42%.

Using the same calculation method, the 2025 GAR of 10.87% has therefore increased. This is mainly due to improved data collection on retail customer exposures. Indeed, the aligned portion of residential mortgage loans has increased by 24%, mainly due to changes to the system for collecting energy performance certificates for properties during the financial year.

TEMPLATE 0 – SUMMARY OF KPIS TO BE PUBLISHED BY CREDIT INSTITUTIONS UNDER ARTICLE 8 OF THE TAXONOMY REGULATION

At 31 December 2025

		Total exposure to Taxonomy-aligned activities		KPI (%)	KPI (%)	% coverage (over total assets)	Non assessed exposures (% of covered assets)*	Non assessed exposures (% of covered assets)*
		Turnover-based	CapEx-based	Turnover-based	CapEx-based		Turnover-based	CapEx-based
Main KPI	Green asset ratio (GAR) stock	74,882	80,929	10.87%	11.75%	31.24%		

* In accordance with Article 7(8) of Commission Delegated Regulation (EU) 2026/73.

		Total exposure to Taxonomy-aligned activities		KPI (%)	KPI (%)	% coverage (over total assets)	Non assessed exposures (% of covered assets)*	Non assessed exposures (% of covered assets)*
		Turnover-based	CapEx-based	Turnover-based	CapEx-based		Turnover-based	CapEx-based
Additional KPIs	GAR (flow)	15,364	17,256	8.53%	9.59%	29.67%		
	Trading book							
	Financial guarantees	730	949	12.81%	16.66%	0.26%		
	Assets under management**	76,410	75,799	8.16%	8.10%	42.47%		
	Fees and commissions income							

* In accordance with Article 7(8) of Commission Delegated Regulation (EU) 2026/73.

** Source: MSCI, Amundi. External alignment data provided by MSCI covers 49% for the revenue KPI and 56% for the Capex KPI of total assets in the denominator (assets under management). This improvement in coverage is mainly due to changes in the methodological rules of the denominator (exclusion of derivatives and non-CSRD companies). With identical methodology, coverage would have been 29% for the revenue KPI and 33% for the Capex KPI.

At 31 December 2024

		Total environmentally sustainable assets	KPI (Revenue basis)	KPI (Capex basis)	% coverage (over total assets)	% of assets excluded from the numerator of the GAR (Article 7 (2) and (3) and Section 1.1.2. of Annex V)	% of assets excluded from the denominator of the GAR (Article 7 (1) and Section 1.2.4 of Annex V)
Main KPI	Green asset ratio (GAR) stock	63,898	4.26%	4.88%	69.95%	63.45%	30.05%
Additional KPIs	GAR (flow)	13,093	3.70%	4.41%	55.93%	69.23%	44.07%
	Trading book						
	Financial guarantees	776	3.75%	4.99%			
	Assets under management ⁽¹⁾	49,583	3.05%	4.09%			
	Fees and commissions income						

(1) Source: MSCI, Amundi. Alignment data provided by MSCI covers 24% for the KPI (Revenue basis) and 14% for the KPI (Capex basis) of total assets of the denominator (assets under management).

The European Commission's publication of 17 December 2025 specifies, in particular, the need to maintain the publication of KPIs at 31 December 2024 for comparability purposes. The KPIs published in Model 0 on 31 December 2024, in accordance with regulatory requirements, have not been recalculated using the methods set out in the new Delegated Act 2026/73.

Crédit Agricole Group disclosed the GAR Flow on 31 December 2025 using a methodology that only takes into account new transactions during the year, without considering repayments or divestments.

To comply with the provisions of the publication of European Commission notice of 8 November 2024, Crédit Agricole Group publishes the main key performance indicator, the GAR stock, in terms of revenues and Capex, of its main entities exempt from publication of individual sustainability reports. These entities are as follows:

- LCL: 10.64% (revenues) and 10.92% (Capex);
- Crédit Agricole Leasing & Factoring: 7.19% (revenues) and 9.66% (Capex);
- Crédit Agricole Personal Finance & Mobility: 0.57% (revenues) and 0.87% (Capex).

In addition to these ratios, as a financial conglomerate, Crédit Agricole Group publishes the principal key performance indicator, in terms of revenues and Capex, of its subsidiaries engaged in activities in the areas of asset management and insurance:

- Crédit Agricole Assurances:
 - Investment ratio: 4.65% (revenues) and 5.92% (Capex),
 - Subscription ratio: 6.46% (revenues),
 - Weighted ratio: 4.77% (revenues) and 5.96% (Capex);
- Amundi: 8.16% (revenues) and 8.06% (Capex).

In accordance with Article 4 of Delegated Act 2026/73 of 4 July 2025, Crédit Agricole Assurances has chosen not to implement the new provisions set out in the text as of the 2025 financial year, and discloses its Taxonomy reporting on the basis of the requirements set out in the previous Regulations (EU) 2021/2178, (EU) 2021/2139 and (EU) 2023/2486. The level of KPIs disclosed in this report therefore does not benefit from the structural improvements provided for in the new Delegated Act

Regional Banks subject to sustainability reporting, but exempt from disclosure**KPI – GAR (Revenue basis)****KPI – GAR (Capex basis)**

Caisse régionale Alsace Vosges	12.66%	12.96%

3. SOCIAL RESPONSIBILITY

3.1. OWN WORKFORCE/OWN WORKERS

3.1.1 STRATEGY

3.1.1.1 THE HUMAN PROJECT, A MAJOR DRIVER OF CRÉDIT AGRICOLE GROUP'S AMBITIONS

Working every day in the interest of its customers and society, Crédit Agricole Group has coordinated its action around the Customer Project, the Societal Project and the Human Project.

Crédit Agricole Group's organisational, managerial and cultural transformation relies on male and female employee-driven actions: for the Customer Project, work on relational excellence, for the Human Project, the development of empowered teams on a local level, and for the Societal Project, efforts to step up societal commitment.

The Group Human Project focuses on local human accountability to offer customers permanent access to a trained, independent contact person acting within a clear framework of delegation. It is based on a deep conviction: "human accountability is a necessity". Training actions and tests have been carried out by teams and individuals to support them in the development of the Customer Project and the Societal Project.

The Group Human Project places individual and collective responsibility at the heart of the Group's managerial, cultural and human transformation. It recognises the individual and collective engagement and performance of employees. It promotes the development of employee skills and offers them a variety of career and mobility opportunities, through its learning-based corporate culture.

In an ever-changing environment and in the face of multiple transformations (artificial intelligence, digital, environmental, social), Crédit Agricole Group acts as a responsible employer for all its employees across the world.

Furthermore, in signing its Code of Ethics, Crédit Agricole Group reiterates that it carries out its activities in all parts of the world in respect of fundamental human and social rights.

3.1.1.2 THE VARIOUS PILLARS OF THE HR POLICY

To reinforce its responsible employer promise and establish it in the long term, Crédit Agricole Group's commitment is focused on five main pillars that respond to the impacts, risks and opportunities identified by the HR division (for more information, see part 1.3.3 "Material impacts, risks and opportunities and their interaction with strategy and business model"):

- 1. Human capital development:** the Group promotes continuous training and skills development to ensure the employability and functional mobility of employees, as well as the development of all forms of leadership;
- 2. Social dialogue:** the Group encourages a rich social dialogue, which is both constructive and respects human rights, freedom of association and trade union rights, and promotes actively listening to employees;
- 3. Diversity and inclusion:** the Group pursues an inclusive policy at all levels of the organisation, preventing and firmly opposing any form of discrimination and promoting equal opportunities in order to ensure the robustness of its workforce;

4. Working environment: the Group's social policy social policy ensures that it offers working and employment conditions that guarantee safety and preserve health, as well as the quality of life and working conditions of employees;

5. Performance and compensation: the Group's compensation policy is based on the values of accountability and transparency, enabling Group employees to be rewarded for their performance in a fair way, while respecting the standards of each country.

Lastly, the targets of the HR business line are defined by the continuous improvement of the metrics presented in parts 3.1.1.4 "Workforce" and 3.1.3 "Quantitative data and targets" as well as by the commitments made at the launch of the Human Project. These commitments derived from working groups led with employees from the various entities. Thus, for the year 2025: gender diversity, the youth plan, CSR for all etc., are detailed in parts 3.1.2 "Policies, action plans and resources mobilised as part of the HR policy" and 3.1.3 "Quantitative data and targets".

3.1.1.3 MANAGEMENT AND GOVERNANCE OF IMPACTS, RISKS AND OPPORTUNITIES WITHIN THE HR DIVISION

While Crédit Agricole Group's HR strategy is influenced by impacts, risks and opportunities that affect all employees without distinction in all countries where the Group operates ⁽¹⁾, the material risks and opportunities are mainly directly related to the own workforce.

HR governance is structured around a HR Directors' Committee for Crédit Agricole S.A. and an HR Commission for FNCA, enabling policy convergence at Group level while respecting the specific business and local characteristics of the various entities.

In addition, an annual survey is conducted in all entities according to a schedule that they choose. Listening to employees and taking their feedback into account has a positive impact, as measured in particular by the consistently high participation rate in the surveys.

This approach, which is both "local" and "global", meets the expectations of employees and all stakeholders thanks to the five policies dedicated to the women and men who make up the Group. These policies are implemented on a long-term basis and respond to impacts, risks and opportunities (IRO), as detailed below in part 3.1.2 "Policies, action plans and resources mobilised as part of the HR policy":

- 1.** Human capital development;
- 2.** Social dialogue;
- 3.** Diversity;
- 4.** Working environment;
- 5.** Performance and compensation.

The actions described in these policies are implemented on a regular and ongoing basis (most often annually, but can be modified and adjusted according to external constraints).

The positive impacts identified contribute to our opportunities, are driven by the Human Project and are led by the Group HR and FNCA (Fédération Nationale du Crédit Agricole) teams, together with the HR teams of each entity:

⁽¹⁾ To find out more about the specifics of Crédit Agricole Group's employees, see part 3.1.1.4 "Workforce".

- for HR Development (Crédit Agricole S.A.) and HR Research and Development (FNCA): through annual Career Committees, discussions with the HR transformation community and work carried out alongside the Fédération nationale du Crédit Agricole (FNCA). It is therefore a community of HR specialists with more than 15 employees who coordinate and implement the strategy;
- for Social Policy (Crédit Agricole S.A.) and Social Affairs (FNCA): a team of more than 10 employees organises regular discussions with employee representatives and trade unions, as well as with professional organisations. It also manages and coordinates, with the entities, all social actions intended for employees;
- lastly, with regard to compensation matters, the Compensation and Employee Benefits team (Crédit Agricole S.A.) and the Compensation and Social Data team (FNCA), i.e. more than 15 employees, oversee the compensation policy. They apply rigorous governance standards, structured around the Compensation Policy Control Committee, the Compensation Committee and the Board of Directors. Collaboration with the compensation teams of all Group entities ensures consistent implementation of policies, thereby perfectly aligning compensation schemes with the Group's strategy and values.

Proactive talent management in connection with the implementation of ambitious skills development and compensation policies improve the Group's attractiveness and employee retention. This is in addition to the implementation of proactive policies for employee well-being (in and outside work) and diversity and inclusion, which guarantee an improvement in the conditions necessary for employee health and safety.

Together, these positive impacts influence the Group's strategy and business model and are ultimately guarantee increased robustness and improved overall performance.

3.1.1.4 WORKFORCE

WORKFORCE BY GENDER

Gender	2025		2024	
	Number of employees (FTE)	% of employees (FTE)	Number of employees (FTE)	% of employees (FTE)
Female	88,364.59	55.16%	87,400.95	55.42%
Male	71,835.61	44.84%	70,313.03	44.58%
Other*	-	-	-	-
Not reported	-	-	-	-
TOTAL EMPLOYEES	160,200.20	100.00%	157,713.98	100.00%

* Gender as specified by the employees themselves.
Scope covered: 100%.

This table covers all employees (both active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CAGIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in full-time equivalent (FTE) at 31 December 2024 and 2025. See Note 7 "Employee benefits and other compensation" in the "Notes to the consolidated financial statements" of this Universal Registration Document to cross-reference the most representative figure in Crédit Agricole Group's financial statements.

Definitions:

- **Executive corporate officers:** an executive corporate officer (CEO or Deputy CEO) is a person who holds a corporate position on behalf of the legal entity they represent and who is compensated for this position.

- **Fixed-term contracts:** excluding interns, work-study students (apprenticeship contracts and professional training contracts), employees under industrial agreements for training through research, international volunteers, seasonal employees and temporary workers (temporary workers are non-employees).
- **Inactive employees:** employees who receive pay but are no longer working, or those who no longer receive pay and are no longer working, but who are still linked to the entity through an employment contract.
- **Full-time equivalent (FTE):** the activity rate of each employee on a permanent or fixed-term contract present at 31/12/N-1 and at 31/12/N, based on their theoretical working time. Example: an employee working 50% part-time will have an activity rate of 0.5. Do not confuse "activity rate" with "presence rate": a full-time employee with a suspended contract will have a presence rate of 0 but an activity rate of 1, while an employee on part-time medical leave retains their contractual hours (maintenance of said hours is defined by the collective bargaining agreement and follows the sick leave scheme).
- **Individuals:** An employee counts as one individual.
- **Gender M/F/O/NR:** the genders "Other" (O: Other) and "Not reported" (NR: Not reported) only apply in countries where legislation allows them. France does not allow this.

BREAKDOWN OF WORKFORCE BY REGION/COUNTRY (THRESHOLD OF 50 OR MORE EMPLOYEES, REPRESENTING AT LEAST 10% OF THE TOTAL WORKFORCE)

Region/Country	2025		2024	
	Number of employees (FTE)	% of employees (FTE)	Number of employees (FTE)	% of employees (FTE)
Western Europe	144,399.79	90.14%	141,626.02	89.80%
o/w France	115,868.12	72.33%	114,455.46	72.57%
o/w Italy	15,626.55	9.75%	15,657.78	9.93%
Eastern Europe	7,590.48	4.74%	7,718.79	4.89%
Asia – Oceania	4,535.93	2.83%	4,337.10	2.75%
Africa	2,421.00	1.51%	2,409.00	1.53%
North America	988.00	0.62%	1,359.07	0.86%
Near and Middle East	146.00	0.09%	146.00	0.09%
Central and South America	119.00	0.07%	118.00	0.07%
TOTAL EMPLOYEES	160,200.20	100.00%	157,713.98	100.00%

Scope covered: 100%.

This table covers all employees (both active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CAGIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in full-time equivalent (FTE) at 31 December 2024 and 2025. Geographic areas have been defined by significant region and on the basis of those existing in the "Information on the Crédit Agricole Group entities" section of this Universal Registration Document.

The decline in headcount in North America is mainly due to the disposal of three Amundi subsidiaries in the United States on 1 April 2025 (representing a reduction of 447 employees).

* Gender as specified by the employees themselves.
Scope covered: 100%.

These tables cover all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CAGIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, excluding Directors for the entire Crédit Agricole Group scope), expressed in full-time equivalent (FTE) on a full-time or part-time basis at 31 December 2024 and 2025. The number of non-guaranteed hours employees

takes into account, for example, zero-hour contracts. This is a type of employment contract that has developed in the European Union, but also in the United Kingdom (holiday contracts at universities or “work for hire” contracts for proof-readers in the publishing industry, for example). Its main feature is that the employer does not specify any working hours or minimum working time in the contract. The employee is paid only for the hours worked, and must be available at any time of the day.

EMPLOYEES BY CONTRACT TYPE, BROKEN DOWN BY REGION

	Reporting period: 1 January 2025 to 31 December 2025							
	Western Europe	Eastern Europe	Asia – Oceania	Africa	North America	Near and Middle East	Central and South America	TOTAL

Number of full-time employees (in FTE)	128,880.36	7,631.00	4,332.00	2,409.00	1,357.00	146.00	118.00	144,873.36
Number of part-time employees (in FTE)	12,745.66	87.79	5.10	-	2.07	-	-	12,840.62

Scope covered: 100%.

These tables cover all employees (both active and inactive) on a full-time and part-time basis on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CAGIP, BforBank, Crédit Agricole Transitions & Energies (Transitions & Energies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in full-time equivalent (FTE) at 31 December 2024 and 2025.

EMPLOYEE TURNOVER

	2025	2024
Employee turnover rate (CSRD formula)	7.35%	7.45%

Scope covered: 100%.

This indicator covers all employees active during the year on permanent contracts (including executive corporate officers, excluding Directors), expressed in number of individuals. Permanent contracts have been used to calculate this metric, as it does not seem appropriate to calculate a turnover rate for employees on fixed-term contracts. “Inactive” employees are excluded from the scope.

The calculation formula (CSRD formula) used is: Number of permanent contract departures in year N / Number of permanent contract employees active at 01/01/N (or, failing that, at 31/12/N-1).

The reasons for departure taken into account are: resignations, retirements, redundancies, other departures (contract termination by mutual agreement, termination of probationary period, death, other). An employee who is present on 31/12/N, but who leaves the undertaking on that day, will be considered to have left on 01/01/N+1.

- The turnover rate (as calculated according to France's INSEE requirements) calculated on hires and departures was 7.62% in 2025, compared to 8.01% in 2024.

- The calculation formula used is $[(\text{Number of permanent contract hirings in year N} + \text{Number of permanent contract departures in year N}) / 2] / \text{Number of permanent contract employees active at 01/01/N (or, failing that, at 31/12/N-1)}$.

The reasons for hiring taken into account are: external recruitment, permanent contract conversions.

Permanent contract conversions take into account employees whose contract is converted into a permanent contract during the year if they were hired under a permanent contract within three months of the end of their previous contract and if they were hired by the same entity as their previous contract.

Data restatement: the figure disclosed in the 2024 sustainability report used the INSEE calculation formula, i.e. 8.01%. The 2024 figure has been corrected in the table above and now shows the 2024 turnover rate calculated using the CSRD formula.

REASONS FOR DEPARTURE (EMPLOYEES ON PERMANENT CONTRACTS)

	2025				2024			
	France	Other countries	Total	%	France	Other countries	Total	%
Resignation	2,821	1,999	4,820	43.13%	2,664	1,997	4,661	42.66%
Retirement	1,651	352	2,003	17.92%	1,440	302	1,742	15.94%
Lay-off	867	363	1,230	11.01%	931	350	1,281	11.72%
Death	78	22	100	0.89%	76	26	102	0.93%
Other	2,492	530	3,022	27.04%	2,533	607	3,140	28.74%
TOTAL PERMANENT CONTRACT DEPARTURES	7,909	3,266	11,175	100.00%	7,644	3,282	10,926	100.00%

Scope covered: 100%.

This table covers all employees who were active on a permanent contract in 2024 and 2025 (including executive corporate officers for the scope of Crédit Agricole S.A., CAGIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate

officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in number of employees. “Inactive” employees are excluded from the scope.

“Other” refers in particular to cases of termination by mutual agreement (rupture conventionnelle) and termination during the probationary period (at the initiative of the employee or employer).

3.1.2 POLICIES, ACTION PLANS AND RESOURCES MOBILISED AS PART OF THE HR POLICY

3.1.2.1 HUMAN CAPITAL DEVELOPMENT

GOVERNANCE

The HR teams of Crédit Agricole S.A. and the Fédération nationale du Crédit Agricole (FNCA) jointly define, manage and coordinate the Group's human capital development policy through various decision-making bodies, by order of importance:

- the Group Human Project Committee (quarterly) defines and follows the common guidelines of the Group Human Project applicable to all entities;
- the Societal Project Steering Committee (quarterly) in charge of monitoring and rolling out the Societal Project (CSR) within the Regional Banks and Crédit Agricole S.A. entities;
- the Crédit Agricole Group HR Directors' meeting (annual) to share progress and work jointly on the Group Human Project commitments.

The above-mentioned elements are implemented through the Fédération nationale du Crédit Agricole and Crédit Agricole S.A.

These bodies are responsible for monitoring and assessing the effectiveness of this human capital development policy and the associated actions (including through quantitative metrics).

FRAMEWORKS AND REFERENCES

Crédit Agricole Group's human capital development commitments are based on:

- the Code of Ethics, available on the website;
- the Code of Conduct, available on the website;
- the Crédit Agricole Group Mobility Charter of 12 November 2024.

All these documents are available on the website ⁽¹⁾.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material impacts, risks and opportunities (IROs) identified and addressed through the human capital development theme, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Positive impact		
– Positive impact on employees through good talent management and the implementation of ambitious skills development policies	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ⁽¹⁾ ESG practices	Own operations	Invariable
– Increased overall performance and employee retention, thanks to ambitious career and skills development policies	Own operations	Invariable

(1) The opportunity "Improving attractiveness through ambitious and innovative ESG practices" is common to all Crédit Agricole Group's HR policies and therefore refers to Human Capital Development, Social Dialogue, Diversity, Working Environment, and Performance & Compensation. In terms of human resources, Crédit Agricole S.A.'s attractiveness is measured and analysed every year through employer brand rankings and turnover monitoring (see "Employee turnover" table in part 3.1.1.4 "Workforce" above). In particular, Crédit Agricole Group is ranked by the BAC+2/+3 2024 Index, in the Active and Student categories (Universum surveys), as number one and number two respectively in banking and financial services. It is also ranked number one in financial services by the LinkedIn Top Companies 2024 ranking.

The impact and opportunities related to the human capital development policy are examined during a coordination meeting between the FNCA Human Resources department and the Crédit Agricole S.A. Human Resources department and then analysed annually in the HR Directors' Committee (Crédit Agricole S.A.) and the Human Resources Committee (FNCA).

HUMAN CAPITAL DEVELOPMENT POLICY

CONTEXT/AMBITIONS

With the aim of positively impacting its employees and contributing to the development of their skills, Crédit Agricole Group regularly identifies and proposes new solutions. It is therefore very active in seeking out new skills development offerings and professional mobility opportunities to meet the expectations and needs of its employees.

Since 2019, the implementation of the Group Human Project has encouraged empowerment, discernment, confidence, courage and initiative. In terms of skills, this approach fosters a culture of curiosity, training and mobility. The Group Human Project allows each employee to play a full part in their own career path, to make progress and to develop skills in both management and business expertise.

These opportunities promote sustainable employability, boost overall employee performance and enhance the undertaking's attractiveness in the interests of its customers.

SCOPE OF APPLICATION

This policy applies worldwide to Crédit Agricole Group, defined as follows:

1. Crédit Agricole S.A. and its subsidiaries

Crédit Agricole S.A. is both the corporate centre of Crédit Agricole Group, which it represents with respect to banking authorities, and the parent company of the Group's major business line subsidiaries. In terms of commercial activities, it is made up of several specialised business lines which are described in Chapter 1.

Each subsidiary is a fully fledged entity, and depending on the business line, operates in various geographic areas. Each undertaking, taking into account its expertise, is subject to the collective bargaining agreement specific to its speciality (e.g. Crédit Agricole CIB is covered by the banking collective bargaining agreement, Crédit Agricole Assurances by the collective bargaining agreement for insurance companies and Crédit Agricole Leasing & Factoring by the collective bargaining agreement for financial institutions).

The HR business line is managed by the Group HR department within Crédit Agricole S.A., primarily through the HR Directors' Committee, which meets every month, as well as through various HR subcommittees that oversee the coordination of social, HR development and compensation-related themes, among others. Crédit Agricole S.A. oversees the entire HR business line across its various specialised subsidiaries. In this regard, each entity determines its HR policy based on its own development strategy and its competitive and geographical positioning.

2. Regional Banks and associated entities

The Crédit Agricole Regional Banks are autonomous, cooperative, fully fledged retail banks in their region. All the Regional Banks belong to the Crédit Agricole professional branch. As a result, they are subject to and apply the national collective bargaining agreement. The Fédération nationale du Crédit Agricole acts as employer organisation for the Regional Banks with two main roles. The first is led by the Human Resources Committee composed of executives of the Regional Banks elected by their peers and whose power is to negotiate, via a federal delegation, agreements with delegates of trade union organisations representing employees appointed at branch level. The second concerns the coordination of the HR function of the Regional Banks led by the FNCA HR department. As a result, each Regional Bank determines its HR policy in line with its own development strategy, while adhering to the framework set by the national collective bargaining agreement and branch agreements.

CONTENT AND ACTION PLANS

1. Training

Key training principles

For Crédit Agricole Group, dynamic and innovative employee support and the implementation of skills development policies are ongoing challenges. The Group therefore invests in the professional development and lifelong training of its employees, wherever they may be. It emphasises diversified career paths within its business lines, regions and geographic areas.

As such, it offers a wide range of opportunities for skills development, focusing on two key areas:

- promoting **continuous skills development** and continuous adaptation in order to keep pace with changes in the business and ensure the long-term employability of employees;
- supporting **the acquisition of new skills** and anticipating change.

Metrics relating to skills development are available in part 3.1.3.5 "Training and skills development metrics" of this report.

Supporting employees

To accelerate transformation through accountability, empowerment and the organisational, managerial and cultural transformation instilled by the Human Project, Crédit Agricole Group offers all its employees dynamic, increasingly personalised career paths to help them develop their skills.

Crédit Agricole Group relies in particular on IFCAM, Crédit Agricole Group's university, to offer all its employees a range of professional certifications for the many business lines in the bank and specialised markets.

The actions taken strengthen the Group's ability to anticipate changes, promote a shared culture and support the responsible transformation of its business lines, in line with its promise to support all its customers in their transitions.

For France, some of the courses listed in the *Répertoire national des certifications professionnelles* (French National Directory of Professional Certifications – RNCP), the *Répertoire spécifique* or the *valorisation des acquis de l'expérience* (VAE) are eligible for the *compte personnel de formation* (Personal Training Account – CPF). They are recognised by the French government.

For its part, and to accelerate its managerial and cultural transformation, Crédit Agricole S.A. launched a partnership in 2024 with a global digital training platform that operates in more than 24 languages. This project brings all employees on board, to help them always develop their potential through the continuous learning opportunities of self-training. In 2025, 100% of Crédit Agricole S.A. employees worldwide were given unlimited access to the Group's training, skills development and mobility programmes.

The Regional Banks are heavily involved in training activities, which they closely monitor. A branch agreement signed unanimously by the trade union organisations in 2024 sets out the ambitions in terms of training and defines the conditions for the success of the training plans. In addition, most of the Regional Banks have signed corporate agreements on training that supplement the branch agreement.

All of this complements other actions implemented within the entities. For example, Crédit Agricole Services Immobiliers (CASIM) has set up its own training organisation, "Campus CASIM", for Square Habitat agencies with a view to developing integration and continuous training courses for employees in the real estate networks of the Regional Banks.

Training metrics are available in part 3.1.3.5 "Training and skills development metrics" of this report.

Supporting the Group's Societal Project

Crédit Agricole Group and IFCAM are aware of the environmental, societal and climate issues at stake, and are developing a training ecosystem focusing on two targets:

- to anticipate business developments to encourage employees to upgrade their skills;
- to offer Corporate Social Responsibility training, to understand these issues and inspire collective action.

The "At the heart of the Societal Project" module is the core of this programme. It highlights Crédit Agricole Group's commitments to the environment, social inclusion and agricultural and agri-food transitions. Accessible to everyone, this module forms the basis of dedicated programmes for each business line. The target for 2025 is to provide CSR training to 100% of employees and Directors.

To ensure that all Group employees can broaden their knowledge, there is a diverse range of resources offered, designed to draw on different learning systems (podcasts, webinars, e-learning, face to face etc.).

In line with the Group's Raison d'Être, all Group executives and employees are trained in CSR issues.

In three years, at 31 December 2025, more than 94% of Crédit Agricole Group employees and Directors worldwide had completed CSR training. In addition, numerous awareness-raising actions such as conferences, "fresques" and workshops have been organised within the Regional Banks and Crédit Agricole S.A. entities.

In support of the continuous learning culture and to ensure that all employees are aware of and trained in CSR issues, Crédit Agricole's various business lines regularly improve the programmes offered to employees according to their specificities and expertise.

In 2025, IFCAM, Crédit Agricole Group's university, stepped up its role as a strategic lever to support employees in adapting to transitions. The actions taken strengthen the Group's ability to anticipate changes, promote a shared culture and support the responsible transformation of its business lines, in line with its promise to support all its customers in their transitions. A large amount of content was developed and rolled out with IFCAM, with the aim of capitalising on business-specific approaches targeted according to their timetables and expertise, in order to make it easier for employees in all business lines and geographical regions to adopt the Societal Project.

The Group is also mindful of creating the conditions for sustainable employability by adapting business lines and skills to technological, societal and environmental developments (artificial intelligence, Net Zero transition etc.).

The Group takes a constant interest in technological developments, and numerous initiatives are being launched by entities to use AI to bolster human intelligence in all its business lines. This year also saw the roll-out of intuitive and secure chatbots such as "Sécuri'Chat" rolled out within Crédit Agricole S.A. and currently being rolled out in other subsidiaries of Crédit Agricole S.A. and the "FELIX" platform for the Regional Banks.

Metrics relating to training and skills development are available in part 3.1.3.5 "Training and skills development metrics" of this report.

Organisational, managerial and cultural transformation

The organisational, managerial and cultural transformation that the Group Human Project has supported since 2019 has helped develop new ways of working and strengthen the collective spirit.

Crédit Agricole Group entities support this approach by establishing dedicated programmes for each team, based on the fundamentals of the Human Project.

The results of the annual surveys conducted among Crédit Agricole Group employees make it possible to identify the main concerns of employees by business line, and to measure the effects of the managerial, organisational and cultural transformation, in particular through the analysis of verbatim accounts. For the year 2025, the participation rate for the Regional Banks was 83%, while the participation rate for Crédit Agricole S.A. was 80%. These high levels, which have been rising steadily since 2017, are proof of our ongoing commitment to work every day in the interest of our customers and society. Employees throughout the Crédit Agricole Group are informed by the Human Resources department of the overall results for the entity. A report is also provided to the social partners for each scope, and business meetings (plenary sessions) are dedicated to precise scope-by-scope reporting. Following these meetings, depending on the scope, ad hoc action plans are implemented and managed by each entity.

On 16 January 2025, around 100 executives and employees from Crédit Agricole Group gathered to launch the second season of the Human Project Ambassadors programme. These ambassadors, drawn from all regions worldwide, are tasked with promoting the Human Project and showcasing the diversity of all the Group's business lines, expertise and know-how, particularly on social media but also within their entities and teams.

2. Professional assessment

Crédit Agricole employees worldwide benefit from appraisals throughout their career, in compliance with local regulations. These allow everyone to play an active role in their own development and performance, and help build employee loyalty.

The aim of these appraisals is to share ideas about employees' career development and their training needs. This is a dedicated, formalised and constructive meeting centred on employees' prospects for advancement, their skills, training needs and wishes for professional advancement and mobility.

Metrics relating to performance evaluations are available in part 3.1.3.5 "Training and skills development metrics" of this report.

3. Career management within the Group

The Group takes a holistic approach to employee skills development, creating a virtuous circle of constant learning. This starts with a discussion with each employee on a personalised career path, which then leads to concrete mobility through a training programme designed to ensure success in assuming new responsibilities.

To strengthen intra-group mobility, the Crédit Agricole Group Mobility Charter was launched on 12 November 2024. The aim of the charter is to facilitate professional mobility between the Regional Banks and associated entities and Crédit Agricole S.A. and its business lines, through a shared, structured framework for the implementation of these inter-entity movements. In line with the Group's organisational procedures and each entity's HR policies, this charter standardises the conditions for mobility, highlighting the opportunity for cross-functional career paths between the Group's different business lines.

Mobility guarantees professional growth, the development of each employee's skills and the diversity of their experience, thereby creating a genuine career dynamic.

In order to guarantee the employability of all its employees and to continuously support them in developing new skills, the Group encourages its employees to dare to embark on robust career paths. Crédit Agricole Group thus values internal mobility as an essential lever to support employees in their development throughout their professional career.

The two 2025 Mobilijobs events at Crédit Agricole Group level, which were annual events dedicated to internal mobility, were designed to meet the specific needs of each manager, employee, intern, work experience and work-study student, in France and around the world. They built on the actions taken in previous years, with a strong desire to further boost mobility between the various universes.

Mobility Committees are held regularly with HR contacts from Crédit Agricole S.A., FNCA, CAMCA and Crédit Agricole d'Île-de-France entities to discuss HR developments and present positions and employees open to mobility.

The creation of multi-business line campuses like Campus Atlantique-Vendée (Campus by CA) and Centre-Est (Terra Lumia) brings together all Crédit Agricole Group's business lines and promotes cross-functionality and collective ownership.

And finally, the proliferation of Villages by CA also fosters the development of skills and a culture of innovation across the different universes.

Ever more ambitious in its commitment to accelerating mobility, Crédit Agricole S.A. encourages personalised career paths by filling two-thirds of positions through internal mobility.

The Regional Banks facilitate inter-Regional Bank mobility through common contractual status (*statut conventionnel commun*), which facilitates movements between Regional Banks.

In 2025, the Group's Mobility policy was resolutely oriented towards the future, particularly in relation to the roll-out of digital platforms such as Learnia (a tool of the Group's University) and training courses.

Learnia illustrates IFCAM's willingness to offer a continuous learning model, an essential response to the need for agility in the acquisition of new skills.

Metrics relating to mobility and promotions are available in part 3.1.3.5 "Training and skills development metrics" of this report.

Executive succession planning

The purpose of the Crédit Agricole Group Director, Deputy General Manager and Chief Executive Officer Pathways is to:

- identify and select the executives who will ensure the Group's transformation by embodying its values (succession planning);
- ensure a diversity of executive profiles that will drive performance and collective wealth;
- encourage the emergence of Group executives to help strengthen synergies;
- strengthen a shared culture and values based on an updated leadership model.

These executive Pathways (*Parcours Dirigeants*) are designed as tools for assessing and helping define an individual development plan in order to access executive positions.

They give everyone a chance to get to know each other better, develop their open-mindedness and expand their knowledge of the Group.

During these Pathways, Crédit Agricole Group executives are invited to participate in the various stages of the evaluation process.

The programme is inclusive, involving all the Regional Banks and all Group entities around the world.

The Crédit Agricole Pathways thus help develop a sense of Group identity among executives, strengthened through regular mobility between organisational spheres (Crédit Agricole S.A./Regional Banks) in the service of a shared collective.

In 2025, the Group held 22 assessment sessions for 180 participants to assess candidates for leadership positions.

The Group also supports its top talent by offering a mentoring programme. Male and female employees registered in this programme meet their mentors (executives) and receive targeted coaching, particularly in soft skills. The intersection between the Regional Banks and Crédit Agricole S.A. subsidiaries (e.g. a mentor from a Regional Bank and a mentee from a subsidiary, or vice versa) also helps to strengthen cross-functional collaboration within the Group and improve understanding of specialised business lines and local issues.

This Group-wide mentoring programme promotes fluidity and cross-functional collaboration between all entities and Regional Banks within the Group and prepares future executives to take on broader responsibilities. Since its creation in 2017, this programme has supported 112 women and 18 men.

3.1.2.2 SOCIAL DIALOGUE

GOVERNANCE

At Crédit Agricole Group level, social dialogue is conducted through two employee representative bodies resulting from the following collective agreements:

- the European Committee of Crédit Agricole Group (information and advisory body), which meets annually at a plenary meeting and at least one meeting of the Select Committee:
 - the European Works Council (EWC) met in the Select Committee twice in 2025,
 - the annual plenary meeting was held at the end of the year to discuss, among other things, the general performance of the Group and Crédit Agricole Personal Finance & Mobility,
 - in addition, in June 2025, the Select Committee members, accompanied by an external expert, carried out a study in Belgium;
- the Group Committee and its Economic and CSR subcommittees. The committee meets twice a year in plenary session and each of its subcommittees meets annually:
 - during 2025, the Group Committee met twice in plenary session. The Economic Committee and the CSR Committee also held their annual meetings. In addition to monitoring the Group's overall performance and results, these meetings provided an opportunity to present various topics relating to the Group's current affairs (e.g. presentation of the results of the 2024 Accountability Index results (Crédit Agricole S.A. and its subsidiaries) and 2024 Engagement and Recommendation Index (Regional Banks), presentation of the CSRD, information and discussions on Worldline and CAWL, Retail Banking and BforBank).

In October 2025, EWC and Group Committee members attended a one-day training session covering a presentation of the Group, its history, strategy and activities, as well as an introduction to financial analysis.

These bodies are chaired by the Chairman of the Fédération nationale du Crédit Agricole, who is also the Chairman of Crédit Agricole S.A. The employer delegation of these two bodies is composed of representatives of the Fédération nationale du Crédit Agricole and Crédit Agricole S.A.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material IROs identified and addressed through the social dialogue theme, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Positive impact		
– Positive impact of sound practices on employees' rights to freedom of association and collective bargaining	Own operations	Invariable
Risk		
– Risk to the Group's image or overall performance due to a deteriorated social climate/dialogue	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ESG practices*	Own operations	Invariable

* For further information about this opportunity, please refer to the IRO table in part 3.1.2.1 "Human Capital Development policy".

The impact, risk and opportunity associated with the social dialogue policy are examined during a coordination meeting between the FNCA Human Resources department and the Crédit

FRAMEWORKS AND REFERENCES

The undertakings of Crédit Agricole Group comply with the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work adopted on 18 June 1998 and amended in 2022, as well as the Tripartite Declaration on Multinational Enterprises and Social Policies (ILO). The Group also applies the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinational Enterprises.

The undertakings of Crédit Agricole Group comply with all regulations, legislation and contractual provisions relating to labour relations.

Two collective agreements, which organise the operation of the aforementioned bodies, have been concluded at Crédit Agricole Group level. These two bodies are co-led by the Fédération nationale du Crédit Agricole and the Group HR department of Crédit Agricole S.A.

All these documents are available on the website ⁽¹⁾.

In its Code of Conduct, Crédit Agricole Group reaffirms that human rights and people's fundamental social rights must be rigorously applied.

Furthermore, in its 2025 vigilance plan, Crédit Agricole states that the challenges in terms of respect for human rights and fundamental freedoms enshrined in France's international commitments include, in particular: combating forced labour, slavery and child labour.

The above rights and principles are also taken into account in HR risk mapping, which enables Crédit Agricole Group to identify, analyse and prioritise the risks of serious harm that its activities could cause.

Agricole S.A. Human Resources department and analysed annually in the HR Directors' Committee (Crédit Agricole S.A.) and the Human Resources Committee (FNCA).

SOCIAL DIALOGUE POLICY

CONTEXT/AMBITIONS

Mindful of building and fostering a social dialogue useful to employees and boosting its overall performance, Crédit Agricole Group has stated that social dialogue is one of the cornerstones of its social pact. Trade union rights, employee representation and collective bargaining are fundamental rights that Crédit Agricole Group respects and encourages. Crédit Agricole Group firmly believes that transparent and responsible social dialogue helps to strengthen mutual trust between stakeholders, support transformations and adapt to changes in the environment, particularly legal and regulatory changes.

Social dialogue is defined as a set of mechanisms for informing, consulting, coordinating, and/or negotiating with social partners. It is based on qualitative dynamics specific to each entity depending on its culture, business, geographical location and applicable national legislation. Quantitative monitoring metrics cannot be used to measure its quality.

SCOPE OF APPLICATION

See the “Scope of application” section of part 3.1.2.1 “Human capital development”.

CONTENT AND ACTION PLANS

Crédit Agricole Group is working to promote the collective agreements establishing the Group Committee and the European Committee of Crédit Agricole Group and to negotiate amendments for revisions to adapt these agreements to changes in the environment, in order to maintain a high quality social dialogue.

Crédit Agricole Group intends to continue to provide clear, comprehensive and transparent information to these two bodies and to consult the European Committee on any issues requiring its input.

The momentum of social dialogue in Crédit Agricole entities was illustrated in 2025 by the signing of a number of agreements on the following topics:

- trade union rights and social dialogue;
- experienced employees, seniors;
- the donation of solidarity rest days;
- gender equality at work;
- and job and career management.

As a key element of the social dialogue policy of Crédit Agricole Group, stakeholder involvement (in the form of social dialogue with the Social and Economic Committee, annual surveys ⁽¹⁾ and whistle-blowing systems ⁽²⁾) aims to nourish discussions and enhance the Group's social policy.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material IROs identified and addressed through the diversity theme, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Risks		
– Internal and external image and reputational risk due to inadequate diversity and inclusion policies or discriminatory practices	Own operations	Invariable
– Risk associated with not knowing employee characteristics	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ESG practices *	Own operations	Invariable

* For further information about this opportunity, please refer to the IRO table in part 3.1.2.1 “Human Capital Development policy”.

This goes beyond complying with legal obligations to inform and/or consult employee representatives, both in the countries where they operate and at European level. These complementary qualitative interactions with employee representatives provide elements for assessing the quality of dialogue with staff.

Metrics relating to collective bargaining coverage and social dialogue are available in part 3.1.3.1 “Collective bargaining coverage and social dialogue” of this report.

3.1.2.3 DIVERSITY

GOVERNANCE

Crédit Agricole S.A. and the Fédération nationale du Crédit Agricole jointly define, manage and coordinate the Group's Diversity policy through various committees, by order of importance:

- the Group Human Project Committee (quarterly) defines and follows the common guidelines of the Group Human Project applicable to all entities;
- the Societal Project Steering Committee (quarterly) in charge of monitoring and rolling out the Societal Project (CSR) within the Regional Banks and Crédit Agricole S.A. entities;
- the annual Crédit Agricole Group HR Directors' meeting is an opportunity to share progress and work jointly on the Group Human Project commitments.

The above-mentioned elements are implemented through the Fédération nationale du Crédit Agricole and Crédit Agricole S.A.

These bodies are responsible for monitoring and evaluating the effectiveness of this policy and related actions. These actions help to prevent, mitigate or correct any discrimination and promote diversity and inclusion in general.

FRAMEWORKS AND REFERENCES

Crédit Agricole Group's diversity commitments are driven by:

- the Group's Raison d'Être “Working every day in the interest of our customers and society”;
- Crédit Agricole Group's Human Project;
- the Group mentoring programme;
- the Youth Plan;
- the disability policy.

All these documents are available on the website ⁽³⁾.

⁽¹⁾ For more information on the annual surveys, see part 3.1.2.1 “Human capital development”, Section 1 “Training” and “Organisational, managerial and cultural transformation” of this report.

⁽²⁾ For more information on the reporting system, see part 3.1.2.4 “Working environment”, Section 1 “Occupational health” and part 4.1.4.4 “Protection of whistle-blowers” of this report.

⁽³⁾ <https://www.credit-agricole.com/en/responsible-and-committed/a-responsible-employer>

The risks and opportunity related to the Diversity policy are examined during a coordination meeting between the FNCA Human Resources department and the Crédit Agricole S.A. Human Resources department and then analysed annually in the HR Directors' Committee (Crédit Agricole S.A.) and the Human Resources Committee (FNCA).

Crédit Agricole Group needs to know the characteristics of its employees; in particular, it monitors its workforce, gender breakdown, types of contracts and staff turnover in order to offer all its employees the same development and career opportunities in the interests of equal opportunities. This information is disclosed in part 3.1.1.4 "Workforce" of this report and in all the tables in part 3.1.3 "Quantitative data for 2025 and targets".

DIVERSITY POLICY

CONTEXT/AMBITIONS

Crédit Agricole Group has implemented a Diversity policy. This policy amplifies the Societal Project and bolsters the Group's Raison d'Être. It is a driver for attracting and retaining employees, meeting challenges and preparing the undertaking for the future. Its roll-out limits the risk to the Group's image and reputation that could arise from inadequate diversity and inclusion policies or discriminatory practices.

Crédit Agricole Group is amplifying gender equality at work by giving all male and female employees the same opportunities to access positions, promotions and benefits on the basis of their skills and performance. Through this policy, the culture of value and meritocracy is encouraged by promoting gender diversity in all business lines and at all levels of the organisation. For example, it places the inclusion of people with disabilities at the heart of the Group's social and societal responsibility.

The Diversity policy addresses all forms of diversity (gender, age, disability, sexual orientation, ethnicity, socio-cultural background, multigenerational etc.) and is based on five commitments:

- equal opportunities: giving all male and female employees the same opportunities to access positions, promotions and benefits on the basis of their skills and performance;
- openness and curiosity: taking an interest in others, being open to differences and accepting them, raising awareness and understanding of the diversity policy and highlighting its benefits to ramp up and reinforce an inclusive corporate culture;
- representativeness: reflecting our customers and our ever-changing society, taking into account a number of criteria (age, disability, gender equality), in all business lines and at all levels of the organisation;
- solidarity: placing mutual aid and collaboration at the centre of our policies, through internal actions and external initiatives;
- responsibility: making the promotion of diversity everyone's business.

SCOPE OF APPLICATION

See the "Scope of application" section of part 3.1.2.1 "Human capital development".

CONTENT AND ACTION PLANS

1. Gender equality at work

Gender equality at work and diversity are key to the efficiency and robustness of our organisations, and are supported by the Group Human Project.

Crédit Agricole Group strives for gender equality at work, regardless of differences: equity in recruitment, training, promotion, compensation and work-life balance. The Group therefore pays particular attention to respecting equal pay. The occurrence of potential pay gaps is subject to increased vigilance and measures are taken to remedy them, where appropriate. Each Group entity discloses its gender equality at work index to monitor the evolution of gender equality.

For more information on equal pay for women and men, see the "Performance and compensation" policy in part 3.1.2.5 of this report.

With regard to regulatory obligations, as provided for under France's Rixain law on accelerating gender equality at work, Crédit Agricole S.A. disclosed, on 1 March 2025, the gender representation gaps among executive managers and among members of decision-making bodies.

Nine entities of Crédit Agricole S.A. are concerned, and while some have already reached the thresholds set by the Rixain law (i.e. the application of a quota of at least 30% of each gender among executive managers and decision-making bodies at 1 March 2026), or are very close, three of them must continue their efforts and are subject to enhanced monitoring, with, for example, for one of them, the roll-out of succession plans on a global scale.

This ambition – the challenge of increasing the representation of women in all entities – is a priority for Crédit Agricole S.A., and builds on two principles:

- gender balance in all talent pools; and
- systematic identification of women in succession plans.

The Regional Banks are fully committed to the process of increasing the number of women in their decision-making bodies and their executive managers. A specific announcement in this regard has been made on each Regional Bank's website.

Metrics relating to gender diversity are available in parts 3.1.1.4 "Workforce" and 3.1.3.2 "Diversity" of this report.

2. Intergenerational commitment

In line with its historic approach to inclusion and equal opportunities, Crédit Agricole Group stepped up its commitment to young people with the launch of its Youth Plan in 2022.

A vehicle for integration, this Plan helps the younger generations find their place in a sustainable society by welcoming Year 10 pupils on their mandatory work experience week, work-study students and international work experience volunteers, in addition to other contracts dedicated to young people.

Discovering Crédit Agricole Group's business lines helps them to acquire skills and fine-tune their career plans so that they can enter the working world. It is also an opportunity within the Group for each of its areas of expertise to develop their knowledge and practices in the face of constantly changing uses, thanks to the diversity of these young profiles and backgrounds.

In 2025, Crédit Agricole Group again exceeded its commitment by offering opportunities (work experience and internships, work study, international volunteers etc.) to around 24,794 young people.

On 23 October 2025, the annual onboarding event for Crédit Agricole Group work-study students, interns and international work experience volunteers was held at the Evergreen site.

These young people were able to participate in person and remotely in this event sponsored by the Fédération nationale du Crédit Agricole, Crédit Agricole S.A. and IFCAM. Launched following a survey conducted among work-study students from previous years, this event enhances knowledge of the Group, raises awareness of the diversity of its business lines and strengthens the team spirit, with employees discussing their career paths and mobility within the Group, as well as work-study students sharing their experiences.

This event was an opportunity to reaffirm the Youth Plan 2022-2025, which is at the heart of the Human Project and societal commitments, as well as the key role of work-study students in preparing the company of tomorrow and ramping up the Group's managerial transformation. This event complements the actions implemented within the entities and Regional Banks to encourage the integration of work-study students, and to continue to support and train 50,000 young people by 2025: this target of 50,000 young people welcomed by the Group in France and internationally between 2022 and 2025 was reached one year in advance, by the end of 2024.

Since 2019, Crédit Agricole Group has been taking part in the national *Mon stage de troisième* (My Year-10 work experience week) initiative, which aims to offer high-quality observation work experience placements to students from priority education networks.

The Group's ambition is to welcome 750 pupils each year, i.e. 5% of the target assigned in France to private-sector undertakings.

For the year 2025, 980 pupils were welcomed at the Group for their week-long work experience placement.

Crédit Agricole Group also intends to remain a model for the inclusion of all generations in value creation. Since 2015, for example, the La Réunion-Mayotte Regional Bank has been working to support employees who are also caregivers. To support its employees who care for a loved one suffering from illness or living with a disability, the mutual bank has implemented measures to make their lives easier. More than 42% of employees have donated one or more days off to employees who are caregivers.

In order to ensure intergenerational balance within the Group, Crédit Agricole Assurances has expanded its policy in favour of experienced employees, with a corporate agreement in France aimed at maintaining employment. Crédit Agricole Assurances is committed to:

- professional development for senior employees in terms of mobility, training and compensation, with a particular focus on providing training for employees aged 50 and over;
- end-of-career planning and the transition from working life to retirement, including possible subsidised part-time working arrangements;
- providing specific training for people aged 55 and over on the topic of preparing for retirement.

Metrics on the age breakdown of employees are available in part 3.1.3.2 "Diversity" of this report.

3. International representation

Crédit Agricole Group is very proactive regarding the internationalisation of its employee pools.

Increased vigilance is underpinned by the Career Committees that take place each year in all Group entities, including international entities. The Group thus promotes the emergence and increase of international profiles, particularly in succession plans. In this regard, Crédit Agricole S.A. is targeting 30% international profiles in its succession plans by 2025, thus helping to identify future candidates for executive pathways in order to form the next generation of international executives. To this end, every year, a series of executive pathway tests is conducted for international candidates. At the end of 2025, succession plans included 33% international profiles.

Crédit Agricole S.A.'s internationalisation will accelerate with the new ACT 2028 MTP, which sets a target of 30% international candidates in strategic talent pools by the end of 2028.

As for the Regional Banks and their subsidiaries, the vast majority of them are present only in France.

For more information on the internationalisation of employees, consult the "Human capital development" policy in part 3.1.2.1 "Human capital development" of this report.

Metrics on the international presence of employees are available in part 3.1.3.2 "Diversity" of this report.

4. Disability

Crédit Agricole Group pursues a proactive policy in favour of equal rights and opportunities, and places the inclusion of people with disabilities at the heart of its social and societal responsibility.

To this end, its seventh Disability Agreement 2023-2025 provides for the recruitment of 200 people with disabilities, including at least 60 permanent contracts and 50 work-study students. This target was exceeded on 31 December 2025 (269 hires). On 12 June 2025, a new branch agreement on the employment of workers with disabilities was signed for the Regional Banks.

Crédit Agricole S.A.'s Disability policy is designed to recognise the skills of each individual, whatever their uniqueness. It aims to create a working environment that brings out the best in everyone, and defines diversity and inclusion as essential drivers of Crédit Agricole S.A.'s performance and growth. This ambition is reflected in the various areas of the Group's disability agreement. Crédit Agricole S.A. is particularly committed to recruitment and professional integration, as demonstrated by its participation in dedicated school forums and the establishment of specialised partnerships, which help to instil an inclusive culture right from the recruitment process. In addition to its recruitment plan, measures to retain employees are also being implemented. Adequate support is provided in order to meet all the needs of employees with disabilities, such as the implementation of technical solutions (workstation adaptations, adapted transport, improved accessibility of the premises, installation of specific software), human solutions (interpreters, assistants etc.) and organisational solutions (teleworking arrangements etc.). Communication, awareness-raising and training initiatives also help to combat discrimination and stereotypes. Initiatives are organised throughout the year, including training for managers, the publication of a newsletter and specific workshops during Group internal mobility events. During European Disability Employment Week (EDEW), Crédit Agricole S.A. invites all its employees to conferences and awareness-raising events.

To promote Crédit Agricole Group's diversity policy, which focuses on gender equality at work, international and intergenerational aspects, and disability, the Group is launching a range of actions open to all employees during the "Diversity month". This major event is an opportunity to join together to accelerate the Group's managerial and cultural transformation. Through a series of events around the world (including conferences, inspiring workshops and testimonials) on diversity and inclusion, the Group and its entities seek to instil an increasingly inclusive culture and promote equal opportunities to strengthen diversity within the Group. The aim is to offer everyone the opportunity to better extend the Group's commitments to all corners of the world with a view to strengthening the Human Project, and assuming collective responsibility for meeting current challenges and preparing the company of the future.

In 2025, this "Diversity Month" ran from 3 to 28 November. With equal opportunities as its central theme, it explored topics such as confidence, professional boldness and combating stereotypes through conferences, testimonials and practical workshops. The entire programme was available in French and English and provided both in-person and remote attendance to ensure the whole Group could be involved.

European Disability Employment Week (EDEW) was one of the highlights of the event. It highlighted the concrete actions taken to promote the inclusion of people with disabilities, including initiatives to raise awareness of stereotypes, testimonials from employees and presentations of support mechanisms implemented within the Group. The week also provided an opportunity to recognise the commitment of internal networks and partner associations that contribute to advancing inclusion on a daily basis.

Disability metrics are available in part 3.1.3.4 "Disabilities" of this report.

3.1.2.4 WORKING ENVIRONMENT

GOVERNANCE

Crédit Agricole Group's work environment is defined, managed and coordinated through various decision-making bodies:

- the Group Security Committee;
- the Group Physical Security and Safety Committee.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material IROs identified and addressed through the working environment theme, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Positive impacts		
– Improving employee health and safety through proactive work/life well-being policies	Own operations	Invariable
– Positive impact on employees in the event of social protection practices that are better than statutory practices	Own operations	Invariable
Risk		
– Image and reputational risk in the event the health and safety of employees are endangered or human rights are not respected	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ⁽¹⁾ ESG practices	Own operations	Invariable

⁽¹⁾ For further information about this opportunity, please refer to the IRO table in part 3.1.2.1 "Human Capital Development policy".

The impacts, risk and opportunity associated with the working environment policy are examined during a coordination meeting between the FNCA Human Resources department and the Crédit

The aim of these two umbrella committees is to establish and oversee the implementation of a common strategy within the Group, aimed at the convergence of technological choices and major projects, broken down according to the constraints specific to each site.

The Group's Physical Security and Safety business line is coordinated by Crédit Agricole S.A. as the Group's corporate centre in respect of the Fédération nationale du Crédit Agricole which, for its part, leads the community of people and property security managers in the 39 Regional Banks.

The business line is managed by the Physical Security and Safety department, which is responsible for four areas:

- designing the Physical security and safety policy for the Crédit Agricole Group;
- managing the Crédit Agricole Group's physical security system;
- providing advice and support (protection of people and property) within the Crédit Agricole Group;
- coordinating and leading the Crédit Agricole Group's physical security and safety business line.

These bodies are responsible for monitoring and evaluating the effectiveness of this policy and related actions.

The topics of health, safety and working conditions fall within the scope of the organisational methods specific to each of the Group entities. In France, within each undertaking, the Health, Safety and Working Conditions Committee, which is part of the Social and Economic Committee, is responsible for dealing with issues relating to these topics. This committee oversees the protection of employee health, contributes to the prevention of workplace risks and helps to improve working conditions.

FRAMEWORKS AND REFERENCES

Crédit Agricole Group's working environment policy is regulated by several reference documents:

- the Code of Ethics, available on the website ⁽¹⁾;
- the Code of Conduct, available on the website ⁽¹⁾;
- the Physical Security and Safety business line is the subject of procedural notes published in October 2018 and implemented within the Group. These documents are available on the Intranet.

Agricole S.A. Human Resources department and then analysed annually in the HR Directors' Committee (Crédit Agricole S.A.) and the Human Resources Committee (FNCA).

⁽¹⁾ <https://www.credit-agricole.com/en/responsible-and-committed/a-responsible-employer>

WORKING ENVIRONMENT POLICY

CONTEXT/AMBITIONS

As a responsible employer, Crédit Agricole Group's commitments to health, safety and security for all its employees are as follows:

- protecting the health, safety and security of employees working on its various sites;
- complying with local regulations and legislation regarding health and safety;
- adapting to new ways of working;
- making it easier to achieve work/life balance.

SCOPE OF APPLICATION

See the "Scope of application" section in part 3.1.2.1 "Human capital development".

CONTENT AND ACTION PLANS

1. Health in the workplace

Work-related risks can have an impact on employee health, resulting in illnesses or accidents. It is the employer's responsibility to eliminate or reduce these risks in order to ensure employee safety and protect their physical and mental health.

Crédit Agricole Group is committed to ensuring good working and employment conditions and to protecting its employees against any form of violence, abuse, work-related harassment or discrimination, and has implemented procedures to prevent and detect such behaviour and resolve these situations, while respecting the rights of individuals. The Group gives employees the possibility of using an internal whistle-blowing mechanism if they witness or are victims of serious events or events contrary to the Code of Conduct and if they have not been able to use normal hierarchical channels for reporting problems (fear of retaliation, pressure from superiors, superiors involved etc.). This system guarantees the anonymity of the person making the report and ensures that there will be no retaliation against them. It is accessible to all Group employees on the corporate website.

For more information on the Group's whistle-blowing platform, see part 4.1.4.4 "Protection of whistle-blowers".

These principles are implemented and supplemented by the entities according to their own environment, operations, challenges and culture.

In France, the entities have a Single Occupational Risk Assessment Document (*Document unique d'évaluation des risques professionnels* – DUERP), which is updated annually in consultation with their Health, Safety and Working Conditions Committee (HSWCC). Based on this document, they define their Annual Programme for the Prevention of Occupational Risks and Improvement of Working Conditions (*Programme annuel de prévention des risques professionnels et d'amélioration des conditions de travail* – PAPRIACT) to reduce the physical and mental risks to which their employees may be exposed. In addition, harassment advisors are also appointed within each Group entity to support the employee and intervene.

Occupational health metrics are available in part 3.1.3.6 "Health and safety metrics" of this report.

2. Safety and security at work

Safety covers all the systems and resources rolled out to deal with unintentional technical, physical, chemical and environmental risks to people and property (accidental fire, weather hazards, workplace accidents etc.).

Security covers all the systems and resources used to combat intentional risks associated with acts intended to harm or damage people and tangible and intangible assets (intrusion, theft, damage etc.).

The Crédit Agricole Group strategy regarding physical safety is based on risk prevention, particularly by training employees to enable them to adopt appropriate behaviour and acquire suitable safety practices.

Keeping employees informed is also a major objective.

3. Work/life balance

Parenthood

Crédit Agricole Group has made a strong commitment to parenthood since it committed at the end of 2025 to granting new fathers, anywhere in the world, paternity leave of 28 calendar days, paid at 100%. These days include days granted for the birth of a child. This commitment is a factor of gender equality at work and is the counterpart to the introduction of fully paid sixteen-week maternity leave throughout the entire Group.

These measures standardise the situation for employees throughout the Group, both in France and abroad, on a minimum basis.

All Crédit Agricole Group employees are covered by maternity leave or paternity leave.

These measures reflect Crédit Agricole Group's commitment to gender equality and work-life balance. In most of the countries where the Group operates, these maternity and paternity leave periods go beyond current local requirements. For more information on gender equality within the Group, see the Diversity policy in part 3.1.2.3 "Diversity" of this report.

Campuses

The Group firmly believes that quality of life and working conditions are a major driver of economic performance and employee engagement. Thus, aware that a pleasant working environment contributes to the well-being of employees, the Group actively integrates nature and biodiversity at its sites.

The Group regularly renovates its sites and campuses to this end.

Social protection

Mindful of the well-being of its employees and of the positive impact of proactive employee benefit policies on the health and social protection of its employees, the Group has developed systems that cover healthcare, disability, invalidity and death throughout its locations worldwide. Each year, Crédit Agricole Group ensures that its systems comply with the local legal requirements in force in each geographical location.

This social protection covers all employees and supports them during major events in their professional and personal lives: illness, unemployment, parental leave (maternity, paternity, adoption), disability/invalidity, death and retirement. It is provided by Crédit Agricole S.A. level schemes, branch agreements of the Crédit Agricole Regional Banks and other bodies, and contracts specific to each Regional Bank and/or public schemes.

This comprehensive approach reflects its desire to offer its employees social protection, enabling them to approach the different stages of their professional and personal lives with peace of mind. It aims to align with local practices in each country, preserve the specific characteristics of each entity while guaranteeing a common basis of protection, and ensure a process of continuous improvement combining social performance and regulatory compliance.

The Global Agreement signed with UNI Global Union on 9 October 2023 formalises commitments in the areas of health, disability, invalidity and death (Article 5.5). This agreement structures the Group's overall approach to social protection.

In France, all employees benefit from comprehensive social protection that goes beyond the legal requirements, including: welfare, supplementary health insurance and retirement.

Internationally, all employees enjoy additional social protection that meets local legal standards and around 90% of Crédit Agricole Group employees benefit from supplementary social protection that exceeds local legal standards (health, disability/invalidity cover, retirement).

Each entity adapts its schemes to local legislation and market practices, guaranteeing health and life insurance coverage for its employees. This approach ensures protection for employees and their dependants in the event of loss of income due to illness, unemployment, maternity/paternity, parental leave, disability/invalidity or death.

Citizen engagement

In France, in line with the national legislation in force, if an employee is a member of the military or national police operational reserve, he or she may benefit from an annual leave allowance of at least ten working days per calendar year.

MANAGEMENT OF IMPACTS, RISKS AND OPPORTUNITIES

As a reminder, the material IROs identified and addressed through the Performance & Compensation topic, as part of the double materiality analysis prior to the drafting of this report, are:

Description of IROs	Positioning in the value chain	Time horizon
Risk		
– Risk to employee attractiveness, retention and engagement due to the compensation policy and employee benefits	Own operations	Invariable
Opportunities		
– Improving attractiveness through ambitious and innovative ⁽¹⁾ ESG practices	Own operations	Invariable

(1) For further information about this opportunity, please refer to the IRO table in part 3.1.2.1 “Human Capital Development policy”.

The risk and opportunity related to the performance & compensation policy are examined during a coordination meeting between the FNCA Human Resources department and the Crédit Agricole S.A. Human Resources department and then analysed annually in the HR Directors’ Committee (Crédit Agricole S.A.) and the Human Resources Committee (FNCA).

PERFORMANCE AND COMPENSATION POLICY CONTEXT/AMBITIONS

Crédit Agricole Group promotes a reward policy based on fairness and common rules for all employees in compliance with the applicable regulatory framework. This policy ensures internal consistency as well as external competitiveness of pay through benchmarks with peers. In particular, it aims to have a positive impact on the Group’s attractiveness and on employee retention, loyalty and engagement.

Thus, Crédit Agricole Group’s ambitions in terms of performance and compensation in all of its locations in France and worldwide are as follows:

- to build loyalty, allow Crédit Agricole S.A. employees to grow and help them to give their best;
- to recognise individual and collective performance over the long term;
- to align the interests of employees with those of the Group and its shareholders;
- to promote a responsible reward policy that provides a framework for risk-taking and complies with the national, European and international legal and regulatory environment in force;
- to promote sound and efficient risk management;
- to guarantee a gender-neutral reward policy.

Additionally, to help promote the engagement of citizens in local democracy and in line with the national legislation in force, in France if an employee is a candidate in local or national elections, he or she may benefit from annual leave up to 20 working days to take part in the electoral campaign.

3.1.2.5 PERFORMANCE AND COMPENSATION

GOVERNANCE

Crédit Agricole Group has a range of compensation policies that allow it to tailor its approach to the needs of its employees, the Group’s various business lines and the relevant regulations.

FRAMEWORKS AND REFERENCES

Each entity’s compensation policy is presented annually in the decision-making bodies.

SCOPE OF APPLICATION

See the “Scope of application” section of part 3.1.2.1 “Human capital development”.

Each entity may also apply other compensation principles.

CONTENT AND ACTION PLANS

1. Compensation

Crédit Agricole Group has defined a responsible reward policy in line with the mutualist values of the Group, based on fairness and rules common to all employees. The reward policy is one of the three founding principles of the Group Human Project: empowering employees, strengthening customer relations and fostering an atmosphere of trust. This policy includes provisions on gender neutrality and processes aimed at reducing any compensation gaps. The reward policy for Crédit Agricole Group employees is composed of fixed, variable and peripheral elements, corresponding to various targets. Each employee receives all or part of these elements based on their level of responsibility, skills and performance.

In terms of collective variable compensation, incentive and profit-sharing agreements combined with employer matching systems mean employees can be directly involved in the annual results of their entities. This is one of the pillars of the Group’s social pact.

Compensation metrics are available in part 3.1.3.7 “Compensation metrics” of this report.

2. Gender equality at work in terms of compensation

Crédit Agricole Group's compensation policies are gender-neutral, with particular attention paid to ensuring equal pay for women and men. To measure these gaps, in France the Group uses the gender equality at work index, established by the French government, by calculating and monitoring:

- the gender pay gap;
- the gap in the breakdown of individual raises by gender;
- the gender gap in promotions;
- the number of female employees receiving a raise after returning from maternity leave;
- the number of people of the under-represented gender in the top 10 highest earners.

This index is supported by a proactive approach: depending on the results and any gaps identified, the Group allocates a dedicated budget in France to work towards reducing these gaps.

As such, over the period covered by the "Ambitions 2025" MTP, the measures dedicated by Crédit Agricole S.A. to equal pay between women and men have led to an increase in total payroll of €30 million. In 2025, the entities of Crédit Agricole S.A. achieved an average score of 90/100, up two points compared with 2024.

For the Regional Banks, the average score for the branch is 90/100 in 2025, stable compared with the previous year.

The Group is also committed to reducing the pay gap between women and men in all of its locations, and complies with local requirements in this area, in particular, the Pay Transparency Directive adopted on 30 March 2023, which will be transposed in all European Union countries.

Gender pay gap metrics are available in part 3.1.3.7 "Compensation metrics" of this report.

3. Ratio of the remuneration of the highest-paid person to the median remuneration of employees

The equity ratio, as defined by France's Law on Business Growth and Transformation (*Plan d'action pour la croissance et la transformation des entreprises* – the PACTE legislation), for Crédit Agricole S.A. can be consulted in Chapter 3, part 4.4.3.4 "Comparative approach to compensation" of the Universal Registration Document.

The ratio of the highest to median earnings is available in part 3.1.3.7 "Compensation metrics" of this report.

4. Adequate wages

Crédit Agricole Group's aim is to offer its employees attractive, motivating compensation packages that enable it to retain the skills the Group needs. Through its Group Human Project, Crédit Agricole Group promotes a reward policy based on fairness and common rules for all employees in compliance with the applicable regulatory framework. This policy ensures internal consistency as well as external competitiveness of compensation through comparative analyses carried out with peers. This is reflected, in particular, in compensation and benefits that ensure an appropriate standard of living for the individuals concerned and their families under equitable conditions and that are consistent with risk management targets.

The Group applies the recommendations of the standard to calculate an adequate wage based on national minimum wages, where they exist, and on benchmarks proposed by the Fair Wage Network, an internationally recognised external organisation. When the Fair Wage Network benchmark is used, the adequate wage determined corresponds to the wage that allows workers and their families, depending on their geographical location, to have an acceptable standard of living while participating in social and cultural life. It aims to cover the basic needs of a family, including all necessary areas of expenditure, and in particular: housing (according to UN-Habitat criteria), food (enough to ensure 2,200-3,000 kilo-calories/adult/day), child care, education, healthcare, transport, communication, and a percentage left over for leisure and/or for precautionary savings in order to meet any unforeseen expenses.

Adequate wage metrics are available in part 3.1.3.3 "Adequate wages" of this report.

3.1.3 QUANTITATIVE DATA AND TARGETS

3.1.3.1 COLLECTIVE BARGAINING COVERAGE AND SOCIAL DIALOGUE

COLLECTIVE BARGAINING COVERAGE AND SOCIAL DIALOGUE

Coverage Rate	Collective Bargaining Coverage		Social dialogue
	Employees – EEA	Employees – Non-EEA	Workplace representation (EEA only)
	(For countries with >50 empl. representing >10% total empl.)	(Estimate for regions with >50 empl. representing >10% total empl.)	(For countries with >50 empl. representing >10% total empl.)
	2025		
0-19%			
20-39%			
40-59%			
60-79%			
80-100%	France		France
	2024		
0-19%			
20-39%			
40-59%			
60-79%			
80-100%	France		France

Scope covered: countries with more than 50 employees representing more than 10% of the total number of employees, it being specified that 100% of Crédit Agricole S.A. and its subsidiaries' employees are covered by the Global Agreement concluded on 9 October 2023.

Data restatement: the data required for the publication of collective bargaining coverage and social dialogue are limited to countries with more than 50 employees representing more than 10% of Crédit Agricole S.A.'s total employees.

In the table above, the 2024 data have been adjusted to reflect this clarification and therefore cover France only.

These tables cover all employees (both active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Energies (Transitions & Energies), CAMCA, Crédit Agricole Technologies & Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in natural persons at 31 December 2024 and 2025.

The level of collective bargaining coverage at the country level is closely linked to the national legal provisions in force. The same applies to workplace representation, which depends in particular on the number of employees and their willingness to get involved. In France, all Crédit Agricole Group employees are covered by collective bargaining coverage. In any event, Crédit Agricole Group promotes social dialogue across all its entities.

The European Economic Area (EEA) comprises 30 countries: the 27 members of the European Union, plus Iceland, Norway and Liechtenstein. A collective bargaining agreement is defined as any written agreement relating to working conditions concluded between an employer, a group of employers or one or more employers' organisations on the one hand, and one or more organisations representing the employees on the other, or, in the absence of such organisations, the representatives of the workers concerned, duly elected and mandated by the latter in accordance with national legislation. This agreement or convention may be concluded at the establishment level, company level, branch level or any other level chosen by the signatories, for example: sector-specific, national, branch or company collective bargaining agreements etc.

According to the applicable national legislation, an employee representative and/or trade union representative is defined as a company employee, appointed or elected to represent and defend the interests of employees in dealings with the employer. The employee representative may also be appointed or elected by a trade union organisation or its members, in accordance with the applicable national provisions. They may have special rights (e.g. information and consultation rights) and may conclude collective agreements. Exercise of these representative functions is guaranteed by the applicable national legislation, for example: works councils, staff delegate, trade union delegate, staff delegation.

AGREEMENTS SIGNED BY TOPIC

	France		Other countries	
	2025	2024	2025	2024
Compensation and benefits	192	172	31	37
Training	12	13	12	12
Employee representative bodies	19	22	11	5

Health and safety	34	29	9	8
Other	70	104	11	32
TOTAL NUMBER OF AGREEMENTS SIGNED	469	443	114	116

Scope covered: 100%.

This table lists, by topic, the number of corporate agreements or amendments signed by Crédit Agricole Group in 2024 and 2025, testifying to the momentum of its social dialogue.

For further information on the measures implemented with regard to social dialogue, please refer to part 3.1.2.2 “Social dialogue policy”, section “Content and action plans” and “Collective bargaining coverage and social dialogue” of this report.

3.1.3.2 DIVERSITY

BREAKDOWN OF TOP MANAGEMENT BY GENDER

	2025		2024	
	In number of individuals	As a %	In number of individuals	As a %
Breakdown of Top Management	787	100.00%	782	100.00%
Women	195	24.78%	188	24.04%
Men	592	75.22%	594	75.96%
Other*	-	-	-	-
Not reported	-	-	-	-

* Gender as specified by the employees themselves
Scope covered: 100%.

For Crédit Agricole Group, Top management includes the Chief Executive Officers, Deputy General Managers and Directors approved through internal processes.

The efforts made to achieve diversity in strategic talent pools are in line with the ambitions of the Crédit Agricole Group.

Data restatement: data for 2024 has been corrected as regards the CSRD scope.

For further information on the actions implemented with regard to gender equality at work, please refer to part 3.1.2.3 “Diversity policy”, section “Content and action plans”, “1. Gender equality at work” of this report.

BREAKDOWN OF EMPLOYEES BY AGE (IN FTE)

	2025	2024
Under 30:	23,111.43	23,335.02
of which <25	4,784.21	5,172.81
of which 25-30	18,327.22	18,162.21
Between 30 and 50:	89,118.63	88,471.79
of which 30-34	20,578.44	20,624.25
of which 35-39	22,321.84	22,412.52
of which 40-44	23,817.76	24,155.78
of which 45-49	22,400.59	21,279.23
Over 50:	47,155.14	45,105.23
of which 50-54	20,395.46	19,748.90
of which 55-59	17,088.14	16,706.63
of which 60-64	8,995.09	7,992.72
of which ≥ 65	676.45	656.97
Not reported:	815.00	802.00
TOTAL	160,200.20	157,713.98

Scope covered: 100%.

This table covers all employees (active and inactive), across all age groups, on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in full-time equivalent (FTE) at 31 December 2024 and 2025. The “not reported” line indicates countries where the collection of age-related data is prohibited (notably the United States).

For age, the calculation formula used is: (Reference date – Date of birth) / 365.25 (the reference date being the last day of the month).

For further information on the actions implemented with regard to intergenerational collaboration, please refer to part 3.1.2.3 “Diversity policy”, section “Content and action plans”, “2. Intergenerational commitment” of this report.

YOUTH PLAN METRICS

	2025	2024
Total number of young people welcomed	24,794	23,519

Scope covered: 100%.

This metric records the number of young people under the age of 30 within Crédit Agricole Group at 31 December 2024 and 2025 (date of birth after 1 January 1995) who are on contracts other than permanent contracts (work-study students, interns, Industrial Agreements for Training through Research, international volunteers, seasonal employees and fixed-term contracts). The figure is expressed in natural persons.

As a reminder, as part of the 2022-2025 MTP, the Group committed to welcoming and training more than 50,000 young people by 2025. In total, since the start of the 2022-2025 MTP, more than 88,700 young people have been welcomed.

The calculation formula used is: young employees at end-January N + new hires between February and end-December N.

Whatever the employment context, Crédit Agricole Group remains an employer that trains young people.

For more information on the Youth Plan, refer to part 3.1.2.3 “Diversity policy”, section “Content and action plans”, “2. Intergenerational commitment” of this report.

3.1.3.3 ADEQUATE WAGES

EMPLOYEES EARNING ABOVE THE ADEQUATE WAGE IN EACH COUNTRY (%)

	2025	2024
Percentage of employees earning above the adequate wage in each country	100.00%	100.00%

Scope covered: 100%.

This table covers all employees on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), expressed in natural persons at 31 December 2024 and 31 December 2025.

Definitions:

- **Employee for the sole purposes of this “adequate wage” metric:** a person bound to the undertaking by an employment contract who receives a wage in return for work performed. Employees who are temporarily not performing any actual work may receive compensation; these employees (classified as inactive) are not included in the above definition of employees receiving a wage in return for actual work.

Data restatement: in year N-1, both active and inactive employees were taken into account. In view of the precise definition of the term employee, we felt it necessary to refine our publication of metrics and to adopt a single definition of employees (which excludes inactive employees). In the table above, the N-1 data has been corrected to reflect this precise definition.

- **Wage:** the theoretical gross annual wage paid over the year. For part-time employees or those joining the entity during the year, the gross annual wage paid over the year has been adjusted to 100% (full-time equivalent).
- **Adequate wage:** in the absence of a legal definition, Crédit Agricole Group has adopted the definition of the Fair Wage Network, an internationally recognised external organisation (for more information on the adequate wage, refer to part 3.1.2.5 “Performance and compensation” of this report). The adequate wage used by the Group corresponds to the adequate wage for a family of two adults and a number of children corresponding to the country’s fertility rate, adjusted for the number of workers in the household.

For further information on the actions implemented with regard to adequate wages, please refer to part 3.1.2.5 “Performance and compensation policy”, section “Content and action plans”, “4. Adequate wages” of this report.

3.1.3.4 DISABILITIES**EMPLOYEES WITH DISABILITIES**

	2025	2024
Percentage of employees with disabilities*	5.81%	5.10%

* France scope, i.e. 72.33% of the workforce

This metric covers all employees (both active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive

corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), in France, expressed in natural persons at 31 December 2024 and 2025.

For more information on the actions implemented with regard to disabilities, refer to part 3.1.2.3 “Diversity policy”, section “Content and action plans”, “4. Disabilities” of this report.

3.1.3.5 TRAINING AND SKILLS DEVELOPMENT METRICS**PERFORMANCE AND CAREER DEVELOPMENT REVIEWS**

	2025	2024
Percentage of active employees participating in regular performance and career development reviews (in %)	88.70%	87.95%
Women	88.13%	87.75%
Men	89.41%	88.19%
Other*	-	-
Not reported	-	-
Percentage of employees participating in regular performance and career development reviews (in %)	87.54%	86.85%
Women	86.48%	86.23%
Men	88.88%	87.64%
Other*	-	-
Not reported	-	-

* Gender as specified by the employees themselves.
Scope covered: 100%.

This table covers all employees (both active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in natural persons at 31 December 2024 and 2025.

Appraisal campaigns are largely rolled out within Crédit Agricole Group, which pays particular attention to the skills development of its employees and to feedback. It is a key moment of the year between employees and their manager.

Metrics are calculated from 1 January to 31 December, it being understood that:

- annual appraisal campaigns run from November of year N-1 and end at the latest in March of year N for Crédit Agricole S.A.;
- some employees do not have interviews, for example in specific situations such as sick leave, maternity leave, retirement during the interview period, or new hires (less than three months' seniority).

For more information on the actions implemented with regard to appraisals, refer to part 3.1.2.1 “Human capital development policy”, section “Content and action plans”, “2. Professional assessment” of this report.

TRAINING TIME

	2025	2024
Average number of training hours per employee:	37.61	37.77
Women	37.37	37.83
Men	37.92	37.70
Others*	-	-
Not reported	-	-
TOTAL NUMBER OF TRAINING HOURS	6,187,621.49	6,111,439.20

* Gender as specified by the employees themselves.
Scope covered: 100%.

This table covers all employees (both active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in natural persons at 31 December 2024 and 2025.

Training includes in-person, e-learning and regulatory training. As soon as an action meets the following two criteria, it is counted as a training action: a clearly identified skills target and minimum traceability (actual or fixed).

In 2025, 100% of employees completed at least one training course, as in 2024.

For more information on the actions implemented as part of training, refer to part 3.1.2.1, “Human capital development policy”, section “Content and action plans,” “1. Training” of this report.

TRAINING TOPICS

	2025				2024			
	Total hours	%	o/w France	o/w other countries	Total hours	%	o/w France	o/w other countries
Hard skills training	3,753,662	60.91%	2,850,397	903,265	3,640,063	60.60%	2,780,381	859,682
Soft skills training	919,206	14.92%	499,526	419,680	870,172	14.49%	480,490	389,682
Regulatory training	1,354,347	21.98%	961,193	393,153	1,259,751	20.97%	938,770	320,981
CSR & sustainable development training	135,339	2.20%	97,507	37,832	236,621	3.94%	190,523	46,098

Scope covered: 100%.

This table covers all employees (both active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies & Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in natural persons at 31 December 2024 and 2025.

Hard skills training covers all business-related training; Soft skills training covers training in efficiency, leadership/management, personal development and training provided by the digital platform; regulatory training covers all mandatory business-related training, as well as training in ethics, anti-money laundering,

combating the financing of terrorism etc. Lastly, CSR & Sustainable Development training covers all training courses in these fields taken by the business lines. As a reminder, 100% of Crédit Agricole Group Directors and employees must have taken these training courses (see part 3.1.2.1, section on “Human capital development”, “Human capital development policy”, “Content and action plans”, “Training” and “Supporting the Societal Project”).

As a reminder, mandatory training courses – including those on CSR – are classified as regulatory training courses. The decline in the completion rate of other CSR training courses is due to the end of the “CSR for All” campaign in 2025.

For more information on the actions implemented as part of training, refer to part 3.1.2.1, “Human capital development policy”, section “Content and action plans,” “1. Training” of this report.

PROMOTIONS IN FRANCE

	2025		2024	
	Total	%	Total	%
Total promotions in France	10,501	100.00%	11,182	100.00%
Women	6,046	57.58%	6,596	58.99%
Men	4,455	42.42%	4,586	41.01%

Scope covered: France (i.e. 72.33% of the workforce)

This table covers active employees on permanent contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), in France, expressed in natural persons at 31 December 2024 and 2025. It should be noted that employees who left the company during the year but were promoted are included: this is a count of the number of promotions, not the number of people promoted, as an employee may be promoted several times during the year.

Promotions of active employees on permanent contracts during the year are defined as promotions resulting in a change of classification (managers/non-managers) and/or a change of classification level within one of these two classifications, for Crédit Agricole S.A.'s collective bargaining agreements. Under the national collective bargaining agreement for the Regional Banks of Crédit Agricole, promotions correspond to upward changes in job classification level (*position de classification de l'emploi* – PCE).

For more information on the actions implemented with regard to career development, refer to part 3.1.2.1 “Human capital development policy”, section “Content and action plans”, “3. Career Management within the Group” of this report.

HIRING & MOBILITY

	2025					
	Women	Men	Other*	Not reported	Total (NP)	Total (%)
Permanent hires	6,298	5,829	-	-	12,127	100.00%
Of which external hires	4,646	4,589	-	-	9,235	76.15%
Of which hired following a previous contract with the Group (fixed-term contract, work-study, internship etc.)	1,652	1,240	-	-	2,892	23.85%
Of which under 30	3,175	2,855	-	-	6,030	49.72%
Of which between 30 and 50	2,732	2,574	-	-	5,306	43.75%
Of which over 50	352	326	-	-	678	5.59%
Of which age not reported	39	74	-	-	113	0.93%
Of which hired in France	4,669	4,142	-	-	8,811	72.66%
Of which hired outside France	1,629	1,687	-	-	3,316	27.34%
Internal mobility on permanent contracts (between and within entities)	15,032	11,146	-	-	26,178	100.00%

	2024					
	Women	Men	Other*	Not reported	Total (NP)	Total (%)
Permanent hires	6,500	5,772	-	-	12,272	100.00%
Of which external hires	4,460	4,301	-	-	8,761	71.39%
Of which hired following a previous contract with the Group (fixed-term contract, work-study, internship etc.)	2,040	1,471	-	-	3,511	28.61%
Of which under 30	3,234	2,888	-	-	6,122	49.89%
Of which between 30 and 50	2,865	2,427	-	-	5,292	43.12%
Of which over 50	353	370	-	-	723	5.89%
Of which age not reported	48	87	-	-	135	1.10%
Of which hired in France	4,669	3,938	-	-	8,607	70.14%
Of which hired outside France	1,831	1,834	-	-	3,665	29.86%
Internal mobility on permanent contracts (between and within entities)	17,392	12,685	-	-	30,077	100.00%

* Gender as specified by the employees themselves.

These tables cover active employees on permanent contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies et Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in natural persons at 31 December 2024 and 2025.

The organisations are in a stabilisation phase after acquisitions that took place within the Crédit Agricole S.A. perimeter. In addition, external recruitment flows outside of the Youth Plan are closely monitored.

Definitions:

- **Permanent hires:** these include direct external hires on permanent contracts and interns transitioned to permanent contracts, work-study students, seasonal employees, international volunteers, employees under industrial agreements for training through research, and fixed-term employees into permanent contracts, i.e. interns, work-study students, seasonal employees,

international volunteers, employees under industrial agreements for training through research, and fixed-term employees contracts whose contracts were converted into permanent contracts during the year. This conversion must take place within three months of the end of their internship, work-study, seasonal, international volunteer, industrial agreement for training through research, or fixed-term contract if it concerns the same entity as their previous contract.

- **Permanent-contract mobility:** this covers both intra- and inter-entity mobility:
 - intra-entity mobility: change of job and/or assignment within the same entity (excluding reorganisation, administrative modification, change of job reference framework, relocation etc.);
 - inter-entity mobility within Crédit Agricole Group.

For more information on the actions implemented with regard to career development and recruitment, refer to part 3.1.2.1 “Human capital development policy”, section “Content and action plans”, “3. Career Management within the Group” of this report.

3.1.3.6 HEALTH AND SAFETY METRICS

HEALTH AND SAFETY MANAGEMENT SYSTEM COVERAGE, WORKPLACE ACCIDENT INCIDENTS AND STAFF HEALTH PROBLEMS

	2025	2024
Percentage of workforce covered by the health and safety management system (%)	97.29%	96.65%
Number of deaths due to work-related accidents or illnesses	2.00	4.00
Number of workplace accidents	1,840.00	1,782.00
Frequency rate: number of accidents per 1,000,000 hours worked	7.13	5.71
Number of cases of work-related illness	33.00	27.00
Number of days of absence due to work-related accidents and illnesses	48,619.00	58,040.00
Severity rate: number of days lost due to work-related accidents and illnesses per 1,000 hours worked	0.19	0.19

The coverage ratio for this metric is over 90%. For the Regional Banks, the data is calculated only for credit institutions.

In this table, the metrics relating to the percentage of workforce covered by the health and safety management system, the frequency rate and the severity rate cover all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers for the scope of Crédit Agricole S.A., CA-GIP, BforBank, Crédit Agricole Transitions & Énergies (Transitions & Énergies), CAMCA, Crédit Agricole Technologies & Services (Technologies & Services) and Crédit Agricole Immobilier, as well as executive corporate officers of the Regional Banks, excluding Directors for the entire Crédit Agricole Group scope), expressed in natural persons at 31 December 2024 and 2025. The other metrics (number of deaths, number of workplace accidents and number of work-related illness) are expressed in number of cases recorded over the period (2024 and 2025).

Definitions:

- **Days of absence:** in working days. The number of days lost is calculated by including the first and last full days of absence. Only calendar days should be taken into account: days on which the person concerned is not expected to work (e.g. weekends, public holidays) are therefore not counted as lost days.
- **Work-related accidents rejected by the MSA/Social Security (France):** if the work-related accident has been rejected by the MSA/Social Security and there is no appeal, it is not included in the statistics. On the other hand, if the MSA/Social Security has not yet made a decision or if the MSA/Social Security's decision to reject the claim is contested, the work-related accident is included in the statistics because it has in fact been declared.

For further information on the actions implemented with regard to employee health, please refer to part 3.1.2.4 “Working environment policy”, section “Content and action plans”, “1. Health in the workplace” of this report. Measures relating to parenthood are available in part 3.1.2.4 “Working environment policy”, section “Content and action plans”, “3. Work/life balance” of this report.

3.1.3.7 COMPENSATION METRICS

GENDER PAY GAP

		2025		
	Employee categories	Pay gap	Female employees	Male employees
Total Crédit Agricole S.A.		31.68%	52.40%	47.60%

Specialised Financial Services		22.90%	56.20%	43.80%
		2023		
	Employee categories	Pay gap	Female employees	Male employees
Crédit Agricole Regional Banks	Total	9.96%	60.71%	39.30%
		2022		
	Employee categories	Pay gap	Female employees	Male employees
Total Crédit Agricole S.A.		32.50%	52.90%	47.10%
Retail Banking in France	Total	13.80%	60.90%	39.10%
	<i>O/w managers:</i>	<i>9.90%</i>		
	<i>O/w non-managers:</i>	<i>0.80%</i>		
International Retail Banking		27.70%	54.70%	45.30%
Asset Gathering		27.90%	46.60%	53.40%
Large Customers division		32.90%	45.20%	54.80%
Specialised Financial Services		22.90%	56.20%	43.80%
		2021		
	Employee categories	Pay gap	Female employees	Male employees
Crédit Agricole Regional Banks	Total	11.26%	60.80%	39.20%

Scope covered: 90%

These tables cover all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), excluding entities in the process of being sold, at 31 December 2024 and 2025. The metrics are expressed as a gap percentage. The compensation taken into account in this calculation includes fixed annual compensation (FAC), individual variable compensation (IVC) and collective variable compensation (CVC), as well as recurring bonuses. For part-time employees, the gross annual wage paid over the year has been adjusted to 100% (full-time equivalent).

The coverage ratio for this metric is over 90%.

The calculation formula used is: (Average gross annual compensation level for male employees – average gross annual compensation level for female employees)/Average gross annual compensation level for male employees x 100.

The gender pay gap within Crédit Agricole S.A. was 31.68% in 2025. This gap is mainly due to the difference in gender distribution in the main business lines. We find a higher proportion of women in the Retail Banking and Specialised Financial Services business lines, where absolute pay levels are generally lower than in other business lines in the financial industry. By contrast, we find a higher proportion of men in the banking business lines dedicated to Large Customers and to Asset Gathering, where absolute pay levels are higher than in the previously mentioned business lines.

In Crédit Agricole S.A.'s French retail banking division, the pay gap was 13.92% in 2025.

The gender pay gap within Crédit Agricole Regional Banks was 8.35%. This gap is mainly observed within the managerial category. This is explained by a higher proportion of men in the highest classification levels within this category. However, when examined by classification level rather than by category, the gender pay gaps between men and women are smaller (see the sustainability reports of the 13 Regional Banks published this year).

Definitions:

- **Fixed annual compensation (FAC):** corresponds to the theoretical gross annual wage paid over the year.
- **Collective variable compensation (CVC):** corresponds to collective variable compensation (profit-sharing, incentives, matching contributions) paid during the year in respect of the previous year to employees present at the end of the period.
- **Individual variable compensation (IVC):** corresponds to compensation linked to the employee's individual performance, such as bonuses, sales commissions or other variable target-based elements.

For more information on the measures implemented with regard to employee compensation, please refer to part 3.1.2.5 "Performance and remuneration policy", section "Content and action plans", "1. Compensation" of this report.

COMPENSATION RATIO

	2025	2024
Ratio of the pay of the highest-paid person to the median pay of employees: Crédit Agricole Regional Banks	13.15	13.02
Ratio of the pay of the highest-paid person to the median pay of employees: Crédit Agricole S.A.	44.61	48.60

This metric covers all employees (active and inactive) on permanent and fixed-term contracts (including executive corporate officers, excluding Directors), excluding entities in the process of being sold, at 31 December 2024 and 2025. The metric is expressed as a gap ratio. The compensation taken into account in this calculation includes fixed annual compensation (FAC), individual variable compensation (IVC) and collective variable compensation (CVC). For part-time employees, the gross annual wage paid over the year has been adjusted to 100% (full-time equivalent). The median annual total remuneration of all employees excludes the highest-paid person

The coverage ratio for this metric is over 90%.

The calculation formula used is: (gross fixed wage + individual variable + collective variable of the highest-paid person)/median annual total remuneration (FAC+IVC+CVC) of all employees (permanent and fixed-term contracts, excluding executive corporate officers and the highest-paid person).

The ratio between the highest and median compensation of employees at Crédit Agricole S.A. is 44.61 to one. Crédit Agricole S.A. is the listed entity, the parent company for all the Group's business line subsidiaries and the corporate centre of Crédit Agricole Group. This ratio reflects a moderate compensation policy. Details of the equity ratios for Crédit Agricole S.A.'s executive corporate officers, as provided for in the PACTE law, are presented in Chapter 3, part 4.4.3.4 "Comparative approach to compensation" of the Universal Registration Document.

The ratio between the highest compensation and the median compensation of employees of the Crédit Agricole Regional Banks is calculated at the FNCA level based on data provided directly by the respective Banks.

Data restatement: Information regarding this ratio for the year 2024 has been recalculated following this method.

For more information on the measures implemented with regard to employee compensation, please refer to part 3.1.2.5 "Performance and remuneration policy", section "Content and action plans", "1. Compensation" of this report.

EMPLOYEE SHAREHOLDING

	2025	2024
Capital held by employees and former employees	6.55%	6.53%

The employee shareholding rate includes all capital held through Crédit Agricole Group employee savings schemes, including the Regional Banks (irrespective of the account custodian, i.e. Amundi ESR, CA Titres and Uptevia for international employee shareholders). The annual offer to subscribe to Crédit Agricole S.A. share capital is made to Group employees and retirees in 23 countries, representing more than 90% of Crédit Agricole Group employees. Employee and former employee shareholdings published on 31/12/N correspond to the balance recorded on that date in the various employee share ownership vehicles (Group FCPE and direct share ownership by international employees).

For more information on the measures implemented with regard to employee compensation, please refer to part 3.1.2.5 "Performance and remuneration policy", section "Content and action plans", "1. Compensation" of this report.

3.1.3.8 INCIDENTS, COMPLAINTS AND SEVERE HUMAN RIGHTS IMPACTS**WORK-RELATED HUMAN RIGHTS INCIDENTS AND SANCTIONS WITHIN THE WORKFORCE**

	2025	2024
Total number of reported incidents of discrimination and harassment (proven or unproven)	311	225
Number of complaints and claims filed concerning working conditions, equal treatment and opportunities for all, and other work-related rights, excluding incidents of discrimination and harassment	137	121
Through channels that allow the corporate workforce to raise concerns/complaints:	137	121
Through National Contact Points for the OECD Guidelines for Multinational Enterprises:	0	0
Total amount of fines, penalties and compensation paid for damages resulting from the complaints and claims described above	404,223	830,251
Of which the amount relates to incidents that have occurred	0	0
Reconciliation with the most relevant amount presented in the financial statements (employee expenses included in the "Operating expenses" and detailed in the "Notes to the financial statements" of Chapter 6 of the URD pertaining to the consolidated financial statements)	17,163,000,000	16,350,000,000
Number of serious human rights incidents affecting the corporate workforce	0	0
Of which, number of cases of non-compliance with the UN Guiding Principles on Business and Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, or the OECD Guidelines for Multinational Enterprises	0	0
Total fines, penalties and compensation paid for serious human rights issues and incidents	0	0
Of which the amount relates to incidents that have occurred	0	0
Reconciliation with the most relevant amount presented in the financial statements (employee expenses included in the "Operating expenses" and detailed in the "Notes to the financial statements" of Chapter 6 of the URD pertaining to the consolidated financial statements)	17,163,000,000	16,350,000,000

Scope covered: 100%.

Only incidents and complaints that have been investigated are included in this table, via multiple sources (dedicated tool, litigation, dedicated contact persons, HR department etc.).

Only the amounts for definitively completed projects are shown here.

Definition of "serious incidents recorded": incidents of discrimination, harassment or human rights violations (e.g. forced labour, human trafficking or child labour). These incidents are the result of legal proceedings, formal complaints or serious allegations concerning

the undertaking's workforce (permanent employees, fixed-term employees and interns, excluding contractors/purchasers), the circumstances of which the undertaking does not contest by any means whatsoever (press release, litigation etc.). These incidents must have a strong impact in terms of image/reputational risk for the entity and come from an external source (e.g. public reports, press articles, TV broadcasts, a complaint filed against the entity by an advocacy association etc.).

3.2. CONSUMERS AND END-USERS

3.2.1 STRATEGY

At the heart of Group Crédit Agricole's business model since it was founded, utility and universality are now essential values in an environment of profound societal changes that generate uncertainty and require support and inclusion for all. These commitments are reinforced in the 2028 medium-term strategic plan, which aims in particular to amplify our impact in order to support regional vitality and a just transition.

This part addresses two main themes: the accessibility of offers to all customers, and the protection of customers and their data.

The societal benefits that underpinned Crédit Agricole's emergence as a major financial institution have been particularly obvious in recent years. Whether it is by supporting all customers during the health crisis or in the unsettled context of inflation, Crédit Agricole stands by its customers and supports them at every stage of their lives.

At the same time, the universality of Crédit Agricole, based on its cooperative and mutualist values, means that it serves everyone, in every region, and responds to all the financial concerns of its customers through all channels.

As a result, the Group, through all of its subsidiaries, offers all its products and services to all its customer segments so that all players in the economy and the regions are assisted and supported in current and future transformations.

This combination of social utility and universality is reflected in the social strategy that the Group has adopted with regard to its customers:

1. **offering a range of products that does not exclude any customer** in order to promote social and financial inclusion, through products that are accessible to everyone no matter their financial situation, the continued digitisation customer journeys with a view to achieving omnichannel capabilities, a renewed commitment to young people and customers facing difficult circumstances, as well as a avoidance policy for insured persons;
2. **reducing social inequalities** through the arrangement of social bonds and investment in social housing, the support of actors with an impact from the social and solidarity economy and the promotion of initiatives with a societal stake.

The accessibility of products is an integral part of the Group's strategy and is in line with commitment number 4 of the Societal Project: Offer a range of products and services that do not exclude any customer, in order to foster social and digital inclusion and adapt to economic and societal trends.

At the same time, the Crédit Agricole Group strives to protect its customers and their legitimate interests through a transparent and fair relationship and advice focused on customer needs and satisfaction. The Compliance department is implementing these ambitions through the "Smart Compliance for Society" approach and its three pillars: the Societal Project, the Customer Project and the Human Project. In particular, the Customer Project contributes to the protection of customers and their data.

The customer protection and personal data protection systems are described in part 3.2.2.3 "Protection of customers and personal data".

3.2.1.1 INTERESTS AND VIEWS OF CONSUMERS AND END-USERS

It is crucial for the Group to place customer relations at the heart of its banking processes. The Customer, Development and Innovation division is responsible for ensuring that this dialogue takes place and that its results underpin the Group's strategic approach.

This dialogue is based on systems implemented with a representative sample of customers from all markets: individual customers, high-net-worth individuals, SMEs, farmers and undertakings. It is conducted directly with the end consumers concerned or their legitimate representatives. The overall stakeholder engagement mechanism is described in part 1.3.2 "Interests and views of stakeholders". The diversity of the channels used and their regular implementation make it possible to assess the effectiveness of the dialogue.

These discussions enable Crédit Agricole Group to identify customer issues and expectations so that it can respond to the questions raised and follow up on them. The Group's responses are detailed in part 1.3.2 "Interests and views of stakeholders" of this report. Customer requests are taken into account in the development of the Group's strategy.

As mentioned in part 1.3.2 "Interests and views of stakeholders", Crédit Agricole Group has implemented several consultation and participation mechanisms to take its customers' interests and views into account in its decisions and activities:

- **monitoring customer satisfaction** measured by the Net Promoter Score (NPS): an annual satisfaction survey designed to reinforce relational excellence by identifying and dealing with the main reasons for customer complaints or inconveniences;
- **taking customer expectations into account** (barometers, marketing studies, co-construction workshops):
 - regular national and regional surveys: a national survey is conducted every two years to identify changes in customer expectations and the appearance of any new expectations or the evolution of those previously considered "weak signals",
 - conducting an annual CSR barometer survey of around 2,500 customers and non-customers to identify French people's concerns and expectations in terms of CSR and assess the impact on the perceived commitment of undertakings,
 - "Voix du Client" (Voice of the Customer) system within Crédit Agricole Assurances, designed to manage the resolution plan for all customer inconveniences identified,
 - proactivity and frequency of regular contact in order to maintain a close, human relationship with customers,
 - approximately 12.1 million customers who are mutual shareholders elect over 27,000 Directors each year, thereby representing the voice of customers through the General Meetings of the Local Banks;
- **development of an innovation ecosystem** (Villages by CA, Data Lab, La Fabrique by CA, management companies specialising in innovation, Lab Impact by LCL, LCL co-tenant of Climate House).

Channels dedicated to whistleblowers and related policies are discussed in part 4.1.4.4 "Protection of whistle-blowers".

3.2.1.2 MATERIAL IMPACTS, RISKS AND OPPORTUNITIES AND THEIR INTERACTION WITH THE STRATEGY AND BUSINESS MODEL**SIGNIFICANT ACTUAL AND POTENTIAL IMPACTS, RISKS AND OPPORTUNITIES FOR CONSUMERS AND END-USERS**

Description of IROs	Positioning in the value chain	Time horizon
ACCESSIBILITY OF PRODUCTS AND SERVICES		
Positive impact		
– Positive impact on the economically disadvantaged and/or people with disabilities due to accessible and inclusive offerings	Downstream	Short-term
Negative impacts		
– Negative impact on certain categories of customers due to a lack of transparency and clarity in offerings (leading to exclusion and financial insecurity for the customers concerned)	Downstream	Short-term
– Negative impact on certain categories of customers caused by unsuitable offerings and/or the refusal of customer requests (exclusion, precariousness)		
CYBERSECURITY AND COMBATING CYBERCRIME		
Negative impact		
– Negative psychological impact or impact on daily life (such as identity theft) resulting from a breach of our customers' data protection	Downstream	Long-term
Risk		
– Financial risk following an inability to provide essential services and the associated operational cost to remedy the situation	Downstream	Long-term
CUSTOMER PROTECTION		
Positive impact		
– Positive impact on society related to products and services that are adapted to customer needs and circumstances (banking inclusion, product governance), contributing to social cohesion	Downstream	Medium-term
Risk		
– Regulatory risk related to products and services that are insufficiently adapted to customer needs and circumstances (banking inclusion, product governance)	Downstream	Medium-term
PERSONAL DATA PROTECTION		
Risks		
– Reputational risk in the event of leaks, theft or inappropriate use of personal data	Entire value chain	Medium-term
– Regulatory risk related to non-compliance with personal data protection regulations	Entire value chain	Medium-term

Consumers and end-users on whom the undertaking is likely to have material impacts are taken into account in ESRs 2 as "customers". The Group's customers include individuals, SMEs, entrepreneurs, undertakings, associations and local authorities.

The impacts, risks and opportunities are linked to the Group's business model, in particular through:

- the need for the Group to fully assume its mutual-interest and universal banking role by making its products and services accessible to the most vulnerable people;
- the competitive advantage that improving the image of Crédit Agricole represents in social issues;
- the legal obligation to protect customers and their personal data.

Certain customer segments are identified as more vulnerable, such as the financially vulnerable, the young, and the elderly.

These customers may be exposed to specific negative impacts, particularly in terms of personal data protection, non-discrimination, or when they do not have clear and accessible information about products and services, which may lead to inappropriate or high-risk use.

Taking into account the potential negative impacts on certain categories of customers due to a lack of clarity or unsuitable offers is a major challenge for Crédit Agricole, a mutual and cooperative Group. With tens of thousands of customers potentially affected, particular attention is therefore paid to entry-level products and services in line with the Group strategy and existing regulations.

The distribution of services can generate material positive impacts, as illustrated by inclusive solutions such as the Passerelle solidarity space, designed to support customers who are experiencing financial difficulties.

SCOPES OF APPLICATION

For part 3.2.2.1 “Accessibility of products and services”:

Entities concerned	<ul style="list-style-type: none"> – Regional Banks – Crédit Agricole Assurances – Crédit Agricole Italia – LCL – Crédit Agricole Personal Finance & Mobility – Amundi
Stakeholders affected	<ul style="list-style-type: none"> – Individual customers – SMEs – Corporate customers – Farming customers
Geographical scope	– International
Exclusion	N/A
Additional details	<ul style="list-style-type: none"> – To assess the negative impact, the Company relied on the reports of the French Banking Inclusion Observatory (<i>Observatoire de l'inclusion bancaire</i> – OIB) on the risk of financial exclusion of people in a vulnerable situation, and on the Charter for banking inclusion and preventing overindebtedness (<i>Charte d'inclusion bancaire et de prévention du surendettement</i>). – Customers experiencing financial difficulties receive special attention when it comes to access to essential banking services (see in part 3.2.2.1 “Accessibility of products and services” the section dedicated to “Offer a range of products and services that do not exclude any customer and strengthen social cohesion” and more particularly “Support for vulnerable populations and prevention of overindebtedness”).

For part 3.2.2.2 “Cybersecurity and combating cybercrime”, information on the scope of application can be found in the dedicated sub-section.

For part 3.2.2.3 “Protection of customers and personal data”:

Entities concerned	– Crédit Agricole Group
Stakeholders affected	<ul style="list-style-type: none"> – Employees of Crédit Agricole – Customers
Geographical scope	– International
Exclusion	N/A
Additional details	<ul style="list-style-type: none"> – The regulatory framework for the protection of customers and personal data is implemented by the Group through policies that apply to all subsidiaries of Crédit Agricole S.A. and to Crédit Agricole Regional Banks. – The customer protection policy applies to the “Financing”, “Investment” and “Insurance” elements of the value chain, on the downstream side it concerns customers. – The personal data protection policy applies to the entire value chain and downstream to customers, employees and suppliers. – Employees of the Crédit Agricole Group are directly concerned by the system. Indirectly, the downstream chain is affected, as well as civil society.

FRAMEWORKS AND REFERENCES

Crédit Agricole Group’s social strategy contributes to compliance with the following regulatory frameworks:

- UN Guiding Principles on Business and Human Rights;
- ILO Declaration on Fundamental Principles and Rights at Work;
- OECD Guidelines,

and thus takes into account issues related to human rights.

The Group has not had any cases of non-compliance with these principles in the past. Crédit Agricole S.A. is a signatory to the United Nations Global Compact and responds annually to its “Communication on Progress” questionnaire, which covers, among other things, all issues relating to undertakings and human rights. Crédit Agricole S.A. also responds to the Workforce Disclosure Initiative on the transparency of its commitments in terms of working conditions and human rights.

Through its products and services for vulnerable customers and by making entry-level products and services available, Crédit Agricole Group is helping to respond to several fundamental rights discussed in the above-mentioned documents such as the right to access to the healthcare system and the right to an adequate standard of living.

To protect its customers, the Group complies with various regulatory and internal frameworks:

- **regulatory framework:** legislative, regulatory and professional obligations on the protection of customers are divided into four pillars (Quality of products and services, Transparency, Loyalty and Listening to customers). They stem from international regulations (e.g. Dodd Frank Act), European regulations (e.g. MiFID II, IDD, PSD2 etc.), national regulations (e.g. the right to banking services) or market commitments (e.g. customers experiencing financial difficulties);
- **customer protection standards:** To respect these obligations on customer protection, the Group has adopted a dedicated body of standards. These standards apply to Crédit Agricole Group as a whole on issues such as access to a bank account or the right to banking services, the processing of payment transactions disputed by customers, financial savings, insurance and the complaints system. They go hand in hand with core controls associated with each theme, which apply to the entire Crédit Agricole Group;

- **Code of Ethics:** The Code of Ethics expresses Crédit Agricole Group's commitments to a behavioural approach driven by its values and principles for action vis-à-vis its customers. It expresses the Group's determination to do even more to provide the best possible service to its customers. In practical terms, this means promoting respect and support for customers and showing them loyalty, helping them to make decisions by proposing solutions tailored to their profile and interests, while informing them of the associated risks;
- **roles and responsibilities:** Customer protection is everyone's responsibility, as specified in the Group's Code of Ethics. This involves compliance by all employees and executives with the rules and principles on customer protection and vigilance in their decision-making and daily actions.

In terms of **personal data protection**, the Group complies with various regulatory and internal frameworks:

- **regulatory framework:** the Crédit Agricole Group applies the European General Data Protection Regulation (GDPR), which came into force in 2018;
- **implementation:** to ensure respect for the rights and freedoms of individuals whose personal data is processed, the Crédit Agricole Group has set up a system based on the **following four pillars**: "Governance", "Standards", "Training" and "Control" (see part 3.2.2.3 "Protection of customers and personal data");
- **roles and responsibilities:** this system is overseen by the **Data Protection Officers** appointed within each entity who present an annual report on their activities to the most senior manager in their department, and then send it to the Group Compliance department.

3.2.2 POLICIES AND ACTION PLANS

Through the Group's Societal Project, Crédit Agricole Group has put in place a social strategy aimed primarily at (1) offering a range of products and services that do not exclude any customer. In addition, the Customer Project contributes to (2) the protection of customers and personal data.

Specific policies are applied to manage the impacts, risks and opportunities linked to these two aspects:

The action plans implemented on themes related to the accessibility of products and services and the protection of customers and personal data are ongoing and do not therefore have any time-bound milestones marking an end to the actions undertaken. These topics are monitored at the level of the Group's Governance (see parts 1.2.1 "Board of Directors" and 1.2.2 "Executive Governance").

3.2.2.1 ACCESSIBILITY OF PRODUCTS AND SERVICES

3.2.2.1.1 OFFER A RANGE OF PRODUCTS AND SERVICES THAT DO NOT EXCLUDE ANY CUSTOMER AND STRENGTHEN SOCIAL COHESION

Through a range of accessible and inclusive products and services, Crédit Agricole Group is committed to supporting people who are economically disadvantaged and/or with a disability. This is reflected in five principles:

1. access for all to offers and services;
2. support for vulnerable populations and prevention of overindebtedness;
3. a commitment to young people;
4. improving access to care and support for ageing;
5. supporting high-impact players promoting social cohesion.

ACCESS FOR ALL TO OFFERS AND SERVICES

To avoid certain customers finding themselves in a vulnerable situation and to protect them, the Regional Banks and LCL each offer simple, clear and transparent products and services specifically for:

- individual customers (with EKO car and home insurance packages for the Crédit Agricole Regional Banks network and LCL Essentiel offerings);

- SMEs (EKO Pro, LCL Essentiel Pro and Propulse offerings);
- customers with disabilities (accessibility of customer service numbers and digital channels; accessibility of the insurance claims management platform);
- insured persons (comprehensive approach to risk prevention and supporting individual customers, professionals, farmers and corporates to preserve their personal assets or their business assets/activity).

SUPPORT FOR VULNERABLE POPULATIONS AND PREVENTION OF OVERINDEBTEDNESS

Crédit Agricole Group's support for all customers involves preventing overindebtedness and supporting vulnerable populations through:

- mechanisms designed to support customers experiencing financial difficulties (*Espace Solidarité Passerelle*, *Compte à Composer Budget Protégé* offer, customer support agency, LCL Initial);
- mechanisms for early detection of a potential financial difficulty;

- improving methods and broadening criteria for identifying situations of financial vulnerability, in particular by raising the monthly income threshold annually. This allows many more customers to benefit from limited bank charges;
- a comprehensive approach to helping farming customers in times of need (Coups Durs Pro/Agri);
- LCL'Aide, which helps combat economic violence by offering a simplified account opening process, support from a dedicated team, a debit card with systematic authorisation and exemption from account maintenance fees;
- support for entrepreneurs facing mental strain (mental fatigue, isolation, difficulty balancing work and personal life etc.) with Care Entrepreneurs offered by LCL;
- the *Points Passerelle* scheme supports customers made vulnerable by a life event by identifying solutions to help them return to a stable and sustainable situation. One of the solutions used is the *Pause Paiement* (Payment Pause) scheme offered by CA Assurances for beneficiaries of the *Points Passerelle* programme. It is a comprehensive approach to essential insurance needs for property and individuals, including home insurance (primary residence only), individual health insurance, death benefit cover, and ADE Conso for microcredit in a shared-risk arrangement with the Regional Banks.

A RENEWED COMMITMENT TO YOUNG PEOPLE

The Regional Banks and LCL are committed to young people, offering them a range of products and services to help them achieve their projects according to their needs:

- everyday needs (LCL Jeune Actif, including preferential rates on certain bank cards; LCL Étudiant, for preferential rates on cards for students, with some cards even free of charge; LCL Flex, instant mini-loans at special rates, available without proof of income; an increased *Livret Jeune* savings account rate of 3.40% since 1 February 2025; driving licence loans at €1 per day);
- housing (Entre2Loc from LCL; rental insurance specifically for young tenants);
- studies (association with the state-guaranteed student loan scheme with Bpifrance; LCL x Interfimo studies solution for students aiming toward a self-employed career);
- support towards financial independence (the "C'est carré" scheme offering a comprehensive service covering banking support, housing, driving licence and studies).

IMPROVING ACCESS TO CARE AND SUPPORT FOR AGEING

Access to healthcare and healthy ageing are major societal concerns in France. Crédit Agricole Group is investing in various areas in order to meet these major challenges:

- supporting independent professionals and healthcare employees, both medical and paramedical (Paymed One billing and collection solution; Interfimo Profession Libérale loan with €3,363 million granted in 2025, a housing loan offer for interns and heads of health clinics; a refinancing package of €400 million signed in 2024 in partnership with the European Investment Bank to promote business start-ups and an increase in the number of women in the health professions, of which €244 million was contractualised or reserved in 2025);
- home care (home adaptation loans, home adaptation assistance loans; Sofinco's next area of development is adapting homes for healthy ageing, which will aim to offer solutions tailored to residents' new needs);
- retirement (supplementary professional retirement fund).

Crédit Agricole Santé & Territoires, an entity created in 2023, is a provider of solutions designed to facilitate access to healthcare and support the ageing population in different regions. A subsidiary of the Crédit Agricole Group, Crédit Agricole Santé & Territoires aims to structure and amplify the Group's service offerings in the healthcare sector. Crédit Agricole Santé & Territoires offers pragmatic solutions to two major societal challenges:

- facilitating access to healthcare in all regions as part of care pathways and the principle of territoriality (development of telemedicine, support for new forms of medical practice, establishment of healthcare facilities in medical deserts etc.);
- supporting the ageing population in terms of both home care services and non-medical accommodation.

SUPPORTING HIGH-IMPACT PLAYERS AND INVESTMENT SOLUTIONS PROMOTING SOCIAL COHESION

Crédit Agricole Group supports high-impact players in different areas:

- social housing (partnership with Action Logement, building project development aimed at creating social and inclusive housing for vulnerable people);
- social and economic development (Amundi Finance et Solidarité, LCL Impact Social et Solidaire, LCL Better World).

At the same time, Crédit Agricole Group also offers targeted financing (social loans), whereby funds are allocated directly to an asset or project with a social benefit and issues social bonds as part of the Group's Social Financing Framework.

THE SOCIAL FINANCING FRAMEWORK FROM CRÉDIT AGRICOLE GROUP

The Framework put in place in 2020 for Crédit Agricole S.A.'s initial social bond issue was updated in 2025. It applies to all Crédit Agricole Group entities: Crédit Agricole S.A., Crédit Agricole Regional Banks, their subsidiaries and refinancing vehicles, including Crédit Agricole Home Loan SFH. Crédit Agricole Group social bonds are presented based on four structuring pillars defined by the Social Bond Principles (ICMA). The Social Financing Framework consists of six different eligible categories of social loans, some of which are new, such as education. It received a second opinion from the rating agency Moody's in November 2025. The experts at Moody's Ratings approved the methodology for identifying and selecting social assets included in the social portfolio, as well as the relevance of the eligibility criteria used to define the categories of eligible social loans.

RELIANCE ON PARTNERS DEDICATED TO SUPPORTING CREATORS/BUYERS

Crédit Agricole Group, through its Regional Banks and various entities, relies on dedicated partners to enable as many people as possible to develop and secure their entrepreneurial project before they start, using a range of mechanisms (collateral-free loans, advice, coaching).

Every year, this collaboration results in the development of thousands of projects to stimulate the economic fabric of the regions and create jobs. Some of the major partners include:

- Initiative France offers to support entrepreneurs, upon application, by means of two distinct levers: financing through a 0% interest collateral-free loan and a guarantee (financed by a guarantee fund).
- *Réseau Entreprendre* is a network made up of business leaders who volunteer to support and finance entrepreneurs with job creation potential to help them successfully create, take over or grow their business via collateral-free loans and collective support in clubs.
- The purpose of France Active is to develop a more inclusive, sustainable economy and to promote access for project leaders to the creation (or rehabilitation) of companies with a social impact.
- ADIE supports and finances self-employed entrepreneurs through professional micro-loans.

SUPPORTING THE STAFF OF THE MINISTRY OF ARMED FORCES AND VETERANS

On 7 January 2026, Crédit Agricole announced a major partnership with the French Ministry of Armed Forces and Veterans. This

national partnership aims to offer around 370,000 active members (military and civilian from the Ministry of the Armed Forces and gendarmes) attractive pricing advantages on a set of Crédit Agricole products: discounts on bank offers, preferential rates for home and consumer loans, insurance discounts, and personal services. It is fully in line with the Group's willingness to offer banking solutions to all and its long-standing commitment to national defense issues.

3.2.2.2 CYBERSECURITY AND COMBATING CYBERCRIME

3.2.2.2.1 STRATEGY

CONTEXT

Cybersecurity and IT risks are key issues that feature in the new "ACT 2028" Medium-Term Plan, which runs until the end of 2028. By managing these risks, the Crédit Agricole Group is affirming its position as a trusted player in the digital world. Its responsible data management and robust IT infrastructure help to ensure the protection of its own information and that of its customers. This new strategic plan is a continuation of Crédit Agricole S.A.'s "Ambitions 2025" plan, which already included a major technological dimension embodied in the "IT 2025" programme.

For several years, along with other major players in the banking and financial sectors, the Crédit Agricole Group has been confronted with a multi-sector cyber threat that could impact its IT system and that of its subcontractors. Aware of the challenges associated with digital security, Crédit Agricole Group deploys a cybersecurity strategy to protect itself against cyberthreats, which it has placed at the heart of its operational risk management priorities.

MATERIAL IMPACTS, RISKS AND OPPORTUNITIES

Description of IROs	Positioning in the value chain	Time horizon
Negative impact		
– Psychological impact or impact on daily life (such as identity theft) resulting from a breach of our customers' data protection	Downstream	Long-term
Risk		
– Financial risk following an inability to provide essential services and the associated operational cost to remedy the situation	Downstream	Long-term

FRAMEWORKS AND REFERENCES

The entire **Information Systems Security Regulatory Framework** consists of a set of documents structured across three levels:

- the **core policy** defines the principles of risk control related to an information systems security failure, and their implementation through security, organisational and operational measures. It is supplemented by several core procedures that outline the implementation of cross-cutting measures in the form of security rules. These documents constitute the core domain;
- each **domain policy** defines the security requirements specific to the domain's theme;
- the **standards** outline the implementation of the domain policy, at operational or technical level.

3.2.2.2.2 GOVERNANCE

The Group's Risk Appetite Statement, which is submitted each year to the Crédit Agricole S.A. Board of Directors for approval, includes key metrics relating to IT risk.

The Group Security Committee, at the Executive Management level, is the umbrella body for security governance within the Group. This decision-making committee defines the security strategy and assesses the Group's level of control in the field of information systems security. The cybersecurity strategy and the level of threat protection it provides are reviewed regularly by the Crédit Agricole S.A. Board of Directors.

The internal control system, structured in three lines of defence, oversees the management of cyber-risk. The first line of defence, comprising the operational teams, includes a decentralised network of Chief Information Security Officers. This line is responsible for identifying the Group's level of exposure to IT security risks and ensuring that it is kept within the set limits, taking into account the Group's risk appetite and the information systems security policy measures.

The Group Risk department provides the second line of defence; it conducts continuous and independent monitoring at its own level by relying on a network of IT Systems Risk Managers, who report to the Head of risk management function of each Group company.

As a third line of defence, the Audit & Inspection business line, as part of its audit missions, checks the compliance of the information system with the security policy, as well as the level of IT risk control, and assesses the measures put in place by the first line and the second line of defence. In addition, Crédit Agricole Group has a cyber insurance policy that covers the financial impact of any attack on the information system and the loss of confidential data.

3.2.2.2.3 TARGETS

Crédit Agricole Group applies a range of IT security rules to protect its data and that of its customers, and to ensure the availability of IT systems.

The information systems security policy establishes a common framework intended for all stakeholders in order to meet the Group's security objectives.

3.2.2.2.4 SCOPES OF APPLICATION

The ISSP applies to all the undertakings included in the consolidated base surveillance scope of Crédit Agricole Group.

3.2.2.2.5 ACTION PLANS/SYSTEM

CONTROL AND MANAGEMENT

Security reviews, audits and tests are conducted periodically by the three lines of defence and external auditors to monitor the compliance and security of the information system.

The information system security control and management system relies on tools to assess and report on the Group's level of control of information and communication technology (ICT) risks, including IT security risks (dashboard, especially control plan).

Lastly, Crédit Agricole Group has modelled its major cyber-risk scenarios to provide a risk-based view of the effectiveness of the security measures taken. These scenarios are reviewed regularly to incorporate new issues such as sovereignty.

Crédit Agricole has established an organisational structure and an Information Security business line consisting of experts. The Group security system relies on three operational entities:

The CERT (Computer Emergency Response Team) is an outward-looking unit responsible for anticipating and responding to security incidents. Crédit Agricole Group's CERT is accredited by the TF-CSIRT and a member of FIRST.

The Cyberdefence Operational Centre designs and operates security, prevention, surveillance, backup and remediation systems.

The SOC (Security Operation Centre) operates internal surveillance on the data centre and IT networks hosted entirely in France.

CYBER RISK AWARENESS AND CULTURE

Crédit Agricole Group actively raises its employees' awareness of cyber threats to remind them of the issues associated with individual habits and to ensure they maintain key reflexive responses. Awareness-raising is based on various communication channels (guides, training, targeted actions and themed exercises). Awareness-raising activities aimed at customers are also carried out regularly.

INFORMATION SYSTEM SECURITY POLICY (ISSP)

The ISSP is part of the overall framework established the Risk Management procedural note related to ICT and the Crédit Agricole Group's business continuity plan policy, which are issued by the Group Risk department. The ISSP is revised annually and incorporates the issues of availability, of integrity, confidentiality, and resilience of the Group's information systems and the main provisions of the Digital Operational Resilience Act (DORA). It defines the major principles of risk control, and their implementation through security, organisational and operational measures. It is supplemented by procedures and standards aimed at facilitating operational application. The regulatory framework is published on the Crédit Agricole Group Intranet. The General Digital Operational Resilience Strategy complements the regulatory framework for ICT operational risk management.

DORA COMPLIANCE

As part of compliance with the Digital Operational Resilience Act (DORA), monitoring of outsourced ICT services has been strengthened as part of a continuous improvement process.

Crédit Agricole Group is rolling out a tool for the ongoing assessment of the cybersecurity of suppliers integrated into the purchasing and management processes.

PROTECTION OF THE INFORMATION SYSTEM AND DATA

Access to the IT system is restricted to authorised users who have been authenticated (strong or multi-factor authentication) and with secure equipment (hardening of configurations). Information system partitioning is in place to protect our assets and data against cyber threats (isolation of administration environments, partitioning following the criticality of systems in particular). Data is classified and protected according to its sensitivity, including by encryption.

The security of IT outsourcing is analysed before contractualisation, governed by contractual clauses and supervised throughout the duration of the service. Rights to audit security are exercised.

OPERATION AND DEVELOPMENT

The IT project methodologies in place identify the risks and means of managing the security of systems and data upstream of their development in house or their purchase.

The operation of the IT system is regulated by procedures. IT System vulnerabilities are corrected in timely manner proportional to their level of risk.

CYBER INCIDENTS AND BUSINESS CONTINUITY PLAN

Detection and response measures are in place to identify all security risks, including attempts to extract data, and take appropriate action.

Crédit Agricole Group implements a comprehensive set of tests covering cybersecurity and resilience risks on an individual or overall basis.

The IT system is designed to meet the resilience targets required by the business lines and documented in their Business Continuity Plans (BCP). Solutions are implemented and tested against various scenarios involving IT system unavailability, whether the cause is logical or physical (including workstations), accidental or malicious.

3.2.2.3 CUSTOMER PROTECTION

Customer protection is an affirmed priority of Crédit Agricole Group. It is an integral part of the "Excellence in customer relations" and "Societal commitment" aspects of the Group Project which has three pillars: Customer Project, Human Project and Societal Project.

In terms of customer protection, the Compliance department leads work groups aimed at strengthening loyalty vis-à-vis customers (product governance).

Crédit Agricole Group's aim is to protect customers and their legitimate interests through an approach based on the following systems:

- a **monitoring system** to identify future regulations and anticipate operational applications within the Group;
- the **operational application** of legislative, regulatory and professional obligations. For example:
 - taking the customer's situation into account in the marketing of savings products,
 - supporting customers in financial difficulty with tailored solutions (e.g. capping of fees, specific offer based on continuous pricing, financial education, guidance towards specialised structures etc.);

- a **Product governance system** governed by a body of procedures and controls defined by the Group Compliance department, with responsibility for implementation held by the entities. Product governance is aimed at ensuring the quality of the products and services offered to all customers through the marketing of tailored solutions while establishing an exchange of information between the producers and distributors of these products and services. The relevance of the offering is assessed through the identification of target customers and non-compatible customers, the clarity of documentation, the transparency of pricing and issues addressed (e.g. fight against money laundering and terrorist financing, ethics, ESG, taxation). The NAP (new products, new services, new activities) Committee studies files of new offerings and services before they are released onto the market and oversees their regular review. This committee's analysis of ESG issues ensures that ESG risk and customer protection are taken into account in the design of products;
- a **coordination and training system** for employees to promote the culture of customer protection;
- a **control system** overseeing the proper implementation of the standards;
- regular reports are submitted to the regulators overseeing Crédit Agricole Group (e.g. questionnaires on customer protection and commercial practices are sent to the ACPR and the annual control report of Investment Service Providers in France is sent to the AMF).

3.2.2.4 PERSONAL DATA PROTECTION

Crédit Agricole Group processes the personal data of many stakeholders: customers, prospective customers, employees, candidates, Directors, providers, Internet users etc.

To ensure that the rights and freedoms of individuals whose data is processed are respected, Crédit Agricole Group has set up a system based on the following four pillars: "Governance", "Standards", "Training" and "Control" which are supervised by the Data Protection Officers appointed within the entities. In addition, the specific policies of each entity are published on their respective websites.

- The **"Governance" pillar** addresses the issue of personal data protection into the Group committees with respect to the roll-out of new products, new services and new activities ("NAP Committees"), the use of cloud-based IT services, or simply new data uses.
- The **"Standards" pillar** includes a section on personal data protection, updated at the beginning of 2023, which applies to all Crédit Agricole Group entities subject to the GDPR. The Group Compliance department monitors the implementation of this policy within the entities.
- The **"Training" pillar** helps Crédit Agricole Group employees to process personal data in compliance with the Standards. A comprehensive and multi-faceted training programme. This programme includes mandatory training for all employees who are regularly exposed to the processing of personal data, special training to enhance the skills of DPOs, and awareness-raising sessions for specific business lines.
- The **"Control" pillar**: Compliance with the rules set out in the Crédit Agricole Group standards is subject to integrated controls. The results of these checks are reported to the Group Compliance department every six months.

REQUESTS FOR THE EXERCISE OF RIGHTS RECEIVED BY GROUP ENTITIES

Crédit Agricole Group's Compliance department compiles a half-yearly report for Crédit Agricole S.A. group on the number of requests for the exercise of rights received by the entities. These rights are understood to be those specified in the GDPR framework: access, rectification, deletion, limitation, opposition and portability.

The data reported by the entities undergoes consolidation, control and validation by the Group Compliance department.

	2025	2024
Number of requests for the exercise of rights received by Group entities	58,136	83,515

3.2.3 METRICS AND TARGETS

The Group measures the effectiveness of its policies and actions using metrics, including:

- monitoring metrics at entity level to monitor its social impact;
- metrics linked to Group financing dedicated to social inclusion; and
- monitoring metrics for social bonds issued.

IMPACT-MONITORING METRICS AND TARGETS

	Unit	2025	2024	Target value by 2030	Entity concerned
Number of customers in vulnerable situations supported	Number	124,125	99,934	60,000	LCL, CAPFM
Number of customers supported through a subscription to the entry-level offers	Number	190,475	183,569	300,000	LCL
% of indexed loans (with ESG criteria)	%	18%	14%		LCL

The metrics only relate to the scope of the entity indicated in the right-hand column.

INDICATORS RELATED TO FINANCING OF TRANSITIONS

	2025	2024
TOTAL FINANCING OF SOCIAL INCLUSION (in millions of euros)	73,731	70,741
O/w access to home ownership (home loans for low-income households, interest-free loans)	35,747	32,811
O/w health for everyone	12,741	12,883
O/w professionals and SMEs in fragile and rural areas to be revitalised	19,693	19,504
O/w others	5,550	5,543

The table above shows outstanding loans dedicated to social inclusion (dedicated financing, either directly or through other organisations such as the European Investment Bank (EIB) or Caisse des Dépôts) according to the Group's internal sustainable asset framework at 30 September 2025.

SOCIAL BONDS

At 31 December 2025, outstanding social bonds issued by Group entities amounted to €10,901 million.

Issuer	2025		2024	
	Outstandings (in millions of euros)	Number of issuances	Outstandings (in millions of euros)	Number of issuances
Crédit Agricole S.A. social bonds	7,219	24	5,378	19
Crédit Agricole Home Loan SFH social covered bonds	182	26	2,250	2
Crédit Agricole CIB social notes	3,500	3	312	24
TOTAL	10,901	53	7,940	45

At 30 June 2025, Crédit Agricole S.A.'s social portfolio was concentrated in the Regional Banks (75%) and LCL (25%). Almost all this social portfolio is located in France. SMEs in disadvantaged areas are the most represented eligible category in the social portfolio (47%), followed by SMEs in the healthcare sector (31%), social housing (8%), public hospitals (9%), and finally cultural, sports and solidarity associations (4%) and public housing institutions for elderly or dependent persons (1%). The social portfolio of Crédit Agricole Home Loan SFH consists exclusively of residential property loans from the Regional Banks. Crédit Agricole CIB's social portfolio consists of telecommunications projects in rural areas (65%), infrastructure projects in developing countries (20%) and investments in public hospitals (16%).

4. RESPONSIBILITY FOR BUSINESS CONDUCT

4.1. ENSURING COMPLIANCE WITH REGULATORY AND PROFESSIONAL OBLIGATIONS

Business conduct within Crédit Agricole Group involves two major challenges: compliance with the regulatory and professional obligations coordinated by the Group Compliance department, and healthy management of business relations with suppliers, led by the Group Purchasing department.

4.1.1 GOVERNANCE

Business conduct is an issue monitored at the highest levels of Crédit Agricole Group: the Board of Directors and its specialised committees (Appointments and Governance Committee, Board of Directors' Risk Committee, Executive Committee and Group Compliance Management Committee). These committees (and in particular the Group Compliance Management Committee ⁽¹⁾) are involved in defining, validating and monitoring the application of Compliance policies (Promoting an ethical culture, Avoidance of conflicts of interest, Combating corruption, Protection of whistle-blowers, Combating financial crime, Prevention of market abuse). They are kept regularly informed of the effectiveness of these policies and of incidents detected.

There is regular awareness-raising for members of the Board of Directors on Compliance as well as regulatory and professional obligations (e.g. conduct, ethics) in the form of dedicated training, as described in detail below.

4.1.2 COMPLIANCE STRATEGY

The role of the Group Compliance department is to ensure compliance, by the Crédit Agricole Group entities, executives and all employees, with the regulations and conduct applicable to banking and financial activities. The Group Compliance department also contributes to the implementation of Crédit Agricole Group's voluntary commitments. More specifically, the Compliance department works to prevent any situation involving a risk of non-compliance within any entity.

Thus, the Compliance business line has affirmed its commitment to implement the regulations on an operational basis and to promote an ethical culture within the Group. It is expressed and implemented through the Societal Project, the Customer Project and the Human Project, in line with the Group's Raison d'Être and Group Project.

Since 2019, Crédit Agricole Group has also promoted an ethical conduct with the adoption of its Raison d'Être: "Act every day in the interests of our customers and society". This is reflected in particular in the following actions:

- supporting everyone in the long term, on a daily basis and through long-term projects; and making loyalty, transparency and teaching the cornerstones of the advice we offer;
- placing empowered teams with human accountability at the heart of our model;
- guaranteeing our customers and teams access to the most secure technological best practices;
- being a trusted partner to all customers, from the most financially modest to the most affluent, from Very Small Businesses (VSBs) to the largest international groups.

4.1.3 REGULATORY FRAMEWORK

In terms of business conduct, Crédit Agricole Group's obligations stem from various regulations in relation to conflicts of interest and financial market protection (e.g. MiFID, IDD, MAR, MAD), combating financial crime (e.g. AML/CFT programme of international sanctions and regulations), anti-corruption and protection of whistle-blowers (e.g. Sapin II law, duty of vigilance, Wasserman law, transposition in France of Directive (EU) 2019/1937, recommendations of the French Anti-corruption Agency).

(1) Compliance Management Committee, chaired by the Deputy Chief Executive Officer and belonging to the Executive Committee, responsible in particular for validating and examining compliance-related policies, procedures or problems.

4.1.4 POLICIES, TARGETS AND AMBITIONS, IMPACTS, RISKS AND OPPORTUNITIES AND THEIR SCOPE OF APPLICATION

The table below presents the negative impacts, risks and scope of the Compliance policies of Crédit Agricole Group and its entities.

These policies, which consider stakeholders, are developed as part of procedures issued by Crédit Agricole Group and rolled out by the entities. These procedures are available on the dedicated Intranets.

Description of IROs	Positioning in the value chain	Time horizon
Negative impacts		
– Negative impacts on the living conditions of customers or stakeholders in the event of unethical practices (e.g. corruption)	Entire value chain – Upstream: primarily employees and executives, suppliers, partners and partner companies, mutual shareholders, shareholders and investors – Downstream: customers	Invariable
– Negative impacts on the living conditions of customers or stakeholders in the event of unethical practices (e.g. corruption)	Entire value chain – Upstream: primarily investment in financial markets, relations with suppliers and partners, and employees – Downstream: customers	
Risks		
– Regulatory risk in the event of non-compliance with the regulations and the expectations of the supervisory authorities in terms of business ethics and combating corruption	Entire value chain – Upstream: primarily employees and executives, suppliers, partners and partner companies, mutual shareholders, shareholders and investors. – Downstream: customers	Invariable
– Regulatory risk in the event of insufficient detection of conflicts of interest and market abuse (market integrity)	Entire value chain – Upstream: primarily mutual shareholders, shareholders and investors, rating agencies, suppliers, employees, partners and partner companies – Downstream: customers	Invariable
– Regulatory risk in the event of non-compliance with the regulations and the expectations of the supervisory authorities in terms of business ethics and combating corruption	Entire value chain – Upstream: primarily investment in financial markets, relations with suppliers and partners, and employees – Downstream: customers	
– Regulatory and reputational risk in the event of the failure of the whistle-blowing system for reporting unethical internal practices	Entire value chain: – Upstream: primarily employees (including former employees) – Downstream: individual customers	Invariable
– Regulatory risk in the event of failure to comply with the obligations in terms of combating financial crime	Entire value chain, upstream and downstream including customers, employees and suppliers.	Invariable

4.1.4.1 PROMOTING AN ETHICAL CULTURE

ACTION PLAN

The ethical culture roadmap is reviewed annually by the Appointments and Governance Committee of Crédit Agricole S.A.'s Board of Directors. It is based on the following pillars:

- **Group executives and Directors:** they are trained in compliance matters. In addition, the promotion of ethics is taken into account when assessing the performance and compensation of Crédit Agricole S.A.'s corporate officers;
- **Group employees:** they have in place ethical standards (Group Code of Ethics and Codes of Conduct) and are kept regularly informed (announcements, newsletter etc.). Newcomers are made aware of the Code of Ethics and Code of Conduct when they take up their position;
- **the conduct risk control assessment system:** this is defined and coordinated by Crédit Agricole S.A., and is rolled out in the entities. Action and remediation plans are implemented where required.

Following an external audit of its ethical framework, Crédit Agricole Group updated the Group Code of Ethics in 2025.

Each of the entities of Crédit Agricole Group is responsible for promoting and implementing the ethical culture. The Group Compliance department supports the entities in their implementation and coordination of this ethical culture. To this end, it leads a community of ethics advisors made up of representatives from Regional Banks and subsidiaries. Joint efforts are made to develop content that meets the needs of the entities, which is then shared with the community on a quarterly basis. The results of this content are monitored to assess its performance and identify areas for improvement.

METRICS AND TARGETS (INCLUDING STEERING)

GENERAL TRAINING ON COMBATING CORRUPTION AND PROFESSIONAL ETHICS AND CONDUCT

Crédit Agricole Group has in place a business conduct training system including modules dedicated to combating corruption and professional ethics and conduct. Some of these training modules are dispensed to all Group employees, while others target employees depending on the nature of their activity (e.g. real estate) or their position (e.g. employees exposed to corruption risk).

These employees are identified by the entities taking into account their corruption risk mapping.

The members of the Boards of Directors also receive training on these compliance matters which include combating corruption and professional ethics and conduct.

Name of training	Type of training	Format	Duration	Target audience Employees on permanent and fixed-term contracts of Crédit Agricole S.A. and its entities	Mandatory	Final quiz / mini success rate	Completion time from start date in the position	Renewal
Combating corruption	Newcomers (when taking up the position)	E-learning	30 mn	All employees on permanent and fixed-term contracts	Yes	Yes (80%)	Within three months	Every three years via Scan'Up or by completing the e-learning
	Refresher on Scan Up knowledge	E-learning	10 mn	All employees on permanent and fixed-term contracts needing to update their knowledge	Yes	Yes (80%)	-	Every three years
	Square Habitat, Angle Neuf and similar	E-learning	30 mn	All employees on permanent and fixed-term contracts in the Group's real estate networks. Retail banking employees in France authorised as real estate employees may take this training as part of the ALUR law 42 hours rule.	Yes	Yes (80%)	Within three months	Every three years
	Further training for Correspondents	In-person	1 day	Current or recently appointed "Compliance/Anti-corruption" and/or "Compliance/Whistleblower" correspondents. Employees from other departments contributing to the anti-corruption system: Purchasing, Audit, Risk, Human Resources.	No	No	-	No
	Further training for Exposed employees	E-learning	20 mn	Employees most exposed to corruption risks due to their business line.	Yes	Yes	Within three months	Every three years
Professional ethics and conduct	Newcomers (when taking up the position)	E-learning	45 mn	All employees on permanent and fixed-term contracts	Yes	Yes (80%)	Within three months	Every three years via Scan'Up or by completing the e-learning
	Refresher on Scan Up knowledge	E-learning	10 mn	All employees on permanent and fixed-term contracts needing to update their knowledge. ALUR law 42-hour compatible.	Yes	Yes (80%)	-	Every three years
Compliance matters	New Directors	In-person or remotely	2 h 30 mn	New Board members	Yes	No	Within the year	No
	Regulatory changes	In-person	1 h 30 mn	Board members	Yes	No	-	Every year

AWARENESS-RAISING AND TRAINING ON ETHICS

Every six months, Crédit Agricole Group's Compliance department calculates the ratio between the number of employees who have completed the "Professional ethics and conduct" training and the number of employees who should complete the training over its reference period, as defined in the texts of the Group's governance.

The data required for this calculation is reported by the entities (via an internal tool) to the Group Compliance department, which validates the metric after carrying out a consistency check.

The content of this training deliberately addresses ethical issues and challenges developed in the Code of Conduct (e.g. promoting diversity, avoiding conflicts of interest, loyalty to our customers, combating fraud etc.).

Module title	2025 completion rate	2024 completion rate
"Professional ethics and conduct" training	97.8%	97.6%

4.1.4.2 AVOIDANCE OF CONFLICTS OF INTEREST

ACTION PLAN

Ongoing action plans in the area of conflict of interest prevention are based on the following pillars:

- **employee training and awareness:** training programmes are rolled out across Crédit Agricole Group. They improve understanding of the regulatory issues, responsibilities and risks associated with conflicts of interest. These consist of a specific e-learning and regular awareness-raising campaigns targeting executives and employees;
- **the conflict of interest prevention and management system is governed by a procedural framework** covering regulatory (including MiFID II and IDD) and personal conflicts of interest (including private mandates, personal links);
- **the control system:** defined by Crédit Agricole Group, its aim is to ensure proper implementation of the standards in the entities according to their activities;
- **management of the conflict of interest detection and management system:** a tool is made available and administered by Crédit Agricole Group. Conflicts of interest are handled locally at entity level, and at Group level for conflicts of interest between entities;
- **the management of conflicts of interest** is carried out using the Group tool. An annual report is presented to the decision-making bodies, and the Investment Services Compliance Report (ISCR) is sent to the AMF.

METRICS AND TARGETS

Metrics for the implementation and effectiveness of the systems for avoiding conflicts of interest are specific to each entity. Crédit Agricole Group is awaiting additional details on the sector-specific standards to settle on the selection of metrics to disclose.

4.1.4.3 COMBATING CORRUPTION

ACTION PLAN

Ongoing action plans in the area of combating corruption are based on the following pillars:

1. **Employee training and awareness:** training programmes are rolled out within Crédit Agricole Group entities. They improve understanding of the legal framework and help to identify each entity's challenges and responsibilities. Corruption plans and the related risks, due diligence to reduce these risks, recommended behaviour in response to solicitations, procedures for handling

reports of inappropriate behaviour, and personal sanctions at both the disciplinary and penal levels in the event of violation are presented and illustrated.

Anti-corruption representatives are also appointed by the governing body within each of the entities.

2. System framework based on:

- **the procedural note** on combating corruption and **control plans** associated with this note. In addition, accounting control procedures provide assurance that the books, registers and accounts are not used to mask corruption or influence peddling;
- **the Anti-Corruption Code of Conduct.** In addition, a disciplinary regime provides for the sanctioning of employees in the event of violation of the Company's Code of Conduct;
- **at the same time, third-party assessment procedures and systems** also contribute to the framework for combating corruption. For example, a supplier risk profile analysis is carried out upstream of the business relationship, and due diligence is conducted throughout the relationship. Moreover, awareness is also raised about combating corruption among suppliers, through the sharing of the Crédit Agricole Group ethical approach and the formalisation of contractual clauses.

3. **Corruption risk management** is carried out on the basis of risk mapping implemented by the entities according to a methodology defined by Crédit Agricole S.A. This approach may result in reinforcement or remediation actions.

The entire anti-corruption system, together with the risk mapping and associated action plan is the subject of an **annual review** by the departments of each entity. In addition, **the management and implementation of the systems for combating corruption** within the entities of Crédit Agricole Group are carried out annually by the Group Compliance department, and followed up with an action plan for reinforcement or remediation where necessary.

4. **Handling of corruption incidents:** all corruption incidents are the subject of an investigation by the compliance services of the entity concerned, relying as needed on other expertise (audit, risk, human resources etc.). The incidents and measures taken are presented at the entities' Internal Control Committees. Remediation measures include reinforcement of the procedures and controls for the process concerned, and potential disciplinary and legal sanctions. This ensures separation of the investigators (compliance service) and the chain of management involved in the corruption incident.

5. **Certification of the anti-corruption management system:** in 2017 Crédit Agricole Group was the first French bank to receive ISO 37001 certification, obtained through audits conducted by an independent body. This certification was renewed in 2019, 2022 and 2025 (three-year renewal format), demonstrating the Group's commitment to sustainably uphold high international standards in the fight against corruption.

METRICS AND TARGETS (INCLUDING STEERING)

"COMBATING CORRUPTION" TRAINING

Every six months, the Crédit Agricole Group Compliance department calculates the ratio between the number of employees of its entities who have completed the "Combating corruption" training (general module for all employees and module for the employees concerned in the most exposed business lines) and the number of employees who should complete the training in the reference period, as defined in the texts of the Group governance.

The data is collected from the entities through an internal tool and undergoes a consistency check by Crédit Agricole Group's Compliance department before validation.

Employees from so-called "exposed" entities are identified by the entities on the basis of corruption risk mapping (specific to each entity). For Crédit Agricole S.A. group, this represents 17% of the workforce. In this respect, so-called "exposed" roles are considered to include functions with significant decision-making power or leverage (e.g., members of the entity's Executive Committee/ Management Committee, Directors, members of Intermediate Commitment Committees, members of the Credit Committee), as well as managers and employees involved in financing activities, financial management, purchasing, sponsorship, property management, and human resources.

Through this system, all employees are covered by a regulatory training programme the completion rate of which is indicated below:

Name of training	2025 completion rate	2024 completion rate
Combating corruption – General module	97.9%	97.9%
Combating corruption – Most exposed business lines	97.6%	96.3%

SENTENCES AND FINES FOR VIOLATION OF ANTI-CORRUPTION AND ANTI-BRIBERY LAWS

Crédit Agricole Group's Compliance department conducts an annual inventory of the number of sentences for violation of anti-corruption and anti-bribery laws. For this, it relies on the operational risk process and the anti-corruption process.

Crédit Agricole Group's Compliance department can therefore confirm the number of sentences and the amount of the associated fines.

	2025	2024
Number of sentences for violation of anti-corruption and anti-bribery laws	0	0
Amount of associated fines (in thousands of euros)	0	0

4.1.4.4 PROTECTION OF WHISTLE-BLOWERS

ACTION PLAN

Ongoing action plans in the area of the protection of whistle-blowers are based on the following pillars:

- **Director and employee awareness-raising:** regular communications are sent to employees of the entities (including videos, files on the website, a newsletter etc.) with an emphasis on the concept of good faith, to inform, reassure and instil confidence. In addition, the Code of Ethics and the Codes of Conduct of the entities include the key aspects of communication of the internal whistle-blowing mechanism;
- **the framework for the Whistleblower mechanism** is defined by the Group Compliance department in the form of procedures and an associated control plan, which are implemented by the entities of Crédit Agricole Group;
- **the Anti-corruption representative** is responsible for overseeing the anti-corruption programme, receiving reports through the "whistle-blowing" mechanism and the annual review by management;
- the whistle-blowing mechanism comprises two **reporting channels**:
 - **whistle-blowing platform:** Crédit Agricole Group's platform is secure and accessible 24/7 from a work or personal computer, available in nine languages, and is open to all individuals. It guarantees total confidentiality of the information contained in the report and of the whistleblower's identity through data encryption. After the case has been handled, the data relating to the report is archived after anonymisation. The function is classified as "critical and important" according to the definition of the European Banking Authority and is the subject of special governance. The contract which governs this function sets out obligations in terms of results (e.g. handling time frames, times taken to implement an alternative solution) and reporting obligations (e.g. summary statement of incidents, steering committees etc.),
 - for Group employees, reporting an incident to their line manager, Human Resources department or Compliance department. In the event that reporting through the hierarchy is deemed inappropriate in a given situation (fear of retaliation, pressure from the hierarchy, hierarchy involved etc.), the employee may use the whistle-blowing platform.
- maintenance of the **whistle-blowing mechanism**:
 - the mechanism meets the legal and regulatory requirements, guaranteeing for example anonymity where this option is selected by the whistleblower, confidentiality in its processing, handling of the report within seven working days, the management of access rights, and guarantees of non-retaliation against the whistleblower,
 - each report is investigated impartially and rigorously by the authorised Crédit Agricole Group employees (Human Resources or Compliance business lines). These employees receive dedicated training, the modules for which are created and maintained by the Compliance department. Employees handling whistle-blowing reports sign a confidentiality agreement,
 - during the report examination phase, communication between the whistleblower and the person in charge of the case is possible via the secure dialogue box on the Group tool. Following examination, the whistleblower is informed of the case's closure,
 - employees in charge of handling reports may, depending on the type of report, seek cross-functional, independent expertise for analysis and decision-making on the action that should be taken. This independent expertise takes the form of an ad hoc "Internal Whistle-blowing Management Committee", consisting of Compliance, Human Resources, Legal, Risk, Internal Audit and other managers, as required;

- **management of the whistle-blowing mechanism:**

- **implementation of the “whistle-blowing” mechanism** is managed through the implementation of the anti-corruption mechanism. The annual anti-corruption questionnaire allows the Compliance department to identify if any aspects of the Whistle-blowing mechanism are not in place in the entities. If this is the case, the entities are requested to provide action plans which are monitored by the Group Compliance department,
- a Group-level committee, chaired by the Group Head of Compliance in their capacity as Group Internal Whistle-blowing Officer, oversees internal reports during weekly closed-door meetings (Group Compliance and Group Legal) to manage the handling process within the Group. The Group Internal Whistle-blowing Officer may bring in other central departments (HR, Audit) as needed, if the complexity or sensitivity of a report so requires. If necessary, the Group Internal Whistle-blowing Officer may inform the Chief Executive Officer and/or Deputy General Manager,
- a Group-level committee meets once a year. A report is presented to the committee so that it can evaluate the mechanism based on statistical and qualitative data from reports and geographic areas of origin, and decide on any changes to the overall processing framework. The committee's assessment is taken into account, where appropriate, to update the risk map or to initiate internal controls on the malfunctions reported. Key data is forwarded to the Executive Management of Crédit Agricole S.A. via the Executive Committee and the Board of Directors.

METRICS AND TARGETS (INCLUDING STEERING)

In line with the aim of facilitating feedback on whistle-blowing, the Group monitors the number of reports over time on the dedicated platform.

WHISTLE-BLOWING REPORTS RECORDED IN THE GROUP INTERNAL WHISTLE-BLOWING TOOL

Each year, Crédit Agricole Group's Compliance department extracts the number of reports received in the internal tool, i.e. the number of reports before handling. This provides an understanding of the reports that prove not to be relevant, following investigation.

The metric is validated internally by the Group Compliance department.

	2025	2024
Number of whistle-blowing reports recorded in the Group internal whistle-blowing tool (before handling)	347	226

4.1.4.5 COMBATING FINANCIAL CRIME

ACTION PLAN

Ongoing action plans in the area of combating financial crime are based on the following pillars:

- the Know Your Customer mechanism which includes:
 - Group standards including Know Your Customer obligations, which are regularly updated,
 - a body of controls (particularly regarding entry into a relationship and periodic review),

- steering metrics which concern all customers of the entities while also paying particular attention to customers presenting the highest risk with regard to anti-money laundering and combating the financing of terrorism,
- tools contributing to improving the reliability of data through native consistency checks and through the “Selfcare” initiative (Know Your Customer data is entered directly by the customer in the tool);
- the Anti-money laundering and combating the financing of terrorism (“AML/CFT”) system is based on:
 - employee training in AML/CFT matters,
 - the classification of AML/CFT risks,
 - getting to know customers of the entities through the risk profile assessment,
 - the detection of atypical transactions and, where applicable, their reporting to financial intelligence units,
 - the intra-group exchange of AML/CFT information,
 - regular controls and audits;
- the mechanism for compliance with international sanctions is based on:
 - employee training in international sanctions,
 - getting to know the customers of the entities and their transactions,
 - assessment of the entities' exposure to international sanctions,
 - data screening and financial message filtering,
 - regular controls and audits.

Crédit Agricole Group has the ultimate authority for compliance with international sanctions and for supervising control of the risks incurred.

COMBATING FRAUD

To protect customers and preserve the Bank's interests, a structured system for combating fraud is implemented across all entities of Crédit Agricole Group.

The governance of this system is also rolled out in all entities of Crédit Agricole Group. It is governed by a procedural note and dedicated comitology. The Anti-fraud Steering Committee and the Fraud Prevention Community Committee meet quarterly.

In addition, IT tools have been strengthened this year at Group level, allowing for more effective cross-functional detection of fraudsters and, ultimately, better protection for the Group against the risk of fraud.

METRICS AND TARGETS (INCLUDING STEERING)

“COMBATING FINANCIAL CRIME” TRAINING

Every six months, Crédit Agricole Group's Compliance department calculates the ratio between the number of employees who have completed the “International Sanctions” and “Anti-Money Laundering and Combating the Financing of Terrorism” training and the number of employees required to complete these trainings over the reference period.

The data is collected from Crédit Agricole Group via an internal tool. This data is controlled and validated by the Group Compliance department.

Name of training	2025 completion rate	2024 completion rate
International Sanctions – General Module	97.9%	97.9%
Anti-money laundering and combating the financing of terrorism (AML/CFT) – General Module	97.4%	97.2%

4.1.4.6 AVOIDANCE OF MARKET ABUSE

ACTION PLAN

Ongoing action plans in the area of market abuse prevention and management are based on the following pillars:

- **training and awareness-raising:** specific training programmes are rolled out across all Crédit Agricole Group entities concerned and provide an understanding of regulatory issues and responsibilities, as well as the associated risks. These programmes involve mandatory and non-mandatory training delivered to employees, and are targeted according to the position held. They are reviewed and adapted on a regular basis;
- **framework of the Market Abuse system based on a body of procedures and controls:** procedures and controls form the framework for the risks of undermining the integrity of the financial markets and market abuse. This framework is regularly updated in response to regulatory changes;
- **management of the Market Abuse detection and handling system:** Each entity is equipped with a market abuse detection tool which includes scenarios on price manipulation and insider trading. Each model is the subject of a frequent review to

ensure the continued effectiveness of the systems with a view to detecting and reporting suspect orders and transactions;

- **Market Abuse management:** control metrics have been put in place at Crédit Agricole Group level. These relate to employees' personal transactions and the number of reports handled in relation to the volume generated. In addition, the theme of "Market Abuse" is the subject of annual reporting in the compliance report and the ISCR sent to the AMF.

Crédit Agricole S.A., as a corporate centre, assumes responsibility for the steering and governance of the Group market abuse monitoring and detection system. Steering committees with the entities concerned are held regularly, primarily with a view to ensuring ongoing improvement of the Group system.

METRICS AND TARGETS (INCLUDING STEERING)

Metrics for the implementation and effectiveness of the market abuse prevention systems are specific to each entity. Crédit Agricole Group and its entities are awaiting additional details on the sector-specific standards to settle on the selection of metrics to disclose.

4.2. SUPPLIER RELATIONSHIPS AND PAYMENT TERM PRACTICES

4.2.1 STRATEGY

4.2.1.1 EXTERNAL FRAMEWORKS AND REFERENCES

Crédit Agricole S.A. and nine Regional Banks have signed the **Responsible Supplier Relations and Purchasing Charter** encouraging undertakings to adopt responsible practices towards their suppliers. This charter, under the aegis of the French Ministry of Economy and Finance, is overseen by the Business Ombudsman and the CNA (*Conseil national des achats* – French National Purchasing Council). The **"Responsible Supplier Relations and Purchasing"** label was granted to Crédit Agricole S.A. for the first time in 2014 for the parent company scope, then in 2017 for the scope of Crédit Agricole S.A. and its subsidiaries. It was renewed for three years in 2024 for the same scope. As part of this, the organisation and actions of Crédit Agricole S.A. were certified to be at a "conclusive" level (third level out of four) compared to the **ISO 20400** normative framework. Seven Regional Banks are also certified.

This label is assessed on the basis of 15 criteria distributed across the following five areas:

- responsible supplier's commitments and their consistency with the Group CSR policy and strategy;
- the professional development of buyers and mediation development;

- the supplier relationship (respect of the contractual right and balance, mediation, supplier reviews);
- the integration of CSR into purchasing processes via responsible sourcing;
- the impacts of purchases on the economic competitiveness of the ecosystem, via the assessment of all costs in the life cycle and the contribution to regional development.

4.2.1.2 INTERNAL CONTEXT

Through a comprehensive double materiality analysis two material themes were established: "Management of relationships with suppliers" and "Payment practices". These are the subject of two policies forming an integral part of the Group's Responsible Purchasing policy.

In response to these issues and to contribute to the Company's overall performance, in 2018 Crédit Agricole Group introduced a Group Responsible Purchasing Policy, aimed at establishing long-term, balanced relationships with suppliers.

4.2.1.3 IMPACTS, RISKS AND OPPORTUNITIES

The IROs identified in the double materiality analysis are the following and are formulated in the form of a negative impact and two risks:

Description of IROs	Positioning in the value chain	Time horizon
Negative impact		
– Negative impact on suppliers in the case of non-responsible purchasing practices by the Group, particularly as regards payment terms	Upstream	Invariable
Risks		
– Reputational risk and regulatory risk in the case of accountability of the Group following an environmental, social or ethical breach – particularly in terms of corruption – by its suppliers	Upstream	Invariable
– Reputational risk and regulatory risk in the case of non-responsible purchasing practices by the Group towards its suppliers, particularly as regards payment terms	Upstream	Invariable

These IROs were identified using the AFNOR risk map, based on the ISO 31000 "Risk management", ISO 20400 "Sustainable procurement" and ISO 26000 "Social responsibility" standards, and the internal operational risk management tool, in close collaboration with internal stakeholders.

4.2.2 GOVERNANCE

The missions of the Group Purchasing department are based on four main pillars:

1. amplifying the Group's performance through the competitiveness of purchases;
2. containing and anticipating risks;
3. transforming purchasing into a responsible act; and
4. excelling relationally and operationally.

The Group Purchasing department is composed of the following divisions:

- a division in charge of risks, compliance, permanent controls and outsourcing;
- a division in charge of the digitalisation of purchases;
- two Purchasing divisions made up of specialised buyers by category;
- a division dedicated to CSR;
- a corporate secretary in charge of communication, human resources and training.

All buyers of Crédit Agricole Group and their managers, purchasing assistants, purchasing support teams including those in charge of its information system and the analysis of supplier risks form part of the Purchasing business line.

This business line has the role of designing and overseeing the daily operation of the Group purchasing system. It is coordinated by the Group Purchasing department.

The strategy and decisions affecting the Responsible Purchasing Policy are the responsibility of the Strategic Purchasing Committee, a cross-functional body at Group level. This body is composed of a Regional Bank Chairman, Chief Executive Officers of the subsidiaries of Crédit Agricole S.A. and Regional Banks, and representatives of the Fédération nationale du Crédit Agricole (FNCA) and of Crédit Agricole S.A.

4.2.3 TARGETS

The aim of the **Group Responsible Purchasing Policy** is to adapt to major challenges in the regions where the Group operates, to contribute to the overall performance of its companies and to act for the climate and transition to a low carbon economy. It is fully in line with the **Group's Code of Ethics and Societal Project**.

It aims to favour the purchase of a good or service taking into consideration both the **justified need** and **economic, societal and environmental aspects**, while ensuring **a balance in relations between the Company and its suppliers**, in respect of their reciprocal rights.

This policy is part of a **committed and responsible approach**, and is intended to be a **mutual vector for progress and innovation**. It is addressed at all **employees and players** in the **purchasing process** and their **suppliers**.

A low-carbon transition component was added to this policy in 2023. It is now based on six major pillars:

1. adopting a responsible behaviour with suppliers, and particularly in terms of payment terms;
2. contributing to the economic competitiveness of ecosystem;
3. Constantly monitoring the quality of relationships with suppliers;
4. integrating environmental and societal aspects into our purchasing;
5. taking action for the transition to a low-carbon economy; and
6. Including this Responsible Purchasing Policy in existing governance arrangements.

4.2.4 SCOPE OF APPLICATION

The Group Responsible Purchasing Policy applies to the scope of Crédit Agricole Group worldwide.

4.2.5 ACTION PLANS

Crédit Agricole Group adopts responsible behaviour in its relationship with suppliers and constantly monitors the quality of interactions it engages in with them. To this end, it applies a Group Responsible Purchasing Policy, broken down into operational actions.

4.2.5.1 ADOPTING RESPONSIBLE BEHAVIOUR IN THE RELATIONSHIP WITH SUPPLIERS

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Monitor the balance of business relationships by adopting respectful practices and behaviours;
- Favour reciprocal commitments, respecting the rights of each party;
- Provide visibility in planning of purchases.

ACTION PLAN

MONITOR PAYMENT TERMS

Crédit Agricole Group actively monitors its supplier payment terms and assigns as much importance to SMEs as to other corporates. Each Crédit Agricole Group entity reports its monitoring metrics at least once a year, which are then consolidated at Crédit Agricole Group level. Crédit Agricole Group's average payment terms stood at 24.57 days at 31 December 2025.

IMPLEMENT A PLAN TO IMPROVE AVERAGE PAYMENT TERMS, PARTICULARLY BY REDUCING PAYMENT DELAYS

To reduce the number of invoices paid late, various entities have brought in payment term improvement plans.

In addition, a portion of the variable compensation of buyers and purchasing managers is indexed to their contribution to improving average payment terms and reducing the late payment of invoices.

4.2.5.2 CONTRIBUTING TO THE ECONOMIC COMPETITIVENESS OF THE ECOSYSTEM

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Encourage the diversity of regional corporates and strengthen social cohesion and inclusion;
- Promote discussions with local players and thereby contribute to regional development;
- Stimulate innovation with suppliers to create value;
- Assess the overall cost of the life cycle.

ACTION PLAN

INCREASE INCLUSIVE PURCHASES (SHELTERED AND DISABILITY-FRIENDLY SECTOR)

The Purchasing business line promotes all of the inclusive purchases, particularly in France, in order to strengthen social cohesion and inclusion through:

- purchasing as a driver for the employment of vulnerable groups (sheltered and disability-friendly working structures, workforce integration structures);
- the use of undertakings in the sheltered and disability-friendly sector is an integral part of the Crédit Agricole S.A. group disability agreement⁽¹⁾;
- purchasing to develop employment in the regions in which the Group operates;
- purchasing from companies located in rural revitalisation areas (ZRR), in priority urban neighbourhoods (QPV);
- purchasing from companies in the social and solidarity economy.

(1) <https://www.credit-agricole.com/pdfPreview/189198>

Training about how to implement an inclusive purchasing approach was delivered by the Group Purchasing department and resources are available for buyers to identify the relevant suppliers. The metrics are described in detail in part 4.2.6.1 “Management of the relationship with suppliers”.

4.2.5.3 CONSTANTLY MONITORING THE QUALITY OF RELATIONSHIPS WITH SUPPLIERS

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Involve buyers from the moment the need is expressed;
- Enhance the purchasing skills of internal players (buyers/decision-makers);
- Develop reciprocal company/supplier knowledge;
- Establish a mediation mechanism.

ACTION PLAN

COMMUNICATE REGULARLY WITH SUPPLIERS

To maintain a relationship based on trust with suppliers, promote communication, share strategic guidelines and messages, and to take into account their concerns, Crédit Agricole Group has implemented a system for active stakeholder engagement (buyers/suppliers/decision-makers) including the following actions:

- a dedicated page on the Corporate website ⁽¹⁾, for information purposes, allowing suppliers to contact the Purchasing department;
- annual satisfaction surveys to gather feedback from suppliers;
- an annual meeting named “les Rencontres Fournisseurs” (Suppliers’ Meeting), organised both in person and remotely with more than 700 participants;
- regular reviews with the main suppliers;
- a dedicated newsletter sent to them every six months, supplemented by a specific publication on decarbonisation.

The results and information gathered through these channels of dialogue contribute to the approach of ensuring ongoing improvement of Crédit Agricole Group’s Responsible Purchasing and its action plans.

TRAIN BUYERS IN CSR ISSUES

As part of its Group Responsible Purchasing Policy, the Purchasing business line monitors the training of buyers, particularly on environmental, societal and governance (ESG) aspects and their professional development in a constantly changing environment.

To this end, a global training programme dedicated to CSR and supplier risks is offered to all buyers, and more specifically:

- an e-learning which provides good CSR habits as part of the purchasing process;
- a purchasing CSR training module designed for newcomers within the Purchasing business line;
- specific training modules on the decarbonisation of purchases;
- a training module on awareness of supplier risks (KYS).

Aligned with the challenges of the Group Societal Project in terms of CSR and integration, new sessions on responsible purchasing and inclusive purchasing were rolled out in 2025.

On a more general basis, a Purchasing Intranet is made available to all players in the Purchasing business line. It lists a vast range of resources and documents related to the Purchasing business line, including the CSR Purchasing component.

IMPLEMENT A MEDIATION SYSTEM AND INFORM STAKEHOLDERS

Crédit Agricole Group has a strong commitment to responsible purchasing, at the foundation of which is a healthy and balanced relationship with its suppliers and subcontractors. In this regard, an in-house mediator is appointed within the Group.

The Chief Sustainability and Impact Officer, a member of the Executive Committee of Crédit Agricole S.A., is in position since 2018 for the Crédit Agricole S.A. scope. It has been extended to all entities of Crédit Agricole Group in France and internationally since 2020.

The assistance of the mediator may be sought as part of a voluntary mediation approach, either by a supplier or by an in-house service, when difficulties arise to make their positions understood. The officer’s role is to restore dialogue between the parties and overcome differences.

The “mediation” clause is generally included in most specifications and contracts.

The Purchasing business line regularly reminds its stakeholders of the role of the in-house mediator, particularly at Supplier Meetings and in the newsletters that are sent to them. Information on the system was provided to all employees in 2024.

Externally, the process of seeking the mediator’s assistance is visible in the Supplier area of the Group website ⁽¹⁾ along with the generic contact email address and a video of the mediator presenting their role.

The assistance of the mediator was sought three times in 2025.

4.2.5.4 INTEGRATING ENVIRONMENTAL AND SOCIETAL ASPECTS INTO PURCHASING

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Identify and map risks and opportunities;
- Take CSR criteria into account when choosing a good or service, and when selecting suppliers.

ACTION PLAN

INTEGRATE THE CSR RATING OF SUPPLIERS INTO PURCHASING PROCESSES

Crédit Agricole Group places great importance on the quality of its sourcing and the prevention of CSR risks. To this end, the Purchasing business line has extended integration of the CSR dimension to all purchasing processes. This is to assess both the ESG performance of suppliers and that of the goods and services purchased.

The CSR performance of suppliers is assessed periodically, including when entering into a relationship, during the call for tenders phase and to coincide with dedicated assessment campaigns. It is entrusted to EcoVadis, a trusted third party. If a supplier’s rating is below a minimum threshold, the supplier is invited to initiate a progress plan aimed at improving their rating.

The CSR assessment of goods and services purchased takes the form of CSR criteria, the weighting of which was increased in 2025 from 15% to a minimum of 20% of the overall assessment score during a Purchasing project, or between 20% and 30% minimum for the categories presenting high risks in environmental, social and ethical issues. This requirement applies to the entities and is recommended for the Regional Banks.

(1) <https://www.credit-agricole.com/en/group/you-are-a-supplier-or-would-like-to-become-a-supplier>

The CSR criteria, common to all purchasing projects, are divided into four categories:

- assessment of the supplier by an independent third party;
- assessment criteria on the supplier's approach in terms of inclusion;
- assessment criteria on the supplier's approach in relation to decarbonisation;
- specific criteria according to the purchasing category (see details in section "CSR risks" below).

See part 4.2.6.1 "Management of the relationship with suppliers".

This supplier CSR assessment system may be supplemented by on-site audits initiated in partnership with other banks and carried out by an external auditor. The on-site audit process covers the following components: Human rights, Health and Safety, and Environment, particularly for the purchasing sectors and suppliers common to the banking sector. For instance, audits were carried out on cash transport, ATMs and document shuttle services for branches. In 2025, audits were conducted on suppliers common to the banking sector with regard to cleanliness.

The entire risk management process is summarised in the diagram below:

OVERVIEW OF RISK AND COMPLIANCE MANAGEMENT ACTIONS IN PURCHASING

MANAGE RISKS, AND SPECIFICALLY CSR RISKS

The Group Purchasing department has a Purchasing Risks division dedicated to risks, compliance and permanent controls. This division's role is to prevent and manage the various risks to which purchases are exposed, both by avoiding the generation of potential negative impacts on suppliers, and ensuring that working methods are in line with regulatory requirements.

The Purchasing business line has general Know Your Supplier (KYS) standards aimed at presenting the data and processes in place to manage supplier-related risks in the Group.

This approach includes:

- a KYS "umbrella" procedural note that includes the scope and key elements to use from the data and the expected processes both in the entities and centrally in the Group Purchasing department. This note has been adapted for the Regional Banks;
- three functional notes, which are more operational and detailed, on supplier identification (definition of identifiers, responsibilities and handling), supplier scoring (definition of three risk levels – low, medium and high – and operational consequences) and supplier screening (in terms of international sanctions, the Sapin II law and fraud/corruption-oriented negative information and duty of vigilance).

The Group Purchasing department organises and contributes to the completeness of supplier data, and to its enhancement, including for related parties (beneficial owners, main shareholders and senior executives). It also assumes responsibility for the control and monitoring of financial risks, in line with the entities, including for aspects related to financial health, economic dependence and concentration, as well as overseeing the gathering of legal documents on behalf of and in association with the entities.

This supplier knowledge plays a key role in applying the stipulations issued as part of the Sapin II law and duty of vigilance law as regards the “Knowledge of third parties” component, and in particular suppliers, and to comply with the regulatory provisions in place as regards international sanctions.

It thus enables:

- improved reliability in the screening of supplier data;
- establishment of a supplier risk profile and a standardised compliance score within the Group;
- implementation of constant vigilance measures, adapted to the degree of criticality of identified risks.

The Purchasing business line has a specific body for managing risks including CSR aspects and composed of representatives of various internal stakeholders of the Group. It meets quarterly to assess risks in financial, ethical, environmental and social aspects. Its decisions are binding on all Crédit Agricole S.A. entities and are recommended for Regional Banks.

CSR RISKS

The approach to managing CSR risks steered by the Group Purchasing department incorporates risk identification and assessment elements into the purchasing process.

1. It is based primarily on a mapping of CSR risks by purchasing category, which was revised in 2025. This mapping established in partnership with various banks and supported by AFNOR is used to identify and prioritise the purchasing categories presenting salient risks with regard to the areas of ethics, social and environmental issues. In this regard, categories with a risk level deemed high (construction work, IT and telecom equipment and servers, fluids and energy, vehicles and advertising materials) have been identified and are the subject of enhanced monitoring in which assessment by a trusted third party is mandatory.
2. In terms of corruption, the Group Purchasing department shares a supplier risk assessment system with the bank BPCE on a shared platform. This system meets the obligations of the Sapin II law and the recommendations of the AFA (French Anti-Corruption Agency). In 2024, the system was extended to the detection of risks related to the environment and social and human rights.
3. Finally, Crédit Agricole Group gives the employees of its suppliers and partners the possibility of using a whistle-blowing ⁽¹⁾ mechanism if they witness or are victims of serious events ⁽²⁾ or events contrary to the Code of Conduct and if they have not been able to use normal hierarchical channels for reporting problems. This whistle-blowing mechanism, under the responsibility of the Group Compliance department, guarantees the strictest confidentiality of the data contained in the report and of the whistleblower's identity. After making a report, the whistleblower receives an acknowledgement of receipt and is then informed of its admissibility as soon as possible. Following examination, the whistleblower is advised of the case's closure and the action that can be taken. For more information on the procedure to handle whistle-blowing reports, please refer to the Practical user guide for whistle-blowers ⁽³⁾.

4.2.5.5 TAKING ACTION FOR THE TRANSITION TO A LOW-CARBON ECONOMY

REMINDER OF THE PRINCIPLES OF THE GROUP POLICY

- Mobilise all business lines to transform how they operate as part of a low-carbon initiative;
- Engage and encourage suppliers to measure their carbon footprint and reduce their emissions;
- Consider the carbon weight criterion in the assessment, listing and monitoring of suppliers.

ACTION PLAN

IMPLEMENT A LOW-CARBON PURCHASING PATHWAY

The low-carbon purchasing pathway project contributes to the Group's aim of “Acting for the climate and the transition to a low-carbon economy” and forms an integral part of the environmental aspect of the Group Responsible Purchasing Policy. Scoping work led to an initial measurement of the carbon footprint of purchases of goods and services (Scope 3.1) based on external expenditure mainly associated with monetary emission factors (from ADEME) for the entire Crédit Agricole Group. This initial measurement identified the most emissions-intensive purchasing categories.

In order to meet these challenges, new training modules have been added to the business line's professional development programme:

- a series entitled “La CASA des achats responsables” was created and distributed to all employees of the business line. This awareness-raising tool, consisting of several seasons and episodes, is designed to address the main themes of the Societal Project: season 1 entitled “CSR”, season 2 entitled “Decarbonisation” etc.;
- most employees from the Purchasing business line also attended the *La Fresque du climat* training. This was an opportunity for them to understand the causes and consequences of climate change;
- in addition, one 1.5-hour training module was offered to all buyers on the decarbonisation of purchasing (“Decarbonisation challenges and my role as a buyer”).

To help its SME suppliers commit to sustainability, Crédit Agricole S.A. has joined the Alliance for SME Decarbonisation initiative, led by Pacte PME alongside several major French groups. It supports SMEs in their carbon reduction pathways by offering them dedicated programmes.

Finally, Crédit Agricole S.A. has joined the “Achats 2030” collective, made up of 30 players committed to the environmental transition: seven French banks/insurers, 12 strategic suppliers, and independent experts. The collective aims to standardise carbon accounting for purchases, identify decarbonisation levers, and widely share its deliverables. In 2025, work focused on payment instruments, intellectual services, networks/telephony and transport/freight.

For the first time in 2025, Crédit Agricole S.A. was included in the Carbon Disclosure Project's (CDP) Supplier Engagement Assessment A list (the CDP is an international non-profit organisation that manages one of the world's largest environmental databases and measures the ability of undertakings to effectively take action on climate issues, with ratings from A to D-). The Group was recognised for its actions to engage its suppliers (rated B in 2023, then A- in 2024).

(1) Reference to the existence of this mechanism is made on the page dedicated to the whistle-blowing system on the Crédit Agricole website: <https://www.credit-agricole.com/en/group/ethics-compliance/whistleblowing-system>

(2) A crime, an offence, a threat or harm to the general interest, a violation or an attempt to conceal a violation of an international agreement duly ratified or approved by France, of unilateral action of an international organisation taken on the basis of such an agreement, of the law of the European Union, of the law or of the regulations.

(3) <https://www.credit-agricole.com/en/group/ethics-compliance/whistleblowing-system>

4.2.6 METRICS AND TARGETS

The data collection scope considered for the metrics “Management of the relationship with suppliers” is France. The data collection scope considered for the metrics “Payment practices” is global.

4.2.6.1 MANAGEMENT OF THE RELATIONSHIP WITH SUPPLIERS

To measure the effectiveness of its responsible approach to relationships with its suppliers, Crédit Agricole Group uses the following metrics:

Metric	Calculation method	2025 Results	2024 Results
Share of expenses by entities registered in France from suppliers registered in France	Sum of external expenses from companies registered in France (in euros)/Total external expenses in France and abroad (in euros)	89%	88%
Share of expenses by entities registered in France from SMEs registered in France	Sum of external expenses from SMEs registered in France (in euros)/Total external expenses in France (in euros)	30.18%	31.67%
Amount of “Inclusive Purchasing” expenses in France by entities registered in France (from the Sheltered and Disability-friendly Sector)	Sum of expenses from “EA/ESAT” (adapted companies and vocational rehabilitation centres) registered in France (<i>in euros</i>)	16,442,496	14,003,614
Share of expenses by entities registered in France with suppliers assessed for CSR by an independent third party	Sum of expenses from suppliers registered in France and with a CSR rating from an independent third party (EcoVadis) (in euros)/Total external expenses in France (in euros)	43.49%	41.40%

The amount of inclusive purchasing expenditure increased considerably in 2025. This increase can be explained by the policies and action plans implemented to encourage inclusive purchasing and improve data reliability.

4.2.6.2 PAYMENT PRACTICES

To implement a responsible approach to relations with its suppliers, Crédit Agricole Group uses three metrics as described below. The criteria used for these metrics are as follows:

- the categories of suppliers used by the Group are “Total” and “SME” (including very small businesses). The scope covered includes entities in France and abroad;
- Crédit Agricole Group’s standard payment term is 60 calendar days from the date the invoice is issued.

AVERAGE PAYMENT TERMS IN CALENDAR DAYS

Average payment terms (<i>in days</i>)	2025	2024
Total	24.57	30.37
Focus on SMEs	23.85	31.38

As a result of the implemented action plans, the average payment term has been reduced to less than 25 days.

The consolidated average payment term corresponds to the average payment period, i.e. the period between the invoice payment date and the invoice issuance date in calendar days, weighted by the total number of invoices.

Group level target: Remain below 40 days.

SHARE OF INVOICES PAID WITHIN THE STANDARD TERMS, IN NUMBER AND IN AMOUNT (%)

Payments made within the standard Group terms		2025	2024
In amount (<i>as a %</i>)	Total	94.70%	93.54%
	Of which SMEs	94.74%	91.95%
In number (<i>as a %</i>)	Total	93.98%	90.55%
	Of which SMEs	94.40%	89.79%

As a result of the implemented action plans, the rate of invoices paid within standard terms has improved both in amount and number.

The categories of suppliers used by the Group are “Total” and “SME”.

Metric	Calculation method
Share of invoices paid within the standard Group terms, in amount (all suppliers)	(Total amount of invoices – amount of invoices paid late more than 60 days after the invoicing date) / total amount of invoices
Share of invoices paid within the standard Group terms, in amount (SME suppliers)	(Total amount of VSB and SME invoices – amount of invoices paid late, more than 60 days after the invoicing date to SMEs)/total amount of SME invoices
Share of invoices paid within the standard Group terms, in number (all suppliers)	(Total number of invoices – number of invoices paid late more than 60 days after the invoicing date) / total number of invoices
Share of invoices paid within the standard Group terms, in number (SME suppliers)	(Total number of SME invoices – number of invoices paid late, more than 60 days after the invoicing date to SMEs) / total number of SME invoices

Group level target: 100% over the next two years (at 31 December 2027).

ONGOING LEGAL PROCEEDINGS CONCERNING LATE PAYMENTS

Number of legal proceedings related to late payment of invoices during the reference period (calendar year from 1 January to 31 December).

Number of legal proceedings	2025	2024
Total	3	1

Metric	Calculation method
Number of ongoing legal proceedings during the reference period	Sum of legal proceedings related to late payment of invoices during the reference period

Target: Aiming for zero by 31 December 2026.

APPENDICES

APPENDIX 1: INCORPORATION BY REFERENCE

List of Data points (DP)/Disclosure requirements (DR)	Reference in management report	Reference in document
SBM-1 40 a) i)	Chapter 1 of the 2025 URD: “About Crédit Agricole Group”	1.3.1.1. Crédit Agricole Group's general strategy and business model

ESRS E3-1 Dedicated policy paragraph 13	Metric No. 8, table 2, annex I				Not conclusive
ESRS E3-1 Sustainable oceans and seas paragraph 14	Metric No. 12, table 2, annex I				Not conclusive
ESRS E3-4 Total water recycled and reused paragraph 28 c)	Metric No. 6.2, table 2, annex I				Not conclusive
ESRS E3-4 Total water consumption in m ³ per net revenue on own operations paragraph 29	Metric No. 6.1, table 2, annex I				Not conclusive

Disclosure Requirement and related datapoint	SFDR reference	Pillar 3 reference	Benchmark regulation reference	European climate law reference	Sustainability report section reference
ESRS 2 – IRO-1 – E4 – paragraph 16 a) i)	Metric No. 7, table 1, annex I				1.4.1.3. Description of the process to identify and assess material impacts, risks and opportunities related to other environmental issues
ESRS 2 – IRO-1 – E4 – paragraph 16 b)	Metric No. 10, table 2, annex I				1.4.1.3. Description of the process to identify and assess material impacts, risks and opportunities related to other environmental issues
ESRS 2 – IRO-1 – E4 – paragraph 16 c)	Metric No. 14, table 2, annex I				1.4.1.3. Description of the process to identify and assess material impacts, risks and opportunities related to other environmental issues
ESRS E4-2 Sustainable land/ agriculture practices or policies, paragraph 24 b)	Metric No. 11, table 2, annex I				Not conclusive
ESRS E4-2 Sustainable oceans/seas practices or policies paragraph 24 c)	Metric No. 12, table 2, annex I				Not conclusive
ESRS E4-2, paragraph 24 d) Policies to address deforestation	Metric No. 15, table 2, annex I				Not conclusive
ESRS E5-5 Non-recycled waste paragraph 37 d)	Metric No. 13, table 2, annex I				Not conclusive
ESRS E5-5 Hazardous waste and radioactive waste paragraph 39	Metric No. 9, table 1, annex I				Not conclusive
ESRS 2 – SBM3 – S1 Risk of incidents of forced labour paragraph 14 f)	Metric No. 13, table 3, annex I				Not material
ESRS 2 – SBM3 – S1 Risk of incidents of child labour paragraph 14 g)	Metric No. 12, table 3, annex I				3.1.1.3. Management and governance of impacts, risks and opportunities within the HR division
ESRS S1-1 Human rights policy commitments paragraph 20	Metric No. 9, table 3, and metric No. 11, table 1, annex I				3.1.1.1. The Human Project, a major driver of Crédit Agricole S.A.'s ambitions. 3.1.2.2. Social dialogue

Disclosure Requirement and related datapoint	SFDR reference	Pillar 3 reference	Benchmark regulation reference	European climate law reference	Sustainability report section reference
ESRS S1-1 Due diligence policies on issues addressed by the fundamental International Labour Organization Conventions 1 to 8, paragraph 21			Annex II of Commission Delegated Regulation (EU) 2020/1816		3.1.1.1. The Human Project, a major driver of Crédit Agricole S.A.'s ambitions. 3.1.2.1. Human capital development policy 3.1.2.2. Social dialogue 3.1.2.3. Diversity 3.1.2.4. Working environment policy
ESRS S1-1 Processes and measures for preventing trafficking in human beings paragraph 22	Metric No. 11, table 3, annex I				3.1.1.1. The Human Project, a major driver of Crédit Agricole S.A.'s ambitions.
ESRS S1-1 Workplace accident prevention policy or management system paragraph 23	Metric No. 1, table 3, annex I				3.1.2.2. Social dialogue 3.1.2.4. Working environment policy
ESRS S1-3 Grievance/complaints handling mechanisms paragraph 32 c)	Metric No. 5, table 3, annex I				Not material
ESRS S1-14 Number of fatalities and number and rate of work-related accidents paragraph 88 b) and c)	Metric No. 2, table 3, annex I		Annex II of Commission Delegated Regulation (EU) 2020/1816		3.1.3.6. Health and safety metrics
ESRS S1-14 Number of days lost to injuries, accidents, fatalities or illness paragraph 88 e)	Metric No. 3, table 3, annex I				3.1.3.6. Health and safety metrics
ESRS S1-16 Unadjusted gender pay gap paragraph 97 a)	Metric No. 12, table 1, annex I		Annex II of Commission Delegated Regulation (EU) 2020/1816		3.1.3.7. Compensation metrics
ESRS S1-16 Excessive CEO pay ratio paragraph 97 b)	Metric No. 8, table 3, annex I				3.1.3.7. Compensation metrics
ESRS S1-17 Cases of discrimination paragraph 103 a)	Metric No. 7, table 3, annex I				3.1.3.8. Incidents, complaints and severe human rights impacts
ESRS S1-17 Non-respect of UNGPs on Business and Human Rights and OECD guidelines paragraph 104 a)	Metric No. 10, table 1, and metric No. 14, table 3, annex I		Annex II of Commission Delegated Regulation (EU) 2020/1816; article 12, paragraph 1 of Commission Delegated Regulation (EU) 2020/1818		3.1.3.8. Incidents, complaints and severe human rights impacts

Disclosure Requirement and related datapoint	SFDR reference	Pillar 3 reference	Benchmark regulation reference	European climate law reference	Sustainability report section reference
ESRS 2 – SBM3 – S2 Significant risk of child labour or forced labour in the value chain paragraph 11 b)	Metrics No. 12 and No. 13, table 3, annex I				Not material
ESRS S2-1 Human rights policy commitments paragraph 17	Metric No. 9, table 3, and metric No. 11, table 1, annex I				Not material
ESRS S2-1 Policies related to workers in the value chain paragraph 18	Metrics No. 11 and No. 4, table 3, annex I				Not material
ESRS S2-1 Non-respect of UNGPs on Business and Human Rights and OECD guidelines paragraph 19	Metric No. 10, table 1, annex I		Annex II of Commission Delegated Regulation (EU) 2020/1816; article 12, paragraph 1 of Commission Delegated Regulation (EU) 2020/1818		Not material
ESRS S2-1 Due diligence policies on issues addressed by the fundamental International Labour Organization Conventions 1 to 8, paragraph 19			Annex II of Commission Delegated Regulation (EU) 2020/1816		Not material
ESRS S2-4 Human rights issues and incidents connected to its upstream or downstream value chain paragraph 36	Metric No. 14, table 3, annex I				Not material
ESRS S3-1 Human rights policy commitments paragraph 16	Metric No. 9, table 3, annex I and metric No. 11, table 1, annex I				Not material
ESRS S3-1 Non-respect of UNGPs on Business and Human Rights, ILO principles and/or OECD guidelines paragraph 17	Metric No. 10, table 1, annex I		Annex II of Commission Delegated Regulation (EU) 2020/1816; article 12, paragraph 1 of Commission Delegated Regulation (EU) 2020/1818		Not material
ESRS S3-4 Human rights issues and incidents paragraph 36	Metric No. 14, table 3, annex I				Not material

Disclosure Requirement and related datapoint	SFDR reference	Pillar 3 reference	Benchmark regulation reference	European climate law reference	Sustainability report section reference
ESRS S4-1 Policies related to consumers and end-users paragraph 16	Metric No. 9, table 3, and metric No. 11, table 1, annex I				Not material
ESRS S4-1 Non-respect of UNGPs on Business and Human Rights and OECD guidelines paragraph 17	Metric No. 10, table 1, annex I		Annex II of Commission Delegated Regulation (EU) 2020/1816; article 12, paragraph 1 of Commission Delegated Regulation (EU) 2020/1818		Not material
ESRS S4-4 Human rights issues and incidents paragraph 35	Metric No. 14, table 3, annex I				Not material
ESRS G1-1 United Nations Convention against Corruption paragraph 10 b)	Metric No. 15, table 3, annex I				Not material
ESRS G1-1 Protection of whistle-blowers, paragraph 10 d)	Metric No. 6, table 3, annex I				Not material
ESRS G1-4 Fines for violation of anti-corruption and anti-bribery laws paragraph 24 a)	Metric No. 17, table 3, annex I		Annex II of Commission Delegated Regulation (EU) 2020/1816		4.1.4.3. Combating corruption
ESRS G1-4 Standards of anti-corruption and anti-bribery paragraph 24 b)	Metric No. 16, table 3, annex I				4.1.4.3. Combating corruption

In accordance with the Group's methodology, a link is established between each impact, risk and opportunity and the disclosure requirements. Thus, the materiality of an IRO triggers the obligation to disclose the associated information.

ANNEXE 5: DISCLOSURE REQUIREMENTS UNDER THE EUROPEAN TAXONOMY

EU TAXONOMY INDICATORS FOR SUSTAINABLE ACTIVITIES AT 31 DECEMBER 2025

TEMPLATE 1 - ASSETS FOR THE CALCULATION OF GAR
(BASED ON COUNTERPARTY GREEN REVENUES)

Stock (in millions of euros)		a	b	c	d	e	f	g	h	i	
		Total gross carrying amount	Of which Taxonomy-eligible		Of which Taxonomy- aligned						
					Breakdown per environmental objective						
					Climate Change Mitigation (CCM)	Climate Change Adaptation (CCA)	Water and marine resources (WTR)	Circular economy (CE)	Pollution (PPC)	Biodiversity and Ecosystems (BIO)	
1	GAR - COVERED ASSETS IN BOTH NUMERATOR AND DENOMINATOR	688,589	536,498	74,882	74,438	85	139	193	27	0	
2	Loans and advances, debt securities and equity instruments not HFT eligible for GAR calculation	688,500	536,498	74,882	74,438	85	139	193	27	0	
3	Financial undertakings	141,749	46,315	7,071	7,062	8	0	1	0	0	
4	Loans and advances	110,202	38,962	5,837	5,836	0	0	0	0	0

REPORT ON THE CERTIFICATION OF SUSTAINABILITY INFORMATION AND VERIFICATION OF THE DISCLOSURE REQUIREMENTS UNDER ARTICLE 8 OF REGULATION (EU) 2020/852

(Year ended 31 December 2025)

This is a translation into English of the Statutory Auditors report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852 of the Company issued in French and it is provided solely for the convenience of English-speaking users.

This report should be read in conjunction with, and construed in accordance with, French law and the H2A guidelines on “Limited assurance engagement – Certification of sustainability reporting and verification of disclosure requirements set out in Article 8 of Regulation (EU) 2020/852”.

To the General Meeting of Shareholders

CRÉDIT AGRICOLE S.A.

12, place des États-Unis

92127 Montrouge Cedex

This report is issued in our capacity as statutory auditor of CRÉDIT AGRICOLE GROUP. It covers the sustainability information and the information required by Article 8 of Regulation (EU) 2020/852, relating to the year ended 31 December 2025 and included in section 2.2 “Sustainability report – Crédit Agricole Group” of the group management report, hereinafter the “Sustainability report”.

Our work relating to this information was carried out in an evolving context characterized by uncertainties regarding the interpretation of the regulations and the development of market practices.

Pursuant to Article L. 233-28-4 of the French Commercial Code, CRÉDIT AGRICOLE GROUP is required to include the above mentioned information in a separate section of the group management report.

This information provides an understanding of the impacts of the Group’s activities on sustainability matters, as well as how these matters influence the Group’s business development, results and situation. Sustainability matters include environmental, social and governance issues.

In accordance with paragraph II of Article L. 821-54 of the aforementioned Code, our engagement consists in carrying out the procedures necessary to issue an opinion, expressing limited assurance, on:

- compliance with the requirements arising from the sustainability reporting standards adopted by the European Commission pursuant to Article 29b of Directive (EU) 2013/34 of the European Parliament and of the Council of 26 June 2013, as amended by Directive (EU) 2022/2464 of the European Parliament and of the Council of 14 December 2022 (hereinafter the ‘ESRS’ – European Sustainability Reporting Standards), in respect of the process implemented by CRÉDIT AGRICOLE GROUP to determine the information disclosed, which includes, where applicable, the obligation to consult the Works Council as provided for in the sixth paragraph of Article L.2312-17 of the French Labour Code;
- compliance of the sustainability information included in the Sustainability report with the requirements of L. 233-28-4 of the French Commercial Code, including ESRS; and
- compliance with the reporting requirements set out in Article 8 of Regulation (EU) 2020/852.

This engagement is carried out in compliance with the ethical rules, including independence, and quality control rules prescribed by the French Commercial Code.

It is also governed by the H2A guidelines on “Limited assurance engagement – Certification of sustainability reporting and verification of disclosure requirements set out in Article 8 of Regulation (EU) 2020/852”.

In the three separate sections of the report that follow, we present, for each of the sections of our engagement, the nature of the procedures that we carried out, the conclusions that we drew from these procedures and, in support of these conclusions, the elements to which we paid particular attention and the procedures that we carried out with regard to these elements. We draw your attention to the fact that we do not express a conclusion on any of these elements taken individually and that the procedures described should be considered in the overall context of the formation of the conclusions issued in respect of each of the three sections of our engagement.

Finally, where deemed necessary to draw your attention to one or more disclosures of sustainability information provided by CRÉDIT AGRICOLE GROUP in the group management report, we have included an emphasis of matter paragraph hereafter.

LIMITS OF OUR ENGAGEMENT

As the purpose of our engagement is to express limited assurance, the nature (choice of techniques), extent (scope) and timing of the procedures are less than those required to obtain reasonable assurance.

This engagement does not consist in guaranteeing the viability or the quality of the management of CRÉDIT AGRICOLE GROUP, nor in providing an assessment – which would go beyond compliance with ESRS disclosure requirements – of the appropriateness of the choices made by CRÉDIT AGRICOLE GROUP, in terms of action plans, targets, policies, scenario analysis and transition plans.

Furthermore, as forward-looking information is by nature uncertain, actual future outcomes may differ significantly from the forward-looking information presented in the Sustainability Report.

Report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852

However, our engagement enables us to express conclusions regarding the process for determining the published sustainability information, the information itself, and the information published pursuant to Article 8 of Regulation (EU) 2020/852, with respect to the absence of – or, conversely, the identification of – errors, omissions or inconsistencies of such significance that they could influence the decisions of readers of the information subject to our procedures.

Sustainability information and the information required under Article 8 of Regulation (EU) 2020/852 may be subject to inherent uncertainty due to the state of scientific knowledge and the quality of the external data used. Certain information is sensitive to the methodological choices, assumptions and/or estimates applied in preparing it, as presented in the Group management Report.

COMPLIANCE WITH THE ESRS OF THE PROCESS IMPLEMENTED BY CRÉDIT AGRICOLE GROUP TO DETERMINE THE INFORMATION REPORTED, AND COMPLIANCE WITH THE REQUIREMENT TO CONSULT THE SOCIAL AND ECONOMIC COMMITTEE PROVIDED FOR IN THE SIXTH PARAGRAPH OF ARTICLE L. 2312-17 OF THE FRENCH LABOUR CODE

NATURE OF PROCEDURES CARRIED OUT

Our work consisted in verifying that:

- the process defined and implemented by CRÉDIT AGRICOLE GROUP, including the obligation to consult the Works Council as required by the sixth paragraph of Article L. 2312-17 of the French Labour Code, enabled the entity, in accordance with the ESRS, to identify and assess its impacts, risks and opportunities related to sustainability matters, and to identify those impacts, risks and opportunities considered material that led to the publication of sustainability information in the Sustainability Report; and
- the information provided on this process is also compliant with the ESRS.

CONCLUSION OF THE PROCEDURES CARRIED OUT

Based on the procedures we performed, we did not identify any material errors, omissions or inconsistencies regarding the compliance of the process implemented by CRÉDIT AGRICOLE GROUP with the ESRS.

EMPHASIS OF MATTERS

Without qualifying the conclusion expressed above, we draw your attention to the information presented in the section 'Double materiality analysis' of paragraph 1.1.2 'Disclosures in relation to specific circumstances' and in paragraph 1.4.1.3 'Description of the processes for identify and assess material impacts, risks and opportunities to other environmental issues' of the Sustainability Report, which describe:

- the limitations explaining why CRÉDIT AGRICOLE GROUP considers that, for the 2025 financial year, it is not yet in a position to reach a definitive conclusion on the materiality of topics E2, E3, E4 and E5 (Pollution, Water and Marine Resources, Biodiversity and Ecosystems, and Resource Use and Circular Economy); and
- the exploratory work being pursued by the Group in order to develop a methodology that will enable it to conclude on the materiality of these topics.

ELEMENTS THAT RECEIVED PARTICULAR ATTENTION

We present below the matters to which we paid particular attention regarding the compliance of the process implemented by CRÉDIT AGRICOLE GROUP with the ESRS for determining the information disclosed.

The information relating to how CRÉDIT AGRICOLE GROUP updated its double materiality assessment process is provided in section 1.4.1.1 "General Description" of the Sustainability Report.

Through interviews with the individuals we deemed appropriate and by reviewing the available documentation, we familiarized ourselves with the analyses carried out by CRÉDIT AGRICOLE GROUP to identify and assess the internal and external factors that led to the update of the double materiality analysis process.

Based on our professional judgment, our procedures notably consisted in:

- exercising professional skepticism with respect to the documentation of the analyses performed by the Group, as well as the approach implemented to identify the internal and external factors to be considered;
- assess the appropriateness of the contextual and regulatory elements considered by the Group in light of our knowledge of the Group;
- assessing the relevance of the significant changes made by the Group regarding the identification of stakeholders and the identification of impacts, risks and opportunities, as well as the assessment of impact materiality and financial materiality, in light of our knowledge of the Group and of sectorial analyses and competitive benchmarks that we deemed relevant;
- assessing, for the significant changes affecting actual and potential impacts, risks and opportunities, the compliance of the Group's impact materiality and financial materiality assessment process (including the setting of thresholds) with the criteria defined by ESRS 1;
- assessing the appropriateness of the description provided in section 1.4.1 "Description of the processes for identifying and assessing material impacts, risks and opportunities" of the Sustainability Report.

COMPLIANCE OF THE SUSTAINABILITY INFORMATION INCLUDED IN THE SUSTAINABILITY REPORT WITH THE REQUIREMENTS OF ARTICLE L. 233-28-4 OF THE FRENCH COMMERCIAL CODE, INCLUDING THE ESRS

NATURE OF PROCEDURES CARRIED OUT

Our procedures consisted in verifying that, in accordance with legal and regulatory requirements, including the ESRS:

- the disclosures provided enable an understanding of the general basis for the preparation and governance of the sustainability information included in the Sustainability report, including the basis for determining the information relating to the value chain and the exemptions from disclosures used;
- the presentation of this information ensures its readability and understandability;
- the scope chosen by CRÉDIT AGRICOLE GROUP for providing this information is appropriate; and
- on the basis of a selection, based on our analysis of the risks of non-compliance of the information provided and the expectations of users, that this information does not contain any material errors, omissions or inconsistencies, i.e. that are likely to influence the judgement or decisions of users of this information.

CONCLUSION OF THE PROCEDURES CARRIED OUT

Based on the procedures we have carried out, we have not identified material errors, omissions or inconsistencies regarding the compliance of the sustainability information included in the Sustainability report, with the requirements of Article L. 233-28-4 of the French Commercial Code, including the ESRS.

EMPHASIS OF MATTERS

Without calling into question the conclusion expressed above, we draw your attention to the paragraphs of the Sustainability Report that set out the scope of emissions considered, as well as the limitations relating to the availability and quality of the data – which persist – and the methodologies applied by the Group in these circumstances to produce the corresponding estimates:

- for the transition plan, paragraphs 2.2.1 “Transition plan for climate change mitigation” and 2.4.1 “Targets related to climate change mitigation”; and
- for the calculation of financed emissions relating to the value chain (category 15 of scope 3 under the GHG Protocol), paragraph 2.4.2 “Gross GHG emissions for scopes 1, 2, 3 and total GHG emissions”.

ELEMENTS THAT RECEIVED PARTICULAR ATTENTION

We present below the matters to which we paid particular attention regarding the compliance of the sustainability information included in the Sustainability Report with the provisions of Article L.233-28-4 of the French Commercial Code, including with the ESRS.

INFORMATION REPORTED IN RELATION TO CLIMATE CHANGE (ESRS E1 TO E5)

The information disclosed in respect of climate change (ESRS E1) is presented in Section 2 ‘Responsibility for climate change’ of the Sustainability Report.

We present below the matters to which we paid particular attention regarding the compliance of this information with the ESRS.

With regard to the information provided on total GHG emissions (ESRS E1-6), as mentioned in section 2.4.2 “Gross scopes 1, 2, 3 GHG emissions and total GHG emissions” of the Sustainability Report, our work consisted primarily of:

- obtaining an understanding of the processes, methodologies, frameworks, data, and estimates used by the group to establish the information, including operational integration and associated internal control; and
- additionally, with regard to scope 1, scope 2 and scope 3 emissions (categories 1, 2 and 6) related to the group’s own operations:
 - assessing the appropriateness of the emission factors used and the calculation of the related conversions, as well as the calculation and extrapolation assumptions, taking into account the uncertainty inherent in the state of scientific or economic knowledge and the quality of the external data,
 - verifying, on a sample basis, the underlying data used to draw up the greenhouse gas emissions assessment and traced to supporting documents, as well as the accuracy of the calculations used to establish the estimated emissions;
- in addition, with regard to financed emissions (Scope 3, category 15 of the GHG Protocol):
 - understanding the scope of assets covered as described in the aforementioned note and assess its justification with regard to the applied framework,
 - verifying that the basis used for the calculation of financed emissions corresponds to the scope of assets covered as described and reconcile it with the consolidated balance sheet,
 - examining the method for determining the estimates, including the sectoral proxies used by the group,
 - verifying, on a sample basis, the accuracy of the calculations of financed emissions.

Report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852

Regarding the definition and information provided on the Transition Plan for climate change mitigation and adaption (ESRS E1-1), as mentioned in paragraph 2.2.1 “Transition plan for climate change mitigation” of the Sustainability report, our work consisted primarily to:

- assessing the information related to the scope retained for the Transition Plan (transition plan for own operations and sectoral transition plans on the value chain) as well as the processes, methodologies, frameworks, data, and estimates used by the group to establish the published information;
- assessing the compliance with the criteria set by ESRS E1, in particular the description of the main assumptions and reference climate scenarios underlying this plan, specified that we are not required to express a conclusion on the appropriateness or the level of ambition of the transition plan’s objectives;
- assessing the consistency of this transition plan with the commitments made by the group as transcribed in the governance minutes or other communications made by the group;
- assessing whether the transition plan is in line with the framework of the strategic plan as approved by the management and the group’s financial planning.

COMPLIANCE WITH THE REPORTING REQUIREMENTS SET OUT IN ARTICLE 8 OF REGULATION (EU) 2020/852

NATURE OF PROCEDURES CARRIED OUT

Our procedures consisted in verifying the process implemented by CRÉDIT AGRICOLE GROUP to determine the eligible and aligned nature of the activities of the entities included in the consolidation.

They also involved verifying the information reported pursuant to Article 8 of Regulation (EU) 2020/852, which involves checking:

- the compliance with the rules applicable to the presentation of this information to ensure that it is readable and understandable;
- on the basis of a selection, the absence of material errors, omissions or inconsistencies in the information provided, i.e. information likely to influence the judgement or decisions of users of this information.

CONCLUSION OF THE PROCEDURES CARRIED OUT

Based on the procedures we have carried out, we have not identified any material errors, omissions or inconsistencies relating to compliance with the requirements of Article 8 of Regulation (EU) 2020/852.

ELEMENTS THAT RECEIVED PARTICULAR ATTENTION

We determined that there were no specific items to communicate in our report.

1. REPORT OF THE BOARD OF DIRECTORS

ON CORPORATE GOVERNANCE TO THE GENERAL MEETING OF SHAREHOLDERS OF 20 MAY 2026 PURSUANT TO ARTICLES L. 225-37, L. 225-37-4 AND L. 22-10-10 OF THE FRENCH COMMERCIAL CODE (CODE DE COMMERCE)

REPORT ON CORPORATE GOVERNANCE FOR FINANCIAL YEAR 2025

In addition to the management report, this Board of Directors' Report on Corporate Governance presented pursuant to Article L. 225-37 of the French Commercial Code provides shareholders with the required information on the Board's activities in 2025, its composition, and the conditions under which the Board prepared and organised its work. It also presents the situation of Crédit Agricole S.A. in respect of the regulated information required under Articles L. 225-37-4 and L. 22-10-10 within the Board's remit.

Pursuant to Articles L. 22-10-8 and L. 22-10-9 of the French Commercial Code, this Governance Report also includes the compensation policy for each executive corporate officer and the Directors, and the components of the total compensation and the benefits in kind paid during financial year 2025 or awarded in the same financial year to the Chairman, Chief Executive Officer and Deputy Chief Executive Officers, which will be the subject of resolutions to be submitted to the General Meeting of 20 May 2026. The report details the above-mentioned components of compensation and specifies that the payment of the variable and exceptional

compensation is subject to approval of these components of compensation by the Ordinary General Meeting.

Lastly, excluding the Board of Directors' powers presented in this section, certain information required under Articles L. 225-37-4, L. 22-10-10 and L. 22-10-11 is presented in other sections of this document:

- the table summarising the authorisations in force granted by the General Meeting of Shareholders concerning capital increases, pursuant to Articles L. 225-129-1 and L. 225-129-2, or concerning the issuing or buyback of shares presented in this section, mentioning the use made of such authorisations during the financial year ("Information on the share capital and shareholders", in Chapter 8);
- the terms governing shareholder participation in the General Meeting as provided for in Articles 21 to 29 of the Articles of Association are available for consultation at the registered office of Crédit Agricole S.A. and on its website www.credit-agricole.com.

1.1. INFORMATION CONCERNING THE BOARD OF DIRECTORS' COMPOSITION AND FUNCTIONING

1.1.1 GENERAL PRESENTATION OF THE BOARD OF DIRECTORS

CHAIRMAN OF CRÉDIT AGRICOLE S.A.

The following information covers the activities of Dominique Lefebvre, Chairman of the Board of Directors up to 31 December 2025, as Chairman of Crédit Agricole S.A., and not in respect of his other positions within the Group.

In accordance with the governance model of Crédit Agricole S.A., the office of Chairman of the Board and that of Chief Executive Officer are historically separate. Thus, the Company has a long record of compliance with Article L. 511-58 of the French Monetary and Financial Code, which since 2015 has made this separation a legal principle in the banking sector. A non-executive Chairman, Dominique Lefebvre, was appointed in November 2015.

In accordance with Article L. 512-49 of the French Monetary and Financial Code, the Chairperson of Crédit Agricole S.A. is elected by the Board of Directors from among its members who are Directors of a mutual Crédit Agricole Regional Bank. Accordingly, Dominique Lefebvre is also Chairman of the Val de France Regional Bank. The term of office of the Chairman is aligned with that of his term of office as Director, i.e. three years. The statutory age limit for the Chairman is 67 years and the maximum number of successive terms of office that he or she may seek is five.

Since November 2015, for the purpose of simplifying the organisation of the Crédit Agricole Group, the Chairman of Crédit Agricole S.A. has also been the Chairman of the Fédération nationale du Crédit Agricole (FNCA). In this respect, he plays an essential coordination role between Crédit Agricole S.A. and the 39 Crédit Agricole Regional Banks, which constitute the majority shareholder via SAS Rue La Boétie, of which he is also the Chairman.

As part of his statutory duties, the Chairman of the Board of Directors of Crédit Agricole S.A.:

- approves the agendas for the Board Meetings and ensures that the information provided to the Directors is adequate to make reasoned decisions; to this effect, he contributes to the smooth flow of information between the Board and the Executive Management, and between the Board and its committees;
- encourages and promotes discussions and ensures that all viewpoints can be expressed within the Board;
- ensures that the responsibilities held within the Board are clear for all Directors.

On the Board of Directors, Dominique Lefebvre is also the Chairman of the Strategy Committee and the Societal Commitment Committee, and a member of the Appointments and Governance Committee.

Each year, he convenes a meeting with all employee representatives on the Board of Directors for an exchange of views on the functioning of the Board of Directors and any current issues in general. The employee representatives consist of the two Directors representing employees, the Director representing employee shareholders, the non-voting Director representing employees of Regional Banks, and the representative of the Social and Economic Committee.

In addition, on his own initiative or at their request, the Chairman also met face-to-face with the independent Directors.

The Chairman maintains a close, ongoing dialogue with the Chief Executive Officer of Crédit Agricole S.A., either directly or within the framework of the Coordination Committee (CorCo) bringing together the Directors of Crédit Agricole S.A. and the FNCA. For 2025, the agenda was dominated by the directions of the new Medium-Term Strategic Plan, ACT 2028. During the year, and depending on current events, the Chairman meets regularly with members of the Executive Committee, in particular the Deputy

Chief Executive Officer in charge of Steering and Control functions, the Head of Human Resources and, on a regular basis, the Corporate Secretary of Crédit Agricole S.A. He also meets with the Statutory Auditors. He is also regularly invited to sit on the Executive Committees of certain Crédit Agricole S.A. subsidiaries, allowing him to develop a more granular view of the challenges that certain business lines face.

As in previous years, the Chairman also represented the Group at major public events related to the agricultural sector, and related events and projects supported by Crédit Agricole S.A., such as the Un Avenir Ensemble foundation (a non-profit foundation that helps disadvantaged young people), the Crédit Agricole Pays de France foundation, and CICA, an organisation bringing together banks from 24 countries involved in financing agriculture. He is also Deputy Chairman of the Confédération nationale de la mutualité, de la coopération et du Crédit Agricole (CNMCCA), a professional organisation that represents the interests of French mutual and cooperative agricultural companies.

THE BOARD OF DIRECTORS

The Board of Directors of Crédit Agricole S.A. comprises 21 Directors, including its Chairman, as follows:

- ▶ **18 Directors elected by the General Meeting of Shareholders, including:**
 - 10 Directors who are Chairmen or Chief Executive Officers of a Crédit Agricole Regional Bank,
 - one Director that is a legal entity, SAS Rue La Boétie, represented by a Chief Executive Officer of a Regional Bank who is also Deputy Chairman of SAS Rue La Boétie and first Deputy Chairman of the FNCA,
 - six Directors from outside Crédit Agricole Group,
 - one Director representing employee shareholders;
- ▶ **one Director representing professional farming associations, appointed by joint decree of the Ministers of Economy, Finance and Food Sovereignty, pursuant to Article L. 512-49 of the French Monetary and Financial Code,**
- ▶ **two Directors appointed by the two major trade unions.**

The majority representation of the Crédit Agricole Regional Banks on the Board of Directors of Crédit Agricole S.A. was affirmed in the Crédit Agricole S.A. Listing Memorandum, drawn up between the Regional Banks and what was then CNCA (Caisse Nationale de Crédit Agricole), published in the Crédit Agricole S.A. Registration Document for financial year 2001.

NON-VOTING DIRECTORS

On the proposal of the Chairman, the Board of Directors may appoint one or more non-voting Directors. They are appointed after their candidacy has been reviewed by the Appointments and Governance Committee. They participate in the Board without voting rights. They are appointed as part of the staggered management of terms of office, thus allowing the Board to build up a pool of Directors who are immediately operational as soon as they take up their duties as Director. Non-voting Directors are subject to the same rules as Directors and are compensated under the same terms. They are declared as permanent insiders and the provisions of the Board's Rules of Procedure, particularly with regard to the prevention of conflicts of interest, apply to them.

Non-voting Directors in office

The Board of 14 May 2025 appointed Richard Laborie, Chief Executive Officer of the Languedoc Regional Bank, and Franck Alexandre, Chairman of the Alpes-Provence Regional Bank, as non-voting Directors. The latter was subsequently appointed Director on 1 January 2026.

Pascale Berger also holds the position of non-voting Director representing employees of the Regional Banks. She was, until the General Meeting of 12 May 2021, a Director representing employees of the Regional Banks, a position that was converted into non-voting Director role following the entry into force of the PACTE Act of 22 May 2019, which required the appointment of a Director representing employee shareholders (ARSA). Given that the size of the Board of Directors is capped at 21 Directors and, in order to maintain the majority representation of the Regional Banks, the position of Director representing Regional Bank employees was not renewed.

With regard to Directors representing employees, their participation in the Board is ensured by:

- two Directors appointed by each of the two trade unions that the most votes in the first round of company elections, in accordance with the provisions of Articles L. 225-27-1 and L. 22-10-6 of the French Commercial Code (Code de Commerce); and
- a Director representing employee shareholders elected from among employee shareholders in accordance with the provisions of Article L. 225-23 of the French Commercial Code.

Without taking into account the three Directors representing employees and employee shareholders, 33% of the Directors on the Board are independent, in line with the recommendation of the aforementioned Afep/Medef Code for companies controlled by a majority shareholder. Chairpersons of Regional Banks, that share in the control of Crédit Agricole S.A., although not formally independent represent the rest of society however and third-parties interests.

The representative of the Social and Economic Committee attends the meetings of the Board of Directors in an advisory capacity.

In addition to the aforementioned provisions of the Articles of Association, it is specified, pursuant to Article L. 22-10-11 of the French Commercial Code, that the rules applicable to the appointment and replacement of members of the Board of Directors of Crédit Agricole S.A. are the ordinary-law rules laid down in the French Commercial Code and the French Monetary and Financial Code (in particular Article L. 511-51). As Crédit Agricole S.A. is an institution under the direct supervision of the European Central Bank, its Board of Directors is also covered by the scope of application of the Single Supervisory Mechanism (SSM Framework Regulation of 16 April 2014). As such, after their appointment or renewal by the General Meeting, the European Central Bank issues an opinion after examining the good repute, skills and availability of each person concerned. To date, no opposition notice has ever been issued by the European Central Bank in respect of a Director of Crédit Agricole S.A.

CHANGES WITHIN THE BOARD AND COMMITTEES IN 2025

There was a moderate change in the composition of the Board of Directors in 2025.

Following the resignation of Hugues Brasseur, appointed Chief Executive Officer of Crédit Agricole Italia and *Senior Country Officer* for the Group in Italy, the Board of Directors decided to co-opt Gaëlle Regnard, Chief Executive Officer of the Loire Haute-Loire Regional Bank, as Director for the remainder of her predecessor's term of office. This co-option was submitted for ratification and approved by the General Meeting of 14 May 2025.

The General Meeting of 14 May 2025 elected Olivier Desportes as a Director, who is Chairman of the Cotes-d'Armor Regional Bank, and previously a non-voting Director, to replace Louis Tercinier, who had reached the statutory age limit.

At the General Meeting of 14 May 2025, four Directors were re-elected for a three-year term of office:

- **Dominique Lefebvre**, Chairman of the Board of Directors and Chairman of the Val de France Regional Bank;
- **Pierre Cambefort**, Chief Executive Officer of the Nord Midi-Pyrénées Regional Bank;
- **Jean-Pierre Gaillard**, Chairman of the Sud Rhône Alpes Regional Bank;
- **Christine Gandon**, Chairwoman of the North East Regional Bank.

At its meeting of 14 May 2025, the Board appointed Richard Laborie and Franck Alexandre, respectively Chief Executive Officer of the Languedoc Regional Bank and Chairman of the Alpes-Provence Regional Bank, as non-voting Directors for a period of three years. Furthermore, the term of office of José Santucci, a non-voting Director since 24 May 2022, expired at the end of the General Meeting of 14 May 2025.

Lastly, following the resignation of Dominique Lefebvre from his office as Director and Chairman of the Board of Directors, effective on 31 December 2025, the Board of Directors meeting of 16 December 2025 decided to appoint, from 1 January 2026 (i) Franck Alexandre, as Director for the remainder of the term of office of his predecessor. The ratification of this co-option will be submitted to the General Meeting of 20 May 2026 and (ii) Éric Vial as Chairman of the Board of Directors. The succession process for selecting the Chairman of the Board of Directors is explained below.

In addition, with regard to the composition of the specialised committees, on 14 May 2025, the Board of Directors decided to appoint:

- Gaëlle Regnard to the Audit Committee, replacing Hugues Brasseur;
- Nicole Gourmelon to the Societal Commitment Committee, replacing Hugues Brasseur;
- Olivier Desportes to the Appointments and Governance Committee, replacing Louis Tercinier;
- Christine Gandon to the Strategy Committee, replacing Louis Tercinier.

On 3 February 2026, following the proposal of the Chairman of the Board of Directors, the Board decided to amend the Rules of Procedure of the Strategy Committee to delete the sentence providing that "the Strategy Committee shall be chaired by the Chairman of the Board of Directors", and then appointed Olivier Desportes as member and Chairman of the Strategy Committee.

SHAREHOLDER DIALOGUE

Prior to the General Meetings, videoconferences are organised with the principal institutional investors in Crédit Agricole S.A.'s capital and with *proxy advisers*, i.e. 15 to 20 individual contacts. These are preceded by a general briefing, which, in respect of financial year 2025, was held on 19 February 2026, introduced by a recorded welcome message from the Chairman. These calls, which focus on governance and include an explanation of the main resolutions identified at that date that will be proposed to the General Meeting, are seen by investors as a distinctive aspect of financial roadshows. They are led by the Head of Financial Communication, the Head of Compensation and Employee Benefits, the Head of HR and executive manager development, a representative of the Sustainability and Impact department, as well as the Head of the Board Secretariat. The presentation used in support of the discussion is available on the Crédit Agricole S.A. website. The main questions raised and comments made by investors and proxy advisers on these occasions are forwarded to the relevant specialised committees, which analyse them in the light of market practices, taking into account the Group's corporate governance principles. The committees report to the Board of Directors.

After this kick-off meeting, the videoconference interviews conducted individually during the months of February and March 2026 with the proxies and investors provide an opportunity for a transparent and constructive dialogue.

With respect to individual shareholders, dialogue is maintained through daily phone calls or emails to provide information and the organisation of meetings together with the Regional Banks, in the presence of members of Crédit Agricole S.A. Management. In 2025, due to the preparation of the Medium-Term Plan, only one meeting was held at a Regional Bank, in a hybrid format (on-site presence and videoconferencing). Discussions mainly focused on the current financial situation and the performance of Crédit Agricole S.A., including a session to answer questions from individual shareholders. Since the initial public offering in 2001, the Financial Communication department has recruited around ten individual shareholders to form a Liaison Committee, to which the quarterly accounts are presented and which meets several times a year for information and discussion sessions on the Group and its activities.

In 2025, Crédit Agricole S.A.'s traditional General Meeting of Shareholders was held in Paris, with the shareholders present in person. Crédit Agricole S.A. ensured that shareholders would still be able to submit their queries in writing. The answers to queries were read out at the General Meeting and posted online the day before the meeting. As is now the case, a "chat" function was also set up during the General Meeting. This enabled shareholders – subject to a sworn statement of their shareholder status – to question executives in writing during the General Meeting. In all, 19 questions were raised during the meeting, 15 orally and four via the dedicated platform. Thirteen written questions were also answered on Crédit Agricole S.A.'s website.

CONFLICT OF INTEREST POLICY

The members of the Board are subject to the applicable legal and regulatory obligations regarding conflicts of interest. Each of the Directors of Crédit Agricole S.A., as well as the non-voting Directors, adhere to the values and commitments of the Group described in

its Code of Ethics and Code of Conduct, which illustrates these commitments through numerous practical cases. The Code of Ethics, which is accessible on the Crédit Agricole Group website and which was updated in 2025, constitutes the basis of the ethical and professional conduct applicable to the Group's Directors, executives and employees.

Furthermore, the Board's operations are governed by its Rules of Procedure and the Crédit Agricole S.A. Directors' Code of Conduct, which state that "in the event of a conflict of interest, including a potential conflict, in which they may be directly or indirectly involved, the Director must inform the Board. As such, they must refrain from attending discussions and participating in the corresponding vote".

To the Board's knowledge, there was no declared and/or identified conflict of interest between Crédit Agricole S.A. and any of the Directors for the year 2025.

EXECUTIVE SESSION

The Executive Management of Crédit Agricole S.A. takes part in the meetings of the Board and its committees.

However, every year, the Board holds an executive session, i.e. without the presence of executive officers, in order to freely discuss the operations of the Board, the organisation of its work and interactions with Management.

In addition, part of the Board meeting dedicated to convening the General Meeting is held without the presence of executive corporate officers so that it can assess their performance.

Lastly, members of the Audit Committee, the Risk Committee and the US Risk Committee meet at least once a year without the presence of any executive officer, with part of this meeting held in presence of the Statutory Auditors.

1.1.2 OPERATING PRINCIPLES OF THE BOARD OF DIRECTORS AND SPECIALISED COMMITTEES

FUNCTIONING

The functioning of the Board of Directors is governed by the legal provisions in force, the Articles of Association and the Board's Rules of Procedure. In carrying out its duties, the Board relies on its seven committees: the Risk Committee, the US Risk Committee, the Audit Committee, the Compensation Committee, the Appointments and Governance Committee, the Strategy Committee and the Societal Commitment Committee.

The Board's Rules of Procedure, to which the Directors' Code of Conduct and the Code of Ethics are appended, as well as the Rules of Procedure of the committees, in their latest version updated of 3 February 2026, are accessible online on the Crédit Agricole S.A. website: <https://www.credit-agricole.com>.

DIRECTORS' COMPENSATION

The members of the Board of Directors receive compensation for their attendance. The conditions for allocating Directors' fees, as described below, are determined by the Board on the recommendation of the Compensation Committee.

Compensation of Board members is based entirely on their attendance at Board Meetings. Directors receive the same compensation for attending strategic seminars and special meetings, i.e. those not on the annual calendar, and scheduled meetings, up to a maximum of the total amount approved. No compensation is paid for training sessions, individual or group interviews with supervisors or ad hoc meetings with management. The same applies to the Board's written consultations.

In 2025, the compensation package for Directors amounted to €1.9 million, after approval by the General Meeting of 14 May 2025. This is a maximum expenditure ceiling and the unused portion is returned to the budget of Crédit Agricole S.A.

Members of the specialised committees are entitled to compensation: the Chairmen of the specialised committees of the Board receive an annual flat-rate fee, with a differentiation according to committee. Committee members receive a fee per meeting based on their actual attendance at committee meetings.

Non-voting Directors receive the same compensation for attending Board Meetings and, when they are members, specialised committee meetings.

At its meeting of 14 May 2025, the Board noted that the annual flat-rate fee for the Chairwoman of the Compensation Committee and the Appointments and Governance Committee may, in some years, be less than the fee received by a member of the same committee. Consequently, it was proposed to realign the compensation of the Chairwoman of the above-mentioned two committees, by increasing the annual flat-rate fee from €22,000 to €30,000, with retroactive effect on 1 January 2025.

On 3 February 2026, following the appointment of a Director, other than the Chairman of the Board of Directors, as Chairman of the Strategy Committee, and on a proposal from the Compensation Committee, the Board decided to set the remuneration of the Chairman of the Strategy Committee at €30,000.

Therefore, the Board, on the recommendation of the Compensation Committee, decided on the distribution of the compensation package as follows:

- €4,000 per Board meeting;
- €2,700 per committee meeting;
- an annual flat fee of €30,000, allocated to the Chairs of the Compensation Committee, the Appointments and the Governance Committee and Strategy Committee;
- €38,500 annual flat fee for the Chairwoman of the Risk Committee, of the US Risk Committee, and of the Audit Committee.

1.1.3 GOVERNANCE AND DIVERSITY POLICY

The Board of Directors of Crédit Agricole S.A. complies with the provisions of the French Commercial Code (Code de Commerce) governing the diversity policy it pursues within the Company. It also ensures that a similar policy exists within the management bodies.

BOARD'S DIVERSITY POLICY

When appointing and/or reappointing Directors, the Board ensures that it maintains a balanced gender representation in accordance with the provisions of Article L. 22-10-3 of the French Commercial Code. This balance is assessed by taking into account the legal provisions for gender representation on Boards of Directors by ensuring that neither gender is represented by less than 40% of its members, excluding Directors representing employees and employee shareholders (until 1 January 2026 for the Director representing employees).

In respect of 2026, the Board has decided to propose to the General Meeting to maintain the compensation package for directors at €1.9 million without changing the unit compensation for participation in Board and specialised committee meetings or the lump sums paid to the Committee Chairs, except for the Chairman of the Strategy Committee.

The Chairman of the Board of Directors, Dominique Lefebvre in respect of financial year 2025, and Éric Vial in respect of financial year 2026, waived all compensation other than that for their role as Chairman, despite sitting on the Strategy Committee, the Societal Commitment Committee and the Appointments and Governance Committee.

The two Directors representing employees and the Director representing employee shareholders on the Board, as well as the non-voting Director representing employees of the Regional Banks, do not receive their compensation, which is paid to their unions.

The Board has also set up a system for reimbursing Board members for travel expenses, based on costs incurred by each member for attending Board and committee meetings. This mechanism, adopted pursuant to Article R. 225-33 of the French Commercial Code, is renewed annually by the Board.

The components of compensation paid or allocated for the financial year 2025 to each non-executive Corporate Officer of the Company are described in Chapter 3, part 4.4.3.3. "Non-Executive Corporate Officers".

In addition, in accordance with the provisions of Article L. 22-10-21a of the French Commercial Code, in the event that the Company no longer complies with the proportion of 40% of members of each gender, the Board will comply with the requirements of the enhanced selection procedure to be implemented by the Appointments and Governance Committee. The latter will examine the qualifications of the candidates and recommend to the Board the candidate(s) with the necessary qualifications in terms of ability, expertise and professional performance and may, in the event of equal qualifications, recommend that priority be given to the candidate of the under-represented gender.

In addition to ensuring a balanced gender representation, the Board also strives to maintain a balance in terms of geographical diversity, age and seniority among its members. Geographical diversity is assessed by the Board considering the member's nationality, educational background as well as their professional experience.

During its annual self-assessment exercise, the Board reviews its composition against all of these criteria.

GENDER BALANCE

At 31 December 2025, nine of the 18 members of the Board of Directors of Crédit Agricole S.A. included in the count by law were women, i.e. 50%. They are: Agnès Audier, Sonia Bonnet-Bernard, Marie-Claire Daveu, Nicole Gourmelon, Christine Gandon, Marianne Laigneau, Christiane Lambert, Alessia Mosca and Carol Sirou.

It is specified that, from 1 January 2026, following the transposition of the Women on Boards Directive into French law, the proportion of directors of each gender is calculated taking into account Directors representing employee shareholders. At 1 January 2026, nine of the 19 members of the Board of Directors of Crédit Agricole S.A. included in the count by law were women, i.e. 47%.

GENDER PARITY ON THE BOARD OF DIRECTORS (IN %)

Members of the Board of Directors	Comparative year N-1 31/12/2024	Year N 31/12/2025	Change (in %)
Women	8 (44%)	9 (50%)	6%
Men	10 (56%)	9 (50%)	-6%

With the exception of the Strategy Committee and the Societal Commitment Committee, the five other specialised committees of the Board are chaired by independent Directors who are women. On 3 February 2026, the specialised committees were chaired as follows:

Specialised Committees of the Board	Committee chair
Risk Committee	Carol Sirou
US Risk Committee	Carol Sirou
Audit Committee	Sonia Bonnet-Bernard
Compensation Committee	Agnès Audier
Appointments and Governance Committee	Marianne Laigneau
Societal Commitment Committee	Éric Vial
Strategy Committee	Olivier Desportes

AGE AND TERM RENEWAL

At 31 December 2025 the average age of Directors was 58 years. The age limit to carry out the duties of a director is set by law at 65 years, the age being measured at the date of the nearest General Meeting after a director's 65th birthday. The age limit for the Chairman is 67 years.

The Board of Directors does not have a policy in terms of a minimum age or age balance; however, regulatory requirements regarding the profiles and skills of Directors in the banking sector lead to a tendency to choose candidates who demonstrate proven professional experience. In its December 2021 guide on the assessment of the good repute and skills of executives and Directors of banking institutions, the European Central Bank requires that Directors have sufficient knowledge, skills and

experience to fulfil their duties. For example, it presumes that skills have been acquired by persons with "three years of recent practical experience in high-level management positions and theoretical experience in the banking sector". By using high-level management experience as a criterion for approving the appointment of Directors, supervisors tend to choose Directors with a mature profile.

For its part, the Board of Directors, under the leadership of the Appointments and Governance Committee, ensures that the renewal of Directors elected by the General Meeting is carried out in such a way that the expiry dates of their terms of office are staggered in the most balanced manner possible. Until now, the primary reason for resignation has been reaching the age limit.

The term of office of Crédit Agricole S.A. Directors as natural persons is fixed at three years by the Articles of Association. Directors may not serve for more than four consecutive terms. The table below shows the expiry dates of the terms of office of the Directors elected by the General Meeting for the next three years.

BREAKDOWN BY AGE GROUP ON THE BOARD OF DIRECTORS (IN %)

Breakdown by age group	Comparative year N-1 2024	Year N 2025	Change (in %)
Under 30	0%	0%	0
Between 30 and 50	4.76%	4.76%	0
Over 50	95.24%	95.24%	0

* Stepped down on 31 December 2025, replaced by Franck Alexandre.

- The expiry of the terms of office of the two Directors representing the employees of Crédit Agricole S.A. is governed by an electoral protocol. Their renewable three-year terms of office expire at the 2027 General Meeting.
- Concerning the term of office of the representative of the professional farming associations on the Board of Directors, Arnaud Rousseau was appointed by the decree of 21 May 2024 for a period of three years.

KNOWLEDGE AND EXPERTISE

In order to better meet its legal obligations to assess the skills necessary for its proper operation, the Board of Directors of Crédit Agricole S.A. defined, in a procedural note, the diversity policy sought in terms of the experience and profiles of its members. The Appointments and Governance Committee confirmed the relevance of the policy at its meeting of 14 January 2026.

The Board considers that the individual professional experience of each Director constitutes the basis of the collective expertise of the Board of Directors and contributes to the richness of the exchanges within it in the key areas of the Group's banking and insurance activities, as well as of their environment.

The definition of the required profiles and experiences was adopted by the Board of Directors on the proposal of the Appointments and Governance Committee, to which the French Monetary and Financial Code (Article L. 511-98) has entrusted the task of "assessing the balance and diversity of knowledge, expertise and experience of the members of the Board of Directors individually and collectively".

The Committee has endeavoured to identify the knowledge that must be continuously present within the Board of Directors so that it may fulfil its duties under the best possible conditions. Above all, it has adopted the knowledge and experience recommended by the European Banking Authorities and has supplemented these with a requirement for continuous expertise within the Board in the areas of corporate social responsibility and information technology.

By combining this approach with knowledge and experience, the Appointments and Governance Committee has defined, for each of them, the percentage of Directors who must continuously have the skills required to ensure the proper functioning of the Board, by adding individual skills to the service of the collective expertise. The indicative grid resulting from this approach is shown below.

REFERENCE CHART ILLUSTRATING THE IDEAL BALANCE OF INDIVIDUAL EXPERTISE REQUIRED FOR THE BOARD OF DIRECTORS' COLLECTIVE EXPERTISE

	>50% ⁽¹⁾	Between 20% and 50% ⁽¹⁾	Between 10 and 20% ⁽¹⁾
1) Knowledge of the business (banking/finance) and in the areas of risk management	✓		
2) Experience in strategy and development		✓	
3) Knowledge of financial accounting, compliance and auditing	✓		
4) Knowledge in the fields of data/artificial intelligence		✓	
5) Knowledge in the fields of information technologies and their security		✓	
6) Knowledge in the fields of social and environmental responsibility		✓	
7) Experience in local and regional development	✓		
8) Knowledge of climate/biodiversity issues		✓	
9) Experience in corporate management	✓		
10) Management experience in large organisations or international groups	✓		
11) Knowledge of global economics and geopolitics	✓		
12) Knowledge of regulations and governance		✓	
13) Knowledge of the agricultural sector	✓		

(1) Percentage of Directors who must have good or very good knowledge of the above-mentioned fields at all times within the Board.

The knowledge and experience criteria used in this grid are included each year in the individual assessment questionnaire for members of the Board of Directors.

This annual exercise allows the Appointments and Governance Committee to ensure that the required skills are always present on the Board of Directors and in the proportions defined in its procedural note in order to meet the needs of its activities, including

the impacts, risks and opportunities that have been defined in the sustainability report.

It is also an opportunity for it to assess, based on the Directors' responses, whether or not it is useful to develop the indicative grid, whether in terms of skills and/or the proportion of these skills within the Board.

Based on the review carried out in 2025 by the Appointments and Governance Committee of the results of the evaluation of the Board's individual and collective expertise, the collective expertise of the Board of Directors of Crédit Agricole S.A. remains similar to the profile identified in the previous financial year and is characterised by:

- ▶ **banking and financial dominance, with strong expertise in the fields of audit and risk coupled with expertise in strategy and development;**
- ▶ **expert knowledge of local and regional economies, which constitutes the bedrock of the Group's business, more often combined with strong commitments to local, or even, national communities;**
- ▶ **experience in executive positions in corporations, with a significant percentage of multinational corporations, in the services, technology and industrial sectors, while also focused on geopolitics and international economics;**
- ▶ **recognised players in the fields of governance, regulations and CSR and the environment, including climate and biodiversity issues.**

Based on the results of the expertise assessment conducted in 2025, the Board of Directors of Crédit Agricole S.A. concluded that, in each of the areas examined, the Board permanently has several members with adequate knowledge of the subjects, and that all essential aspects of its collective expertise, as defined in its procedural note, were covered.

Furthermore, in accordance with the priorities set out by the European Central Bank on the control of information technology, and in the light of the European Digital Operational Resilience Act (DORA), the Board has ensured that it has expertise in information systems, IT risks and cybersecurity.

The Board of Directors has therefore noted that all of the Directors' expertise and skills allow it to meet the needs of its activity, including impacts, risks and opportunities.

It should be noted that the Board has continuously chosen not to appoint a Lead Director on one or more topics, remaining committed to collegiality and the collective expertise of its members, as well as relying on the work of the specialised committees.

DIVERSITY POLICY WITHIN THE MANAGEMENT BODIES

The review of the gender equality at work and equal pay policy, which the Board of Directors examines each year in accordance with Article L. 225-37-1 of the French Commercial Code, is also an opportunity for the Board to discuss balanced gender representation within its management bodies. The objective is to cover both the general gender policy of Crédit Agricole S.A. and any information on how Crédit Agricole S.A. seeks a balanced gender representation on its management bodies. The results of the gender equality index for Crédit Agricole S.A., introduced by the French government in 2019, underlined the effectiveness of the actions implemented.

In 2024, all Crédit Agricole S.A. entities have positive ratings, ranging from 85 to 98 out of 100. For the Crédit Agricole S.A. social and economic unit (UES), the score is 98 points, a gain of one point compared to 2023 ⁽¹⁾.

Particular attention is also paid to the distribution of individual pay rises and gender-balanced promotions, as well as a fair pay and promotions policy upon return from maternity leave, in compliance with legal provisions and with strengthened practices in several entities.

The Group pursues a proactive policy on the promotion of diversities at all levels of the organisation, with governance organised through Career Committees, regular management of key indicators and coordination with entities to harmonise practices in compliance with the five commitments of the policy, namely: equal opportunities, openness and curiosity, representativeness, solidarity, responsibility.

As regards the situation at the end of 2024 ⁽¹⁾ in relation to regulatory obligations, as provided for in the French Rixain law (loi Rixain) on intensifying the obligations of large corporations in terms of gender equality at work, Crédit Agricole S.A. published on 1 March 2025 any gaps in the representation of women and men among executive managers and members of decision-making bodies. Within the Crédit Agricole S.A., nine entities with more than 1,000 employees are concerned: Crédit Agricole S.A., Amundi, LCL, CAL&F, CACF, Crédit Agricole Assurances, SIRCA, Crédit Agricole CIB and CACEIS. While some of them have already reached the thresholds set by the Rixain law or are very close to it, three of them must continue their efforts. They are (i) LCL, Crédit Agricole CIB and CAPFM for possible differences in gender representation among executive managers and (ii) LCL, Crédit Agricole CIB, Crédit Agricole Assurances and CACEIS for differences among members of decision-making bodies. These entities are therefore subject to enhanced monitoring with, for example, for Crédit Agricole CIB, the roll-out of succession plans on a global scale.

In terms of diversity, with 50% of women at 31 December 2025, the Board of Directors of Crédit Agricole S.A. is above the average, which now reflects, in all listed companies, the effects of the Copé-Zimmermann law and the transposition of the Women on Boards Directive.

At 1 January 2026, of the 17 members of the Executive Committee of Crédit Agricole S.A., six were women: the Chief Executive Officer of Amundi (Asset Management division), the Deputy General Manager in charge of the Risk Management division, the Corporate Secretary, the Group Head of Human Resources, the Deputy General Manager of Crédit Agricole S.A. in charge of the Finance and Steering division and the Group Head of Internal Audit. With 35.3% women, a certain level of vigilance is called for, due to the automatic effect of some movements.

Among the Top 1000, the increase in the number of women is maintained, with a rate of 39% at 31 December 2025. These results are notably the result of efforts to identify talented women early on, provide them with guidance (support, development and mentoring) and the systematic presence of women in succession plans. It should also be noted that Crédit Agricole S.A.'s Compensation Committee has included this requirement for gender diversity in the performance criteria for executives, which should constitute a strong incentive.

For more information on the diversity policy and the gender equality at work policy see Sections 3.1.2.3 "Diversity § 1. Gender equality at work" and 3.1.2.5 "Performance and compensation § 2. Gender equality at work in terms of compensation".

Lastly, Crédit Agricole S.A. advocates for systematic gender balance among candidates at all levels of the organisation, particularly for management and executive positions. Pursuant to Article L. 225-53 of the French Commercial Code, the Board of Directors has adopted a procedural note relating to the process for appointing Deputy Chief Executive Officers stating, notably, that this rule applies to them.

DIRECTORS' INDEPENDENCE

Crédit Agricole S.A. applies the Afep/Medef Corporate Governance Code for listed companies, in its latest revised version as published in December 2022 (Afep/Medef Code). Crédit Agricole S.A. does not comply – or does not fully comply – with certain recommendations of the Code as set out in a table appended to this section (see below).

The process for assessing the independence of Crédit Agricole S.A. Directors is implemented under the auspices of the Appointments and Governance Committee. This principle is assessed both in terms of the criteria of the Afep/Medef Code and in terms of the specific texts as applicable to the banking sector, such as the European Banking Authority's guidelines for the assessment of members of the Board of Directors, which came into effect in 31 December 2021. These two protocols overlap to a large extent.

In anticipation of the General Meeting of 20 May 2026, the Appointments and Governance Committee individually reviewed the situation of each Director, and more particularly the independent Directors, whom it had previously requested to report any material change in their situation that could affect their independence and to confirm their compliance with each criterion of the Afep/Medef Code. The committee also examined the situation of two Directors whose appointment will be proposed to the General Meeting of 20 May 2026 and of the eight Directors whose reappointments will be proposed to the same General Meeting.

⁽¹⁾ The 2025 figures available at 1 March 2026 will be published in accordance with the regulatory requirements.

On 3 February 2026, upon the committee's recommendation and subject to changes in their situation which must be disclosed to the Board, the Board of Directors recognised them as independent Directors.

- Upon the advice of the Appointments and Governance Committee, the Board concluded that Chief Executive Officers and Chairpersons of Regional Banks cannot be considered independent due to a position held in a company that controls Crédit Agricole S.A.
- Aside from their employment contract, the two Directors representing employees and the director representing Crédit Agricole S.A.'s employee shareholders on the Board come

under a specific regulatory framework. Therefore, they cannot, according to the Afep/Medef Code, be included in the calculation of the percentage of independent Directors.

- Lastly, with regard to the representative of professional farming associations, Crédit Agricole's position as the leading financier of agriculture in France automatically excludes that Director from compliance with the criteria, even though that Director's appointment by the French Minister of the Economy and Finance and the French Minister of Agriculture and Food Sovereignty is part of a regulatory process in which Crédit Agricole S.A. is not involved.

Upon the advice of the Appointments and Governance Committee, the Board of Directors at its meeting of 3 February 2026 found that the six Directors meet the independence criteria of the Afep/Medef Code: **With one third of its members being independent directors, excluding directors representing employees and employee shareholders, the Board's composition complies with the recommendations of the AFEP-MEDEF Code relating to controlled companies.** With regard more specifically to the Chairmen of the Regional Banks, as it does every year, the Board reiterated that they are neither employees of the Regional Banks nor holders of an executive mandate and derive their legitimacy from their election by the mutual shareholders, i.e. the customers, in accordance with the cooperative status of such shareholders. It emphasises that the Chairmen of the Regional Banks have the dual characteristic of being both experts in banking and its operations, but also business leaders from outside the financial sector, and as such bring exceptional experience to the Board of Directors.

INDEPENDENCE OF DIRECTORS

	Comparative year N-1	Year 2025	Change (in %)
Share of independent Directors (as a %)	33%	33%	0%

TABLE OF INDEPENDENT DIRECTORS

	Agnès Audier	Sonia Bonnet-Bernard	Marie-Claire Daveu	Marianne Laigneau	Alessia Mosca	Carol Sirou
Criterion 1: Has been a paid corporate officer during the previous five years	✓	X	✓	✓	✓	X
Criterion 2: Cross-directorships	✓	✓	✓	✓	✓	✓
Criterion 3: Significant business relations	✓	✓	✓	✓	✓	✓
Criterion 4: Family ties	✓	✓	✓	✓	✓	✓
Criterion 5: Statutory Auditor	✓	✓	✓	✓	✓	✓
Criterion 6: Term of office of more than twelve years	✓	✓	✓	✓	✓	✓
Criterion 7: Status of non-executive corporate officer	✓	✓	✓	✓	✓	✓
Criterion 8: Significant shareholder status	✓	✓	✓	✓	✓	✓
Criterion 9: Power of the Board of Directors to assess independence	N/A	Sonia Bonnet-Bernard is also an independent Director of Crédit Agricole CIB (criterion 1).	N/A	N/A	N/A	Carol Sirou is also an independent Director of Crédit Agricole CIB (criterion 1).

Reading key: ✓ means that the criterion is met, X means that the criterion is not met.

With reference to criterion 9, the situation of Sonia Bonnet-Bernard and Carol Sirou, who are also independent Directors of Crédit Agricole CIB, was examined by the Appointments and Governance Committee. It concluded that the concurrent holding of positions does not call into question their status as independent Director of Crédit Agricole S.A. given the synergies between these two positions and the absence of any conflict of interest. On the contrary, this dual position gives them a more precise understanding

of the issues they need to address in their roles and ensure continuity in their duties, both at Crédit Agricole S.A. and Crédit Agricole CIB. Sonia Bonnet-Bernard and Carol Sirou are also, respectively, (i) Chairwoman of the Audit Committees of Crédit Agricole S.A. and of Crédit Agricole CIB and a member of the Risk Committees of Crédit Agricole S.A. and of Crédit Agricole CIB and (ii) Chairwoman of the Risk Committee of Crédit Agricole S.A. and a member of the Risk Committee of Crédit Agricole CIB.

CRITERIA FOR ASSESSING BUSINESS RELATIONS

In addition to the formal examination of their individual situation, updated by each interested party with regard to each criterion, the Board has also based its assessment, after consulting the Appointments and Governance Committee, on the conclusions of an analysis of the existing business relations between the Crédit Agricole Group and the companies in which the independent Directors hold the offices or positions referred to below. The analysis of these business relations is carried out with the support of experts from the Group Risk Department, which bases its analysis on the consolidated data at its disposal on the Group's relationship with its counterparties. It excludes the assets structures of the persons concerned as well as those through which they may carry out advisory activities, none of them carrying out personal assignments for the Group in this capacity pursuant to the rules relating to conflicts of interest.

Banking activity is, by definition, at the heart of the how the economy is financed and, given the characteristics of the French banking market, as soon as the companies concerned are located on national territory, the likelihood that they become customers of a Crédit Agricole Group entity is high, and often increases with the size of the company.

Consequently, in order to assess the "significant" nature of the business relations, a multi-criteria analysis has been rolled out to take into account:

- the nature of the business relations between the Director or one of the companies they manage and the Crédit Agricole Group, whether as a customer or supplier. Particular attention is paid to the banking and advisory relationships that the Group has established with companies of which its Directors are executives, in order to assess whether these were of such importance and nature as to affect the Directors' independence of judgement;
- the amount and nature of the commitments, their maturity, their share in the company's indebtedness, the refinancing capacities of the company in question, as well as the degree of control and economic dependence;
- the quality of the relationship with the company in question, in particular its financial position as demonstrated by its results and ratings (Banque de France and internal rating), in order to check whether it depends on Crédit Agricole for financing or whether it would be able to obtain financing from other banks or through another means – including via the market – in the event of Crédit Agricole's withdrawal.

By focusing on verifying the balanced nature of such business relations, i.e. the absence of any leverage that one party may have over the other, this final phase adds a decisive qualitative dimension to the overall assessment.

Therefore, analyses were performed for each of the independent Directors of Crédit Agricole S.A. concerning business relations with companies in which they perform functions or hold positions. These were:

Agnès Audier	<ul style="list-style-type: none"> – Boston Consulting Group: <i>Senior Advisor</i> – Apheon (ex-Ergon Capital): <i>Senior Advisor</i> – AA Conseil SAS: Chairwoman – Eutelsat: Director – SCET: Chairwoman
Sonia Bonnet-Bernard	<ul style="list-style-type: none"> – A2EF Conseil: Chairwoman – Rémy Cointreau: Director
Marie-Claire Daveu	<ul style="list-style-type: none"> – Kering: Head of Sustainable Development – Engie: Director – Ponant: Director
Carol Sirou	<ul style="list-style-type: none"> – Ethifinance: Chief Executive Officer: – Safineia Advisors New York: founding partner
Marianne Laigneau	<ul style="list-style-type: none"> – Enedis: Chairwoman of the Management Board
Alessia Mosca	<ul style="list-style-type: none"> – ATM: Director

Based on the results of this analysis, the Board, on the proposal of the Appointments and Governance Committee, considered that the Group's commitments to these companies:

- were either not significant enough to qualify as situations of dependence on Crédit Agricole;
- or, after further analysis of these companies' financial position, revealed a balanced business relationship with these counterparties, with neither of the parties having the ability to exert influence over the other.

The Appointments and Governance Committee reiterated that, under all circumstances, should the Directors concerned be called upon to give an opinion on a matter in which there is a potential conflict of interests, those Directors must abstain from attending the debate and taking part in the vote, as required by the rules of good governance of Crédit Agricole S.A. and the Directors' Code of Conduct.

ASSESSMENT OF THE BOARD OF DIRECTORS

Each year, the Board of Directors assesses its composition and functioning, including its specialised committees, on the basis of the responses to two questionnaires:

- one on its composition, organisation and functioning, recommended by the Afep/Medef Code and for the banking sector meeting a legal obligation as defined in Article L. 511-100 of the French Monetary and Financial Code;
- the other on the knowledge, expertise and experience of the members of the Board of Directors, both individually and collectively, still in accordance with the aforementioned article of the French Monetary and Financial Code (see “Diversity policy” above).

In accordance with Article L. 511-100 of the French Monetary and Financial Code, this assessment is carried out annually by the Appointments and Governance Committee, which reports to the Board of Directors. Every three years, in accordance with the recommendations of the Afep-Medef Code, Crédit Agricole S.A. will be assisted by an external firm which meets all the required conditions of independence and whose skills have been verified by the committee. The 2025 assessment campaign was conducted in June by the internal services of the Board Secretariat.

With regard to the functioning of the Board, financial year 2025 confirms the overall very positive assessment expressed in previous years, despite the changes in its composition. Among the Board's strengths are its momentum and overall performance, thanks to the diversity of its members' profiles and skills.

As in previous years, highlights include:

- the conduct of the debates and the moderation by the Chairman, which encourages real freedom of expression;
- the balance and diversity in the composition of the Board;
- the quality of the relationship with the Executive Board and Management as well as the Chief Executive Officer's update at the beginning of each Board meeting;
- the adaptation of agendas to the Board's tasks;
- access to information and the quality of papers submitted;
- the quality of strategic discussions, with more time now devoted to them, both in advance on external growth projects and during the Board's strategic sessions.

While stressing that the Board received a very positive assessment for its functioning, there were areas where respondents felt the Board could do even better, such as:

- the request to include more benchmarking elements to enable comparisons with peers;
- better showcasing of the Group's business lines, particularly new activities;
- the request for a “post mortem” review of decisions taken, as well as a follow-up of external growth projects after their implementation;
- continuing efforts to improve the time taken to provide files prior to committee and Board meetings, noting, however, an improvement again this year that was confirmed by the assessment.

Lastly, the Directors, having appreciated the seminar organised in Milan in November 2024, reiterated the request for this same meeting format in other offices of the Group.

With regard to skills assessment, the scores are broadly similar to those of 2024 and, at the collective level, expertise has been retained in the aforementioned 13 fields (see “Knowledge and skills” above), with a strong focus on knowledge of the Group's activities and associated risks, knowledge of the main key activities,

knowledge in strategy and development, in accounting, compliance and audit, knowledge of business management, knowledge of local and regional economies, in the agriculture sector, geopolitics and international economics, and CSR, climate and biodiversity and information technology issues. As such, the proportions are widely respected in relation to the benchmark grid on the desired balance of skills on the Board.

TRAINING OF THE BOARD OF DIRECTORS

Article L. 511-53 of the French Monetary and Financial Code provides that credit institutions and finance companies must set aside the necessary human and financial resources for Director training. For group training, the programme is drawn up after the Directors have been asked about what they would like to get out of the course. As a result, this programme is perceived very positively each year by the Directors, who express their satisfaction during the annual assessment. Individual training courses meet the requests or needs expressed by the Directors. For example, one Director undertook individual training for the “company director certificate” from Sciences-Po and the IFA.

Each year, the new directors of the Crédit Agricole S.A. Group attend a group training session. Introduced by the Chairman and the Chief Executive Officer, this training course focuses, in particular, on the rights and obligations of Directors, compliance issues and the specificities of a Board under the supervision of the European Central Bank.

The Board's training programme is drawn up taking into account (i) the needs and/or requests expressed by directors and (ii) the Group's priority issues, including impacts, risks and opportunities.

In 2025, all Board members attended at least one of the following training sessions:

- training on internal models: modelling process and model governance;
- a presentation of a benchmark on the application of the CSRD regulation based on the production of the first sustainability reports;
- an overview of regulatory news.

Several specialised training courses have also been held within certain committees, including:

- for members of the Audit Committee: a fiscal update, with a focus on the temporary additional corporate income tax, a presentation of the impacts of IFRS 18 and an update on cooperative investment certificates (Certificats coopératifs d'investissement or CCIs);
- for members of the US Risk Committee: regulatory changes in the United States, the outlook for financial regulation, presentation of the economic environment and an update on anti-money laundering and international sanctions regulations.

In addition, Directors not from the Regional Banks benefit from an immersion experience at a Regional Bank.

The Board's training programme for 2026 includes, in addition to individual or Committee training, group sessions on the following topics:

- a session on tokenisation in finance;
- regulatory and compliance news, with a focus on the DORA regulations;
- a presentation on the Group's new geographic areas with a focus on Asia;
- a review of partnerships and joint ventures within the Group.

This 2026 training programme may be updated in line with current events. It should be noted that the Board of Directors' group training sessions are led by in-house and/or third-party experts.

1.1.4 OTHER INFORMATION PROVIDED FOR IN ARTICLES L. 225-37-4 AND L. 22-10-10 OF THE FRENCH COMMERCIAL CODE

LIMITATIONS PLACED BY THE BOARD OF DIRECTORS ON THE POWERS OF THE CHIEF EXECUTIVE OFFICER

The Chief Executive Officer is vested with the broadest powers to act in all circumstances on behalf of Crédit Agricole S.A. and to represent the Bank in dealings with third parties. He exercises his powers within the limits of the Company's object and subject to those powers that the law expressly assigns to the General Meetings of Shareholders and to the Board of Directors.

The only limitation that the Board of Directors places on the powers of the Chief Executive Officer, as set out in its Rules of Procedure, is that the Chief Executive Officer must obtain its prior approval for the following operations:

- the creation, acquisition or disposal of any subsidiaries and equity investments in France or abroad for total amounts or valuations exceeding €150 million;
- any other investment of any kind for amounts or valuations exceeding €150 million.

In addition, following the opinion of the Appointments and Governance Committee, the Board of Directors decided to regulate the term of office of the Chief Executive Officer, who had so far been appointed for an unlimited term, in compliance with the rules on age limit. Accordingly, it decided to amend its Rules of Procedure, which now provide that the term of office of the Chief Executive Officer is five years renewable.

AGREEMENTS BETWEEN CORPORATE OFFICERS AND SUBSIDIARIES

With regard to the mentioned related-party agreements falling under Articles L. 225-38 et seq. of the French Commercial Code (see below), entered into, directly or through an intermediary, between, on the one hand, one of the corporate officers or one of the shareholders holding more than 10% of the voting rights in a company and, on the other hand, another company controlled by the former company pursuant to Article L. 233-3 of the same code, it is necessary to refer to the activity of the Board of Directors in the "Related-party agreements" section and to the Statutory Auditors' special report on related-party agreements.

CONTROL PROCEDURE FOR RELATED-PARTY AGREEMENTS AND AGREEMENTS RELATING TO CURRENT OPERATIONS ENTERED INTO UNDER NORMAL CONDITIONS

The Board has established, in accordance with Article L. 22-10-12 of the French Commercial Code, an internal procedure to qualify the agreements concluded between the company and natural persons or legal entities, referred to in Article L. 225-38 of the French Commercial Code. This procedure is available on the website of Crédit Agricole S.A. ("Governance" section).

It defines the criteria used by Crédit Agricole S.A. to determine which agreements are subject to the statutory regime of prior related-party agreement authorisation in accordance with the provisions of Article L. 225-38 of the French Commercial Code and which are possibly subject to the ordinary agreement regime in accordance with Article L. 225-39. The criteria were adopted by the Board at its meeting on 13 February 2020. In the absence of commercial activity, they take into account both its legal duties as the corporate centre of Crédit Agricole, the duties defined in Articles L. 511-30 et seq. and L. 512-47 et seq. of the French Monetary and Financial Code, and its role as the holding company of the business line subsidiaries of the Crédit Agricole S.A. group.

The procedure provides for an annual review of ordinary agreements entered into during the year by the Audit Committee, which reports to the Board of Directors on the implementation of the procedure for regularly assessing whether agreements relating to current operations and entered into under normal conditions meet these conditions.

PRINCIPLES AND RULES LAID DOWN BY THE BOARD OF DIRECTORS TO DETERMINE THE COMPENSATION AND BENEFITS IN KIND AWARDED TO CORPORATE OFFICERS

This information can be found in the section on "the reward policy" of this Universal Registration Document.

AREAS OF NON-COMPLIANCE WITH THE 20 DECEMBER 2022 VERSION OF THE AFEP/MEDEF CODE

The areas of non-compliance with the Afep/Medef Code are shown in the summary table below. Such areas of non-compliance are not mentioned when they stem from the implementation of banking laws or regulations.

Recommendation of the Code	Comment by the Company
The committee in charge of selection or appointments	<p>The Appointments and Governance Committee is chaired by an independent Director and is comprised of six members. Its composition is as follows:</p> <ul style="list-style-type: none"> – two independent Directors, including the Chairwoman of the Committee, who is herself an executive of a large French company. The second Director, an Italian national, was behind the Italian law regarding better representation of women on Boards of Directors (Golfo-Mosca law); – a Chief Executive Officer of a Crédit Agricole Regional Bank; – three Crédit Agricole Regional Bank Chairmen: given Crédit Agricole's mutualist organisation, these individuals are elected by the mutual shareholders, i.e. Group customers, and their main activity is outside Crédit Agricole. <p>The AFEP-Medef Code applies to listed companies in all industries, and does not include specificities related to certain categories of companies. Thus, Crédit Agricole is the leader among mutual and cooperative banks in France. These banks are governed by Law No. 47-1775 of 10 September 1947 establishing the status of cooperation, Law No. 82-409 of 17 May 1982 establishing the status of banking cooperative entities and Articles L. 512-1 et seq. of the French Monetary and Financial Code. These laws set out the procedures of the mutualism model, which provides that (i) a customer becomes a mutual shareholder by holding mutual shares in their Local Bank and (ii) the mutual shareholders elect the Directors of the Local Bank, some of whom will become Directors of the Regional Bank. Ultimately, a Regional Bank Chairperson who becomes a Director of Crédit Agricole S.A. comes from the mutual shareholding base.</p> <p>Although they cannot be formally recognised as “independent”, due to their position as Chairperson of one of the 39 Credit Agricole Regional Banks, which, through SAS Rue la Boétie, the majority shareholder, participate in the control of Crédit Agricole S.A., they are representatives of mutual shareholder customers and bring a vision that closely reflects their local territories, contributing to the robustness of the Crédit Agricole model as a universal customer-focused banking model.</p> <p>Therefore, the Appointments and Governance Committee's decisions are taken by a majority of independent Directors and representatives of the Group's mutual shareholder customers.</p> <p>In addition, as is the case every year and as part of the self-assessment exercise of the Board and its committees, the Directors, including independent Directors, had a positive assessment of the composition and functioning of the Appointments and Governance Committee.</p>
Share ownership by Directors and Executive Corporate Officers	<p>All Crédit Agricole S.A. directors comply with the provisions of the Articles of Association and hold at least one share systematically acquired no later than three months after their appointment, at the end of which time they are deemed to have resigned if they do not comply. The Crédit Agricole S.A. Articles of Association therefore make it mandatory for directors to hold shares, which is optional under French law (Art. L. 225-25 of the French Commercial Code [Code de Commerce]).</p> <p>The declaration of non-compliance is made with regard to the “significant” holding requirement recommended by the Code. The choice of a minimum shareholding in the Articles of Association is in line with the mutualist structure of the Group, which is the majority shareholder of Crédit Agricole S.A., with seven Chairmen of the Members on its Board, whose appointments are unrelated to the share capital owned.</p> <p>Finally, the number of shares held by each Director is published in this chapter (2.1 “Composition of the Board of Directors”).</p> <p>The area of non-compliance is the absence of a specific holding and retention requirement applicable to the Chairman of the Board of Directors in his capacity as a non-executive corporate officer. The Chairman of the Board of Directors, like any other director, only holds the shares acquired in a personal capacity mentioned in this chapter (2.1 “Composition of the Board of Directors”). In order to guarantee complete independence in the performance of his term of office and in accordance with the recommendations of the Afep/Medef Code, the Chairman of the Board of Directors is not eligible for any variable compensation, including long-term incentive plans, stock-options or performance share award plans, or any other long-term compensation schemes existing within Crédit Agricole S.A. No commitment to hold or retain shares is therefore imposed.</p> <p>More specifically, executive corporate officers have been eligible to receive performance shares and are required to retain 30% of the shares acquired each year until they cease to hold office. In addition, under current regulations (CRD 5), a significant portion of their variable compensation is deferred and paid in the form of instruments linked to the Crédit Agricole S.A. share price.</p> <p>The non-compliance with the Afep/Medef Code is due to the fact that the quantity of shares to be retained by those corporate officers is not expressed as a minimum number of shares but as a percentage of the free allocation made to the beneficiaries, which is itself expressed as a percentage of the beneficiaries' annual fixed compensation (see below, Section 4.4. “Rewards for corporate officers”).</p>
21. Ethical standards applicable to Directors “... the Director should personally be a Company shareholder and, in accordance with the provisions of the Articles of Association or Rules of Procedure, hold a minimum number of shares that is material in relation to the allocated compensation.”	
24. Obligation to hold shares “The Board of Directors sets the minimum number of shares that executive corporate officers are required to hold as registered shares until the end of their term of office. This decision is reviewed at least every time they are reappointed. (...) So long as the shareholding target has not been reached, executive corporate officers allocate that portion of their option exercises or performance share awards as determined by the Board for this purpose. This information is included in the Company's annual report.”	

Recommendation of the Code**Comment by the Company****23. Termination of employment contract in the case of a corporate position**

"It is recommended, when an employee becomes a Company Executive Corporate Officer, to terminate their employment contract with the Company or a Group company, either by means of contractual termination or resignation ⁽¹⁾."

This recommendation applies to the Chairman, Chairman and Chief Executive Officer, and Chief Executive Officer in companies with Boards of Directors [...]."

The AMF, in its Recommendation No. 2012-02 and last updated on 14 December 2023, considers that an executive's length of service as an employee within the Company and their personal circumstances may justify maintaining an executive's employment contract, provided the Company provides suitable justifications tailored to each executive's individual situation (length of service and description of the benefits associated with the employment contract).

The Board considered that this is an appropriate approach to give Group employees who have made a major contribution to its development the opportunity to access high-standing offices, thereby fostering the sustainable management of the Group's human resources.

Philippe Brassac (until 14 May 2025)

Upon the appointment of Philippe Brassac as Chief Executive Officer of Crédit Agricole S.A. from 20 May 2015, the Board of Directors authorised, at its meeting of 19 May 2015, the maintenance of his employment contract and its subsequent suspension during his term of office.

The termination of Philippe Brassac's employment contract would have deprived him of the rights arising from the performance of his employment contract that were progressively built up over the course of his 33-year career with the Group and, in particular, benefits obtained by virtue of seniority and length of service, notably in terms of long-term benefits – such as membership in group schemes – and the right to termination payments. Given that Philippe Brassac has claimed his retirement rights, his employment contract ended on 14 May 2025.

Olivier Gavalda (from 14 May 2025)

Olivier Gavalda's employment contract was suspended upon his appointment as Chief Executive Officer of Crédit Agricole S.A. on 14 May 2025.

The termination of Olivier Gavalda's employment contract would have deprived him of the rights arising from the performance of his employment contract that were progressively built up over the course of his 34-year career with the Group and, in particular, benefits obtained by virtue of seniority and length of service, notably in terms of long-term benefits – such as membership in group schemes – and the right to termination payments. The overall amount of such payments would not, in any event, exceed two years of gross compensation (fixed and variable) in accordance with the recommendations of the Afep/Medef Code.

26. Compensation of Executive Corporate Officers**26.5.1 Departure of Executive Corporate Officers – General Provisions****Termination payments:**

"The law gives a major role to shareholders since the predefined termination payments granted to executive corporate officers are subject to the procedure applicable to related-party agreements. The law imposes total transparency and makes termination payments conditional upon performance conditions. The performance conditions set by Boards for these payments must be assessed over at least two financial years. They must be stringent and solely allow the award of termination payments in the event of the forced departure of an executive, irrespective of its form."

For Oliver Gavalda, Chief Executive Officer, Jérôme Grivet, Deputy Chief Executive Officer: their term of office does not provide for performance conditions, insofar as the termination payments for which they would be eligible in the event of their contract being terminated would not be due under their corporate officer contract, but under their employment contract, which is suspended during the exercise of their corporate office and would be reactivated in the event of termination of said corporate officer contract. The introduction of performance conditions would, in this case, be contrary to labour law.

(1) "Where the employment contract is upheld, it is suspended in accordance with case law".

1.2. BOARD ACTIVITY IN 2025

1.2.1 BOARD ACTIVITY

In 2025, the Board saw a high level of activity, having held 13 plenary meetings, including two strategic seminars dedicated to the preparation of the ACT 2028 Medium-Term Plan. In addition, in accordance with the option offered to deliberate by written consultation, introduced in the Articles of Association and the Board's Rules of Procedure for all decisions, the Board of Directors was consulted using this procedure twice in 2025.

Directors' attendance rate remained high, averaging 99% (see attendance table below) reflecting the strong commitment of all Directors, which has not waned from one year to the next.

Bodies	Attendance rate	Number of meetings in 2025
Board of Directors	99%	13 (of which two seminars and one training session)
Risk Committee	91%	7
Audit Committee	100%	5
Joint meetings of the Risk Committee and the Audit Committee	96%	9
US Risk Committee	100%	7
Compensation Committee	100%	6
Strategy Committee	96%	4
Societal Commitment Committee	100%	1
Joint meetings of the Societal Commitment Committee and the Audit Committee	97%	3
Appointments and Governance Committee	100%	8

THE BOARD'S RELATIONS WITH MANAGEMENT BODIES AND SUCCESSION PLANNING FOR KEY FUNCTIONS

Under the authority of the Chief Executive Officer, the organisation of Crédit Agricole S.A.'s management is structured around an Executive Committee and a Management Committee (see point 3.2 "Changes to the governance bodies"). The relationship between the Board of Directors and Executive Management is expressed foremost in the regular and numerous contacts between the Chairman and the Chief Executive Officer. In addition, the latter, as well as the Deputy Chief Executive Officer and the Corporate Secretary, attend all Board meetings. In addition, members of Management have frequent discussions with the Board, which stresses the ease of access to information and executives, during the annual assessment of its functioning, both for the Board itself and for its specialised committees. In 2025, all members of the Executive Committee had the opportunity to interact with the Board of Directors or its specialised committees. Depending on the topic, the heads of technical Divisions may also have access to Directors.

In accordance with banking regulations and pursuant to its Rules of Procedure, the Board interacts on a very regular basis with the three Heads of the control functions who are also members of the Executive Committee. The latter have regulatory and, if necessary, direct access to the management body in its oversight functions.

Both the Head of Risk Management function and the Compliance Officer are appointed after consulting the Board and may not be removed without the Board's consent. As for the person responsible for periodic control, their appointment and, if applicable, dismissal, is subject to the Board's approval. In 2025, as in previous years, the Heads of control functions reported very regularly on their activities and the results related to their responsibilities to the Board and its specialised committees. Within this framework, and in addition to systematic attendance at Risk Committee meetings, the Group Chief Risk Officer attended eight Board meetings, the Group Head of Compliance attended two Board meetings, while the Head of Group Control and Audit, in charge of periodic control, attended two Board meetings, notably to present the key audit findings and the Audit Plan for 2026.

The organisation of Executive Management and changes in its composition meet the Group's strategic needs.

It is recalled that, at the end of the General Meeting of 14 May 2025 (i) Philippe Brassac's term of office as Chief Executive Officer and that of Xavier Musca as Deputy Chief Executive Officer, both having reached the age limit, came to an end (ii) Olivier Gavalda, appointed by the Board of Directors on 17 December 2024, took up his position as Chief Executive Officer and (iii) Jérôme Grivet remained in office as the now sole Deputy Chief Executive Officer, with a larger scope of responsibility covering the "Finance and Steering" and "Savings and Wealth" divisions as well as control functions.

On 1 January 2026, the Executive Committee has 17 members, including the Chief Executive Officer, the Deputy Chief Executive Officers, the Directors in charge of Crédit Agricole CIB, LCL, Crédit Agricole Italy, Crédit Agricole S.A. Group's Human Resources, Control functions, and Corporate Secretary.

On 1 June 2025, the following executives joined the Executive Committee: Jean-François Balaÿ, Chief Executive Officer of Crédit Agricole CIB, Olivier Biton, Director of Technological Transformation and Chief Executive Officer of CA-GIP and Hugues Brasseur, Chief Executive Officer of Crédit Agricole Italia and Group Senior Country Officer in Italy. They respectively replaced Xavier Musca, Jean-Paul Mazoyer and Giampiero Maioli. On the same date, Grégory Erphelin, Deputy General Manager in charge of the Transformation, Human Resources and Transitions division, and Clotilde L'Angevin, Deputy General Manager in charge of the Finance and Steering division, also joined the Executive Committee. In addition, Anne-Catherine Ropers, Group Head of Human Resources, and Valérie Wanquet, Deputy General Manager in charge of the Risk Management division, joined the Executive Committee on 1 October 2025. They replaced Bénédicte Chrétien and Alexandra Boleslawski, respectively.

The Board of Directors remains keen to ensure that succession plans are in place for "key functions holders" within Crédit Agricole S.A., particularly those within the Executive Committee. The Chief Executive Officer periodically gives a presentation to the Appointments and Governance Committee, illustrating the position of each Executive Committee member and the proposed replacement/succession envisaged in the event of departure, focusing mainly on the internal talent pool, but without ruling out external recruitment if necessary.

TOPICAL DEBATES

The Board paid particular attention to developments in prudential and non-financial regulations, and in particular to the preparation of sustainability reports pursuant to the CSRD directive, which have been published for the first time in 2025 for the 2024 financial year. In general, environmental and climate issues, as well as social issues, gave rise to fruitful discussions.

The Board also discussed (i) the growing number of regional conflicts in a context of increasing geopolitical tensions, remaining attentive to the situation in Ukraine, a country in which the Group is present via CA Ukraine, (ii) the deterioration of international cooperation and the return of state policies imposing tariffs and (iii) the situation of the French economy and the country's debt level, in a context of political instability.

It also discussed the consequences of the drop in inflation and current monetary policies, which continue to offer a more favourable outlook, particularly for retail banking in France.

Lastly, there were numerous discussions on technological innovations, cybersecurity risks and the disruptions caused by digital assets and the development of artificial intelligence solutions.

APPOINTMENT OF THE CHAIRMAN OF THE BOARD OF DIRECTORS

On 18 September 2025, Dominique Lefebvre informed the Board of his decision to resign as Director and Chairman of the Board of Directors effective on 31 December 2025. The Board then undertook to replace him, on the basis of the following principles:

- In accordance with the provisions of Article L. 512-49 of the French Monetary and Financial Code and the provisions of the Articles of Association, the Chairman of the Board must have the status of Regional Bank Chairman.
- To ensure that it operates as a single unit, the Group is structured in such a way that the same person simultaneously chairs the Fédération Nationale du Crédit Agricole (FNCA), SAS rue La Boétie and the Board of Directors of Crédit Agricole S.A.
- The Chairman's succession is therefore based on a selection procedure requiring a two-stage process, involving in succession (i) the FNCA and SAS rue La Boétie and (ii) the Board of Directors of Crédit Agricole S.A. The prior work carried out by the FNCA and SAS rue La Boétie to identify candidates thus allow for the proposal of a candidate to the Board of Directors of Crédit Agricole S.A. for its Chair.

In this context, the Appointments and Governance Committee interviewed the candidate presented for the position of Chairman of the Board to verify his suitability in terms of availability, experience, expertise, and good repute, particularly with respect to its pre-established job description.

Following this process, the Board of Directors of 16 December 2025, on the advice of the Appointments and Governance Committee, elected Éric Vial, who has been a Director since 2022, as Chairman of the Board of Directors of Crédit Agricole S.A. effective on 1 January 2026.

STRATEGIC ORIENTATIONS

As part of its duties to provide strategic orientations for the Company's activities, the Board's work in 2025 focused on Crédit Agricole S.A.'s new ACT 2028 Medium-Term Plan, which lays the foundations for its ambitions for tomorrow: to be a leader in Europe, a leader in new technologies and a leader in transitions. It thus dedicated two strategic seminars, on 15 April and 16 September 2025, to developing the plan's guidelines. These were validated by the Board of Directors at its 13 November 2025 meeting, before being unveiled to the public on 18 November 2025.

The Board also paid particular attention to the Group's development challenges, against the backdrop of banking activity concentration in Europe.

Accordingly, it examined several structural operations, including, among those completed in 2025 and which were made public:

1. the conclusion of a strategic partnership between CRELAN and Crédit Agricole Group, through the signing of commercial agreements and the acquisition of a 9.9% minority stake in CRELAN, finalised on 7 October 2025;
2. the signing, on 24 July 2025, of an agreement by LCL and Crédit Agricole Assurances for the joint acquisition of the Milleis group;
3. the completion on 29 July 2025 of the acquisition of Petits-fils, the leading provider of at-home services for seniors in France, by Crédit Agricole Santé & Territoires;
4. the acquisition by Indosuez Wealth Management of 100% of Banque Thaler, a Swiss private bank, on 1 September 2025;
5. the conclusion on 18 November 2025 of a strategic and equity partnership, through a 9.9% stake in ICG's capital, between Amundi and ICG, one of Europe's leading private asset managers;
6. the announcement on 6 November 2025 of the joint launch of SBI Funds Management's initial public offering by Amundi and State Bank of India (SBI);
7. the request made by Crédit Agricole S.A. to the supervisory authority on 11 July 2025 to authorise the crossing of the 20% threshold of the capital of Banco BPM, with Crédit Agricole S.A. not intending to acquire or exercise control over Banco BPM and planning to maintain its shareholding below the mandatory public offer threshold. The ECB's authorisation for the said threshold crossing was notified on 9 January 2026.

RESULTS AND RISK MONITORING

The context of falling inflation and interest rates in Europe, weak growth levels and an uncertain geopolitical and political environment were at the heart of the Board's work in terms of risks.

It also paid particular attention to climate, environmental and IT risks. The quarterly review of the consolidated and parent company financial statements and related balance sheet changes of the Crédit Agricole Group and Crédit Agricole S.A. Group was an opportunity for the Board of Directors to assess the Group's ability to generate a significant return on equity and prudently manage it to achieve growth in results, which reflect the strength of its universal banking model.

In accordance with Article L. 228-40 of the French Commercial Code (Code de Commerce), the Board gave its consent for the 2025 bond issue programme, approving the related authorisations and receiving regular progress reports.

During each quarterly review and at each meeting of the Risk and Audit Committees, the Board closely monitored the Group's regulatory prudential ratios, both in terms of solvency and liquidity. The Crédit Agricole Group remains one of the best capitalised systemically important banks in Europe.

Upon the recommendation of the Risk Committee, it regularly reviewed and approved the strategies and policies governing risk-taking, as well the management, monitoring and reduction of the risks to which the Group is, or could be, exposed.

On that basis, it reviewed and/or approved risk management and monitoring tools and systems as well as their consistency, particularly between instruments such as the Annual Internal Control Report (RACI), the Risk Appetite Statement (RAS) and its alignment with the budgetary assumptions, the Internal Capital Adequacy Assessment Process (ICAAP) and the Internal Liquidity Adequacy Assessment Process (ILAAP) statements, and the Recovery Plan, of which it approved the update.

The Risk Appetite Framework (RAF) and its monitoring tools were adopted on 16 December 2025 at the same time as the budget for 2026.

The Board was kept informed – either directly or by the Chairwomen of the Risk and Audit Committees – of the results of the various oversight tasks conducted by the ECB within the Group and/or the requests sent by the supervisory authority to the Executive Management of Crédit Agricole S.A. It was also regularly informed of the results of the assignments carried out by the internal audit.

As part of the ongoing dialogue with the supervisory authority, the Board held discussions on 11 March 2025 with the Executive Management of Horizontal Line Supervision and its *Joint Supervisory Team* on the results of the SREP exercise for 2024 and the authority's priorities for 2025. The supervisory teams also interviewed the Chairwomen of the Risk and Audit Committees, the Appointments and Governance Committee and the Corporate Secretary separately during the year. In addition, quarterly discussions take place between the members and the Chairwomen of the US Risk Committee and the US supervisor.

In the field of corporate social responsibility, the Board was informed directly by Executive Management and by the Chairman of the Societal Commitment Committee of the highlights in this area, including monitoring of the Group's climate scorecard, the 2025 carbon budget, new sector-specific policies planned and the main changes planned as part of Crédit Agricole S.A.'s energy-transition commitments.

The Board monitored these commitments both as part of its review of the MTP's Societal Project and as part of the adoption of the Crédit Agricole Group sectoral policies on (i) electricity, and (ii) road transport.

Lastly, based on the Compensation Committee's report, the Board approved the principles of changes in the 2026 variable compensation policy for executive corporate officers, as well as their overall compensation conditions. In their absence, and following the report from the Chairwoman of the Compensation Committee, the executive corporate officers' individual variable compensation and its components, as well as the 2025 compensation and total variable compensation available to identified employees, were approved by the Board on 3 February 2026 ahead of the General Meeting of 20 May 2026.

RELATED-PARTY AGREEMENTS

In accordance with Articles L. 225-38 et seq. of the French Commercial Code, the Board authorised eight new related-party agreements in 2025.

The first agreement is an amendment to BforBank's shareholders' agreement, authorised by the Board on 17 June 2025 following the change in the investment plan. The purpose of the shareholders' agreement is to structure the procedure and arrange for the financing of the Company's development by its shareholders.

The second agreement is the shareholders' agreement of CA Santé & Territoires, authorised by the Board meeting of 11 March 2025 to open its capital to the Regional Banks. The purpose of the shareholders' agreement is to structure relations between the shareholders and to define their respective rights and obligations.

The third agreement is an amendment to the shareholders' agreement of CA Immobilier, authorised by the Board meeting of 16 December 2025 to update the agreement following (i) the conversion of its subsidiary CA-SIM from a public limited company (société anonyme) into a simplified joint-stock company (société par actions simplifiée) and (ii) the consequential elimination of the Board of Directors, CA-SIM's Audit Committee and Strategy Committee.

The fourth agreement is an amendment to the shareholders' agreement of CA-GIP, authorised by the Board meeting of 29 October 2025 to update the title of the role "Crédit Agricole Group ISD" and to adapt the agreement following the end of the special shared cost regime applicable to the Resource Pooling Agreement.

The fifth and sixth agreements, authorised respectively by the Board meetings of 29 October and 16 December 2025, are tax consolidation agreements between Crédit Agricole S.A. and, on the one hand, the Crédit Agricole Regional Banks and, on the other hand, the following companies: SACAM Mutualisation, SAS Rue La Boétie, SAS Ségur, SAS Miromesnil, SACAM Avenir, SACAM Développement, SACAM International, SACAM Participations, SACAM Fia-Net Europe, SACAM Fireca, SACAM Immobilier, SACAM Machinisme, SACAM Assurance Caution, SARL Adicam, SAS Crédit Agricole Logement et Territoires. They structure the distribution of the corporate income tax charge within the tax consolidation group and the relations with the parent company of the Crédit Agricole S.A. Group.

The seventh agreement is a share subscription engagement letter signed with Worldline and authorised by the Board of 13 November 2025, whereby Crédit Agricole S.A., a 7% shareholder of Worldline, engages Worldline to implement its transformation plan and strengthen its financial flexibility, notably through a reserved capital increase.

The eighth agreement, authorised by the Board meeting of 16 December 2025, concerns the signing of a new Group VAT Agreement for the single taxable person "ASU GTVA Crédit Agricole" between Crédit Agricole S.A., the Crédit Agricole Regional Banks and their subsidiaries. The purpose of the agreement is to lay down the operating procedures of the Crédit Agricole Group VAT and in particular the terms for the calculation and payment of compensation to the Members and to Crédit Agricole S.A.

1.2.2 SUMMARY OF MAIN SUBJECTS REVIEWED BY THE BOARD IN 2025 AFTER REVIEW BY, ADVICE FROM AND/OR ON THE RECOMMENDATION OF THE SPECIALISED COMMITTEES

1. After analysis by the Audit Committee:

- approval of the annual financial statements and review of the half-yearly and quarterly financial statements of Crédit Agricole S.A., the Crédit Agricole S.A. Group and Crédit Agricole Group and the associated balance sheet changes; at each reporting date, the Board heard the Company's Statutory Auditors who, having presented the findings of their work to the Audit Committee, then presented them to the Board, together with their reports for each interim reporting date. The Board also reviews and, where necessary, approves the draft press releases published by the Company;
- the Group's goodwill position;
- the 2026 budget of the Crédit Agricole S.A. Group, examining the stress assumptions and the ICAAP approach in case of financial difficulty;
- the sustainability reports and the monitoring of the process used to draw them up, in conjunction with the Societal Commitment Committee, and in particular the task plan for sustainability information certifiers;
- the review of tax consolidation agreements, renewed on 1 January 2025, and their impact on the Group.

2. After analysis by the Risk Committee:

- developments in the situation of Crédit Agricole S.A. and Crédit Agricole Group with regard to equity and solvency, with the approval of the internal capital adequacy assessment process (ICAAP) and that of the internal liquidity adequacy assessment process (ILAAP);
- developments in the Group's liquidity situation, the Group Liquidity Emergency Plan, the short-term half-yearly limits, as well as the monitoring of the implementation of the financing programme of Crédit Agricole Group;
- Group limits in respect of interest rate risk, foreign exchange, Value at Risk (VaR) and limits for capital market activities;
- management of the Crédit Agricole S.A. Group securities portfolio;
- the Annual Internal Control Report and half-year interim information on internal control, coordinated by the Group Risk Management department;
- all mail sent to the Company by regulators mentioning the obligation to inform the Board and measures taken to respond to their observations;
- developments in terms of credit risk, market risk and operational and security risks, as well as the risk dashboard and monitoring of IT and cybersecurity risks;
- the update of the Group's recovery plan;
- the update of the 2025 Audit Plan and the 2026 Audit Plan for the Group Control and Audit department;
- approval of the risk management framework governing risk-taking in the Group's core business areas;
- in the area of legal affairs, the progress of ongoing litigation and administrative investigations;
- the report on compliance with anti-money laundering and terrorist financing;
- monitoring of the Russia-Ukraine conflict and its consequences for the Group.

3. After analysis by the US Risk Committee:

- the situation of the Group's activities in the United States, largely driven by Crédit Agricole CIB;
- the update of the organisation and the consolidated risk management framework of entities in the United States;
- the 2025 Risk Appetite Framework and the Liquidity Emergency Plan for the Group's activities in the United States;
- the results of ROCA (Risk, Operations, Compliance and Asset Quality) supervisory exercises for the US entities subject to this;

- the results of the quarterly reports sent to the Fed, as well as the monitoring of ongoing remedial measures;
- the implementation of the transaction between Victory Capital and Amundi and its implications for Amundi US.

4. After analysis by the Strategy Committee:

- preparation of the ACT 2028 Medium-Term Plan
- proposed acquisitions and disposals (see above).

5. After analysis by the Compensation Committee:

- the fixed compensation, annual personal variable compensation, and the terms and conditions and criteria used to determine the annual variable compensation of the executive corporate officers (Chairman, Chief Executive Officer and Deputy Chief Executive Officers), taking into account regulatory provisions as well as the CSR performance criteria that was and will be presented to the General Meeting as part of the ex-ante and ex-post vote on Executive compensation;
- the update of the compensation policy of Crédit Agricole S.A. Group;
- under regulatory provisions, the report on the compensation practices for members of the executive body as well as identified employees whose professional activities have a significant impact on the Company's risk profile;
- an update on preparations for the implementation of the Pay Transparency Directive;
- changes to the compensation package for Directors and the compensation principles applicable to the newly elected Chairman;
- the guidelines of the Human-centric Project, as part of the ACT 2028 Medium-Term Plan;
- capital increase reserved for employees.

6. After analysis by the Appointments and Governance Committee:

- the election of Éric Vial as Chairman of the Board of Directors, succeeding Dominique Lefebvre as of 1 January 2026;
- the regulation of the duration of the Chief Executive Officer's duties and the related amendment of the Board's Rules of Procedure (see above);
- the results of the self-assessment of the operation of the Board and its individual and collective expertise, and possible ways of improving governance;
- independence of Directors under the Afep/Medef Code and areas of non-compliance with this Code;
- the progress of work on succession plans for Crédit Agricole S.A.'s key functions;
- the updating of the Board of Directors' Rules of Procedure and those of certain specialised committees, and in particular:
 - the updating of the Rules of Procedure of the Board, the Risk Committee and the Audit Committee regarding the reporting of internal audit subjects to the Audit Committee,
 - the updating of the Rules of Procedure of the Board and the Risk Committee regarding the monitoring of risks related to information and communication technologies, particularly with regard to the DORA regulation,
 - the updating of the Board's Rules of Procedure following the updating of the Code of Ethics;
- the amendment of the following three procedural notes:
 - the Board procedural note defining the principles of the succession processes followed by the Board for its Chairman, for the Chief Executive Officer and for the members of the Executive Committee identified as key functions,
 - the Board procedural note relating to the profiles, skills and availability required to perform the duties of Director of Crédit Agricole S.A.,

- the procedural note of the Board of Directors of Crédit Agricole S.A. relating to the consideration of social and environmental issues in the determination of activity guidelines;
- the policy on gender equality at work and equal pay within Crédit Agricole S.A. – as a corporate entity, and the initiatives undertaken at the Crédit Agricole S.A. group level to promote gender equality at work, diversity and equal representation in management bodies;
- the selection process for Directors whose appointment will be proposed to the General Meeting of 20 May 2026, and the one proposed for ratification by the same meeting;
- the appointment of non-voting Directors, the composition and the Chair of specialised Board committees;
- the issuance of an opinion on the appointment of the new Chief Risk Officer;
- discussions with the Group Head of Compliance on the rolling out of the ethical culture and its assessment, including the updating of the Code of Ethics and the Code of Conduct.

7. After analysis by the Societal Commitment Committee:

- the review of the Vigilance Plan, which forms part of the report on corporate governance approved by the Board of Directors;
- the climate dashboard, which is a monitoring tool for Crédit Agricole Group's decarbonisation pathways;
- the 2025 Carbon budget, included in the financial budget;
- the adoption of "Electricity" and "Road transport" sectoral policies;
- the regulatory changes to be expected in environmental matters, in particular in connection with the "Omnibus" directive.

8. Other issues examined by the Board included:

- preparation for the General Meeting of Shareholders and its notice of meeting;
- as the corporate centre of the of Crédit Agricole Group, the approval of the Chief Executive Officers of Regional Banks and Deputy General Managers;
- the review of the annual statement to the UK authorities under the Modern Slavery Act;
- the authorisation of related-party agreements (see below).

1.3. ACTIVITIES OF SPECIALISED COMMITTEES OF THE BOARD

1.3.1 OPERATING PRINCIPLES OF THE COMMITTEES

Seven committees are in place within the Board of Directors: the Risk Committee, the US Risk Committee ⁽¹⁾, the Audit Committee, the Compensation Committee, the Appointments and Governance Committee, and the Strategy Committee and Societal Commitment Committee.

Committee members are appointed by the Board, on the Chairman's recommendation. The Board may terminate the appointment of a committee member at any time. A committee member may resign from office at any time. All committee members, and all other persons who attend committee Meetings, are bound by confidentiality and professional secrecy.

The functioning of each committee is governed by Rules of Procedure. In the course of their work, Board committees may interview any executive or employee of Crédit Agricole S.A Group or experts from outside the Company in areas that fall within the committees' remit.

In accordance with the provisions of the French Monetary and Financial Code and the recommendations of the European banking authorities, the committee members have the knowledge, skills and expertise necessary for their role. These competences are assessed annually after review by the Appointments and Governance Committee at the same time with respect to:

- the results of the annual evaluation provided for in Article L. 511-100 of the French Monetary and Financial Code, which cover both the Board and the specialised committees;
- the qualities necessary to chair and serve on these committees, as described in the Board's procedural memorandum;
- the guidelines of 2 July 2021 on the assessment of the skills of members of management bodies established by the European Banking Authority.

Members of the specialised committees receive a brief on the different items on the agenda, generally three to five days prior to each meeting, depending on the committee.

Just as Board members are paid for attending Board Meetings, members of committees are paid for their presence based on a scale set by the Board on the recommendation of the Compensation Committee.

The five committee Chairwomen, the Chairman of the Strategy Committee and the Chairman of the Societal Commitment Committee play a key role in the organisation and functioning of the committees and in the coordination of their work. The Chairpersons hold regular meetings with the Directors in charge of the activities falling within the scope of the area of expertise of each committee, in particular the heads of the three control functions, the Deputy Chief Executive Officer, the Deputy General Manager in charge of Finance and Steering, the Chief Sustainability and Impact Officer, the Head of Human Resources and the Corporate Secretary. The Chairs of the Risk Committee and the Audit Committee also hold regular bilateral meetings with the Statutory Auditors. They also attended several meetings with the ECB Joint Supervisory Team (JST), notably as part of the SREP process but also through interviews conducted by the JST, either alone or with members of these two committees. In addition, the Chairwoman of the US Risk Committee also interacts directly with the Fed.

Minutes are prepared for each committee meeting by the Secretary to the Board of Directors and, after approval by its Chairwoman, are distributed first to all members of the Committee and then to all members of the Board.

INCLUSION OF CSR ISSUES IN THE WORK OF THE SPECIALISED COMMITTEES

At its plenary meetings, the Board ensures the consistency of the undertaking's commitments and project with regard to social and environmental issues, particularly:

- when examining strategic projects;
- when reviewing the Risk Management Framework submitted for adoption, if the scope of the activities concerned justifies it, in particular to ensure that climate and environmental risks are taken into account.

(1) The US Risk Committee, established in 2016, was set up in response to a US regulatory requirement applicable, as from 1 July 2016, to foreign banks operating in the United States and meeting certain asset threshold criteria.

In addition, the matters submitted to the decision of the Board of Directors are reviewed in advance by one or more of its seven specialised committees, which are responsible for preparing the Board's deliberations and/or submitting their opinions and recommendations to the Board. In the environmental and social field, Crédit Agricole S.A. has chosen to assign specific responsibilities to two committees:

- the review of the ESG policy, including climate strategy monitoring ahead of the General Meeting, has been entrusted to the Societal Commitment Committee;
- the review of non-financial information, and in particular the preparation and monitoring of the sustainability reports of Crédit Agricole S.A. and Crédit Agricole Group, has been entrusted to the Audit Committee.

1.3.2 RISK COMMITTEE

5 MEMBERS AT 31/12/2025	ATTENDANCE RATE
Carol Sirou Chairwoman of the Committee Independent Director	100%
Sonia Bonnet-Bernard Independent Director	86%
Marie-Claire Daveu Independent Director	86%
Pierre Cambefort Chief Executive Officer of a Regional Bank.	100%
Pascal Lheureux Regional Bank Chairman	86%

The Deputy General Manager in charge of the Finance and Steering division, the Deputy General Manager in charge of the Risk Management division, the Head of Internal Audit, the Group Head of Compliance, the Head of Group Finance and the Head of Accounting and Regulatory Information attend Risk Committee meetings on an ongoing basis.

The functioning and duties of the committee are set out in Rules of Procedure as approved by the Board of Directors. The committee performs its duties under the responsibility of the Board of Directors, in the areas defined by provisions of the French Monetary and Financial Code. These are mainly derived from the Capital Requirements Directive IV (CRD IV) of 20 February 2014 and the amended decree of 3 November 2014 on the internal control of banks.

The work of the committee is subject to annual programming, adapted according to needs and current events. The Risk Committee, in conjunction with the Audit Committee, holds at least one non-executive meeting a year, at which it decides on its work programme for the coming year, on the collective training courses requested by its members, and discusses with the members any areas where it might improve. It also meets with the Statutory Auditors to obtain their assessment of the Company's operations without any member of management being present.

The Risk Committee met seven times in 2025, in addition to the nine meetings held jointly with the Audit Committee (see below).

Notwithstanding these specific responsibilities, the Board has reaffirmed its ambition to maintain a cross-functional approach to CSR issues, involving most of the specialised committees, depending on the subject. The specialised committees are involved in the following areas in particular:

- the Risk Committee, for the effects of climate risk on the various other risk levels;
- the Compensation Committee, to assess the ESG performance of executives;
- the Appointments and Governance Committee, to promote a culture of ethics within the Group;
- the Strategic Committee, for understanding ESG risks in external growth operations, and in the guidelines for the Medium-Term Plan.

The Risk Committee's fixed schedule is mainly structured around the regulatory issues provided for in the French Decree of 3 November 2014 on internal review, amended by the Decree of 25 February 2021, those arising from the requirements of supervisors, the review of risk frameworks and subjects involving risk issues, in particular IT and cyber security, which the committee reviews on a quarterly basis. The Committee is attentive to the incorporation of ESG risks, in particular climate risk, including in its regulatory aspects.

In 2025, the committee reviewed the following:

- the risk appetite statement and associated monitoring tools (risk appetite matrix and dashboard), which constitutes a decisive framework for the committee's risk control and monitoring, as well as governance more generally;
- the Group's liquidity position, emergency liquidity plan, semi-annual short-term limits and ILAAP, solvency position and monitoring of the solvency trend;
- the organisation, functioning and resources allocated to each of the three control functions (risk, compliance, internal audit);
- the audit findings, the follow-up to the recommendations and the 2026 audit plan;
- IT risks, both through the IT risk framework, the quarterly monitoring of these risks and of cyber risks through the IT Risk Dashboard, and the periodic monitoring of outsourcing;
- the direct and indirect risks related to the Russian-Ukrainian conflict;
- limits on the securities and sovereign portfolio, VaR limits, GIRR limits, foreign exchange limits;
- internal models and internal model risks;
- the review of the findings of the work conducted by the ECB and ACPR, the action plans and the quarterly follow-up of the recommendations arising from these findings;
- periodic information on administrative procedures and ongoing proceedings;
- all risk frameworks for containing risk prior to their presentation to the Board of Directors;
- a summary of the work of the US Risk Committee, after each committee meeting;
- the issuance of an opinion on the appointment of the new Chief Risk Officer.

1.3.3 AUDIT COMMITTEE

6 MEMBERS AT 31/12/2025	ATTENDANCE RATE
Sonia Bonnet-Bernard Chairwoman of the Committee Independent Director	100%
Agnès Audier Independent Director	100%
Alessia Mosca Independent Director	100%
Gaëlle Regnard Chief Executive Officer of a Regional Bank	100%
Jean-Pierre Gaillard Regional Bank Chairman	100%
Carol Sirou Independent Director	100%

The Deputy General Manager in charge of the Finance and Steering division, the Head of Group Finance, the Head of Accounting and Regulatory Information, the Deputy General Manager in charge of the Risk Management division and the Head of Internal Audit, and, as needed, the Head of Financial Communication and the Head of Subsidiaries and Equity Investments attend Audit Committee meetings on an ongoing basis.

The functioning and duties of the committee are set out in Rules of Procedure approved by the Board of Directors (see above).

In the last financial year, the Audit Committee held five meetings, in addition to nine joint meetings with the Risk Committee and three joint meetings with the Societal Commitment Committee.

A substantial part of the committee's work involved an in-depth review, prior to their presentation to the Board, of the annual, half-yearly and quarterly financial statements and related changes to

the balance sheet, along with a review of the consolidated results and the results of each of the Group's business lines, their regulatory position and the thrust and integrity of financial communication, including off-balance sheet commitments.

In this context, the committee has continued to be particularly attentive to provisioning and its justification, this point being systematically examined jointly with the Risk Committee.

In general, at each reporting date, the Committee pays particular attention to the accounting options and it hears the Statutory Auditors on the conditions under which the financial statements were prepared and the points to which the latter would like to draw the committee's attention. At each half-yearly reporting date, in addition to their reports including the specific annual report to the Audit Committee, the Statutory Auditors submit their programme of work for the coming months to the committee.

Changes in regulations and standards are systematically reviewed on a quarterly basis.

In the course of the joint review of the Audit Plan, the Head of Internal Audit presented to the Committee the elements of the Control and Audit department's Audit Plan and the duties of the Internal Audit business line relating to financial risks for 2025.

In examining services other than the certification of accounts (SACC), the Audit Committee also inspected the situation of Forvis Mazars, which replaced E&Y in 2024, and Deloitte, which will replace PwC in 2028. These two firms were selected by the Board of Directors on the committee's proposal following calls for tenders from 2019 and 2021 respectively to take account of their gradual assumption of duties at the sub-consolidation levels. Their appointments were and will be proposed to the shareholders of Crédit Agricole S.A. at the General Meeting in 2024 and 2028 respectively.

Lastly, the committee examined the results of the financial roadshows, which provide relevant information through feedback on investors' questions and concerns, and the shareholding structure of Crédit Agricole S.A.

1.3.4 JOINT MEETINGS OF THE AUDIT COMMITTEE AND THE SOCIETAL COMMITMENT COMMITTEE

SUSTAINABILITY INFORMATION

In accordance with its Rules of Procedure, the Audit Committee's responsibilities include the review of non-financial information, as well as the preparation and monitoring of the sustainability reports of Crédit Agricole S.A. and the Crédit Agricole Group. However, the Committee held several joint meetings with the Societal Commitment Committee in 2025 on this subject, in order to draw upon the widest possible expertise.

For the publication of the sustainability reports in respect of financial year 2025, the joint meeting of the two Committees (i) monitored the process implemented to determine the information to be disclosed in accordance with the standards for communication of sustainability and non-financial information; (ii) reviewed the themes of the sustainability reports of Crédit Agricole S.A. and the Crédit Agricole Group, resulting from the double materiality analysis, as well as the structuring options; and (iii) reviewed the auditors' task plan and the verifications they carry out on the sustainability report.

The attendance rate at the two joint meetings of the Audit Committee and the Societal Commitment Committee was as follows:

13 MEMBERS AT 01/01/2026	ATTENDANCE RATE
Éric Vial Committee Co-Chairman (from 01/01/2026) Chairman of the Board of Directors (from 01/01/2026) Regional Bank Chairman	100%
Dominique Lefebvre Committee Co-Chairman (until 31/12/2025) Chairman of the Board of Directors (until 31/12/2025) Regional Bank Chairman	100%
Sonia Bonnet-Bernard Committee Co-Chair, independent Director	100%
Raphaël Appert Deputy Chairman of the Board of Directors, Chief Executive Officer of a Regional Bank	100%
Olivier Auffray Regional Bank Chairman	100%
Marie-Claire Daveu Independent Director	100%
Nicole Gourmelon Chief Executive Officer of a Regional Bank	100%
Marianne Laigneau Independent Director	100%
Christophe Lesur Director representing employee shareholders	67%
Carol Sirou Independent Director	100%
Agnès Audier Independent Director	100%
Gaëlle Regnard Chief Executive Officer of a Regional Bank	100%
Alessia Mosca Independent Director	100%
Jean-Pierre Gaillard Regional Bank Chairman	100%

1.3.5 JOINT MEETINGS OF THE RISK COMMITTEE AND THE AUDIT COMMITTEE

The Rules of Procedure of the Risk Committee and the Audit Committee provide for the possibility of uniting these two committees. When the Audit and Risk Committee was split into two committees in 2015, in order to meet the new requirements of banking regulations, it seemed useful for members of the Audit and Risk Committee to have, in certain fields, and a fortiori in areas where financial and regulatory information are interrelated, the same level of information and the opportunity to discuss with one another. When regulations expressly require the Risk Committee to issue an opinion to the Board of Directors on the information reviewed, this opinion is given by the committee Chairwoman. This practice of a Joint Committee is fully satisfactory to the members of both committees. It meets the regulatory prudential requirements, amended by the decree of 25 February 2021, which provides that “the Risk Committee shall communicate, liaise and work effectively with the Audit Committee”.

9 MEMBERS AT 31/12/2025	ATTENDANCE RATE
Carol Sirou Committee Co-Chair Independent Director	100%
Sonia Bonnet-Bernard Committee Co-Chair Independent Director	100%
Agnès Audier Independent Director	100%
Marie-Claire Daveu Independent Director	89%
Alessia Mosca Independent Director	100%
Gaëlle Regnard Chief Executive Officer of a Regional Bank	100%
Pierre Cambefort Chief Executive Officer of a Regional Bank.	100%
Jean-Pierre Gaillard Regional Bank Chairman	89%
Pascal Lheureux Regional Bank Chairman	89%

In 2025, the Risk Committee and the Audit Committee met nine times in a joint meeting.

This large number of meetings takes into account the growing number of areas in which accounting and regulatory approaches are interconnected. This effect is partly linked to IFRS 9, which combines an accounting and regulatory approach to the assessment of risk and its provisioning method. At the same time, reporting requirements aggregating risk and accounting data are multiplying and led to the creation in 2019, within the Accounting department, of a “Group Data and Risk Finance Reporting” department made up of a mixed team. Similarly, legal risk is dealt with in the Joint Committee so that the members of the Audit Committee who examine the related provisions for risks and charges have the same information.

As in previous years, the review of the budget for Crédit Agricole Group, the results of the stressed budget and the risk appetite statement, which are essential guidance for members of the two committees, were covered at a joint meeting.

The following were also reviewed in the Joint Committee meetings:

- the Annual Internal Control Report and half-year interim information on internal control;
- the annual report on the fight against money laundering and terrorist financing;
- the cost of risk;

- structural IT projects in the areas of Finance and Risk;
- the data aggregation framework of the regulatory reporting;
- the Supervisory Review and Evaluation Process (SREP);
- monitoring ongoing proceedings;
- the financial trajectory of the ACT 2028 Medium-Term Plan.

1.3.6 THE US RISK COMMITTEE

3 MEMBERS AT 31/12/2025	ATTENDANCE RATE
Carol Sirou Chairwoman of the Committee Independent Director	100%
Pierre Cambefort Chief Executive Officer of a Regional Bank.	100%
Alessia Mosca Independent Director	100%

In addition to the three members mentioned above, two independent US advisers also participate in the committee in order to provide their expertise and knowledge of the US regulatory environment, thereby strengthening the committee's supervision of the Group's US operations:

- Kathryn Dick, appointed by the Board of Directors on 3 October 2023;
- Alison Melick, appointed by the Board of Directors on 31 July 2024.

With a presence in the United States primarily through Crédit Agricole CIB, Crédit Agricole Group is subject to Section 165 of the Dodd-Frank Act. This regulation requires foreign banks operating in the US, and whose total consolidated assets do not justify the creation of a holding company to head up its businesses, to have a Board of Directors' Committee dedicated to monitoring US risks. It was in this context that the US Risk Committee was created in 2016 to oversee the Group's activities in the United States, known as CUSO (*Crédit Agricole Combined US Operations*).

US regulations recommend that this committee should have at least three Directors, one of whom is independent. Crédit Agricole S.A. has opted for mostly independent members, including its Chairwoman, who is also Chairwoman of the Risk Committee, together with the two independent advisors mentioned above.

It holds at least four meetings a year, one of which is in the United States, in accordance with a US Federal Reserve recommendation. In 2025, the committee met seven times, including twice in the United States. In addition, four meetings were held with the Fed, two with all committee members during a trip to the United States and two with the committee Chairwoman.

The organisation of the committee's work is governed by a Group procedure note, which defines the organisation and framework for the consolidated risk management of the Group's US entities, in accordance with Regulation YY Enhanced Prudential Standards. This document, on which the Rules of Procedure of the US Risk Committee is based, is updated on a regular basis in order to take into account the requirements of the American supervisor and must be formally approved by the Board of Directors.

Each quarterly US Risk Committee Meeting is an opportunity for a detailed review of credit risks, market risks, compliance risks, Credit Risk Loan Review activities, liquidity risks, model risks and investment risks as well as operational risks from the Group's activities in the United States. **Cyber risks** closely monitored, as is the management of suppliers and service providers and emerging risks, reviewed half-yearly. In addition, there are systematic reviews of ongoing audits by the US supervisor(s) and the Control and Audit department, an update on legal and regulatory risks, and an update on human resources to ensure progress on recruitment plans for audit functions.

The **liquidity position** is reviewed at each quarterly meeting. Once a year, following a review by the committee, this leads to the approval by the Board of Directors of the Liquidity Emergency Plan for the Group's activities in the United States and the Liquidity Risk Appetite Framework, includes credit risks.

1.3.7 COMPENSATION COMMITTEE

6 MEMBERS AT 31/12/2025	ATTENDANCE RATE
Agnès Audier Chairwoman of the Committee Independent Director	100%
Olivier Auffray Regional Bank Chairman	100%
Marie-Claire Daveu Independent Director	100%
Alessia Mosca Independent Director	100%
Catherine Umbricht Director representing employees	100%
Pascal Lheureux Regional Bank Chairman	100%

The composition of the committee complies with legal provisions and the recommendations of the Afep/Medef Code, with a majority of independent Directors, one of whom is the Committee Chair, and the presence of an employee representative.

The Crédit Agricole S.A Group Head of Human Resources attends meetings of the Compensation Committee accompanied by the Head of Compensation and Employee Benefits. The Chief Sustainability and Impact Officer attended one of the committee meetings in 2025.

The functioning and duties of the committee are set out in Rules of Procedure as approved by the Board of Directors. The committee performs the duties conferred upon it by the Afep/Medef Code and the French Monetary and Financial Code (particularly Article L. 511-102), as well as preparing compensation-related tasks for which the Board of Directors is responsible under the French Commercial Code (particularly Article L. 22-10-8).

Along with recurring topics, at the committee's request an in-depth report is presented on Group entities in the United States and on the activities and/or business lines in that country.

In 2025, it particularly considered the following topics:

- the implementation of the transaction between Victory Capital and Amundi, which led to the exit of Amundi US from the scope of CUSO and the creation of Amundi USIA, an entity dedicated to the activity maintained therein;
- the organisation of control functions within the scope of US operations, as well as risk management more generally using risk appetite tools;
- the creation of CASO (Crédit Agricole Services & Operations), an entity in Canada to serve as a platform for part of the support and IT functions dedicated to Crédit Agricole CIB Americas;
- cyber security risks;
- the situation regarding non-compliance risk;
- legal risk and regulatory changes;
- the size of the CUSO balance sheet in view of activities and development prospects;
- follow-up of remedial action taken in areas of concern identified by supervisors.

The Committee also received specific training on regulatory changes in the United States, the outlook for financial regulation, presentation of the economic environment and an update on anti-money laundering and international sanctions regulations.

In addition, in accordance with the provisions of Article L. 511-91 of the French Monetary and Financial Code and the decision of the Board of Directors of 17 December 2013, the functions assigned to the Compensation Committee under the aforementioned article are performed by the Compensation Committee of Crédit Agricole S.A. for the following subsidiaries: LCL, Crédit Agricole Assurances, Crédit Agricole Personal Finance & Mobility, Crédit Agricole Leasing & Factoring and CACEIS.

The **Compensation Committee met six times in 2025**. Its Chairwoman, Ms Audier, reported to the Board on the work accomplished by the committee at each of its meetings and submitted the Committee's recommendations on matters subject to approval by the Board.

Although the committee's agenda is mainly in line with the regulatory calendar, the debates within the Committee are guided by the concern for reconciling transparency requirements and the alignment of market place best practices with the general philosophy of the compensation policy of Crédit Agricole which strives to find a balance between attractiveness and moderation.

The compensation that executive corporate officers received for achieving the performance criteria, in line with the Group's ESG commitments, particularly in the societal and environmental fields, was submitted ex-post to the General Meeting of 14 May 2025. These ESG performance criteria for 2024 were reviewed by the committee before being approved by the Board of Directors on 4 February 2025 (see part 4. "Reward policy" below).

As every year, after the General Meeting, the committee examined, the results of the vote on resolutions relating to the compensation of executive corporate officers in order to draw conclusions for the next General Meeting and for the governance roadshows held prior to the meeting.

The committee is particularly focused on capital increases reserved for employees and is keen to ensure that these transactions recur and that the terms are attractive to employees.

In anticipation of the General Meeting on 20 May 2026, the committee in its meetings, particularly that of 29 January 2026, reviewed all resolutions on the compensation of the executive corporate officers adopted by the Board at its meeting on 3 February 2026.

As part of the Board's regulatory obligations, the committee also examined the compensation of individuals with supervisory responsibilities (Risk, Control & Audit, Compliance), the budget for the variable compensation of identified employees and individual variable compensation over €1 million.

It also considered the "compensation" section of this Board report on Corporate Governance prior to the Board's approval of the entire current Corporate Governance Report on 12 March 2026.

In addition to the work described, other matters examined by the committee in 2025 included:

- the update of the Compensation Policy of the Crédit Agricole S.A Group, submitted for the Board's approval, and the results of the annual audit on the Compensation Policy;

- the overall budget for variable compensation within the Group, by entity and according to the appropriate schemes (bonus pool or individual variable compensation);
- a review of the compensation policies of entities that have transferred the tasks of their Compensation Committee to Crédit Agricole S.A.'s Compensation Committee, as well as the compensation policies of the new Chief Executive Officers of the same entities;
- the report on the compensation policy and practices of members of the executive body, as well as individuals whose professional activities have a significant impact on the Company's risk profile;
- an update on preparations for the implementation of the Pay Transparency Directive;
- an update on equal pay for men and women;
- an amendment to the annual variable compensation of the outgoing Chief Executive Officer until the AGM of 14 May 2025.

1.3.8 THE APPOINTMENTS AND GOVERNANCE COMMITTEE

6 MEMBERS AT 01/01/2026	2025 ATTENDANCE RATE
Marianne Laigneau Chairwoman of the Committee Independent Director	100%
Raphaël Appert Deputy Chairman of the Board of Directors Chief Executive Officer of a Regional Bank	100%
Jean-Pierre Gaillard Regional Bank Chairman	100%
Alessia Mosca Independent Director	100%
Olivier Desportes Regional Bank Chairman	100%
Éric Vial Regional Bank Chairman Chairman of the Board of Directors (from 01/01/2026)	N/A
Dominique Lefebvre (member until 31/12/2025) Chairman of the Board of Directors (until 31/12/2025) Chairman of a Regional Bank	100%

The functioning and duties of the committee are set out in Rules of Procedure as approved by the Board of Directors.

The Corporate Secretary of Crédit Agricole S.A. and Secretary of the Board of Directors also take part in meetings of the Appointments and Governance Committee. The Chairwoman of the Appointments and Governance Committee reports to the Board on its work and on the committee's opinion on matters referred to it for approval.

In addition, in accordance with the provisions of Article L. 511-91 of the French Monetary and Financial Code, the functions assigned to the Appointments and Governance Committee under Article L. 511-89 of the above-mentioned Monetary and Financial Code are performed by the Appointments and Governance Committee of Crédit Agricole S.A. for the following subsidiaries: Crédit Agricole Home Loan SFH and Crédit Agricole financement de l'habitat SFH.

The committee met eight times in 2025.

During the second half of 2025, the committee focused part of its work on examining the succession of the Chairman of the Board of Directors of Crédit Agricole S.A., drawing up the job profile for the Chairman of the Board of Directors and conducting an interview with the candidate presented for the position of Chairman of the Board of Directors. Following this process, the Board of Directors of 16 December 2025, on the advice of the Appointments and Governance Committee, elected Éric Vial as Chairman of the Board of Directors of Crédit Agricole S.A., effective on 1 January 2026.

The committee's other activities focused on the following points:

- Prior to the General Meeting of 20 May 2026, the committee examined the situation of Directors whose terms of office are up for renewal with regard to the criteria of availability, competence and good repute. As it does every year, it also examined the situation of the independent Directors.
- It examined the profile of the Directors whose appointment will be proposed to the General Meeting of 20 May 2026 and the Director whose appointment will be proposed for ratification at the same General meeting, in particular in terms of their expertise, availability and good repute.
- It organised the self-assessment campaign on the functioning and competences of the Board of Directors and specialised committees and, in the light of the results and suggestions, proposed concrete measures to address them (see below). This campaign was organised internally by the Board Secretariat.
- As provided for in its Rules of Procedure, it held a meeting with the Group Head of Compliance to discuss the ethical culture roll out and its assessment.
- As it does every year, the committee heard from the Human Resources Director on the measures to promote gender and wage equality at work, including in decision-making bodies.
- It proposed the appointment of two non-voting Directors and the changes it deemed necessary to the composition of the Board's committees.
- It reviewed the organisation structure of the Executive Management following the arrival of Olivier Gavalda.
- It gave feedback on the appointment process for the Chief Executive Officer, recommending that the Board regulate the term of office of the Chief Executive Officer and amend its Rules of Procedure accordingly (see above).
- It was kept informed of governance-related regulatory changes, and in particular of the impacts of the "Women on Boards" regulation, which came into force in 2026, and regularly reported on it to the Board of Directors.

- It discussed the following proposed amendments:
 - the updating of the Rules of Procedure of the Board, the Risk Committee and the Audit Committee regarding the reporting of internal audit subjects to the Audit Committee;
 - the updating of the Rules of Procedure of the Board and the Risk Committee regarding the monitoring of risks related to information and communication technologies, particularly with regard to the DORA regulation;
 - the updating of the Board's Rules of Procedure following the updating of the Code of Ethics;
- It reviewed the updates to the following Board of Directors' procedural notes prior to their approval by the Board:
 - the Board procedural note defining the principles of the succession processes followed by the Board for its Chairman, for the Chief Executive Officer and for the members of the Executive Committee identified as key functions;
 - the Board procedural note relating to the profiles, skills and availability required to perform the duties of Director of Crédit Agricole S.A.;
 - the procedural note of the Board of Directors of Crédit Agricole S.A. relating to the consideration of social and environmental issues in the determination of activity guidelines.
- In particular, it examined the policies on gender equality at work, equal pay and diversity.
- It issued a favourable opinion on the appointment of the new Group Chief Risk Officer.
- It is informed each year of the calendar of governance roadshows, for which it is expected to provide guidance and, once held, to produce a final report and the lessons learnt.
- For entities that had delegated to it the tasks assigned to this committee, it examined the profiles of the directors whose appointment was considered, particularly in terms of their expertise, availability, and good repute.
- Lastly, it reviewed the scores of the resolutions submitted to the 2025 General Meeting, in particular those with the highest opposition rate.
- When it reviewed this report on corporate governance submitted to the Board at its sessions of 3 February 2026 and 12 March 2026, the committee reviewed all resolutions on governance in view of the 20 May 2026 General Meeting.

1.3.9 STRATEGY COMMITTEE

7 MEMBERS AT 03/02/2026	2025 ATTENDANCE RATE
Olivier Desportes Chairman of the Committee (from 03/02/2026) Chairman of a Regional Bank	N/A
Dominique Lefebvre (Chairman until 31/12/2025) Chairman of the Board of Directors (until 31 December 2025) Regional Bank Chairman	100%
Raphaël Appert Deputy Chairman of the Board of Directors Chief Executive Officer of a Regional Bank	100%
Agnès Audier Independent Director	100%
Nicole Gourmelon Chief Executive Officer of a Regional Bank	100%
Christine Gandon Chairwoman of a Regional Bank	100%
Éric Vial Chairman of a Regional Bank Chairman of the Board of Directors (as from 01/01/2026)	75%
Éric Wilson Director representing employees	100%

The functioning of the Strategic Committee is described in its Rules of Procedure. It may meet as and when required rather than on the basis of an annual schedule. This flexibility renders it possible to involve the committee as early as possible in the process of considering disposals and acquisition transactions and the development of new business activities.

The committee met four times in 2025, mainly to supervise the work on the ACT 2028 Medium-Term Plan (i) firstly, on the methodological framework, the backward planning and the main principles used to structure the approach (ii) secondly, on the strategic diagnosis (iii) thirdly, through the sharing of work and discussions on the working groups set up on the different themes and (iv) the review of the consolidated components of the plan before its publication on 18 November 2025.

In addition to examining external growth projects, the committee also looked at the strategy of business concentration within the European financial landscape.

(For strategic projects and disposals and acquisitions that are publicly available and were presented to the Board in 2025, see Section 1.2.1 "Board activity", paragraph "Strategic orientations".)

1.3.10 SOCIETAL COMMITMENT COMMITTEE

7 MEMBERS AT 01/01/2026	2025 ATTENDANCE RATE
Éric Vial Chairman of the Committee (from 01/01/2026) Chairman of the Board of Directors (from 01/01/2026) Regional Bank Chairman	N/A
Dominique Lefebvre Chairman of the Committee (until 31/12/2025) Chairman of the Board of Directors (until 31/12/2025) Regional Bank Chairman	100%
Raphaël Appert Deputy Chairman of the Board of Directors Chief Executive Officer of a Regional Bank	100%
Olivier Auffray Regional Bank Chairman	100%
Nicole Gourmelon Chief Executive Officer of a Regional Bank	100%
Marie-Claire Daveu Independent Director	100%
Marianne Laigneau Independent Director	100%
Christophe Lesur Director representing employee shareholders	100%

The functioning of the committee is described in its Rules of Procedure.

The committee is involved in defining the strategic guidelines of the Group's Societal Project, including:

- climate strategy and transitions in energy, agriculture and the agri-food industry;
- sectoral decarbonisation policies, as part of the Group's Net Zero commitments;
- social inclusion policies

It also monitors the action plans and progress indicators for Crédit Agricole's societal and environmental commitments at least once per year, and examines the Group's climate change strategy prior to any presentation at the General Meeting. Lastly, it monitors the Crédit Agricole S.A. group's corporate philanthropy initiatives and is involved in the Group's communication strategy in terms of societal engagement and the key responses to controversies.

Its Chairman is also Chairman of the Board of Directors. He reports on the committee's work to the Board of Directors and acts in conjunction with the Board's other specialised committees, which ensure that these guidelines are correctly applied in their respective fields (see "Inclusion of CSR issues in the work of the specialised committees" below).

In 2025, the Societal Commitment Committee only held one meeting. It also held three joint meetings with the Audit Committee, notably on sustainability-related topics. (For sustainability-related topics, see part 1.3.3 "Audit Committee".)

Within the scope of its remit, the committee has examined the following in particular:

- the review of the Vigilance Plan, which forms part of the report on corporate governance approved by the Board of Directors;
- the climate dashboard, which is a monitoring tool for Crédit Agricole Group's decarbonisation pathways;
- the 2025 carbon budget, included in the financial budget;
- the adoption of "Electricity" and "Road transport" sectoral policies;
- the regulatory changes to be expected in environmental matters, in particular in connection with the "Omnibus" Directive.

The Societal Commitment Committee is also monitoring the preparation of the Integrated Report for the 2025 financial year, which will be the ninth such report, providing a strategic and forward-looking vision of the Company, integrating financial and CSR data.

The committee also had the opportunity to organise a meeting with the Scientific Committee of Crédit Agricole.

AGNÈS AUDIER

MAIN OFFICE WITHIN THE COMPANY

- Independent Director

- Chairwoman of the Compensation Committee
- Member of the Audit Committee
- Member of the Strategy Committee

BIOGRAPHY

Agnès Audier is an alumna of the *École normale supérieure*, chief engineer of France's *Corps des Mines*, holds a degree in Physics and Chemistry and a DEA (*diplôme d'études approfondies*) in Materials Science and is a graduate of IEP Paris (finance option). She began her career at the prefecture of the Île-de-France region. She was previously a member of the Office of Simone Veil at the Ministry of Social Affairs and Health, then head of Jean-Pierre Raffarin's Office at the Ministry of SMEs, Trade and Crafts. She joined the Vivendi Universal group in 1997, before joining the Havas group in 2003 as Executive Vice President, Chief Performance Officer.

After one year at the Inspectorate General of Finance in 2006, she joined the Boston Consulting Group where she was a Managing Director and Partner in the Paris office. There, she specialised among other things in strategy, organisation and digital transformation, specifically in the health and mobility sectors.

Agnès Audier, who has been heavily involved in the social field for 30 years, is Chairwoman of Groupe SOS Seniors, the leading non-profit player in the old age sector, which has nearly 200 establishments (mostly care homes) following its merger with the ARPAVIE group.

OLIVIER AUFRAY

MAIN OFFICE WITHIN THE COMPANY

- Director
- Member of the Compensation Committee
- Member of the Societal Commitment Committee

BIOGRAPHY

Olivier Auffray, Chairman of the Ille-et-Vilaine Regional Bank since 2019, brings to the Board experience as head of an agricultural company as well as banking expertise gained from the positions he has held at Crédit Agricole since 2006. Mr Auffray, 56 years old, who holds a BTS (Vocational Training Certificate) in Agricultural Technique and Business Management, is an expert in regional economies due to the positions that he holds or has held at the Chamber of Agriculture, at ADASEA (Société d'Aménagement des Structures d'Exploitation Agricole d'Ille-et-Vilaine – Planning company of the agricultural farming structures of Ille-et-Vilaine), as Co-Chair of the Local Agricultural Programme in Pays de Rennes, and on the Rennes Métropole Development Committee as a Director of SPACE (the International Trade Show for Livestock). A former member of the Economic and Social Council of Brittany, over his terms of office he has also been a member of various Committees in charge of areas such as the environment, biodiversity and attractiveness of the regions. He has also been Chairman of the professional branch of “Crédit Agricole” for two years, where he participates in the branch's social dialogue with representative social partners. Having been involved in IT sectors (CATS and CAGIP) for several years, he brings to the Boards of Directors his insight on technological changes and IT risks affecting the Group.

SONIA BONNET-BERNARD

MAIN OFFICE WITHIN THE COMPANY

- Independent Director
- Chairwoman of the Audit Committee
- Member of the Risk Committee

BIOGRAPHY

Sonia Bonnet-Bernard began her career in financial audit at the financial advisory firm Salustro (1985-1988), before joining Constantin Associates in New York (1988-1990). A specialist in national and international accounting standards, she was Director of International Relations at the *Ordre des experts comptables*, France's professional organisation of chartered accountants (1990-1996) and then General Delegate of the Arnaud Bertrand Committee (now the department of public interest entities at the French Institute of Statutory Auditors, or CNCC), coordinating the positions of the major audit firms in France (1996-1998). She was a lecturer at the University of Paris IX-Dauphine (in general accounting) and at the IAE of Poitiers (in comparative accounting).

In 1998 Sonia Bonnet-Bernard joined Ricol Lasteyrie Corporate Finance as a managing partner in charge of independent appraisal, valuation, accounting advice and litigation support. She became a partner at EY, within the Transaction department, following the merger between RLCF and EY in 2015.

In May 2020 she set up a company specialising in independent financial appraisal and valuation: A2EF.

Sonia Bonnet-Bernard was an independent member of the Supervisory Board of Tarkett and Chairwoman of the Audit Committee (2011-2015).

She is a chartered accountant, Statutory Auditor, sustainability auditor and legal expert at the Paris Court of Appeal.

PASCAL LHEUREUX

MAIN OFFICE WITHIN THE COMPANY

- Director
- Member of the Compensation Committee
- Member of the Risk Committee

BIOGRAPHY

Holder of a BTS (*brevet de technicien supérieur*) in farm management, Pascal Lheureux began more than 35 years ago with his brother in the expansion of the family farm, which today supports 15 families. He initiated its diversification, including into export-oriented activities. Very early on, he incorporated the environmental impact of the activity of his ISO 14001-certified farm (an international environmental management standard) and, for its fruit and vegetable sector, obtained the international Global Gap certification in 2008. As a member of the *Demain la Terre* collective, he works on a commitment to zero waste in fruit and vegetables. He has more than 30 years of experience at Crédit Agricole, he has been Chairman of the Normandie-Seine Regional Bank since 2014, and Director of Unigrains, a leading private equity player in the agri-food sector.

Date first appointed: May 2023
(Director)

Term of office: 2026

Number of Crédit Agricole S.A.
shares held at 31/12/2025: 1,100

BIOGRAPHY

Carol Sirou is President of EthiFinance and an independent Board member, relying on a 30 years' experience in various executive management positions both in Europe and the US.

She has spent a large part of her career in financial services at Standard & Poor's Ratings: she managed the rating agency's activities in Paris from 2008 to 2014, then joined the S&P headquarters in New York to implement a regulatory compliance programme before becoming responsible for global compliance for the group, S&P Global Inc., in 2016. From 2018 to 2022 she founded her own consultancy firm, specialising in risk management and ESG.

With sustainable finance her passion, she was appointed EthiFinance CEO in June 2022, an independent player in the rating and ESG consultancy market, with a goal to accelerate its strategic plan and to develop a double materiality agency in Europe.

She brings her knowledge about finance, governance and compliance as well as an international perspective, particularly a US perspective acquired during seven years spent in New York between 2014 and 2022.

She is also a member of the Medef Governance Committee since 2021 and the ESG group of the IFA (French Institute of Directors) since 2022.

A graduate of Sciences Po Paris, Carol Sirou holds a master's degree in corporate finance from Paris Dauphine University and completed a management programme at the University of Virginia Darden School of Business.

ERIC WILSON

MAIN OFFICE WITHIN THE COMPANY

- Director representing employees
- Member of the Strategy Committee

BIOGRAPHY

A graduate of ITB and with certification in digital marketing from ESPC Business School, Eric Wilson began his career in 1993 at the Île-de-France Regional Bank, where he gained solid experience in customer relations. He held various consulting and network management positions in both the private and SME/SMI markets.

He joined Crédit Agricole S.A. in 2007 as e-banking project manager for the small business market, before continuing his career in the Agriculture department at the end of 2009 where he was responsible for the development of a marketing plan and for the financing of agricultural facilities. This gave him the opportunity to promote a national relationship with France's Young Farmers' union. During this time, he led a number of projects making up the agricultural component of the Group project.

In early 2018 he joined the Brand and Communications department where he was responsible for managing media budgets. Since the end of 2019 he has been responsible for the real estate financing offer and for regulated loans within the private business marketing unit of the Market Development department.

BIOGRAPHY

A graduate of the Institute of Political Studies (*Institut d'études politiques*) in Paris, the National School of Administration (*École nationale d'administration*) and ESSEC, Jérôme Grivet began his career at France's General Finance Inspectorate (*Inspection générale des finances*) in 1989. He was Advisor for European Affairs to then-Prime Minister Alain Juppé before joining Crédit Lyonnais in 1998 as Head of the Finance and Management Control department of the commercial bank in France. In 2001 he was appointed Head of Strategy at Crédit Lyonnais. He went on to hold the same position at Crédit Agricole S.A. In 2004 he was in charge of Finance, Corporate Secretariat and Strategy at Calyon before being appointed Deputy Chief Executive Officer in 2007. At the end of 2010, Jérôme Grivet was appointed Chief Executive Officer of Crédit Agricole Assurances and Chief Executive Officer of Predica. In May 2015, he was appointed Deputy General Manager of Crédit Agricole S.A., in charge of the Group Finance division.

In September 2022, Jérôme Grivet became Deputy Chief Executive Officer of Crédit Agricole S.A., in charge of steering and control functions.

Since 14 May 2025, his position as Deputy Chief Executive Officer and Executive Director has been renewed.

3.3. TRANSACTIONS CARRIED OUT ON COMPANY SECURITIES

Summary of securities transactions in the Company’s shares by members of the Board of Directors, the Chief Executive Officer, the Deputy Chief Executive Officer and any person having the authority to make decisions concerning the development and strategy of Crédit Agricole S.A. and any person mentioned in

Article L. 621-18-2 of the French Monetary and Financial Code, during financial year 2025, for transactions exceeding an aggregate ceiling of €20,000 (pursuant to Article L. 621-18-2 of the French Monetary and Financial Code and Article 223-23 of the General Regulations of the French Financial Market Authority (AMF)).

Name and title	Transactions carried out by executives in a personal capacity and by related persons
SAS La Boétie	Acquisition of 22,094,418 shares at a price of €15.98
Majority shareholder	
Benoît Tassou – associated with Gaëlle Regnard (Director)	Acquisition of 3,819 shares at a price of €16.13

SPECIFIC PROVISIONS RELATING TO THE RESTRICTIONS AND INTERVENTIONS OF THE DIRECTORS ON TRANSACTIONS ON COMPANY SECURITIES

Each of them being, by definition, a “permanent insider”, apply the rules relating to the subscription/prohibition “windows” that apply to the Directors to carry out the transaction on the Crédit Agricole S.A. security. The dates corresponding to these windows will be communicated to the Directors at year-end for the following financial year.

There is no service contract linking the members of the administrative or management bodies to Crédit Agricole S.A. or to any of its subsidiaries and providing for the granting of benefits under the terms of this contract.

To the knowledge of the Company, there is no family connection between the corporate officers, Directors, Chief Executive Officer and Deputy Chief Executive Officers of Crédit Agricole S.A.

Crédit Agricole S.A. complies with the corporate governance system in force in France, as indicated in the Board of Directors’ report on corporate governance at the General Meeting of Shareholders of 14 May 2025, featuring in this Universal Registration Document. The Afep/Medef Code revised in December 2022 is that to which the Company refers in preparing the report set out in Articles L. 225-37, L. 225-37-4 and L. 22-10-10 of the French Commercial Code (Code de Commerce).

To the knowledge of the Company, no conviction for fraud has been delivered in the past five years, up to the present time, against a member of the administrative or management bodies of Crédit Agricole S.A.

To the knowledge of the Company, no notice of bankruptcy, due to sequestration or liquidation, has been served in the past five years, up until the present time, against a member of the administrative or management bodies of Crédit Agricole S.A.

4. REWARD POLICY

TARGETS OF THE REWARD REPORT

Prepared with the assistance of the Compensation Committee, the purpose of the reward report is to:

- explain Crédit Agricole S.A.'s reward policy and, in particular, the components of compensation approved for Corporate Officers at the Annual General Meeting;
- highlight the Group's particular approach, based on a common framework and specific rules adapted to the positions and responsibilities;

- enhance the alignment of executive compensation with:

- the compensation policy for the Group's employees, and
- the Raison d'Être, the Medium-Term Plan and the performance of the Group.

The Compensation Committee reviews the reward report. It complies with Crédit Agricole S.A.'s regulatory obligation in terms of publication of the compensation policy and the components of compensation of its corporate officers.

Information on Crédit Agricole S.A.'s compensation policy will be supplemented by the Annual report document relating to the policy and to the compensation practices for identified employees. The compensation policy is also mentioned in the following documents and media published by Crédit Agricole S.A.:

Summary of the Group's compensation policy	Detailed presentation of the resolutions on say on pay	Summary of the resolutions on say on pay	Presentation of the changes to the compensation policy for executive corporate officers
Integrated report	Notice of meeting	Video and presentation to the General Meeting	Governance roadshows

STRUCTURE OF THE LONG-TERM VARIABLE COMPENSATION OF EXECUTIVE CORPORATE OFFICERS AND EXECUTIVE MANAGERS

COMPENSATION RELATED TO THE GROUP'S PROJECT REALISATIONS AND ITS RAISON D'ÊTRE

WORD FROM THE HEAD OF HUMAN RESOURCES

Anne-Catherine ROPERS

A COMPENSATION POLICY FOR RESPONSIBLE PERFORMANCE

Crédit Agricole Group's compensation policy is fully in line with its *raison d'être* and supports sustainable value creation for all its stakeholders. It aims to support the implementation of the Group's strategy in a rapidly changing banking environment, marked by increased competition, technological transformations and the acceleration of societal and environmental transitions.

Conceived as a performance and engagement driver for all our employees, this policy is built on the Group's core principles: a universal and decentralised model, the diversity of its businesses, and the involvement of responsible employees who are dedicated to serving our customers and communities.

The compensation policy aims to attract, motivate and retain key talent, while ensuring controlled risk management and compliance with regulatory and ethical requirements. It is based on equal sharing of the value created, combining fixed and variable compensation, collective schemes, employee shareholding and employee benefits.

Structured around principles of transparency, attraction and alignment with the interests of shareholders, customers and society, it consolidates a long-term vision and takes into account the Group's social and environmental responsibility issues.

4.2. BASIC PRINCIPLES OF THE REWARD POLICY

IMPORTANT TO KNOW

Crédit Agricole S.A.'s reward policy includes components of compensation in the strict sense of the term, as well as social benefits and peripheral compensation. Reflecting the Group's values, it is based on fairness and common rules for all employees, in compliance with the regulatory corpus specific to the financial sector.

The reward policy aims to contribute to the implementation of Crédit Agricole S.A.'s Raison d'Être, the Group Project and its Medium-Term Plan.

The Group has established a specific governance structure to oversee all aspects of the reward policy, from its development through to its implementation, drawing support both from the Board of Directors and the Compensation Committee, and from the Group operations departments.

4.2.1 APPROACH OF CRÉDIT AGRICOLE S.A.'S REWARD POLICY

As a leading national and international force in the banking market, Crédit Agricole S.A. applies a compensation policy that aims to align the interests of customers, shareholders and employees in an increasingly competitive and regulated market.

This compensation policy helps to convey the values of fairness, transparency and usefulness that are key to our Group.

It contributes to implementing the Medium-Term Plans of the Crédit Agricole S.A. Group.

The components of compensation for employees and executive managers are determined on the basis of precise, clear and measurable criteria that reflect the competencies required, seniority as well as the individual and group performance attained in terms of the organisation's sustainable responsibility.

TARGETS OF CRÉDIT AGRICOLE S.A.'S REWARD POLICY

ALL EMPLOYEES

- Building loyalty, allowing **Group team members** to grow and helping them to give their best.
- Recognising **individual and collective performance** over time.
- Aligning the interests of **employees** with those of Crédit Agricole S.A., its **customers** and its **shareholders**.
- Promoting a responsible compensation policy that governs risk-taking and respects the legal environment and national, European and international regulations in force.
- Promoting sound and effective risk management practices, including for ESG risks.
- Ensuring a gender neutral remuneration policy.

EXECUTIVE MANAGERS

- Correlating their compensation levels with actual **long-term performance**.
- Aligning the interests of management with the success of the Group's Project and **Medium-Term Plan**.

EXECUTIVE CORPORATE OFFICERS

- Recognizing the **long-term performance** and successful implementation of the Medium-Term Plan.

4.2.2 REGULATORY CORPUS SHAPING COMPENSATION POLICIES

4.2.2.1 REGULATIONS GOVERNING THE COMPENSATION POLICIES OF CRÉDIT AGRICOLE S.A. ENTITIES

Crédit Agricole S.A.'s compensation policy is in line with a regulated environment specific to its sector.

The compensation policies of Crédit Agricole S.A. entities are compliant with national, European and international regulatory requirements. They are governed by several distinct sets of regulations, pertaining to the Group's various activities:

- those applicable to credit institutions (the CRD 5 package);
- those applicable to asset management companies and alternative investment funds (hedge funds and private equity funds) under the European Alternative Investment Fund Managers directive (Directive 2011/6 of 8 June 2011, or "AIFMD") and to UCITS management companies under the European UCITS V directive (Directive 2014/91/EU of 23 July 2014);
- those applicable to insurance and reinsurance companies that come under the Solvency framework;
- those applicable to investment firms (the IFR/IFD package).

It also includes the provisions of the Volcker Rule, France's law on the separation of banking and finance activities, MiFID and the Insurance Distribution Directive.

This regulatory framework clarifies the definition of "identified employees" who are subject to more stringent compensation rules.

4.2.2.2 REGULATIONS PERTAINING TO IDENTIFIED EMPLOYEES

AIFM: Alternative Investment Fund Managers

CRD 5: Capital Requirements Directive 5

IFR/IFD: Investment Firm Regulation/Investment Firms Directive

UCITS: Undertakings for Collective Investments in Transferable Securities

Identified employees are those who have an impact on the risk profile of the Group or of their entity because of their function, their level of delegation or their level of compensation. The regulatory framework specifies:

- **how to identify them:** a summary of the criteria used is given in the Universal Registration Document, Chapter 3, part 4.5. They are jointly defined by the Human Resources functions and Risk Management and Permanent Controls and Compliance departments at Crédit Agricole S.A. and entity level;
- **the rules governing their compensation:** Universal Registration Document, Chapter 3, part 4.3.1.4.

4.2.2.3 REGULATIONS PERTAINING TO EXECUTIVE CORPORATE OFFICERS

In addition to the regulatory corpus specific to the banking sector, the compensation of executive corporate officers of Crédit Agricole S.A. complies with:

- the provisions of the French Commercial Code (Code de Commerce);
- the recommendations and principles of the Afep/Medef Corporate Governance Code for listed companies, as revised in December 2022 (the Afep/Medef Code) with the exception of certain recommendations listed in the areas of non-compliance with the Afep/Medef code, Chapter 3, part 1.1.4.

FIND OUT MORE

- Definition of identified employees; Universal Registration Document, Chapter 3, part 4.5.
- Definition and characteristics of the compensation of identified employees: Annual report relating to the policy and to the compensation practices for identified employees.

4.2.3 GOVERNANCE OF THE REWARD POLICY

4.2.3.1 PROCESS OF DEFINING THE REWARD POLICY

In keeping with the fundamentals of its reward policy, Crédit Agricole S.A. has adopted a rigorous process for defining the reward policy towards all its entities and employees.

01. FORMULATION

The **Group Human Resources department** **draws up the compensation policy** for employees and executive corporate officers in collaboration with the Risk and Compliance departments through the Compensation Policy Control Committee (CPCC).

At the start of the year, the Compensation Committee, supported by the Human Resources department, drafts proposals on the compensation of the executive corporate officers.

06. ADJUSTMENT

The Human Resources department and the Compensation Committee take into account the conclusions reached by the CPCC, Internal Audit and the shareholders' vote **to adjust the compensation policy if required.**

The Board of Directors reviews the compensation policy if and when the situation, corporate strategy and investor feedback change. Any changes agreed upon will be applied in the following year.

05. CONTROL

The **Compensation Committee**, with the support of the internal departments, monitors the implementation of the compensation policy and ensures compliance therewith.

The **Risk Committee** examines whether the compensation policies are compliant with the risk strategies.

The Control and **Audit department** conducts periodic audits subsequent to the definition and implementation of the compensation policy for identified employees within the meaning of the regulations, which include the executive corporate officers.

02. REVIEW

The **Compensation Committee** issues an opinion on the compensation policy. The Board of Directors, upon the recommendation of the Compensation Committee, assesses the performance of the executive corporate officers over the previous financial year in light of the results obtained and the targets set (*ex-post* policy). It also sets the grant criteria applicable to the annual variable compensation and the targets to be achieved during the year (*ex-ante* policy).

03. VALIDATION

The **Board of Directors** **decides on the compensation policy.** Shareholders approve certain components of the compensation policy at the General Meeting.

04. IMPLEMENTATION

The **Group Finance department** ensures that the manner in which variable compensation amounts are calculated is consistent with the risks and the Group's financial capacity. The **Human Resources department** oversees the implementation of the compensation policy.

4.2.3.2 FUNCTIONS INVOLVED IN THE PROCESS OF DEFINING THE REWARD POLICY

GOVERNANCE BODIES AND SHAREHOLDERS

BOARD OF DIRECTORS

- Examines and approves adjustments to the reward policy, the report on compensation practices and the capital increases for employees.
- Defines the compensation policy and determines the fixed and variable compensation of executive corporate officers, both short-term and long-term, as well as the performance criteria.
- Reviews the compensation policy on an annual basis, taking into account the changing context and shareholder feedback.
- Decides on the awarding of free performance shares.
- Decides the total compensation allocated to the position of Director.

COMPENSATION COMMITTEE

- Prepares proposals for the Board of Directors with respect to the reward policy, capital increases and resolutions of the General Meeting.
- Review the principles for determining the variable compensation packages for all employees, annual variable compensation above a threshold set by the Board and the conclusions of the Compensation Policy Control Committee.
- Reviews the entities' implementation of compensation policies.
- Adjusts the compensation policy in line with the Group's performance and results.
- Takes note of French and international regulatory changes.
- Develops proposals on:
 - the fixed and variable compensation of corporate officers;
 - any other proposed benefits;
 - resolutions to be submitted to the General Meeting on these subjects.
- Measures the performance of executive corporate officers in relation to the targets set.

RISK COMMITTEE

- Ensures that the Group's compensation policies and practices are in line with proper and effective risk management practices.

SHAREHOLDERS

- Vote annually on capital increases reserved for employees and the compensation of identified employees.
- Votes on the compensation policy of executive corporate officers for the previous (ex-post) and coming (ex-ante) financial years and formulates opinions during discussions with the Human Resources and Investor Relations departments.

GROUP OPERATIONS DEPARTMENTS

HUMAN RESOURCES DEPARTMENT

- Prepares the work of the Compensation Committee and drafts the compensation policy to be submitted to the Committee for review in connection with the Medium-Term Plan.
- Manages the reward policy and coordinates the various agents involved.
- Adjusts the reward policy, based primarily on the conclusions of the Compensation Policy Control Committee (CPCC).

COMPENSATION POLICY CONTROL COMMITTEE (CPCC)

- Formulates an opinion on reward policies, in particular regarding:
 - information on general policies, as a prerequisite for exercising the duty to alert;
 - the validity, in terms of regulatory requirements, of the principles the Group applies in implementing the policy.
- Assesses the implementation of the rules within the entities, in particular for identified employees.
- Coordinates the actions to be introduced in the entities by the Human Resources, Risk Management and Compliance functions.

GROUP FINANCES

- Approves the terms for determining the total variable compensation budget.
- Confirms the adequacy of the total amount of compensation in view of the Group's ability to strengthen its own equity.

CONTROL AND AUDIT DEPARTMENT

- Audits, at a later stage, the definition and implementation of the compensation policy for identified employees, as defined in the regulations.

FIND OUT MORE

- ▶ Involvement of shareholders in the compensation policy for corporate officers: Universal Registration Document, Chapter 3.
- ▶ Involvement of shareholders in the compensation policy for identified employees: Annual report on the compensation policy and practices for identified employees drawn up in accordance with Articles 266 et seq. of the Decree of 3 November 2014 as amended by the Decree of 22 December 2020 on the internal controls of companies in the banking, payment services and investment services sector, which transposes the European Directive known as CRD 5 into French law, and with Article 450 of Regulation (EU) 2019/876 of 20 May 2019.

4.2.3.3 WORK OF THE BOARD OF DIRECTORS AND THE COMPENSATION COMMITTEE

WORK OF THE BOARD OF DIRECTORS IN 2025

In 2025, the work of the Board of Directors focused on the definition and implementation of the compensation policy for executive corporate officers in connection with changes in governance in 2025, at the level of Executive Management in May 2025 and Chairman of the Board of Directors in December 2025.

WORK OF THE COMPENSATION COMMITTEE IN 2025

Specific work up to 2025

- Finalisation of work related to the implementation of the CSR
- Assessment of gender equality in the area of compensation and monitoring of the Pay Transparency project.
- Review of the proposed capital increases reserved for Group employees submitted to the General Meeting.
- Review of compensation of executive corporate officers following the change in governance of Crédit Agricole S.A.

Recurrent work

- Review of Crédit Agricole S.A.'s compensation policy
- Review of the general principles of the Group's compensation policy, including the definition of compensation structures and the principles for determining variable compensation packages.
- Proposal of resolutions relating to the compensation of Executive Corporate Officers and examination of the results of their votes at the General Meeting.
- Review of the compensation of the heads of the control functions, the variable compensation package for identified employees and all individual variable compensation above €1 million.
- Review of the Reward Policy section of this chapter on Corporate Governance.
- Examination of the annual report relating to the policy and to the compensation practices for identified employees.

FIND OUT MORE

- ▶ Work of the Compensation Committee: Universal Registration Document, Chapter 3, part 1.3.7.

4.2.3.4 SHAREHOLDER DIALOGUE

REGULAR DISCUSSIONS OF COMPENSATION POLICY

As part of the dialogue with its shareholders, Crédit Agricole S.A. organises meetings with investors on corporate governance of the Group and executive compensation. Each year, the Compensation Committee is informed of these discussions. For the 2025 General Meeting and the 2026 General Meeting, these discussions took place in the first quarter of 2025 and in the first quarter of 2026, respectively.

These meetings provided an opportunity to present the compensation policy for Crédit Agricole S.A.'s executive corporate officers to around 15 investors and proxies as well as to learn about their voting policy. This compensation policy will be submitted to shareholders for approval at the General Meeting on 20 May 2026. The discussions focused on changes made to the performance criteria in compensation policy in relation to the new Medium-Term Plan.

COMPENSATION OVERWHELMINGLY APPROVED BY SHAREHOLDERS AT THE GENERAL MEETING

The high quality of the shareholder dialogue is reflected in ongoing shareholder support, resulting in a high number of votes being cast in favour of the compensation policy and the resolutions relating to

the components of compensation paid in respect of the previous financial year or during the course of the current financial year.

RATE OF APPROVAL OF RESOLUTIONS ON COMPENSATION POLICY AT THE GENERAL MEETING (EX ANTE)

	GM 2023	GM 2024	GM 2025
Compensation policy for the Chairman of the Board of Directors	99.4%	99.8%	99.9%
Compensation policy for members of the Board of Directors	99.9%	99.9%	99.6%
Compensation policy for the Chief Executive Officer until 14 May 2025	96.3%	95.9%	95.8%
Compensation policy for Olivier Gavalda, Chief Executive Officer from 14 May 2025			95.6%
Compensation policy for Olivier Gavalda, Deputy Chief Executive Officer until 14 May 2025	96.3%	96.1%	95.8%
Compensation policy for Jérôme Grivet, Deputy Chief Executive Officer	96.3%	96.1%	89.1%
Compensation policy for Xavier Musca, Deputy Chief Executive Officer until 14 May 2025	88.4%	96.0%	95.8%

Bear in mind: In the event of a negative vote at the General Meeting on the compensation policy, the policy of the previous year will apply. The Board of Directors meets within a reasonable time period following the General Meeting to review the reasons for this vote in order to propose a new compensation policy in line with the expectations expressed by shareholders.

RATE OF APPROVAL OF RESOLUTIONS ON COMPONENTS ALLOCATED AT GENERAL MEETINGS (EX POST)

	GM 2023	GM 2024	GM 2025
Compensation for the Chairman of the Board of Directors	99.3%	99.8%	99.9%
Compensation for the Chief Executive Officer	96.7%	97.7%	97.4%
Compensation awarded to Olivier Gavalda, Deputy Chief Executive Officer	96.7%	97.9%	97.5%
Compensation awarded to Jérôme Grivet, Deputy Chief Executive Officer	96.7%	97.9%	97.4%
Compensation awarded to Xavier Musca, Deputy Chief Executive Officer	96.7%	97.5%	97.5%

Bear in mind: In the event of a negative vote on individual components of compensation at the General Meeting, the variable compensation awarded for the past financial year to the corporate officer concerned by the resolution will not be paid. It should be noted that since the 2020 General Meeting, a resolution on the components allocated to all corporate officers is proposed for shareholder approval. If this resolution is not approved, the payment of compensation to the Directors in respect of their term of office will then be suspended.

Furthermore, if a resolution is rejected, the Board of Directors meets within a reasonable time period following the General Meeting to look into the reasons for such vote, and the expectations expressed by shareholders.

4.3. REWARDS FOR ALL EMPLOYEES AND EXECUTIVE MANAGERS

IMPORTANT TO KNOW

Crédit Agricole S.A.'s compensation policy aims to align the interests of the Group's customers, shareholders and employees, in line with its Raison d'être: "Working every day in the interest of our customers and society". It supports its long-term project and its Medium-Term Plan.

It is based on the implementation of principles common to all employees and helps to convey the values of fairness, transparency and usefulness that are key to the Group. It consists of fixed, variable and peripheral components of compensation, matching consistent and complementary targets.

Accordingly, since 2020, the Group has increased the weighting of criteria relating to environmental and societal performance in the annual variable compensation and long-term variable compensation of the executive corporate officers and executive managers so as to align its strategic targets with its reward policy.

The expansion of employee share ownership helps align the interests of Crédit Agricole's employees and its shareholders, while supporting the three founding principles of the Human Project: empowering employees, strengthening customer focus and developing a framework of trust.

The components of compensation for employees and executive managers are determined on the basis of precise, clear and measurable criteria that reflect competencies required, seniority as well as individual and group performance attained in terms of the organisation's responsibility for sustainability.

4.3.1 REWARD POLICY

4.3.1.1 REWARD STRUCTURE OF CRÉDIT AGRICOLE S.A.

The rewards of Crédit Agricole S.A. employees consist of fixed, variable and peripheral components of compensation, matching various targets and consistent with the Medium-Term Plan. Every employee receives all or part of these elements based on their level of responsibility, skills and performance.

(1) Also open to "high-talent" employees and key executives

4.3.1.2 RULES FOR DETERMINING REWARD COMPONENTS

Crédit Agricole S.A. has set common rules for all its employees to guide the determination of reward components:

- within each of its various business lines, the Group regularly compares its practices to those of other financial groups at the national, European and international level;
- performance is assessed by precise measurement of the results obtained relative to specific annual targets (how much), taking into account the conditions in which the objectives were achieved (how);
- it takes into account intrinsic financial performance, the Group's non-financial performance and its performance compared to that of other European banks;
- the compensation systems are differentiated according to level of responsibility within the organisation;
- peripheral compensation is governed by Group or entity agreements.

4.3.1.3 REWARD COMPONENTS

	System	People eligible
FIXED COMPENSATION Target Offering competitive and attractive compensation	Base salary The base salary rewards the skills and responsibility level of employees and executive managers, in line with the specific characteristics of each business line in its local market.	All employees and executive managers
	Variable compensation Crédit Agricole S.A. has put in place two annual variable compensation systems – depending on the business lines and consistent with market practices: <ul style="list-style-type: none"> – an Individual variable compensation (RVP) scheme based on the achievement of predefined individual and collective targets within the employee's scope of responsibility; – a “bonus pool” system based on the calculation of benefits directly linked to the entity's financial results and defined according to the “Contribution” to Group results. The contribution represents an entity's capacity to fund bonuses, taking into account the cost of risk, the cost of capital and the cost of liquidity. It is defined as: Revenues ⁽¹⁾ <ul style="list-style-type: none"> – direct and indirect expenses before bonuses – cost of risk – cost of capital before tax <hr/> = Contribution	All employees and executive managers
ANNUAL VARIABLE COMPENSATION Target Linking the interest of employees with those of the Group and shareholders, as part of the deployment of the Medium-Term Plan.	The payout ratio represents the portion of the Contribution that the entity wants to pay out in bonuses. It is dependent on the entity's financial performance and the practices of competing companies operating in comparable businesses. The individual award of variable compensation is defined in compliance with regulatory principles. The amounts must not hamper the ability of Group entities to strengthen their equity as necessary. As well as economic and financial criteria, the performance assessment takes all risks into account, including liquidity risk, as well as the cost of capital. Variable compensation is related directly to annual performance. Unsatisfactory performance, failure to comply with rules and procedures or at-risk behaviour have a direct impact on variable compensation. With specific reference to executive managers, determination of annual variable compensation is based on: <ul style="list-style-type: none"> – 50% on the basis of financial criteria, in line with those of the Medium-Term Plan, with criteria based on, (i) Crédit Agricole S.A.'s scope of responsibility in terms of net income Group share, cost/income ratio and RoTE and (ii) on the scope of responsibility of the executive manager; – 50% on individual and, where applicable, collective non-financial criteria that measure value creation, in line with the Group Project. Since 2024, each executive manager benefits from at least one individual or collective CSR-related non-financial criterion.	
	Individual variable compensation (RVP)	All employees and executive managers: <ul style="list-style-type: none"> – central support functions; – retail banking; – specialised financial services; – insurance; – real estate; – payments; – others.
	Individual variable compensation (RVP) reflects the employee's individual performance, assessed by line management on the basis of the attainment of individual and ultimately collective targets. The targets are described precisely and measurable over the year. They systematically reflect the Group Project. The degree of attainment or exceeding of targets is the principal criterion for the award of RVP. It is supplemented by a qualitative assessment of how these targets were achieved (assuming responsibility, discernment, autonomy, cooperation, commitment, management etc.).	
	Bonus pool	All employees and executive managers: <ul style="list-style-type: none"> – corporate and investment banking; – wealth management; – asset management; – custody and administration of assets; – capital investment.
	The award of a bonus is decided upon by line management. It is based on a formal annual individual performance appraisal, which looks at the achievement of both quantitative and qualitative targets, within a predefined package which varies with the performance of the entity. As well as economic and financial criteria, the performance assessment takes all risks into account, including liquidity risk, as well as the cost of capital.	

System	People eligible
	<p>There is therefore no direct and automatic link between the level of financial results of an employee and their variable compensation level. Employees are evaluated on their results, those of their activity and the conditions under which such results have been achieved.</p> <p>Similarly to individual variable compensation, targets are clearly defined and measurable over the year. Qualitative targets are individualised, related to the professional activity and to the level of responsibility. They include the quality of risk management, resources allocated and the behaviour (assuming responsibility, discernment, autonomy, cooperation, commitment, management etc.) implemented to achieve results.</p>
	<p>Guaranteed variable compensation restrictions All employees and executive managers</p> <p>Guaranteed variable compensation is strictly limited to new hires, for a period that may not exceed one year. Guaranteed variable compensation is awarded subject to the deferred compensation plan applicable to the financial year. Accordingly, all rules on variable compensation for identified employees (deferred payment schedule, performance criteria and reporting) also apply to guaranteed bonuses.</p>
<p>LONG-TERM VARIABLE COMPENSATION Target</p> <p>Rewarding the long-term collective performance of the Group and its entities</p>	<p>Long-term incentive plan High-talent employees Executive managers Key Group executives</p> <p>The Group introduced long-term variable compensation in 2011 to reward long-term performance. Accordingly, taking an entity's environmental and societal impact into consideration strengthens the link between compensation and long-term performance. This component of variable compensation, which is unifying, motivating and encourages loyalty, completes the annual variable compensation mechanism.</p> <p>The long-term variable compensation plan takes the form of share-based compensation and/or instruments indexed to the Crédit Agricole S.A. share price.</p> <p>Amounts are deferred for at least three years and vest according to performance criteria set in keeping with the long-term strategy of the Group and its entities:</p> <ul style="list-style-type: none"> – Crédit Agricole S.A.'s intrinsic economic performance; – Crédit Agricole S.A.'s stock market performance; – Crédit Agricole S.A.'s environmental and societal performance.
<p>COLLECTIVE VARIABLE COMPENSATION Target</p> <p>Linking all employees to the Group's results to enable the collective sharing of value created</p>	<p>Profit sharing and incentive plans All employees and executive managers in France</p> <p>Profit sharing All employees and executive managers of certain international entities</p> <p>Collective variable compensation plans are defined separately for each entity in order to reflect value creation as closely as possible. In France, Group companies therefore negotiate their own profit-sharing and incentive plan agreements, complemented by contribution matching systems through their Employee savings scheme (PEE) and Collective Retirement Savings Plan (PERCOL).</p> <p>Employee shareholding All employees and executive managers with the exception of a few countries</p> <p>At end-2025, Crédit Agricole S.A. employees and former employees held 6.6% of the share capital.</p> <p>By valuing the contribution of each individual to the success of the collective, the development of employee shareholding is part of the new confidence pact desired by the Group through its Human-centric Project.</p>
<p>PERIPHERAL COMPENSATION Targets</p> <p>Covering/Supplementing health care reimbursements in the event of employee illness</p> <p>Protecting employees against all life's uncertainties</p>	<p>Private healthcare insurance scheme All employees and executive managers</p> <p>Supplementary pension scheme All employees</p> <p>Peripheral compensation in terms of healthcare, retirement (Article 83) and pensions are put in place within collective schemes specific to each entity.</p> <p>Supplementary pension scheme All executive managers</p> <p>From 2010 to 2019, the supplementary pension scheme consisted of a combination of defined-contribution pension schemes and a defined-benefit scheme (the rights to the benefit scheme are determined after the rights paid under the defined-contribution scheme).</p> <p>In accordance with the PACTE Act and the provisions of Order no. 2019-697 of 3 July 2019, the defined benefit top-up scheme was permanently closed as of 4 July 2019, and the conditional rights it provides have been crystallised at 31 December 2019.</p> <p>Since 1 January 2020, Crédit Agricole S.A. has set up a new retirement savings scheme that enables employees to progressively build up capital with the Company's help. This plan is made up of an Article 82 defined-contribution scheme and free share allocations. Part of this capital thus follows the Group's performance, thereby reinforcing the alignment with the strong and sustainable growth targets of our corporate strategy.</p>

(1) It is understood that, by definition, revenues are calculated net of the cost of liquidity.

EXPANSION OF EMPLOYEE SHARE OWNERSHIP

Firmly rooted in Crédit Agricole S.A.'s corporate culture, employee shareholding has grown over the years, in the context of capital increases reserved for employees and retirees, which became annual as of 2018. Since its initial public offering in 2001, Crédit Agricole S.A. has carried out 12 capital increases reserved for employees and retirees.

The 2025 employee shareholding campaign allowed 37,533 employees and former employees in 23 countries to subscribe to shares for a total amount of €295 million (the subscription price included a 20% discount on the share price). This capital increase was made possible by the issue of 22,886,191 new shares. Employee shareholding therefore makes it possible to supplement the compensation received by employees and to strengthen the stability of Crédit Agricole S.A.'s capital.

4.3.1.4 COMPENSATION OF IDENTIFIED EMPLOYEES

In accordance with regulatory obligations, Crédit Agricole S.A. applies strict rules surrounding the compensation policy for identified employees:

A compensation policy that promotes sound and effective risk management, including consideration of Crédit Agricole S.A.'s risk appetite in terms of ESG risks. The amounts and distribution of variable compensation must not impair the institutions' ability to strengthen their equity.

A balance between fixed and variable compensation: the variable component for a given employee of a credit institution may not exceed 100% of the fixed component, which may be increased to 200% after approval by the shareholders in a General Meeting. In May 2020, the shareholders of Crédit Agricole S.A. approved this maximum ratio of 200% for compensation awarded for 2020 and subsequent financial years. This approval is valid until a new decision by the General Meeting.

Variable compensation partly deferred (40% to 60%): variable compensation is deferred over four or five years. It vests in four or five annual instalments, subject to the fulfilment of performance and presence conditions. Each annual instalment is made of two tranches, one in cash and one in shares or share-based cash. The acquisition of the shares or share-based cash tranches is followed by a lock-up period of at least six months.

A non-deferred variable compensation component (60% to 40%): the non-deferred variable compensation is made up of two tranches: one tranche in cash and one tranche in shares or share-based cash. The cash tranche vests and is paid immediately; the share-based cash or shares tranche is also vested, but is subject to a lock-up period of at least six months (effective payment at the end of the lock-up period).

Risk-adjusted variable compensation: a monitoring system for at-risk behaviour by identified employees is deployed within the Group in cooperation with the Group Risk Management and Permanent Controls and Compliance business lines. This system specifically includes annual monitoring and assessment by the governance body as well as an arbitration procedure at Executive Management level for observed cases of at-risk behaviour.

Crédit Agricole S.A. has also put in place two mechanisms that enable ex-post adjustment or even recouping of variable compensation by the Group in the event of at-risk behaviour:

- a **malus clause:** in the case of risky behaviour, the variable compensation initially awarded may be reduced in full or in part in accordance with Article L. 511-84 of the French Monetary and Financial Code;
- a **clawback clause:** if it is discovered within a period of five years after payment that an employee is responsible for or has contributed to significant losses to the detriment of Crédit Agricole S.A. or has demonstrated particularly serious at-risk behaviour, the Group reserves the right, subject to local laws in force, to recoup in full or in part amounts already paid.

4.3.2 AMOUNT OF REWARDS

4.3.2.1 AMOUNT OF REWARDS FOR EMPLOYEES

In 2025, total employee expenses amounted to €10.3 billion for Crédit Agricole S.A. The overall total distributed, including profit-sharing and the employer contribution matching of employee savings plans, was €377 million.

In France, the average gross compensation of employees was €78,147 and the median compensation was €59 510.

GENDER EQUALITY WITH REGARD TO REWARDS

The publication of the gender equality index, set up by the French government, highlights the effectiveness of the actions implemented within the Group with positive ratings.

In 2025, Crédit Agricole S.A. Group entities achieved an average index score of 90/100, up two percentage points from 2024.

Convinced that pay transparency, in addition to meeting a legal obligation, is a major lever to promote equity and fair recognition of work, in 2025 the Crédit Agricole S.A. group continued to actively prepare for the implementation of the *Pay Transparency Directive*. By promoting open and transparent communication, we build trust, at the heart of the ACT 2028 Medium-Term Plan.

4.3.2.2 AMOUNT OF REWARDS OF THE EXECUTIVE COMMITTEE AND BOARD OF DIRECTORS

At 31 December 2025, the reward of members of the Board of Directors and the Executive Committee paid by Crédit Agricole S.A. amounted to €23.3 million, of which €2.6 million in post-employment benefits.

4.4.1 COMPENSATION POLICY IN 2026 FOR EXECUTIVE CORPORATE OFFICERS SUBMITTED TO THE *EX ANTE* VOTE OF SHAREHOLDERS

Crédit Agricole S.A. has historically opted for the separation of the duties of direction and control in executive functions in accordance with Article L. 511-58 of the French Monetary and Financial Code.

The corporate officers are the Group's directors, as well as its three executive corporate officers:

- Éric Vial, who succeeded Dominique Lefebvre as Chairman of the Board of Directors on 1 January 2026;

- Olivier Gavalda, as Chief Executive Officer since 14 May 2025;
- Jérôme Grivet, as Deputy Chief Executive Officer since 1 September 2022.

The Chief Executive Officer and Deputy Chief Executive Officer, Executive Corporate Officers, have decided upon a shared management approach, which is reflected in their solidarity regarding the performance criteria used.

4.4.1.1 PRINCIPLES

A POLICY CONSISTENT WITH BEST MARKET PRACTICES

Executive corporate officers receive fixed, variable and peripheral components of compensation, adapted to their specific targets, in line with the Group's reward policy.

The Board of Directors defines the compensation policy taking into account the recommendations of the Afep/Medef Code.

Accordingly, Crédit Agricole S.A.'s reward policy applies the principles laid down in the Code, namely:

Full disclosure and clarity in the publication of all the components of compensation for Executive Corporate Officers.	Providing reasons for each component of compensation.	Benchmarking of compensation awarded and paid with market practices.	Consistency with the compensation of other Group executives and employees.	Intelligibility of the rules adopted, which must be sustainable, transparent and rigorous, and include performance criteria in line with the company's targets.	Balance between taking into account the company's business interests, the executives' performance and the expectations of the company's stakeholders.
--	---	--	--	---	---

In addition, the Group aligns its compensation policy with the other provisions of Article 26 of the Afep/Medef Code that apply more specifically to the different components of compensation for executive corporate officers, such as: Crédit Agricole S.A. also takes into account:

- the recommendations made by the AMF, set out in particular in its reports on corporate governance and executive compensation in listed companies;
- the expectations voiced by the Group's shareholders, investors and proxies as part of their voting policies;

- market practices: each year studies are carried out with the assistance of outside consultants, (in particular, Willis Towers Watson for financial year 2025-2026), on the positioning of executive corporate officers' compensation in relation to other CAC 40 companies and the financial sector. They rely on these companies' annual reports and press releases to ensure consistency in compensation principles and levels. A number of comparison panels were analysed, including a panel of French banks and a panel of European G-SIBs.

4.4.1.2 COMPENSATION POLICY FOR THE CHAIRMAN OF THE BOARD OF DIRECTORS IN 2026

At its meeting on 16 December 2025, the Board of Directors of Crédit Agricole S.A. decided to appoint Éric Viall as Chairman of the Board of Directors to succeed Dominique Lefebvre. This appointment takes effect on 1 January 2026.

On the proposal of the Compensation Committee, the Board of Directors decided to set the fixed annual compensation of the new Chairman of the Board of Directors at €625,000, subject to the approval of the General Meeting on 20 May 2026. This amount is unchanged from that of the previous Chairman, as approved by the General Meeting on 14 May 2025.

In order to guarantee complete independence in the performance of his duties and in accordance with the recommendations of the Afep/Medef Code, the Chairman of the Board of Directors:

- is not eligible for any variable compensation, including the long-term incentive plans existing at Crédit Agricole S.A.;
- waives any compensation due in respect of his position as a Director in Group companies during and at the end of his term of office as Chairman of the Board of Directors;
- does not benefit from any severance payment or non-competition compensation, nor any supplementary pension scheme in force at Crédit Agricole S.A.

4.4.1.3 COMPENSATION POLICY FOR EXECUTIVE CORPORATE OFFICERS IN 2026

FIXED COMPENSATION

The Board of Directors, on the proposal of the Compensation Committee, determines the amount of the annual fixed compensation of the executive corporate officers, taking into account:

- their experience and scope of responsibilities;
- market practices and compensation packages observed for the same or similar functions in other major listed companies. A number of comparison panels were analysed, including a panel of French banks and a panel of European G-SIBs.

Fixed compensation accounts for a significant proportion of total compensation.

On the proposal of the Compensation Committee, the Board of Directors, at its meeting on 3 February 2026, decided to keep the fixed annual compensation for executive corporate officers unchanged, subject to approval by the General Meeting on 20 May 2026.

The fixed annual compensation of Olivier Gavalda, Chief Executive Officer, is set at €1,100,000.

The fixed annual compensation of Jérôme Grivet, Deputy Chief Executive Officer, is set at €1,000,000.

ANNUAL VARIABLE COMPENSATION

The variable compensation policy for the Chief Executive Officer and the Deputy Chief Executive Officer is aligned with the “ACT 2028” Medium-Term Plan.

This policy is part of the framework established for the variable compensation of the Group's executive managers.

Variable compensation is expressed as a percentage of annual fixed compensation. In accordance with the Afep/Medef Code, variable compensation is capped and cannot exceed the maximum levels defined by the compensation policy: for the **Chief Executive Officer and the Deputy Chief Executive Officer**, it can vary from **0% to 100%** (target level) of fixed compensation if all targets are met, and up to **120%** (maximum level) of fixed compensation for exceptional performance.

The overall performance of each executive corporate officer is assessed on the basis of a balance between financial and non-financial performance. Their annual variable compensation is **60% based on financial criteria and 40% based on non-financial criteria, with CSR accounting for 20%**, defined each year by the Board of Directors, on the recommendation of the Compensation Committee. The criteria grids are presented below.

			Olivier Gavalda, Chief Executive Officer	Jérôme Grivet, Deputy Chief Executive Officer
Metrics				
Financial criteria (60%)	Scope	Net income Group share – Cost/income ratio – RoTE (equally weighted)		
	Crédit Agricole S.A.		60%	60%
Non-financial CSR criteria (20%)	Environmental CSR (10%)	Achievement of a green to brown financing ratio of 90/10	4%	4%
		Crédit Agricole Group's contribution to financing transitions totals €240 billion.	3%	3%
		Growth in corporate and investment banking sustainable finance revenues of €1 billion	3%	3%
	Societal CSR (10%)	Increase our impact in order to boost regional vitality and support a “just transition”, while addressing the intergenerational challenges of demographic change.	5%	5%
		Embed the collective and increase accountability to drive performance	5%	5%
Other non-financial criteria (20%)	Acceleration - Gross customer capture		8%	7%
	Digital transformation		5%	4%
	Risks and compliance		7%	9%

The themes were determined in line with the targets of the new “ACT 2028” Medium-Term Plan presented at the *Investor Day* on 18 November 2025. The financial criteria are unchanged.

The evaluation of the achievement rate in respect of each indicator is based on the Board of Directors' assessment of the performance of the Chief Executive Officer and the Deputy Chief Executive Officer in relation to the major strategic guidelines and targets established each year.

For Olivier Gavalda and Jérôme Grivet, the financial criteria pertain to the Crédit Agricole S.A. scope. For each of these criteria, the target set is the one approved by the Board of Directors with regard to trajectories consistent with the targets announced by the “ACT 2028” Medium-Term Plan.

The amounts used to calculate economic performance criteria are based on published results, adjusted where necessary for non-recurring or exceptional items to ensure consistency with the conditions under which the budget target was set (e.g. impacts of consolidation scope and method, exceptional capital gains or losses).

The maximum achievement rate for each criterion cannot exceed 150%. Below the trigger threshold, the achievement rate will be considered nil. The calculation of the performance between the different limits is linear.

TERMS OF VESTING OF ANNUAL VARIABLE COMPENSATION

Following the annual performance review and subject to approval by the General Meeting, a portion of the annual variable compensation awarded by the Board of Directors in respect of a year is deferred in order to align the compensation of executive corporate officers with the long-term performance of the Group in accordance with industry regulatory requirements.

Through a fair proportion of compensation, exposed to the markets and with a lock-up period, this scheme also promotes sustainable governance that encourages regular and long-term value creation. Lastly, it is in line with the principles of long-term moderation applied by Crédit Agricole S.A. to its compensation management.

Deferred portion of annual variable compensation, accounting for 60% of the total

A portion representing 60% of the variable compensation is deferred over five years.

Half of it is paid in cash and half in Crédit Agricole S.A. share-based cash.

Vesting is contingent on achieving a single performance criterion, the pre-tax RoTE of more than 5%:

The payment of a given tranche of deferred compensation is excluded in case of departure of the executive corporate officer during the vesting period, except in case of retirement or exceptional circumstances as determined by the Company. In such cases, unaccrued instalments of deferred variable compensation are delivered at their planned vesting date depending on the level of achievement of performance conditions.

If it is found within a period of five years after payment that an executive corporate officer: (i) is responsible for or has contributed to significant losses to the detriment of the Group or (ii) has demonstrated particularly serious risky behaviour, the Board of Directors reserves the right to demand the restitution in full or in part of amounts already paid subject to French law in force (clawback clause), in accordance with the recommendations of the proxy voting agencies.

Non-deferred portion of annual variable compensation, accounting for 40% of the total

A portion representing 40% of the variable compensation is non-deferred and vests immediately.

Non-deferred variable compensation approved by the General Meeting is paid in part (50%) after it is approved by shareholders at the General Meeting in May (i.e. 20% of annual variable compensation), and the other half in March the following year. The second payment is pegged to the change in the Crédit Agricole S.A. share price (share subject to a one-year lock-up period).

LONG-TERM VARIABLE COMPENSATION

Executive corporate officers qualify for long-term variable compensation in the form of free performance shares awarded by the Board for 2026, within the framework of a budget strictly limited to 0.1% of the share capital, in order to strengthen their involvement in the creation of long-term value for Crédit Agricole S.A.

The number of shares granted each year by the Board of Directors is valued on the basis of the average Crédit Agricole S.A. share price weighted by volume over the 20 business days prior to the Board meeting. The allocation of shares whose vesting is contingent on the achievement of the performance condition at target is capped at a value of 20% of the annual fixed compensation. An overperformance may result in the delivery of the maximum number of shares corresponding to 120% of this target allocation.

As of the 2021 financial year, the vesting period of the shares is set at five years. This is followed by a one-year holding period. In addition, the executive corporate officers are required to retain, until the end of their functions, 30% of the shares vested each year.

They are also prohibited from implementing hedging or insurance strategies over the vesting and holding periods of performance shares.

TERMS OF VESTING OF LONG-TERM VARIABLE COMPENSATION

Vesting of long-term variable compensation is contingent on achieving three complementary performance criteria, whose overall achievement rate cannot exceed 120%. This is equal to the average of the achievement rates for each performance criterion. These performance criteria take into account Crédit Agricole S.A.'s financial performance, its stock market performance and its environmental and societal performance.

Metrics		Weighting
Financial performance	Net income Group share	33.3%
Stock market performance	Market price/Tangible book value per share	33.3%
Environmental and societal performance	Contributing to the achievement of carbon neutrality by 2050, with a particular focus on the oil & gas and power sectors	21%
	Preparation for executive succession through an integrated approach to talent via strategic talent pools (diversity, international talent, expert profiles)	12.3%

The financial and stock market criteria are unchanged. The environmental and social performance criteria for our CSR initiatives are aligned with the targets of our new "ACT 2028" Medium-term Plan, presented at the *Investor Day* on 18 November 2025.

The climate targets adopted are in line with those of the previous plan.

Each of these criteria (financial, stock-market and environmental and societal) accounts for one-third of the overall performance assessment. For each criterion:

- the individual achievement rate cannot exceed 120%;
- a trigger threshold is applied, below which the achievement rate will be considered zero.

The overall performance is equal to the average achievement rate for each performance criterion, which is capped at 120%.

For the financial performance indicator, performance between the 50% trigger threshold and 80% achievement rate is calculated on a straight-line basis, and performance between 80% achievement rate and the 120% achievement rate ceiling is calculated on a straight-line basis.

For the stock market performance indicator, performance between the trigger threshold and target as well as between the target and ceiling is calculated on a straight-line basis.

Criterion	Level	Trigger	Target	Ceiling
Crédit Agricole S.A.'s intrinsic economic performance:	Achievement rate	50%	100%	120%
Crédit Agricole S.A.'s net income Group share accumulated over the reference period	Payment rate	35%	100%	120%
Related stock market performance:	Achievement rate	Median	1 st quartile	Top 5
Market price/Tangible book value per share	Payment rate	80%	100%	120%

If an executive corporate officer leaves the Group during the vesting period, the vesting of Crédit Agricole S.A. shares is excluded, except in the event of retirement or exceptional circumstances, the grounds for which must be substantiated by the Company. In such cases, the shares not yet vested are delivered at their scheduled vesting date depending on the level of achievement of performance criteria.

If it is found within a period of five years after delivery of shares that an executive corporate officer: (i) is responsible for or has contributed to significant losses to the detriment of the Group or (ii) has demonstrated particularly serious risky behaviour, the Board of Directors reserves the right to recoup in full or in part the shares already delivered subject to French law in force (clawback clause).

STRUCTURE OF COMPENSATION OVER TIME

PERIPHERAL COMPENSATION

PRIVATE HEALTHCARE INSURANCE

The executive corporate officers benefit from the same health insurance schemes as the employees.

POST-EMPLOYMENT BENEFITS

The Chief Executive Officer and the Deputy Chief Executive Officer do not benefit from any severance or non-competition payments in respect of their position as corporate officers but do benefit from such payments in case of termination of their employment contract (currently suspended but which would be reactivated in case of termination of the corporate office).

In addition, the Chief Executive Officer and the Deputy Chief Executive Officer benefit from the Group's supplementary pension scheme for executive managers, which is additional to the collective and mandatory pension and death & disability schemes.

The Board of Directors has taken into account the benefit of the supplementary pension scheme in determining the overall compensation of the executive corporate officers.

RETIREMENT

From 2010 to 2019, the supplementary pension scheme, also applicable to the executive corporate officers, consisted of a combination of defined-contribution pension schemes and a defined-benefit top-up scheme, the rights of which are defined by 2010 rules.

In accordance with the PACTE Act and the provisions of Order no. 2019-697 of 3 July 2019, the defined benefit scheme ⁽¹⁾ was permanently closed as of 4 July 2019, and the conditional rights it provides were materialised at 31 December 2019. Consequently, no new additional rights were allocated under this scheme for periods of employment after 1 January 2020. The information given below about the defined-benefit scheme therefore only concerns rights accrued up until 31 December 2019.

These rights, equal to 1.20% of the reference compensation for every year of service (capped at 36%), are determined after the rights paid under the defined-contribution schemes.

Contributions to defined-contribution pension schemes (still in force) equal 8% of gross salary capped at eight times the French social security cap (of which 3% paid by the Executive Corporate Officer).

The reference compensation is determined as the average of the three highest gross annual compensations received over the last 10 years of activity within the Crédit Agricole Group, including fixed and variable compensation, the latter being taken into account with a maximum ceiling of 60% of fixed compensation.

(1) Falling under the provisions of Article L. 137-11 of the French Social Security Code.

In any event, at retirement, the total pension annuity is capped, for all company pension schemes and mandatory basic and complementary schemes, at sixteen times the annual French social security cap for executive corporate officers, and at 70% of the reference compensation in application of the supplementary pension rules for Crédit Agricole S.A. executive managers.

The supplementary defined-benefit pension scheme complies with the recommendations of the Afep/Medef Code as well as the former provisions of Article L. 225-42-1 of the French Commercial Code (Code de Commerce), which for the periods in question, restricted the vesting rate of defined-benefit schemes at 3% per year (text repealed by Order 2019-1234 of 27 November 2019):

- the group of potential beneficiaries was substantially broader than Executive Corporate Officers alone;
- minimum length of service: five years (the Afep/Medef Code requires only two years' service);
- vesting rate of 1.2% of the reference compensation per year of service;
- estimated supplementary pension below the Afep/Medef Code ceiling of 45% of fixed and variable compensation due for the reference period;
- obligation for the beneficiary to be a Corporate Officer or an employee when claiming their pension entitlements.

The management of this defined-benefit pension scheme has been outsourced to an organisation governed by the French Insurance Code.

Funding of the outsourced assets is accomplished via annual premiums entirely paid for by the employer and subject to the 24% contribution set out in Article L. 137-11 of the French Social Security Code.

The rights established by the Group prior to the effective date of the 2010 rules are maintained in accordance with these rules and, if applicable, are added to the rights resulting from these rules, particularly when calculating the maximum annuity that can be paid.

Since 1 January 2020, Crédit Agricole S.A. set up an Article 82 defined-contribution scheme enabling executive managers to build up savings for retirement with the help of the Company.

Olivier Gavalda does not qualify for the Article 82 defined-contribution scheme, having exhausted his rights under the L. 137-11 French Social Security Code scheme.

Jérôme Grivet is entitled to benefits from the Article 82 defined-contribution scheme. This scheme provides for the payment of an annual bonus by the Company on the part of his annual fixed compensation at a rate of 20%.

In accordance with the Afep/Medef Code, his annual Article 82 contributions are subject to the achievement of a performance condition identical to that governing the vesting of his annual variable deferred compensation.

In addition, Executive Corporate Officers benefit from the scheme governing termination payments on retirement that applies to all employees under the terms of the Crédit Agricole S.A. collective bargaining agreement. This can amount to six months' fixed salary plus variable compensation capped at 4.5% of fixed salary.

SEVERANCE PAYMENTS

In accordance with the Afep/Medef Code, the executive corporate officers are not entitled to a specific increase in their compensation during the period preceding their departure.

CHIEF EXECUTIVE OFFICER

In the event of the termination of Olivier Gavalda's term of office, his employment contract shall be reactivated.

By virtue of the corporate office

Olivier Gavalda does not receive any severance payment or non-competition compensation in respect of his corporate office.

By virtue of the employment contract

Olivier Gavalda is eligible for any severance payment due in respect of the termination of his employment contract.

In the event of termination of the employment contract of Olivier Gavalda at the initiative of the employer, he will benefit from a severance payment, except in the event of serious misconduct or gross negligence, based on twice his gross annual compensation received during the twelve months preceding the termination, this compensation including any other compensation due in respect of the termination of the employment contract and, in particular, the conventional or legal redundancy compensation and any non-competition compensation. In the event of the possibility of a full pension settlement, this severance payment would not be made and only the termination payment on retirement would be due, as well as, if applicable, the non-competition compensation.

DEPUTY CHIEF EXECUTIVE OFFICER

In the event of termination of Jérôme Grivet's term of office, his employment contract will be reinstated under compensation conditions equivalent to the average annual basic compensation paid to the members of the Management Committee of Crédit Agricole S.A. excluding corporate officers, during the 12 months preceding the date of termination of his term of office. In this case, the Company undertakes to offer him at least two positions corresponding to the duties of members of Crédit Agricole S.A.'s Management Committee.

By virtue of the corporate office

Jérôme Grivet does not receive any severance pay or non-competition compensation in respect of his corporate office.

By virtue of the employment contract

Jérôme Grivet is eligible for any severance payment due in respect of the termination of his employment contract.

In the event of termination of the employment contract of Jérôme Grivet at the initiative of the employer, he will benefit from a severance payment, except in the event of serious misconduct or gross negligence, based on twice his gross annual compensation received during the twelve months preceding the termination, this compensation including any other compensation due in respect of the termination of the employment contract and, in particular, the conventional or legal redundancy compensation and any non-competition compensation. In the event of the possibility of a full pension settlement, this severance payment would not be made and only the termination payment on retirement would be due, as well as, if applicable, the non-competition compensation.

NON-COMPETITION CLAUSE

The Board of Directors reserves the right to partially or fully lift the non-compete obligation on the departure of the Chief Executive Officer or the Deputy Chief Executive Officer. In any event, in accordance with the legal provisions and the Afep/Medef Code, no non-competition compensation will be granted should the Chief Executive Officer or Deputy Chief Executive Officer claim retirement benefits, or should they leave after their 65th birthday.

CHIEF EXECUTIVE OFFICER

Under his employment contract, Olivier Gavalda is subject to a non-competition clause for a period of one year in France, with monthly compensation of 50% of his last fixed gross monthly compensation.

DEPUTY CHIEF EXECUTIVE OFFICER

Under his employment contract, Jérôme Grivet is subject to a non-competition clause for a period of one year in France, with monthly compensation of 50% of his last fixed gross monthly compensation.

BENEFITS OF ANY KIND

On the recommendation of the Compensation Committee, the Board of Directors validated the benefit of company cars also for private use for executive corporate officers. This benefit will be reported in accordance with the applicable social and tax regulations.

COMPENSATION FOR DIRECTOR'S TERM OF OFFICE

The executive corporate officers waived their right to receive any compensation for serving as Directors of Group companies for the duration of their terms of office.

EXCEPTIONAL COMPENSATION

The Board of Directors does not provide for the granting of exceptional compensation to executive corporate officers.

DEPARTURES FROM THE COMPENSATION POLICY

All components of the executive corporate officers' 2026 compensation policy described above are subject to the approval of the shareholders at the General Meeting on 20 May 2026.

Nevertheless, during the financial year, the Board of Directors may temporarily and exceptionally depart from the policy approved by the shareholders with regard to the components of annual and long-term variable compensation, in order to protect the corporate interest of Crédit Agricole S.A. and to ensure the Group's sustainability and viability, pursuant to Article L. 22-10-8-III, paragraph 2 of the French Commercial Code.

Any changes to the compensation policy made by the Board of Directors during the financial year will be fully disclosed to the shareholders, who will be asked to approve them ex post facto at the General Meeting.

In addition to the waiver provided for in the second paragraph of Article L. 22-10-8-III of the French Commercial Code, the Board of Directors, on the recommendation of the Compensation Committee, may take into account, where applicable, certain unforeseeable and specific circumstances that could alter the assessment of the performance of the Chief Executive Officer or a Deputy Chief Executive Officer, such as, for example, a substantial change in the Group's scope or in the missions entrusted to an executive, a major event affecting the markets, structural changes affecting our industry or a major geopolitical, security, public health or climate-related event (war, terrorism, pandemic, natural disaster etc.).

In this context and exceptionally, the Board of Directors reserves the right to decide on a specific and discretionary adjustment of the performance criteria (weighting, triggering thresholds, targets, objectives etc.) attached to the variable compensation, either upwards or downwards. In exercising this discretion, the Board of Directors will always seek to ensure that the results of the application of the modified criteria reflect both the performance of the individual executive concerned and the performance of the Group, in particular in relation to that of its competitors (if the circumstances affect the relevant industry as a whole). This adjustment will always be made in compliance with the regulations applicable to credit institutions, in particular as regards solvency and financial strength and the terms of compensation of "risk-taking" staff.

Should the Board of Directors decide to use this discretionary power, it would continue to respect the caps on variable compensation set out in the compensation policy approved by the shareholders and would provide a clear, precise and complete explanation of its choice, which would be made public.

ARRIVAL OF A NEW EXECUTIVE CORPORATE OFFICER

In the event that a new executive corporate officer is appointed, their compensation will be determined by the Board of Directors:

- either in accordance with compensation policy as approved by the General Meeting;
- or in accordance with existing practices for the same role, adapted as appropriate when this person exercises new functions or holds a new position without equivalent in the previous financial year.

4.4.2 COMPENSATION POLICY IN 2026 FOR DIRECTORS SUBMITTED TO THE *EX ANTE* VOTE OF SHAREHOLDERS

ALLOCATED COMPENSATION

Compensation of Board members is based entirely on:

- **their attendance** at Board meetings; and
- **their responsibilities** within its committees:
 - committee Chairpersons receive fixed annual compensation, which is determined based on the committee,
 - committee members receive a fee based on their attendance at committee meetings.

Directors receive the same compensation for attending strategic seminars and special meetings, i.e. those not on the annual calendar, and scheduled meetings, up to a maximum of the total amount approved by the General Meeting.

Training sessions, written consultations, preparatory meetings of committee Chairwomen with the departments and meetings of Chairwomen and/or committees with the supervisor are not compensated.

Non-voting Directors receive the same compensation for attending Board Meetings and, when they are members, specialised committee meetings.

The compensation budget for Directors was set at €1.9 million gross by the General Meeting of 14 May 2025, with leeway to account for extra Board meetings, should the need arise. The consumption of this compensation budget over the past financial year amounted to €1,819,700 million gross (excluding the fixed compensation of the Chairman).

To maintain this flexibility for the possibility of additional Board meetings in 2026, the Board decided to maintain the compensation package for Directors at €1.9 million.

In 2025, the Board held 13 meetings, including two seminars and one training session, while its specialised committees held 50 meetings. Year on year, Directors' compensation varies within a narrow range, depending on attendance and the number of meetings attended (by way of example, see table of compensation paid out in 2025).

SPECIAL CASES

The Chairman receives only a flat rate compensation.

The three Directors representing employees as well as the representative of employee shareholders on the Board do not receive any compensation for their position as Director. These compensations are paid to their unions.

Irrespective of attendance and the situations mentioned above, the cases of non-payment of Directors' compensation are those provided for by law.

EXPENSES

REIMBURSEMENT OF EXPENSES

The Board has also set up a system for reimbursing Board members for travel expenses, based on costs incurred by each member for attending Board and Committee Meetings. This system, which complies with the provisions of Article R. 225-33 of the French Commercial Code, is renewed annually by the Board.

4.4.3 REPORT ON THE 2025 COMPENSATION OF CORPORATE OFFICERS SUBMITTED TO THE *EX POST* VOTE OF SHAREHOLDERS

4.4.3.1 CHAIRMAN OF THE BOARD OF DIRECTORS

COMPONENTS OF COMPENSATION PAID IN FINANCIAL YEAR 2025 OR AWARDED FOR FINANCIAL YEAR 2025 TO DOMINIQUE LEFEBVRE, CHAIRMAN OF THE BOARD OF DIRECTORS, SUBJECT TO THE *EX-POST* VOTE OF SHAREHOLDERS

	Amount	Comments

PERIPHERAL COMPENSATION		
Severance payment	-	Dominique Lefebvre is not entitled to any severance payment.
Non-competition compensation	-	Dominique Lefebvre is not entitled to any non-competition compensation.

4.4.3.2 EXECUTIVE CORPORATE OFFICERS

COMPONENTS OF COMPENSATION PAID IN, OR AWARDED FOR, FINANCIAL YEAR 2025 TO PHILIPPE BRASSAC, CHIEF EXECUTIVE OFFICER, ON A PRO RATA BASIS, IN PROPORTION TO HIS PRESENCE UNTIL THE GENERAL MEETING OF 14 MAY 2025, SUBJECT TO THE EX POST VOTE OF SHAREHOLDERS

COMPONENTS OF COMPENSATION PAID IN OR AWARDED FOR FINANCIAL YEAR 2025, ON A PRO RATA BASIS, IN PROPORTION TO HIS PRESENCE UNTIL THE GENERAL MEETING OF 14 MAY 2025, SUBJECT TO APPROVAL BY THE GENERAL MEETING OF 20 MAY 2026

	Amount	Comments
Fixed compensation	€408,333	Philippe Brassac has received fixed annual compensation of €1,100,000 since May 2018. For 2025, this fixed annual compensation is calculated in proportion to Philippe Brassac's presence until the General Meeting of 14 May 2025.
Annual variable compensation	€469,000	<p>In view of the achievement of financial and non-financial criteria as defined by the Board at its meeting of 4 February 2025 and approved by the General Meeting of 14 May 2025, the amount of annual variable compensation was determined on the following basis:</p> <ul style="list-style-type: none"> – achievement level of financial criteria: 108.1%; – achievement level of non-financial criteria: 128.1%. <p>Details of the achievement of these criteria can be found in the following pages.</p> <p>Consequently, the Board of Directors, at its meeting of 3 February 2026, on the proposal of the Compensation Committee, noted the achievement rate of 116.1% and set the amount of Philippe Brassac's variable compensation for financial year 2025 at €469,000, on a pro rata basis, in proportion to Philippe Brassac's presence until the General Meeting of 14 May 2025.</p>
Of which non-deferred portion in cash	€93,800	20% of the annual variable compensation, namely €93,800, will be paid in May 2026.
Of which non-deferred portion in Crédit Agricole S.A. share-based cash	€93,800	20% of the annual variable compensation, namely €93,800, is linked to the Crédit Agricole S.A. share price and will be paid in March 2027.
Of which deferred portion in cash	€140,700	30% of the annual variable compensation, namely €140,700 at the award date, is awarded in cash. Their final vesting is deferred linearly over five years, subject to achieving a performance criterion and to a clawback clause.
Of which deferred portion in Crédit Agricole S.A. share-based cash	€140,700	30% of the annual variable compensation, namely €140,700 at the award date, is awarded in Crédit Agricole S.A. share-based cash. Their final vesting is deferred linearly over five years, subject to achieving a performance criterion and to a clawback clause.
Long-term variable compensation	-	Executive corporate officers whose term of office at Crédit Agricole S.A. will expire at the end of the General Meeting of 14 May 2025 are no longer eligible for long-term variable compensation in the form of free performance shares awarded by the Board in 2025.

	Amount	Comments
PERIPHERAL COMPENSATION		
Exceptional compensation	-	Philippe Brassac has received no exceptional compensation for 2025.
Compensation for Director's term of office	-	Philippe Brassac has waived the right to receive compensation for his duties as a Director of Group companies for the entire duration of his term of office.
Benefits in kind	€3,031	Philippe Brassac has a company car. For 2025, this benefit in kind was granted until the General Meeting of 14 May 2025.
Supplementary pension scheme	-	<p>No supplementary pension amount is payable to Philippe Brassac for financial year 2025. Philippe Brassac's annual and conditional individual supplementary pension entitlements at 31 December 2025 include:</p> <ul style="list-style-type: none"> - a life annuity under a defined-contribution supplementary pension scheme, for an estimated gross amount of €14,000; - a life annuity under a defined-benefit supplementary pension scheme, for an estimated gross amount of €567,000. <p>The estimated total of these supplementary pension entitlements, taken together with estimated pensions from mandatory retirement schemes, corresponds to the application of the contractual cap of 16 times the annual French social security cap as of the reporting period, for all schemes.</p> <p>The uncertain entitlements under the defined-benefit supplementary pension scheme are estimated on the basis of 37 years' service recorded at 31 December 2019, after capping corresponding to 35% of the reference compensation at 31 December 2025.</p> <p>The published estimated amounts are the gross amounts before taxes and social security costs applicable at the reporting period end date, particularly income tax payable by individuals and supplementary contributions of 7% and 14%, payable by the beneficiary, which are deducted from the life annuities payable under the supplementary defined-benefit pension scheme.</p> <p>The reference compensation, vesting rate and other characteristics of these schemes can be found on page 424 of the Universal Registration Document.</p>

COMPONENTS OF COMPENSATION PAID IN 2025

In accordance with the amounts approved by the General Meeting of 14 May 2025, Philippe Brassac received €264,000 in non-deferred variable compensation granted under the 2025 Plan for 2024, €319,440 in non-deferred variable compensation under the 2024 Plan for 2023, and €431,693 in deferred variable compensation tranches granted under the 2022 Plan for 2021, the 2023 Plan for 2022 and the 2024 Plan for 2023:

Plan	Tranche		Vesting rate	Amount paid
2025 Plan for 2024	Cash	Non-deferred variable compensation	-	€264,000
2024 Plan for 2023	Indexed cash	Non-deferred variable compensation	-	€319,440
2024 Plan for 2023	1 st tranche in cash	Deferred and vested variable compensation	100%	€79,200
2023 Plan for 2022	1 st tranche in indexed cash	Deferred and vested variable compensation	100%	€105,989
2023 Plan for 2022	2 nd tranche in cash	Deferred and vested variable compensation	100%	€74,640
2022 Plan for 2021	2 nd tranche in indexed cash	Deferred and vested variable compensation	100%	€92,664
2022 Plan for 2021	3 rd tranche in cash	Deferred and vested variable compensation	100%	€79,200

These payments result from the application of the compensation policies approved by the General Meetings in 2021, 2022, 2023, 2024 and 2025 and the amounts of variable compensation approved by the General Meetings in 2022, 2023, 2024 and 2025.

Details of the achievement of these vesting rates can be found lower down in this section.

COMMITMENTS OF ANY KIND MADE BY THE COMPANY AND THAT WERE VOTED ON BY THE GENERAL MEETING AS PART OF THE PROCEDURE GOVERNING RELATED PARTY AGREEMENTS AND COMMITMENTS

	Amount	Comments
PERIPHERAL COMPENSATION		
Severance payment	-	As Philippe Brassac has exercised his right to retirement, he is not entitled to any severance payment.
Non-competition compensation	-	As Philippe Brassac has exercised his right to retirement, he is not entitled to any non-competition compensation.

COMPONENTS OF COMPENSATION PAID IN, OR AWARDED FOR, FINANCIAL YEAR 2025 TO OLIVIER GAVALDA, DEPUTY CHIEF EXECUTIVE OFFICER UNTIL THE GENERAL MEETING OF 14 MAY 2025, SUBJECT TO THE *EX POST* VOTE OF SHAREHOLDERS

COMPONENTS OF COMPENSATION PAID IN OR AWARDED FOR FINANCIAL YEAR 2025, SUBJECT TO APPROVAL BY THE GENERAL MEETING OF 20 MAY 2026

	Amount	Comments
Fixed compensation	€257,796	Olivier Gavalda receives, as Deputy Chief Executive Officer, fixed annual compensation of €700,000. For 2025, this fixed annual compensation is calculated, on a pro rata basis, in proportion to Olivier Gavalda's presence as Deputy Chief Executive Officer until the General Meeting of 14 May 2025.
Annual variable compensation	€233,100	<p>In view of the achievement of financial and non-financial criteria as defined by the Board at its meeting of 4 February 2025 and approved by the General Meeting of 14 May 2025, the amount of annual variable compensation was determined on the following basis:</p> <ul style="list-style-type: none"> – achievement level of financial criteria: 108.0%; – achievement level of non-financial criteria: 121.4%. <p>Details of the achievement of these criteria can be found in the following pages.</p> <p>Consequently, the Board of Directors, at its meeting on 3 February 2026, on the proposal of the Compensation Committee, set the amount of Olivier Gavalda's variable compensation for financial year 2025 at €233,100, pro rata of his presence as Deputy Chief Executive Officer until the General Meeting of 14 May 2025, i.e. an achievement rate of 113.3%.</p>
Of which non-deferred portion in cash	€46,620	20% of the annual variable compensation, namely €46,620, will be paid in May 2026.
Of which non-deferred portion in Crédit Agricole S.A. share-based cash	€46,620	20% of the annual variable compensation, namely €46,620, is linked to the Crédit Agricole S.A. share price and will be paid in March 2027.
Of which deferred portion in cash	€69,930	30% of the annual variable compensation, namely €69,930 at the award date, is awarded in cash. Their final vesting is deferred linearly over five years, subject to achieving a performance criterion and to a clawback clause.
Of which deferred portion in Crédit Agricole S.A. share-based cash	€69,930	30% of the annual variable compensation, namely €69,930 at the award date, is awarded in Crédit Agricole S.A. share-based cash. Their final vesting is deferred linearly over five years, subject to achieving a performance criterion and to a clawback clause.
Long-term variable compensation	€29,933 (valued in accordance with IFRS 2 at 2 February 2026)	<p>The Board of Directors of 3 February 2026 decided to allocate 3,485 shares to Olivier Gavalda as Deputy Chief Executive Officer, on a pro rata basis, in proportion to Olivier Gavalda's presence as Deputy Chief Executive Officer until the General Meeting of 14 May 2025.</p> <p>This long-term variable compensation awarded for 2025 has the following characteristics:</p> <ul style="list-style-type: none"> – award corresponding to the maximum number of shares that may be vested if the performance level of 120% of the target is achieved; (the number awarded corresponding to achievement of the performance level represents 20% of the annual fixed compensation); – vesting at the end of a five-year period subject to the fulfilment of attendance and performance conditions (financial, stock market, environmental and societal) followed by a one-year lock-up period after vesting (and 30% of the shares vested each year are non-transferable until the termination of duties); – award granted by the 33rd resolution of the General Meeting of 14 May 2025. Award representing less than 0.001% of the share capital

	Amount	Comments
PERIPHERAL COMPENSATION		
Exceptional compensation	-	Olivier Gavalda has received no exceptional compensation for 2025.
Compensation for Director's term of office	-	Olivier Gavalda has waived the right to receive compensation for his duties as a Director of Group companies for the entire duration of his term of office.
Benefits in kind	€2,405	Olivier Gavalda receives the benefit of a company car, on a pro rata basis, for his presence as Deputy Chief Executive Officer until the General Meeting on 14 May 2025.
Supplementary pension scheme		<p>Olivier Gavalda's annual and conditional individual supplementary pension entitlements at 31 December 2025 include:</p> <ul style="list-style-type: none"> – a life annuity under a defined-contribution supplementary pension scheme, for an estimated gross amount of €9,000; – a life annuity under a defined-benefit supplementary pension scheme, for an estimated gross amount of €659,000. <p>The estimated total of these supplementary pension entitlements, taken together with estimated pensions from mandatory retirement schemes, corresponds to the application of the contractual cap of 16 times the annual French social security cap as of the reporting period, for all schemes.</p> <p>The uncertain entitlements under the supplementary defined-benefit pension scheme are estimated on the basis of 31 years' service recorded at 31 December 2019, after capping corresponding to 54% of the reference compensation at 31 December 2025. RWA							10%	12.4%
TOTAL	60%	64.9%	60%	64.8%	60%	64.9%	60%	65.9%

As of the General Meeting of 14 May 2025:

Financial criteria	Olivier Gavalda, Chief Executive Officer		Jérôme Grivet, Deputy Chief Executive Officer	
	Weighting	2025 performance	Weighting	2025 performance
Financial criteria – Crédit Agricole S.A.	60%	64.9%	60%	64.9%
Net income Group share	20%	21.9%	20%	21.9%
Cost/income ratio	20%	21.2%	20%	21.2%
Return on Tangible Equity	20%	21.8%	20%	21.8%
TOTAL	60%	64.9%	60%	64.9%

The year 2025 enabled Crédit Agricole S.A. to post strong results and confirm its growth momentum.

Annual revenues reached record levels, boosted by the strong performance of all business lines, and have been growing steadily since 2017. These high-level results were supported by all the development projects and by strong activity, allowing Crédit Agricole S.A. to meet its financial criteria by 108.1%.

Financial indicators met their targets at the end of 2025 and point to a favourable trajectory towards the targets of the new ACT 2028 Medium-Term Plan launched this year:

- a cost/income ratio below the target of 58% (achievement rate of 106.1%);
- an increase in gross operating income and controlled cost of risk enabled the Group to achieve a high level of net income Group share in 2025, driven by all business lines (achievement rate of 109.6%) and a high RoTE (achievement rate of 108.8%);
- the Universal Banking division posted good annual performance, thanks to the complementary nature and sustained activity of its business lines. Earnings were up, driven in particular by very strong activity in Insurance and Asset Management and by increased lending in Retail Banking. The Large Customers division also delivered a good performance, driven by strong revenues.

ACHIEVEMENT OF NON-FINANCIAL CRITERIA

Until the General Meeting of 14 May 2025:

Non-financial criteria	Philippe Brassac, Chief Executive Officer		Olivier Gavalda, Deputy Chief Executive Officer		Jérôme Grivet, Deputy Chief Executive Officer		Xavier Musca, Deputy Chief Executive Officer

TOTAL	40%	48.8%	40%	48.9%

On 3 February 2026 the Board of Directors, on the proposal of the Compensation Committee, set the achievement rates for the non-financial criteria for executive corporate officers based on the following achievements:

€20bn	>16GW	-62%
Credit Agricole CIB's exposures to low-carbon energy have increased by 170% since 2020.	Contribution to the generation capacity of renewable energy plants financed by CAA	Reduction in Crédit Agricole S.A.'s carbon footprint compared to 2019

Environmental CSR

As regards Crédit Agricole CIB's target of increasing its exposure to low-carbon energies by +80% by 2025, at end of September 2025, outstandings had increased by 170% compared to 2020. Growth in the low-carbon portfolio was steady over the first nine months of the year, in particular, due to significant new production in project financing. Outstandings increased from €14.5 billion at end 2024 to €20 billion at end 2025, up 38%. The 2025 target of the Medium-Term Plan was substantially exceeded.

The contribution to renewable energy financing at CAA continued in 2025. With CAA reaching more than 16GW at the end of 2025, the 14GW target set by the Medium-Term Plan for 2025 was exceeded.

Lastly, with regard to reducing the operational footprint of Crédit Agricole S.A., the Group continued the energy-saving and efficiency initiatives for its buildings begun in 2022 in the framework of the Efficiency Plan. These initiatives also rely on the transformation of uses over time, such as the CUBE programme on campuses, for example (Efficiency Building Use Competition). The Group continued to speed up the electrification of its vehicles, in particular with the updating in early 2025 of its vehicle fleet catalogue for the vehicles of the entities. Business travel is the subject of special attention. An ambitious travel policy has been formalised with the implementation in some entities of carbon management by business line. The Medium-Term Plan's 2025 target of a 40% reduction in our own footprint was exceeded, with a drop of 62% at end 2025 compared to 2019.

Concerning the objective to promote workforce entry for young people through employment and training, a system is in place to integrate young people through work-study programmes and internships in the Group's retail banks and business lines, in France and internationally. The objective is to welcome and support 50,000 young people by 2025, equivalent to 12,500 young people per year for the Crédit Agricole Group. The target was exceeded with a total of 88,792 young people onboarded by the Group over the period (target of 50,000), and about 24,974 young people in 2025 (annual target of 12,500), steadily increasing each year since 2022.

Crédit Agricole S.A. strives to provide those entering the job market with opportunities to discover the diverse range of its activities, via short-term contracts such as work-study contracts, internships and international corporate volunteering contracts etc. These opportunities are the best way for young people to acquire a diverse range of skills and define their academic and career pathways.

This commitment meets the various expectations of the Human-centric and Societal Projects: developing oneself, developing others, and making a commitment to young people. It enables our employees to get involved in helping young people enter the job market, develop our appeal and employer brand, build loyalty, diversify the profiles new recruits and strengthen inter-generational solidarity.

This commitment is also illustrated by the mobilisation of employees to support work-study students and, more generally, young people within the Group. Since 2022, these efforts have been given greater visibility by:

- the Group-wide dissemination of a Charter to guide mentor champions. This document shares the philosophy behind mentoring young people and sets out associated best practices;
- an integration day for Crédit Agricole Group employees;
- an annual internal survey of the Group's work-study students, with a five percentage point rise, for the third consecutive year, in the participation rate (50% in 2025 compared to 45% in 2024);
- and support for several associations for young people through skills sponsorship (Mécénat de Compétences).

As regards Crédit Agricole S.A.'s collective dynamics target, the 2025 employee survey evolved and also measured the Trust Index. This new questionnaire enables the understanding of trust-building levers to be deepened and the collective to be mobilised in pursuit of improved performance and greater cross-functionality.

For this first measurement, the participation rate stood at 80%, demonstrating strong collective commitment. The Employee Net Promoter Score stood at 78%, stable since last year, up +2 percentage points since 2022 and up +10 percentage points for employees under 30, while profound transformations continue across all entities.

Launch of new business lines

Customer Project

The Group's commitment to the Customer Project continues to yield positive results, with customer satisfaction as measured by the NPS rising across all markets, excluding SMEs for Crédit Agricole, and for both the Crédit Agricole and LCL brands.

The customer experience delivered by Crédit Agricole has achieved high NPS levels. In 2025, the experience took a leap forwards for Crédit Agricole's wealth management and corporate customers. Crédit Agricole took first place in the corporate market and ranked in the top three across all markets. The NPS (%promoters-%detractors) is the Crédit Agricole Group's key metric for measuring the customer experience.

For its growth, the Group relies on its organic development, with a 2025 capture of 2.1 million new customers in France, Italy and Poland.

With regard to the development of new business lines and projects:

Crédit Agricole Transitions & Énergies (Transitions & Energies) continues to grow and is progressing in line with the plan set out in its roadmap. Financing activities remain buoyant, with nearly €1.4 billion in financing arranged. This growth has been accompanied by increased internationalisation, marked by the

launch of new financing projects in Poland. On the investment side, Crédit Agricole Transitions & Énergies is continuing its commitments through the Crédit Agricole Transitions and Énergies & Économie Bas Carbone funds, confirming its desire to provide long-term support for the energy transition. The acquisition of COMWATT, a specialist in solar energy production and optimisation for private individuals, is a key milestone. This transaction enabled the launch of the "Mon Énergie by CA" solar self-consumption offering in the first quarter of 2026. In addition, a strategic partnership with HelloWatt was formed to enhance the "J'écornove mon logement" platform. The offering for corporates was also strengthened with the acquisition of a majority stake (70%) in R3, a leader in energy, environmental and social performance for corporates, enabling the Group to offer comprehensive and integrated support. The renewable electricity supply business continues to grow with Selfee and the capture of iconic markets such as the Finistère Departmental Energy Syndicate and the city and suburbs of Lyon, as well as the first corporate contracts. Finally, in the agricultural market, Crédit Agricole Transitions & Energies has joined forces with JP Energie Environnement to create a joint venture dedicated to supporting farmers in the implementation of their agrivoltaic projects.

Crédit Agricole Santé & Territoires accelerated its development in 2025 in the area of access to healthcare. Three major acquisitions were made in this area in 2024: Medicalib (50,000 individuals screened during a prevention campaign), Omedys (more than 40,000 assisted teleconsultations in the regions) and Office Santé (70 health centres and clinics delivered and in operation in 2025). Following on from these transactions, Crédit Agricole Santé & Territoires (Health & Territories) rolled out these solutions in the regions alongside the Regional Banks, supporting several local authorities in defining and implementing their health master plans. Established as a strategic development focus since the creation of Crédit Agricole Santé & Territoires, support for ageing saw two major advances in 2025: the acquisition of a majority stake in CetteFamille, which offers inclusive, non-medical accommodation solutions for seniors with reduced autonomy (85 homes open); and the acquisition of 100% of Petits-Fils, the leader in home services for seniors (28,000 customers supported in 2025). These two transactions provide the Regional Banks with a real “toolbox” to address the challenges of ageing at home.

Digital and technological transformation

Crédit Agricole S.A. entities have implemented their digital transformation roadmaps in line with their commitments, in particular: new digital insurance subscription and management processes have been rolled out. LCL has launched its digital savings advisory services and instant customer onboarding journey, and has expanded its digital real estate services. BForBank's roadmap was implemented, including an ambitious overhaul of the core banking system.

In the area of payments, the Group exceeded its targets, with growth in revenues from payments for LCL and the Regional Banks

that exceeded expectations above the initial target of €300 million. The successful creation of the CAWL (Crédit Agricole-Worldline) joint venture rapidly proved its relevance by delivering innovative offers and achieving its first commercial success in the first quarter of 2025.

The Group's 2025 Information Technology transformation plan was successfully completed, with all the 2025 IT project programmes having been achieved. The closing steering committee held in December formalised the end of this structuring programme and its transition to a regular operating phase.

Risk and compliance management

Performance with respect to this criterion measures:

- The promotion of ethics and the establishment of a strong Risk and Compliance culture within the Group across all lines of defense, and particularly within the first lines of defense, measured through participation in the ethics survey, the results of the conduct risk indicator, as well as regulatory training completed by employees;
- the rigorous approach to the updating and quality of KYC within the Group scope, measured by monitoring the trajectory of file reviews, and their quality;
- compliance with regulatory, risk, compliance and CSR obligations laid down by the supervisory authorities, measured by monitoring the recommendations issued by the French, European and American supervisory authorities in particular. The achievement rate is a recognition of the effectiveness of the system and the assessment of the supervisors, both the ECB, which reflected it in its SREP assessment, and the FED, which closed a number of recommendations in the United States.

DETAILS OF THE RATES OF ACHIEVEMENT OF THE PERFORMANCE CONDITIONS DETERMINING THE VARIABLE COMPENSATION PAID IN FINANCIAL YEAR 2025 TO EXECUTIVE CORPORATE OFFICERS

In accordance with the compensation policy approved at the General Meeting, the variable annual compensation is paid partly in cash and partly in Crédit Agricole S.A. share-based cash. For pre-2024 plans, vesting is contingent on achieving three complementary performance criteria, for which the overall achievement rate cannot exceed 100%. Based on performance against the three criteria, the combined vesting rate was 100% for the second and third variable compensation

tranches awarded under the 2022 Plan and for the first and second variable compensation tranches awarded under the 2023 Plan. For the 2024 Plan, the vesting of annual variable compensation is conditional on achieving a single performance indicator, Crédit Agricole S.A.'s pre-tax RoTE. The vesting rate is 100% for the first variable compensation tranche awarded under the 2024 Plan.

	Weighting	Effective performance of the 2022 Plan – third tranche in cash	Effective performance of the 2022 Plan – second tranche in indexed cash	Effective performance of the 2023 Plan – second tranche in cash	Effective performance of the 2023 Plan – first tranche in indexed cash	Effective performance of the 2024 Plan – first tranche in cash

Total gross amount consumed:  1,819,700 out of a gross amount of  1.9 million allocated

(1) After the following deductions from the amounts payable to individual beneficiaries resident in France: income tax prepayment (12.8%) and social security contributions (17.2%).

(2) See Board of Directors' compensation policy - see section 4.4.2

(3) The three Directors representing employees, as well as the non-voting Director representing the employees of the Regional Banks, do not receive their compensation; instead, it is paid to their unions. Deductions are only made for social security contributions (17.2%).

(4) Only 12.8% withholding tax (non-resident in France).

(5) Directors and non-voting Directors appointed during 2025.

(6) Directors and non-voting Directors who will be leaving office in 2025.

4.4.3.4 COMPARATIVE APPROACH TO COMPENSATION

In accordance with the provisions of Article L. 22-10-9. of the French Commercial Code, Crédit Agricole S.A. publishes the comparative change in total compensation due or awarded to executive corporate officers with the average total compensation of employees from the Company (Crédit Agricole S.A.) and the Group's performance (measured by the underlying Net income Group share), over five years.

CALCULATION METHOD

In accordance with the Afep/Medef guidelines on compensation multiples and with a view to ensuring the representativeness of the data, Crédit Agricole S.A. has chosen to go beyond the regulatory obligations and calculate the ratios presented below for France, which is considered to be more relevant (more than 38,000 employees, i.e. almost half of Crédit Agricole S.A.'s workforce, representative of Crédit Agricole S.A.'s different business lines, compared with approximately 1,900 for the S.A. scope).

These ratios thus compare the total compensation due or awarded to each executive corporate officer in respect of each financial year with that of the employees of Crédit Agricole S.A. in France.

The employees under consideration are those with permanent employment contracts at 31 December of each financial year.

Employee compensation includes fixed annual compensation, bonuses and benefits for the year, variable annual and long-term compensation for the year, and profit-sharing and incentive bonuses for the year. For the calculations for the year 2025, the components of variable compensation (annual and long-term variable compensation and profit-sharing and incentive bonuses) are estimated on the basis of the previous financial year's budgets and components known at the time. The 2024 ratios have therefore been updated to take into account the actual budgets for the financial year.

The compensation of executive corporate officers corresponds to their fixed compensation and valued benefits in kind, annual variable compensation for the year and the fair value of long-term variable compensation. This information corresponds to the elements already presented in this report. In accordance with the recommendations of the Afep-Medef Code, and in order to present relevant information in the context of changes in governance during the financial year, the compensation of executive corporate officers was annualised when calculating the equity ratio.

COMPARATIVE CHANGES IN THE COMPENSATION OF EXECUTIVE CORPORATE OFFICERS IN FRANCE

Metrics	2021	2022	2023	2024	2025	Variations 2021-2025

TABLE 10 – SUMMARY OF MULTI-ANNUAL VARIABLE COMPENSATION OF EACH EXECUTIVE CORPORATE OFFICER

Not applicable.

TABLE 11 – EMPLOYMENT CONTRACT/SUPPLEMENTARY PENSION SCHEME/SEVERANCE PAYMENT/NON-COMPETITION CLAUSE

Executive corporate officers ⁽¹⁾	Beginning of term of office	End of term of office	Employment contract ⁽²⁾	Supplementary pension scheme	Allowances and benefits due or likely to be due as a result of termination or change of functions	Allowances under a non-competition clause
Dominique Lefebvre, Chairman	04/11/2015	2028 ⁽³⁾	No	No	No	No
Olivier Gavalda, Chief Executive Officer	14/05/2025	Unlimited duration	Yes	Yes	Yes	Yes
Jérôme Grivet, Deputy Chief Executive Officer	01/09/2022	Unlimited duration	Yes	Yes	Yes	Yes

(1) Information relating to executive corporate officers who ceased their duties during 2025 is not included as the conditions remain unchanged.

(2) The Afep/Medef recommendation against holding a corporate office while being covered by an employment contract applies to the Chairman of the Board of Directors, the Chairman and Chief Executive Officer and the Chief Executive Officer. However, the Deputy Chief Executive Officer's employment contract was suspended by an amendment. It will take effect again at the end of the term of office, at the updated compensation and position levels applicable prior to the term of office.

(3) Dominique Lefebvre resigned as Director and Chairman of the Board of Directors on 31 December 2025.

4.5. APPENDIX

DEFINITION AND CHARACTERISTICS OF THE COMPENSATION OF IDENTIFIED EMPLOYEES

Credit institutions

The credit institutions and investment firms concerned are those falling within the scope of application of the Decree of 3 November 2014 on the internal control of companies in the banking, payment services and investment services sector subject to the supervision of the French Regulatory and Resolution Supervisory Authority. For the Group, these are Crédit Agricole S.A. as well as all entities with a balance sheet of more than €10 billion or with equity of more than 2% of their parent company's equity.

Reference regulatory corpus	Decree of 20 December 2020 amending the decree of 3 November 2014 relating to the internal control of credit institutions and investment firms Commission Delegated Regulation (EU) 2021/923 of 25 March 2021.
------------------------------------	---

Identified employees by virtue of their role	Within Crédit Agricole S.A.: Executive Corporate Officers; members of the Board of Directors; members of the Executive Committee; members of the Management Committee; heads of the support functions in charge of: legal affairs, accounting procedures, finance including tax and budget, economic analysis, anti-money laundering and countering the financing of terrorism, human resources, development and implementation of compensation policy, information technology, information security; heads of the control functions; employees exercising a subordinate control function, reporting directly to the heads of the control functions; employees in charge of a committee overseeing the following risk categories for the Group: credit risk, counterparty risk, residual risk, concentration risk, risk related to securitisation positions, market risk, interest rate risk, operational risk, liquidity risk and excessive leverage risk; voting members of the "new activities/new products" Committee.
---	--

Within other entities:

Executive corporate officers; members of the Board of Directors; members of the Executive Committee or the most important decision-making body after Executive Management; heads of the support functions in charge of: legal affairs, finance, human resources, information technology; heads of the control functions; employees in charge of a committee overseeing the following risk categories: credit risk, counterparty risk, residual risk, concentration risk, risk related to securitisation positions, market risk, interest rate risk, operational risk, liquidity risk and excessive leverage risk; voting members of the "new activities/new products" Committee.

Identified employees by virtue of their level of authority or compensation	<ul style="list-style-type: none"> Employees with authority or powers to take credit risk of more than 0.5% of Common Equity Tier 1 (CET1) capital in the subsidiary to which they belong and of at least €5 million, or with authority or powers to structure this type of product with a significant impact on the risk profile of the subsidiary to which they belong. Employees who can take market risks of more than 0.5% of the CET1 capital or 5% of the Value at Risk (VaR) of the subsidiary to which they belong; The hierarchical managers of employees who are not individually identified but who are collectively authorised to take credit risks of more than 0.5% of CET1 capital in the subsidiary to which they belong and at least €5 million, or to take market risks of more than 0.5% of the CET1 capital or 5% of the Value at Risk (VaR) of the subsidiary to which they belong; Employees who earned total gross compensation of more than €500,000 in the previous financial year; Employees not identified under any of the previous criteria but whose total compensation puts them in the 0.3% top earners in the entity in the previous financial year (for entities with more than 1,000 employees).
---	---

Characteristics of deferred compensation	<ul style="list-style-type: none"> In view of the proportionality principle, employees whose variable compensation is less than €50,000 or less than one third of total compensation are excluded from the scope of application of rules on deferred compensation in all Group entities, unless otherwise stipulated by the regulatory authorities in the countries in which the Group's subsidiaries are located. The deferred portion is determined based on the overall variable compensation awarded for the financial year.
---	--

Total variable compensation for year Y

≤€50,000

€50,000 – €500,000

>€500,000

Deferred portion

Not applicable

40% from the first euro

60% from the first euro with minimum non-deferred amount of €300,000

Payment in shares or equivalent instruments

A portion of the deferred variable compensation as well as a portion of the non-deferred variable compensation subject to a lock-up period of six or twelve months are vested in Crédit Agricole S.A. shares or share-linked instruments. As a result, at least 50% of the variable compensation of identified employees is awarded in shares or equivalent instruments.

Any hedging or insurance strategies limiting the scope of alignment provisions on risks contained in the compensation scheme are prohibited.

Performance conditions

The vesting of the deferred portion is spread over four or five years (for certain executives), with each annual instalment divided into two (one tranche in cash and one tranche made up of instruments), provided that the vesting conditions are met. Each vesting date is followed by a lock-up period of six to twelve months, for the tranche made up of instruments.

Credit institutions**ASSET MANAGEMENT COMPANIES**

Reference regulatory corpus AMF position 2013-11 under European AIFM Directive 2011/6 of 8 June 2011 and AMF Decree of 6 April 2016 under UCITS V Directive 2014/91/EU.

Identified employees by virtue of their role

- executive directors;
- investment managers;
- decision-making managers;
- Heads of the three control functions: Risk Management and Permanent Controls, Compliance and Audit;
- Heads of the support functions: Legal, Finance, Administration and Human Resources.

Identified employees by virtue of their level of authority or compensation Supplementary condition: earn variable compensation of more than €100,000.

Characteristics of deferred compensation	Total variable compensation for year Y	Deferred portion
<€100,000		Not applicable
€100,000 – €600,000		50% from the first euro
>€600,000		60% from the first euro with minimum non-deferred amount of €300,000

INSURANCE COMPANIES

Reference regulatory corpus Delegated Act 2015/35 of 10 October 2014. Insurance and reinsurance companies are excluded from the scope of application of Commission Delegated Regulation (EU) No. 604/2014.

Identified employees by virtue of their role

- the Corporate Officers or executive managers;
- the members of the Executive Committee of CA Assurances;
- employees performing the key functions referred to in Articles 269 to 272 of Delegated Act 2015-35: risk management, compliance audit, internal audit, actuarial function;
- employees responsible for underwriting and business development;
- investment managers.

Identified employees by virtue of their level of authority or compensation

Characteristics of deferred compensation	Total variable compensation for year Y	Deferred portion
<€120,000		Not applicable
€120,000 – €400,000		40% from the first euro
€400,000 – €600,000		50% from the first euro with minimum non-deferred amount of €240,000
>€600,000		60% from the first euro with a minimum non-deferred amount of €300,000

INVESTMENT COMPANIES

Reference regulatory corpus

- Directive 2019/2034
- Delegated Regulation 2021/2154

Identified employees by virtue of their position or compensation

- Executive Corporate Officers or executive managers;
- risk-taking staff;
- any employee whose total compensation is at least equal to the lowest compensation received by the above-mentioned persons and whose professional activities have a significant impact on the risk profile of the company or the assets it manages.

Characteristics of deferred compensation	Total variable compensation for year Y	Deferred portion
≤€50,000 or ¼ of total compensation		Not applicable
>€50,000		40% to 60% on the first euro

5. VIGILANCE PLAN

Introduction	454	Whistleblowing system	472
Risk mapping	457	System for monitoring the actions implemented and evaluating their performance	473
Avoidance and remediation actions	461		

5.1. INTRODUCTION

5.1.1 REGULATORY CONTEXT

LEGAL FRAMEWORK AND REPORTING SCOPE

Law No. 2017-399 of 27 March 2017 on the duty of vigilance of parent companies and contracting companies applies to Crédit Agricole S.A.

As the parent company, Crédit Agricole S.A. Parent Company prepares a Vigilance Plan and reports on its effective implementation for itself and the companies it directly or indirectly controls. Together these are referred to as “Crédit Agricole S.A.”. ⁽¹⁾ Crédit Agricole S.A.’s activities are presented in Chapter 1 of the 2025 Universal Registration Document. In total, the Crédit Agricole Group has more than 160,000 employees, including more than 83,000 employees for Crédit Agricole S.A.covered by this Vigilance Plan. Crédit Agricole S.A. is present in 46 countries, with 46% of employees in France and 54% abroad.

In the interests of transparency, Crédit Agricole S.A. has also chosen to publish information not required by the aforementioned law, in particular concerning sustainable finance and its climate strategy. Crédit Agricole S.A. is firmly committed to sustainable finance in its banking and insurance activities, i.e. in its financing and investment activities, in the provision of investment advice and in the distribution of financial and insurance products and services to its customers.

The challenges in terms of respect for human rights and fundamental freedoms enshrined in France’s international commitments relate in particular to the fight against the use of forced labour, slavery and child labour, the fight against workplace discrimination and harassment, failure to respect freedom of association and the principle of collective bargaining, risks to human health and safety, lack of decent working conditions, compensation and social protection, and failure to respect the right to privacy.

Environmental protection issues include the fight against pollution and land degradation, air and water quality and the fight against the proliferation and non-treatment of waste. Through its activities, Crédit Agricole S.A. also intends to contribute to the fight against climate change and the prevention of associated climate risks, to the fight against the excessive consumption of natural resources and to the protection of biodiversity.

OUR APPROACH

In accordance with Article L. 225-102-1 of the French Commercial Code (Code de Commerce), Crédit Agricole S.A.’s compliance plan includes:

- a risk map covering suppliers, subcontractors and employees, for the identification, analysis and prioritisation of risks of serious violations of fundamental freedoms and human rights, human health and safety, and risks to the environment that its activities could cause. This is reflected in the methodology used as well as a summary of the risks identified and the associated areas of vigilance;
- Measures to prevent or mitigate the risk of serious violations;
- procedures to regularly assess the situation of entities, subcontractors or suppliers with which it has an established business relationship, on the basis of the risk map;
- A mechanism for alerting and receiving alerts relating to the existence or realisation of such risks, established in collaboration with the representative trade unions;
- A system for monitoring the actions implemented and evaluating their performance. This system includes metrics for monitoring the Vigilance Plan. In accordance with Article L. 225-102-1 of the French Commercial Code, more detailed information on risks and policies is provided in the sustainability report (see Chapter 2.1 “Sustainability report”).

The report on the effective implementation of the Vigilance Plan is published each year for the financial year ending 31 December of the previous year.

With a view to continuous improvement, the tools used to identify and manage risks, and the measures implemented to prevent them, may evolve, as may the risk mapping, in line with priority ESG issues.

(1) Crédit Agricole S.A. listed company of Crédit Agricole Group. This group has Crédit Agricole S.A. Parent Company as its parent company. Its scope of consolidation includes subsidiaries, joint ventures and associates that it holds directly or indirectly.
Crédit Agricole S.A. Parent Company: the legal entity that acts as the corporate centre and head of the Crédit Agricole network and ensures that the Group acts as a single financial unit.
Crédit Agricole Group: this includes Crédit Agricole S.A., the Regional Banks and the Local Banks.

5.1.2 PRESENTATION OF THE GROUP'S ACTIVITIES AND VALUE CHAIN

Crédit Agricole S.A.'s main activities are presented in Chapter 2.1, Section 1.3.1.1 of the 2025 Universal Registration Document.

Crédit Agricole Group's universal customer-focused banking model is based on the close association of its retail banks with its specialised business lines.

This model underscores the commitment of Crédit Agricole Group and its specialised entities to be the trusted partner of all of its customers and to cover the full breadth of their needs: financing, payment instruments, insurance, savings management, real estate, international expansion, energy transition support and technology services.

In response to the growing expectations of our customers, the Group has introduced two new business lines: Crédit Agricole Transitions & Énergies (Transitions & Energies) and Crédit Agricole Santé & Territoires (Health & Territories).

Crédit Agricole S.A. operates in the service sector, in three principal business areas: financing, investment and insurance sectors for all products and services, from designing offerings through to their use by its end customers, including marketing and distribution. These three dimensions make up its value chain (see Chapter 2.1, Section 1.3.1.2 "Crédit Agricole S.A.'s value chain").

5.1.3 THE GROUP'S RAISON D'ÊTRE AND VALUES

OUR COMMITMENTS

Our vigilance measures are in line with the fundamental principles to which we adhere, as well as national and European laws and regulations and applicable international treaties, in particular with regard to respect for human rights, the fight against modern slavery, the prevention of attacks on human health and safety, and the protection of the environment.

In addition to the applicable legislative and regulatory framework, our commitments relate to the development of sustainable finance, which the Crédit Agricole Group reports on in detail in the sustainability report (see Chapter 2.1, Section 1.3.1.1). They are also based on our Raison d'être: "Working every day in the interest of our customers and society" and on the Societal Project, reiterated in ACT 2028, the Medium-Term Plan of Crédit Agricole S.A. This Societal Project expresses our ambition to act in the collective interest of society by resolutely supporting a regenerative economy around three priorities:

- continuing and strengthening the integration of the environment into our activities;
- expanding the range of our solutions for an inclusive economy;
- strengthening regional industrialisation by supporting the development of future sectors.

To carry out these projects while exercising its banking-insurance business in a responsible manner, Crédit Agricole Group is committed to promoting a strong culture of compliance and ethics among all its employees. Particular attention is paid to the impact of our activities on people and the environment in order to achieve our targets and meet our commitments to our stakeholders.

The Crédit Agricole Group is also careful to comply with local regulations when they apply to its locations and activities.

OUR ETHICAL PRINCIPLES

Our ethics go beyond the prerequisite of respecting the rules; they allow us to aim further and higher when conducting our business, and to emphasise our unique qualities in order to fully satisfy our Raison d'Être. It applies to all Crédit Agricole Group employees and executives in their interactions with customers, suppliers, service providers and employees (see Chapter 2.1, Sections 4.1.4.1 "Promoting an ethical culture" and 4.1.4.3 "Combating corruption"). Our ethical principles are set out in the following master documents:

"Our principles and commitments are set out in our Group Code of Ethics, which is implemented by each Group entity in its Code of Conduct"

- **The Code of Ethics** shared by the Group sets the framework for the Group's principles regarding business action and conduct. Our Code of Ethics was updated in 2025.
- **The Codes of Conduct**, which are specific to each Group entity and the nature of its business, translate the principles of the Code of Ethics from an operational perspective to promote ethical behaviour and actions on a day-to-day basis.

Since 2017, Crédit Agricole S.A. has been implementing an ethical approach led in part by the Compliance business line. This ethical approach, which aims to prevent risks of misconduct, in particular through the duty of vigilance, is reflected in:

- **The organisation and operational management** of ethical issues, including a monthly coordination meeting involving the Human Resources, Sustainability and Impact and Compliance departments, a network of "ethics advisers" at Group level, and tools for sharing information and resources between the various players involved in promoting an ethical culture;
- **an ethics acculturation programme** for employees, which involves the distribution of regularly updated communication tools;
- **native integration of ethics** into the Group's processes and tools, such as taking ethics into account when analysing the risks of launching any new products, services or activities ("NAP" Committees);
- **Metrics** to measure the level of employees' ethical awareness and to measure the level of control of misconduct risks.

"The Crédit Agricole Group is the first French bank to obtain ISO 37001 certification"

In line with the strengthening of anti-corruption legislation, since 2016 the Group has been consolidating its anti-corruption measures to implement the AFA's recommendations. The Group's anti-corruption system, whose roll-out is monitored by the highest levels of governance (including the Board of Directors), is based on (i) a zero-tolerance policy, (ii) a dedicated procedure and governance, (iii) risk mapping, (iv) an anti-corruption Code of Conduct, (v) a strengthened system for protecting whistleblowers, (vi) an assessment and due diligence system for third-party suppliers based on a search for negative information, in which the Group also wishes to include any human rights violations. This system also includes a programme to train employees and raise their awareness of the risks of corruption. The Crédit Agricole Group was the first French bank to be awarded ISO 37001 certification for its anti-corruption management system. This certification was renewed for three years in 2025, attesting to the Group's commitment to long-term compliance with high international anti-corruption standards.

5.1.4 STAKEHOLDER ENGAGEMENT

As part of its corporate social responsibility approach and in a broader effort to future-proof its business, Crédit Agricole S.A. identifies the stakeholders that make up its ecosystem and strives to engage fully with them in order to identify their expectations, challenges, risks and opportunities so that it can understand and address them. Crédit Agricole S.A. regularly listens to the expectations of its stakeholders through various mechanisms:

Stakeholders	Systems
Employees	<ul style="list-style-type: none"> Formal consultation of employees through an annual questionnaire Informal consultation through numerous exchanges with employees organised by top management Thematic and interactive webinars for employees on social or topical matters led by experts in which many of the Group's top managers participate, with the opportunity to ask questions either live or via the chat
Social partners	<ul style="list-style-type: none"> Presentation of the finalised Vigilance Plan, as well as the work to be carried out the following year, to the Consultation Committee Follow-up on the development of the Vigilance Plan during monthly meetings with union representatives Discussions with UNI Global Union as part of the international agreement
Suppliers	<ul style="list-style-type: none"> Regular satisfaction surveys to gather feedback from suppliers and in-house decision-makers A dedicated page on the Corporate website for information purposes, allowing suppliers to contact the Purchasing department Regular reviews with key suppliers during which the duty of vigilance is discussed Annual meeting involving several hundred suppliers with a different theme each year A dedicated newsletter sent to them every six months, supplemented by specific publications on decarbonisation Specific discussions with certain suppliers whose activity is identified as being at risk within the framework of the duty of vigilance
Economic players	<ul style="list-style-type: none"> Participation in round tables or national or international working groups
Civil society and the general public	<ul style="list-style-type: none"> Scientific committee of 10 external members providing guidance on environmental strategy Regular dialogue and exchanges with NGOs, particularly on climate strategy, deforestation and human rights Analysis and handling of controversies that directly or indirectly concern Crédit Agricole S.A., with the possibility of convening a crisis unit chaired by two members of the Executive Committee of Crédit Agricole S.A. as needed Ad hoc meetings at the request of representatives of local communities who feel that their rights have been infringed by companies financed or not by Crédit Agricole
Shareholders/investors	<ul style="list-style-type: none"> Regular meetings between Crédit Agricole S.A.'s Executive Management, Financial Communication department, and investors and analysts Relationships established with financial and non-financial rating agencies Dialogue with individual shareholders: Shareholders' Club, Liaison Committee, shareholder meetings, monthly newsletters Annual General Meeting

With regard to the duty of vigilance approach, Crédit Agricole S.A. has closely involved its social partners in efforts to develop its Vigilance Plan. Within the Group, the members of the Consultation Committee and the Group's trade union representatives are Management's preferred points of contact. Established under a collective agreement signed by the Group in 2005, the Consultation Committee is made up of 30 representatives of Crédit Agricole S.A. appointed by representative trade unions at the national level. It meets twice a year and is responsible for understanding the strategic projects common to several entities of Crédit Agricole S.A., particularly their financial, economic, legal and social aspects. The Group's union correspondents and their deputies are also covered by the same collective agreement. Appointed by the five representative trade union organisations at the national level, they meet monthly with Management representatives as part of the local social dialogue. In 2025, these two bodies were involved in the implementation of the Crédit Agricole S.A. Parent Company's Vigilance Plan. It was presented to union representatives in January and February 2025, and then once a month from September to December 2025. The plan was also presented to the Consultation Committee in May 2025.

Externally, the Group has committed itself, under the global agreement signed on 7 October 2023, to hold an annual meeting of the agreement monitoring committee specifically dedicated to the procedures for developing and implementing the Vigilance Plan, in order to benefit from the experience of UNI Global Union, an international trade union federation, in the field of human rights and fundamental labour rights.

To maintain a relationship based on trust with suppliers, promote communication, share strategic guidelines and messages, and to take into account their concerns, Crédit Agricole S.A. has implemented a system for active stakeholder engagement (buyers/suppliers/decision-makers) described above. The results and information gathered through these channels of dialogue contribute to the approach of ensuring ongoing improvement of Crédit Agricole S.A.'s Responsible Purchasing and its action plans.

5.1.5 VIGILANCE GOVERNANCE

The Vigilance Plan is drawn up in a cross-functional manner by various Group departments, the Purchasing, IT, Legal, Risk, Human Resources and Security and Safety functions and with the entities of Crédit Agricole S.A., under the responsibility of the Sustainability and Impact department and the Compliance department. A Steering Committee dedicated to the duty of vigilance meets every two months to monitor the work's progress.

The Vigilance Plan is monitored at the highest level of Crédit Agricole S.A. The Board of Directors is duly informed each year of the procedures for implementing the plan. The Board's cross-functional approach to social and environmental issues involves most of its specialised committees, depending on the subject: primarily the Societal Commitment Committee, but also the Appointments and Governance Committee, the Risk Committee and the Compensation Committee. This ensures that the Board is fully informed and facilitates the inclusion of these matters in its deliberations.

Furthermore, the roll-out of the ESG risk strategy and steering in the business lines is coordinated within cross-functional committees, placed under the authority of senior executives of the Crédit Agricole Group. The arbitrations and decisions required to fulfil the duty of vigilance are also monitored by the ESG Strategy Committee.

The ESG Strategy Committee, established in 2023 and chaired by Crédit Agricole S.A.'s Chief Executive Officer, defines the commitments to be submitted for the approval of the Board of Directors' Societal Commitment Committee. It also monitors the implementation of the Group's employment-related commitments and the consistency of its ESG strategy.

The Group Risk Committee (CRG), chaired by Crédit Agricole S.A.'s Chief Executive Officer, defines the Group's risk policy and determines the Group's overall limits. The environmental risk framework, which determines the roadmap for this issue over the coming year, is defined by the Risk department in collaboration with the Sustainability and Impact department and the Group entities. It is presented annually to the Group Risk Committee.

For individual credit applications requiring approval by the Executive Management, the Group Level Individual Risk Committee (CRIG), chaired by Crédit Agricole S.A.'s Chief Executive Officer, meets according to the scheduling needs. It examines any sensitive files submitted by the entities of Crédit Agricole S.A. that fall within the authority of Crédit Agricole S.A.'s Chief Executive Officer, and analyses individual alerts of significance to the Group. These files and alerts are made the subject of a Sustainability and Impact department opinion for ESG issues.

5.2. RISK MAPPING ⁽¹⁾

5.2.1 METHODOLOGY FOR IDENTIFYING AND MANAGING THE RISKS REFERRED TO IN THIS VIGILANCE PLAN

Crédit Agricole S.A. conducts exercises to identify and assess significant negative impacts directly related to its activities, in the areas covered by the duty of vigilance law.

RISK MANAGEMENT SYSTEMS

The Group exercises vigilance within the framework of its risk management systems.

The Group's governance pays particular attention to environmental risks. The Executive Management of the entities are responsible for monitoring their activities and risks, as well as compliance with the Group's environmental commitments. The analysis of environmental risk factors is integrated into the risk management processes (mapping, incident reporting, alerts, control system).

Operational risk mapping aims to cover all the entity's material risks. It serves as a diagnostic tool to identify, assess, monitor and provide

a forward-looking comprehensive vision of the main operational risks. The entities ensure that the local control plan is regularly updated, taking into account their specific characteristics.

The system for monitoring risks of non-compliance is set out in a body of internal rules that includes a procedure for managing irregularities and reporting alerts. The risks managed in this way include failure to comply with the rules governing financial and banking activities, professional and ethical standards, business ethics, the fight against money laundering and the financing of terrorism, the fight against corruption, standards designed to ensure vigilance with regard to social and human rights, the prevention and remediation of environmental damage, as well as compliance with market integrity and transparency. Within the Compliance business line, each Compliance Officer updates a mapping of risks, consolidated by the Group Compliance department.

⁽¹⁾ Throughout this document, the term "risk" refers to the potential negative impacts resulting from our activities and those of our suppliers on human rights and the environment.

RISK MAPPING METHODOLOGY FOR EMPLOYEES

Crédit Agricole S.A.'s risk mapping is based on a reference framework of gross risks to which employees are likely to be exposed during their career within the Group. In view of the wide range of activities of the various Group companies, it should be noted here that the risks identified are intended to serve as a common denominator for all Group companies, while recognising that each company draws up and updates their own HR operational risk mapping.

The Group's Sustainability and Impact department and Human Resources department, with advice from the firm Sustainalytics, have drawn up the following risk framework with reference to internationally recognised human rights, as set out in particular in the Universal Declaration of Human Rights (1948) and the fundamental conventions of the International Labour Organization (ILO).

Risks related to occupational health and safety	Risks related to discrimination, inequality and exclusion	Risks related to working conditions	Risks related to freedom of association and collective bargaining
<ul style="list-style-type: none"> Non-compliance with the requirement for employees to undergo medical examinations at the start of and during their employment contract. Serious occupational accidents and illnesses: non-compliance with safety standards applicable to workplaces and equipment, inadequate training in occupational health and safety. Psychosocial risks, harassment and violence at work: a range of unacceptable behaviours and practices, or threats of such behaviours and practices, whether they occur on a single occasion or repeatedly, which aim to cause, cause or are likely to cause physical, psychological, sexual or economic harm, including in particular sexual and psychological harassment. 	<p>Employment discrimination: any distinction, exclusion or preference based on race, gender, religion, political opinion, national or social background etc., which has the effect of eliminating or altering equal opportunity or treatment in terms of employment or occupation.</p>	<ul style="list-style-type: none"> Child labour: non-compliance with the minimum age for admission to employment. Forced labour: any work or service exacted from an individual under the threat of any penalty, and for which said individual has not offered themselves voluntarily. Terms of employment: non-compliance with: <ul style="list-style-type: none"> the right to privacy; the right to adequate working time; the right to an adequate wage; the right to adequate social protection. 	<p>Failure to respect the right of workers to form a trade union of their choice or to join one; obstacles to the implementation of collective bargaining and to the free exercise of the right to strike.</p>

ASSESSMENT PROCESS FOR GROSS RISKS IDENTIFIED

As of 2025, Crédit Agricole S.A. is present in 46 countries, with the majority of its workforce concentrated in five countries: France, Italy, Poland, Luxembourg and Egypt. These five countries account for 78% of the workforce on permanent and fixed-term contracts.

With regard to all risks related to human rights and fundamental freedoms that may affect its employees, the Group relied on the analyses of Sustainalytics to determine a level of criticality for four main types of risks:

- occupational health and safety;
- discrimination, inequality and exclusion;
- working conditions;
- Freedom of association and collective bargaining.

For practical purposes, studies were conducted in 2025 on the basis of the work carried out under the CSRD and the operational HR maps of the entities of Crédit Agricole S.A. The aim was to identify any additional risks specific to Crédit Agricole S.A. and to ensure that they had been included in the main risk categories listed above.

The table below shows the breakdown of Crédit Agricole S.A. workforce in 2025 according to the categories of social risks and the level of criticality of the countries in which the Group operates.

Level of criticality ⁽¹⁾	High	Medium	Moderate	Low
Occupational health and safety	0%	0%	7.67%	92.33%
Discrimination, inequality and exclusion	0%	0%	8.01%	91.99%
Working conditions	0%	2.44%	24.36%	73.20%
Freedom of association and collective bargaining	0%	2.53%	5.11%	92.36%

(1) Scale of standard criticality levels applied by Sustainalytics (Sustainalytics country risk score weighted by employees present).

"More than 98% of Crédit Agricole S.A.'s workforce is located in countries with a low or moderate level of criticality for all the social risk themes selected"

Based on this analysis, more than 98% of Crédit Agricole S.A.'s workforce is located in countries with a low or moderate level of criticality for all the social risk themes selected.

This work makes it possible to identify the risk control systems, i.e. all the mitigation measures to be put in place. To determine the net risk, the Group then measures the maturity of these systems and the associated controls.

RISK MAPPING METHODOLOGY FOR SUPPLIERS

Supplier risk management is implemented for all Group entities through a common information system. It aims to ensure oversight of the suppliers with whom Crédit Agricole S.A. currently works or wishes to work. Its purpose is to identify and mitigate the purchasing

risks identified, in particular when deciding to establish a new relationship, continue an existing relationship or terminate one. It continuously seeks to improve the effectiveness of avoidance measures.

RISK MANAGEMENT AND SUPPLIER COMPLIANCE PLAN, 360° OVERVIEW

Cross-functional support for Risk, Compliance and External factors - CSR rating

- ▶ Identify suppliers presenting CSR risks
- ▶ Manage remediation in the event of a score < 35

Other Sapin II and Duty of Care screenings

- ▶ Identify suppliers at risk
- ▶ Identify proven cases of corruption, environmental risks, ethics, pollution

International sanctions screening

- ▶ Identify suppliers under sanctions (including OFAC)
- ▶ Block suppliers under sanctions

Financial analyses

- ▶ On request for RFP, OTC and other significant events

Supplier database and IBAN

- ▶ Creation and update of supplier database
- ▶ IBAN verification

Financial health

- ▶ Ensure the supplier's long-term viability
- ▶ Identify high-risk suppliers and those in insolvency proceedings

Concentration risk

- ▶ Identify suppliers representing more than 20% of a purchasing sub-family
- ▶ Establish action plans (actions: buyers/suppliers)

Economic dependence

- ▶ Identify economically dependent suppliers
- ▶ Establish action plans (actions: buyers/suppliers)

Completeness of legal documents

- ▶ Collection, control and reminder system (PROVIGIS and buyers) and database update

Whether or not to continue relationships with third-party suppliers

Supplier knowledge is required to apply the stipulations issued as part of the Sapin II law and duty of vigilance law, and to comply with the regulatory provisions in place as regards international sanctions.

Within Crédit Agricole S.A., this is reflected in:

- The definition of a supplier risk profile and a compliance assessment;
- Screening of supplier data;
- The implementation of vigilance measures, adapted to the degree of criticality of the identified risks.

The management is supplemented by:

- regular checks;
- financial health analysis;
- monitoring of economic dependence;
- verification that all legal documents are in order;
- CSR ratings.

The action plans implemented by Crédit Agricole S.A. as part of the "Responsible Purchasing" programme are monitored by the Purchasing department, which relies on the Group Supplier Risk Committee (GSRC), whose role is to manage risks for all suppliers and, more specifically, to decide on the development of the business relationship with suppliers declared to be at risk or non-compliant. This cross-functional committee meets quarterly to assess risks in financial, ethical, environmental and social aspects. It brings together members of the Purchasing Department Committee, members of the entities' Purchasing departments, as well as representatives from the Compliance, Risk and Sustainability and Impact departments. The decisions of the GSRC apply to all Crédit Agricole S.A. entities.

ESG RISK ASSESSMENT AT THE LEVEL OF PURCHASING CATEGORIES

A) ASSESSMENT APPROACH

The ESG risk management approach led by the Group Purchasing department incorporates elements to identify at-risk purchasing categories and to assess and mitigate these risks during the purchasing process.

The identification of at-risk purchasing categories is based on an ESG risk map covering more than one hundred purchasing categories, drawn up in partnership with several banks in the sector, in collaboration with Afnor. In 2025, Crédit Agricole S.A. adapted this

methodology to the Group's specific characteristics by weighting the risks to take into account the amount of expenditure with suppliers. The purchasing categories are divided into four ESG risk levels (very high, high, medium and low). The risk is analysed according to three parameters that are internal and external to the purchasing categories:

- the supply chain;
- Labour intensity;
- And the business environment in the country concerned by the purchase.

For each purchasing category, these three parameters are each analysed on the basis of the sources of risk in the following 13 areas:

Ethics	Human rights	Environment
<ul style="list-style-type: none"> – Fraud and corruption – Data protection – Property rights 	<ul style="list-style-type: none"> – Health and safety – Working conditions – Discrimination – Modern slavery – Child labour 	<ul style="list-style-type: none"> – Natural resources – Pollution – Biodiversity – Greenhouse gases – Waste, end of life

- The probability of the events occurring and their severity;
- The consequences analysed according to four dimensions (financial, legal, organisational and reputational);
- The causes of the risk, which will be dealt with operationally following recommendations (actions to address the causes, prioritised according to importance).

DIAGRAM ILLUSTRATING THE METHODOLOGY FOR IDENTIFYING THE CATEGORIES DEEMED MOST AT RISK

Summary: Assessment methodology for at-risk purchasing categories

B) RESULTS

In 2025, Crédit Agricole S.A. updated its risk map by confirming the three categories deemed most at risk:

- ▶ construction work;
- ▶ advertising materials;
- ▶ IT equipment,

and adding two new purchasing categories:

- ▶ vehicles;
- ▶ supply of fluids and energy.

For Crédit Agricole S.A., the risks most represented are the risks of fraud and corruption, the risks associated with data protection, and the risks associated with working conditions.

Companies operating in these business sectors are subject to close scrutiny. An analysis of the media coverage of these companies has been established in order to identify any action that is incompatible with current standards, in particular the ILO Declaration on Fundamental Principles and Rights at Work, adopted in 1998. In 2025, this vigilance was extended to the two new categories deemed most at risk and to the top 100 suppliers by expenditure (regardless of purchasing category).

CORRUPTION RISK ASSESSMENT

Crédit Agricole S.A. carries out a corruption risk assessment based on several criteria, such as the supplier's business, its country of origin and the presence of politically exposed persons among its executives.

Following this assessment, companies presenting a risk of corruption are subject to an in-depth analysis. For example, a study of media coverage of the executives and shareholders of these companies is carried out in order to identify any action that is incompatible with current standards (ISO 37001), particularly relating to acts of corruption.

5.3. AVOIDANCE AND REMEDIATION ACTIONS

The Group has identified the main areas in which its activities have a major socio-economic impact and could therefore present material risks to respect for human rights and fundamental freedoms, human health and safety, and environmental protection.

This approach made it possible to identify the following areas of focus:

In employee relations:

- ▶ Maintaining occupational health and ensuring equity in social protection;
- ▶ Ensuring the safety and security of employees;
- ▶ Combating discrimination and the risk of harassment;
- ▶ Maintaining a social dialogue within the Group.

In supplier relations:

- ▶ Ensuring that suppliers with whom we have an established commercial relationship accept commitments related to Crédit Agricole S.A.'s vigilance system for the 13 issues identified, in the context of the contracts signed with them;
- ▶ Identifying and managing significant environmental and social risks in our purchasing, particularly in the five categories identified as higher risk.

In the Group's specific cross-functional activities related to the IT operations and real estate of the Group entities:

- ▶ Reducing Greenhouse Gas emissions from our IT;
- ▶ Safeguarding the health and safety of individuals and reducing the environmental impacts of our real estate activities.

In retail banking activities:

- ▶ Preventing the risks associated with cybercrime and ensuring the security and protection of customers' personal data;
- ▶ Preventing discrimination in access to financial services offered by the Group entities.

In financing and investment activities:

- ▶ On a voluntary basis, in the context of its financing and investments, the Group pays particular attention to the management of climate risks and the risks related to human rights and fundamental freedoms and human health and safety.

5.3.1 IN EMPLOYEE RELATIONS

In its pursuit of continuous improvement and in line with the ambitions defined by the Crédit Agricole Group's new Medium-Term Plan (MTP), ACT 2028, Crédit Agricole S.A. implements measures to avoid or mitigate the risk of serious violations of human rights and fundamental freedoms, as well as occupational health and safety.

The ACT 2028 Medium-Term Plan sets out the Group's strategic fundamentals for the coming years, centred on three key pillars: acceleration, transformation and cohesion. The goal is to become a European leader in new technologies and transitions. In 2025, all Crédit Agricole S.A. entities took measures to prevent and remedy the aforementioned risks, both in France and internationally; the same is true of the entities represented by the International Banking Development Department (DBI), namely the entities in Ukraine, Egypt and Poland.

"Crédit Agricole S.A. signed an International Framework Agreement with UNI Global Union in 2019, followed by a Global Agreement in 2023."

For example, Crédit Agricole S.A. signed an International Framework Agreement with the international trade union federation for the private services industry, UNI Global Union, on 31 July 2019, followed by a Global Agreement on 9 October 2023. The

new four-year agreement reaffirms Crédit Agricole S.A.'s commitment to respect human rights and fundamental social rights, and promotes social dialogue. The agreement also includes: commitments to parenthood, with the introduction of 28 calendar days of fully paid paternity leave for all employees; quality of life at work, by laying down the teleworking principles applicable to all entities; equal opportunities and non-discrimination as well as the inclusion of workers with disabilities.

The agreement also stipulates that, each year, a report on the methods used to draw up the Vigilance Plan and its implementation is presented to UNI for discussion within the framework of the agreement monitoring committee. These are submitted to Crédit Agricole S.A.'s ESG Strategy Committee and may be considered by the aforementioned committee as part of the annual review of the Vigilance Plan. In any event, they will be addressed at the specific meeting devoted to the Vigilance Plan to be held the following year. Lastly, a committee, half of which is made up of UNI representatives and the other half of Crédit Agricole S.A. representatives, is responsible for monitoring the implementation of the agreement. The meeting dedicated to monitoring the Vigilance Plan was held on 23 January 2025. It will focus on the themes covered by the agreement relating to the commitment to human rights, fundamental rights, trade union rights and social dialogue, equal opportunities, non-discrimination, diversity, inclusion, health and quality of life at work.

MAINTAINING OCCUPATIONAL HEALTH AND ENSURING EQUITY IN SOCIAL PROTECTION

"Publication of the Health, Safety & Quality of Life at Work policy on the website"

As regards the health and safety of its employees, Crédit Agricole S.A. ensures that employees in all the countries in which it operates enjoy a working environment that is conducive to their health. Crédit Agricole S.A. published its Health, Safety & Quality of Life at Work Policy on its website in 2024, in which it is reiterated that health, safety and quality of life at work are priorities for the Group.

In this context, the entities implement ongoing prevention, guidance and support initiatives for their employees: free screening campaigns and vaccinations, nutrition, stress management, training and dedicated webinars. For example, CACEIS has launched a campaign to advise staff on ergonomics and organises workshops for the prevention of musculoskeletal disorders, while the Pacifica UES ⁽¹⁾ offers the services of a professional adviser. Employees also have access to counselling services (freephone numbers, 24/7 helpline, occupational psychologists) and a mental health support platform. CAL&F and OLINN have introduced training focused on workplace safety and road safety. Lastly, particular attention is paid to the situation of employees during organisational transformations. Where necessary, support measures are put in place, such as those provided for in collective agreements concluded for that purpose and/or additional training, information, communication and awareness-raising activities.

The entities also focus on actions relating to working conditions in order to remind employees of the right to disconnect, as was the case for the UES SPK/ULP, CA-GIP and CAL&F, or to prevent workplace conflicts, such as at the UES Pacifica, which organised a play. At CA Bank Polska, all employees receive online training on working time rules.

Crédit Agricole S.A. is also actively involved in the social protection of its employees, particularly in matters related to health, retirement, death, and short and long-term disability.

Since 2017, employees have been able to benefit from more favourable supplementary hospitalisation health coverage at the Crédit Agricole S.A. level in France. In 2025, employees in France received six months of free health coverage, followed by a reduction in employee contributions for the last six months of the year. Since 2020, the Take Care programme has provided access to health and death & disability schemes (death, short and long-term disability coverage) for employees of international retail banks situated in two countries (Egypt and Ukraine).

The Global Agreement of 9 October 2023 contains a strong commitment to supporting parenthood. Firstly, it sets out the principle of 16 weeks paid maternity leave for all employees of Crédit Agricole S.A. from 1 January 2021. Secondly, it provides that at the end of its four-year term, all Crédit Agricole S.A. employees will be entitled to 28 days paid paternity leave (these 28 days include the days granted in respect of the birth of a child). Finally, the agreement also recommends that entities introduce measures such as adoption leave, to take into account the different situations of (co-)parenthood.

Crédit Agricole S.A.'s previous Medium-Term Plan (MTP) Ambitions 2025, published on 22 June 2022, confirmed these commitments since one of its targets was to extend paternity leave to all Crédit Agricole S.A. entities before the end of 2025. Lastly, this

agreement includes a major commitment to employee benefits (short and long-term disability, death and health): it calls for an update to the assessment of all employee benefit systems in effect in the entities, carried out during the previous agreement in order to map the practices of Crédit Agricole S.A. entities in relation to their national and professional context. The assessment, carried out in 2021, showed that there had been no failure to comply with local statutory requirements in terms of health and death & disability employee benefits. The results of this analysis conducted in 2024 were shared with the agreement monitoring committee in January 2025. In 2021, a survey conducted in association with Mercer on social security, health and maternity benefits, and on the international roll-out of maternity leave, found that 99.97% of Crédit Agricole S.A. employees were entitled to 16 weeks of maternity leave.

In 2024, in order to pursue its commitment to improving the working lives of its employees, the Group launched a partnership with a global supplier of a digital platform, which allows employees to follow training independently and thus access 22,000 training courses available in 24 languages. This offering complements other available offerings, such as those already offered by the Crédit Agricole Training Institute (IFCAM) for example. In a position of responsibility, each employee thus has the opportunity to play an active role in their professional career. LinkedIn Learning offers personalised training to develop employees' business expertise and soft skills, as well as training to improve working conditions (e.g. training in self-confidence, stress management, conflict management etc.).

Since 2023, employees of Crédit Agricole S.A. whose entities have implemented the "J'agis" programme, governed by the skills sponsorship charter, have been able to take time off work to demonstrate their commitment to social inclusion, the environment and the agricultural and agri-food transitions through skills sponsorship. Alongside all the aforementioned measures, it should be noted that, as Crédit Agricole is a cohesive, decentralised Group, "operational" avoidance and safety measures are adopted and implemented by the entities, according to their own activities.

ENSURING THE SAFETY AND SECURITY OF EMPLOYEES

The Group seeks to ensure the safety and security of its employees and of visitors, customers and service providers at its facilities.

"An internal Safety-Security procedure in line with the Group's security policies"

The DSS (Direction Sécurité-Sûreté – Physical Security And Safety Department), which reports to the General Secretariat, coordinates and oversees the Physical Security and Safety business line. This includes all Security and Safety Prevention Managers (Responsables sécurité-sûreté prévention – RSSP) within each entity and relies on discussions with other departments involved in crisis management, where necessary.

The DSS analyses and monitors any security threats and risks faced by Crédit Agricole Group in coordination with the national security authorities in France and abroad. It determines and disseminates the operational security policies, which are complemented by action plans such as the Special Security Plan or the containment plan.

To prevent physical risks that could affect people and property, the DSS is involved in developing the crisis management system coordinated by the team tasked with overseeing control systems within the Operational and IT Risks department of the Group Risk department. This is in charge of the business continuity plan, including emergency response procedures in the event of a crisis.

(1) UES: corporate entity.

The Group's security strategy regarding physical safety is based on risk prevention by training employees to enable them to adopt appropriate behaviour and acquire effective safety practices.

To this end, three training courses, in the form of e-learning modules, are offered to all employees:

- the first, mandatory since 2018, covers what to do in the event of a terrorist attack. This was submitted by the DSS to the Consultation Committee, composed of representatives from the trade unions represented within Crédit Agricole S.A.;
- the second, on what to do in the event of an emergency such as a fire, was approved by the Group Security Committee and has been mandatory since the end of 2020 for all employees of Crédit Agricole S.A. and its subsidiaries;
- the third, which aims to train all Group employees who are called upon to become guides and end-of-line marshals in the event of a fire, is entitled "Becoming an evacuation officer". This training module was made available to all entities, as well as to the Regional Banks, for distribution to their employees in mid-November.

Fire prevention awareness actions are carried out at the Group's sites, alongside regulatory evacuation drills, and "evacuation team member" training is offered to staff volunteers.

Since 2022, the Group entities have organised a joint initiative to mark the World Day for Safety and Health at Work. The DSS is in charge of coordinating the safety part.

Nearly a thousand employees were able to take part in the many workshops organised for them.

"Safety Days in all Group entities"

These Safety Days were repeated in 2025 and expanded to as many Group entities as possible, including at the regional level.

Keeping employees informed is also a major objective.

To reinforce the safety culture within the Group, the DSS runs a dedicated page on the Group's Intranet. Videos on safety and health rules are available and have also been distributed via campus information media.

In terms of security, the Group is developing a strategy based on anticipation, support and equipment.

A support system is in place for employees travelling internationally and for expatriates, with the help of specialist service providers.

The DSS (Direction sécurité-sûreté – physical security and safety department), carries out a country risk assessment, regularly updated based on information provided by its risk analysis providers, the Ministry for Europe and Foreign Affairs and its local contacts.

Crédit Agricole S.A. employees who travel to high-risk destinations and book their hotels, flights, train tickets etc. through the Group's travel agents are subject to recommendations before their departure and during their stay. Depending on the local situation, they are offered a secure reception area or any other solution that reduces the risk to a minimum.

As soon as the DSS is informed of an expatriation, international corporate volunteer service or short or medium-term assignment, it interviews the employee before their departure and issues recommendations on health and safety as well as assistance with settling in and living in the country.

When executives travel to high- or moderate-risk destinations (health, security, safety or the capture of sensitive information etc.), an appropriate security system is put in place.

Employees thus benefit from assistance with their business or private travel, organised by the Social and Economic Committee of the entities and subsidiaries, as well as telephone support seven days a week, 24 hours a day, in the event of traumatic events (terrorist attacks, industrial disasters, climatic events etc.).

Crédit Agricole S.A.'s establishments abroad have a formal, up-to-date security plan (which, depending on the context, may range from regrouping to evacuation) and a security system adapted to the local situation.

COMBATING DISCRIMINATION

"Crédit Agricole S.A. has been a signatory of the Diversity Charter since 2008 and has also signed up to the Women's Empowerment Principles"

Diversity and inclusion occupy a major place in Crédit Agricole S.A.'s strategic plan, in line with its commitments and actions over the past 15 years. A signatory of the Diversity Charter since 2008, Crédit Agricole S.A. is committed to promoting diversity and gender equality. Since 2022, Crédit Agricole S.A. has adopted an approach in line with the Human-centric Project and the MTP (Medium-Term Plan) in order to strengthen its inclusive culture. Echoing its commitments, since 27 July 2022 Crédit Agricole S.A. has also been a signatory to the United Nations' Women's Empowerment Principles (WEP) to help promote gender equality. Crédit Agricole S.A.'s diversity policy encompasses multiple criteria (gender, age, disability etc.) and makes equal opportunities the priority principle in all its management and HR processes. **It is also based on the principle of non-discrimination set out in the Group's Code of Ethics and the entities' Codes of Conduct.**

In support of this, the integration of career and age diversity is formalised by agreements in entities on topics such as non-discrimination in recruitment, training, promotion, compensation and work-life balance.

The entities are also committed to addressing diversity through training and anti-discriminatory practices when hiring (e.g. UES⁽¹⁾ Spirica/UAF Life Patrimoine, CA-GIP, UES PACIFICA, UES CAI, CAL&F and OLINN), sexism in the workplace (e.g. CA-GIP, CAL&F and OLINN) and psychological and sexual harassment (e.g. CAL&F and OLINN). Some have also appointed support officers for sexual harassment and sexist behaviour in the workplace, as UES CAI did. In addition, CAL&F and OLINN have adopted a specific procedure for handling reports of harassment. CACEIS has a charter for preventing and dealing with psychological and sexual harassment and sexist behaviour, while CA Bank Polska has a policy to prevent psychological harassment and discrimination, which includes a whistleblowing procedure. CA Bank Polska has also introduced dedicated channels to report inappropriate behaviour at work and has set up a special committee to investigate this type of behaviour. In addition, CA Egypt employees have all been trained on the Code of Conduct so that they understand its guiding principles and their rights and obligations as employees.

(1) UES: corporate entity.

“Crédit Agricole S.A. is a signatory of the Parenthood Charter”

In May 2022, Crédit Agricole S.A. renewed its commitment to parents in the workplace by signing the new Parenthood Charter. Under this Charter, Crédit Agricole S.A. undertakes in particular to respect the principle of non-discrimination against parent-employees in their careers. Finally, training and awareness-raising activities are implemented within Crédit Agricole S.A., the annual indicators of which make it possible to monitor the results. In order to help reduce unjustified wage gaps between women and men, a gender equality index has been created pursuant to the Law of 5 September 2018 on the freedom to choose one's professional future. This index makes it possible to measure progress in this area and, if necessary, to implement corrective actions. Thanks to its commitments and initiatives in the area of gender equality at work, Crédit Agricole S.A. Parent Company once again obtained scores well above the regulatory requirements at 31 December 2025 with a score of 90/100.

“Crédit Agricole S.A. has published a diversity policy”

In 2024, Crédit Agricole S.A. confirmed all of its commitments to diversity and inclusion in a diversity policy, co-developed by around fifty employees. This policy, which can be consulted on the Crédit Agricole Group website, emphasises the importance that Crédit Agricole S.A. attaches to diversity in all business lines and at all levels of the organisation by promoting inclusion. It reiterates the five commitments made by Crédit Agricole S.A.:

- Equal opportunities: giving all employees, no matter who they are, the same opportunities to access positions, promotions and benefits on the basis of their skills and performance;
- Openness and curiosity: taking an interest in others, being open to differences, raising awareness and understanding of the diversity policy and highlighting its benefits to ramp up and reinforce an inclusive corporate culture;
- Representativeness: reflecting our customers and our ever-changing society, taking into account a number of criteria (age, disability, gender equality), in all business lines and at all levels of the organisation;
- Solidarity: placing mutual aid and collaboration at the heart of our policies, through internal actions and external initiatives;
- Responsibility: making the promotion of diversity everyone's business.

The global agreement of 9 October 2023 also provided for concrete measures applicable at each stage of the career path to ensure gender equality.

During “Diversity Month”, several initiatives were launched at CA Egypt to ensure effective diversity and inclusion awareness, such as LinkedIn courses, classroom sessions and diversity competitions.

“Crédit Agricole S.A. has signed its seventh disability agreement for the period 2023–2025”

Finally, the Global Agreement confirms the Group's commitment to the employment and integration of people with disabilities. This commitment is the subject of a proactive policy under three-year agreements. The number of people with disabilities hired and the volume of purchase contracts signed with the sheltered and disability-friendly sector are monitored annually through the indicators. This commitment is visible within the various entities, for example with awareness-raising and communication initiatives during European Disability Employment Week (EDEW) at the UES CAI and CAL&F, the publication of a disability guide by the UES Pacifica, the appointment of disability officers at the UES CAI, or the granting by the UES CASIM of a maximum of two days of leave per year so that employees who need to can complete the necessary procedures – including medical formalities – to obtain and renew their Disabled Worker Status.

The French law on the freedom to choose one's professional future, which came into effect on 1 January 2020, put an end to “registered” agreements on the employment of people with disabilities. Under those agreements, contributions to Agefiph, a French government agency promoting the employment of disabled people, could be internalised. Companies now have to pay their contributions directly to this agency. In view of these changes, Crédit Agricole S.A. was keen to reaffirm its commitment to inclusion by signing its eighth disability agreement – and its first “non-registered” agreement – with staff representatives for the period 2025–2028. Under this eighth agreement, Crédit Agricole S.A. has pledged to recruit 200 people with disabilities by 2028, including at least 70 on permanent contracts and 50 work-study students (on apprenticeship contracts and professional training contracts). The aim to achieve one third of this target each year, all contracts combined. Moreover, Crédit Agricole S.A. has also set itself the target that no business line should have an employment rate of less than 3.5% when the agreement expires. They must also step up efforts to promote inclusion, in particular through employee training and awareness-raising and by supporting people with disabilities when taking up their post or moving to other roles.

Since the first agreement was signed in 2005, the employment rate of people with disabilities has increased from below 2% in 2005 to 6.22% in 2025 ⁽¹⁾, and the volume of purchases from inclusive corporates has increased sixfold over the same period. In 2025, Crédit Agricole S.A. hired 84 employees with disabilities, including 41 on permanent contracts.

MAINTAINING A SOCIAL DIALOGUE WITHIN THE GROUP

Crédit Agricole S.A. gives priority to social dialogue within the framework of freedom of association and negotiation through its Group Human Resources department and representatives of the Human Resources business line in each entity.

As stated in the Global Agreement, Crédit Agricole S.A. considers the exercise of trade union, employee representation and collective bargaining rights to be a fundamental right that it respects and encourages.

(1) Figures at 31 December 2025.

“Crédit Agricole S.A. has published its HR policy on social dialogue”

In 2024, through the publication of its HR Policy on social dialogue on the Crédit Agricole Group website, Crédit Agricole S.A. reaffirmed its commitment to developing and maintaining a rich social dialogue, via Group and local bodies, and through negotiations between trade union organisations and Crédit Agricole S.A.

The organisation of this dialogue takes into account the large number of Crédit Agricole Group sites in Europe. Fourteen countries (representing more than 90% of the Group's employees) are represented on the European Works Council, which meets annually; similarly, in France twice a year, employee representatives and Executive Management discuss the Crédit Agricole Group's strategy and social and economic situation.

Two other bodies are responsible for maintaining social dialogue throughout the Crédit Agricole S.A. scope:

- The Consultation Committee, where executives present and discuss, with employee representatives, strategic issues common to the Group's business lines and entities, in particular their economic, financial, legal and social aspects;
- Trade union representatives: under the agreement establishing the Consultation Committee, these representatives meet with Management on a monthly basis to encourage local social dialogue on all of the above issues. Trade union representatives regularly discuss the situation in Ukraine. Given the importance of the role played by trade unions in the life of the Group, on 8 March 2019 Crédit Agricole S.A. signed an agreement on the career path of staff representatives which aims to enhance the performance of their duties throughout their professional careers. Through this agreement, Crédit Agricole S.A. Parent Company is committed to promoting the attractiveness of trade union and elected positions among employees in its different entities.

In accordance with the provisions of the Group agreement on the career path of employee representatives concluded on 8 March 2019, Crédit Agricole S.A. is also committed to promoting equal access for women and men to trade union and elected positions and to combating all forms of discrimination in the exercise of such functions. Social dialogue training provided within Crédit Agricole S.A. to employees, managers and employee representatives since 2021 has been extended to 2025.

5.3.2 IN SUPPLIER RELATIONS

ENCOURAGING SUPPLIERS TO ADHERE TO THE VIGILANCE MEASURES IMPLEMENTED BY CRÉDIT AGRICOLE S.A. ON THE 13 ISSUES IDENTIFIED

“Crédit Agricole Group has published its Responsible Purchasing policy”

Crédit Agricole Group has implemented a “Responsible Purchasing” policy. It aims to ensure that when making a purchase, consideration is given to whether there is an actual need for the item, and to its economic aspects, with a view to optimising value for money. This policy is set out in a “Responsible Purchasing” programme, rolled out within Crédit Agricole S.A. and its subsidiaries in France and abroad.

The missions of the Group Purchasing department are based on four main pillars:

1. amplifying the Group's performance through the competitiveness of purchases;
2. containing and anticipating risks;
3. transforming purchasing into a responsible act; and
4. excelling relationally and operationally.

The Group Purchasing Department is composed of five divisions, including a CSR division.

The Purchasing business line is composed of all buyers of Crédit Agricole Group and their managers, purchasing assistants, purchasing support teams, including those in charge of its information system and the analysis of supplier risks. This business line has the role of designing and overseeing the daily operation of the Group purchasing system. It is coordinated by the Group Purchasing department.

The strategy and decisions affecting the Responsible Purchasing Policy are the responsibility of the Strategic Purchasing Committee, a cross-functional body at Group level. This body is composed of a Regional Bank Chairman, Chief Executive Officers of the subsidiaries of Crédit Agricole S.A. and Regional Banks, and representatives of the Fédération Nationale du Crédit Agricole (FNCA) and of Crédit Agricole S.A.;

“Crédit Agricole S.A. has been awarded the Responsible Supplier Relations and Purchasing label with a “conclusive” level of assessment in accordance with the ISO 20400 standard”

As a result of the “Responsible Purchasing” programme, overseen by the Group Supplier Risk Committee (GSRC), Crédit Agricole S.A. and its subsidiaries have been awarded the “Responsible Supplier Relations and Purchasing” label by the French Ombudsman and the French National Purchasing Board (CNA), which includes the requirements of the ISO 20400 standard.

Crédit Agricole S.A. includes clauses in its contracts allowing suppliers to commit to the principles set out in the “Responsible Purchasing” Charter, an initiative common to a number of local banks and insurance companies, as well as a specific clause on respect for social and human rights. A permanent control metric has been implemented within Crédit Agricole S.A. to ensure that this clause is included in all supplier contracts.

ASSESSING AND MANAGING SIGNIFICANT ENVIRONMENTAL AND SOCIAL RISKS IN OUR PURCHASING

A) CSR ASSESSMENT PROCEDURES FOR SUPPLIERS

The CSR performance of suppliers is assessed at least during the tender phase and during dedicated assessment campaigns. Its weighting was increased in 2025, from 15% to at least 20% of the supplier's overall assessment score during the tender phase. Suppliers are evaluated on the basis of four key criteria:

- Environmental and social performance (assessment carried out by a third party and entrusted to EcoVadis);
- Inclusive approaches;
- Commitments to decarbonisation;
- Risks specific to the purchasing category concerned (based on Afnor CSR risk mapping).

The CSR supplier assessment system can be supplemented by on-site audits initiated in partnership with three other banks and carried out by an external auditor. The on-site audit process covers human rights, health and safety, and the environment, particularly for at-risk purchasing categories common to the banking sector.

B) ADDITIONAL TERMS AND CONDITIONS RELATING TO PURCHASING CATEGORIES DEEMED MOST AT RISK

The CSR performance of suppliers belonging to purchasing categories deemed most at risk is subject to stricter procedures:

- Rating by a third party is mandatory. If a supplier refuses this assessment, no contract can be awarded.
- **The weighting of the CSR performance was increased in 2025 from 20% to 30% of the supplier's overall assessment score during the tender phase.**
- For companies in the categories deemed most at risk and for the top 100 suppliers by expenditure, media coverage of their executives and shareholders is analysed to identify any conduct that does not comply with the duty of vigilance law.

C) IMPLEMENT A LOW-CARBON PURCHASING PATHWAY

The low-carbon purchasing pathway project contributes to the Group's aim of "Acting for the climate and the transition to a low-carbon economy" and forms an integral part of the environmental aspect of the Group Responsible Purchasing Policy. Scoping work led to an initial measurement of the carbon footprint of purchases of goods and services (scope 3.1) based on external expenditure mainly associated with monetary emission factors (from ADEME) for the entire Crédit Agricole Group. This initial measurement identified the most emissions-intensive purchasing categories.

On the basis of this work and within the scope of Crédit Agricole S.A., the Group Purchasing department defined a target. This target is based on the requirements of science-based methodologies (e.g. SBTi) specific to financial institutions for scope 3 categories 1-14 (non-financial footprint). Crédit Agricole S.A. is committed to making 40% of its external expenditure with suppliers who have adopted science-based reduction targets by 2027. In parallel, a roadmap is being developed, based on three projects:

1. Framing and implementing emissions reduction by supporting all the players in the purchasing ecosystem in an adapted and harmonised system;
2. Measuring and reporting emissions reductions taking into account reporting requirements;
3. Defining and managing a governance system with the stakeholders and partners in the project.

In order to meet these challenges, new training modules have been added to the business line's professional development programme:

- a series entitled "La Casa des Achats Responsables" was created and distributed to all employees of the business line. This awareness-raising tool, consisting of several seasons and episodes, is designed to address the main themes of the Societal Project: season 1 entitled "CSR", season 2 entitled "Decarbonisation" etc.;
- most employees from the Purchasing business line also attended the La Fresque du climat training. This was an opportunity for them to understand the causes and consequences of climate change;
- in addition, one 1.5-hour training module was offered to all buyers on the decarbonisation of purchasing ("Decarbonisation challenges and my role as a buyer").

To help its SME suppliers commit to sustainability, Crédit Agricole S.A. has joined the Alliance for SME Decarbonisation initiative, led by Pacte PME alongside several major French groups. It supports SMEs in their carbon reduction pathways by offering them dedicated programmes.

Finally, Crédit Agricole S.A. has joined the "Achats 2030" collective, made up of 30 players committed to the environmental transition: seven French banks/insurers, 12 strategic suppliers, and independent experts. The collective aims to standardise carbon accounting for purchases, identify decarbonisation levers, and widely share its deliverables. In 2025, work focused on payment instruments, intellectual services, networks/telephony and transport/freight.

For the first time in 2025, Crédit Agricole S.A. was included in the Carbon Disclosure Project's (CDP) Supplier Engagement Assessment A list (the CDP is an international non-profit organisation that manages one of the world's largest environmental databases and measures the ability of undertakings to effectively take action on climate issues, with ratings from A to D). The Group was recognised for its actions to engage its suppliers (rated B in 2023, then A- in 2024).

D) TRAINING FOR BUYERS

A training programme dedicated to CSR applied to purchasing is offered to all buyers. This programme includes:

- An e-learning which provides good CSR habits as part of the purchasing process;
- a responsible purchasing training module designed for newcomers within the Purchasing business line;
- a training module on knowledge and management of supplier risks (KYS);
- an awareness webinar on the Vigilance Plan.

5.3.3 IN CREDIT AGRICOLE S.A. ENTITIES' SPECIFIC ACTIVITIES RELATED TO IT OPERATIONS AND REAL ESTATE

REDUCING GREENHOUSE GAS EMISSIONS FROM OUR IT

Every year, the Crédit Agricole Group measures the carbon footprint of its IT infrastructure and equipment using Ademe's Bilan Carbone method.

This method makes it possible to quantify all the direct and indirect greenhouse gas emissions generated by its activity and to define the priority levers for action to reduce them. Carbon emissions from the Group's main production centre, Crédit Agricole Group Infrastructure Platform (CA-GIP), amounted to 63,521 tCO₂e in 2024 (70,564 tCO₂e in 2023).

The Group's two main data centres are at the cutting edge of technology in terms of energy optimisation, as evidenced by their ISO 50001 certification, and their water consumption levels are particularly low (WUE – Water Usage Effectiveness): 0.003 litres per kWh for one and 0.026 litres per kWh for the other.

An environmental management platform (Green Pact) is gradually being rolled out to allow a more granular assessment of the impact of IT products and services used within the Group (including the carbon footprint of IT equipment and waste from electrical and electronic equipment). CA-GIP's IT infrastructure product catalogue has a carbon footprint assessment method certified to ISO 14064-3 standards. Teams are being trained in the eco-design of IT infrastructure.

When purchasing "workstations" for the Group, it was essential in the call for tenders to cover specific carbon footprint-related topics.

New CSR and responsible digital criteria grids have been used to inform suppliers of our expectations. For equipment purchases, specific questions concerned the following points, for example (non-exhaustive list):

- End-of-life management policy (process, partners, reuse/recycling rate);
- Length of time spare parts will be available;
- Innovations to reduce the environmental footprint of services/equipment; commitments in terms of equipment energy efficiency;
- Equipment manufacturing, assembly and storage locations.

"CAGIP, the IT subsidiary of Crédit Agricole S.A., has been awarded the Level 2 Sustainable IT label"

In July 2024, CA-GIP was awarded the Level 2 Sustainable IT label by the INR (French Institute for Sustainable IT) and the agency LUCIE. This label attests to the level of maturity this entity has achieved in terms of responsible IT, but also attests to an ambitious action plan on the subject for the next three years.

SAFEGUARDING THE HEALTH AND SAFETY OF INDIVIDUALS AND REDUCING THE ENVIRONMENTAL IMPACTS RELATED TO OUR REAL ESTATE

CA Immobilier is a global player in the profession, through its commercial and residential real estate development activities, as well as service business lines aimed at both individuals and large institutions. Services to individuals and residential development activities are provided to customers outside the Group. Commercial development and institutional servicing activities are carried out on behalf of internal customers of the Group and on behalf of external customers.

The identified risks are centred on two fundamental areas related to health and safety as well as environmental impacts for development, renovation and day-to-day management operations:

- Human safety: occupants, staff and subcontractors (construction accidents, falls, operating accidents etc.);
- Impacts on the environment and/or people through exposure to pollutants and their treatment, waste management through monitored processes and the impact on biodiversity.

CA Immobilier encompasses these issues through a targeted policy and comprehensive coverage of safety risks. The entire safety and security system for development, construction and renovation operations, whether as part of development operations or operations carried out on the managed building stock, was completely overhauled in 2023 and 2024 to address all the populations concerned throughout the entire scope:

- Avoidance among its employees (recurrent awareness-raising and equipment for employees);
- Particular attention paid to safety, security and avoidance for those involved in the operation and for the impacts of the operation on its external scope.

CA Immobilier addresses environmental issues through a range of measures:

- The handling, prior to operations, of biodiversity issues through services regularly provided by an ecologist;
- The progressive implementation of reuse practices, and the use of such measures for both the decommissioning and construction/renovation phases;
- Promotion of the use of the shortest circuits for materials: local channels, bio-sourced materials;
- Promotion of the lowest-carbon energy vectors: removal of gas boilers, regular feasibility studies and suitability of geothermal solutions.

CA Immobilier also addresses these dimensions, environmental impacts and safety, through the selection of companies that have the skills and the strength to meet these challenges.

The supplier selection process follows a strict framework, which consists of selecting and rating suppliers, whether recurrent or occasional, analysing them in terms of their financial aspects (Batika rating, tax data), environmental aspects (EcoVadis rating) and a set of ESG criteria (e.g. Responsible Purchasing Charter and human rights clause in contracts). In addition, each of these suppliers is asked to regularly update these elements, as well as their legal documents, via a specific platform.

CA Immobilier's internal system includes screening as soon as the purchase order is signed, via a direct interface with the Group's screening tool. This interface allows – as soon as the purchase order is received and before any funds are paid – real-time screening of suppliers and all their affiliated third parties against international sanctions lists (asset freezes, bad guys etc.) and politically exposed persons. Our supplier screening system also relies on the detection and regular review of adverse news.

5.3.4 IN RETAIL BANKING ACTIVITIES

In its business of distributing financial and insurance products and services to its direct customers, Crédit Agricole S.A. has identified two areas requiring particular vigilance.

REDUCING THE NEGATIVE IMPACTS RESULTING FROM CYBERCRIME AND ENSURING THE PROTECTION OF PERSONAL DATA

The cybersecurity governance of the Crédit Agricole Group is based on a structured system, overseen at the highest level of the Group by the Board of Directors and the Group Security Committee, ensuring strategic alignment and cyber risk management. As part of its “ACT 2028” Medium-Term Plan, the Crédit Agricole Group is placing cybersecurity and IT resilience at the forefront of its strategic priorities, building on the efforts initiated with the “IT 2025” programme.

The regulatory framework (ISSP, domain policies, standards), revised annually, defines the common requirements for IT system and data protection for all entities within the scope of consolidation. The internal control system, with three lines of defence, ensures continuous, independent and audited supervision of cyber risk management. IT system and data protection is based on a set of technologies, processes and skills, including strict access controls, strong authentication, system partitioning, encryption depending on the sensitivity of the information and its continuous improvement. The supervision of service providers and outsourced services has been strengthened as part of DORA compliance. ICT security is regularly assessed and is governed by a contractual framework. Dedicated operational capabilities (CERT, SOC, cyber defence operations centre) allow the anticipation and detection of and rapid response to incidents to limit the impacts. Continuity and resilience systems (BCP, regular tests, crisis scenarios) ensure the availability of essential services in the event of a cyberattack. Lastly, employee and customer awareness actions help reduce human risks and maintain stakeholder confidence.

“Crédit Agricole S.A. has adopted a Personal Data Charter (GDPR)”

In terms of personal data protection, the Group has adopted a Personal Data Charter in line with the European Regulation on the Protection of Personal Data (GDPR), which came into force in 2018. Drawn up after consulting with a sample of customers, the Charter is based on four key principles (data security, loyalty, information on data use, control of data by customers).

The Group's entities have standards, tools and control systems designed to improve the management and protection of the personal data of customers, employees and third parties (suppliers, agents etc.). This body of standards is regularly updated to take account of new regulations and case law, the decision-making practice of regulators and various situations that the Group has had to deal with. Employee training on the protection of personal data is mandatory and is continuously adapted.

AVOIDING DISCRIMINATION IN THE ACCESS TO FINANCIAL AND INSURANCE PRODUCTS AND SERVICES AND SUPPORTING THE MOST FINANCIALLY VULNERABLE CUSTOMERS

In addition to its obligations under the 2017 law, the Group is committed to a societal approach to help the most financially vulnerable customers find solutions better suited to their situation. In order to prevent the risk of discrimination in access to financial and insurance services, the Group has been committed for several years to a process of financial inclusion and support for the most financially vulnerable customers. The Group is thus committed to preventing over-indebtedness and undertakes to improve access to credit and insurance for those customers. As an illustration, LCL is developing banking products and services that meet the needs of the most financially vulnerable customers, such as students and young workers, or anyone interested in such products and services. For everyday banking, LCL Étudiant offers students preferential card fees (either no fees or a monthly fee of €5), depending on the student's profile and the card taken out. LCL Essentiel, which is more accessible, includes an international cash withdrawal and payment card, a mobile app and a dedicated branch advisor with no account maintenance fees, for €2 per month. Lastly, financially vulnerable customers have access to a specific product, LCL Initial, which includes tailor-made services for a moderate fee.

To prevent and manage situations of over-indebtedness, support measures (a personalised support agency, a national unit and an adapted offer) have been set up by Crédit Agricole Personal Finance & Mobility and LCL; these can be offered to customers when a situation of financial vulnerability is detected. At LCL, for example, advisers have tools at their disposal to detect customers in vulnerable situations during “Budget Meetings” and offer them solutions tailored to their circumstances. If necessary, advisers can also refer customers to the “LCL Parenthèse” support unit for a personalised budget assessment.

In addition, LCL has developed a product (LCL'Aide) to help victims of economic violence regain their financial independence. LCL'Aide offers, for up to 24 months, an individual bank account, a debit card with systematic authorisation, an exemption from account maintenance fees, personalised support with a dedicated team, and access to the LCL Mes Comptes app and the customer area of the LCL.fr website.

Since 2013, Crédit Agricole Personal Finance & Mobility (CAPFM), a pioneer in this field, has offered a scheme to prevent customers from getting into debt. This supports customers who show signs of being in financial difficulty or who meet the criteria, and who are identified as “at risk”. The implementation of the Consumer Credit Directive II in November 2026 will require the extension of this approach to all European business units of CAPFM. It is also worth noting that, in January 2023, CAPFM introduced a group-wide scheme to prevent late payment among customers identified as “potentially vulnerable”. These customers are contacted to find out whether they are experiencing financial difficulties and can be offered solutions where necessary.

The Crédit Agricole Group has launched actions to ensure digital accessibility, including adapting digital services for people with disabilities. Crédit Agricole's corporate websites are gradually being updated for this reason. This topic is co-sponsored by IT and the Group Compliance department; and a coordination committee composed of accessibility officers within the Group's entities completes the system.

Within Crédit Agricole Assurances, Pacifica's health insurance products for private individuals are responsible and socially inclusive: there is no medical screening, the coordinated healthcare programme is followed, a minimum refund applies in compliance with controlled rates, and preventive treatment is covered. In addition, its health insurance products have included full healthcare cover since 1 January 2020, to ensure "zero out-of-pocket payments" for our customers and thus avoid any failure to seek treatment for financial reasons. Pacifica is the delegated manager of the supplementary health insurance programme for

low-income households (resulting from the merger in 2019 of the ACS and CMU-C schemes), with a single, regulated level of cover, free of charge or with an equity investment. Crédit Agricole Assurances also abides by the AERAS agreement, which facilitates access to insurance and loans for persons who currently have or have had serious health problems, and offers adapted policies through its loan insurance subsidiary CACI.

With its "Essentiel" package, LCL offers inclusive home insurance for its most economically disadvantaged customers, whether they are tenants or homeowners. It offers essential cover without sacrificing the basics such as third-party liability, fire and water damage. It also responds in the event of major disasters thanks to the "special hardship" programme, for example by covering rent or the mortgage.

The Crédit Agricole Group contributes more specifically to financing social housing.

5.3.5 IN FINANCING AND INVESTMENT ACTIVITIES

OUR SECTOR-SPECIFIC CSR POLICIES

"Crédit Agricole S.A. has adopted sector-specific policies for its financing and investment activities"

The sector-specific policies implemented by Crédit Agricole for the past several years specify the rules of intervention and social and environmental criteria introduced into financing and investment policies. They reflect the main issues related to the fight against climate change, the protection of the environment and the preservation of biodiversity, as well as respect for human and social rights. Twelve CSR sector-specific policies are now being implemented:

- **Transport:**
 - **Aerospace (2022):** the aerospace sector presents a number of environmental, social and safety issues, particularly in terms of greenhouse gas emissions. Safety issues are also important aspects of this policy.
 - **Maritime sector (2021):** the merchant navy sector poses various environmental, social, health and safety issues. The environmental impacts concern CO₂ emissions, as well as emissions of other pollutants (SO₂, NO_x, black carbon, degassing etc.), accidental pollution (by hydrocarbons or other spills), the nature of antifouling coatings, ballast water management and ship recycling and dismantling. The main social issues concern safety at sea, working conditions and crew training.
 - **Road transport (2025):** the road transport sector accounts for nearly 11% of global greenhouse gas emissions. This sector also contributes significantly to air pollution. Transportation, particularly the automotive sector, raises issues of inclusion, including risks associated with working conditions, illegal work, forced labour and child labour.
- **Energy:**
 - **Oil and gas (2024):** oil and gas activities can generate critical negative environmental and social impacts. These include impacts in terms of biodiversity (impacts on natural or critical habitats, as well as ecosystem services) and social impacts (physical and economic displacement of populations, health and safety of communities).
- **Thermal coal (updated 2024):** coal has the highest carbon content of any fuel, and the greenhouse gas (GHG) emissions it produces make it the main driver of climate change.
- **Electricity (2025):** global electricity generation will play a crucial role in decarbonising the economy, by combining improved energy efficiency in industrial and residential processes with energy restraint. Based on the work of the Intergovernmental Panel on Climate Change (IPCC), the United Nations Framework Convention on Climate Change (UNFCCC) has affirmed the need for global progress towards a low-carbon economy to combat global warming, and in particular to promote the transition to an electricity generation sector with significantly lower greenhouse gas emissions. Lastly, the energy transition must also be socially just, offering less affluent segments the means to take part. The rollout of new facilities and network adaptation must be accompanied by cost control to gain public acceptance.
- **Nuclear energy (2022):** nuclear energy raises a number of highly complex issues (safety, waste management etc.). Consideration is being given to the following environmental and social aspects in particular: impact of the extraction and discharge of water used for cooling; potential impact on critical natural habitats; resettlement or involuntary economic displacement caused by loss of land or property.
- **Construction:**
 - **Transport infrastructure (2024):** the construction, expansion and operation of this infrastructure can have negative impacts on biodiversity (ecosystem fragmentation, water and air pollution) and human rights (physical and economic displacement of populations, treatment of workers etc.). They are also often the source of nuisance, especially noise.
 - **Real estate (2022):** construction, restructuring, rehabilitation and exploitation of real estate assets can be a source of negative environmental impacts (greenhouse gas emissions, ecosystem disruption, water and air pollution) and human rights (physical and economic displacement of populations). They are also often the source of nuisance during works, especially noise.

- **Agriculture and forests:** deforestation and ecosystem conversion (2024). Activities in the forestry/timber sector and the production of agricultural raw materials at risk of deforestation can generate negative environmental impacts (forest degradation, soil erosion, climate, biodiversity loss, air, water and soil pollution, failure to ensure animal welfare) and social impacts (working conditions, illegal work, forced labour, child labour, indigenous peoples).
- **Extractive industries:** mining and metals (updated 2024). Mining and metallurgical activities can generate critical negative environmental and social impacts. These include impacts in terms of greenhouse gases, biodiversity (impacts on natural or critical habitats and ecosystem services), as well as social impacts (physical and economic displacement of populations, health and safety of communities).
- **Defence and security (updated 2025):** the defence industry and arms trade pose specific risks, long recognised by the international community, including corruption and unlawful taking of interest, diversion and trafficking of weapons, proliferation of weapons of mass destruction, intrinsic inadequacy of certain weapons under international humanitarian law, additional burden on public finances, particularly for developing countries, illicit accumulation of weapons that may supply organised crime networks or contribute to terrorism or the destabilisation of governments, use for internal repression, international aggression or serious violations of international humanitarian law, contribution to regional instability. The sector-specific policy on "defence and security" covers the arms sector, with exclusions in line with international treaties.

For example, LCL has adopted a system for incorporating ESG into its financing decisions, including the means of identifying sensitive activities, a specific escalation process and governance dedicated to the analysis of ESG criteria.

An ESG Integration Guide was drawn up to promote the operational implementation of ESG criteria integration in all the entities' processes. It presents, in a simple and comprehensive manner, the principles of integrating ESG considerations into the operations of a banking institution, focusing on the current positioning of Crédit Agricole Group.

PREVENTING THE NEGATIVE ENVIRONMENTAL AND SOCIAL IMPACTS ASSOCIATED WITH OUR FINANCING AND INVESTMENTS

For several years, the Group has been committed to an approach that integrates ESG risks into its decision-making criteria.

INVESTMENTS

"Amundi has adopted a responsible investment policy"

Amundi provides asset management services and is regulated by the French Financial Markets Authority. Amundi is authorised to carry out third-party portfolio management, in which it manages portfolios according to active management strategies (i.e. Amundi invests in financial instruments at its discretion within a given regulatory and contractual framework), or passive management strategies (i.e. Amundi invests in specific financial instruments enabling it to replicate an index designed and administered by a third party).

In particular, as a signatory of the Principles for Responsible Investment (PRI), a voluntary initiative launched in partnership with the United Nations Environment Programme and the United Nations Global Compact in 2006, Amundi includes environmental, social and governance criteria in its investment analyses and decisions, in addition to financial criteria. Amundi has a general responsible investment policy which is published on its website. This includes:

- a systematic ESG analysis of companies, represented by a proprietary ESG rating, consisting of several criteria based on both international standards and the assessments of recognised rating agencies, which takes into account major environmental, social and governance issues such as the fight against pollution, the environmental transition and respect for human rights;
- the distribution of ESG ratings to all managers and awareness-raising and training initiatives for all employees;
- the exclusion of issuers (corporate and sovereign) that do not meet the environmental, social and governance (ESG) criteria set out in Amundi's general responsible investment policy, which is designed to be consistent with the Group's sector-specific policies. These rules apply to all active management strategies (where Amundi has full discretion), as well as to passive ESG funds. However, they do not apply to non-ESG passive funds, in order to comply with the regulations applicable to this type of fund, as mentioned in their regulatory documentation;
- dialogue with investee companies to encourage them to adopt best practices;
- the exercise of voting rights taking ESG issues into account.

FINANCING

"Crédit Agricole CIB has adopted a CSR policy as part of its financing management"

In the area of project financing, Crédit Agricole CIB has implemented a risk management system based on the environmental and social impacts related to transactions and customers, which is described in its CSR Policy published in 2017 and regularly updated.

Crédit Agricole CIB has been guided since 2003 by the Equator Principles, to which it adhered from the onset. These principles are a voluntary commitment to carry out a detailed analysis of the environmental and social aspects of each new project financing and to require that new projects be developed and operated in accordance with the environmental and social standards of the International Finance Corporation.

This ESG risk management system is based on:

- The application of the Equator Principles, which provide a methodological framework for assessing ESG risks for operations directly related to a project;
- The CSR sectoral policies published by the Group, which specify the criteria for analysis and exclusion in all transactions for sectors where social and environmental issues have been identified as the most important: arms, energy, mining, transportation, transport infrastructure, construction, agriculture and forestry. In addition, these policies and the related processes are subject to continuous improvement.

Transactions where there is significant uncertainty as to compliance with the Policy will be examined in accordance with the decision-making processes in place within the Group entity concerned.

In order to best support LCL's corporate customers, the Sustainable Solutions and Decarbonisation department, with nearly 25 employees, was created in early 2025. Its multidisciplinary teams support corporates in their energy, environmental and societal transitions. Sustainable solutions managers have been appointed at regional level in order to be as close as possible to the issues surrounding customers' sector transitions and to oversee the rollout of green and CSR solutions to customers within their region.

With regard to the financing of its corporate customers, LCL Banque des Entreprises has introduced targeted financing (for projects having a positive environmental impact, promoting the energy transition and/or having a social dimension), indexed loans (with defined ESG criteria) and loans to be indexed (with ESG criteria to be defined or in the process of being defined). For indexed loans (with defined ESG criteria), the interest rate is indexed, both upwards and downwards, to the company's own ESG performance criteria.

In 2025, LCL also implemented a system for incorporating ESG criteria into corporate lending decisions, including:

- sector-specific CSR policies;
- a new questionnaire on climate and environmental risks;
- new capabilities to conduct ESG risk analyses on customers or transactions;
- strengthening ESG risk analysis within the credit committee.

PARTICULAR ATTENTION IS PAID ON A VOLUNTARY BASIS TO CLIMATE RISK MANAGEMENT IN FINANCING AND INVESTING PORTFOLIO DECARBONISATION PATHWAYS

"The Crédit Agricole Group has adopted a transition plan and joined four GFANZ NZ alliances in 2021: Net Zero Asset Managers Initiative and Net Zero Asset Owner Alliance, as well as Net Zero Insurance Alliance and Net Zero Banking Alliance, whose articles of association were updated in 2024 and 2025, respectively"

Committed to the climate and the transition to a low-carbon economy, the Crédit Agricole Group has adopted a climate transition plan with three complementary focuses:

1. Carry out mass financing and investments in renewable energies, low-carbon infrastructure, clean technologies and energy efficiency projects;
2. Support all customers in their climate change-related transitions: individuals, SMEs, corporates, farmers etc.;
3. Accelerate our withdrawal from fossil fuels by halting funding to new fossil fuel extraction projects and adopting a selective approach to supporting energy companies.

Rolled out in 2019, the principle of this ambitious plan is to gradually reallocate the Group's financing and investment portfolios, in line with the targets of the 2015 Paris Agreement and the base scenarios, including that of the International Energy Agency (IEA).

As a member of UNEP FI, the United Nations Environment Programme Finance Initiative, the Group has taken action through alliances and coalitions ⁽¹⁾, relying on science-based methodologies and market standards to develop its climate transition plan and set ambitious targets for its financing, investment and insurance business lines.

(1) Joining the four GFANZ NZ alliances in 2021: Net Zero Asset Managers Initiative and Net Zero Asset Owner Alliance, as well as Net Zero Insurance Alliance and Net Zero Banking Alliance, which saw changes in their status in 2024 and 2025, respectively.

5.4. WHISTLEBLOWING SYSTEM

5.4.1 WHISTLEBLOWING POLICY

The Crédit Agricole Group has a system for collecting and reporting alerts that is available to all employees, as well as to third parties. This system allows for all types of ethical issues to be reported, including those falling within the scope of the Vigilance Plan, which has a dedicated category for the protection of human and social rights and the environment. The system complements the options available to employees to make a written or verbal report internally to their line manager or any other manager, as well as to the Compliance department or the Human Resources department.

This system, which has been developed in consultation with the trade unions representing Crédit Agricole S.A., is open to Group employees, external and occasional employees, job applicants (when the information was obtained as part of their application), former employees (when the information was obtained as part of that relationship), shareholders, partners and holders of voting rights at the entity's General Meeting, members of the administrative, management or supervisory bodies, suppliers or subcontractors and any third party wishing to make a report.

5.4.2 RECEIVING AND HANDLING REPORTS

The Group's internal procedure for receiving and handling reports ensures that all reports are dealt with in the strictest confidence, promptly, impartially and independently.

All parties involved in handling reports must sign a confidentiality agreement.

Notifications may be sent anonymously. An acknowledgment of receipt is sent within seven working days following receipt of the report. The person submitting the report is told whether it is admissible and, if necessary, informed of the reasons why it does not meet the conditions required by law. Whether the person submitting the report chooses to give their name or remain anonymous, they will still be able to converse with the person responsible for handling the report via the secure and encrypted "dialogue box" within the tool. The details of the person filing the report, the facts of the case and the persons involved will remain confidential.

Within a reasonable period, and no more than three months from the acknowledgement of receipt of the report, the person submitting the report is informed of the measures envisaged or taken to investigate the allegations and, where appropriate, to address the issue raised.

Depending on the nature of the issues raised or the complexity of the investigations required, the handling of the report may extend beyond the above-mentioned three-month period. If so, the person who submitted the report will be informed of this extension.

Where the person who submitted the report discloses, without financial compensation and in good faith, information that falls within the scope of application of the whistleblowing policy, he or she will benefit from the legal protection afforded to whistleblowers against professional retaliation, threats, discrimination and disciplinary sanctions in relation to the report made.

An Internal Whistleblowing Officer is appointed at the highest level in each entity (the CEO of the entity or his or her deputy). The officer is assisted by a dedicated team (expert employees from the Human Resources or Compliance department).

Reports can be made via a secure platform, accessible 24/7 from a single independent link: <https://www.bkms-system.com/groupe-credit-agricole/alertes-ethiques>. It is available in nine languages (French, English, German, Spanish, Italian, Dutch, Portuguese, Polish and Ukrainian).

The tool is ISO 27001 certified. It guarantees strict confidentiality (encrypted and secure dialogue box, anonymisation of personal data contained in reports) and traceability of audits.

The system covers the entire Crédit Agricole Group: more than 350 entities with around 550 employees can use the tool to handle notifications. It facilitates the quantitative and qualitative analysis of notifications (number and type) which contributes to the assessment of the risks of non-compliance and the evaluation of the prevention measures to be implemented. Awareness-raising actions are carried out at the level of the various Group entities: creation of a shared documentation space, awareness-raising for new hires, information campaigns, distribution of guides for employees responsible for notifications, training of users in the use of the notification processing tool.

The Group procedure requires the entity's local officers to escalate sensitive reports to the Group Head of Compliance, in their capacity as Group Internal Whistleblowing Officer. Sensitive reports are those involving an executive of the entity, those with a significant reputational risk for the Group or those containing allegations of corruption, for example.

"A Group-level committee, chaired by the Group Head of Compliance in their capacity as Group Internal Whistleblowing Officer, monitors the handling process for internal reports"

A Group-level committee, chaired by the Group Head of Compliance in their capacity as Group Internal Whistleblowing Officer, oversees internal reports during weekly closed-door meetings (Group Compliance and Group Legal) to monitor the handling process within the Group. The Group Internal Whistleblowing Officer may bring in other central departments (HR, Audit) as needed, if the complexity or sensitivity of a report so requires.

If necessary, the Group Internal Whistleblowing Officer may inform the CEO and/or Deputy General Manager,

A Group-level committee meets at least once a year. A report is presented to the committee so that it can evaluate the mechanism based on statistical and qualitative data from reports and geographic areas of origin, and decide on any changes to the overall processing framework.

All committee members sign a confidentiality agreement.

The Committee's assessment is taken into account, where appropriate, to update the risk map or to initiate internal controls on the malfunctions reported.

Key data is forwarded to the Executive Management of Crédit Agricole S.A. via the Executive Committee and the Board of Directors.

5.5. SYSTEM FOR MONITORING THE ACTIONS IMPLEMENTED AND EVALUATING THEIR PERFORMANCE

5.5.1 REVIEW OF ACTIONS TAKEN IN 2025

ACTIONS TAKEN IN 2025

- ▶ **Crédit Agricole S.A.'s Medium-Term Strategic Plan, ACT 2028, lays the foundations for its ambitions for the future as a leader in Europe, a leader in new technologies and a leader in transitions. The three strategic pillars of this Medium-Term Plan are Acceleration, Transformation and Cohesion:**
 - A for Acceleration: A stronger acceleration to widen our playing field;
 - T for Transformation: A faster transformation and efficiency gains;
 - C for Cohesion: Combining the strengths of all our business lines for the benefit of customers.
- ▶ **We are strengthening our climate and environmental commitments. Thanks to our business lines, we are also mobilising in support of the demographic transition by facilitating intergenerational transfer.**
- ▶ **The Code of Ethics of the Group was updated in 2025, emphasising Crédit Agricole Group's commitment to respect for human rights, the fight against discrimination and the promotion of quality of life at work and social dialogue.**
- ▶ **Two new Crédit Agricole S.A. sector-specific CSR policies, "Electricity" and "Road transport", were disseminated internally after being approved by the Board of Directors of Crédit Agricole S.A. They have been adopted by the entities concerned in line with their own policies and adapted to reflect the nature of their business.**
- ▶ **A brochure was produced on the Group's Human Rights Protection approach for the CSR officers of each Group entity. The aim is to make our commitments and actions in terms of vigilance and human rights protection accessible to as many people as possible through a concise, informative brochure.**
- ▶ **The dialogue on the vigilance approach continued with social partners at the Crédit Agricole S.A. level:**
 - Meeting of the Consultation Committee on 15 May 2025: presentation of the 2024 Vigilance Plan and our roadmap for 2025.
 - Monthly meeting of trade union representatives of the Crédit Agricole S.A. to monitor the development of the 2025 Vigilance Plan.
 - The report on the procedures for drawing up the Vigilance Plan and its implementation was presented to UNI Global Union at a meeting held on 29 January 2025.
- ▶ **Regarding the Group's Purchasing business line:**
 - An update of the methodology for identifying high-risk purchasing categories was conducted, resulting in the addition of two new purchasing categories deemed to be most at risk.
 - The weighting of CSR criteria in the tender evaluation process was increased in order to further integrate sustainability matters into supplier selection.
 - The scope of the media coverage analysis was expanded to the two categories deemed most at risk and to the top 100 suppliers by expenditure.

5.5.2 MONITOR AND EVALUATE PERFORMANCE

Furthermore, the vigilance measures implemented by Crédit Agricole S.A. and the Group entities form part of the broader framework of risk management, which, depending on the sector, may be governed by specific processes and action plans. These actions are monitored using regularly updated indicators, to ensure

that the Group effectively meets its compliance obligations, including its obligations to prevent the risks covered by the law on the duty of vigilance. These indicators are a concrete tool for reporting on the effective implementation of the Vigilance Plan.

Area of vigilance	Means/results indicator	2025	Scope	2024	Scope	2023	Scope
Our ethical principles	Share of employees who took part in the "Ethics and You" quiz (in %)	93.1	Crédit Agricole S.A.	83.7	Crédit Agricole S.A.	52	LCL, Crédit Agricole CIB, Amundi, CA Consumer Finance, CAL&F, CA Italia, CA Assurances, CA Bank Polka, CASA ES, CACEIS, CA-GIP, CAPS, CA Immobilier, CAIWM, AVEM, Uni-medias
Maintaining occupational health and ensuring equity in social protection	Average number of days' absence per employee	16.4	Crédit Agricole S.A.	14.6	Crédit Agricole S.A.	15.6	Crédit Agricole S.A.
	Average number of days' absence per employee as a result of an industrial accident	0.2	Crédit Agricole S.A.	0.1	Crédit Agricole S.A.	0.3	Crédit Agricole S.A.
	Average number of days' absence per employee for reasons related to parenthood	4.3	Crédit Agricole S.A.	4.2	Crédit Agricole S.A.	4.5	Crédit Agricole S.A.
	Average number of days' absence per employee for other reasons	12	Crédit Agricole S.A.	10.3	Crédit Agricole S.A.	10.8	Crédit Agricole S.A.
Ensuring the safety and security of employees	Percentage of entities having trained their employees in safety habits (practice)	100	Crédit Agricole S.A.	100	Crédit Agricole S.A.	100	Crédit Agricole S.A.
Combating discrimination	Percentage of women in the highest decision-making bodies (this refers to the highest decision-making body of each entity, i.e. the Executive Committee where there is one or, failing that, the Management Committee)	33.3	Crédit Agricole S.A. Parent Company	29.4	Crédit Agricole S.A. Parent Company	35.3	Crédit Agricole S.A. Parent Company
	Direct employment rate of people with disabilities in France (as a %)	6.22	Crédit Agricole S.A. (France)	5.95 ⁽¹⁾	Crédit Agricole S.A. (France)	5.44	Crédit Agricole S.A. (France)

Area of vigilance	Means/results indicator	2025	Scope	2024	Scope	2023	Scope
Maintaining a social dialogue within the Group	Number of collective agreements signed during the year by Crédit Agricole S.A. entities	194	Crédit Agricole S.A.		Crédit Agricole S.A.		Crédit Agricole S.A.
	– in France	81		80		104	
	– outside France	113		115		108	
Ensuring that suppliers and sub-contractors with whom we have an established relationship accept commitments related to the Group's vigilance system	Percentage of contracts of the types made available by Crédit Agricole S.A. to its subsidiaries that include the "Duty of vigilance" clause	100	Crédit Agricole S.A.	100	Crédit Agricole S.A.	100	Crédit Agricole S.A.
	Percentage of contracts with active suppliers (>€50K) that include the "duty of vigilance" clause	100	Crédit Agricole S.A.	97	Crédit Agricole S.A.	100	Crédit Agricole S.A.
	Methodology: sampling						
Assessing and managing significant Environmental, Social and Governance (ESG) risks in our Purchasing	Percentage of Crédit Agricole S.A. buyers who have completed the "Responsible Purchasing" training	80	Crédit Agricole S.A.	82	Crédit Agricole S.A.	86	Crédit Agricole S.A.
	* Share of expenses CSR-assessed by an independent third party (%)	44	Crédit Agricole Group	40	Crédit Agricole Group	-	Crédit Agricole Group
	Number of suppliers assessed	3,512		3,486		3,209	
Preventing discrimination in access to financial services and insurance or supporting vulnerable customers	Number of financially vulnerable customers supported	88,403	LCL	59,986	LCL	50,693	LCL
	Number of vulnerable customers receiving support	13,938	CAPF (France), Agos & Credibom	16,323	CAPF (France), Agos & Credibom	17,112	CACF France & Agos Italy
ESG strategy (investments)	Responsible Investment Assets (in billions of euros)	1,048	Amundi	982	Amundi	886	Amundi
Climate strategy	GHG emissions related to all financing (SAFE methodology) in millions of tCO ₂ eq. (tonnes of CO ₂ equivalent)	165.6	Crédit Agricole S.A.	102	Crédit Agricole Group	112	Crédit Agricole Group
Alert follow-up	Number of alerts per year in the whistleblowing tool	237 (of which 31 relate to human and environmental rights)	Crédit Agricole S.A.	158 (of which 13 relate to human and environmental rights)	Crédit Agricole S.A.	139 (of which 16 relate to human and environmental rights)	Crédit Agricole S.A.

(1) This indicator is the result of the weight of disabled workers employed within the Group (BOETH in France, i.e. beneficiaries of the obligation to employ disabled workers) relative to the average workforce headcount covered by the Group Disability Agreement. Entities covered by said Agreement include Previsio, CATE, Amundi Transition Energetique, SIRCA Groupe, VIAREN Groupe, SUDECO, Auxiliaire Pharma.

* Change of metric in 2024.

5.5.3 2026 OUTLOOK

The cross-disciplinary actions planned are as follows:

- Provide the overall framework for the implementation of the future European directive in the entity and its transposition into French law;
- supplement our sector-specific policy framework;
- lead the change process through acculturation initiatives aimed at departments and entities;
- Identify and share the best practices already in place within the Group's entities in order to facilitate change.

EMPLOYEES

The year 2025 marked the completion of act two of the Group's Human-centric Project, which was rolled out in 2022, aiming to amplify the managerial, cultural and organisational transformation of the Crédit Agricole Group, as well as to ramp up support for new societal expectations. On 18 November 2025, Crédit Agricole S.A. launched the new Medium-Term Plan, ACT 2028, which lays the foundations for the Group's ambitions for the future as a leader in Europe, a leader in new technologies and a leader in transitions. The three strategic pillars of this plan are Acceleration, Transformation and Cohesion.
